According to dredging project, which is to be effected, the depths of the Approach Channel and at the berths are to be increased to 6.0 m.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).

RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	*Frequencies (MHz) working*	*calling*	*Kind of transmission*	*Time of work*
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Harbour Master on VHF Channel 10.

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo, services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.

TUGS: If necessary, are ordered by the Master after having consulted the Pilot.

BERTHING: The berths of the port have depths alongside of up to 5.3 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed Force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another 2 vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 20 tons lifting capacity.

FRESH WATER: Available at berths.

FUEL: Diesel oil available.

CONSULS: None.

REPAIRS: Only minor repairs possible.

TIME: GMT plus 3 hours October to March. GMT plus 4 hours April–September.

DEVELOPMENTS: See "Restrictions".

AUTHORITY: The Port of Belgorod-Dnestrovsky Authority, 81 Shabskaya Street, 272300 Belgorod-Dnestrovsky, Odessa Region, Ukraine. *Tel:* 2-25-51. *Cables:* Morport Belgorod-Dnestrovsky

AGENT: Shipping Agency "Inflot" in the Port of Belgorod-Dnestrovsky. Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, Odessa Region, Ukraine. Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-22-01; 2-56-73. Telex: 232217.

BERDYANSK: 46.37 N. 36.36 E. (See Pla

DOCUMENTS:
5 Crew Lists.
5 General Declarations.
4 Cargo Declarations.
2 Crew's Effects Declarations.
1 Master's Declaration.
1 Master's Declaration about arrival at a Commercial Port of t Ukraine.
2 Stores Lists.
1 Maritime Declaration of Health.

For discharging vessels also: Manifests, Bills of Lading and Carg Plan.

For all vessels, necessary to have all Ship's Papers and Shi Certificates.

APPROACHES: The Port of Berdyansk is situated in the N.E. part Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-break assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channe with a least depth of 8.2 m.

PILOTAGE: Pilotage is compulsory in Azov Sea. Kerch Pilot mee vessel near the entrance to the Kerch Strait and takes vessel t Berdyansk. Berdyansk Pilot meets vessels within draft 6.0 m. and mo at Reception Buoy No. 2 (Lat. 46° 36.75' N., Long. 36° 36' E.), an vessels with draft less than 6.0 m. at Reception Buoy No. 1 (Lat. 46° 40' N., Long. 36° 40' E.). Telegraphic address of Pilot Statio is: "Harbour Master Berdyansk". Vessels bound for Berdyansk shou cable "Inflot Berdyansk Ukraine"/Ship's Agents/advance notice of ET ETA Berdyansk (date shown in group of four figures and if possible GM of arrival); draft, beam, depth to upper deck, flag, b.r.t., n.r.t., length for discharging, kind of cargo should also be advised. After which Inf arranges pilotage through Kerch Channel. First notice of ETA to be se after leaving last port and then 72, 48 and 24 hours' notice of ETA.

For contacting Pilot Station use VHF Channel 16. Pilot boat has white hull with black writing on her side: "Pilot-29". Vessels wait for t Pilot at the outer road anchorage.

ANCHORAGES: Vessels may obtain good anchorage with depths to 8.0 m. in the Port of Berdyansk outer roads situated on both sides the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but dur Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usua effected by heavy pitching and rolling, and plenty of cable should paid out on both anchors. Holding ground in outer roads is shell a mud.

RESTRICTIONS: Vessels over 170 m. LOA can enter, leave and s berth when the wind speed is less than 8 m./sec. The possibility manoeuvring such ships when wind speed is over 8 m./sec. determined by the Pilot.

MAX. SIZE: The max. permitted draft for entry to the port is 7.9 if max. draft then even keel. The max. permitted length for entry into t port is 205 m. Sometimes with the Harbour Master's permission, vesse with max. length 225 m. may be allowed to berth at Piers No. 7 and

HEALTH: To obtain Pratique it is necessary to complete 1 Mariti Declaration of Health and hand it in for doctor. In the event of any disea or fever contact Agents.

Vessels, which are not equipped by special collecting tank for fe (domestic) waters with standard international connection on the up deck, are prohibited entry into Ukrainian ports.

RADIO: *Notice of Arrival:* 96 hours and then 12 hours prior to arriva the port, Masters should advise the Port Administration via the lo Inflot Agency, time of arrival and the maximum draft of a vessel. N later than 2 hours prior to approaching Reception Buoy No. 2, placed the beginning of the approaching channel, Masters should advise m precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Rad Port Radio Station operating 24 hours daily on the following frequenci

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*
UBX	500/418	500	A1A
"Berdyansk-Radio-2"	2182	2182	H3E
"Berdyansk-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E
"Berdyansk-Radio-5"	156.8*(16)	156.8*(16)	F3E

*Frequencies are given in MHz.
**Central Port Radio Station.

RADAR/VHF: There is no port radar service in Berdyansk.

Use VHF Channel 16 initally and further communication on an Channel on agreement.

TUGS: Join vessels abreast of breakwater. Vessel's lines usually u No extra charge for tug lines. Vessels under 1,500 g.r.t. require 1 and vessels over 1,500 g.r.t. require 2 tugs.

BERTHING: Berths No. 1 – 2: Length 380 m. These berths ar general cargo. Berths No. 3 – 4: Length 270 m. These berths ar bulk cargoes (ores, minerals). Berth No. 5: Length 232 m. This ber scrap iron. Max. permissible draft 7.9 m. Berth No. 6: Length 13 Berths No. 7 – 8: Length 351 m. Berth No. 9: Length 140 m. U discharge is by shore equipment. Depths alongside Berths No. 1 – to 7.9 m.

CRANES: All quays are equipped with electric cranes. Berths No 2 are equipped with SOKOL type crane, of up to 32 tons capacity. B No. 3 – 4 – 5 are equipped with Albatros type crane, of up to 20 capacity. Berth No. 8 crane type SOKOL.

SPECIALISED CARGO-HANDLING FACILITIES: None.

BRIDGES: None.
STEVEDORES: Provided by the Port of Berdyansk. Tel. Manager: 62-565.
MEDICAL: Medical attendance possible. All members of the crew must have sanitary (yellow) book indicating vaccinations, fever, etc. One hospital available.
TANKERS: No facilities available.
DENSITY: Approximately 1008. Salinity is 11.9.
FRESH WATER: Supplied at berths.
FUEL: Available in limited quantities. Supplied by special tanker.
CONSULS: No consuls in Berdyansk.
REPAIRS: Only minor hull and machine repairs.
DRY DOCKS: No dry dock in Berdyansk.
SURVEYORS: Inspection of the Registry of the Ukraine Branch Office; Tel. 62-452. Independent Surveyors available for Draft Survey and checking quantity of bunkers onboard.

Contact Maritime Agency "Inflot" (See "Agent").

GANGWAY/DECK WATCHMEN: Not compulsory or necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, wine, spirits are free of Bond.
CARGO GEAR: There are cargo-handling equipment and intraport transport facilities. No heavy lift crane.
REPATRIATION: Possible.
AIRPORT: Distance 15 km. Internal Soviet airlines only.
TIME: GMT plus 2 hours October to April. GMT plus 3 hours April to October.
HOLIDAYS: New Year's Day (1st January); Christmas (7th January); International Woman's Day (8th March); Easter; World Labour Days (1st – 2nd May); Victory Day (9th May); Independence Day (24th August); Anniversary of the Great October Socialist Revolution (7th – 8th November). Cargo work can be arranged on above days.
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.
TELEPHONES: Not possible to place telephones onboard.
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office. Tel: 62-731, 62-449, 3-63-03. VHF: Channel 16.
BANKS: State Bank of the Ukraine only.
STORING: See "Prelims".

1. Barge or truck.
2. Vessels can be stored by barges during cargo operations.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used.
5. Storing under Customs permission and control.
6. Local riggers can be employed.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required. Only Seaman's Passport.
GARBAGE DISPOSAL: Special metallic containers are installed on the pier alongside the ship by port's garbage service, and exchanged when full by the same service. To reserve garbage disposal, Master should send information by radio to Agency Inflot, simultaneously with arrival information.
WASTE OIL DISPOSAL: The port is equipped by a special ship which can collect separately 340 tonnes of oily mixture waters and 86 tonnes fecal waters. For pumping out of these waters, hoses from special boat only should be used. Strictly prohibited to mix oily waters with fecal or any sanitary waters. To reserve special ship, radio message should be sent before arriving to Agency Inflot. Before leaving port, all vessels must discharge all fecal waters into special ship, without additional payment.

Also see "Health".

SEAMAN'S CLUBS: There is a Seamen's Club at the port at Ul. Frunze 1, 332440 Berdyansk, Ukraine. Tel: 62-543. Facilities: No international telephone, church service or postage facilities are available at Seamen's Club. All other services are possible.
CURRENCY: Ukrainian Coupon.
AUTHORITY: The Port of Berdyansk Authority, 13/7 Gorky Street, Berdyansk 332440, Ukraine. *Tel:* 3-63-63, 62-731. *Telex:* 127441. *Cables:* Harbour Master Berdyansk. *FAX:* 3-63-03. *Contact:* Port Director (Tel: 3-22-10). Harbour Master (Tel: 62-731).

AGENT: Maritime Agency "Inflot" at the Port of Berdyansk. Postal address: 13/7 Gorky Street, Berdyansk 332440, Ukraine. Tel: 62-539, 62-639, 3-34-42. Telex: 127564 Sudak. Cables: Inflot Berdyansk.

CHERNOMORSK: 45.30 N. 32.40 E. **(See Plan)**

Chernomorsk is a sea port, situated on the coast of Yarylgach Bay of the Black Sea, on the North-Western part of Crimea Peninsula, safe and well protected against rough seas. Vessels should proceed to the port through the 980 m. long channel. Depth in the channel is 9.0 m. Navigation in the port is all year round.
PILOTAGE: Pilotage is compulsory for all vessels of or over 100 g.r.t. Pilotage effected at daytime only. Embarkation and disembarkation of the pilot is performed near the Reception Buoy of approach channel.
ANCHORAGE: Anchorage with depths up to 14.0 m. is available within the outer port roadstead and marked by Anchorage Light Buoy (Lat. 45° 34' 12" N., Long. 32° 48' 42" E.). The holding ground is good.
RESTRICTIONS: Vessels to proceed through the channel only with Harbour Master's permission.

Entry into the port is allowed for vessels with draft up to 6.0 m. and maximum height (from water level) of 20 m. Vessels should proceed through the channel at a speed of not more than 3 knots.

RADIO/VHF: Communication is effected through the port radio station UJB-2:

Call Sign	*Frequency (kHz)*	*Time of Work*
"Chernomorsk-1"	500 and 4184	
"Yarylgach 92"	VHF Channel 6	H24

Telephone: (06558) 91390. Fax: (06558) 91849. Teletype: 187755 Yakor. Telex: 187125 Ptb Su.
Notice of Arrival: When approaching the port of Chernomorsk, Masters should advise, with 48 hours notice, the Harbour Master of ETA, draft, maximum height of vessel in ballast (from water level to the top of the mast), type and quantity of cargo, services required by the vessel. 12 hours prior to arrival, a more precise ETA notice is required.

Ukrainian vessels should not later than 24 hours prior to arrival advise the Harbour Master of ETA, and 4 hours prior to arrival more precise ETA.
TUGS: If necessary, tugs can be ordered by the Master after consulting with pilot. The tugs are compulsory for the vessels with drafts of more 5.5 m. Tugs with power of 150 h.p. and 1,600 h.p. are available.
BERTHING: Total length of berths 1,600 m. Depth alongside 5.5 m. – 6.5 m.

The berths are equipped to handle timber, containers, general and other cargoes. Open storage and a floating crane of 100 tons lifting capacity are available.
FRESH WATER: Available from tug.
FUEL: Bunkering is not guaranteed.
REPAIRS: Only minor repairs may be effected. Underwater surveys could be performed.
DRY DOCKS: Floating dock of 5,000 tons capacity available.
GENERAL: *Transport:* The port is linked with the towns of Sympheropol, Sevastopol and Yevpatoria by bus, provided with main road of 37 miles as far as Yevpatoria. Nearest major sea ports: 90 miles – Sevastopol and 100 miles – Odessa.
AUTHORITY: The Port of Chernomorsk Authority, Chernomorsk, set. Chernomorskoe 334360, Crimea, Ukraine.

AGENT: General Agent: Inflot Odessa. Telex: 232124. Fax: 221264.

Local Agent: Inflot Sevastopol. Telex: 197316.

DNEPROBUGSKY: 46.35 N. 31.57 E.

SHIPMASTER'S REPORT: October 1991.

VESSEL: Bulk carrier. Cargo: 22,530 tonnes of bulk bauxite.

Arrival draft: 9.73 m. (F.W.).
GENERAL: The port is open for navigation all year round.

When proceeding to Dneprobugsky the following message must be sent to "Morflot Odessa Traffic Centre".

(a) Vessel's name.
(b) Flag.
(c) Owners.
(d) N.R.T.
(e) LOA.
(f) Beam.
(g) Moulded depth.
(h) Draft.
(i) Last port of call.
(j) Destination.
(k) Technical condition of main engine and steering gear.
(l) Course when approaching the area.
(m) Reason for call.
(n) ETA area.

Subsequent messages should contain only item (n).
APPROACHES: Compulsory reporting to "Ilichevsk Traffic Control" prior to reaching the Sea Buoy and when entering separation schemes off Ilichevsk port.

When berth or pilot are not available vessel should anchor at Anchorage No. 351, S.E. of Ilichevsk port. Otherwise according to port control instructions.
PILOTAGE: Compulsory. When proceeding to Dneprobugsky, Sea Pilot is embarked in the area East of the Ilichevsk port entrance, close to the Fairway Buoy. Otherwise N.E. of the "T T S" Turning Buoy.

Port Pilot is embarked in the channel, approximately 1 mile to 2 miles South of the port (Dneprobugsky).

The Brusko Dneprovsko Limanski Kannal is very narrow and well marked but from Buoy No. 48 up to Dneprobugsky no navigation aids are shown on B.A. Chart No. 2200. Shore based traffic control covers the area and advises pilots whenever necessary.
ANCHORAGE: Area West of the approach channel nearly up to Dneprobugsky port is considered as a local anchorage (waiting area), it is open to North winds.
RESTRICTIONS: Navigation through the channel restricted during night time and in poor visibility, in such cases vessels anchor at Anchorage No. 360.

Permitted draft for passing the channel is 9.75 m. and safe speed is about 8 knots.

Great care to be taken when turning in the narrow areas of the channel due to shallow waters.
HEALTH: Free Pratique normally granted after mooring.
TUGS: Three tugs used for mooring, ship's lines used. Charges for use of tugs is high.
BERTHING: Port has an effective berthing length of about 400 m. – 500 m. accommodating tugs, barges, small and large vessels.

The berth is equipped with 3 large bridge cranes with grabs.

Large stock of bauxite stowed on the open wharf.

No serious damage sustained during discharging.

MEDICAL: Hospital facilities available, mainly in Nikolayev area. Cases of cholera in the area reported by port authorities.
CUSTOMS ALLOWANCES: No limits on quantities, but nothing to be taken ashore.
FRESH WATER: Available, but not suitable for drinking.
FUEL: Supply not guaranteed.
DENSITY: Fresh water in the area around the port.
REPAIRS: Minor repairs can be carried out.
DRY DOCK: Small floating dry dock situated in the port.
OPENING/CLOSING HATCHES: Normally by crew.
TIME: GMT plus 2 hours.
SHORE LEAVE: Allowed. No extra permission required for Nikolayev area which is about 35 km. North of Dneprobugsky.
AGENT: Main Agent: Inflot Odessa. Local Agent: Inflot Nikolayev.

EVPATORIA: 45.11 N. 33.23 E.

GENERAL: The port of Evpatoria is situated on the Northern Coast of Evpatoriyskaya Bay of Kalamitskiy Bay (Western part of the Crimean Peninsula).
PILOTAGE: Compulsory for the vessels over 200 g.r.t. The embarkation and disembarkation of the Pilot is carried out near the Reception Buoy in the vicinity of Karantinniy Cape. Pilot requires 12 hours notice.
APPROACHES: The port has an open roadstead that covers the area of Evpatoriyskaya Bay. Depths in the roads are up to 10.0 m.
ANCHORAGE: Anchorage No. 382 is situated 1.1 miles S.E. of Karantinniy Cape. Available depths are 11.4 m. – 12.4 m. Ground is sand and shells.
RESTRICTIONS: When wind speed from a Southern direction is more than 9.0 m./sec., vessels in the roads may be delayed.
MAX. SIZE: Maximum draft for dry cargo vessels is up to 6.0 m. and max. length 100 m. The restrictions for passenger vessels are 7.0 m. and 200 m. respectively.
RADIO/VHF: VHF communication through Channel 16.
RADAR: No shore based radar stations available.
TUGS: Number of the tugs depends on g.r.t. For vessels up to 500 g.r.t., one tug with 1,200 h.p. capacity and for vessels over 500 g.r.t., 2 tugs are required.
BERTHING: 4 berths are available in the port. 3 berths for passenger vessels (No. 2, 3 and 4), and one berth for cargo vessels (No. 5). Port is equipped with cranes for handling general and bulk cargo, steel products, etc. Warehouses and open storage facilities are available.
MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.
FRESH WATER: Available.
AIRPORT: Nearest airport is located in Simpheropol, a distance of 80 km.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: January 1st; January 7th; March 8th; May 1st; May 2nd; May 9th; August 24th; November 7th; November 8th; Easter (one day); St.Trinity (one day).
POLICE/AMBULANCE/FIRE: Ordered through Agent.
IDENTIFICATION CARDS: Required.
AGENT: *General Agent:* Inflot Odessa. Telex: 232124 Inf Su.
Local Agent: Sevastopol Inflot Maritime Agency, 5 Pl. Nakhimlva, 335054 Sevastopol, Crimea, Ukraine. Tel: (0690) 524411. Telex: 197316. Cables: Inflot Sevastopol.

ILICHEVSK: 46.19 N. 30.40 E. (See Plan)

GENERAL: The Port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Eastern side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.
APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.
PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18' N., Long. 30° 44' E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.

Vessels proceeding to ports of Kherson, Nikolaev and Yuzhnyy take Pilot in the Outer Roads of Ilyichevsk (Lat. 46° 15' 06" N., Long. 30° 56' 01" E.).
ANCHORAGES: Good anchorage can be obtained in the outer road situated at a distance of 3 to 7 miles off the coast between the paralle of 46° 12' N. and 46° 18' N. The outer roads are open to all winds blowin from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 351) is situated about 3 to miles to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads ar 19.2 m. – 25.5 m.
RESTRICTIONS: Entry to the port can be effected day and night.

In the night time movement of the vessels with length more than 200 m is subject to special permission of the Harbour Master.

Vessel's speed should not exceed 6 knots when navigating along th channel.
MAX. SIZE: The maximum permitted draft is 11.8 m., length 280 m.

Vessels drawing over 11.8 m. must obtain the Harbour Master's perm for entry to the port.
HEALTH: Foreign vessels granted Free Pratique when berthe alongside and all arrival formalities accomplished by the boardin officials, irrespective whether day or night. If berthing delayed, unde certain circumstances vessel may be granted Free Pratique at road where anchored. Event suspected disease Master shall inform Agent b radio. When arriving from another Ukrainian port, Free Pratiqu automatic.
RADIO: Channel 16 (156.80 MHz) for radio-telephone used for callin only, with subsequent switch to any other Channel. All informatio addressed to ship's Agent.

Radio contact can be established through the port radio statio "Ilichevsk Radio" operating 24 hours daily on the following frequencies

Call sign	*Frequencies (MHz)* *Working*	*Calling*	*Type of trans- mission*	*Time of Wor*
"Ilichevsk Port control"	156.6(12) Main	156.6(12)	F3E	H24
"Ilichevsk Traffic control"	156.50(10)	156.50(10)	F3E	H24

The port radar station gives all possible information to all vesse navigating in restricted visibility and in the absence of floating mark from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at th Northern side of the entrance to the port.
TUGS: Normally join vessel when approaching mooring berth. Ship lines used. Number of tugs required for berthing shall be ordered by th Pilot with the Master's consent. Tugs compulsory for vessels ove 1,500 g.r.t.
BERTHING: Quays with depths alongside of up to 12.0 m. are equippe to handle oil, general, 20 ft. and 40 ft. containers bulk and other cargoe There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 45 tons capacity are operated on the qua and by the warehouses. There are floating cranes with lifting capac of up to 300 tons, other cargo-handling equipment and inter-po transport means.

Opening and closing of mechanised hatches is always done by th ship's crew.

In case vessel is moored at the Inner Road buoys the followi requirements should be complied with:

1. Two towing ropes to be kept ready at bow and stern lowered 2 over the water surface.
2. To avoid picking up of mooring anchors ropes should be slack with free board increase whilst discharging.
3. Vessel must be equipped with good pudding fenders to protect boards and floating facilities alongside.

TIDE: The range of the water level caused by strong winds may rea 1 m. The rise of the water level is due to Northerly winds and the fal the water level to Southerly winds.

The changes of the water level caused by variation in atmosphe pressure ("Seish" phenomena) are observed periodically. T phenomena can last from a few minutes up to several days and t range of the water level may reach 0.6 m.
RADAR: Port Radar Station gives all possible technical informatio any vessel navigating within Station's broadcast zone, if request Navigation in channel controlled by Port Radar Station. Communica between Station and vessels established by radio-telephone international frequencies.
STEVEDORES: 12 days' notice is required.
MEDICAL: Medical assistance rendered immediately when request Hospital facilities available. Particular inoculations required prescri by International Sanitary Regulations.
DENSITY: Average density 1010.
FRESH WATER: Available at quays and by barge.
FUEL: Bunkers available.
CONSULS: None.
REPAIRS: Good facilities. All kinds of repairs for vessels of u 60,000 d.w.t. can be carried out.
DRY DOCKS: Docking arrangements settled with Black Sea Steam Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. len 18 m. depth. There are new floating docks with a lifting capac 15,000 tons.
GANGWAY/DECK WATCHMEN: Watch carried out by crew.
OPENING/CLOSING HATCHES: Mechanical hatches by crew.
CUSTOMS ALLOWANCES: No restrictions. Free use on board.
CARGO GEAR: No additional requirements. Cargo work usually ca out by means of shore cranes.
AIRPORT: The distance from Odessa Airport about 30 km.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Official Holidays are Sundays and following Calendar January 1st and 7th; March 8th; May 1st, 2nd and 9th; August November 7th and 8th.
POLICE/AMBULANCE/FIRE: All mentioned services easily obt through Agent.

SERVICES: Ship chandler's supplies, technical equipment supplies, laundry, car hire.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.
DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.
GENERAL: Shipowners should deposit funds for disbursements prior to arrival. All banking operations carried out by Vnesheconombank of Moscow.
DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.
AUTHORITY: Port of Ilichevsk Authority, 6 Truda Square, 270901 Ilichevsk, Odessa Region, Ukraine. *Tel:* 691-605, 691-758. *Telex:* 232115. *Cables:* Morport Ilichevsk. *FAX:* 693606.

AGENT: Economou International Shipping Agencies, 6 Truda Square, Iliychevsk 270901, Odessa Region, Ukraine. Tel/Fax: (380-482) 693006. Telex: 232208 Ceco Ux.

IZMAIL: 45.20 N. 28.51 E. (See Plan)

GENERAL: The sea and river port of Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube River, between the 85th and 94th km.

Navigation is year-round. Icing on occasional hard winters is managed through assistance of ice-breaker-type vessels.

When proceeding to the port of Izmail, Master shall, well in advance, but at latest 24 hours prior to arrival at the port, advise Port Controller and ship's Agency the time of arrival, description and quantity of cargo brought in, location and weights of heavy lifts, if any, number of passengers, ship's draft and length, as well as declare services required of the port. 4 hours prior to arrival at the port, Master shall advise more precise time of arrival.

PILOTAGE: All foreign flag vessels coming to or leaving the port of Izmail are allowed to navigate by the Kilia Mouth with the port of Izmail Pilot on board only. Masters of the vessels proceeding by the Sulina Channel from seaward shall order Pilots 24 hours in advance and confirm the order 4 hours prior to approaching the Chatal of Izmail, to the Harbour Master's office via ship's Agent.

Vessels proceeding by the Prorva Canal from seaward should advise Agent about the time of approaching the Reception Buoy 24 hours prior to arrival. Pilot shall board/disembark vessels at the Reception Buoy of the Prorva Channel (Lat. 45° 30' 07" N., Long. 29° 46' 04" E.) and the Izmail Chatal (116th km. of Kilia Mouth of the Danube River).

ANCHORAGE: Port's roads with depths of 10 m. – 30 m. are situated in the area of the 78th – 96th km. on the left bank of the Kilia Mouth. Bottom is oozy.

Vessels can obtain anchorage in the roads between 95.7 km. – 96.2 km. 50 m. from the left bank area for port examination of sea and river vessels, 91.2 km. – 91.9 km. 100 m. from the left bank area for foreign river barges, 86.7 km. – 87.7 km. 100 m. from the left bank area for sea vessels, 80.0 km. – 86.7 km. (anchorage areas 4, 5, 7, 8, 9, 10, 13, 14) for barges and lechters, 79.5 km. – 80.0 km. 50 m. from the left bank area for quarantine vessels, 78.5 km. – 79.0 km. 50 m. from the left bank area for transit vessels, 78.0 km. – 78.5 km. 50 m. from the left bank area for tankers, 79.0 km. – 79.5 km. 50 m. from the left bank anchorage prohibited for all vessels.

RESTRICTIONS: Draft and length of vessels entering the port of Izmail should be the same as for vessels navigating through the Sulina Channel (7.0 m.) or Prorva Canal (3.0 m. – 3.5 m.). There are no restrictions for day or night entry to the port.

All navigation within the port area is controlled. Zone of regulation begins at the 78th km. up to the 100th km.

Masters of the vessels entering the port area should make contact with the Vessels' Traffic Management Service and inform them of the name of the vessel, draft and place of destination. The Vessels' Movement Control Post will advise the place to anchor. Entry into the port area, shifting and any other movement of the vessel can be arranged with permission of the Vessels' Movement Control Post only. No passing allowed within the port area.

Permissible speed of movement should not exceed 8 km./hr. while navigating upstream and 12 km./hr. while navigating downstream.

HEALTH: International code quarantine signals are to be shown on arrival and Free Pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.

RADIO/VHF: Radio communication can be established through the Port Radio Station "Izmail Radio", some data of which is given below:

Safety Channel – Channel 16.

Vessels Movement Control Port – Channels 14, call sign "Radio-17".

Pilot Service – Channel 14, call sign "Radio-11".

Inspection of the Port Control – Channel 19, call sign "Izmail Radio-2".

Central Port Radio Station – Channels 16 and 72, call sign "Radio-3".

Agent for foreign sea and river vessels – Channels 16 and 67, call sign "Izmail Inflot".

Steamship Agent AO "Udasko" "Transflot" – Channels 16 and 30, call sign "Radio-6".

Agent for sea vessels – Channels 16 and 22, call sign "Izmail Rosmarine".

While navigating between 78th and 100th km. of the Kilia Mouth, all vessels are to keep watch on Channel 16.

RADAR: There is no Port Radar Service.

TUGS: Tugs shall be ordered by the Master as directed by the Pilot.

According to local Regulations for Safety, berthing and unberthing at the berths of the Backwater 90 km., sea-going vessels up to 100 m. in length are to use one tug, and 2 tugs when the vessel's length is more than 100 m.

BERTHING: There are 23 berths with total length 8,294 ft. and depth 4.0 m. – 7.0 m. There are 10 warehouses with a total area of 6 acres. Open storage areas consist of approximately 45 acres. 15.8 acres dedicated to bulk handling, 11.2 acres dedicated to container handling and 18.0 acres dedicated to general cargo handling.

The grain elevator is the property of the Ministry of Agriculture and Food.

CRANES: On the quays there are portal cranes of 5 tons – 40 tons capacity. There are also floating cranes of 16 tons capacity and other cargo handling equipment and machinery. Mobile cranes of up to 25 tons capacity available.

SPECIALISED CARGO-HANDLING FACILITIES: There are specialised berths for handling ISO containers. There are no berths for handling liquid chemicals or LPG carriers.

BRIDGES: No bridges within the port area.

STEVEDORES: The port works round-the-clock, including holidays. Usual ETA advice required.

MEDICAL: No advance notice except in case of serious illness. Hospital and Dental facilities are available.

TANKERS: No tanker berths available.

FRESH WATER: Fresh water can be supplied from the quays or delivered by barges

FUEL: Bunkers available. Prior notice to Agent required.

REPAIRS: Hull and machine repairs can be effected.

GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory, carried out by ship's crew. Ship's gangway used.

OPENING/CLOSING HATCHES: According to the customs of the port opening and closing of hatches is usually by ship's crew but it can also be done by stevedores if requested by Master in advance.

CUSTOMS ALLOWANCES: No restrictions on crew consumption of tobacco and alcohol on board. It is prohibited to take these items ashore.

REPATRIATION: Can be arranged.

AIRPORT: Regular connections with internal services.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

TIDE: Changes of water level in the river are due to effects of the wind and seasonal increase and decrease of the amount of water brought down from the shore. In Winter; rise of water level is due to the ice piling up. Max. range of the water level is about 3.0 m. – 4.0 m.

Max. rise of water level is in April, May and June, usually caused by Easterly winds. The least water level is observed in August, September and October, due to Westerly winds.

HOLIDAYS: New Year's Day (1st January); 7th January; International Women's Day (8th March); Easter; Days of International Workers' Solidarity (1st and 2nd May); World War II Victory Day (9th May); 2nd June (Trinity); 24th August (Independence Day); 7th – 8th November (The anniversary of the Great October Socialist Revolution); Christmas Day.

POLICE/AMBULANCE/FIRE: Police, Tel: 9-03-16; Ambulance, Tel: 9-06-00; Fire, Tel: 9-05-24.

SHORE LEAVE: Allowed up to midnight.

IDENTIFICATION CARDS: Required for crewmen going ashore.

AUTHORITY: The Port of Izmail Authority, 7 Port Street, 272630 Izmail, Ukraine. *Tel:* (04841) 25601. *Telex:* 232286 Izm Ux. *FAX:* (04841) 26258, 25469, 99136. *Cables:* Morport Izmail. *Contact:* Valentin F. Kotelny, Port Director.

AGENT: JVE "Inflot Izmail". Postal address: 14 Port Street, 272630 Izmail, Ukraine. Cables: "Inflot Izmail". Tel: (04841) 21255, 90559, 20463. Telex: 232136. Fax: (04841) 20463.

KERCH: 45.21 N. 36.38 E.

DOCUMENTS:

5 copies Crew List.
5 copies General Declaration.
4 copies Cargo Declaration.
2 copies Crew's Effects Declaration.
International Maritime Declaration of Health.
1 copy Master's Declaration.
Master's Declaration about arrival at the port.
Currency List.
2 copies Stores List.
For discharging: Manifests, Bills of Lading, Cargo Plan.
It is necessary to have all ship's papers and certificates.
Port acts as a transhipment point for trade.

PILOTAGE: Compulsory. Pilots board at the Southern end of the channel, off Light Buoys No. 1 and No. 2, in position Lat. 45° 12' N., Long. 36° 28' E., and at the Northern end of the channel at Varzovskiy Light Buoy. Requests for Pilots should be made to the Captain of the Port by radio, 48 hours and 24 hours prior to arrival at the entrance to Kerchenskiy Strait.

Vessels should advise in advance notice: ETA Kerch, draft, breadth, moulded depth, LOA, flag, B.R.T., N.R.T., type of cargo.

APPROACHES: Charts No. 2216 and 2233.

Through the Kerchenskiy Strait via the narrow Kerch-Yenikalskiy Channel, which connects the Black Sea with Sea of Azov. The Southern part of the channel starts about 8 miles North of the headland of Mys. Takil and is marked by pairs of spar and light buoys in accordance with the IALA system; the Northern part of the channel is entered on the line of the Chushkinskoye leading lights.

The approach channel to Kerch port branches off the strait about 1 mile East of Mys. Belyy, at position Lat. 49° 19' N., Long. 36° 31' E., thence separate channels to the various sections of the port.

Navigation through Kerch-Yenikalskiy Channel should be by the recommended course and fairway only. Pilotage is compulsory.

Vessel's draft allowed: (a) Kerch-Yenikalshiy Channel – 8.0 m.
(b) Kerch-Approach Channel – 7.8 m.

Vessels must navigate through Kerch-Yenikalskiy Channel with a speed of 10 knots. Vessels with draft less than 5.0 m. may navigate with the speed of 12 knots.

Navigation through the Kerchenskiy Strait is controlled by the VTS, its call signal on VHF is "Kerch-Radio-4" (Channel 14).

ANCHORAGES: Anchorage is allowed only in the fixed places No. 450, 451, 453, 454 and inside the roads of the Port Kerch.

Anchorage within the channels, fairways and roads of the Kerch Strait is prohibited.

Anchorages No. 450, 451, 453, 454 within a radius of 6 cables are for the vessels with a draft of 8.0 m.

The co-ordinates of the centres are:

No. 450:	Lat. 45° 11.3' N.,	Long. 36° 29.2' E.
No. 451:	Lat. 45° 09.8' N.,	Long. 36° 33.3' E.
No. 453:	Lat. 45° 28.6' N.,	Long. 36° 37.7' E.
No. 454:	Lat. 45° 28.6' N.,	Long. 36° 44.6' E.

Anchorage No. 451 is for special large tonnage vessels and vessels with dangerous cargo.

RESTRICTIONS/MAX. SIZE: Vessels can enter and leave the port at any time, day and night. Vessels over 160 m. LOA can enter only during daytime and in good weather conditions. The port has the possibility to load vessels with tonnage up to 10,000 tons, but with draft limit up to 7.8 m. There are no bridges. Also see "Approaches".

HEALTH: As demanded by Health Authorities and State Inspection of the Black Sea and Azov Sea, a vessel is to be fitted with sewage chemical or biological treatment plant and fical tank and sludge tank. Both tanks are to be equipped with a pump for dirty water pumping into ports' barges. If the vessel has none of the above named equipment, it will not receive Free Pratique. It is necessary to close and seal the sludge valves from both tanks prior to vessel's call in Kerch, anchorage/Pilot stay. It is necessary to have a construction scheme of official system or tank available, the Factory Certificate together with Medical Certificate, including the chemical and biological analyses, both documents must be used in English or copied. The period of validity of the last Certificate must include the time of call at Kerch Port. All vessels coming to Kerch and in the Azov Sea must change all ballast in open Black Sea.

A Master must send the International Maritime Declaration of Health by radio on frequency 500 kHz. (W/T) and on frequency 2,182 kHz. (R/T), or telex and ETA notice 48 hours, 24 hours, 12 hours and 4 hours prior to arrival.

RADIO/VHF: All vessels must keep a constant watch on VHF Channel 16. Vessels should establish contact through "Kerch Radio" Port Radio Station operating daily on the following frequencies:

	Frequencies		*Type of*	
Call Sign	*Calling*	*Working*	*Transmission*	*Time*
UUO	500 kHz	435/466 kHz	100HA1A	H24
UUO	8362.8 kHz	8366.4 kHz	100HA1A	H24
Kerch Radio	2182 kHz	2182 kHz	2K70H3E	H24
Kerch Radio	4149 kHz	4149 kHz	2K80J3E	H24
Kerch Radio	156.8 MHz	161.95/157.35 MHz	16KOF3E	H24

Also see "Health".

TUGS: Available.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	
1	230	6.8	
3	230	6.8	
4	161	7.8	
5	200	7.6	
6	200	8.1	Ro-Ro
7	200	8.1	Containers

Principal exports and imports: Dry bulk, general cargo, containers and cars on Ro/Ro type vessels.

Tonnage of cargo handled in 24 hours for the vessels of the four groups:

Dry cargo in bulk – 3,000 tons.
General cargo – 1,300 tons.
Containers – 120 pieces.
Cars – 500 pieces.

STEVEDORES: The port works 24 hours a day. The Port Authority act as the stevedoring company.

CRANES: 31 gantry cranes of 5 tons – 32 tons capacity and a floating crane of 100 tons capacity.

Berth No. 1: Cranes of 5 tons for general cargo.
Berth No. 3: Cranes of 10 tons for cargo in bulk.
Berth No. 4-5: Cranes of 10 tons – 32 tons for metal and ferroalloy.
Berth No. 6-7: Cranes of 32 tons – 40 tons for heavy metal construction, container and direct reduced iron.

Cars are handled on Berth No. 4 – 7.

Forklift trucks can be used.

MEDICAL: If there is any disease onboard, the Maritime Agency "Inflot" in Kerch must be contacted. Hospital is within 3 km. – 4 km. of the port.

TANKERS: No facilities.

DENSITY: 1008-1011.

FRESH WATER: Supplied at quays and piers. Cost is about U.S.$5.00 per ton.

FUEL: Not available.

CONSULS: None locally.

REPAIRS/DRY DOCKS: There is a ship repair yard with 2 floating docks with lifting capacity of 8,500 tons and 5,000 tons. Tel: (06561) 21198 and 28392. Fax: (06561) 23506. Telex: 187125 Kerch Ptb Su.

AIRPORT: At a distance of 5 km. – 6 km. from port. Internal airlines only. International flights available from Simferopol City, which is 300 km. from Kerch.

TIME: GMT plus 3 hours in Summertime.

POLICE/AMBULANCE/FIRE: Fire – dial 01. Police – dial 02. Ambulan – dial 03.

TELEPHONES: It is possible to place telephones on board.

BANKS: The following Banks are used by the Port Authority:

1. Promstroybank of Ukraine, Kiev, Account No. 08138114/400 Dresdner Bank AG, Frankfurt/Main in favour of Crimea Ban Promstroybank of Ukraine Account 073413 for Commercial Port of Ker Account No. 7015071501/001.
2. Turkaiye Garanti Bankasi AS Taksin – Istanbul account with Tru Company, New York, in favour of Crimbank Promstroybank of Ukrain Account No. 9002215-3 for Commercial Port of Kerch Account.
3. Promstroybank, Moscow via Dresdner Bank, Frankfurt/Mai No. 815749200 in favour of Crimean Regional Department Promivestbank of Ukraine Account No. 001073020 for Commercial Po of Kerch Account No. 7015071501/001.

WEATHER: Prevailing winds: N.E. winds throughout most of the yea S.W. winds during the daytime in Summer.

Fog can frequently be experienced in Spring.

Navigation in the port is all year around.

Ice conditions may occur in the Kerchenskiy Strait from mid-Decemb until the beginning of March. Navigation is maintained with the assistan of icebreakers during this period.

GENERAL: *Railway Station:* 3 km. – 4 km. from port.
Provisions: Supplies are readily available.

SHIPMASTER'S REPORT: April 1996.

This information concerns Kerchenskiy Strait (Russian: Kerchensk proliv), Lat. 45° 15' N., Long. 36° 30' E.

Kerchenskiy Strait joins Azov Sea with the Black Sea.

On the West, Kerch Strait is limited by Kerch Peninsula and on th East by Peninsula of Taman. South entrance lies between Cape of Ta (Lat. 45° 06' N., Long. 36° 27' E.) and Cape of Panagia (Lat. 45° 08' N Long. 36° 38' E.). North entrance lies between Cape of Khron (Lat. 45° 26' N., Long. 36° 35' E.) and Cape of Ahileon (Lat. 45° 26.5' N Long. 36° 35' E.).

The length of Kerchenskiy Strait is 22 miles and the smallest width about 2 miles. But many shoals and other dangers make it very narro and shallow.

Enikalskiy Channel was dredged in 1874 for large vessels. All vesse bound for Azov Sea ports, Mariupol (ex-Zhdanov), Berdyansk and ne ports of Kamish-Burun and Kerch which are open to foreign vesse use this channel.

Pilotage: Compulsory. Inform Kerch Pilots 24 hours before arrival at Pi Buoys (No. 1 and 2), Lat. 45° 12' N., Long. 36° 27.8' E., when comin from the Black Sea and the Varzovkiy Buoy, Lat. 45° 27.4' N Long. 36° 41.7' E., when coming from the Azov Sea.

When VHF radio contact is possible, it is necessary to call Pilot Statio on VHF Channel 14 (Kerch Radio-4) and advise exact time of arrival the pilot buoys.

Foreign vessels may take a Pilot for all the passage – from the pi buoys to the port of destination (Mariupol, Berdyansk, including passa Azov Sea and vice-versa).

Pilot arrives on pilot boat 8.0 m. long, marked "Pilot". Pilot ladder sh be ready 1.0 m. above water level.

Anchorage: Anchorage may be obtained near the South and Nor entrances of the channel. South Anchorage No. 450 is a circle with radi of 6 cables from centre Lat. 45° 11.28' N., Long. 36° 29.2' E. In time congestion, vessels may drop anchor near this place, but only Eastward from leading line of the channel. There is good holding grou – sand. The depth is about 10.0 m.

In the North, the anchorage may be obtained at Anchorage No. 4 (circle with radius of 6 cables from centre Lat. 45° 28.6' Long. 36° 37.7' E.), and at Anchorage No. 454 (circle with radius 6 cables from centre Lat. 45° 28.6' N., Long. 36° 44.6' E.).

Sometimes ships are at anchor near Varzovskiy Buoy, but alwa away from leading line.

The depth in Kerch-Enikalskiy Channel is limited to 8.0 m.

The Kerch-Enikalskiy Channel consists of 4 turns. All turns ha leading lights and are marked by IALA Buoyage System.

After break-up of the U.S.S.R., navigation aids became very poor a are getting worse. After ice in Spring, some buoys are destroyed a others shift from fixed positions. Sometimes leading lights are unlit.

This is why navigation through channel is only available in dayligh

In the restricted visibility, less than 2 miles, navigation through channel is not allowed.

Currents: There is no tidal stream. Normal current is South-goin speed of about 0.3 –0.5 knots. After strong and long N.E. winds, South-going current increases and may reach 2 knots to 3 knots.

When the winds are from a Westerly direction, current is unstea

Ice: Normally there is no ice in Kerchenskiy Strait. But some small f may be encountered. During harsh Winters, the Strait is covere motionless ice for some days.

Time: Summertime (from 1st April to 31st October) GMT plus 3 ho and the rest of the time GMT plus 2 hours.

AUTHORITY: The Kerch Merchant Port, 28 Kirova Street, Kerch 334 Crimea, Ukraine. *Tel:* (06561) 20239. *Telex:* 187111 Volna *FAX:* (06561) 21436.

AGENT: Maritime Agency "Inflot", 28 Kirova Street, 334512 Ke Crimea, Ukraine. Tel: (06561) 23049. Telex: 187111 Volna Ux or 18 Bspr Ux. Cables: Inflot Kerch Crimea.

KHERSON: 46.37 N. 32.37 E. **(See Plan)**

GENERAL: The sea and river commercial port of Kherson is situated on the right bank of the Dnieper River and on the left bank of the Koshevaya River.

The port is open for navigation all the year round but in severe Winters ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half of March.

PORT LIMITS: A vessel is considered to be an "arrived ship" and laytime will commence on arrival to the inner roadstead of the port.

DOCUMENTS: *Quarantine:*
Maritime Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Customs:
Money List.
Complete copy of each Manifest for goods onboard.
Immigration:
Crew List – 5 copies.
Passenger List – 5 copies.
Seaman's Book or Passport for each person.
General Declaration – 5 copies.

APPROACHES: The port is accessible for sea-going vessels. The approaching channel is very well marked by navigation marks; therefore, there are no difficulties in navigating a vessel along it when entering or leaving the port.

PILOTAGE: Compulsory. Navigational range marks, leading marks of Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsky leading light buoys, and spar buoys. Master advises Port Controller and Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master through Inflot Agency 48 hours, 24 hours and 6 hours prior to arrival at the point of Lat. 46° 15' 06" N., Long. 30° 56' 01" E.

Master shall order a Pilot via the Inflot Shipping Agency 8 hours and confirm the order 2 hours prior to leaving the port of Kherson.

Masters of vessels proceeding to the Port of Kherson must advise ETA both to Inflot Ilychevsk and Pilot Station Ilychevsk 48, 24 and 6 hours prior to arrival at point Lat. 46° 15' 16" N., Long. 30° 56' 01" E. On arrival at the point Masters must call Inflot Ilychevsk or Pilot Station on VHF Channel 16.

ANCHORAGES: A part of the Dneiper River from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, S.W. of the upper leading marks clearing the place where a submarine cable is laid.

RESTRICTIONS: The permitted draft for passing through the channel is 7.6 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

The port receives vessels with length up to 200 m.

Navigation through the channel in restricted visibility is strictly prohibited.

It is prohibited by local quarantine authorities to discharge sea-water ballast into the harbour.

HEALTH: No automatic Pratique. Cable to Inflot, name and nationality of the ship, ports of call during last month, nature of cargo, number of crew and passengers, condition of health of all onboard with details of any sickness.

RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UHZ	500/487	500/468	A1A	H24
"Kherson Radio"	2182	2182	P3E	H24
"Mesyats" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Mesyats-2" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	HX

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.

TUGS: Compulsory for mooring and unmooring or shifting. Number as required by Pilot but the charge depends on n.r.t. of the ship and not on the number of tugs used.

Tugs available: 2×1,412 b.h.p., 2×706 b.h.p., 1×352 b.h.p. and 1×65 b.h.p.

BERTHING: 9 berths, depths up to 8.25 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent, ship's lines used.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor storing spaces without roofs. There is a refrigerated warehouse at Berth No. 4. Cargo is generally loaded/unloaded by shore cranes but ship's derricks are always to be ready for use.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

DENSITY: 1000.

TANKERS: Max. draft 7.5 m. Loading rate for gas oil 300 tonnes/hr.

FRESH WATER: Available by barge. Rate 50 t.p.h.

FUEL: Not available. Bunkering takes place at Odessa.

REPAIRS: Only minor repairs can be effected. There are no dry docks.

SURVEYORS: Saybolt at Odessa.

CERTIFICATES:
Construction Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Load Line Certificate.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPATRIATION: Crew changes and repatriation possible.

TIME: GMT plus 3 hours. Daylight saving time, GMT plus 4 hours from last Sunday in March to last Sunday in September.

SHORE LEAVE: Possible from 0800 hrs. – 0000 hrs. No restrictions for Masters.

AUTHORITY: Port of Kherson Authority, 4 Ushakov Av., 325025 Kherson, Ukraine. *Tel:* 29-14-02, 2-38-48. *Cables:* Morport Kherson.

AGENT: Kherson Shipping Agency "Inflot". Postal address: 11 Petrenko Street, 325004, Kherson, Ukraine. Tel: 29-13-51, 2-35-961. Telex: 273114. Cables: "Inflot Kherson".

KILIA: 45.26 N. 29.17 E. **(See Plan)**

GENERAL: The Port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is frozen over.

PILOTAGE: Carried out by the Pilot service of the port of Izmail.

ANCHORAGES: Allowed in the port area, in 5 m. depths according to the Pilot's instructions.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.

RADIO: Communication can be effected via the port radio station viz. "Kilia-Radio".

Call Sign	*Frequencies (MHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
Kilia-1	156.8(16)	156.8(16)	F3E	H24
(CPR)*	157.25(25)	157.25(25)	F3E	H24
Kilia-2	156.6(12)	156.6(12)	F3E	H24
(Harbour Master)	156.45(9)	156.45(9)	F3E	H24

*Central Port Radio Station.

Notice of Arrival: Masters of vessels going to the port from seaward via Kilia Inlet should advise "Inflot Izmail" their ETA 24 hours prior to arrival at the Reception Buoy area. More precise time of arrival should be advised at a later time.

TUGS: Approaching and shifting berth is performed without tug assistance.

BERTHING: Cargo vessels drawing up to 7 m. are handled with the use of buffer barges. Berths of the port are equipped to handle general cargoes, metals, timber, coal. Embarking/disembarking of passengers is also performed. There are portal cranes of up to 6 tons capacity, a warehouse and open storage areas covered with concrete. There are also floating cranes of up to 5 tons capacity which are used for handling cargo in the Outer Roads. The loading of grain is carried out at the grain elevator berth by its own equipment.

FRESH WATER: Available from Izmail with sufficient notice.

FUEL: Available from Izmail with sufficient notice.

CONSULS: None.

REPAIRS: Not possible.

TIME: GMT plus 3 hours. GMT plus 4 hours in summer.

AUTHORITY: Port of Kilia Authority. 4, Zheleznyakov Street, 272610 Port of Kilia, Odessa Region, Ukraine. *Tel:* 2-37-03. *Telex:* 232103. *Cables:* Morport Kilia. *Contact:* Port Director.

AGENT: JV "Inflot Izmail". Telex: 232136. Cables: "Inflot Izmail".

MARIUPOL (Zhdanov): 47.06 N. 37.35 E. **(See Plan)**

GENERAL: A sea port in the Azov Sea, Mariupol is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it.

All-year round navigation is possible but during 30 – 90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3 – 4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Mariupol consists of the Outer and Inner Roads, the Western Harbour, the Ugolnaya (or the Coal) Harbour, the Grain Harbour and the Ship-repairing Basin.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 hours and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 21 (Lat. 45° 13' N., Long. 36° 27' E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour Approach Channel, Buoy No. 1, a Master should order a Harbour Pilot.

ANCHORAGES: A good anchorage can be obtained in the Outer Roads of the port of Mariupol situated opposite the port entrance. The depths in the roads are from 5 m. – 9 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm.).

The max. allowed speed in the approach channels is 8 knots and in the part of the Coal Harbour Approach Channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 8 m., length 200 m.

HEALTH: After presenting Vaccination Certificates, Free Pratique obtained. After proceeding from one port of the Ukraine to another, Free Pratique obtained automatically.

Vessels calling at any port in the Sea of Azov are to be equipped with either a sewage treatment plant or a sewage tank. Before entering Kerch Strait, all valves for discharging non-purified bilge and sewage water to be closed and sealed by the ship. Date and ship's coordinates to be entered in Log Book.

RADAR: The port of Mariupol radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

RADIO: Vessels approaching the port of Mariupol should establish radio contact through Mariupol Radio port radio station operating 24 hours daily on the following frequencies:

Call Sign	Frequencies (kHz) Working	Calling	Type of transmission	Time of work
UTW	500/473	500/416	A1A	H24
"Mariupol-Radio"	2182	2182	N3E	H24
"Mariupol Radio-1"	156.8*(16)	156.8*(16)	F3E	H24
"Mariupol Radio-2" (Port Controller)	156.7*(14)	156.7*(14)		
"Mariupol Radio-5" (Harbour Master and Pilot Station)	156.45*(9)	156.45*(9)	F3E	H24
"Mariupol Radio-9" (Movement Control)	156.375(67)	156.375(67)	F3E	H24

*Frequencies are given in MHz.

TUGS: Available. Use ship's lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 9.0 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 40 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Coal Harbour is protected on its S.E. side by the Eastern Mole, extending the length of the harbour. The berths have depths alongside of up to 9.0 m.

The Western Harbour is situated adjacent to Coal Harbour. It is protected from the East by the Dike Dam and from the S.W. by the Western Mole. The general depth in the harbour is 9.0 m.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Mariupol. It passes through a coastal shoal then enters the Southern part of the West Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

DENSITY: About 1005.

FRESH WATER: Delivered at berth. Also delivered by lighters.

Vessels are advised to arrive with sufficient fresh water for their stay in port.

FUEL: Delivered by lighters. Supply of fuel to be arranged well in advance of vessel's arrival.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 7.4 m.

All kinds of repairs for vessels of up to 22,000 d.w.t. can be carried out.

DRY DOCKS: Floating docks of 15,000 and 5,000 tons.

OPENING/CLOSING HATCHES: Crew allowed open and clos stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificate and all internatio certificates are required.

CUSTOMS ALLOWANCES: No quantity restrictions. Nothing to b taken ashore.

REPATRIATION: All facilities for repatriation subject to visa formalitie

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 2 hours, GMT plus 3 hours in Summer.

HOLIDAYS: 1st January; 7th January; 8th March; 1st, 2nd, 9th Ma 24th August; 7th, 8th November.

AMBULANCE/FIRE: Ambulance 9-03; Fire 9-01.

TELEPHONES: Telephones cannot be placed aboard. Long distanc calls are difficult to make.

IDENTIFICATION CARDS: Not required.

WEATHER: The changes in the water level is mainly caused by effec of the wind observed here all the year round. The fall of the water leve is usually caused by Northerly and N.E'ly winds but rises of the wat level are due to S.W'ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in th atmospheric pressure, so called "Seish" effect. The "Seish" usuall starts during calm weather and can last, on average, for about 24 hour

The maximum range of the water level due to the "Seish" effec observed in August is about 0.6 m.

AUTHORITY: The Port of Mariupol Authority, 99 Admiral Lunin Avenu 341010 Mariupol, Ukraine. *Tel:* (06292) 51039, 58508. *Telex:* 11521 More Su. *Cables:* Morport Mariupol. *FAX:* (06292) 5841 *Contact:* Y.I. Markin, Harbour Master. A.V. Shtepa, Port Director.

AGENT: Economou International Shipping Agencies, Prospe Metallurgov 19, Office 61, 341000 Mariupol, Ukraine. Tel/Fax: (380-62 332345. Telex: 115720 Ceco Ux.

NIKOLAEV: 46.56 N. 31.57 E. (See Plan

GENERAL: The commercial sea port of Nikolaev is situated in the mout of the Yuzhny Bug River (the Southern Bug), in the Northern part of th Dnieper (the Bug estuary).

The port is open for navigation all the year round, but in Winter o announcement of Ice Compaign, traffic through the approach channe is permitted in convoy when escorted by ice-breakers. Ice first begi to form in the second half of December, and in the channel and th estuary it finally disappears in the first half of March.

PORT LIMITS: A vessel is considered to be an "arrived ship" on arriv at the inner roadstead of the port. Laytime will commence in accordanc with the Code of Customs of Nikolaev Commercial Sea Port.

DOCUMENTS:

Quarantine:
 Maritime Declaration of Health.
 Valid Derat Certificate.
Customs:
 2 copies General Declaration.
 2 copies Cargo Declaration.
 3 copies Crew List.
 3 copies Passenger List.
 2 copies Currency Declaration.
 2 copies Crew Personal Effects Declaration.
 2 copies Stores List.
Immigration:
 1 copy General Declaration.
 3 copies Crew List.
 3 copies Passenger List.
 Seaman's Book or Passport for each person.

APPROACHES: The port is linked with the Black Sea by an approa channel of 44 miles length, up to the port of Ochakov. It is well mark by navigation marks, therefore there are no difficulties in navigating vessel along it when entering the port.

PILOTAGE: Pilotage in the port and in the channel is compulsory all vessels. Notice of Arrival and ordering of a Pilot should be advis via Shipping Agency, Illyichevsk, 48 hours, 24 hours and 6 hours pr to the expected time of arrival at the Reception Buoy. Also it is necess to specify length overall and draft. Pilots normally embark and disemb from foreign vessels in the area of traffic circle centered Lat. 46° 16.3' N., Long. 30° 57' E., or at any other point designated the Traffic Co-ordination Centre. Vessels bound for the port of Nikol should proceed there with a Pilot aboard up to the roads of the po Nikolaev (Buoy No. 230), where a Port Pilot is picked-up.

When leaving, Pilots must be requested via the Shipping Age 8 hours in advance, and the request to be confirmed 2 hours prio leaving the port of Nikolaev.

ANCHORAGES: There are 2 anchorages in the inner road of the p

RESTRICTIONS: Navigation through the channel is allowed in day only. The least depth of the channel is 10.4 m. and width of chann 100 m.

Tug assistance for passing through the channel is compulsory for vessels with length of more than 187 m.

Entering the channel during fog, mist, snow-fall, sea evaporation under bad weather conditions, causing restricted visibility of lea beacons and lights, is prohibited.

On announcement of Ice Compaign, traffic through the chann permitted for vessels having Ice Class Certificate. In case a vessel no such Certificate, a Special Guarantee Form signed by the Mast to be submitted before entering ice.

The port receives vessels having in operation an approved Sew Treatment Plant. It is prohibited to discharge sea ballast without sp permission of Sanitary Authorities.

MAX. SIZE: Nikolaev, Dnieprobugsky and Octyabrsk: The permissible fresh water draft is 9.8 m., and the permissible length of a vessel is 215 m.

HEALTH: No automatic Pratique. Cable Agent the name and nationality of the ship, ports of call during last month, nature of cargo, number of crew and passengers, condition of health of all onboard with details of sickness, if any.

RADIO: Ship-shore radio connection can be established through the port radio station operating 24 hours on the following frequencies:

Call Sign	*VHF Channel/* kHz	*Calling Channel/* kHz	*Type of Transmission*	*Time of Work*
1"Ochakov-Radio-2"	2182 kHz	2182 kHz	H3E	H24
"Ochakov-Radio-4"*	12	16	H3E	H24
"Ochakov-Radio-17"	12	16	H3E	H24
2"Nikolaev-Radio-1" *	1	16	H3E	H24
"Nikolaev-Radio-52" (Harbour Master)	73	16	H3E	H24
"Nikolaev-Radio-2" (Port Control)	68	16	H3E	H24

* CPR – Central Port Radio Station.

TUGS: Compulsory for mooring or shifting.

Tug assistance for passing through the channel is compulsory for the vessels with length of more than 187 m. The number is as required by the Pilot, but the charge depends on the size of a vessel, and not on the number of tugs used.

Tugs available: 3×1,200 h.p., 2×2,500 h.p., 1×400 h.p. and 1×200 h.p.

BERTHING: There are 12 berths with depths up to 9.5 m. Mooring is effected with Port Pilot's assistance. The number of tugs required for mooring is decided by Pilot and agreed with Master. Ships' lines are used.

CRANES: Cranes of up to 40 tons capacity are operated on the quays and by the warehouses. One floating crane of 100 tons capacity, and other transhipment facilities also available.

MEDICAL: Hospital facilities available.

DENSITY: 1005 – 1012.

BULK CARGO FACILITIES: There are modern installations used for handling grain, ore, etc. Total silo storage capacity at present is 62,000 tons. Port handles general and bulk cargoes. All berths have railroads, and are in close proximity to storage warehouses, both cold and dry, which facilitate transfer of cargo from vessel to warehouse or to open concrete floor sheds, which are also available.

Cargo is normally loaded/unloaded by shore cranes, but ship's derricks are always to be ready for use.

FRESH WATER: Available from barge. Rate 50 t.p.h.

FUEL: Available.

REPAIRS: Any kind of repair is possible.

DRY DOCKS: There are dry docks in the port.

HATCHES: Opening/closing of hatches is usually carried out by the ship's crew. It may also be done by the port workers for the vessel's account.

CERTIFICATES: Construction Certificate, Safety Equipment Certificate and Load Line Certificate.

REPATRIATION: Crew changes and repatriation are possible.

TIME: GMT plus 2 hours.

SHORE LEAVE: Crew members allowed ashore throughout 24 hours. Shore passes are provided.

GARBAGE DISPOSAL: Collected in special containers, which are provided alongside, ordered via Agent. Charges depend on the time of vessel's stay in the port.

WASTE OIL DISPOSAL: Collected by special barges.

CURRENCY: Karbovanets.

AUTHORITY: Nikolaev Port Authority, 23 Zavodskaya Street, Nikolaev 327004, Ukraine. *Tel:* 373140, 298555. *Telex:* 272121 PORT SU. *FAX:* 246364. *Cables:* Morflot Nikolaev.

AGENT: Economou International Shipping Agencies, 5 Ekaterininskaya Street, Office 2, 270026 Odessa, Ukraine. Tel/Fax: (380-482) 260819, 293356. Telex: 232207 Ceco Ux.

Vessels that are bound for the ports of Dnieprobugsky and Octyabrsk should give information to Agent in Nikolaev.

ODESSA: 46.30 N. 30.46 E. (See Plan)

GENERAL: The Port of Odessa is situated on the N.W. coast of the Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breaker assistance in severe Winters about 30 days of the year. Ice first begins to form in the second half of December and finally disappears in February. After ice has formed it is often broken up by strong winds and stormy weather. In mild Winters ice has not been observed in Odessa Bay.

Range of water level caused by winds depends on force and periods they blow, and may reach 0.6 m. – 1.0 m.

Atmospheric pressure has also a direct influence on the water level ("Seish" effect), but is weaker than effects of the wind. The "Seish" may last from a few minutes up to several days causing change of water level up to 0.58 m.

PORT LIMITS: The Odessa port waters are bound in the South by Lat. 46° 25° 00" N. from the shoreline as far as its intersection with Long. 30° 54' 00" E.; in the East by Long. 30° 54' 00" E.; in the North by Lat. 46° 32' 00" N. to its intersection with the shoreline and on the West by the shoreline itself.

PILOTAGE: Compulsory. Arranged through agent, but vessel to give 12 days', 96, 24 hours' and 6 hours' notice through Odessa Radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilot shows international flag "G". Request for Pilot to shift a vessel within the port or to Pilot her into or out of port should be made by the Master through the Agent at least 4 hours prior to service requirement.

The Pilot is brought on board and returned on shore by pilot launch 1.7 miles E.S.E. of the Vorontsovsky Lighthouse (Lat. 46° 29' 00" N., Long. 30° 48' 00" E.).

The ship's Master is responsible for the safety of the pilot launch and the Pilot when he boards and disembarks from the vessel as well as during his stay thereon.

The boarding Pilot shall be informed by the ship's Master of the vessel's draft, length, breadth and other particulars required for her safe pilotage and mooring.

Specialised vessels (LASH vessels, barge carriers, container ships, Ro/Ro vessels and the like) shall be piloted through port waters only by a Pilot authorised by the local Port Pilotage Service. The Pilot may be taken on board in advance in the swinging area in the port of Ilichevsk (Lat. 46° 10.2' N., Long. 30° 56.2' E.).

Pilotage for all specialised vessels is compulsory.

Masters of vessels proceeding from the port of Odessa to Kherson shall make request for a Pilot through the Agent from the Maritime Pilot Service based in Ilichevsk. Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 MHz) and act in accordance with its instructions.

ANCHORAGES: Two anchorages are available at the Odessa Roadstead. They are Anchorage No. 354 and Anchorage No. 355.

Anchorage No. 354 is for large-tonnage vessels as well as tankers or others carrying dangerous cargoes.

Anchorage No. 355 is used by vessels clearing in or out of port and by those that are to take on water, supplies or fuel or are to undergo minor repairs, etc.

The boundaries of these anchorages are duly charted.

Vessels shall proceed to, and anchor at, Anchorage No. 354 without assistance. Upon anchoring, the vessel shall communicate to the Traffic Control Station her bearings and distance from the Vorontsovsky Lighthouse.

In case of unforeseen circumstances which may endanger navigation (sudden deterioration of visibility, failure of the main engine or steering gear, non-readiness of berth to receive vessel, etc.), vessels entering or leaving port shall, if possible, anchor at points 8 or 12 of Anchorage No. 355.

Anchoring in the Oil Harbour Channel, in the prescribed routes and harbour approaches as well as in the harbour gateway should be avoided.

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of smaller size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

Entry prohibited to all ports of Odessa Region for all vessels not complying with MARPOL 73/78 and tankers, gas carriers, chemical product carriers over 15 years old.

MAX. SIZE: *Inner Harbour:* LOA 240 m., beam 40 m. and draft 12 m.

HEALTH: Free Pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Agent by cable. Free Pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

Call Sign	*Channels and Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDE	500/447	500/454	A1A	H24
"Odessa-Radio"	2182	2182	H3E	H24
"Odessa-1" (CPR)*	16,7,27 and 62		F3E	H24
"Odessa-Radio-5" (Harbour Master)	16,9	16,9	F3E	H24
"Odessa Pilot"	14,16	14,16	F3E	H24
"Odessa-Radio-8" (Inflot Shipping Agency)	16,13	16,13	F3E	H24
"Odessa Port Control"	16,14,31	16,14,31	F3E	H24
(Vessels' movement control post)	67,14	67,14	F3E	H24

*CPR – Central Port Radio Station.

Traffic and storm signals are given by "Odessa Port Control" on VHF Channels 14 and 16.

VHF: Traffic in the harbour is controlled by the Traffic Control Station round the clock. The Traffic Control Station and the Signal Mast are situated on the roof of a building at Berth No. 1. The station telephone number is 37-30, its VHF call signal is "Odessa Port Control", and the operating Channels are 14, 20 and 67.

All vessels proceeding to the port of Odessa shall establish VHF communication on Channel 14 (156.7 MHz) with the Traffic Control Station 20 minutes prior to entering control zone (8 miles from Vorontsovsky Lighthouse), when entering port waters and after berthing or anchoring.

The vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name, owner, length, breadth, draft.
(b) Name of local Agent.

(c) Last port of call and purpose of calling at the port of Odessa.

(d) Specialised vessels (LASH vessels, barge carriers, Ro/Ro and such like) and others concerned, also indicate the number of propellers, their pitch (variable or constant), engine power, availability of thruster and its power.

Thereafter, the ship will proceed according to the instructions of the Traffic Control Station.

Prior to moving any ship within the Traffic Control Zone, her Master shall request permission from the duty Pilot-Operator of the Traffic Control Station by VHF Channel 14, by telephone (37-30) or by visual communication means.

Such permission is valid only for 30 minutes after which it is automatically cancelled.

A special watch should be posted on all vessels and other craft navigating within Traffic Control Zone to listen in on VHF Channel 14 until they are berthed or anchored. Ships underway may change their VHF Channel only on instructions from the Traffic Control Station or the Pilot Service.

All vessels sailing in port waters shall have their VHF stations in good order and shall keep them operative on one of the channels used for communication in the port.

Vessels in port waters, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 16, 9, 14, 20, 22 and 67.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters and all violators will be punished accordingly.

Also see "Radio."

RADAR: When visibility is less than 2 miles in the roadstead or 0.5 miles in the port, vessels may be navigated only by shore-based radar.

The necessity for Radar-Assisted Pilotage is determined by the Pilot-Operator on duty at the Traffic Control Station.

The decision to put a vessel into or out of port shall be taken jointly by her Master, the Port Pilot and the duty Pilot-Operator of the shore-based radar station. Ship-to-radar station communication shall be effected by the boarding Pilot.

The shore-based radar station provides:

(a) Pilotage of vessels from the limits of the Traffic Control Zone to the Karantinaya, Novaya and Kabotazhnay Harbours of the dry-cargo port through the Vorontsov Gateway.

(b) Pilotage of vessels from the limits of the Traffic Control Zone to Anchorage No. 355.

(c) Pilotage of vessels from the port through the Vorontsov Gateway and from Anchorage No. 355 to points beyond the Traffic Control Zone Limits.

(d) Remote pilotage of vessels with no Pilot on board by furnishing them with information on their position, with other data to help them orientate and to pass clear of other ships. Such information is supplied by the shore-based radar station at the Master's request.

Vessels may be brought to Anchorage No. 355 only with the assistance of shore-based radar pilotage whatever the visibility conditions may be.

Radar Assisted Pilotage and Remote Pilotage are effected throughout the 24 hours of the day, only 1 vessel being piloted at a time.

A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities and sound signalling in good working conidtion and her radar shall be operative. Failure of any of above equipment is to be immediately reported by the ship's Master to the shore-based radar station through the Pilot.

In the event of failure of the shore-based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety.

The use of the shore-based radar does not relieve the Shipmaster of responsibility for ship control.

Radar Assisted or Remote Pilotage dues are recovered according to established procedure on the basis of the extract from the log of the Odessa Port Traffic Control Station.

TUGS: A ship's tugboat requirements are made known, subsequent to the Pilot's approval, to the Traffic Manager on VHF Channel 14, call signal "Odessa Port Control", at least 2 hours prior to the ship's approaching the port gateway. Tugs are compulsory for vessels over 100 m. LOA.

BERTHING: 38 berths available with depths alongside from 8 m. up to 12.0 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Agent. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a "T"-shaped mole extending E.S.E. off-shore.

Berths No. 1 and 5: Max. LOA 240 m., max. draft 11.5 m.
Berth No. 2: Max. LOA 195 m., max. draft 12.0 m.
Berths No. 3 and 4: Max. LOA 120 m., max. draft 10.0 m.
Loading Rates:
Berths No. 1 and 5: Fuel oil 2,000 tonnes/hr.
Gas oil 500 tonnes/hr.

DENSITY: Average density 1012 varying with season.

FRESH WATER: Fresh water may be supplied ex-shore or ex-wate barge. Minimum quantity ex-barge 15 tons.

FUEL: Bunkers can be supplied by barge, and to be ordered 72 hou before arrival.

CONSULS:

Bulgarian Consulate General	Tel: 66-60-92.
Indian Consulate General	Tel: 22-43-33.
Cuban Consulate General	Tel: 25-14-69.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See "Stevedores".

CUSTOMS ALLOWANCES: Tobacco. No limits on board vessel, bu when going ashore not more than 1 or 2 packs. Wine and/or spirits no to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximu weight capacity.

REPATRIATION: Can be arranged.

AIRPORT: Distance to airport 10 miles. Direct flights with severa countries and with the rest of the world through Odessa.

TIME: GMT plus 2 hours. GMT plus 3 hour in Summer (Last Sunday i March to Last Sunday in September).

HOLIDAYS: Work can be arranged on below mentioned holidays 1st January, 7th January, 8th March, 1st and 2nd May, 9th May 24th August, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 fro port. Ambulance: 03 from town, 903 from port. Fire: 01 from town, 90 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore until midnig Master without limitation.

IDENTIFICATION CARDS: Necessary.

GARBAGE DISPOSAL: Collection service is available, drums and ski are provided alongside. Food waste and garbage should be pre-bagge bags of up to 100 kg. or containers of 0.75 cu.m. are available, and a provided via Port Agents.

WASTE OIL DISPOSAL: Waste oil collection service is availab provided by barges and shore tanks, located in Oil Harbour. Tel: 25.15.7 or 29.33.48. A ballast water treatment station receives 42,000 cu.m daily.

CURRENCY: Karbovanets.

DELAYS: Vessels berthed in turn.

REGULATIONS: The following is a copy of Odessa Sea Po Regulations (dated 1990) received from a Shipmaster in October 199

SECTION I

GENERAL REGULATIONS:

1.1 The Regulations in force in the Port of Odessa, issued in accordan with Article 66 of the Commercial Shipping Code and Order No. 152 June 7th, 1978 of the Ministry of Merchant Marine, supplement th General Rules for all maritime commercial and fishing ports.

1.2 The Odessa Port Regulations are applicable to all state and forei ships as well as to all organisations, enterprises, individuals that happ to be within the port area both on land or at sea. Lack of knowledge the General Rules and the present Regulations does not exempt a organisation, enterprise or individual from responsibility for violati them. Failure to coincide the Traffic Regulations with the present Po Regulations shall result in implementation of the latter.

1.3 The present Odessa Port Regulations come into force as of Octob 31st, 1989. The former Regulations issued in 1984 are herew cancelled.

1.4 Masters of all foreign vessels may acquaint themselves with the Regulations and all other port rules in force through the Agent, boarding pilot.

1.5 The Odessa port waters include inner water area and ou roadstead. Two anchorages are available at the Odessa roadstead. Th are Anchorage No. 354 and Anchorage No. 355.

Anchorage No. 355 is accessible with the permission of the duty Pi Operator of the Traffic Control Station and used by vessels clearin or out of port and by those that are to replenish water, fuel, supplies are to undergo minor repairs, etc.

Anchorage No. 354 is for large tonnage vessels as well as tankers others carrying dangerous cargoes.

The boundaries of these anchorages are duly charted.

1.6 Declared draft in the port is 11.5 m. Permissible draft is cou with regard for soundings at berth within three-metre limits and for 30 clearance under the keel but regardless of low/high level of the tide

Permissible draft limits for entry into port and soundings at berths made known on the Harbour Master's orders and are brought to notice of all concerned.

In each particular case the Pilot together with the Port Control se the matter of berthing a vessel by taking into account the typ subsequent cargo operations (whether discharging or loading) with regard for permissible draft and low/high level of the tide.

1.7 In Odessa Port, control over all vessels operating on internati lines is exercised by a special department of the Harbour Co Inspection established in accordance with the 1978 Report on SOLAS International Convention of 1974 and with the 1978 repo the MARPOL International Convention of 1973.

1.8 The Shipping Control Centre is located in the Odessa Po exercises control over shipping in the Northwestern part of the Bl Sea, dispatches traffic stream, provides pilot and bunker supplying The Shipping Control Centre charges fees for the service render accordance with the existing tariffs.

SECTION 2

ENTERING AND LEAVING PORT:

2.1 The Odessa Port receives vessels round the clock.

2.2 The arrival of a foreign vessel is registered by the Agent at the Harbour Master's office and that of a Ukrainian ship at any Harbour Control Station.

2.3 Vessels may leave the port at any time of day or night.

2.4 A vessel's readiness to put to sea is checked by a control party, as a rule 3 – 4 hours prior to leaving, in agreement with the vessel's administration after which the Statement of Instructions is drawn up in duplicate, one copy remaining on board the vessel.

2.5 In case of a delay of the vessel's departure for more than 30 minutes after the time specified in the request for leaving the port, the pilot and tug boats sent in good faith to pilot her out of the port may be discharged. Another request for them shall be made, the charges for first call of the pilot and tug boats are collected according to the tariffs.

2.6 No vessel may leave the port without obtaining the Outward Clearance from the Harbour Control. The Outward Clearance of the vessel is made by the Harbour Control Master onboard the vessel.

2.7 If a vessel lying in the outer roadstead urgently has to get underway towards one of the following ports: Yuzniy, Ochakov, Dniepro-Bugskiy, Nickolayev, Kherson, Scadoysk, Ilichevsk or Belgorod-Dniestrovskiy, but due to meteorological conditions is unable to obtain the Outward Clearance in due order, such a vessel as an exception may obtain the same through the Agent with the Harbour Control Inspection by radio.

The Master of the vessel shall submit to the Harbour Control Inspection through the Agent following information: The number of crew members on board, composition of the staff; quantity and nature of the cargo on board; the vessel's draft, metacentric height; period of validity of conventional documents.

2.8 Ships' Masters arriving in the port for loading or partial discharging of grain or other bulk cargoes shall, prior to commencing cargo operations, submit to the Harbour Control a preliminary cargo plan for the full load or partial discharge which shall be drawn up corresponding to one of the stowage variants specified in the ship's "General Information for Ship's Stability during Transportation of Grain or other Bulk Cargoes".

The said "General Information" shall be endorsed by and bear the signature and seal of the Register of Shipping, the Register of Fishing or of some foreign Classification Society.

2.9 Should the said "General Information" be unavailable onboard the ship or should it not be signed or stamped by the corresponding Classification Society, such a vessel may be cleared out only subject to the Register's approval of the cargo plan and its appropriate endorsement.

The ship may leave the port or proceed to the outer roadstead only after the actual loading has been found to correspond to the cargo plan previously submitted.

2.10 Before the ship's departure from the port her Master shall submit to the Harbour Control Inspection the ship's stability calculations, a diagram of her static stability indicating the corrected and allowed metacentric heights.

2.11 Masters of all vessels sailing within the port waters shall strictly observe the present General Regulations as well as the Sailing Instructions currently in force within the Traffic Control Zone of the Northwestern part of the Black Sea.

2.12 Vessels shall enter or leave the Odessa Port by way of the Eastern, Western and Northern gateways, the Main Oil Harbour Channel consisting of the first and second bends and the Second Approach Oil Harbour Channel.

2.13 Cargo and passenger vessels not exceeding 140 m. in length shall be put into the Odessa Port through the Vorontsovsky gateway. Vessels shall pass/receive towlines to/from tugs off the zone within a range of 12 cables from the Vorontsovsky Lighthouse.

It is also necessary to take into account the wind and swell limitations established for tugs by the Register.

2.14 The decision to bring such vessels into the port without passing towlines (due to some extraordinary circumstances) may be taken by both the ship's Master and the pilot on their own responsibility.

2.15 On approaching the Vorontsovsky gateway Masters of all vessels shall sail on the course close to 180°.

2.16 Pilotage in the Odessa Port is compulsory.

Entering port, departing therefrom and shifting within the harbour are permissible round the clock only with a pilot on board.

2.17 Request for a pilot and tugs to shift a vessel within the harbour or to pilot her into or out of port should be made by the Master through the duty Pilot-Operator of the Traffic Control Station (its VHF call sign is "Odessa Port Control", the operating Channel is 14, the station telephone number is 37-30) at least 45 minutes prior to service requirement.

2.18 The pilot is taken onboard vessels arriving from the open sea and proceeding to berth, at the point with bearing 090° and distance of 2 miles off the Vorontsovsky Lighthouse.

On ship's departing from the berth out to sea the pilot is dropped at the point with bearing 120° and distance of 1.5 miles off the Vorontsovsky Lighthouse.

On vessels proceeding from the anchorage into the harbour the pilot boards the vessel at the anchorage.

Under unfavourable weather conditions the point of taking or dropping the pilot may be changed in agreement with the ship's Master and the duty Pilot-Operator. During a storm and in ice conditions the pilot may be delivered on board or taken off by a port seagoing tug at the shipowners's expense.

2.19 On piloting specialised vessels (LASH vessels, barge carriers, container ships, Ro-Ro vessels and the like, exceeding 200 m. in length) the pilot is taken on board/disembarked within the corresponding traffic lanes of Part 5 of Traffic Separation Scheme No. 2 (Traffic Control Zone) and the line located 0.5 miles South of it.

Pilotage for such vessels is compulsory while entering the control zone (port waters) or changing the anchorage position.

2.20 Masters of all ships shall take a pilot on board if any changes occur in the port waters situation (on the Pilot-Operator's instructions).

2.21 Masters of vessels proceeding from the port of Odessa to Dniepro-Bugskiy, Nickolayev or Kherson may make request for a pilot from the Maritime Pilot Service based in Ilichevsk through Agents in the Port of Ilichevsk.

Pilot is taken on board in the roadstead in the Ochakov port area or at the Master's request in the port of Odessa.

2.22 When visibility is poor the decision to take a vessel into or out of port shall be taken jointly by her Master and the Port Pilot. Ship-to-Radar Station communication shall be effected by the boarding pilot.

2.23 Shifting vessels with their main engines, steering gear or anchor gear immobilised shall be paid with 50% rise in charges for the service rendered (tug and pilot fees).

SECTION 3

NAVIGATING IN PORT WATERS:

3.1 Control over safe navigation of all vessels and floating facilities in the traffic control zone (port waters) is exercised by the Traffic Control Radar Station through the Traffic Control Station.

3.2 Before mooring at Berths No. 1-33 all anchors shall be hove into their hawse pipes, however they shall be kept ready to be let go immediately after any emergency situation arises.

3.3 No vessels underway in the port waters or lying alongside berths (sea board) may have their derricks, cranes, accommodation ladders, boats and other equipment swung out until they are berthed or anchored. Exception is made only for pilot ladders.

3.4 All vessels carrying explosives, inflammable and/or poisonous cargoes shall lie at Anchorage No. 354 until in receipt of further instructions from the Port Authority and Fire Station.

While entering or leaving port or lying therein, such vessels shall hoist the 'B' flag (explosives flag) in a conspicuous place by day and exhibit a red light visible all round the horizon with a range of at least 3 miles at night. Navigators of other craft shall exercise special care when approaching such vessels.

3.5 No sound or light signals, not specified in the International Regulations for Preventing Collisions at Sea, 1972, in the General Rules for Maritime Commercial and Fishing Ports of Ukraine as well as the present Odessa Port Regulations, may be given within the port limits.

3.6 A vessel may be steered within the port waters only with highly experienced men at the helm. Any transfer of the helm to other persons while the vessel is passing through areas where special care in steering should be exercised is strictly prohibited.

3.7 The loss or discovery of an anchor or any other object dangerous to navigation within the port waters shall be immediately reported by the ship's Master to the Harbour Master.

3.8 No ships may take soundings when proceeding into port, along fairways and passages, when navigating in the harbour or lying at berth.

3.9 The inner port waters may be entered by ships not exceeding 12.0 m. draft, 240 m. length and 40 m. breadth.

Gas carriers are prohibited in the Odessa port waters.

3.10 The vessels exceeding 11.0 m. draft navigating in port waters shall exhibit lights and signals specified in Article 28 of the International Regulations for Preventing Collisions at Sea, 1972.

3.11 The ship's speed shall not exceed:

(a) In the inner port waters and the Oil Harbour channels – 4 knots;
(b) in other port areas – 10 knots.

In any case main engines shall operate to ensure the ship's manoeuvrability.

3.12 Traffic in control zone and within the harbour is controlled by the Traffic Control Radar Station located at the head of Berth No. 1 (Lat. 46° 29.5' N., Long. 30° 45.6' E.).

3.13 The Pilot-Operator of the Traffic Control Radar Station using the high-tech Shore-to-Ship Station provides:

(a) Pilotage of vessels from the limits of the traffic control zone to Karantinya, Novaya and Kabotaghnaya harbours of the dry cargo port through the Eastern gateway;
(b) Pilotage of vessels from the limits of the traffic control zone to Anchorage No. 355;
(c) Pilotage of vessels from the port through the Eastern gateway and from Anchorage No. 355 to points beyond the traffic control zone limits;
(d) Pilotage of vessels to/from the Oil Harbour and Berths No. 32 and 33 through the Main and Second Northern approach channels of the Oil Harbour;
(e) Remote pilotage of vessels with no pilot on board by furnishing them with information on their position, with other data to help them orient an pass clear of other ships.

3.14 The Traffic Control Zone includes the water area bound by bearing 161° from the Vorontsovsky Lighthouse as far as its intersection with parallel 46° 22' N.; by this parallel to its intersection with meridian 31° 03' E.; by this meridian to its intersection with parallel 46° 29' N.; by this parallel to its intersection with meridian 30° 55' E.; by this meridian to its intersection with the shoreline.

3.15 The zone bound by the shoreline, bearing 161° from the Vorontsovsky Lighthouse and bearing 042° from Ilichevsky Lighthouse cannot be seen from the Shore Based Radar Station (blind sector), and therefore is regarded as dangerous. Great caution is required to navigate in this zone.

3.16 At the Traffic Control Radar Station the Computer Complex was introduced to supply vessels proceeding to the Northwestern part of the Black Sea with necessary information.

All vessels proceeding to the port of Odessa shall forward Notices of Approach to the Traffic Separation Zone 72, 48, 24 and 4 hours in advance (call sign is "Odessa – BLASCO – Traffic Control Centre"). Failure to do so shall result in increase in the rate of information dues by 100% (Order No. 186 of the Ministry of the Merchant Marine of the state of November 30th, 1987).

3.17 Radar assistance is rendered throughout 24 hours of the day whatever the visibility may be. Radar assisted pilotage charges are based on the Pilot-Operator's receipts and collected according to the existing tariffs (Order No. 186 of the Ministry of the Merchant Marine of November 30th, 1987).

All vessels navigating within the Traffic Control Zone shall use service rendered by the Traffic Control Station.

Naval vessels may get service free of charge.

3.18 Radar assisted pilotage within the traffic control zone is compulsory whatever the visibility conditions may be:

(a) For all passenger liners, gas carriers, chemical carriers, ferries, tankers and specialised vessels (barge carriers, LASH carriers, container vessels, Ro-Ro vessels and the like exceeding 200 m. in length);

(b) for all vessels moving to/from Anchorage No. 355.

3.19 A special watch should be effected on all vessels within the traffic control zone to listen in on VHF Channel 14 until they are berthed or anchored.

3.20 Navigating vessels in the Odessa port waters and traffic control zone is effected mainly along the fairways and narrows.

3.21 One-way traffic is a standard practice in the Oil Harbour when sailing through the Eastern, Western and Northern gateways.

3.22 Auxilliary craft and small tonnage ships pass through the Western and Northern gateways.

3.23 Prior to entering the traffic control zone, coming to or weighing anchor, moving to/from anchorages or berthing, shifting, etc., the vessel shall request permission from the Traffic Control Station. The permission is valid only for 30 minutes after which it is automatically cancelled.

Failure to do so may subject the vessel to 100% additional charges for radar assisted pilotage.

3.24 Entering the traffic control zone and shifting of all vessels and other craft without the Traffic Control Station's permission is prohibited.

3.25 Vessels when navigating in traffic control zone shall strictly observe the Sailing instructions of the Traffic Control System of the Northwestern part of the Black Sea and the International Regulations for Preventing Collisions at Sea, 1972.

3.26 All vessels shall repeat recommendations and instructions received from the Traffic Control Station. If they are unable to follow these instructions they shall report the reason and further intentions.

3.27 All navigators and radio operators shall strictly observe "Operating Instructions on VHF Communications at Sea No. 9044".

3.28 On establishing VHF communication with the Traffic Control Station the vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name and type.
(b) Time of approach to traffic control zone or departure from berth.
(c) Speed.
(d) Ship's nationality and owner.
(e) Port of destination.
(f) Gross and nett registered tonnage.
(g) Nature and quantity of cargo on board.
(h) Ship's forward and aft drafts, length and breadth.
(i) Other data at the duty Pilot-Operator's request.

Master is responsible for the authenticity of the information transmitted.

3.29 At the request of the Traffic Control Station in order to identify her, the ship shall report the bearing and distance from Vorontsov Lighthouse and carry out the identifying manoeuvre.

3.30 The Traffic Control Station gives the identified ship the permission to enter the traffic control zone, indicates the direction of movement, anchorage and supplies her with other information, including warnings and limitations.

3.31 Only one vessel not exceeding 180 m. in length with a compass adjuster on board may carry out deviation operation in port waters with the permission of the Traffic Control Station.

3.32 Under favourable conditions in port waters, the duty Pilot-Operator may give permission to 2 vessels not exceeding 180 m. in length with a compass adjuster on board to carry out deviation operation simultaneously.

3.33 Radar assisted pilotage into the port may be effected at the Master's request.

When visibility is less than 3 miles, radar assisted pilotage is compulsory.

3.34 In restricted visibility no more than 2 vessels may be piloted by the Traffic Control Station simultaneously.

Possibility of simultaneous pilotage of 2 vessels is decided by the Chief Pilot-Operator of the Traffic Control Station in each particular case.

3.35 A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities, gyro compass and sound signalling equipment in good working condition and her radar shall be operative.

3.36 In the event of failure of the shore based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety and inform the duty Pilot-Operator immediately.

3.37 The use of the shore based radar does not relieve the Shipmaster of responsibility for the ship's control and safety.

3.38 Anchoring in the Oil Harbour channels, port gateways and within the inner port area is prohibited.

3.39 In case the vessel has to anchor in traffic control zone outside Anchorages No. 354 and 355, the Master shall inform the duty Pilot-Operator of the reason.

3.40 Vessels moving in the Oil Harbour channels have priority over those crossing the channel.

3.41 Two-way traffic and overtaking are prohibited in the Oil Harbour channels and port gateways. Overtaking is also prohibited in the inner port water area.

SECTION 4

SPECIAL CASES OF NAVIGATION IN PORT WATERS:

4.1 Tugs towing sea-going vessels, lighters and other craft of 500 g.r. and more shall be under the command of the Master of the ship in tow

4.2 All vessels exceeding 100 m. in length shall be towed by tugs i mooring operations.

4.3 During discharging of grain in the outer roadstead, tugs are forbidde to leave floating cranes and pneumatic loaders alongside the vesse unless it is agreed with the vessel's Master and the Pilot-Operator o the Traffic Control Station.

4.4 Towing operations shall be directed by the Master of the vesse being towed, who is responsible for the safety of the tug lying alongsid the vessel.

4.5 Tugs meet and escort vessels entering or leaving the port in the range of 12 cables to the East of the Vorontsovsky Lighthouse.

4.6 The Master makes a request for tugs through the Agent at leas 2 hours prior to the ship's readiness for departure or shifting.

4.7 The Master shall call out a tug 45 minutes prior to the ship's departure, shifting or approaching the port gateway through the dut Pilot-Operator.

4.8 Tugs carrying out towing and pushing operations are united into one group which is at the disposal of the Traffic Control Radar Station.

4.9 A bulbous bow vessel underway shall, when engaging a dockin tug, pass the tow rope by means of a hauling line.

4.10 A vessel exceeding 150 m. in length with her main engine o steering gear immobilised shall exhibit the lights specified in Paragrap 27B in addition to the signs and lights specified in Paragraph 24E of the International Rules for Prevention of Collisions at Sea, 1972.

4.11 Self-propelled vessels shall be towed with the aid of the shortes possible tow lines.

4.12 The Harbour Master in accordance with the actual ice condition in the port waters declares the beginning and completion of ice campaig in port waters, whereof he informs all concerned.

4.13 Forming convoys, establishing priorities of vessel's putting in/ou of the port, providing ice breakers in port waters are exercised by the Harbour Master.

4.14 Vessels' Masters possessing the permission for self-operating i ice shall inform the Harbour Master of the Port of destination, of thei position, ice conditions and operational speed every 4 hours.

4.15 Vessels bound to/from Nickolayev, Dniepro-Bugskiy or Kherso are rendered ice breaker assistance by forming convoys off the Biereza Island or in ports.

4.16 Masters not possessing the license to operate in ice are prohibite to enter and navigate in ice.

Exception is made only for urgent necessity if the shipowner allow a non-ice class vessel to pass through ice and it is agreed with th Harbour Master who provides necessary ice breaker assistance.

4.17 Foreign vessels having on board no documents certifying their rig to operate in ice, are taken under ice breaker escort, only after the Maste submitting in writing his agreement to be so escorted and to pa expenses over possible ice damage to the vessel.

Responsibility for possible damage to such vessels navigating in ic rests with their shipowners.

4.18 Requests for ice breaker assistance in putting a vessel into po shall be forwarded 48 hours prior to service requirement and confirme 24, 12 and 4 hours prior to approaching the traffic control zone or ic edge.

Requests for ice breaker assistance in putting a vessel out of po shall be made 24 hours in advance.

4.19 The following information shall be given on request: ship's nam overall dimensions, draft, main engine power, fuel and wat consumption per day, pure water speed, propeller material, total quant of cargo, availability of documents confirming the right to operate in ic ship's seaworthiness by the time of approach.

SECTION 5

SHIP'S STAY IN PORT:

5.1 Steam and water outlets in the hulls of all vessels shall be thoroug covered with wooden boards or canvas.

5.2 To avoid casualties no outboard work may be done on the off-si of vessels lying at Berths No. 3, 11, 17, 25, 32 and 33.

5.3 Ships may anchor at Points 1 – 11 of Anchorage No. 355, which bound by lines having points with coordinates:

Latitude		Longitude	
	46° 31.08' N.		30° 45.97' E.
	46° 31.50' N.		30° 46.03' E.
	46° 31.80' N.		30° 47.29' E.
	46° 30.61' N.		30° 48.28' E.
	46° 30.41' N.		30° 47.50' E.
	46° 30.44' N.		30° 46.50' E.

The Points in area of Anchorage No. 355 have the follow coordinates:

Point	Latitude	Longitude
N 1	46° 31.40' N.	30° 46.20' E.
N 2	46° 31.44' N.	30° 46.60' E.
N 3	46° 31.55' N.	30° 47.07' E.
N 4	46° 31.00' N.	30° 46.38' E.
N 5	46° 31.14' N.	30° 46.85' E.
N 6	46° 31.26' N.	30° 47.32' E.
N 7	46° 30.70' N.	30° 46.62' E.
N 8	46° 30.84' N.	30° 47.11' E.
N 9	46° 30.97' N.	30° 47.56' E.
N 10	46° 30.52' N.	30° 47.23' E.
N 11	46° 30.68' N.	30° 47.81' E.

The following order of anchoring should be observed at the Ancho

(a) Point No. 7 is used for vessels not exceeding 10 m. draft and 26 length. When anchoring a vessel exceeding 200 m. length at Point N neighbouring Points No. 4, 8 and 10 must be free of any craft.

(b) Points No. 1, 2, 3, 4, 5, 8 and 10 are used for vessels not excee 8.0 m. draft and 200 m. length.

(c) Points No. 3, 6, 9 and 11 are used for vessels not exceeding 6. draft and 170 m. length. These points are for anchoring pass training, research and river vessels.

(d) Points No. 1, 9 and 11 are used for transport vessels waiting for entering/departing clearance, bunkering, water and food supply, crew replacement and minor repairs.

The request shall be forwarded to the Agent and followed by making a note in the daily shift plan of ships' traffic (mooring operations) in port on agreement with the Traffic Control Station.

(e) Point No. 12 (Lat. 46° 30.18' N., Long. 30° 47.81' E.) is at the Harbour Master's disposal in case of urgent and unforeseen anchoring.

(f) Anchorage No. 355 is used for state ships only. For foreign vessels it is necessary to obtain the Immigration Authority's permission to anchor there.

5.4 Anchorage No. 354 is used for large tonnage vessels, tankers, ships with dangerous cargo on board and all other vessels waiting for the permission to enter Odessa port.

Vessels shall proceed to, and anchor at, Anchorage No. 354 without assistance. Upon anchoring, the vessel shall communicate to the Traffic Control Station her bearing and distance from the Vorontsovsky Lighthouse.

5.5 Anchoring of floating cranes, lighters, barges, floating grain loaders and other floating facilities alongside the vessels at Anchorages No. 354 and 355 for carrying out cargo and other operations, shall be agreed with the Traffic Control Station.

5.6 Specialised and large tonnage vessels shall anchor at Point No. 7 only. The length of the vessel and that of the anchor chain paid out should be taken into account in order to work out the radius of the turning circle and not to exceed the boundaries of the anchorage.

To ensure his ship's safety at anchorage the Master may request a powerful tug at the shipowners' expense. At wind speeds exceeding 18 m./secs., 2 tugs may be provided. Two reliable polypropelene towing lines shall be passed from the vessel's stern to the tug.

During time at anchor such vessels shall arrange for continuous bridge watch and communication through VHF Channel 14 with the Traffic Control Station.

At the time of anchoring specialised and large tonnage vessels to Point No.7 and for all periods of their lying at anchor Points No. 4, 8 and 10 shall be free of any floating facilities.

5.7 The following order is established for mooring vessels at berths:

No. 12, 13, 25, 26 and 33	– By portside for large tonnage vessels with the draft permissible for these berths.
No. 8	– By portside.
No. 32	– By starboard side.
No. 4 of Oil Harbour	– By starboard side.
No. 1 of Oil Harbour	– By starboard side for large tonnage tankers.
Other berths	– By the side indicated by the duty Pilot-Operator and agreed with the vessel's Master and the Pilot on board.

In case of necessity, it is possible to change the berthing side by obtaining the Harbour Master's permission and including it into the daily plan of ships' traffic (mooring operations). Exception is made for Berths No. 25, 26, 32 and 33 for which changing the side of berthing is prohibited.

5.8 The Odessa Oil Harbour has 7 berths which can accommodate tankers of the following dimensions:

No. 1	– Not exceeding 240 m. length, 40 m. breadth and 12.0 m. draft.
No. 2, 3, 4 and 7	– After reconstruction: Berth No. 2 – LOA 195 m., draft 12.0 m. Berths No. 3 and 4 – LOA 120 m., draft 10.0 m. Completion expected mid-1996.
No. 5	– Not exceeding 240 m. length, 40 m. breadth and 11.5 m. draft.
No. 6	– Up to 125 m. length, 16 m. breadth and 4.0 m. draft.

To ensure safe berthing and provide emergency departure from the Oil Harbour, the following berthing instructions shall be observed:

(a) Mooring vessels over 240 m. length and 40 m. breadth to Berth No. 1 may be carried on provided there are no vessels at Berth No. 2.

(b) If a tanker is lying at Berth No. 2 her stem should not extend more than 60 m. from the line of Berth No. 1 (orange mark between guns No. 4 and 5). During mooring operations alongside Berth No. 1, all cargo operations on the tanker lying at Berth No. 2 shall be stopped.

(c) If there is a vessel at Berth No. 1, the tanker mooring at Berth No.2 should be of such a length that after berthing and taking of hoses her stem shall extend at least 5.0 m. from the imaginary sea board plane of the vessel lying at Berth No.1, and the distance from the stern of the tanker to the stern of the vessel lying at Berth No.3 shall extend at least 15 m.

5.10 During mooring to/from a berth or shifting the vessel, it is obligatory to have in attendance representatives of the Cargo Handling Complex and Harbour Control with hand VHF station for communication between the Traffic Control Station and the Pilot on board.

5.11 During mooring to/from or shifting passenger liners alongside Berths No.15, 16, 18 and 19 due to constructive peculiarities of the passenger pier, it it desirable to have in attendance:

(1) A representative of the Harbour Control Inspection – on the quayside in way of the vessel's berthing place.

(2) A shift assistant of the Sea Terminal Master – on the territory of the Sea Terminal in way of the gangway providing for its proper installation on the vessel as well as for embarkation/dismbarkation of passengers.

5.12 The receiving/letting go of the ship's tow ropes during berthing operations, regardless of the purpose of mooring at berths (whether cargo operations, taking supplies, staying at berth, crew replacement, etc.) should be done by shoremen of those departments (Cargo Handling Complex, Sea Terminal, Oil Harbour) under whose charge these berths are.

5.13 Low-freeboard tankers laden with 3rd category cargoes of the International Maritime Dangerous Goods Code mooring at the Oil Harbour berths shall use the starboard anchor so as not to sink the deck below the berth fenders.

The anchor may be heaved only when the tanker's deck is at least on the level with the upper edge of the berth.

5.14 To ensure safe mooring of tankers at the Oil Harbour berths under unfavourable weather conditions, the anchor may be let go but shall be raised and hove into its hawse on the completion of mooring and prior to commencement of cargo operations.

5.15 Only one vessel not exceeding 240 m. in length may be moored to the corner of Berths No. 16 and 17 from partial discharging of grain or to the corner of Berths No. 23 and 24 for the same purpose (ship's length shall not exceed 200 m.).

Mooring is carried out by letting go both anchors so as to ensure safe passage for vessels proceeding to/from the Karantinaya, Novaya and Kabotazhnaya Harbours. It is possible to moor at these berths only at day time.

Mooring at Berth No.2 by stern is prohibited in any case.

5.16 All claims for damage to the vessel during mooring or cargo operations shall be made by the Master and forwarded to the Port Authority no later than 8 hours after the incident, or if the ship is to leave the port earlier – before the departure. Otherwise the port will not accept any claims and will not bear responsibility for the damage.

5.17 In the port it is prohibited:

(a) To moor a vessel alongside a smaller ship.

(b) To moor a vessel in ballast alongside a sister ship of the same dimensions with cargo on board.

(c) To moor passenger, research and training vessels alongside each other.

(d) To moor vessels with their main engines, steering or anchoring gear immobilised at Berths No. 13, 15, 19, 21, 25, 26, 32 and 33 and alongside each other.

(e) To moor vessels at the berths put out of operation.

(f) To moor large tonnage vessels exceeding 200 m. length at Berths No. 25 and 26.

(g) To leave Berths No. 25 and 26 by stern for large tonnage vessels exceeding 10 m. draft.

(h) To moor vessels exceeding 150 m. in length at Berth No. 21.

(i) To moor large vessels at Berth No. 32 in case there are floating facilities at Berth No. 31.

(j) To moor more than one vessel at Berths No. 3, 8, 11B, 17, 24B and 25.

If necessary a floating crane may be moored alongside vessel lying at Berth No. 8 for a short period of time on agreement with the Traffic Control Station.

5.18 Vessels moored with their sterns extending beyond the berth shall be tied up securely.

During cargo operations the following signals shall be exhibited on such vessels: by day – flags "Romeo" and "Yankee" ("You must slow down when passing me"); at night – one red light visible round the horizon.

Regardless and for whatever the purpose of her stay, a red light shall be exhibited over the stern of such a vessel at night to show her extent beyond the berth.

5.19 On the authorisation of the Traffic Control Station and with their Masters' consent large tonnage ships may be moored at Berths No.32 and 33 with their sterns extending 30 m. or more beyond the berth, depending on the ship's length.

When two such ships are moored at Berths No. 32 and 33, at least 2 breast lines shall be passed from the stern of each vessel to that of the other.

To ensure his ship's safety at berth in an off-shore wind which is affecting the position of her stern, the Master has the right to request the Port Authority for tug assistance.

A tug shall be directed to such a vessel by the duty Pilot-Operator at her Master's request. A reliable towing line shall be passed from this vessel to the tug at the Tug Master's request.

5.20 To ensure safe access to the vessels moored at Berths No.32 and 33 with their sterns extending beyond the berths, a floating jetty (lighter) should be installed at the ship's stern and securely tied up to the berth, a shore-to-ship gangway should be provided. The floating jetty (lighter) should be installed under the ship's gangway suspended by the ship's administration.

The responsibility for installation of the floating jetty as well as of the shore-to-ship gangway rests with the administration of Cargo Complex No. 6.

5.21 The owners of vessels carrying passengers and those of passenger terminals, floating jetties and other installations designed for embarkation/disembarkation of passengers shall provide for the safe working condition of terminals, floating jetties, etc. and safe embarkation/disembarkation to avoid any accidents with passengers.

5.22 The control over safe embarkation and disembarkation of passengers at sea terminals is exercised by the duty assistant of the Sea Terminal Master.

5.23 The shifting of vessels is allowed only with a pilot on board.

The pilot takes charge of shifting a foreign vessel along the berth. During shifting operations the following limitations should be observed within the harbour water area:

(a) Vessels in ballast and those having cargo of no more than 20% of the ship's deadweight (except for large tonnage vessels) may be shifted at the wind speed not exceeding 15 m./sec.

(b) Large tonnage vessels in ballast and Ro-Ro ships, Ro-flow ships, LASH carriers, tankers, container carriers and the like with cargo of no more than 20% of their deadweight due to the large windage are shifted at the windspeed not exceeding 12 m./sec.

(c) Shifting of vessels with faulty main engines, steering or anchoring gear is carried on only at daytime when the wind speed does not exceed 10 m./sec.

(d) Vessels are moored broadside if the wind speed does not exceed 10 m./sec. and visibility is no less than 500 m. on agreement with both Masters.

5.24 On completion of cargo handling or other operations, each vessel shall, at the first duty Pilot-Operator's request, leave her berth and the inner port waters at her own expense. Failing to do so, such a vessel, should there be immediate need to vacate the berth, shall be removed therefrom by Port facilities at her Owner's expense and he will be held fully responsible for any losses brought about by his ship's failure to vacate the berth on time.

5.25 Receiving/throwing of ship's towlines during shifting of a vessel along all berths should be made by means of those port departments (Cargo Handling Complex, Sea Terminal, etc.) at whose request it is carried on.

5.26 On receiving a storm warning of wind increasing from the Eastern directions (000° – 090° – 180°) up to 22 m./sec. and more, vessels lying at Anchorage No. 355 and in Areas "A" and "B" shall, at the duty Pilot-Operator's request, change their place of anchoring as follows:

(a) Auxiliary and small ships shall be put into the port and securely moored at berths.

(b) All other vessels shall go into anchor at Anchorage No. 354 or put to sea to ride out the storm.

The shifting of vessels lying on the roadstead shall be done on authorisation and under control of the Traffic Control Station.

5.27 In case of emergency oil spillage, on entering the oil stained field, the vessel must not commence sailing before obtaining a special permission from the Head of purifying operations.

5.28 Vessels and other floating facilities are strictly prohibited to pass through the polluted area. When navigating in the vicinity of the area where collection of oil is being carried out, vessels shall slow down to the minimum speed.

5.29 Deballasting shall only be done with pipelines designed for this particular purpose, by day, and with the permission of the Sanitary Inspection of the Environment Protection Head Office.

5.30 Water polluted with petroleum products is collected by the Purifying Station situated on the territory of the Oil Harbour or by special harbour craft. This service shall be paid for on the basis of existing tariffs.

5.31 Removing garbage and rubbish from ships and dumping of them on port territory is prohibited. Garbage and rubbish is removed from ships by the port at the request of their administration, the charges collected according to current tariffs.

5.32 Rubbish and garbage is removed from ships in polythene bags (containers) delivered on board by the Port at their request through the Agent. The contents of the polythene bags and containers are disinfected and removed to a special dump by the Port. Charges for this service are paid by the shipowners according to current port tariffs.

5.33 Tankers carrying out cargo operations and all vessels bunkering shall be boomed in accordance with the instructions on booming vessels in port.

5.35 It is prohibited to sweep dust, rubbish and snow from berths and the ship into the water or ice.

5.36 If any pollution in the port waters is detected from the ship this shall be immediately reported to the Harbour Control Inspection (Telephone No. 36-66) and Special Inspection of Environment Protection of the Black Sea (Telephone No. 25-14-47).

SECTION 6
USE OF RADIO COMMUNICATION FACILITIES IN PORT WATERS:

6.1 All vessels sailing in port waters shall have their VHF stations in working order and shall keep them operative on one of the channels used for communication in port.

In case of lack or failure of ship's VHF station it is possible to communicate with the Traffic Control Station through the "BLASCO" Radio Centre on marine calling and distress radiotelephony frequency 2182 kHz. (call signal is "Odessa-Radio-1").

6.2 The following VHF radiotelephony stations are available in the Odessa port zone:

No.	*Telephone Subscriber*	*Call Signal*	*VHF Channels*		
			Calling	*Working*	*Reserve*
1.	BLASCO Radio Centre	"Odessa-Radio-1"	16	7,27,62	–
2.	Traffic Control Station	"Odessa-Port-Control"	16	14	67
3.	Pilot boats	Name of the pilot boat	14	14	–
4.	Harbour Control Inspection	"Odessa-Radio-5"	16	9	–
5.	Harbour Control boat	Name: "Pilot boat-86"	16	9	–
6.	Harbour Craft Centre	"Odessa-Radio-6"	33	33	–
7.	Inflot Agency	"Odessa-Radio-8", for foreign vessels: "Inflot-Odessa"	16	67	–

6.3 Vessels within the Traffic Control Zone, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 3, 6, 8, 9, 14, 16, 26, 31 and 67.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters (traffic control zone) and all violators will be subject to liability.

SECTION 7
ORDER AND SAFETY IN HARBOUR WATERS – PROTECTION OF HARBOUR FACILITIES:

7.1 Fishing in port waters off quays or any craft is strictly prohibited.

7.2 Any objects found floating in the port waters which may be a hazard to navigation shall be immediately reported to the duty Pilot-Operator of the Traffic Control Station.

7.3 If a vessel happens to damage or run down any navigational marking, the Master shall immediately report the accident to the duty Pilot-Operator who is urgently to warn seafarers and to take measures to recover it.

7.4 Vessels at berth shall not turn their propellers. Exception is mad for:

(a) Diesel driven vessels at dead slow before leaving berth.

(b) Steamships for heating engines, at dead slow, before sailin provided special permission has been obtained from the Harbour Maste and the distance between the propellers and the berth is at least 10.0 m

7.5 Harbour structures damaged by a vessel are repaired at her owner expense provided the documents confirming the ship's guilt are availab

7.6 The areas in which it is prohibited to drop anchors and drag differen objects or anchors along the ground are shown on the charts.

7.7 Diving work in port waters may be performed only with specia permission of the Harbour Master, Traffic Control Station or Harbou Control Inspection.

Request for such permission shall be applied for by the ship's Maste or the enterprise concerned through the Harbour Master's Head Offic The diving boat's skipper shall obtain permission to commence divin work from the Traffic Control Station.

SECTION 8
ORDER AND SECURITY ON PORT PREMISES:

8.1 The Odessa Port premises and waters within the establishe boundaries are controlled by the Harbour Watching Station an Immigration Authorities.

8.2 While on the Odessa Port premises, all persons shall carry passes permits or other documents allowing their admission to port territory an shall present them at the first request of any Immigration or Harbou Security Officer.

8.3 Vessels lying at berth shall station their own personnel as watchme to guard the ship and her cargo.

8.4 Passenger liners lying at berth shall obtain permission from th Harbour Watching Station before installing their gangway on the po regime territory.

8.5 When the ship's gangway and ladder are used on the port regim territory simultaneously, the responsibility for prevention of movemen of people and goods from the controlled to the non-controlled territor rests with the ship's administration.

8.6 All foreign citizens who pass through the control post shall presen the Immigration Authority's permit.

8.7 Telephone communication with Port Services is effected through th Automatic Telephone Exchange, both of the port and of the city.

Harbour Master Head Office:	Telephone No.
Harbour Master	36-61, 22-63-25 Tel/Fax
Secretary	32-95
Traffic Control Station	37-30
Chief Harbour Pilot	34-57
Harbour Control Inspection (Central Post)	36-66
Harbour Control Post at Sea Terminal	38-84
Harbour Control Post in Oil Harbour	33-96
Harbour Control Post at Berth No.20	43-52
Passport Department (Chicherin St.,4)	48-22, 25-34-49
Fire Department	32-32, 39-35
Fire Fighting Team	33-54

8.8 The following is strictly prohibited on port premises:

(a) Firing any type of firearms.

(b) Turning on fire hydrants and faucets.

(c) Selling, carrying, drinking alcoholic beverages and gambling.

(d) Damaging trees.

SECTION 9
FIRE SAFETY CONTROL:

9.1 Vessels lying at berth or on the roadstead shall take bunker fuel o from the floating bunkering barges.

9.2 Passenger liners shall only take bunkers from self-propelled barge (if for some reasons it it impossible then a tug shall lie alongside th bunkering barge for the total period of bunkering) with obligator confirmation of the vessel's Master in writing that there are n passengers on board.

9.3 While inflammable or explosive cargo is being handled in the dr cargo harbour, a specially equipped fire crew shall be stationed on boar ship or a fireboat shall lie alongside.

Request for such a crew or boat shall be made by the ship's Maste the ensuing service charges to be paid by him according to existin tariffs.

Unless these requirements have been complied with, no dangero cargo may be handled.

9.4 Before towing non-self-propelled vessels with inflammable cargo o board and before all operations in the Oil Harbour, both bunkering barg and vessels to be towed shall obtain the permission from the Regis and the Fire Department of the Harbour Watching Station and shall ha not less than 2 steel fire wires (one forward and one aft) and exhau channels of the internal combustion engine equipped with spark tra

9.5 No work or maintenance operations unrelated to loading discharging of cargo may be performed on vessels lying at berth in th Oil Harbour.

9.6 Immobilising a tanker's main engine, anchor or steering gear f repair purposes while the vessel is in the Oil Harbour is strictly prohibi

In exceptional cases emergency repairs to the main engine, anc or steering gear may be carried out only with the Harbour Mast permission and agreement of the Fire Department. When repair wo necessary and has been permitted, at least 2 tugs, with towing lines p out to the tanker, shall lie alongside, tug charges to be collected fr the owners of the tanker.

9.7 On carrying out cargo operations on tankers with the IMDGC Clas oil cargo on board lying at berth in the Oil Harbour, a fireboat or shall lie alongside the tanker, boat or tug charges to be collected fr the owners of the tanker.

SECTION 10

SANITARY AND QUARANTINE REGULATIONS:

10.1 Masters of vessels arriving from foreign ports shall make known to the Boarding Pilot the sanitary and epidemiological condition of their ships as well as report any case of illness among the crew members or passengers. Only those ships will be allowed to approach berth and to moor whose sanitary and epidemiological condition and absence of sick cases on board has been confirmed by the Pilot.

In case the sanitary and epidemiological condition on board prove to be unsatisfactory and/or there happen to be sick cases among the crew members or passengers, such a ship shall drop anchor at one of the port anchorages indicated by the Traffic Control Station and await further instructions.

No person except the Pilot may leave or board the vessel until it has undergone sanitary inspection. The Pilot shall obtain the permission from the Sanitary and Quarantine Inspection.

10.2 The Sanitary Inspector may require of the ship's surgeon or Master a written statement to the effect that no cases of plague, cholera, yellow fever, typhus or smallpox have been recorded on board since the ship's departure from a certain port with unfavourable sanitary and epidemiologcal conditions or for the period specified by the existing rules.

10.3 Gas deratisation on board ship is carried out at the requirement of the Sanitary and Quarantine Inspection. To have the vessel fumigated for rats or otherwise, the Master shall make arrangement for the purpose through Agent.

10.4 While a ship is being fumigated or degassed she shall carry all the requisite signals.

10.5 Due to lack of appropriate equipment, the Port does not handle such cargoes as raw hides and other goods of animal origin as they constitute a sanitation hazard.

10.6 Biological treatment systems, if available on vessels, shall be operated in strict compliance with the instructions for the particular system.

The ship's Master is responsible for the purity of the water thus treated.

During the ship's stay at berth or on the roadstead, the water treated by the ship's biological treatment system is tested for purity at the Sanitary Inspection's Laboratories.

10.7 The Port provides the Sanitary and Quarantine Inspectors with boats in established order to carry out sanitary inspection of vessels lying on the roadstead, to give entry clearance as well as to carry out necessary anti-epidemiological operations on board vessels.

10.8 The following paragraphs of the present Port Regulations also correspond to this section: 5.29, 5.30, 5.31, 5.32, 5.33.

10.9 The Sanitary Inspection enforces strict supervision over the compliance of all vessels with the Sanitary Regulations.

Violators of these Regulations are held responsible and punished in accordance with the Council of Ministers Resolution No. 118 of February 14th, 1977.

The following additions to the General Regulations were received in August 1994.

2. ENTERING AND LEAVING PORT.

2.2.1. The services rendered by the Harbour Control Inspection regarding formalities in connection with arrival and departure of vessels, and checking their compliance with the respective International Conventions, followed by making the statement, shall be paid in accordance with the rate in force in the Port.

5. SHIP'S STAY IN PORT.

Anchorage of vessels in the designated points of roadstead shall be paid in accordance with the rate (anchor dues) in force in the Port which was introduced on 1st July 1993, for all vessels that use the anchorage points.

5.6. On Prevention of Port Water Area Pollution with oil products, harmful substances and sewage.

5.37. All vessels located in the water area and roadsteads of the port as well as all enterprises, organisations and institutions located in its territory (or emptying their effluents in the port water area) shall have to observe the requirements of the legislation of the Ukraine pertaining to protection of the environment and to agree with the Port Management all measures connected with the aspects of environmental protection in the territory and water area of the port.

Those quilty (Shipowner, Master, etc.) of violation of the requirements of the environmental protection legislation shall be called to criminal, administrative and property liability.

5.38. All vessels, irrespective of their departmental affiliation and flag, shall on arrival to the Port of Odessa, undertake to prove their compliance with the requirements of the International Convention MARPOL 73/78 by producing International Certificates on Prevention of Pollution by Oil, Sewage and Garbage to the Harbour Master.

Those vessels that do not comply with the International Convention MARPOL 73/78 shall not be accepted by the Port.

5.39. All vessels, other floating craft when they are within the port water area and in the roadstead of the Odessa port, as well as the enterprises and organisations located in its territory (or emptying their effluents in the port water area), shall be prohibited to discharge in water the substances harmful for human health or living resources of the sea, namely:

(i) Oil, oil products, oil residues and the mixtures containing the above substances in any concentration, including those treated in shipboard arrangement; ballast water from oil/ballast and oil tanks.

(ii) Raw chemicals and products of oil processing remaining after cleaning and washing decks, cargo holds and tanks.

(iii) Untreated drains from the spaces where animals are kept. In the absence of treatment facilities, the sewage disposal system is diverted to surge tanks which outlet valves are to be sealed by the ship administration.

(iv) Any other discharges if they result in a change of colour, odour and transparency of water or if their discharge leads to appearance of noticeable floating particles.

(v) Garbage and food remains, remnants of any cargoes and dunnage that have been used during carriage.

5.40. To preclude pollution of port water area, the administration of the vessel shall have:

(i) To close and seal the valves and other arrangements through which harmful substances may be discharged prior to entering the territorial waters.

(ii) To tightly close deck scuppers, to install pans under connections of hoses and air pipes and ensure reliable control over them during performance of any operations with oil, oil products, oily water and other harmful substances.

(iii) To make entries in the Oil Record Log and in ship's Log Book regarding all operations with oil, oil products, oil residues, oily water and other harmful substances, as well as regarding the actions aimed at pollution prevention.

5.41. It shall be prohibited for all vessels to clean the port water area by using preparations that sunk oil to bottom or dissolve it in water.

5.42. In case of a discharge outboard of any harmful substance, the administration of the vessel shall have to immediately inform the Harbour Master and the Inspection for Protection of the Black Sea by the quickest way possible (radio, telephone, courier). Similarly, it is necessary to inform on all pollution slicks detected from the vessel within the port water area, indicating their exact position, nature and direction of drift.

5.43. Sealing of all valves (through which a discharge of harmful substances is possible) on board of all vessels lying at berths of the port shall be performed by an authorised representative of the Port only, and is charged in accordance with an established rate.

5.44. During emergency oil spills, the vessel that has been caught by the oil spill shall not start movement until a special permission of the Oil Recovery Operations Manager is obtained.

5.45. It shall be prohibited for vessels and all floating craft to cross the polluted port water area. When passing near the area where oil recovery operations are in progress, speed of the vessel should be reduced to a minimum.

5.46. Administration of the vessel shall have to produce the ship's documents regarding environmental protection following a request by the authorities.

5.47. Collection and removal of oily water and domestic and feces water from all vessels shall be performed by the port following vessel's applications in accordance with established rates.

5.48. Pumping out clean segregated ballast should be performed via specially dedicated pipelines and pumps of the vessel only. Pumping segregated ballast overboard within the Odessa Port area may be performed only after making its laboratory analysis for content of oil products, iron and suspended solids, and obtaining permission for pumping out from the State Inspection for Protection of the Black Sea.

Pumping out shall be performed under supervision of a representative of the Harbour Control Inspection.

5.49. The vessels shall be prohibited to remove and pile garbage and industrial and domestic wastes on their own. The removal shall be performed by the port following vessel's applications with a subsequent payment in accordance with the existing rates.

5.50. Removal of food wastes and garbage shall be performed in polyethylene bags (containers) to be delivered by the Port to vessels following applications to the agency bodies. The contents of the polyethylene bags (containers) shall, after disinfection, be removed to a special dumping site by the Port's means and labour. The rendered services shall be paid for according to Port rates.

5.51. All vessels, while staying at Port's berths, shall be charged at the established rates for the exhaust of harmful substances from the shipboard diesel generators and boilers to atmosphere.

5.52. Vessels proceeding to Odessa shall, on entering the Black Sea, change their segregated ballast taken from other areas of the world oceans for the Black Sea water ballast and make a respective entry in the vessel's Log Book.

5.53. Vessels arriving for cargo handling operations to the oil harbour, as well as those receiving bunkers in the port water area and in the Port's roadstead, shall pay insurance ecological dues.

In case of an emergency oil spill, the Port shall collect oil products free of charge if a collection period does not exceed 6 hours of use of all port means on duty. If a period of oil spill liquidation (collection of oil products, washing of quaywalls and sides of the vessels lying nearby, washing of booms, etc.) exceeds 6 hours, the vessel shall reimburse the Port the expenses in connection with the said works.

5.54. The "Port Regulations for Tankers Arriving at Odessa Port Regarding Provision of Safety and Sea Pollution Protection" shall be effective in the port as of 1st February 1993.

5.55. Shipowners and Managers of the enterprises that violated Compulsory Port Regulations regarding Protection of Environment shall reimburse all port expenses for liquidation of pollution and its consequences at established rates, as well as port expenses in connecton with leasing of equipment, floating craft and staff of the other enterprises.

5.56. Pollution of the atmosphere by emission of dense smoke and noxious gases shall be prohibited.

5.57. Dumping of garbage or snow from berths and vessels on ice or in water shall be prohibited.

Signed: Manager of Odessa, Commercial Sea Port.

NOTICE: Received 1996.
Quote:
To be delivered by Agent to Master of each vessel calling at the port.

NOTIFICATION

of Legislation of Ukraine on protection of the surroundings and responsibility for its violation.

The Masters of vessels staying in the inner sea and territorial waters of Ukraine (in future text called aquatorium) are notified of the principal requirements of the Legislation of Ukraine on protection of the surroundings and responsibility for its violation.

(1) By the Legislation of Ukraine it is prohibited to discharge overboard substances harmful to people's health or to life resources of the sea in particular:

1.1 Oil, oil products, oil remainders as well as mixtures containing same in any concentration, including purified in ship's apparatus (arrangements).

1.2 Chemical raw materials and products of chemical production after cleaning and washing decks, cargo holds and tanks.

1.3 Non-purified sewage disposal from toilets, ship's hospitals (sick bays), compartments where live animals are maintained. When purifying such sewage in order to discharge it overboard, it is necessary to obtain a special permission from Sanitary (Quarantine) Authorities and the discharge to be executed under their control only. Vessel must be equipped with treatment plant (comminater), sewage water tanks and pipeline.

1.4 Any other sewage, if it changes the nature of the sea water, its colour, smell (odour), transparency or if the discharge results in forming visible floating fractions.

1.5 Rubbish and food wastage (garbage).

(2) The removal from the vessels of all kinds of stored harmful substances is provided by the port.

(3) It is prohibited to let out smoke which pollutes atmosphere.

(4) To prevent possible pollution of the port's aquatorium it is required.

4.1 All valves and other appliances and equipment through which there may be accidental or premeditated discharge overboard of any kind of the enumerated harmful substances, to be closed and sealed. Preventative labels to be placed in appropriate places.

4.2 During any operations with fuel, oil products, oil polluted waters and other harmful substances, the scuppers on deck to be hermetically sealed. Under the places of pipe connections, tanks, air pipes the oil boxes to be placed, providing data (dependable) control of these operations in order to avoid pollution of the aquatorium. Ships performing these operations must use (compulsory) the protecting shore booms with payment as per tariffs.

4.3 Pumping out of clean segregated ballast waters to be effected only with a special permission of the Sanitary Authorities.

4.4 Ship's works (chipping, painting of the hull, washing of decks, holds and other parts of the vessel) as well as repair works to be carried out under compulsory observance of measures excluding pollution of the aquatorium.

4.5 Ships proceeding to Odessa port upon entering Black Sea are to change their segregated ballast taken in other world ocean regions for the Black Sea water ballast with proper entries in the ship's Log Book.

(5) It is prohibited to use for cleaning the port's aquatorium by preparations which produce sinking of oil to the bottom or are dissolving the oil in the water.

(6) If for some reason or other a discharge of harmful substances overboard took place, it is necessary to advise the Harbour Master immediately (by radio, telephone, messenger). It is also required to advise about all pollutions of the aquatorium observed from the vessel indicating the exact location, character, dimensions, direction of movement.

(7) It is necessary to register immediately all operations with oil, oil products, oil remainders, water containing oil and other harmful substances, as well as actions preventing pollution mentioned in Items 4 and 6 of the present Notification in the corresponding ship's documents (Oil Record Book, ship's Log Book).

(8) Ship's documentation, concerning the protection of the surrounding (Oil Record Book, book for registration of operations with sewage waters and rubbish, certificates of ship's water protecting equipment, etc.) to be ready for immediate presentation to the Port Authorities upon their request at any time.

(9) Owners, Masters of the vessels and other persons guilty in violation of the Legislation of Ukraine on protection of surroundings shall bear criminal, administrative and property responsibility.

Signed: Harbour Master.

RENI: 45.26 N. 28.18 E. **(See Plan**

GENERAL: The Port of Reni is situated 164 km. from the coast of the Black Sea, and is 25 miles up from the Izmail Chatal Point on the le bank of the Danube River.

The port is open for navigation all year round. In severe winters ice breaker assistance is required.

The port is connected with the sea via the Sulina Channel.

Changes of the water level are due to effects of the wind and Spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m

DOCUMENTS:

Immigration:
Crew List.
Passenger List.

Customs:
Complete copy of each Manifest for goods onboard.
List of personal belongings of crew members.

Quarantine:
Valid Derat Certificate.

Safety:
Valid Load Lines Certificate.
Valid Safety Equipment Certificate.

Others:
Free Trade Certificate.

PILOTAGE: Compulsory. All ships navigating from the Port of Izmai through the Ismail Chatal to the Port of Reni and vice-versa, should b assisted by a duly authorised State Pilot.

The port is provided with a Vessel Traffic Management Service (Ship Traffic Control Station), equipped with modern radar installation (Decca 2), television and computer systems enabling reliable navigation an safe pilotage under any conditions of restricted visibility. The abov facilities also reduce ships' stoppages (delays) and provide Masters vessels with necessary relevant information on the conditions navigation.

Arrival Advice: Masters of the vessels are required to send a 24-hou notice informing the Port Authorities of the expected time of arriva general description and quantity of cargo onboard, numbers passengers, ship's length and draft, and request for services to b rendered.

ANCHORAGES: Ships can obtain anchorage and arrange po formalities at the upper (Mile 69 – km. 128) and lower (Mile 64 – km. 11 Roads. Depths in the above roads are sufficient for all types of ships.

RESTRICTIONS: There are no time restrictions for the entry to the por Both draft and length of vessels are limited by depth and width of th Sulina channel.

RADIO/VHF: The Central Port Radio Station provides vessels anchore at the Roads with connections to the port services, and intercity.

The following VHF radio stations serve the roads and function 24 hou a day:

Station	*VHF Channel*	*Call Sign*
Central Port Radio Station	16	Reni-Radio 1
Central Port Radio Station	26	Reni-Radio 1
Central Port Radio Station	2	Reni-Radio 1
Port Controller	12	Reni-Radio 2
Port Control Inspectorate	12	Reni-Radio 5
Inflot Shipping Agency	9	Reni-Radio 8
Transflot Ships' Service	9	Reni-Radio 7
Reserve Crew	9	Reni-Radio 14
Port's Auxiliary Vessel Controller	12	Reni-Radio 6
Bunkering Service	12	Reni-Radio 15
Vessels' Movement Control Post	73	Reni-Radio 17

Non-business calls over the VHF radio are prohibited. Telephon shore connections are available at the berth for connection to ships

Operation Frequencies, Call Signs & Schedule:

Transmission frequency	*Reception frequency*	*Operation time (Moscow)*	*Call sign*
3225 kHz	4210 kHz	0800–0900	UJN-3
4260 kHz	4210 kHz	0900–1100	UJN-3
6421.5 kHz	6275.5 kHz	1100–2000	UJN-3
3225 kHz	4210 kHz	2000–2400	UJN-3
156.800 (Channel 16)	156.800 MHz (VHF Channel 16)	Round the clock	Reni-Radi
161.900 (Channel 26)	157.300 MHz (VHF Channel 26)	Round the clock	Reni-Radi
156,100 (Channel 2)	160.700 MHz (VHF Channel 2)	Round the clock	Reni-Radi

RADAR: See "Pilotage".

TUGS: 34 tugs, up to 2,000 h.p. Tug assistance is not compulsory. T are available if requested by Master. Tugs shall be ordered by VH least 1 hour before required.

Service boats are available for transportation of crew and perso to and from the anchorage.

BERTHING: The port is accessible to large vessels. The berths depths alongside of up to 7.5 m. are equipped to handle genera bulk cargoes, crude oil and oil products, grain and food products.

The port comprises four cargo areas.

The first area has 10 berths including 2 facilities, which accommodate large sea-going vessels under any Danube water s Export and import cargoes of various trades are handled there. O the berths specialises in transhipment of imported grain and has capability of operating in any weather.

The second area also comprises 15 berths to handle smal medium diameter pipes and tubes, steel exports and imports, equip containers, export timber and transit cargoes.

The third area has a quay of 200 m. for handling vehicles, an fourth area is specially for bulk cargoes.

Four berths, storage facilities, railway sidings, communications, service space and other facilities were put to use. Quayage gained more than 500 m. The new capacity made it possible to handle 800,000 tons of cargo additionally.

Berths No. 1, 2 and 28 handle steel; Nos. 3 and 4 packages and pieces; Nos. 5 and 26 equipment; No. 6 heavy lifts; Nos. 7 and 8 canned goods and vegetables; Nos. 9 and 9a grain; Nos. 15, 16, 27 and 29 general cargo; Nos. 17 and 18 exports and imports; No. 31 vehicles; No. 34 coal and Nos. 35, 36 and 37 laminate and ores.

Cranes of up to 32 tons capacity are operated on the quays. Also there are floating cranes with lifting capacity of up to 100 tons, fork lift trucks up to 10 tons capacity and other cargo handling equipment.

FRESH WATER: Can be supplied ex-shore and by barges at 12 hours notice.

FUEL: Available at 12 hours notice.

CONSULS: None.

REPAIRS: Hull, deck and pipeline repairs possible. One repair quay with length 165 m.

SURVEYORS:

1. Cargo Inspector of the Chamber of Commerce and Industry available.
2. Register of Shipping Surveyor available.

OPENING/CLOSING HATCHES: According to the custom of the port, opening and closing of hatches is carried out by the crew. But it can be carried out by the port workers for vessel's account, if required by the Master.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

POLICE/AMBULANCE/FIRE: A Fire Guard of the port provides for the safety of ships and can be summoned, via the "Inflot" Agency, to render services in order to extinguish fire or to pump water from holds.

If a fire occurs in the port territory or on board it shall be reported to the Fire Squad by telephoning 2-01, or to the fire boat "Smeliy" dialling 2-02. The fire boat can also be summoned over VHF Channel 16.

STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessel can store from barges after loading/discharging or during operations if nothing interferes with cargo handling.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used on the jetty to handle stores.
5. Vessel can be stored with various stores except prohibited items.
6. Local riggers can be employed to assist with storing.

NOTICES: Masters of vessels proceeding to the Port of Reni shall, in advance but latest 24 hours prior to arrival at the port, advise Port Control and "Inflot" Agency: time of arrival, description and quantity of cargo for the port, heavy lifts, if any, their stowage and weight, number of passengers, ship's draft and length, as well as services required of the port.

Abstracts from Compulsory Rules of the Commercial Sea Port of Reni:

Article 1: Two hours prior to arrival at the Commercial Sea Port of Reni, Master shall advise accurate time of arrival to Port Control Inspection.

Article 2: Ships may call at or leave the port, round the clock, after obtaining permission of the Port Control.

Article 3: Upon anchoring in the inner or outer roads, a radio watch shall be kept on VHF Channel 12.

Article 4: Berthed ships are provided with electric power, telephone and fresh water.

Article 5: Prior to commencement of loading, ship's cargo spaces shall be completely cleaned and provided with all the necessary equipment.

Article 6: Ships may discharge oil-contaminated water, garbage and food waste at the port. Master shall take every step to prevent a spill of oil products.

Article 7: Orders for any port services are placed by Masters of foreign vessels through the "Inflot" Agency.

DEVELOPMENTS: A Ro-Ro Terminal will be in operation in the near future.

SHIPMASTER'S REPORT: January 1994.

1. The Port of Reni is on the River Danube on the delta and can be found on B.A. Chart No. 2835.
2. The max. arrival draft for Sulina Pilot Station and for crossing the bar is 6.5 m. in fresh water, but also depends on the season (rain, ice, spring tide, etc.). The Pilot can be contacted on VHF Channels 16/12.
3. Vessels take Romanian Pilots from the outer anchorage to inside the breakwater up to a distance of 2 – 3 miles before Sulina. This vessel anchored for Free Pratique and was assisted by a Romanian Pilot.

   The following documentation was required:

   6 copies Crew List.
   1 copy Stores List.
   1 copy Crew Declaration.
   1 copy Cargo Manifest.
   1 copy Narcotics List.
   Ship's Register.
   Classification Certificate.
   Derat Certificate.
   IOPP Certificate.

   The Suez Canal and Panama Canal Certificates were required for calculation of the tax for the River Danube.
4. Night-time navigation is forbidden when visibility is reduced (fog or snow). We anchored immediately when we encountered reduced visibility.
5. The official language of the Danube River is Russian.
6. Each nautical mile on the river is indicated by a signpost on the starboard bank when proceeding inward.
7. After obtaining Free Pratique at Sulina Anchorage (1200 hrs.), we anchored at Mile Post 26 (See "Plan") to await passage the next day. The current runs outward at 2 – 3 knots, so vessel heads up-river at all times whilst at anchor. The holding ground is good and we anchored with 3 shackles on the port anchor and 2 shackles on the starboard anchor.
8. At Mile Post 35 (See "Plan"), a vessel has capsized 90° to the river bank, so the passage is very narrow at this point.
9. When passing Tulcea, the current is very strong and tankers are assisted by a tug.
10. On arrival at Mile Post 68, the vessel again anchored and Pratique formalities were undertaken by Ukrainian authorities. They required the following documents:

    7 copies Crew List.
    1 copy Stores List.
    1 copy Crew Declaration.
    1 copy Narcotics List.
    Ship's documents, etc.

    At this point, the Romanian Pilot disembarks and the Ukrainian Pilot boards and takes the vessel to Reni.
11. On arrival at Reni, we berthed starboard side alongside, head up-river, for loading of chemicals. No mooring boats were available, so lines were sent ashore fore and aft via the tug, using strong messengers.
12. At Reni, we normally discharge into barges of 1,000 tonnes – 1,500 tonnes each. They come alongside our port side and take the cargoes to Czech Rep., Yugoslavia, Austria and Germany.

    On this voyage, we discharged 4,000 tonnes of gasoline and 1,000 tonnes of gas oil in 5 days.
13. On sailing, we turned near Mile Post 70 (just above the berth) (See "Plan") with the assistance of 1 river tug (2,500 h.p.). At other times, when the current has been very strong (4 knots – 5 knots), we have turned near Mile Post 84 (Passet Galleti).
14. After sailing at 1100 hrs. local time from Reni, we again anchored near Ceatal (Mile Post 44) (See "Plan"), as there was not sufficient time to reach Sulina in daylight.

    At Ceatal Anchorage, the Ukrainian Pilot disembarked and the Romanian Pilot embarked to take the vessel as far as Sulina Pilot Station.

    At this anchorage, we anchored towards the port side (heading up-river) with 3 shackles on the port anchor and 4 shackles on the starboard anchor.
15. The maximum draft up to Reni is 23 ft.
16. Reni:

    There are no shore leave restrictions.
    Fresh water is available.
    A few vegetables are available.
    Doctor available.
    Derat Certificate can be renewed.
    Sewerage treatment compulsory.

    WARNING: The crew should take great care when proceeding ashore as some personnel have arrived back onboard with very little clothing and only their Seaman's Book or Discharge Book (shoes and all clothing were stolen).

AUTHORITY: The Port of Reni Authority, 188 Dunayskaya Street, 272840 Reni, Odessa Region, Ukraine. *Tel:* 2-14-84, 2-10-57. *Telex:* 732414. *Cables:* Reni Port.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunayskaya Street, 272840 Reni, Odessa Region, Ukraine. Cables: "Inflot Reni". Tel: 21895, 26593. Telex: 232713.

SEVASTOPOL: 44.37 N. 33.32 E. (See Plan)

The port of Sevastopol is situated on the South-Western coast of the Crimea Peninsula. The port occupies Sevastopol, Yuzhnay, Qurantine, Streletskaya, Kruglay, Kamishovaya and Kazachia Bays, where there is located commercial and fishing ports and a Navy Base. All bays (excluding Sevastopol Bay) are opened to Northern winds. Navigation in the port is all year round.

Cargo vessels require special permission from the port and military authorities to enter port.

PILOTAGE: Compulsory. The pilot usually boards vessels in the outer roads 2 miles before the entrance (Lat. 44° 37' 05" N., Long. 33° 27' 08" E.). During bad weather, the place of embarkation and disembarkation of the pilot may be changed, subject to Master's approval.

APPROACHES: The 0.6 miles long approach channel leads from Sea Buoy No. 2 (Lat. 44° 36' 05" N., Long. 33° 35' E.) to the Cargo Quay.

ANCHORAGE: Anchorage is in the outer roads from 1.0 miles to 4.0 miles off the coast between parallels of 44° 36' N. and 44° 40' N. Permitted anchorages are marked on the chart as No. 384 (depths 13.0 m. – 33.0 m.), No. 386 (depths 70 m. – 82 m.) and No. 389 (depths 50.0 m. – 64.0 m.).

RESTRICTIONS: Entry into the port is allowed on a 24 hour basis. During night-time, approach to the port by vessels with length of more than 120 m. may be effected with Harbour Master's permission. Vessels should proceed through the channel at a speed not exceeding 5 knots, and within the inner roads at a speed not exceeding 9 knots.

MAX. SIZE: Max. draft 9.1 m. and length 200 m. for Passenger Quay, max. draft 8.6 m. and length 185 m. for Cargo Quay, and max. draft 9.1 m. and length 185 m. for tanker berth. Larger vessels shall obtain the Harbour Master's permission for berthing.

For Kamishovaya Bay, draft of no more than 8.5 m. permitted.

Tide: Range of water level due to Spring River flow may be up to 0.9 m.

HEALTH: Health Declaration required to obtain Pratique. When arriving from another Black Sea, Pratique is available. In the event of any disease on board, contact Agent.

RADIO/VHF: VHF communication on Channel 16 for Pilots. All messages via Agent through port radio UXO.

Radio contact through port radio station "Sevastopol Radio", operating on following frequencies:

Call Sign	*Frequency Working* (kHz)	*Frequency Calling* (kHz)	*Type of Transmission*	*Time of Operation*
"Sevastopol Radio-3"				
Port Control	2,264	2,525	J3E	H24
"Sevastopol Radio-4"				
Port Control	2,464	2,464	J3E	H24
Port Radio "UXO"	500	500	AIA	H24
	422	468	AIA	H24

TUGS: 1×900 h.p., 1×1,600 h.p., 1×1,200 h.p. and 1×2,540 h.p. Tugs normally join vessels at the entrance. Ship's lines used. Tugs are compulsory for vessels over 500 g.r.t. In case of anchorage within inner roads, for any reasons, a tug should be ordered by Master to ensure safe manoeuvring. Expenses on ship's account.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Fishing Port		
No. 10	200	8.6
No. 11 (Cargo)	162	8.6
No. 5	150	8.0
No. 19 (Tankers)	185	9.1
Sea Port		
No. 2	150	4.0
Cargo Quay	112	8.0
Quay No. 11a	290	6.0
Passenger Quay No. 1	200	9.1

CRANES: Cargo Quay equipped with electric cranes up to 10 tons for handling of general, bulk and other cargoes. Open storage available.
STEVEDORES: 12 days notice required. Working hours: 0800-1600.
MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.
FRESH WATER: Available by pipelines at quays. Cost U.S.$ 5.00 per ton (1994).
FUEL: Bunkers available from private companies by prior arrangement with Agent.
REPAIRS: All types of repairs for vessels up to 40,000 d.w.t. possible.
DRY DOCKS: Dry docks for vessels up to 280 m. LOA.
SURVEYORS: Marine Surveyors representing Lloyd's, Maritime Register of Shipping. Fax: 0692-44-48-19. Tel: 0692-52-09-40.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: No restrictions.
CARGO GEAR: Load/discharge usually effected by shore cranes.
AIRPORT: Nearest airport is located in Simpheropol, 55 miles.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer time.
HOLIDAYS: January 1st; January 7th; March 8th; Easter; May 1st; May 2nd; May 9th; August 24th; November 7th and 8th.
POLICE/AMBULANCE/FIRE: Ordered through Agent.
SERVICES: Chandler, laundry and car hire, arranged by Agent.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.
GARBAGE DISPOSAL: Available.

THEODOSIA (Feodosia): 45.04 N. 35.24 E. **(See Plan)**

GENERAL: The port of Theodosia is situated on the Southwestern coast of Feodosia Bay (Southeastern part of the Crimean Peninsula).
PORT LIMITS: 3 miles from the Inner Harbour (Outer Anchorage), vessel is considered as "arrived ship" and laytime will commence.
DOCUMENTS: Before arrival, Master of the ship must prepare:

6 copies General Declaration (IMO form).
2 copies Cargo Declaration (IMO form).
1 copy Health Declaration.
8 copies Crew List.
4 copies Ship's Stores Declaration.
2 copies Crew's Effects and Currency Declaration.
1 copy Passenger List (if no passengers).
8 copies Passenger List (if the ship has passengers).
2 copies Effects and Currency for Passengers.
2 copies Narcotics List.
2 copies Arms Declaration.

Tonnage Certificate, International Load Line Certificate, International Oil Pollution Preventing Certificate, Minimum Safe Manning and SOLAS-74 Safey Certificates will be taken by Agent for inspection by Harbour Master.

PILOTAGE: Compulsory. Provided by the State Pilots. Pilot place i situated in the Northern part of the Feodosia Bay in positio Lat. 45° 04.95' N., Long. 35° 30.75' E., near the Feodosia Buoy. Notic of ETA 72, 48, 24 and 4 hours in advance required through Feodos Radio or Odessa Radio. Master must indicate length overall, breadt height from keel up to main deck, present draft (fore and aft), ETA a Pilot Point. One hour before Pilot Point, Master must contact Feodos Port Control on VHF Channel 10 for receiving instructions.

Pilot boards by pilot boat or by tug. Contact Pilot on VHF Channel In the event of bad weather, pilot boat will lead vessel into port.
ANCHORAGE: The anchorage is situated 2.5 miles N.E. from Signa Station of the port with centre at position Lat. 45° 03' N., Long. 35° 26' E and extending N.E. for 2 miles with breadth 4 cables. Depth about 18 m – 20 m., good holding ground, mud and sand. Anchorage is open t Eastern and Southern winds. Anchoring possible only with Pilot' permission. Anchorage in other places in Feodosia Bay is prohibited.
RESTRICTIONS: Mooring of tankers to oil berths and ships with carg capacity more than 5,000 tons to wharves is only during daytime Mooring of tankers with deadweight up to 23,000 tons is carried out wit wind not more than Force 5 and sea not more than Sea State 4. Moorin of tankers with deadweight more than 23,000 tons is carried out wi wind up to Force 4 and sea not more than Sea State 4. Mooring of ship to wharves is carried out with wind up to Force 5. For tankers, minimu visibility is 10 cables and for other vessels, 3 cables for mooring.
MAX. SIZE: North Oil Berth for tankers up to 30,000 d.w.t. with maximu draft 12.3 m. South Oil Berth for tankers up to 23,000 d.w.t. wi maximum draft 11.3 m.
RADIO: Vessel's information may be sent through Odessa Radio "UDE "UFB" or directly to Feodosia Radio "TM-2" MW 500/447 kHz, in daytim and "TM" on SW from 0800 – 1800 hrs. on 16,673.3/17,0145 an 1800 – 0800 hrs. on 6,277.3/6,370.
VHF: Port Control (Harbour Master) on Channel 10. Radio Feodosia o Channels 16 and 18. Oil Department on Channel 14. "Inflot" o Channel 14. Fire vessel on Channel 14. Petroleum Terminal o Channel 12.
TUGS: Number and capacity of the tugs is to be decided by Master an Pilot. Tugs compulsory for vessels over 500 g.r.t. There are 2 tug 1×1,600 h.p. and 1×225 h.p. Ship's lines used.
BERTHING: There are 5 wharves in the port.

Berth	*Length* (m.)	*Max. Draft* (m.)
1	126	5.8
2	132	5.8
3	151	6.8
14	126.5	5.8
15	113.5	3.4

These drafts are given for L.W. with usual density (1012).
CRANES: 13 cranes available. All berths are equipped with electr cranes up to 5-10-20 tons lifting capacity for handling general and bul cargoes, steel products and timber. Possible facilities for handling grai ores, coal, fertilisers, containers and Ro-Ro traffic.
STEVEDORES: Normal working hours for all cargoes:

3 shifts: 0800 – 1600, 1600 – 2300, 2300 – 0800 hrs.
Meal times: 1130 – 1200, 1930 – 2000, 0300 – 0330 hrs.

Average loading rate for bulk cargoes 1,600 tons per day and gener cargoes 1,000 tons per day.
TANKERS: There are 2 oil berths in the N.E. part of the Bay. Tanke are moored on heading 115° (± 10°), using anchors forward wi 6-8 shackles in the water, and 2 mooring buoys aft with 2 ship's rop to each buoy. The buoys are equipped with 60 mm. wires with very lar eye links at the end, where the ropes are doubled through.

Cargo and ballast pipes are 10 in. (254 mm.) diameter. Oil Termin may receive dirty ballast after oil products, except after lead gasolin Rate 700 cu.m./hr. Capacity 3,500 cu.m. Cost U.S.$2.00/cu.m.

Oil Terminal may load/discharge gasoline (rate 400 tonnes/hr heating oil (rate 400 tonnes/hr.), gas oil (rate 550-600 tonnes/hr.), mari diesel oil (rate 400 tonnes/hr.). There is some special equipment f fighting oil spills, such as special oil collection ship and oil booms (Nok Sup type 325 ms. and Anakonda type 336 ms.).
DENSITY: Average density around year 1012.
FRESH WATER: Available from barge in the roads and from pipel at the berth. Minimum quantity from barge: 40 tons in the roads a 20 tons at the berth.
FUEL: Available from barge and trucks.
FIRE PRECAUTIONS: Fireboat service compulsory for tankers du loading/discharging operations only. Cost U.S.$40-50 per hour.
REPAIRS: Minor repairs possible.
SURVEYORS: Cargo inspectors: Saybolt, SGS, Interssaserv Crime Int. Service.

Surveyors: Ukraine Register, Lloyd's Register, American Bur Bureau Veritas.
GANGWAY/DECK WATCHMEN: Compulsory. Watchmen service c be arranged.
OPENING/CLOSING HATCHES: Normally carried out by ship's cr
CUSTOMS ALLOWANCES: 200 cigarettes or 200 gr. tobacco, 1 of spirits and 2 litres of wine.
REPATRIATION: Possible.
AIRPORT: International Airport Simpheropol, 117 km. from Theodo Regular flights to Istanbul (Turkey).
TIME: GMT plus 2 hours in Summer and 3 hours in Winter.
HOLIDAYS: January 1st and 7th; March 8th; Easter; May 1st and May 9th; Trinity; August 24th; November 7th and 8th.
POLICE/AMBULANCE/FIRE: Call Port Control on VHF Channel 1
STORING: Vessel may be stored by barge and trucks. Trucks proceed alongside at all berths. Forklift trucks may be used on all je to handle stores.
SHIP SUPPLY SERVICE: Transfer of stores, crew and sick perso Arranged through Agent.
SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Compulsory. Supplied by Immigration Officer on arrival.

GARBAGE DISPOSAL: Garbage is stored in ship's containers or plastic bags and collected every 2 days by special garbage ship.

WASTE OIL DISPOSAL: All vessels must store waste oil and sewage waters, which are collected from ship during the stay in the port by a special vessel. Payment for garbage and waste oil disposal included in the sanitary charge.

CURRENCY: Ukrainian Karbovanets. Exchange rate U.S.$1.00 = 190,000 Karbovanets (June 1996). Rate always changes.

REGULATIONS: *Demands of Inspection for Protection of the Black Sea:*

1. Before crossing the territorial waters of the Ukraine, the Master of any vessel must change segregated ballast at any zone of the Black Sea, where the depth is 2,000 m. and more. This fact must be entered in the Log Book.
2. All ships with open sewage systems are prohibited from entering into the territorial waters of the Ukraine. Since the moment of crossing the territorial waters of the Ukraine, all ships, even if they have in operation an approved sewage treatment plant with the system of purification and disinfection, are prohibited to discharge overboard substances with any oil content and sewage waters. Since the moment of entering into the territorial waters of the Ukraine, all harmful substances (or waters with such substances) must be discharged into holding tanks and into slop tanks. All valves, equipment, engines, openings and places where a discharge of harmful substances can happen, must be hermetically closed and sealed by ship's Administration at the moment of crossing into the territorial waters of the Ukraine.
3. It is prohibited to discharge ballast (including clean ballast and segregated ballast) into the territorial waters of the Ukraine without sampling and special permission of State Inspection for Protection of the Black Sea.
4. The port of Theodosia has no special equipment for loading/unloading animals (including cattle), so all vessels are prohibited to enter into the port of Feodosia or even into Feodosia Bay with animals as cargo.
5. It is prohibited to use substances which evoke sinking of oil to the bottom of the sea or which dissolve an oil in water.
6. It is necessary to register all operations involving harmful substances in ship's documents (Oil Record Book, Log Book, etc.) immediately when operating. Harmful substances are oil, oil products, oil remains, waters containing oil, sewage waters, bilge waters, etc.
7. In the port of Theodosia, the Master of the ship must on request give the following documents to State Inspection for Protection of the Black Sea:

International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate.
International Garbage Pollution Prevention Certificate.

SHIPMASTER'S REPORT: April 1993.

The port of Theodosia is situated on the N.E. coast of Crimea Peninsula, in the N.W. part of Kaffa Bay.

The port, formerly in a prohibited area, is now open for trade.

Vessel: Tanker of 30,000 d.w.t.

Chart: B.A. Chart No. 2233.

Port Limits: The port waters are bound by a line bearing 026° from Ily Lighthouse to the shore.

Documents:

5 copies General Declaration (IMO form).
2 copies Cargo Declaration (IMO form).
1 copy Health Declaration.
7 copies Crew List.
1 copy Passenger List.
1 copy Stores List.
1 copy Crew's Effects and Currency Declaration.

All crew's passports are taken ashore by Immigration Officer for formalities and returned next day.

Tonnage and Safety Certificates are taken ashore by Agent and returned before sailing, together with Sailing Clearance.

Pilotage: Compulsory for berthing and unberthing. Call Port Control for instructions.

Anchorages: There are 4 areas for tankers, about 2.5 miles N.N.E. from Ily Lighthouse in a depth of 18.0 m. – 20.0 m., good holding. Contact Port Control on arrival for anchorage position.

Restrictions: Mooring and unmooring at sea berths only during daytime. Max. wind: 6 m./sec. for mooring and 12 m./sec. for staying at sea berths.

Health: Free Pratique granted on arrival at the anchorage, before mooring. Derat Exemption Certificate issued on request (Cost U.S.$ 90.00).

Radio: Cables to be send preferably through Odessa Radio "UDE/UFB".

VHF:

Port Control: Channel 10 for instructions, information and pilot.
Oil Terminal: Channel 12 for cargo information.
Pilot, Tugs, Service Boats: Channel 6 during manoeuvring only.

Tugs: 1×1,600 h.p. and 1×225 h.p., ship's lines used.

Tankers: Two sea berths, in the Northern part of the bay.

North Sea Berth for 35,000 d.w.t. tankers with max. draft 12.50 m.
South Sea Berth for 23,000 d.w.t. tankers with max. draft 11.30 m.

Tankers are moored on heading 120°, using both anchors forward with about 8 shackles in the water, and 2 mooring buoys aft with 2 ship's ropes to each buoy. The buoys are equipped with 60 mm. wires, with very large thimbles at the end, where the ropes are doubled through.

Two 10 in. hoses are used, one on the starboard side for ballast and the other on the port side for cargo. The ballast, clean or dirty, must be pumped ashore, rate about 700 cu.m./hr., cost U.S.$ 2.00/cu.m. The exact quantity will be gauged ashore and Ballast Declarations issued. Loading rate 900 cu.m./hr. for gas oil. Unpredictable stoppages may be experienced.

Density: About 1010 (April).

Fresh Water: Small quantities available by barge, but expensive.

Surveyors: Cargo inspectors available from Odessa.

Customs: No restrictions, but nothing allowed to be taken ashore. Bonded stores are not sealed.

Repatriation: No facilities available.

Time: Winter: GMT plus 2 hours. Summer: GMT plus 3 hours.

Shore Leave: Granted for 24 hours only. Permission granted by Immigration Officer on arrival.

Garbage: Irregular collection service available by barge.

General: Communications very difficult due to few English speaking people being available.

Imperative that gangway is lowered down for Boarding Authorities, Pilot and Inspectors.

Fire boat service compulsory during loading operations only, cost U.S.$ 20.00 per hour.

Unlit Buoys (not charted): One buoy 2.5 miles S.E. and the other 5 miles East of Ily Lighthouse.

SHIPMASTER'S REPORT: March 1994.

The Port of Theodosia, popularly known as Fredosia, is situated on the Northern part of the Black Sea in Lat. 45° 01' N., Long. 35° 25' E. This port has been opened to merchant vessels for 2 years.

Normally Pilot boards at anchorage or pilot boarding area by tug.

Mooring/unmooring is carried out in daylight only, but with special request, arrangements can be made during darkness.

Quality of pilotage was not found very good. Most of the Pilots understand English, but they can not express themselves. They also lack co-ordination between tug and Mooring Master.

Only 2 tugs are available, but with special request, one military tug can be arranged.

After berthing, Immigration, Customs and Port Health come on board with Agent for inward clearance. Same people also come on departure.

One large room with capacity for 8 to 10 persons to be arranged. Only one recognised Agent, Inflot, works in port area. They handle all tasks with efficiency.

Following documents are required:

4 copies Crew List.
All Passport or CDC.
Vaccination List.
Narcotics Drug List.
Personal Effect List.
Stores List.
Bonded Stores List (Bond is sealed after inspection).
Currency Declaration List.

One guard is posted at gangway at all times.

Shore leave granted after Immigration Clearance, but have to return back to vessel at least once in 24 hours.

All shore cranes are operational. They are not mobile, hence ship has to shift as required. No floating cranes available.

No repair facilities available.

Fresh water is available.

No recognised ship's chandler in dock, so provision can not be arranged. Small quantity of provision can be arranged through Agent with sufficient notice.

No bunkers available.

Mainly hot rolled steel cargo is exported.

Mooring buoy was observed for small product tanker.

AUTHORITY: Port of Theodosia Authority, 14 Gorkogo Street, 334800 Theodosia, Crimea, Ukraine. *Tel:* (06562) 31267, 30960, 30506. *Telex:* 222125 Pilot Ux. *Contact:* Harbour Master.

AGENT: General Agent in Odessa: Black Sea General Shipping Agency "Inflot", Ukraine. Tel: (0482) 223902. Fax: (0482) 226412. Telex: (680) 232124 Inf Ux.

Local Agent in Feodosia: "Inflot". Tel: (06562) 35317. Fax: (06562) 34012. Telex: (680) 222125 Pilot Ux.

UST DUNAYSK (Ust-Dunaisk): 45.28 N. 29.42 E. (See Plan)

LOCATION: The port of Ust-Dunaysk is situated on the South part of Zhebriyanskaya Bay of the Black Sea and connected with the Danube River (Kiliya Branch) by artificial channel.

The approach sea channel is 3.5 miles long, marked with light buoys, with width of 100 m. for 1.5 miles, narrowing to 80 m. to the port. Least depth is 11.8 m. The bottom is mud and sand.

DOCUMENTS: The Master must produce the following documents on arrival:

1 copy Maritime Health Declaration.
2 copies Master's Declaration of vessel's arrival.
4 copies General Declaration (IMO form).
2 copies Cargo Declaration (IMO form).
2 copies Money List.
2 copies Crew Effects Declaration.
2 copies Stores List.
2 copies Medicine Group "A" Declaration (Medicines which contain narcotics and transquilisers).

PILOTAGE: Compulsory. Pilot waiting area is within a radius of 2.5 miles from a point with co-ordinates: Lat. 45° 28' N, Long. 30° 01' E. (Anchorage No. 367 or A). Pilot boards 2.5 miles N.E. of the entrance to the dredged channel in position Lat. 45° 33' 12" N., Long. 29° 47' 24" E.

Pilot boat has orange hull. Tugs of the port can be also used for delivering Pilot.

24 hours prior to arrival Master orders a Pilot via Agent (indicating g.r.t./n.r.t., LOA and arrival draft).

4 hours prior to arrival at Anchorage No. 367 (A) Master has to call "Port Control" on VHF Channel 11 and correct time of arrival. At same time Master receives information about pilotage, formalities, berthing prospects, etc.

ANCHORAGE: There are 3 anchorages with good holding ground in soft mud and sand. They are:

No. 367 (A) – For large sea-going vessels – Circle within a radius of 2.5 miles from the point with co-ordinates Lat. 45° 28' N., Long. 30° 01' E.

No. 368 (B) - A square with co-ordinates:

Lat. 45° 30' N.	Long. 29° 53.2' E.
Lat. 45° 33.1' N.	Long. 29° 53.6' E.
Lat. 45° 33.1' N.	Long. 29° 56.8' E.
Lat. 45° 30' N.	Long. 29° 56.8' E.

No. 397 (C) – For vessels with draft less than 5.0 m. – Within a radius of 7 cables from the point with co-ordinates: Lat. 45° 31.7' N., Long. 29° 42.9' E.

RESTRICTIONS/MAX. SIZE: Entry and departure is allowed for vessels with length less than 150 m. around the clock, others in daytime only.

Max. LOA 266 m. Max. arrival draft 12.0 m. If vessel's arrival draft is greater than that permissible, the lightening of vessel is effected in any convenient place near the entrance channel on Port Control order.

RADIO: Notice of Arrival can be sent by Telex No. 232136 "Inflot Izmail" or Telex No. 232103 Ust d "Inflot Ust-Dunaysk" or via "Odessa Radio" call sign UDE, calling frequencies 500 kHz/454 kHz, working 447 kHz addressed to "Inflot Izmail" for "Inflot Ust-Dunaysk". ETA advices required 48 hours, 12 hours and 4 hours prior to arrival.

VHF: VHF communication can be effected via Port Radio Station, call signs "Ust-Dunaysk Port Control", "Ust-Dunaysk Despatcher", "Inflot Ust-Dunaysk", all by VHF Channel 11, around the clock.

TUGS: Mooring and unmooring of the vessels at the port of Ust-Dunaysk is effected with tugs of total capacity not less than 5,000 h.p. (Pilot's option). Ship's lines to be used for all operations with tugs.

BERTHING: All cargo handling operations are effected on 3 berths:

(a) South Berth, where vessel lies at 2 anchors (about 8 shackles) and 3 ropes from each quarter to mooring buoys about 80 m. away;

(b) West Berth, where the vessel lies to 2 anchors (about 9 shackles) and 3 ropes from each quarter to floating buoys 80 m. from the vessel.

(c) Lighter Carrier Berth (See "Plan") can be used for mooring of bulk carriers if lighter carrier is absent.

At the port of Ust-Dunaysk the transhipment of bulk cargoes is effected direct from ship-to-ship" from large sea-going vessels into Danube barges. Cargo handling operations of LASH-carriers is also undertaken.

CRANES: For discharging/loading of bulk cargoes there are 4 floating cranes with capacity of 16 tons and max. height of 15 m. above water level and 2 well fendered floating transhippers with integral hopper/belt system with capacity 50 tons and max. height 21.5 m. above water level. Each crane is capable of about 600 t.p.h., average about 400 t.p.h.

BULK CARGO FACILITIES: Transshipment of bulk cargoes is effected directly from "ship-to-ship". Coasters have a capacity of 3,000 tons and lighters 1,000 tons. Lightening at anchorage carried out by 1 crane towed out by tug; operation liable to interruption if wind Force 4-5, when crane returns to port.

STEVEDORES: In first ETA, Master must declare number of holds ready for discharging/loading. Tonnage of cargo handled in a working day for one vessel is from 1,200 tons to 4,000 tons, depending on type of cargo.

Working hours from 0800 – 1600 hrs., Monday to Friday. Holiday working hours are from 0800 – 1500 hrs., then overtime begins. Working time at port is around the clock.

MEDICAL: Treatment effected at Izmail. In an emergency, Agent can arrange medical treatment at Vilkovo.

DENSITY: Changeable, depends on wind direction. Average – 1005.

FRESH WATER: In first ETA, Master has to order quantity of water required. Water is delivered from Volkovo. Supply is effected by barge.

FUEL: In first ETA, Master has to order quantity of bunkers required. Bunkers are delivered from Izmail by barge.

CONSULS: None.

REPAIRS: No major facilities at port. Mobile repair company available. No berth dedicated for repair work.

DRY DOCKS: None.

SURVEYORS: Saybolt, SGS, etc.

OPENING/CLOSING HATCHES: Effected by ship's crew.

CUSTOMS ALLOWANCES: According to Ukrainian Customs Regulations.

REPATRIATION: Possible. It takes 2 days to complete all formalities and effect repatriation.

AIRPORT: Nearest airports: Izmail 100 km. and Odessa 200 km.

TIME: GMT plus 2 hours in Winter, GMT plus 3 hours in Summer.

HOLIDAYS: State Holidays: 1st January, New Year; 8th March, Women's Day; 1st and 2nd May, Labour Day; 9th May, Victoria Day; 24th August, Independence Day; 7th and 8th November, Memory Day.

All Church Holidays according to Julian Calendar.

Holidays do not effect port working.

SERVICES: Supply services from Vilkovo and Izmail in small quantities. Reception of bilge water, sanitary water, dry garbage, supplying of fresh water, bunkering, draft survey, unsealing survey, Maritime Register of Shipping, Declaration of Sea Protest, all possible.

SHORE LEAVE: Possible. When going ashore, Seaman's Books exchanged for shore passes.

CURRENCY: Ukrainian Karbovanets. U.S.$1.00 = 189,000 (18.3.96).

SEAMAN'S CLUB: International Seaman's Club. Excursion, fishing and hunting can be arranged.

GENERAL: General weather conditions are favourable. Northerly wind dominate. Icing of creek is very rare.

SHIPMASTER'S REPORT: May 1983 (Updated 1988).

General: Situated on the Northern arm of the Danube Delta, the po consists of a basin in the marshes, and is approached by a buoye channel 100 m. wide, approx. 3.5 miles long, dredged to a depth of 13 m There are berths for 3 vessels lying to two anchors and with three line to each quarter mooring buoy. There is a strong outflow from the rive and the port is open to all winds. LASH ships appear to have preferenc at one berth. All business, including protests, is transacted at Izmai some 40 miles inland, and the Inflot Agent and Port Officials are base there.

Documents: 4 Crew Lists and separate Money List (attached to Cre Declaration) required.

Pilotage: Compulsory, but not for departure from Inner Roads. Pil launch with orange hull and white superstructure with the word PILO in black on the hull. This launch is used for all transport operations the port.

Anchorage: There are 3 anchorages marked on B.A. Chart 2213. Vess instructed to anchor in "A", and Pilot boarded there. Vessels lightenin are anchored in the Inner Roads close by the outer fairway buoys. Goo holding ground in mud and sand at all anchorages.

Restrictions: Least depth in channel 11.5 m.

Radio/VHF: Pre-arrival notices to Inflot Izmail. Agent boards with Officia and Grain Inspectors either at Inner Roads Anchorage or at berths.

Pilot Channel 11; Inflot Agent Channel 11 – call "Inflot". Use of ma transmitter prohibited at Inner Roads and in the port.

Tugs: One conventional and 2 pusher tugs with adequate power ass with berthing. There is a mooring boat for running buoy lines.

Bulk Cargo Facilities: There are 2 floating cranes, well fendered an with integral hopper/belt system for loading coasters. They also carry wheeled digger/dumper, use of which is not allowed at the anchorag Each crane capable of about 600 t.p.h.; average about 400 t.p Coasters have a capacity of 3,000 tons; lighters 1,000 tons. Lightenin at anchorage carried out by 1 crane towed out by tug; operation liab to interruption with wind force 4 – 5 when crane returns to port.

Medical: In emergency Agent can arrange medical treatment at Izma

Density: 1013.

Surveyors/Grain Inspection: Inspectors required *all* main hatches opene and two crew to assist with sampling, even for lightening two hold

Hatches: Opened/closed by crew.

Customs Allowances: No restrictions. Bond not sealed.

Services: None.

Shore Leave: Permitted.

Agent: Inflot Agent usually spends Monday to Friday on "Uritsky", o traffic expected.

YALTA: 44.30 N. 34.12 E. (See Pla

GENERAL: An ice-free Black Sea passenger and commercial port, Ya is situated at the head of Yalta Bay and on the Southern coast of Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in harbour are up to 10 m.

Yalta is a passenger port.

PILOTAGE: Pilot meets vessel in the Outer Roads, at a distanc 2 miles S.E. of Yalta Lighthouse.

Pilotage is available 24 hours. Vessels must send ETA at boarding place, when crossing the parallel of Mys Aytodor or the meri of Mys Nikitin.

A continuous listening watch should be kept on VHF Channel 1 2464 kHz whilst within the area.

ANCHORAGES: The port Outer Roads are situated in Yalta Bay E.S.E. 7 cables off the head of the mole with depth of about 30

They are open to winds blowing between E.N.E. and S.W. At ti vessels may be turned broadside to waves caused by Southerly w

The bottom is mud and sand.

RESTRICTIONS: Vessels may enter or leave the port at any tim day or night. Vessels entering or leaving the port must have clearance of not less than 0.6 m.

MAX. SIZE: Max. draft 7.2 m.

RADIO/VHF: Ship-shore radio contact can be established throug port radio station Yalta Radio operating 24 hours a day on the follo frequencies:

Station	*VHF Channel*
Port Controller	16, 26
Port Director	14
Dispatcher	6
Tugs	14

TUGS: Tug assistance for mooring and unmooring is compulso

BERTHING: The main cargo berth is 280 m. long and has a de 8.25 m.

CRANES: Electric cranes 2 tons – 20 tons capacity and floating with 100 ton capacity. 10 ft. and 20 ft. containers handled.

FUEL: Not available.

FRESH WATER: Can be supplied by pipelines at all berths.

REPAIRS: Not available.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

GENERAL: Provisions available.

A new ferry operates between Yalta and Derince (Turkey). Capacity: 40 trucks, 55 cars and 110 passenger berths.

AUTHORITY: The Yalta Sea Trade Port Authorities, 5 President F.D. Roosevelt Street, Yalta 334200, Crimea, Ukraine. *Tel:* (0654) 324242, 326909. *Telex:* 187128 Yasco Su. *Cables:* Port Yalta. *FAX:* (0654) 323926. *Contact:* E.V. Likhachov, General Manager. Anatoly I. Shapkin, Harbour Master.

AGENT: Yalta Marine Agency – Yalmara, at the Port of Yalta, 5 President F.D.Roosevelt Street, 334200 Yalta, Ukraine. Tel: 328289. Telex: 187125. Cables: Port Yalmara. Fax: 323926.

YUZHNY (Grigorevsky): 46.39 N. 30.55 E. (See Plan)

PORT LIMITS: The water area of the port is the waters of Adzhalykskiy Liman and the sea area bounded by the arc of a circle with a radius of 2 miles from the coast radar station (46° 36' 04" N., 31° 01' 25" E.) and Anchorages No. 356, 357 and 358 on the Charts.

PILOTAGE: Pilotage compulsory for all foreign vessels and all Ukrainian vessels over 500 g.r.t. In order to reach the Port of Yuzhny vessel first has to proceed to position Lat. 46° 08' N., Long. 31° 06' E. (near port Ilyichevsk), one hour before arrival at abovementioned position Master should communicate with "Port Control Ilyichevsk, on Channel 16 or on R/T 2535 kHz and then follow the instructions of "Port Control" as further navigation is controlled by shore radar.

Gas-carriers and chemical-carriers shall follow a pilot boat when proceeding to and from the port. Master shall order a Pilot through the Port of Ilichevsk 72 hours and 24 hours before and confirm the order 12 hours prior to approaching the Port of Yuzhny.

The port is equipped by an automated Vessels' Movement Control System (VMCS).

ANCHORAGES: It is prohibited for ships to anchor in the inner roadstead.

Anchorages: No. 356 for gas carrying ships and is 3.4 miles S.S.W. and No. 357 and 358 are for other vessels, 1.7 miles South of the West entrance point of Adzhalykskiy Liman. The depth in Anchorage No. 356 is 14 m. to 21 m., Anchorage No. 357, 15 m. to 22 m. and No. 358, 16 m. to 18 m. The seabed is sand, mud and shells.

The limits of the anchorages are shown on the charts (Also see "Plan").

RESTRICTIONS: The following vessels are allowed to enter port when conditions are as stated:

Gas and chemical carriers over 10,000 d.w.t. and cargo vessels over 20,000 d.w.t. are not allowed to enter and leave the port in conditions of visibility of less than 1.0 miles.

Cargo vessels up to 180 m. in length – enter when conditions of visibility are not less than 3 miles, leave – not less than 2 miles.

Gas and chemical vessels having length over 180 m. – when the port's leading marks are visible from the crossing of the RR-1 and the imaginary line of the entering leading marks (bearing 013° – 193°).

Passenger vessels may not enter when a gas or chemical carrier is in port.

MAX. SIZE: Ships up to 280 m. LOA. Draft limitation: No. 1 – 12.0 m.; No. 2 – 12.5 m.; No. 3 – 12.5 m.; No. 4 – 12.5 m.; Nos. 5 & 6 – 13.0 m. and Nos. 16 & 17 – 13.0 m.

HEALTH: The legislation of the Ukraine on protection of the surroundings and "Compulsory Rules of the port of Yuzhny" to apply.

Prior to arrival Master should send cable to Agent advising last port of call, place drinking/ballast water taken, whether vessel is equipped with sewage tanks or sewage purifying system. Any infectious diseases among the crew during the voyage.

RADIO: All cables to be sent through Odessa Radio.

Arrival Notices to Agent – Prior to Arrival: All vessels: At least 12 days. Gas/chemical carriers: 72 hours and 24 hours. All other vessels: 48 hours and 12 hours.

(1) In the preliminary Notice, the Master shall state the following information:

(a) When arriving for loading – Names of Shippers and Charterers and denomination of goods;

(b) When arriving for discharge – Nature and quantity of goods and stowage plan; heavy weights (over 3 tons), and over-sized goods (over 9.0 m.) to be indicated separately.

The Master of a gas or chemical carrier shall declare to the Harbour Master a complete technical fitness of his vessel, and advise particulars of the vessel's equipment for preventing pollution of the environment, as well as the place in the open sea where water ballast has been taken or changed.

(2) The Harbour Master is to be immediately informed by the Master through his Agent about any delay en route which may cause the delay in vessel's ETA. If the vessel delays against the time declared by the Master, every loss or expense arising therefrom (time lost by labour and means of transport, storage expenses, etc.) shall be borne by the vessel.

(3) The Master of a vessel will be responsible for any consequences of giving the wrong information on the vessel's draft, length, breadth or Net Registered Tonnage.

VHF:

Yuzhny Port Control:	Calling and working on Channel 11. Remote pilotage on Channel 79.
SPSI "Yuzhny Radio 5":	Calling and working on Channel 11.

Central Port Radio Station (CPRS) "Yuzhny Raido 1":	Channels 16, 60 and 4.
Pilot and Tugs:	Channel 6.

RADAR: Vessels are piloted by Shore Radio in and out.

TUGS: The use of tugs is compulsory when mooring/unmooring. The number of tugs and their horse-power is determined by the Pilot with Master's consent, depending on weather conditions, tonnage and type of vessel. 3 tug-boats must be used during gas-carrier's mooring/unmooring if over 25,000 d.w.t.

BERTHING: On the West coast of Adzhalykskiy Liman Quays No. 1, 2, 3 and 4. The general length of the quays are about 600 m. Quay No. 3 is for loading liquid ammonia and pumping super-phosphorous acid.

A quay for auxiliary ships has been built on the North side of the East entrance point of the inlet. The length of the quay is 155 m. and the depth alongside it is 6.4 m.

Berth No.	*Length* (m.)	*Depth* (m.)
1	224	11.5
2	264	12.0
3	103	12.5
4	110	13.0
5, 6	350	12.8
16, 17	283	13.0
MCC-65	280	14.2

MEDICAL: Port surgery is open round the clock for emergency cases, otherwise all medical treatment and vaccinations are done at Odessa.

FRESH WATER: Potable water available from berth and by barge.

FUEL: Delivered by barge. Longest possible notice is desirable. Stem through Bominflot in London. Telex: 23830.

OPENING/CLOSING HATCHES: Mechanical hatches by ship's crew.

REPATRIATION: Possible.

AIRPORT: At Odessa.

TIME: Local time is GMT plus 3 hours. Summertime (GMT plus 4 hours) is used from the 1st April to 30th September.

HOLIDAYS: 1st January, 8th March, 1st, 2nd, 9th May, 7th October, 7th November and 8th November.

POLICE/AMBULANCE/FIRE: Through Agent.

TELEPHONES: For gas-carriers only.

SHORE LEAVE: Restricted for all crew members (except Master) till midnight. Shore passes are valid for Port Yuzhny area only. For trips to Odessa special permission is required.

GARBAGE DISPOSAL: Garbage and food leftovers shall be collected onboard in polythene bags (containers with tightly closing lids) delivered by the port on the Master's request, and shall be passed over at least once in 2 days with a notification of the port through the Agent 24 hours in advance of such delivery. Garbage shall be put into lorries by the vessel. Removal and liquidation of the garbage shall be effected by port means for the shipowner's account according to tariffs in force.

WASTE OIL DISPOSAL: Collection of bilge and waste water from a vessel shall be undertaken by special port craft on the Master's request for the ship's account according to tariffs in force.

Vessel's requests for delivery of bilge and waste water shall be sent to the Agent, or to other agencies having the contract with the port.

NOTICES: *Instructions for Gas and Chemical Tankers:* Vessel to proceed to position: Lat. 46° 08' N., Long. 31° 06' E. and from there to follow the leading pilot boat. Master to give directly to Ilyichevsk Pilot Station 48, 24 and 6 hours notice. One hour before arrival at the above position to contact "Port Control Ilyichevsk" by VHF or radio/telephone on 2535 kHz.

Pilotage having been accomplished, Master to cable the actual distance the vessel was piloted by the leader to Harbour Master Ilyichevsk, copy to Agent to exclude errors in charges.

Instructions for Dry Cargo Vessels: Vessel to proceed to position: Lat. 46° 08' N., Long. 31° 06' E. 1 hour before arrival, vessel to contact Port Control Ilyichevsk by VHF or radio/telephone 2535 kHz and follow their instructions as they pilot by radar.

Please inform Ilyichevsk sea Pilot Station ETA at above position 48, 24 and 6 hours before arrival.

General requirements for ships loading bagged urea:

Max. beam 26 m.

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. distance from hatch opening to ship's side – 6.0 m.

Max. height from hold bottom to hatch covers – 17.0 m.

Min. height of cargo compartments – 3.0 m.

Min. size hatch openings – 7.0 m. × 10.0 m.

Vessel to be equipped with gear for loading spare bags and dunnage.

No cargo is loaded into deep tanks, lockers or other compartments where the loading machine cannot operate normally.

Ship's holds must be free from any obstacles such as shaft tunnels, pillars, etc.

Draft limitation – 11.5 m.

Cargo tallied automatically at the loading plant.

In the holds delivery very fast. No tallymen available.

The figures can be checked by the Chamber of Commerce. We suggest you should contact them directly.

VERY IMPORTANT:
All holds must be dry, clean and free from remnants of previous cargo.

Failure to comply with the above may cause significant losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness retrospectively on berthing from date and time the vessel was granted Free Pratique if she has to wait at anchorage, provided she complies with the above requirements.

General requirements for ships loading bulk urea:

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. beam 26 m.

Max. distance from ship's side to hatch coamings – 20.0 m.

As there are no trimming facilities, wing tanks with the slip angle of not less than 30° relative to deck line should be available to provide self-trimming in the holds as cargo delivered in a vertical flow.

Draft limitation – 12.0 m.

Vessel must be fit for grain transportation. The stability information booklet should provide an approved cargo plan for the quantity to actually be loaded.

All holds must be dry and clean and free from rust and/or remnants of previous cargo. Failure to comply with the above may cause significant losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness on berthing retrospectively from date/time vessel was granted Free Pratique if she has to wait at anchorage, provided the ship complies with above requirements.

IMPORTANT: To obtain Harbour Master's clearance outwards, all maximum estimated expenses of a seaworthy ship should be prepaid and further reimbursed when the accounts are fixed after ship's departure, hence it is essential that sufficient funds be received by the Agent as soon as possible and imperative prior to completion.

REGULATIONS: The following are some of the Port Regulations. The numerals have no significant meaning.

1. Gas carrying ships proceed into port and leave it in company with a fire tug, which goes ahead of the gas carrying ship at 8 – 10 cables and will notify on VHF radio all ships of the necessary measures and precautions to be taken.

2. In the port there is a control office for regulating ship movements. Ships entering the port, request permission for entry 2 hours before, and ships leaving the port, 30 minutes before.

3. Pilotage for all ships is obligatory.

4. Pilotage for ships into Port Yuzhny begins at position: Lat. 46° 31' N., Long. 30° 57' E.

5. When a gas carrying ship is entering or leaving the port the entry or exit of other ships is prohibited.

The mooring of any kind of floating object to the side of a gas carrier while it is at Quay No. 3 is prohibited.

6. The max. draft for ships proceeding into Port Yuzhny is 14.2 m.

7. The max. speed for ships in the channel is 6 knots, but in the inner roadstead it is 4 knots.

8. The movement of ships in the channel is only in one direction.

9. The mooring of gas carrying vessels and vessels carrying chemicals is carried out with the aid of not less than 3 tugs, the power of 2 of which must be 882 kV (1,200 l.s.) and one 1,692 kV (2,300 l.s.). Leaving the mooring is carried out with the aid of not less than 2 tugs of which one has a power of 1,692 kV (2,300 l.s.) and the other 882 kV (1,200 l.s.) The wind speed when mooring and leaving moorings must not exceed 7.0 m./sec.

The mooring of gas carriers of more than 20,000 d.w.t. is carried out with the aid of 3 tugs; the power of each of them must not be less than 882 kV (1,200 l.s.). Unberthing will be carried out with not less than 3 tugs with the same power. The speed of the wind during mooring and leaving moorings must not exceed 10.0 m./sec.

10. Communication between tugs and ships will be carried out on VHF radio on Channel 6.

11. Communication with ships is carried out on VHF radio on Channel 11, call on Channel 16. The VHF call sign for Port Yuzhny is Port Control.

12. During the mooring and un-mooring of gas carriers from the quays, a representative of the Odessa Port Factory, military guard, office of the Harbour Master and also an inspector of the port will be present.

13. Mooring at the quay, moving on a quay or leaving the quay are to be carried out under the directions of a Pilot.

14. When the speed of the wind is above 12 m./sec., the moving of gas carriers along the quay is prohibited.

15. Navigation of ships along the channel, of not more than 20,000 tons displacement is permitted without tugs when the wind speed is less than 12 m./sec. and the cross current has a speed not more than 0.5 m./sec.

Entry to the channel when visibility is less than 0.5 miles is prohibited.

When there is a strong cross current or current along the channel, tugs will lead ships into the approach channel.

The mooring of ships at the quay will be carried out in the following manner, after the tugs have turned the bows towards the exit and parallel to the quay at a distance of 80 m. – 100 m. from the quay, the tugs, maintained the plane of the ship parallel to the quay, and will move the ship towards the quay. The speed of approach must not exceed 10 cm./sec.

The ship moorings will be carried ashore by launches. From the bows and stern 2 nylon mooring ropes of not less than 200 mm. (8 in. circumference) are to be used.

16. The main engines of gas carriers must be in constant readiness to move the ship during the whole period in the port.

When gas carriers are entering the port and also when leaving it, all other ships must observe precautions and not hinder its movement or its chosen route. These ships must not close a gas carrier within a distance of 10 cables.

The fire fighting tug on duty keeps a round the clock watch on VHF radio Channel 16.

The use of steel moorings on gas carriers is prohibited.

The Harbour Master of Port Yuzhny has the right to depart from th present position on questions connected with the safety of mariners.

Lack of knowledge of the requirements of the present tempora obligatory regulations established for the port will not absolve the Maste of a vessel from responsibility for non-observance of these regulation

GENERAL: Port Yuzhny is found in Adzhalykskiy Liman, and is 4.2 mile E.N.E. of Mys. Dofinovskiy. Berths No. 1 and 2 for Urea; Berth No. for liquid ammonia and superphosphorous acid and Berths No. 5 and for minerals and coal.

From seaward an approach channel, 1.6 miles long has been cu through. Leading light beacons lead along it. The least depth in th channel is 15.0 m.

The entrance to the port is protected by 2 moles: The Western, abou 400 m. long and the Eastern, about 540 m. long. The moles are 6 m wide.

Areas with special navigation systems: Off the coast there are areas i which navigation is temporarily prohibited; an area dangerous fo navigation; Area No. 185, prohibited for anchoring and fishing, and Area No. 14 for bombing.

The limits of the areas are shown on charts.

Mys. Dofinovskiy: (Lat. 46° 34' N., Long. 30° 55' E.) lies 4.3 miles E.N.E of Mys. Severnyy Odesskiy. Mys. Dofinovskiy protrudes insignificant into the sea. Four cables West of the headland stretches the village o Novodofinovka, in which there are conspicuous white buildings.

Spoil Grounds: 1.7 and 2.5 miles East of Mys. Dofinovskiy a former spoi ground and a spoil ground are situated respectively. In these area depths may be less than shown on charts.

A wreck with a depth 9.8 m. over it is situated 2.7 miles E.S.E. of Mys Dofinovskiy. A light buoy marks the wreck with a depth of 9.6 m over it.

Banks with depths of 7.6, 7.2, 8.4 and 9.4 m. are situated respective 3.5, 3.8, 3.6, and 3.7 miles E.S.E. of Mys. Dofinovskiy. They are marke by light buoys.

A bank with a depth of 9 m. is situated 3.3 miles E.S.E. of Mys Dofinovskiy.

Conspicuous Points: On the West coast of the entrance to the inlet i the village of Grigor'yevka is a conspicuous smoke chimney, and on th West coast of the inlet opposite the quays can be seen large met reservoirs and towers.

Navigational Aids: The entrance to the channel and its edges are marke by light buoys. On the moles stand lights and beacons; on the East coas of the inlet there are leading light beacons.

Station: On the East entrance point to Adzhalykskiy Liman stands coastal radar station. Radar pilotage is carried out under the directio of a Pilot. The pilotage is of a consultative nature. Responsibility fo manoeuvres, fulfilling requirements of MPPSS-72 (Internationa Regulations for Prevention of Collisions at Sea) and the navigationa regulations of the port, rests with the Master of the vessel.

There is a signal post on the building of the coastal radar station.

Caution: Bearing in mind the possibility of the destruction of the edge of the approach channel, depths in it may be less than shown on chart

Underwater Pipe-line: Runs in a S.W. direction from the village o Grigor'yevska. The position of the pipe-line is shown on charts.

Roadsteads: There are 2 roadsteads in Port Yuzhny: outer and inne The outer roadstead is situated in the approaches to Adzhalykskiy Lima The seaward limits of the roadstead are coincidental with the outer limi of the port. The depths in the South part of the outer roadstead are u to 22 m. The inner roadstead occupies the water area of the South pa of Adzhalykskiy Liman opposite the quays.

Grigor'yevska Light Beacon: Stands 3.8 miles E.N.E. of My Dofinovskiy. Appearance of the beacon: white round concrete tower o the upper part of which stands a black cylinder, the lower part of th cylinder becomes a truncated cone. Height of the beacon is 14.8 m height of the light is 60.1 m.

Vkhodnoy Leading Light Beacons: Stands on the East coast o Adzhalykskiy Liman and lead along the approach channel to Po Yuzhny. Its direction is 193° – 013°.

The front beacon stands 2.7 miles N.N.E. of the entrance to the inl Appearance of the beacon: 4-sided metal framework tower on which ha been erected a black rectangular target with a white vertical stripe in th centre. The height of the beacon is 17 m.; height of the light is 47 m

The rear beacon stands 6 cables from the front one. Appearance the beacon: 4-sided metal framework tower, on which has been erect a black rectangular target with a white vertical stripe in the middle. Th height of the beacon is 29 m.; height of the light is 69 m.

SHIPMASTER'S REPORT: September 1979 (Updated 1988).

Vessel: 32,000 g.r.t. LPG Carrier.

General: This port is situated on the Western bank of what was o Lake Ajalik, about 0.5 miles from the entrance to the bay. The port h been created by dredging the barrier that separated the lake fr Odessa Bay. On BA. chart 2212 this entrance is situated about L 46° 35.6' N., Long. 31° 00.4' E. Breakwaters of prefabricated conc sections extend about 500 m. into the bay, and the approach chan is marked by conical buoys and pillar buoys for a distance of ab 2.5 miles beyond this. The approach channel lies on an axis of ab 010°T – 190°T. Depth in this channel were not less than 16 m. by sh echo sounder, both on entering and leaving.

The small town of Grigor'yevska is marked on BA. 2212. Lake A is not marked on this chart.

The port has been created to serve the massive and newly constru chemical plant on the Western shore of the lake. At the time of this it consisted of dry bulk handling berths of about 700 m. in length, a liquid handling facility for the discharge of superphosphoric acid the export of anhydrous ammonia. The liquid handling berth lies to North of the dry berths, about 0.8 miles from the breakwaters.

There are plans to create dry cargo berths on the Eastern shor the lake, immediately inside the entrance. Some work is alread progress.

Vessels of up to 12 m. draft can be handled and there are 3 medium sized tugs available.

The chemical plant is not yet fully completed, a second stage has only been operating since the beginning of this year. In 1980 there were plans to export 2 million tons of ammonia.

Agents: "Inflot" may be reached on Channel 16, with a working Channel 8 available.

Berthing: Vessel berthed starboard side alongside, swinging immediately South of the berth with the aid of 2 tugs (the third was late in arriving) moored fore and aft, port side.

The berth itself consists of a concrete jetty projecting from the main jetty, some 110 m. in length and about 40 m. proud of the main jetty.

There are 5 Chicksans, 2 for the discharge of acid, and a group of 3, 2 liquid 1 vapour return, for the loading of ammonia. The Chicksans have hydraulic couplings and appear to be of an awkward size, about 325 to 330 mm.

On this visit there was only 1 liquid line available for use together with the vapour return line. Claimed loading rate is said to be some 2,000 tonnes p.h. With the 2 liquid lines in use, this would indeed be possible. Our overall load rate was 1,115 t.p.h., including initial and final slow rates. During loading hourly rates in excess of 1,500 t.p.h. were maintained.

Communications with the plant operators was quite good but obviously hampered by language. There were no problems with slowing down for topping off.

Samples: Were taken on arrival and at several times throughout the loading, sample cock on Chicksans.

Fresh Water: Available from the jetty.

Fuel: May be supplied and arrives by barge. Bunkering cannot be undertaken whilst loading cargo and on this call the bunkering had to be completed before being allowed to load, despite this leading to a big delay.

Moorings: Three lines, 2 breast and 2 springs, fore and aft. Rat guards must be fitted. Mooring boat in attendance.

No problems with landing gangway on the quay and it may be turned out quite safely before arrival alongside.

Guards: On the quay, 1 at the gangway (Discharge Books required before being allowed to read drafts, etc.) and 1 each end. At night there was a 'guard' boat lying off our port side.

Officials: Polite and quite firm.

Documents required:

5 copies General Declaration. (ship's particulars, etc.).
4 copies Cargo Declaration.
2 copies Crew Effects.
4 copies Crew Lists.
4 copies Passenger List.
2 copies Crew Currency Declaration.
1 copy 'Clean' Ballast Declaration.
1 copy Sanitary Declaration.

No certificates were sighted.

Shore Leave: Granted until 2400 hrs. Masters allowed unlimited shore leave.

Toilets/Pollution: Vessels not fitted with sewage treatment plants must seal their toilets and use the shore facilities at the end of the quay. A statement to this effect must be signed.

A very strict control of pollution of all types is maintained and this includes ALL drainings from the main deck. Scuppers must remain plugged right up to the moment of departure. Hoses used to de-ice the liquid line must NOT be allowed to drain overside.

Papers: Allow at least 3 hours for paperwork before and after working cargo.

Cargo Lines: Were blown through by the shore plant on completion of loading. Vapour return lines was used throughout and there is no charge for its use, vapour apparently being returned to the shore tanks.

Cargo loaded was at about −32°C.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).

The following is an update of the September 1979 report above.

General: The port has been developed East of Odessa to handle overspill from Odessa and to develop bulk handling facilities.

In about 10 years in terms of tonnage handled, it is expected to be the largest of the southern ports open to overseas vessels.

It has been in operation for 2 years and is 0.6 miles East of Grigoryeko light.

The port has been constructed from a fresh water lake. West Breakwater Head is in position Lat. 46° 35.80' N., Long. 31° 00.70' E. East breakwater head is in position Lat. 46° 35.80' N., Long. 31° 01.03' E. The port extends at present to the bulk liquid ammonia berth in position Lat. 46° 37.08' N., Long. 31° 00.80' E.

Port regulations are at present in Russian only, and English text should be available shortly (October 1980).

Approaching the coast soundings once the 100 fathom bank has been crossed tend to be flat and give little indication of position.

The outer separation scheme buoy was observed on radar at 9 miles and visually at 7 miles.

The coast is identifiable on radar at 30 miles.

D/F beacons are generally reliable and as ALRS, out of 12 checked in September 1980, 3 were not operating on the West coast of the Black Sea.

Notice:

	72 hours	*48 hours*	*24 hours*	*6 hours*
Agents:	Inflot Yuzhny	*	*	
Shippers:	Vneshtrans Yuzhny	*	*	
Charter:	Sovchart Moscow	*	*	
"	Sovchart Paris	*	*	
Pilot:		Inflot Ilyichevsk	*	*
"		Ilyichevsk Seapilot Station	*	*
Port:			*	*

Note: All through Odessa Radio.
*Denotes repeat message where indicated.
"Vneshtrans" is cable address for 'Sojuznestrans' shippers.

Pilot: Order Sea Pilot Ilyichevsk as notices.

Contact by VHF Channels 16 and 14 about 15 miles away from turning buoy.

Pilotage compulsory from port. Pilot speaks reasonable English and requires about 13 knots.

If anchoring at Yuzhny anchorage, he positions vessel under control from Yuzhny Radar Station position Lat. 46° 36.05' N., Long. 31° 01.3' E.

On departure the Harbour Pilot leaves the vessel in the anchorage area and the sea pilot cutter 'Bravvy' guides vessel down channel to 'Ilyichevsk' turning buoy, his speed is 11 knots.

Anchorage: For large LPG ships Anchorage No. 356 is used, centred on Lat. 46° 32.5' N., Long. 30° 58.25' E. with a radius of approximately 0.6 mile.

Depth 20 m., bottom mud and sand. Density 1024.

All anchoring is under control of Yuzhny Radar Station which gives the Pilot directions.

Berthing: There is no night berthing or unberthing, for gas carriers although the buoyage and leading lights are lighted, this seems to be for dredgers working. It would seem the hours are 0800 to 1700 hrs. (with possible extension in Summer months) with no vessels in the harbour or channel underway before or after these times. (We made it outwards in 12 minutes (October 1980)).

Visibility must be over 4 miles before berthing or unberthing operations take place. It may seem clear out at the anchorage but the weather in the harbour can be very different. This has been borne out from observations. We noted a temperature rise of 8° Celsius in 1 hour whilst moving out of port to anchorage.

Channel: The channel width is 118 m. and least depth of 14 m. (Checked by echo sounder). Pilots advise that there is a patch of 13.5 m. but this was not found. Bottom sand and mud. The shape is in the form of a 'V' so it is necessary to keep to centre of channel.

Buoys commencing seawards at Nos. 13 (starboard) and 14 (port) terminate in the harbour itself at Nos. 3 and 2.

The leading line is 013° to 193°.

Buoys (entering), black to starboard and red to port with Fl. W. & R. lights respectively. Channel length 1.3 miles from breakwater heads.

South of the channel are two shoals one 1.6 miles S.S.W. marked by 2 white pillar buoys Fl. W. and isolated by 1 white pillar buoy about 1.5 miles S.W.

Confused cross currents from wind and the rivers emptying out nearby are apparent. Generally the surface current is Westward and sub-surface Eastward. Apart from causing navigation problems these currents cause much silting up.

Vessels enter the channel from the anchorage between the 2 shoal areas on an approximate course of 080° then turn hard to port when in line with the channel to bring leading lights in line before entering channel. On leaving much the same is done, except a more Easterly course is resulted.

In the harbour itself in calm conditions there is a noticeable Southerly current of 0.5 knots.

The dredged channel at present terminates just astern of the ammonia berth marked by 2 buoys.

Leading marks, white and orange in colour are situated on raised ground N.E. of the harbour, and at night exhibit fixed white lights under which are neon-like strip green lights.

Vessel is swung short round to port off ammonia berth, berthing starboard side to head out. On fertiliser berths there seems to be no accepted side to.

The breakwaters consist of concrete blocks piled haphazardly on top of one another. Immediately to the East are the ruins of 2 other small breakwaters. At the foot of the Eastern breakwater there is a large concrete radar and Port Radio Control Tower. This is conspicuous in good visibility but would benefit from being painted white or orange to assist identification in conditions of haze which seem to be prevalent.

Just below this tower on the harbour side is a small boat pier for use of Port Authority craft.

The harbour offices themselves are in a large concrete building at the Southern end of the fertiliser quay where Customs, Agents, police, doctor, chandler, etc., reside.

Tugs: Four tugs are available. All ship's lines. 2 of 5,000 h.p., 1 of 2,500 h.p. (Tigris) and 1 of 1,200 h.p.

All tugs have icebreaking capability.

It is essential that the larger tugs have double lines. They use the lines out of the centre lead bow and stern with the 1,200 h.p. tugs pushing.

Outwards (October 1980) we dispensed with 4,500 h.p. tug's services and used 1,200 h.p. tug to tow us.

Tugs accompany vessel down channel to anchorage area.

Berths: Gangway can be turned out beforehand.

The ammonia berth is 125 m. long and 43 m. (measured) proud of the main dock face, it leads in a 171° – 351° direction. The other berths are offset and leading in approximate 005° – 185° direction.

The fendering is excellent with long rubber tubes and corners well protected on all berths.

Bollards are plentiful.

Moorings: Ammonia Berth 3, 2, 2, each end with bow/stern and breast lines leading to main dock face and springs to 'T' section.

Springs first out and last in.

As usual aft have to compromise. We put breast lines from main deck and springs from aft, both to 'T' section. Mooring boat in attendance, bow first docking and undocking.

Unberthing, vessel pulled laterally clear of berth, about 100 m., by tugs before moving ahead down harbour.

Loading: Ammonia: 2 loading and 1 Vapour Chicksan. Max. rate about 2,000 t.p.h. total (2×1,000 t.p.h.).

No charge for Vapour Return Line (VRL).
Shore personnel connect and disconnect.
Hydraulic couplings.
VRL ships 8 – 12 to shore 12 – 12 150ASA/300ASA.
Liquid shore spools 150ASA/300ASA.

No emergency stop except by watchmen in hut under Chicksans, who speaks little to no English. Essential whistle signal agreed.

On visit (Sept./Oct. 1980) shore tanks were low on product with max. rate at 700 t.p.h. Sometimes down to 200 t.p.h.

Samples frequently taken from cock on Chicksan.

Temperature warm at −32° Celcius on all visits. Note protest.

Loading programme to be agreed before commencement.

Surveyor with interpreter, takes about 2 hours for figures. Plant has to be off whilst readings taken.

Acid: Forward (South) of ammonia Chicksans – 2 arms.

Shippers: 'Sojuznestrans'.

Statement of Fact is compiled by the Master during loading on official form which is an advantage.

Tank atmosphere tested prior to commencement.

Purging or cooling alongside.

Plant: Total storage capacity 100,000 tonnes with about 18 tanks of 5,500 tonnes each. Four tanks can be seen from the ship, the remainder are behind.

The anhydrous ammonia plant was built by the Pullman Kellog company of U.S.A. and fertiliser section by PHB of Germany.

The tank pumps 'Carter' lose suction with 1,000 tonnes heel in tank. Approx. 2,000 tons per day of ammonia is produced at the plant with about 7,000 tons per day being pumped in by pipe-line from the Volga Region.

Pollution: VERY strict. Be VERY careful.

Scuppers to be plugged. Make sure decks washed down prior to arrival and that no lube oil is washed overside.

Make sure ballast and pumps clean.

Ships not fitted with sanitary tank system must have their toilets locked up and all crew use toilets astern of vessel. The sanitary system is checked.

No pumping of ballast in anchorage or in harbour without Port Authority permission. (A Greek ship was fined for pumping ballast at anchor).

Do not have fire hoses draining overside, we had them draining into ballast tanks.

Be very careful when disconnecting that no hose water drains overside.

Agent: State Agent 'Inflot'. Yuzhny office telephone 59-38-75. Yuzhny office has been in operation for about a year. Telex: 232722.

Main office in Odessa.

Office is in port building at end (South) of fertiliser quay. Good English and very co-operative.

Night staff, 2000 hrs. – 0800 hrs., good.

Can be contacted by VHF at anchorage or alongside by Channel 16 and then talk direct on Channel 8.

Order money (which all unused must be handed back on departure) 24 hours beforehand. If shorter notice given Agent will give you what he has in office safe.

Accepts Notes of Protest on behalf of receiver.

Cable address: 'Inflot Yuzhny'.

Medical: Through Agent.

Every day except Sunday a doctor attends the clinic in the port building, 0900 hrs. to 1300 hrs. We had 1 crew member with a fractured hand who was checked by doctor and taken immediately to Odessa for X–Ray, then brought back to the ship plastered up, all in 3 hours, with full English report.

Outside these hours a nurse is on duty.

Water: Fresh water available from quay. Agent will send waterman. Metered. Ship hoses international connection flange.

Chandler: Two. Technical and produce.

Some local produce available, basically vegetables. No salads.

The produce chandler in port building deals in curios, champagne, vodka and caviar. Payment can be made by the Agent.

We obtained from Technical chandler, a Russian chart of Odessa – 2 days' wait.

Suggest any requirements ordered well in advance.

Films: Walport films can be changed with suitable ships in port. Agent very co-operative in this respect, finding out for us if a Greek ship had Walport films which she did and like ourselves wanted a change. Agents and customs officer with one of our seamen changed the boxes – no difficulties encountered.

Fuel: In short supply and long waits. By barge to Odessa waiting anchorage. October 1980 – 3 day wait for diesel at $358 per tonne.

Repairs: Very difficult.

Radar/Wireless: Not sealed or checked. Bridge and radio room not inspected. Radar use seems to depend on Pilot and guards. From anchor to berth we had to turn off radar. On last visit guards made ship turn off before sailing.

This visit no problem, radars tested prior to sailing and left on.

There is a tug anchored off vessel at all times but this is for fire duties.

Formalities: Very good and quick, as long as procedure followed. Everyone has to muster in front of Immigration Officer on arrival and departure, and is checked against Discharge Book.

Required:

1 copy Personal Effects Declaration Form (very strict on this, require all jewellery to be declared).
1 copy Currency List – crew. (Again very strict and check up frequently in port on amount drawn by individuals).
2 copies Health Form.
2 copies Vaccination List.
6 copies Crew List.
5 copies General Declaration (IMO Standard Form).
2 copies List of Drugs in Master's care.
1 copy Clean Ballast Declaration and request to pump in port.
3 copies Loading Instructions.
2 copies Cargo Requirements.
1 copy Statement to Port Captain, all Safety Equipment in good order.
1 copy Statement of type of Sanitary System and in use.

No Stores List required.

Bond not sealed.

Port Captain boards vessel soon after arrival and fills in long safe questionnaire with Master. If certificates dates in doubt will want to sigh

Agent says Port Captain will allow ship to sail with Safety Certifica up to 2 days before expiry with clearance for Bosphorus.

Allow 2 hours for papers before cargo commences and afte completion.

Seamen's Facilities: A Seamen's Club has been established just outsid main gate. Roubles only taken.

SHIPMASTER'S REPORT: May 1989.

Vessel: Acid carrier, 45,000 d.w.t.

Charts: Chart No. 508, approaches to Odessa.
Chart No. 913, approaches to Yuzhny.
B.A. Chart No. 2204, Port Yuzhny.

Time: Summer GMT minus 4 hours (last Sunday in March). Winter GM minus 3 hours (first Sunday in October).

Cable/Telex Addresses:

Inflot Odessa Telex: 232824. Cable: Inflot Odessa.
Inflot Yuzhny Telex: 232722. Cable: Inflot Yuzhny.
Black Sea Shipping
Control Centre: Telex 232711. Cable: Morflot Odessa.
Il'ychevsk Sea
Pilot: 232825.

Approaches: (Ref: USCG NM 1/88, Black Sea, 010100Z Jan. 1988 From 1st January 1988, vessels entering or leaving Odessa, Ilichevsk Yuzhny or Kherson are requested to give notice to Odessa Black Se Shipping Control Centre 72, 48, 24 and 4 hours before entering traffi separation system. If vessels do not contact the Shipping Control Centr before entering mentioned area, service fees increase by 100%.

A black and yellow banded spar, which is a poor radar reflector, wi a faint flashing white light (Lat. 46° 08.3' N., Long. 31° 06.1 E.) mark the entrance to the Odessa traffic lanes. The inbound lane begin 1.5 miles N.W. of this buoy and proceeds on a course of 317° for 7 mile before entering the traffic roundabout scheme. The centre of th roundabout is marked by a spar buoy (Lat. 46° 15.6' N Long. 30° 56.0' E.) and traffic proceeds in a counter-clockwise directio 2.25 miles off this buoy to the Yuzhny, Odessa and Il'ychevsk traffi lanes respectively.

Il'ychevsk Traffic Control (VHF 16/10, R/T 2535 kHz) must b contacted 1 hour prior to arrival at the Entrance Buoy and will assum radar pilotage 3.5 miles from the roundabout buoy on VHF 10/12. A positions given by the Traffic Control Station are in relation to Il'ychevs Lighthouse (Lat. 46° 19.0' N., Long. 30° 40.8' E.).

The centre of the traffic lane to Yuzhny is marked by a spar buo (Lat. 46° 19.0' N., Long. 30° 56.8' E.), and the inbound lane proceeds o a course of 002° until 1 mile off this buoy for approximately 12 miles t Anchorage Area No. 356.

If the vessel is a gas carrier (LPG) or acid carrier it will also be und the pilotage of a leader boat which will meet the ship at the roundabo and hold position approximately 10 cables ahead at 11 knots and a as Pilot to the South of the anchorage area, working VHF 10/12 i conjunction with Il'ychevsk Traffic Control.

The leader boat and traffic control pilotage end at Lat. 46° 29.0' N Long. 30° 57.0' E., 7 miles from the port of Yuzhny, off the West end Odessa Bank. At this point Yuzhny Port Control assumes radar pilota (VHF 11) to the anchorage position or Pilot Station (Lat. 46° 32.2' N Long. 30° 59.6' E.). The pilot boat has an orange hull with large bla letters. Yuzhny Port Control tower is a 45 m. high cement structu located at the North end of the East Breakwater (Lat. 46° 36.08' N Long. 31° 01.4' E.).

The entrance channel, 180 m. wide and 14.2 m. deep, begins position Lat. 46° 33.2' N., Long. 31° 00.00' E. and proceeds on cou 193°T for 1.25 miles, before entering the marked channel. The chann buoys are red or green and are dimly lit spar buoys.

From the first set of buoys it is 1.6 miles until inside the harbour abea of the control tower. The channel also has a set of white range ligh The channel is bordered by 2 breakwaters, the East one extends 300 out from shore and the West one 160 m., each are 6 m. wide and t ends are marked with a steel light structure 2 m. high. Immedia alongside the channel on the East side is a shoal area (Lat. 46° 36.07' Long. 31° 01.2' E.) which remains partially uncovered. Speed in t channel is 7 knots and inside the harbour 4 knots. There is no mar channel inside the harbour itself.

There may often be a wind driven current in the channel approa setting East or West at up to 2.5 knots. There are no appreciable curr or tide effects in the harbour itself.

Once inside the port, abeam of the control tower, there are 3 tug bo to meet the vessel. Two boats (Mogouchiy, Bazalt) are Finnish b (1981) with icebreaking capacity of 5,000 h.p. each, and one sma boat (Tigris) of 2,800 h.p. All use ship's lines for docking or undock These are the only tugs to service the port on a regular basis.

Anchorage: Anchorage Area No. 356 is bounded by positions:

	Lat.	*Long.*
1.	46° 29.9 N.	30° 57.3' E.
2.	46° 31.8' N.	30° 57.3' E.
3.	46° 32.8' N.	31° 00.0' E.
4.	46° 30.9' N.	31° 00.0' E.

There is a small section recently added on the S.W. corner of the that runs Southeasterly 1.2 miles and is 0.75 miles wide. Area No. is used exclusively with LPG ships and phosphoric acid carriers. depth is 17 m. – 19 m., with excellent holding ground. The vess piloted in and out of the anchorage by Yuzhny Port Control.

Anchorage Area No. 357 is bounded by positions:

	Lat.	*Long.*
1.	46° 33.9' N.	31° 01.1' E.
2.	46° 34.5' N.	31° 00.8' E.
3.	46° 35.7' N.	31° 05.8' E.
4.	46° 35.1' N.	31° 06.0' E.

This area is used exclusively by bulk carriers. A third area, No is located East of Area No. 357 and is anticipated to be used by carriers. No grain carriers serve the port as yet.

When requested through the Agent, "Inflot Yuzhny", garbage collection is available at the anchorage, usually within one day's notice, weather permitting. The rubbish must be in sealed bags and there is no charge as it is included in the Sanitary Dues.

Fuel (IFO/MGO) is also available at the anchorage, but must be requested well beforehand (1 – 2 weeks), as there are only 2 bunker barges to serve Odessa and Yuzhny. All fuel comes out of Odessa and the barge capacity is around 1,500 tonnes, supplier is Bominflot.

If a vessel is cleared while at anchor, there is an additional charge of $700 – $800. Launch service is controlled by the Port Authorities and only available if the vessel is cleared. No fresh water is available at the anchorage.

Port: The dredged depth in the port is at 13.6 m. On the West side of the harbour, one mile in from the breakwater, are Berths No. 1 and No. 2, 600 m. long and used for the handling of dry fertiliser by conveyor. In position Lat. 46° 37.1' N., Long. 31° 00.8' E. is Berth No. 3 for ammonia/phosphoric acid carriers. Further to the North at Lat. 46° 37.4' N., Long. 31° 00.8' E., is the newly constructed Berth No. 4, 140 m. long and designed for the handling of methanol. This berth is not in service yet. Diagonally across from Berth No. 3 on the East shore at Lat. 46° 36.9' N., Long. 31° 01.7' E., is another new dock, Berth No. 5, 500 m. long, in operation since January 1988, and used for handling bauxite/coal and served by rail and 4 cranes. 0.4 miles inside the Entrance past the control tower on the East side of the harbour are 3 mooring buoys for handling vessels with grain cargoes.

Dredging continues North of a line at Lat. 46° 37.5' N., and no deep draft/cargo vessels proceed beyond this point or Buoy No. 14. The only other traffic in the port is small passenger/ferry boats for transporting workers across the harbour.

Traffic in the port may be handled day or night unless restricted visibility (under 2 miles) or strong winds. Five pilots currently serve the port.

Berth No. 3: Berth No. 3 is part of the chemical complex called Yuzhny Port Plant, which occupies a large section of the Western shore of the harbour. As shown in the port plans there are 2 × 12 in. Chicksan arms available for the discharge of super phosphoric acid. These join into 1 × 16 in. line ashore which runs to 6 storage tanks at the base of the hill, close by the dock. The capacity of the tanks is approximately 8,000 tonnes each. The usual discharge rate is up to 2,000 tonnes/hr. and if the tank capacity is available this rate can be maintained throughout the discharge. There is fresh water on the dock using 2 ship's hoses from a 'Y' connection with the load rate around 30 tonnes/hr. No fuel is available from the dock. The working depth at the dock is 14 m. and the face of the dock has a fairly good rubber fendering system.

Aside from handling super phosphoric acid, the dock is equipped with 2 Chicksan arms for the loading of ammonia with a third arm for vapour recovery. The dock handles on average 2 ammonia ships per week.

A line boat is used for head and stern lines (4 each), and 2 springs fore and aft are run to the dock. Vessels always dock starboard side to and because of the dock arrangement there is no problem having good leads on all lines. Fire stations are positioned along the dock at regular intervals and in towers 40 m. high.

The ship's accommodation ladder works quite well alongside and a guard (military man) will be stationed on the dock the whole time the vessel is alongside. No vehicles are allowed on the dock and the walk to the agency office by Berth No. 1 is about 0.75 miles.

Clearance: Entering the vessel will occur within one hour of being all fast.

The following documents are required:

6 Crew Lists. (We were also required to supply a visaed Crew List).
3 Stores Lists. (Include firearms, ammunition and narcotics).
5 General Declarations (Include owner's name and address. Expiry date of certificates.).
1 Crew Effects Declaration. (Include foreign currency).
2 Manifests.
2 Cargo Declarations.
Maritime Declaration of Health. (They will have their own form for this.)
Derat Certificate.

The slop chest usually remains unsealed, but the firearms and ammunition must be locked and sealed.

The Steward's provisions and store rooms will be inspected, but not sealed.

The sewage treatment plant will be inspected, if inadequate or inoperational, facilities must be used on the dock. Usually a sample of the water is taken.

Immigration will want to see each man with his passport (both inwards and outwards). The passports are taken ashore and after 2-3 hours are returned on board. For shore leave, the passport is turned over to the gangway guard who will issue a numbered pass.

A Port Authority representative will board some time during the stay to site the vessel's documents and go through the SOLAS list for bridge equipment. They will occasionally request that rat guards be installed. This is usually a brief but efficient visit.

We have had the Derat Certificate renewed here several times in a matter of minutes at a charge of 45 roubles.

The Entry and Clearance is very straight forward and we have never encountered any problems.

General: The harbour of Yuzhny (the name meaning Southern) was originally a lake that was broached into the sea to allow the port to be constructed. The overall plan is for Yuzhny to surpass Odessa as being the largest port on the Black Sea as far as tonnage and shipping traffic. Its position is such that all traffic using the Northwestern Black Sea ports must pass its entrance and use the Odessa traffic lanes due to the shallow areas of the Odessa Bank.

The dredging of the port is a continuing project and the sludge boats are constantly seen running in and out to the spill grounds on the Odessa Bank.

The town of Yuzhny, all high rise buildings, was and is being constructed about 8 km. to the North of the port to handle the growing population of people working in the port area. The town is serviced by bus from the main road. Yuzhny is located approximately 40 km. North of Odessa and is serviced by bus (5 kopeks) and taxi (20 roubles) into the city. The curfew for seamen is 2400 hrs., with Odessa being officially off-limits. There is no curfew for the Master.

In the port itself there is only a Seamen's Interclub with a lounge and bar. Roubles only are accepted at the club and with prior notification the Interclub staff can organise tours to Odessa or tickets to the Odessa Opera House, a main attraction of the city.

The port is also serviced by a chandler and duty free shop where foreign currency only is accepted. Basic staples can also be purchased through the chandler with prior notification for items such as sugar, flour, potatoes, onions, etc., in limited quantities; other provisions cannot always be supplied.

Any local currency taken from the Agent at the legal exchange rate must be accounted for and returned at sailing with receipts issued. No roubles are allowed to leave the country. Although the rouble is not recognised on the international market, the approximate exchange rate at this time is $1.64/rouble.

AUTHORITY: The Port of Yuzhny Authority, 1 Grigoryevka, Port of Yuzhny, Odessa Region, 272169 Ukraine. *Tel:* (0482) 597254, 597293. *Telex:* 232197 Tiger Ux. *FAX:* (0482) 597888. *Contact:* V.G. Ivanov, Director General.

AGENT: See "Odessa".

United Arab Emirates

GENERAL:

EMIRATES RADIO: The Emirates Telecommunications Corporation operate a Coastal Radio Telephone Service (Etisalat) to provide connections via a manual operator between ships at sea and the public telephone network. The service is available continuously 24 hours a day.

There are 8 shore stations set up around the coast of the U.A.E. These transmit and receive on the VHF channels shown in the table below. The control and operation of all shore stations is at a central point in Dubai.

	Frequencies		
Channel	*Ship Transmitter* (MHz)	*Ship Receiver* (MHz)	*Use*
16	156.800	156.800	Simplex for distress and safety for all areas
3	156.150	160.750	Duplex working, first channel for Khor Fakkan area
4	156.200	160.800	Duplex working, first channel for Abu Dhabi area
7	156.350	160.950	Duplex working, first channel for Jebel Ali and Khor Fakkan areas
28	157.400	162.000	Duplex calling channel for all areas
60	156.025	160.625	Duplex working channel for Jebel Dhanna area
62	156.125	160.725	Duplex working channel for Zirku area
63	156.175	160.775	Duplex working, second channel for Jebel Ali area
83	157.175	161.775	Duplex working, second channel for Abu Dhabi area and channel for Fujairah area
84	157.225	161.825	Duplex working channel for Umm al Quwain area
85	157.275	161.875	Duplex working, third channel for Jebel Ali area
87	157.375	161.975	Duplex working channel for Ras al Khaimah area

For all areas a common calling frequency on Channel 28 is used both for ship-to-shore calls and for shore-to-ship. After contact is established the Etisalat Coast Station Operator will assign a working channel taking into account the ship's position and existing calls in progress.

To establish a ship-to-shore call the ship should switch the equipment to Channel 28, ensure the channel is not already in use by listening and then call "Emirates Radio", identify itself and give the coastal area in which it is sailing e.g. "off Jebel Dhanna". The Coast Station Operator will then assign a working channel, e.g. in the case of Jebel Dhanna area working will be established normally on Channel 60. After recontacting on the working channel the called number and calling ship details will be established and the call connected. If there is traffic congestion the Operator may assign a free working channel from another area.

For calls to the ship, the Operator will set up the called ship's code number which will be sent on Channel 28. This will operate an alarm on the equipment. In the case of there being no selective calling equipment installed or contact cannot be established by this means the Operator will also call the ship by voice using its call sign and name on Channel 28. Following establishment of contact the ship will give the area it is in and the operator will then assign a working channel. On re-establishment on the working channel the call will be connected.

It follows therefore that all ships must keep one of their receivers switched to Channel 28 when idle in order to be able to receive a shore-based call.

Traffic lists, that is calls on hand for ships in the area, will be broadcast at 0603, 0803, 1203, 1403, 1603 and 1803 hrs. GMT on Channel 28. This is in addition to calls made on first receipt of the call booking. Ships should avoid using Channel 28 to call during the broadcast of traffic lists.

Distress and Safety: Simplex Channel 16 (156.8 MHz) is received continuously by the Coast Station and is monitored by the Border Guard in Abu Dhabi who will handle all matters relating to distress, urgency and Safety of Life at Sea (SOLAS).

Ship-to-Ship Traffic: Ship-to-ship calling and working frequencies are different from those used by the Coast Station. Such calls are not normally the concern of the Coast Station and should be conducted in accordance with international and local regulations.

Exceptionally however if a ship desires to call another ship out of direct range the Coast Station facilities may be used in which case the procedure and use of calling channels is the same as for calling a shore number.

Shore-Based Subscribers: Subscribers wishing to contact a ship should dial number 158, from any location within the Emirates in order to contact the Coast Station Operator.

They should give the Operator their town location and telephone number, the name of the ship, if known its call sign and code number and the name of the person to whom they wish to speak. The Operator will call the shore-based party back after the call with the ship is established.

Categories of Calls Available: Paid calls only are accepted. Collect calls are not admitted from or to ships.

The following categories are accepted:

- Calls from ships within range to parties anywhere within the Unite Arab Emirates.
- Calls from any party within the U.A.E. to any ship within range
- Calls from ships within range to parties in any country in th international telephone network.
- Calls from any party in the international telephone network to an ship within range. These will only be accepted via the operato in the network of origin.
- Calls from any ship within range of the Coast Station to any othe ship within range.

All calls to ships are treated as personal calls. Calls from ships ar station calls at the normal charge. Personal calls are available subjec to an additional personal call charge.

U.A.E. ships or boats using this service must ensure that:

1. They have a valid licence which is issued by the Ministry o Communications who will also issue a call sign and, whe applicable, a code number.
2. The vessel is equipped with a Maritime Mobile Radio Telephon which conforms with international requirements and an supplementary regulations issued by the Ministry o Communications.
3. That proper operating procedures are followed.

Technical Characteristics for Maritime Mobile Radio Telephon (VHF): The technical characteristics should be in accordance with CCI Recommendation 489-1 except for transmitter power which must no exceed 10 watts (U.A.E. Regulation).

The recommendations as modified in the U.A.E. are summarise below:

General Characteristics:

1. The frequency band is 156 – 174 MHz.
2. The Channel spacing is at 25 kHz intervals.
3. The class of emission is F3 (frequency modulation telephony).
4. The bandwidth is 16 kHz.
5. Frequency modulation has a pre-emphasis of 6 db/octave.
6. Apart from specially designated Simplex Channel, for SOLAS, onl ships with full duplex facilities can work with the publ telecommunications system. Ships with only semi-duplex cannot wor with the public telecommunications system.
7. It must be possible to make changes between Channels with 5 seconds.
8. The emission is vertically polarised.
9. The selective calling system is as per CCIR Recommendatio 257-2.

The tone frequencies for this system are as follows:

Figure:	1	2	3	4	5	6	7
Audio Frequency:	1124	1197	1275	1358	1446	1540	164
Figure:	8	9	0	Figure Repetition			
Audio Frequency:	1747	1860	1981	2110			

Transmitter:

1. The transmitter carrier power shall not exceed 10W and sha incorporate facilities to readily reduce this to 1W or less for use at sho ranges. (Note: The normal 25W power permissible internationally reduced to 10W in the U.A.E.).
2. The frequency deviation should not exceed ±5 kHz.
3. Frequency tolerance should not exceed 10 parts per million.
4. Spurious emissions should not exceed 25 µW or 40 db belo normal power whichever is the lower.
5. The upper limit of the audio band should not exceed 3 kHz.
6. Cabinet radiated power should not exceed 25 microwatts.

Receiver:

1. Sensitivity should be equal or less than 2 microvolts e.m.f. for given reference signal to noise ratio at the output.
2. Adjacent Channel selectivity should be at least 70 db.
3. Spurious response rejection should be at least 70 db.
4. Radio frequency intermodulation rejection ratio should be at lea 65 db.
5. The power of any conducted spurious emission measured at t antenna terminal should not exceed 2 nanowatts.
6. The effective radiated power of any cabinet radiated spurio emission on any frequency up to 70 MHz should not exceed nanowatts. Above 70 MHz, the spurious emissions should not exce 10 nanowatts by more than 6 db/octave in frequency up to 1000 M

General Guide to Operating Procedure:

Ships wishing to make a call via the Emirates Coast Station sho use the following procedure:

1. Switch their receiver to Channel 28.
2. Listen to establish there is no traffic on the channel.
3. Transmit the following call: Emirates Radio this is . . . (call s ships name or other identification). Location . . . (nearest Emirates m coastal town).

In the case of difficult conditions this procedure can be modifie follows: Emirates Radio (repeated not more than 3 times) this is (call sign, ships name or other identification, repeated not more t 3 times). Location . . . (nearest Emirates main coastal town).

If the Coast Station does not reply to the first call the call ma repeated at 3 minute intervals. However, before renewing the cal calling station must first ascertain that further calling is unlikely to ca interference to other communications in progress and that the st called is not in communication with another station.

For replying to a call from the Coast Station a similar procedu followed; the following is transmitted on Channel 28: Emirates R (repeated not more than 3 times) this is . . . (call sign, ships nam other identification, repeated not more than 3 times). Location (nearest Emirates main coastal town).

After contact has been established on Channel 28, the Coast St will assign a working channel. Coast and ship stations then chan the working Channel and proceed with the call.

Example: A Ship the 'Al Said' located off Jebel Dhanna wishes to make a telephone call. This is the procedure:

1. The 'Al Said' listens on Channel 28 to ensure there is no communication it may interfere with.
2. Transmits the following call on Channel 28: Emirates Radio, this is . . . (call sign) . . . 'Al Said' off Jebel Dhanna.
3. The Coast Station will reply: (Call sign) . . . 'Al Said', This is Emirates Radio, Channel 86.
4. 'Al Said' now switches to Channel 86 and calls: Emirates Radio, this is 'Al Said', how are you receiving me?
5. The Coast Station replies: 'Al Said', this is Emirates Radio, receiving you well, go ahead with your traffic.
6. The ship then gives details of the telephone call required.

Inmarsat Service:

Scope of Service: This service provides for the exchange of telephone/telex calls between suitably equipped ships in the U.A.E. coastal waters or in international waters, and any subscriber connected to Etisalat's telephone network.

The declared purpose of the INMARSAT System is to establish and operate a worldwide satellite communications system to provide improved maritime communications that will lead to greater efficiencies in the management and operation of ships at sea as well as contribute to improvements in distress and safety of life at sea.

Inmarsat Network – Global Coverage: The Inmarsat network consists of satellite circuits and their associated control systems providing national telecommunication carriers of member countries access to ships at sea via the maritime coast stations owned and operated by those countries who choose to provide such facility. Global coverage of accessing ships in each ocean area.

The implications of this network are that such access to ships having suitably equipped terminals, and located anywhere in the world can be had via extremely reliable and high quality circuits at reasonable costs.

In the operation of the service, Etisalat has the freedom to route its maritime telecommunications traffic via any of several coast earth stations having coverage to that particular ocean area. Elisalat's routing arrangements provide service to Inmarsat satellite coverage areas in Atlantic, Indian and Pacific Ocean regions.

Facilities Offered: Telephone: In the direction from shore-to-ship, IDD service and Operator Assisted call facilities are available.

For IDD Calls the telephone country code to dial are:

Ocean Region	*Code*
Atlantic East	871
Atlantic West	874
Indian	873
Pacific	872

Operator Assisted Calls have to be booked with the Etisalat International Telephone Operator. Calls can be either station-to-station or person-to-person, subject to a personal call surcharge in the latter case. When booking a call, callers in the U.A.E. should give the operator the ship telephone number and the ocean region where the ship is located.

In the direction of ship-to-shore, calls will be received on an automatic basis, but if necessary such calls will also be connected via the operator in the coast earth station country.

Telex: U.A.E. subscribers have the facility to dial telex calls in the shore-to-ship direction, and to receive calls from ships on a fully automatic basis. However, if necessary the Etisalat Operator or the operator in the coast earth station country will be able to establish telex calls.

Automatic telex calls can be made by keying the destination code and the ship telex number.

Area	*Destination Code*
Atlantic Ocean – East	0581
Atlantic Ocean – West	0584
Indian Ocean	0583
Pacific Ocean	0582

Collection Charges: Telephone calls from shore-to-ship via Etisalat are charged on the basis of 3 minute minimum plus each additional minute. For person-to-person calls a surcharge equivalent to a 1 minutes charge will apply. The charges applicable are:

Inmarsat A and Aero (Levels 1 and 5):

All ocean regions	First 3 minutes	Dh 120
	Each additional minute	Dh 40
	Personal surcharge	Dh 18

Inmarsat B and M (Levels 3 and 6):

Atlantic Ocean Region and Pacific Ocean Region	First 3 minutes	Dh 105
	Each additional minute	Dh 35
	Personal surcharge	Dh 18
Indian Ocean Region	First 3 minutes	Dh 75
	Each additional minute	Dh 25
	Personal surcharge	Dh 18

Per minute telex call from shore-to-ship via Etisalat Dh 30

Telex calls are charged on the basis of 1+1 charging, i.e. the minimum charge is for 1 minute with the additional time charged per minute, with fractions of a minute charged as a full minute.

Accounting Services for Inmarsat/Radio Maritime Communications: Etisalat also provides accounting service to ocean going and mobile vessels registered by the Federal Ministry of Communications, U.A.E., in accordance with the international telecommunications rules (CCITT) and International Maritime Laws. Under the terms of this service, Etisalat will provide such accounting and settlement facilities for the ships thus registered in U.A.E. for all their radio communication traffic via Inmarsat and other communication channels anywhere in the world.

Charges payable to Etisalat by the mobile station operator are:

(i) Deposit: A refundable security deposit of Dh 5,000/– is payable at the time of application for service. The deposit will be returned at the time of termination of the service, subject to the satisfactory settlement of all outstanding matters, including the payment of all charges and dues payable to the Corporation.

(ii) Service Fee: An annual service fee of Dh 2,000/– is payable in advance for calculation and verification of charges, allocation of charges to interested parties, adjustment and payment of accounts received from Administrations and other accounting authorities and related incidental correspondence. This charge will accrue day to day from the date of commencement of service.

Etisalat branch offices in Abu Dhabi and Dubai will provide on request details of terms and conditions governing this service to interested mobile station operators. Applications for such service should also be made to the appropriate Etisalat branch office.

Other Marine Services: If ships are outside U.A.E. coastal waters, calls may be made via marine communication facilities available in other countries.

These are: Ship/shore telephone/telex/telegram services via radio (VHF, MF or HF).

Charges for ship/shore services by radio consist of the appropriate international rate to the country in which the coast station is situated plus the coast station and ship station charges.

OPERATOR: The Emirates Telecommunications Corporation, P.O.Box 3838, Abu Dhabi, U.A.E. *Tel:* 283333. *Telex:* 22115 Etcho Em. *FAX:* 772930. *Contact:* Manager Operations.

ABU AL BUKHOOSH: 25.26 N. 53.08 E. (See Plan)

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) Lat. 25° 31' N., Long. 53° 05' E.
(b) Lat. 25° 29' N., Long. 53° 12' E.
(c) Lat. 25° 26' N., Long. 53° 12' E.
(d) Lat. 25° 26' N., Long. 53° 05' E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early Departure Procedure: The Master must, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the Early Departure Procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing.

In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P.

Mail: Official ship's mail and the crew's personal mail may be handed to an Abu Dhabi agent by Total ABK.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified Deck Officer must be on watch at all times while the vessel is alongside the storage tanker.

RESTRICTIONS: See "Readiness" and "Mooring".

MAX. SIZE: Max. 280,000 d.w.t. Max. draft 22.5 m. Depth of water 27 m.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio or Inmarsat, which operates on a 24 hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio or Inmarsat.

Communications within 60 Miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 15. This frequency is monitored continuously.

Once contact has been made on Channel 15, further conversation should be conducted on either Channel 14 (156.7 MHz), Channel 12 (156.60 MHz) or Channel 15 or 17.

Communications after Total ABK Mooring Master has Boarded: A Total ABK Mooring Master will board incoming tankers in the Anchorage Area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Usual advice of tankers arrival:

Quote

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio or Inmarsat stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop 50 miles before arrival please contact terminal by VHF Channel 15 to receive berthing instructions stop Total ABK.

Unquote

Mooring Instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

ANCHORAGES: An area immediately S.W. of Terminal limits is designated as the Anchorage Area, centred on position: Lat. 25° 27' 54" N., Long. 53° 05' E. This co-ordinate represents the centre of a circle with a radius of 0.5 miles which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

Check with Harbour Master before anchoring as pipe-laying operations may be in progress.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be received provided the Master shall have received the Mooring Master on board.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

The port is also closed from 1600 hrs. (L.T.) to sunrise from March to October and from 1500 hrs. (L.T.) to sunrise from November to February.

(b) BUOYS

SPM Buoy	2 820 102,8 N. 714 650,6 E.	Mooring and loading tanker "Asian Energy" 230,000 d.w.t.	White Code U 15 secs. – vis 6 n.m.

(c) RADIO BEACON/FOG SIGNALS

Radio Beacon	Bridge PP LP-Flare	Aeronautical	Code R.P. 248 kHz – 25 W.

TUGS: Two tugs, each with minimum 80 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates 24 hours a day, 7 days a week. Loading and sailing at any time day or night, but berthing daylight only, namely sunrise to 1600 hrs. (LT), March to October, and sunrise to 1500 hrs. (LT), November to February. Vessels moor port side to the storage tanker "Asian Energy" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for Mooring: Vessels are requested to have, on their starboard side, an accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's tug.

Hoses: The hoses are hoisted by flow boom system, connection (2×16 in.) by storage tanker crew.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be flown by helicopter to Abu Dhabi.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of Communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency Shut Down: An emergency cessation of loading may b effected by use of the ship's VHF Channel 15.

Loading Rates: Maximum loading rate will be 64,000 bbl./hr.

Gases: ABK crude oil contains H_2S (hydrogen sulphide). This gas quickl deadens the sense of smell so that a dangerous concentration canno be detected by odour. During loading, gas should be vented off throug the tanker's normal venting system. Personnel engaged in ullaging tank should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should b readily available.

Valve Closure Against High-Speed Loading: No valve which will stop o seriously impair or reduce the flow rate of oil from the storage tanke are to be operated without prior agreement with the Mooring Maste The practice of throttling back on the ship's cargo valves is to be avoided If a lower rate is required, the storage tanker is to be advised and th pumping rate will be reduced to the required level. The Master will b held liable for any damage arising from the sudden cessation of flo caused by default of the ship. It cannot be over emphasised that to d so can be extremely dangerous and cause extensive damage t equipment.

BALLAST: Due to the exposed location of the crude oil loading berth vessels are required to carry 40% of their deadweight in ballast and/o cargo for safe handling, having due regard to existing weather and se conditions. Total deballasting of tanker prior to loading is not acceptabl A vessel found by the Mooring Master to be not adequately ballaste will be rejected.

Clean Ballast: As there are no ballast discharging facilities, vessels mus arrive at the Terminal with clean ballast, ensuring that all pipelines pumps and strainers have been flushed out prior to arriving. The Moorin Master will inspect ship's ballast on boarding and has the power to rejec any vessel that he thinks would cause pollution of the sea area, in whic case vessel must proceed to sea and return only when ballast i completely free of oil. Any vessel rejected because of dirty ballast wi automatically nullify its Notice of Readiness and will lose any priority o position for loading. Ballast discharge should not be commenced withou the prior agreement of the Mooring Master.

Inspection During Loading: At night the sea around the vessel shall b adequately lit, as frequent inspection by the Mooring Master will be mad during the discharge of ballast. Any pollution whatsoever will be caus for rejection. Similarly, any hull leaks causing pollution during loadin will be cause for rejection and the vessel will not be re-accepted unles satisfactory evidence of repairs has been certified by a qualified surveyo

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats f hire, repair facilities, facilities for changing ship's crew are NOT availab at the Terminal.

SHORE LEAVE: Not possible.

GARBAGE/WASTE OIL DISPOSAL: Not available.

CURRENCY: U.A.E. Dirhams (Drhs).

GENERAL: *Radio Equipment:* Radio, radar or other electric equipme must not be energised while the vessel is alongside the storage tank except VHF radios, telephone and communications equipment approve by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engin steering machinery and other equipment essential for manoeuvring sha be maintained in a condition to permit the ship to move away from storag vessel at short notice. Repairs or other work which may immobilise t ship should not be undertaken without prior arrangement.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pa Abu Dhabi Government Port Dues. These are calculated according t Abu Dhabi Law.

Agency: Total ABK do not act as Agents. Vessels must have an Age in Abu Dhabi in case of injuries or illness.

SHIPMASTER'S REPORT: June 1992 (Updated 1996).

Vessel: 96,000 tonnes d.w.t. (OBO). LOA 243 m. Beam 38.0 m.

Upon arrival, the vessel was asked to anchor in position Lat. 25° 23' Long. 53° 08' E.

Storage tanker "Asian Energy" has 5 Yokohama fenders on h starboard side. Pilot boards from an offshore supply vessel, while ves is at anchor. During berthing, 2 offshore supply vessels are fast, o forward and one aft. Berthing depends upon weather conditions, wh are assessed by the Pilot. Understood from Pilot, that if wind speed in excess of 25 knots, berthing is not carried out.

Storage vessel's distance from flow-boom to stern is about 128 Our vessel's stern was almost in line with the storage tanker's st Own vessel moored with 4 headlines and 1 back spring forward a 3 sternlines and 1 back spring aft, from own vessel. Additionally, 1 bre line and 1 back spring (forward and aft) is passed by the storage tan to own vessel.

It is very important to plan loading/deballasting in such a way, so to maintain at least 40% of deadweight on board at all times.

Cargo surveyors (SGS, Caleb Brett, etc.) require special permits come on board the vessel, as per local oilfield regulations. He sufficient notice must be given, if surveyor is required to attend to vessel.

No documents are required for Inward Clearance of the vesse there are no Customs or Immigration Authorities. At the time of depa only Bill of Lading copy and other normal cargo documents are han over to the Master by the outward Pilot.

No Port Clearance is issued by the Terminal.

AHMED BIN RASHID, Umm Al Qiwain: 25.35 N. 55.35 E. **(See Plan)**

LOCATION: Ahmed Bin Rashid Port is located on the West Coast of the United Arab Emirates some 30 miles North East of Dubai, in the Emirate of Umm Al Qiwain.

DOCUMENTS:
Crew Declaration (2 copies).
Cargo Declaration (Manifest).
Clearance from last Port.
Dangerous Cargo List.

APPROACHES: The entrance channel has a minimum depth of 10 m. and has a width of 100 m. which connects with a swinging basin of 500 m., the whole channel being marked by standard buoys and beacons in accordance with International Regulations.

PILOTAGE: Not available at present.

ANCHORAGES: Anchorages can be obtained off the harbour in depths ranging from 11 m. to 13 m.

RESTRICTIONS: Entry restricted at night time.

MAX. SIZE: Length 210 m., draft 9.8 m.

HEALTH: Usual International Health Regulations to be observed. Any vessel which is suspect should inform Port Authority.

RADIO: All communications on VHF Channels 16 and 69.

BERTHING: *Deep Water Berth:*
Wharf No. 1. 130 m. long, dredged depth 5.5 m.
Wharf No. 2. 115 m. long, dredged depth 7.5 m.
Wharf No. 3. 200 m. long, dredged depth 9.5 m.
Wharf No. 4. 400 m. long, dredged depth 10.0 m.

Bollards are located at 22 m. intervals and fitted with rubber fendering.

Town Wharf: 800 m. long, max. draft 4.0 m. Berth for coasters and small vessels up to 60 m. LOA.

CRANES: Not available. Shore cranes can be hired locally.

STEVEDORES: Services provided wholly by Port Authority. Advice of labour requirements must be received in advance.

MEDICAL: Can be obtained at short notice. Hospital facilities available in Umm Al Qiwain.

FRESH WATER: Limited supplies available at deep water berths, can be provided by road tanker or barges (to be arranged by Agent).

FUEL: Various grades of gas oil and diesel oil can be supplied by barges or road vehicles (to be arranged by Agent).

REPAIRS: All types of deck and engineering repairs are allowed (to be arranged by Agent).

SURVEYORS: Inspector available locally (to be arranged by Agent).

GANGWAY/DECK WATCHMEN: Under Port Regulations there shall always be on board sufficient men to move or take care of vessel.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: Safety Construction, Load Line, Cargo Gear, Safety Radio and Safety Equipment.

CARGO GEAR: Load/Discharge effected by ship's gear, shore cranes can be arranged locally.

REPATRIATION: Arrangements can be made.

AIRPORT: Dubai, Sharjah and Ras Al Khaimah Airports, all within 100 km., handling regular scheduled flights.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: 1st January (New Year's Day) and 2nd December (National Day). Other holidays dependant upon Lunar Calendar (i.e. Idd Ul Adha, Idd Ul Haj).

POLICE/AMBULANCE/FIRE: Call 999 and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: U.A.E. Coast Guards, Tel: 666435.

BANKS: National Bank of Umm Al Qiwain. Tel: 655225, 655441.
National Bank of Dubai. Tel: 655151, 656154.

STORING: See "Prelims".
1. Yes.
2. Yes, if it does not hinder cargo operations.
3. Yes.
4. Yes.
5. —
6. Yes.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Shore passes issued (1 Passport size photo required).

GARBAGE DISPOSAL: Drums provided alongside by Port Authority.

WASTE OIL DISPOSAL: Can be arranged through local agents.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.67 (Fixed).

AUTHORITY: Ahmed Bin Rashid Port Authority, P.O.Box 279, Umm Al Qiwain, U.A.E. *Tel:* 655882. *Telex:* 69717 ABRPA EM. *FAX:* 651552, 655444. *Contact:* M.K.Moosajee, Port Manager.

AGENT: See "Sharjah".

AJMAN, Ajman: 25.25 N. 55.28 E.

PILOTAGE: Pilot boards 3 miles N.W. of breakwater. 48 hours Notice of Arrival required.

RESTRICTIONS: Dredging is taking place between the breakwaters. Work will commence at the S.E. corner of the Eastern Breakwater and proceed to the outer end Roundheads. The dredger will then move to the Western side. The 100 m. cut will then be completed to a depth of 7.2 m. below Chart Datum.

The following restrictions are imposed during operations:
(a) The port will be closed to all navigation during the hours of darkness – sunset to 30 minutes before sunrise.
(b) Transit priority will be given to vessels sailing outward from the port up to 0630 hrs. local time.
(c) Between 0630 hrs. and 0730 hrs. local time, priority will be given to incoming vessels.
(d) At all other times during daylight hours, vessels may arrive or sail as required but all must exercise extreme caution while passing the dredger.

The dredger will carry lights and shapes as prescribed for vessels of this class.

MAX. SIZE: Max. draft available 5 m. Approach Channel width 100 m.

RADIO/VHF: Call Harbour Control on VHF Channel 16, 2 hours prior to arrival.

BERTHING: Total quay space 5,000 m.
4 transit sheds of 60 m. × 120 m. available alongside.

Before sailing, all vessels must obtain a Port Clearance Certificate issued by the Department of Port and Customs.

REPAIRS: A "gas-free" and "hot-work" certificate is required from vessels undergoing repairs to oil-tanks within port limits.

A surcharge may be imposed on vessels undergoing repairs or modifications where welding equipment, compressors, etc., are operated from the wharf. Permission to commence this work must be obtained beforehand from the Port Authority.

GENERAL: *Charts:* BA 2887, 3711. USHO 62390.

AUTHORITY: Department of Port and Customs. *Tel:* 423081, 446445. *Telex:* 69552.

AGENT: See "Sharjah".

ARZANAH ISLAND: 24.47 N. 52.33 E. SBM: 24.46 N. 52.31 E. **(See Plan)**

PORT LIMITS: *Port Area:* Contained within the following co-ordinates:

"A"	Lat. 24° 50' 12" N.,	Long. 52° 29' 24" E.
"B"	Lat. 24° 50' 12" N.,	Long. 52° 37' 12" E.
"C"	Lat. 24° 43' 48" N.,	Long. 52° 37' 12" E.
"D"	Lat. 24° 36' 48" N.,	Long. 52° 34' 36" E.
"E"	Lat. 24° 37' 00" N.,	Long. 52° 29' 24" E.

LOCATION:
Port Area and Terminal: Arzanah Island is located at Lat. 24° 47' N., Long. 52° 33' E. and is the base for export of crude oil. The Port of Arzanah is the area defined above.

A tanker terminal and another berth on Arzanah Island for vessels destined to other than the tanker terminal, are located within the port area.

PILOTAGE: Conduct and movement of vessels within the port area are controlled by the Marine Operations Department. A Company designated Mooring Master is required for the berthing and unberthing of vessels at the Storage Tanker.

Mooring Master: Pilotage is compulsory within the "Port Area" and no vessel may enter or depart the port area, berth or unberth at the Storage Tanker or conduct any other manoeuvres of the vessel without prior notification to the Marine Operations Department and without the assistance of a Company designated Mooring Master unless otherwise ordered by the Marine Operations Department. The Company designated Mooring Master for vessels bound for the Storage Tanker will board the vessel at Dalma (Lat. 24° 32.5' N., Long. 52° 27.5' E.).

The Mooring Master's function will be to advise the Master of the vessel for the above stated purposes. The Master of the vessel always remains responsible on behalf of the vessel's owner for the safety and proper navigation of the vessel.

ANCHORAGES: Anchoring of vessels is prohibited within the port area and terminal area. An area 3.5 miles West of the Storage Tanker in the vicinity of Lat. 24° 46' N., Long. 52° 27' E. is designated as the anchorage area.

RESTRICTIONS: See "Berthing".

MAX. SIZE: *S.B.M.:* Max. d.w.t. 280,000 (export tanker). Max. draft 43 ft. Depth of water at SBM 107 ft. Least depth in approaches 48 ft.

Sailing Draft: The draft of loaded vessels leaving the Storage Tanker is controlled by the water depth between Dalma Light Float and the No. 1 Buoy in the outer channel.

Minimum under keel clearances recommended by the Mooring Master are as follows:

D.W.T.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Master prior to starting to load.

RADIO: The Company cable address is "Zadco – Abu Dhabi" and telex number is 22948 ZDC AUH EM. The Company also maintains radio watch on International Marine VHF Channels 8, 9, 16, 24 and 25, while Arzanah Radio maintains VHF watch on Channels 16, 61 and 77.

Notice of Arrival:

Vessels bound for the *STORAGE TANKER* must advise the Company as follows:

72 HOURS: Not less than 72 hours prior to arrival, the vessel shall send a cable or telex to the Company providing the following information:
- (a) Estimated time of arrival.
- (b) Estimated fore and aft draft upon arrival at the port area.
- (c) Quantity of oil to be loaded.
- (d) Distance from the bow to the cargo manifolds.
- (e) Size, number and type of cargo connections.

48 HOURS: Not less than 48 hours prior to arrival, vessels shall send a cable or telex to the Company, reconfirming or giving any changes in the 72 hour notice.

24 HOURS: Not less than 24 hours prior to arrival, vessels shall send a cable or telex to the Company, reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company.

Not less than 24 hours prior to the vessel's ETA at Dalma, the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Dalma must maintain a radio watch on VHF Channel 16.

Other frequencies available are:

HF: 2638, 3270, 3710, 3875 and 4136.3 kHz.

VHF: Channels 1 to 28, 60 to 74 and 77 to 88.

Call sign for Arzanah is "Arzanah Radio".

TUGS: *Tugs and Launches:* The Company will have available one or two tugs for berthing or unberthing and for standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used.

BERTHING:

Berthing-Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or of any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.

Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Mooring/Loading Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.

Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which clean or segregated ballast is being discharged. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Marine Operations Department. An investigation shall be carried out by the vessel and the findings immediately reported to the Marine Operations Department. Deballasting shall not recommence without the permission of the Mooring/Loading Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Mooring/Loading Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping-off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Mooring/Loading Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the Export Tanker are ready for safe transfer and handling of the cargo.

The Mooring/Loading Master or Company representative may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Company representative/Mooring/Loading Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chicksans) to the appropriate manifold connections. As a convenience to the vessel the Mooring/Loading Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.

Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.

Pumping Rate: Max. pumping rate using 2 arms. 60,000 b.p.h. Average pumping rate 55,000 b.p.h.

Storage tanker capacity: 1,400,000 bbls. Cargo Arzanah Stabilized Crude, API 43.0. Specific Gravity 0.8109. Reducers: In limited supply.

General Cargo Loading–Unloading: Loading or unloading operatio cannot commence until permission has been granted by the Moorin Loading Master. All operations after such permission is granted i connection with the loading and unloading of the vessel will be th responsibility of the vessel. At all times while the vessel is alongsid there shall be a responsible licenced deck officer of the vessel on dec in charge of all operations on deck.

POLLUTION: The Petroleum Ports Law prohibits the discharge into th water of oily water, garbage, waste or other objectionable materials. Th Petroleum Ports Law also requires immediate reporting to the Harbou Master of any leakage or spillage by the vessel. The Law is strictl enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spille overboard from his vessel in the vicinity of the Port Area. In the even of any spillage or loss of oil from the vessel as the result of any act o omission of the vessel, such as, but not limited to, the pumping of oi water overside from ballast or bilges, or oil spilt during loading. Th vessel shall be responsible for all costs and expenses of clean up, an for any damages to property or injury to persons resulting from suc spillage or oil loss.

The Company reserves the right to take all reasonable measures t clean up any resulting pollution or contamination on land or sea, but onl as a contractor acting on behalf of the vessel or its owner, and will charg the vessel for all costs and expenses incurred thereby.

SAFETY REGULATIONS: *Safety:* The Petroleum Ports La recommendations contained in the I.C.S. International Safety Guide fo Oil Tankers and Terminals covering the loading and discharging o tankers and the safety regulations set forth herein will be strictly enforce while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storag Tanker and Shore Berth except in places specified by the Master whic shall not be outside of any of the accommodation areas. The Master i responsible for ensuring that all on board are informed of the selecte areas for smoking and for posting suitable notices. Matches and lighte for personal use shall not be carried while outside designated smokin areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must b ready for instant use while the vessel is moored. Fire hoses of sufficie length to reach all parts of the vessel must be strung out and connecte to hydrants. If the vessel's fire fighting equipment is rendered inoperati for any reason this must be reported to the Loading/Mooring Mast immediately.

Fires: The only open flames allowed while the vessel is moored at th Storage Tanker are those in the vessel's boilers and galley equipmen All other open flames are prohibited. Sufficient fire extinguishers mu always be provided near the galley.

Engine Room/Boiler Room Precautions:
- (a) Combustion equipment – burners, tubes, uptakes, exhau manifolds, and spark arresters shall be maintained in good workin order and kept clean.
- (b) Blowing tubes – funnel uptakes and boiler tubes will not be blow while a vessel is moored at the Storage Tanker.
- (c) Cleaning solvents – highly volatile cleaning solvents shall not b used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening on to decks must be ke closed while the vessel is moored. Any doors open for access oth than the pumproom doors must be closed immediately after use.

Air-Conditioning: Central air-conditioning working in re-cycling mode a providing positive pressure inside the accommodation is only authorise

Cargo Tank Openings: All cargo tank hatch covers and ullage port cove are to be kept closed. If tanks must be hand sampled or ullaged t ullage openings must be kept closed except while sampling or ullagi cargo.

Sea Valves: All sea and overboard discharge valves are to be clos and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carryi cargo must be pressured and fully inerted with gas having an oxyg content of less than 8% prior to the commencement of loading. T oxygen content of the tank blanket will be checked throughout the load and loading will be stopped anytime the oxygen level rises above 8

Insurance (Towing) Wires: Towing wires of at least 50 m. long are t secured to mooring fittings and run out at the bow and stern on t vessel's outboard side and held in place on short stoppers with the about 1.5 m. above the water so they are readily available to a tu an emergency.

Bonding Cable: The bonding cable from the Storage Tanker must attached to the vessel before the loading arms are connected a removed only after the loading arms are disconnected from the ves

Electrical Storms: All cargo or ballasting operations shall be suspen during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and ot essential manoeuvring equipment must be kept in readiness at all ti to permit the vessel to unberth on short notice. No engine or propul machinery repairs may be carried out while the vessel is moo alongside the Storage Tanker. At all times while the vessel is along the Storage Tanker there shall be a responsible licensed engine the vessel on duty in charge of all operations in the engine room.

Radio-Radar: The vessel's main radio and radar equipment must n energised while the vessel is handling cargo or ballast alongside Storage Tanker. The use of intrinsically safe VHF radios for c handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shu adequate drip pans provided where necessary on deck prior to the of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be along the vessel during cargo or ballasting operations without the exp permission of the Mooring/Loading Master.

Portable Lamps Electrical Equipment: The use of portable lamps, n lights or electrical equipment on extension cords is prohibited. approved intrinsically safe self-contained flash lights are permit deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A Safety Check List shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licenced officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzanah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc.

TIME: GMT plus 4 hours.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Regulations:* Shipping operations at Arzanah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Zakum Development Company, P.O.Box 46808, Abu Dhabi, U.A.E. *Tel:* 661700. *Telex:* 22948 ZDC AUH EM. *FAX:* 669448. *Cables:* Zadco. *Contact:* A. Makki, Head of Marine Operations.

AGENT: See "Mina Zayed".

DAS ISLAND, Abu Dhabi: 25.09 N. 52.52 E. (See Plan)

Conduct and movement of vessels within the port are controlled by the Port Officer, Das Island.

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The Island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd. (ADGAS).

PORT LIMITS: The area of authority is encompassed by a line joining the following positions:

From (a) Lat. 25° 14.0' N., Long. 52° 48' E., due East
to (b) Lat. 25° 14.0' N., Long. 52° 57' E., then due South
to (c) Lat. 25° 07.7' N., Long. 52° 57' E., then S.E.
to (d) Lat. 25° 07.2' N., Long. 52° 58.8' E., then due South
to (e) Lat. 25° 04.5' N., Long. 52° 58.8' E., then due West
to (f) Lat. 25° 04.5' N., Long. 52° 48' E., then finally due North to position (a).

All marine orientated activities within this area, all waters, installations, facilities and structures which are, or may be, erected therein are governed by ADNOC – Petroleum Ports Authority (ADNOC – P.P.A.).

DOCUMENTS:

Bills of Health for Ports visited on voyage.
3 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

Documents and Specimen Forms: Before the P.P.A. appointed Berthing Master commences any berthing operations certain initial documents must be tendered duly signed, timed and dated as applicable, by the Master. The Berthing Master will acknowledge receipt as necessary. These initial documents are in a booklet form and contain:

1. Clean Ballast Declaration.
2. Ship's Particulars.
3. Conditions of Use of Terminal facilities.
4. Safety requirements.

019-MAR-4 Pre-Berthing Declaration.

Additionally vessels loading Condensate Blend Cargoes:
019-MAR-19 H_2S Content in Condensate Cargo.

A supply of these initial documents will be provided at the vessel's first visit to Das Island. On second and subsequent visits the Berthing Master will receive the documents, duly completed, on boarding thereby avoiding any delays to the vessel.

Also see "General".

PRE-ARRIVAL INFORMATION: All vessels calling at Das Island must telex the Pre-Arrival Information below, at least 72 hours in advance, so as to avoid any unnecessary delays.

Ref. No.
To:
From:
Subject: Pre-Arrival Questionnaire **(OIL)** Date:

Please provide the following information at least 72 hours in advance and in the same sequential order to:

Petroleum Ports Authority Das Island
C/o ADMA OPCO Das Island (Agency Section)
Cables: Admarinedas
Telex: 22284 Adma Em

Update ETA at 48 and 24 hours prior to arrival. Contact Das Marine on VHF Channel 16 four hours before arrival. Please have combination pilot/accommodation ladder rigged on the lee side. Pratique will be granted by the Berthing Master on boarding.

Part 1 A Name of vessel.
B ETA Das Island
C Port of Registry.
D Nationality.
E Net registered tonnage.
F Gross registered tonnage.
G Summer deadweight (Long tons).
H Name of Master.

Part 2 A Voyage number.
B Cargo to load, loading rates and order of loading required.
C Last port.
D Next port.
E Destination port for discharge.
F Last loadport in the United Arab Emirates and date.
G Confirm your acceptance to signing a Boycott Declaration to be submitted to the Supreme Petroleum Council stating that cargo loaded at Das Island will not be discharged at any port in Israel or any other boycotted countries.

Part 3 Expiry dates of the following Certificates:
A Load Line.
B Safety Construction.
C Safety Equipment.
D Safety Radio-Telegraphy.
E Safety Radio-Telephony.
F TOVALOP.
G Civil Liability (CLC).
H International Oil Pollution Prevention (IOPP).
I Derat/Derat Exemption.
J Certificate of Class – Date of next renewal inspection.

Note: Non-compliance with any conditions on certificates will automatically cancel the validity of the certificate.

Part 4 Ballast to be discharged this port.
A Segregated ballast quantity.
B Dedicated ballast quantity.
C Clean ballast quantity.
D State time to deballast before loading or whether operations will be concurrent.

Part 5 A Confirm all cargo tanks are fully inerted with oxygen content below 8%.
B Confirm vessel has no defects which could affect the safe navigation or manoeuvrability of the vessel.
C Confirm that the cargo system is free from defects or leaks which could affect cargo handling or cause pollution.
D Confirm accommodation air conditioning/ventilating systems are operational with positive pressure.
E Confirm vessel will operate under closed loading conditions with venting of cargo tanks only by means of approved venting systems.

Part 6 A Arrival displacement.
B Arrival draft.
C Sailing Draft.
D Length overall.
E Length bow to manifold.
F Freeboard on arrival.
G Maximum freeboard during operations.
H Distance manifold to ship's side.
I Height of manifold above deck.
J Confirm manifold suitable for connection of 16 in. hoses.

Part 7 Moorings.
A Number, size and material of headlines.
B Number, size and material of forward breast lines.
C Number, size and material of forward springs.
D Number, size and material of aft springs.
E Number, size and material of aft breast lines.
F Number, size and material of stern lines.
G Confirm moorings and winches inspected and in good condition.
H Date of last winch brake test.
I Confirm moorings on drums are spooled in the correct direction.

Part 8 SBM moorings.
A Type and size (Horizontal and vertical dimensions) of forward Panama fairlead or chock.
B Number, type and safe working load of bow stopper. Confirm suitable for 3 in. chain.
C Safe working load of port crane/derrick.

Part 9 Your cargo nomination for Das Island is as follows: ......

Ref. No.

D Destination port for discharge.

Part 3 Expiry dates of the following Certificates:
A Load Line.
B Safety Construction.
C Safety Equipment.
D Safety Radio Telegraphy.
E Safety Radio Telephony.
F Civil Liability (CLC).
G International Oil Pollution Prevention (IOPP).
H Derat/Derat Exemption.
I Class Certificate.
J Certificate of Fitness for the Carriage of Liquefied Gas.

Note: Non-compliance with any conditions on certificates will automatically cancel the validity of the certificate.

Part 4 A Segregated ballast quantity to be discharged.

Part 5 A Confirm inerting system operational and in use.
B Confirm vessel has no defects which could affect the safe navigation or manoeuvrability of the vessel.
C Confirm that the cargo system is free from defects or leaks which could affect cargo handling.
D Confirm accommodation air conditioning/ventilating systems are operational with positive pressure.

Part 6 A Arrival displacement.
B Arrival draft.
C Sailing draft.

Part 7 A Confirm no changes to number and size of mooring lines.
B Confirm mooring and winches inspected and in good condition.
C Date of last winch brake test.
D Confirm moorings on drums are spooled in the correct direction.

FLARE COMPLEX: A series of 6 flares are located in an arc approximately 4,500 ft. (1,370 m.) North of Das Island. The unlit flares may be brought into service without warning. The Northern perimeter of the Flare Zone is marked by a green conical light buoy, Fl. G. 5 secs., in position: Lat. 25° 11.5' N., Long. 52° 52.2' E.

An additional flare is situated on a small jetty extending approximately 400 ft. (120 m.) from shore approximately 2,500 ft. (760 m.) from LNG/LPG Berth No. 4.

Numerous flares are situated onshore on the North and N.W. coasts of Das Island.

All of the flares previously referred to are situated within the Restricted Area No. 1.

APPROACHES: *Entering and Navigation within the Port:* Navigation/movement within the port area is permitted subject to prior permission being granted by the Port Officer. Vessels visiting the port area must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notices to Mariners and other notices promulgated for the area through MENAS.

CAUTION:

The Umm Shaif Oil Field is approximately 20 miles East of Das Island.

The Zakum Oil Field is approximately 48 miles S.E. of Das Island.

The Bunduq Oil Field is approximately 15 miles West of Das Island.

The Fields, together with their associated submarine oil and gas pipelines to Das Island are marked upon hydrographic charts pertaining to the area.

It is essential that vessels/craft approaching Das Island do not enter the Oil Field areas or anchor in the vicinity of submarine pipelines.

NOTE: Masters of vessels/craft are advised that actual depths over submarine pipelines are generally less than those charted and vessels passing over these pipelines may have the under-keel clearance substantially reduced.

Use of anchors in the vicinity of these pipelines is strictly prohibited. (See Note: "Pipe-lines" on BA and USHO Charts.)

Approaches to Das Island: Vessels approaching Das Island must navigate with due caution on account of numerous oil platforms and associated submarine pipelines within the waters of Abu Dhabi and neighbouring states. (See Cautions on BA and USHO Charts.)

Vessels passing to the East of Das Island must not pass closer than 2 miles from the Island, and then only with prior permission of the Port Officer and giving due care and attention to vessel movements within the port.

SOUTHERN ROUTE:

Vessels approaching from the South must pass not closer than 3 miles South of oil installations etc., in the Umm Shaif Field, thence towards the pilot/anchorage areas S.E. of Das Island (See "Pilotage" and "Anchorage").

Special attention shall be paid to the traffic routing system which passes between the Umm Shaif and Zakum Oil Fields, and vessels/craft shall navigate in accordance with the requirements of the International Rules and Regulations for the Prevention of Collisions at Sea.

NORTHERN ROUTE:

Vessels approaching from the North should normally pass down the West side of Das Island and keep at least 4 miles to the West and at least 5 miles to the South of the Island. However, vessels may pass to the East of Das Island with permission of the Port Officer but see note above.

DEEP DRAFT VESSELS:

Deep drafted vessels may approach the port via the Deep Water Buoyed Channel (See "Navigation Aids"). The channel is intended primarily for the use of deep drafted vessels sailing from Das Island, but vessels intending to enter the port via this channel should advise 'Das Marine' by radio, of their intentions. Masters are advised that this channel is not for the exclusive use of Das Island traffic and are cautioned to proceed accordingly.

PILOTAGE: P.P.A.-appointed Berthing Masters are the designated representatives of the Port Authority and, as such, are responsible to the Port Authority for the observance and implementation of Standing Instructions for Marine Operations.

The Berthing Master will normally board the vessel approximately 2 miles E.S.E. from Tanker Berth No. 2. The Pilot Station is at Lat. 25° 08' N., Long. 52° 55.4' E.

For vessels entering from the North the Berthing Master may board in a different location. If so, he will advise the Master accordingly via VHF radio.

The Berthing Master will undertake the pilotage, berthing and unberthing of the vessel save that the Master of the vessel shall remain solely responsible on behalf of the Owners for the safety and safe navigation of the vessel at all times.

Tankers and Gas Carriers: Tankers and gas carriers are not permitted to berth at or unberth from any of the berths in Das Island without a P.P.A.-appointed Berthing Master on board.

General Cargo Vessels: General cargo vessels are required to employ a Berthing Master. Vessels are required to use the anchorage area designated for cargo operations (See "Anchorage"), but may anchor in the main anchorage while awaiting weather conditions to improve, availability of lighters or if the designated anchorage is congested.

Small Craft: Craft entering the boat harbour are not required to hire pilotage services, but may do so by prior application to the Port Authority.

Movements of all craft into, within or out of the boat harbour is at the discretion of the Port Officer. Allocation of berths is the sole responsibility of the Port Officer. No craft are allowed to enter, manoeuvre within or sail from the boat harbour during the hours of darkness without the prior permission of the Port Officer.

ANCHORAGES: Designated anchorages are established for use by vessels/craft visiting the Port of Das Island. The use of anchors outside these areas must only be undertaken after obtaining permission from the Port Authority.

Main Anchorage Area: This anchorage area lies to the S.E. of Das Island and is for tankers, gas carriers and other large vessels. The area is encompassed by lines joining the following positions:

(a) Lat. 25° 08.0' N., Long. 52° 55.4' E. to
(b) Lat. 25° 07.2' N., Long. 52° 58.8' E. to
(c) Lat. 25° 04.5' N., Long. 52° 58.8' E. to
(d) Lat. 25° 04.5' N., Long. 52° 55.4' E. and finally to (a).

Optional Anchorage Area: An optional anchorage for deep draft vessels is located approximately 1 mile to 1.5 miles N.W. from No. 12 Deep Water Channel Buoy (Lat. 25° 12.2' N., Long. 52° 54.2' E.).

General Cargo Vessels: The offloading anchorage for general cargo vessels is situated approximately 6 cables South of Tanker Berth No. 2 in an area encompassed by a line joining the following positions:

(a) Lat. 25° 07.5' N., Long. 52° 53.00' E. to
(b) Lat. 25° 08.0' N., Long. 52° 53.00' E. to
(c) Lat. 25° 08.0' N., Long. 52° 53.41' E. to
(d) Lat. 25° 07.5' N., Long. 52° 53.63' E. and finally to (a).

Small Craft and Barges: This anchorage lies to the S.W. of Tanker Berth No. 2, in an area encompassed by a line joining the following positions:

(a) Lat. 25° 08.0' N., Long. 52° 53.00' E. to
(b) Lat. 25° 08.4' N., Long. 52° 53.00' E. to
(c) Lat. 25° 08.4' N., Long. 52° 53.23' E. to
(d) Lat. 25° 08.0' N., Long. 52° 53.41' E. and finally to (a).

CAUTION:

(a) Pipelines connecting the tanker berths to the shore lie close to the Northern boundary of this anchorage.

(b) Within the small craft anchorage area are mooring buoys, installed by the Company for their own usage. The number of buoys installed and their position are liable to be changed without promulgation of any notices.

The use of these buoys by any craft is subject to permission being granted by the Port Authority. Unauthorised occupancy of these buoys could result in strong action being taken against the craft, and any consequential damage/loss of earnings/incidental expenses etc. incurred by the Company will be for the account of the offending craft.

Holding Ground (Sea Bed): The sea bed around Das Island is rock, covered by a few inches of loose sand. Holding is poor and vessels are urged to exercise due care and pay out extra chain.

Wind and Tide: Prevailing winds are from the N.W. Rise of tide can be up to 2 m. but the usual variation is 1 m.

Also see "VHF".

PROHIBITED ANCHORAGES: Prohibited anchorage areas have been established at Das Island. The use of anchors within these areas is strictly prohibited.

Prohibited Anchorage – South of Das Island: A prohibited anchorage area is established to the South of Das Island in an area encompassed by a line joining the following position:

(a) Lat. 25° 08.38' N., Long. 52° 52.50' E. to
(b) Lat. 25° 08.00' N., Long. 52° 52.50' E. to
(c) Lat. 25° 08.00' N., Long. 52° 53.00' E. to
(d) Lat. 25° 08.50' N., Long. 52° 53.00' E. then to shore in
(e) Lat. 25° 08.50' N., Long. 52° 52.78' E.

Prohibited Anchorage – Tanker Berth No. 3: A prohibited anchorage area exists within a circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in Lat. 25° 08' 53" N., Long. 52° 54' 07" E. This is also a RESTRICTED AREA.

RESTRICTED AREAS: Restricted areas have been established at Das Island. Vessels/craft are only allowed to enter these areas for duly authorised operational purposes.

Restricted Area No. 1 and 2: Enclosed by a line joining the following positions:

(a) Lat. 25° 08.83' N., Long. 52° 52.68' E. to
(b) Lat. 25° 08.80' N., Long. 52° 53.10' E. to
(c) Lat. 25° 08.25' N., Long. 52° 53.30' E. to
(d) Lat. 25° 08.30' N., Long. 52° 53.50' E. to
(e) Lat. 25° 08.86' N., Long. 52° 53.30' E. to
(f) Lat. 25° 09.20' N., Long. 52° 53.30' E. to
(g) Lat. 25° 09.55' N., Long. 52° 53.20' E. to
(h) Lat. 25° 09.55' N., Long. 52° 53.00' E. to
(i) Lat. 25° 10.54' N., Long. 52° 53.00' E. to
(j) Lat. 25° 10.54' N., Long. 52° 52.20' E. to
(k) Lat. 25° 09.80' N., Long. 52° 52.20' E. to
(l) Lat. 25° 09.80' N., Long. 52° 51.85' E. to
(m) Lat. 25° 09.00' N., Long. 52° 51.85' E. then East to shore.

Restricted Area No. 3: A circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in position: Lat. 25° 08' 53" N., Long. 52° 54' 07" E. This is also a prohibited anchorage area.

MAX. SIZE: See "Berthing".

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are required to inform the Company if there is any sick person on board or if there has been sickness on board within the week prior to arrival. Pratique is granted by the Port Medical Officer normally through the Berthing Master.

Health Certificate with valid cholera inoculation (if coming from cholera-infected areas) is compulsory.

RADIO: *Arrival Messages:* All vessels calling at Das Island Petroleum Port must adopt the following ETA procedures:

1. ETA and updates are to be sent 72 hours, 48 hours and 24 hours before arrival at Das. Telexes to be directed to Port Officer, Das.

2. The initial ETA message should normally contain ETA Das Island and the information in the Pre-Arrival Message – See "Pre-Arrival Information".

In order to expedite Pilot attendance Masters should endeavour to confirm their final ETA to Das Island Port Control on VHF Radio Channel 16 and 12, six hours prior to arrival at the anchorage.

Also see "Berthing" – Tanker Berth No. 3.

VHF: Das Marine maintains a 24 hour listening watch on VHF Channel 16 and works Channels 12 and 74.

All communications other than Terminal VHF should be sent through "Bahrain Radio" (A9M).

Das Island radio mast is installed in position: Lat. 25° 08' 30.396" N., Long. 52° 52' 43.903" E. Red lights visible all round the horizon are established at the top of the mast, 81.8 m. above chart datum.

Vessels Anchoring: Vessels anchoring to await berthing instructions must advise "Das Marine" via VHF Radio of:

(a) Anchoring time (Local Time is GMT plus 4 hours)
(b) Anchoring position (bearing and distance from Tanker Berth No. 2).

All vessels at anchor must keep a listening watch on VHF Channel 16.

When a vessel leaves the anchorage it must advise "Das Marine" via VHF Radio of:

(a) Time departed anchorage.
(b) Reason for departing.

Also see "Pre-Arrival Information".

RADAR: Not available.

TUGS: *Tugs and Mooring Launches:* Three Fire Fighting, Pollution Control and Salvage Tugs are generally available at Das Island to assist in berthing/unberthing vessels at the bulk petroleum and LNG/LPG facilities.

Minimum of 3 tugs used for berthing and 2 tugs for unberthing at Berths No. 2 and 4 and minimum of 1 tug used for berthing at Berth No. 3 (SPM).

NOTE: Only tug's towing equipment shall be used for these operations and only in an emergency situation and in order to avert a potential disaster may ship's equipment be considered for use.

Mooring launches are available for berthing/unberthing operations and for the transportation of personnel.

BERTHING: Tanker Berth No. 1 has been demolished and no longer exists. All structures to this berth have been cleared to sea bed and no obstructions remain. The pipelines still exist to the original berth platform location.

Tanker Berth No. 2:

Platform position: Lat. 25° 08' 39" N., Long. 52° 53' 14" E.

General: This is a fixed platform berth situated approx. 2,400 ft. (750 m.) East of Das Island. Vessels berth alongside 4 flexible dolphins, and 6 mooring dolphins are provided to receive moorings.

Berthing limitations:

(a) Ballasted or partially loaded tankers up to a maximum of 165,000 L/T displacement.
(b) Fully loaded tankers up to 130,000 L/T S.D.W. provided the displacement does not exceed 165,000 L/T.
(c) Vessels with a max. draft not exceeding 56 ft. (17 m.).

Minimum depth of water alongside is 67 ft. (20.4 m.) at datu and the maximum permissible sailing draft is 64 ft. (19.5 m.) a datum. It can be increased by up to 0.9 m. This will be dependen on local conditions prevailing at the time and will be subject to:

(i) Approval of P.P.A. Port Officer.
(ii) Possible suspension of loading to ensure topping-off coincide with H.W.
(iii) Any delays or costs involved shall be to Owner's account.

(d) Max. LOA 350.5 m.
(e) Max. freeboard 19.8 m., max. height of ship's manifold abov waterline is 21.34 m.

Moorings: A minimum of 8 mooring lines must be available at each en of the vessel.

General mooring pattern for vessels up to 130,000 L/T S.D.W.:
Forward: 3 head lines, 2 breast lines, 1 spring.
Aft: 3 stern lines, 2 breast lines, 1 spring.

General mooring pattern for vessels in excess of 130,000 L/T S.D.W
Forward: 3 head lines, 3 breast lines, 1 spring.
Aft: 3 stern lines, 2 breast lines, 2 springs.

Loading/Discharge Rates: Maximum cargo loading rate 32,00 bbls./hr. per 16 in. hose (4,200 t.p.h.), 4×16 in. hoses are available.

Control of Loading/Discharge and Safety: Loading/discharge mu proceed to a pre-declared plan. Co-ordination of loading/discharge wi be undertaken by the Duty Berthing Master, who will also conduct th necessary safety checks at frequent intervals.

Tanker Berth No. 3 (SPM):

Buoy position: Lat. 25° 08' 53" N., Long. 52° 54' 07" E.

Additional pre-arrival message: The following message will b transmitted to vessels which are nominated to berth at Tanker Berth No. Quote:

Present indications that vessel will berth at No. 3 SPM. Ship's derric crane should be rigged on port side.

Ship's manifold suitable for connection of up to 2×16 in. crude an 1×10 in. bunker hoses. Mooring and hose connection by ship's cre Mooring and hose connection equipment shipped on board after Berthin Masters board. Request accommodation be provided for 2 Berthin Masters whilst on board. Please confirm soonest SWL of hose handli crane/derrick and that suitable forward Panama/fairlead aperture minimum 24 in. horizontally and 18 in. vertically.

Unquote.

General: Tanker Berth No. 3 is a Single Point Mooring (SPM) situat approx. 7,500 ft. (2,285 m.) East of Das Island. The buoy is moored 94 ft. (28.65 m.) of water at datum, and is served by a 48 in. crude submarine pipeline and a 22 in. fuel oil (bunker) submarine pipeline.

Vessels will be required to be fitted with a hose handling crane/derr capable of plumbing at least 2 ft. outboard of the ship's side over th entire length of the portside manifold (including the bunker connectio Minimum SWL of the crane/derrick to be in accordance with the follow requirements.

Less than 100,000 L/T S.D.W. 8 tons.
100,000 – 300,000 L/T S.D.W. 10 tons.
Over 300,000 L/T S.D.W. 12 tons.

Berthing Limitations: Capable of accepting vessels up to 500,000 L displacement, subject to the following limitations: Maximum berthing dr of 72 ft. (22 m.). Maximum berthing displacement 410,000 long to Maximum sailing draft of 79 ft. (24 m.).

(See "Approaches" "Cautions" – Note: Actual depths over submar pipelines).

Mooring at SPM: The fixed mooring at Tanker Berth No. 3 is a 21 circumference nylon braidline rope, 160 ft. (50 m.) long, terminating a 3 in. diameter stud link chafing chain (See "Plan").

The vessel must have a suitable bow fairlead (24 in.×18 in.) to per direct connection of the 3 in. diameter stud link chafing chain to a S or similar O.C.I.M.F. approved bracket.

Loading Rates: The crude oil loading installation comprises 2×20 floating hose strings each terminating in 16 in. tail hoses. Flanges to BS 1560.

Various reducers/spool pieces are available, with prior knowledge vessel connections if different from shore fittings. Adequate ship cr and tools must be provided for the safe and efficient connection of hos There is no shore assistance for connecting/disconnecting of hoses

Maximum cargo loading rate is 46,000 bbls./hr. per 16 in. h (6,000 t.p.h.), 2×16 in. hoses are available.

Control of Loading and Safety: Loading must proceed to a pre-decla plan. Co-ordination of loading will be undertaken by the Duty Bert Master, who will also conduct the necessary safety checks at freq intervals.

LNG/LPG Berth No. 4:

Platform position: Lat. 25° 09' 22" N., Long. 52° 53' 08" E.

General: This is an ADGAS installation for the transfer of LNG/LPG related products. Movement of vessels to and from the berth governed by the Port Authority.

The berth is a fixed platform type and is situated approx. 4,30 (1,300 m.) N.N.W. from Tanker Berth No. 2 Platform. Vessels alongside flexible dolphins and 7 mooring dolphins are provide receive moorings.

Berthing Limitations: Capable of accepting vessels up to 100,00 displacement subject to a maximum draft alongside of 46 ft. (14 Minimum depth of water alongside is 49 ft. (14.95 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at eac of the vessel.

General Mooring pattern depends on vessel's size and type "Plans").

Loading Rates: Loading LNG/LPG and associated products responsibility of ADGAS. Maximum LNG loading rate is 10,500 cu Maximum LPG loading rate is 4,000 cu.m.p.h. Maximum Pentane loading rate is 10,000 bbls./hr. (1,200 t.p.h.).

Control of Loading: Co-ordination of loading is the responsibility of ADGAS. After the initial safety check by the Berthing Master, ADGAS Representative will conduct the necessary safety checks at frequent intervals. Please note however that the Master can request the services of the Berthing Master in an emergency to take his vessel off the berth.

Sulphur Berth No. 5: This is a fixed platform berth situated in Lat. 25° 08.9' N., Long. 52° 53.2' E.

Vessels berth alongside two flexible dolphins provided with suitable fendering and 4 mooring dolphins, all provided to accept moorings of up to 60 tonnes breaking strain.

Limitations:

(a) Max. arrival displacement 8,500 tonnes.
(b) Max. LOA 130 m.
(c) Max. draft 10.0 m.
(d) Range of manifold – minimum 1.6 m, maximum 6.8 m.
(e) Max. bow to manifold 57 m.
(f) Minimum depth alongside 16.0 m.

Mooring Arrangements:

2 each of headlines and stern lines.
2 each of breasts.
2 each of springs.

Loading: 1×8 in. loading arm fitted with Camlock coupling is provided, heat traced and fully insulated. Maximum loading rate is 700 cu.m./hr.

Small Boat Harbour : Das Island Small Boat Harbour is situated at the South of Das Island. There are a total of 14 berths available at this time, usage of which is governed by the Port Authority/ADMA-OPCO.

Eastern Extension: Consists of 2 berths (No. 1 and 2) which are reserved for use by ADMA – OPCO and direct hire deep sea tugs, also for the importation of petroleum products. Maximum draft permitted is 15.5 ft. (4.7 m.).

Inner Harbour: Consists of 12 berths (No. 3 through No. 14). The facilities are reserved for ADMA – OPCO small craft, Government craft and contracted craft for the loading/discharge of materials and supplies. The maximum permissible draft is 9 ft. (2.7 m.).

GENERAL CARGO OPERATIONS: No loading/unloading facilities exist in the port area for cargo vessels and such vessels must provide all equipment and machinery to facilitate transfer of cargo to/from barges, lighters etc., at the designated anchorage area.

Cargo Manifests: One original and two copies of General Cargo Manifests are required to be supplied by the vessel.

Discharging/Loading: Vessels should arrive with all derricks etc., rigged and ready for cargo handling. Barges and associated craft must satisfy the mandatory requirements of the Port Authority, the Consignee being responsible for the provision and control of barges and associated craft. Cargo transfer will normally be carried out continuously dependent on weather conditions.

Dangerous Cargo: The Port Authority must be informed of any dangerous cargo carried in any vessel arriving within the port area whether it is intended for discharge at Das Island or not. Masters of vessels are requested to confirm that any dangerous cargo being carried is stored in accordance with the "Recommendations for the Carriage of Dangerous Goods in Ships" by the United Kingdom Department of Transport or other recognised authority.

CRUDE OIL LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40° (approx.), and Umm Shaif Crude of 37° (approx.).

Associated product available at this time is Condensate Blend of API 60° (approx.).

All tankers of 70,000 long tons s.d.w.t. must comply with the IMO 1978 protocol and must employ inert gas system.

Masters of vessels arriving to load Condensate Blend cargoes must sign a Declaration (019-MAR-19) to signify that they realise they are loading a highly volatile cargo which contains dangerous quantities of Hydrogen Sulphide (H_2S) in the gas evolved from the cargo.

BALLAST: There are no facilities for receiving vessel's ballast ashore for treatment. All vessels must have clean ballast for over-board discharge. Clean ballast implies oil-in-water content of not more than 15 p.p.m.

Masters of vessels arriving at Das Island will make a pre-berthing declaration regarding ballast (PPA – Vessel Declaration Book).

MEDICAL: A Company Medical Officer and small hospital are available, subject to the Company's discretion, to vessel's crews. Charges for attention, treatment and associated facilities are for the vessel's account.

Masters of vessels must take precautions against heat exhaustion and heat stroke.

Requests for medical attention must be made to the Agency, or through the Duty Berthing Master. Port Authority consent must be obtained.

Personnel allowed ashore for medical attention must carry with them Passports/Seaman's Card and Health Documents and, if necessary, be accompanied by an interpreter (English or Arabic). An Agency representative will accompany them to the Hospital, but they will not be permitted to visit other Das Island facilities.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Fuel oil bunkers are not available at all tanker and liquid gas berths.

Small craft on charter to ADMA-OPCO are able to obtain limited supplies of diesel oil, the facility is only available through prior contractual agreement and must be loaded at the small boat harbour.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

REPAIRS: No repair facilities are available at Das Island. No repairs are permitted within port limits without prior written permission of the Port Authority.

DRY DOCKS: None.

SURVEYORS: Cargo surveyors available through Agent.

GANGWAYS: Shore gangways are provided at Berths No. 2 and 4, vessel to provide access steps from gangway at ship's rail. At Berth No. 3 vessel must provide accommodation ladder on both sides of the vessel for access.

CUSTOMS ALLOWANCES: No restrictions for tobacco or liquor onboard. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is strictly prohibited.

REPATRIATION: There are no facilities for crews of visiting vessels to join or leave vessels at Das Island. Repatriation for medical reasons may be arranged at Master's request with the recommendation of the Das Island Resident Medical Officer, and the consent of the Port Officer and the Chief of Police.

AIRPORT: ADMA operate a private airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: All emergencies: No. 2 Tanker Berth, Tel: 63333. No. 4 LNG/LPG Berth, Tel: 62222.

TELEPHONES: No onboard facilities – fixed berths are linked to Island telephone system. On LNG/LPG Berth No. 4 a ship/shore telephone connection is available.

BANKS: National Bank of Abu Dhabi, Das Island, Abu Dhabi, U.A.E.

STORING: Not available.

SHORE LEAVE: No shore leave is permitted at Das Island. Any crew member who comes ashore unauthorised will be considered as having entered the UAE illegally and as such will be liable to a heavy fine and/or imprisonment.

Shore visit for medical reasons, and in exceptional circumstances as required by the Petroleum Ports Regulations, may be permitted with prior arrangement. The Port Authority must give express consent.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

REGULATIONS: No cameras allowed on the Island – high security area.

GENERAL: All vessels entering the port of Das Island must comply with the International Agreement on Safety of Life at Sea (SOLAS) and its amendments and all tankers with the IMO 1978 Protocol.

The Masters of tankers/gas carriers must comply with the following:

Pre-Berthing Declaration and Inspection: All vessels arriving at the Port of Das Island must be suitably ballasted and/or trimmed for berthing with regard to weather and existing circumstances.

All vessel's personnel must be familiar with the Das Island Safety Requirements and other applicable Standing Instructions.

Safe and adequate access to the vessel must be provided for the Berthing Master. If the Berthing Master considers the means of access unsafe or unsuitable, the vessel will be delayed until such time as proper access is provided. Any loss will be to the vessel's account.

The requisite initial documents must be completed in full, signed and handed to the Berthing Master prior to commencement of berthing operations.

Permission to berth will not be granted unless the Berthing Master is satisfied that the vessel can safely complete all parts of the operation, including but not limited to, berthing, ballasting, deballasting, cargo transfer and sailing. If for any reason it is deemed necessary to refuse permission to berth, the Port Authority will be informed and a detailed inspection of the vessel will be undertaken. Shortcomings, etc. will be noted and the Master informed of them. If the vessel is unable to rectify the identified faults, it will be removed from the Port Area. Owners/Charterers will be notified accordingly.

Fire Wires (Emergency Towing Wires): Emergency towing/fire wires of sufficient strength and construction are to be provided and secured forward and aft, on the offshore side of the vessel, with the towing eye maintained at 6 ft. (2 m.) above the water level.

Access to Vessel: While at the loading berths all vessels must provide an accommodation/pilot ladder suitably positioned and maintained at 6 ft. (2 m.) above the water level on the offshore side of the vessel.

M.E.N.A.S.: ADMA-OPCO Agency Section is a collection agency for Middle East Navigation Aids Service (M.E.N.A.S.) dues and, on the authority of the Master, dues payable to M.E.N.A.S. are collected and remitted on behalf of the vessel.

Courtesy Flag: The correct courtesy flag for vessels visiting Das Island is the flag of the United Arab Emirates. This flag may be obtained from the Agents.

Notice of Readiness: Prior to commencement of any transfer operation within the Port of Das Island, the Master shall tender, to the Company, a written Notice of Readiness to load/discharge, duly timed, dated and signed by the Master. Receipt of such notice does not necessarily imply acceptance.

Early Departure Procedure: E.D.P. is available to all tankers at Das Island. Tankers not accepting E.D.P. are generally unberthed after completion of transfer and must proceed to the Anchorage Area to complete documentation, where an agent will board under safe access; a boat/tug will be used by agent for transportation with a hire rate based upon the hourly rate.

OIL POLLUTION: Any incident of pollution, no matter how small it may be, from a vessel within the Port of Das Island is a contravention of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973.

In the event of the escape of oil or oily water from any source, operations must be suspended immediately, and every effort made to identify, stop, contain and clean up the pollution. The Port Authority must be informed immediately via the Duty Berthing Master, in order that the Pollution Contingency Plan can be initiated. PPA – Das are very strict regarding environmental pollution.

Transfer operations will not be resumed until such time as the Berthing Master and the Port Authority are satisfied that the cause of pollution no longer exists and that the affected area is sufficiently cleaned and safe. Oil Pollution incidents that occur within the Port of Das Island will be fully documented and the necessary documents (019-MAR-41) signed by the Master before transfer is resumed.

Masters of vessels/craft are warned that any breach of the provisions of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973 will render themselves liable to prosecution.

Pollution: The dumping of waste, dangerous, toxic or other hazardous material within the Port of Das Island is strictly prohibited.

AUTHORITY: Abu Dhabi National Oil Company – Petroleum Ports Authority (ADNOC – P.P.A.) Das Island, P.O. Box 898, Abu Dhabi, U.A.E. *Tel:* (02) 6068376. *Telex:* 22284 ADMA EM, 22215 ADNOC EM. *Cables:* ADNOC. *FAX:* Abu Dhabi (02) 660106, 6068445. *Contact:* Captain A.H. Hamdy and Captain M.A. Shahba, Port Officers, Das Island.

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: U.A.E. and Dubai.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 2 copies Dangerous Cargo List, Stowage Plan in duplicate, Hatch List in duplicate, 7 copies of Cargo Manifests, 1 copy of each Bill of Lading. On arrival, 4 Crew Lists required.

Immigration: Vessels of less than 3.0 m. draft are expected to berth and report at the Immigration Station on the Customs Wharf to report In and Out. Larger and deeper draft vessels are cleared In and Out by Agents.

APPROACHES: Dubai Beacon Fl. 3 Sec. Port Rashid Lee Breakwater 25° 16.77' N., 55° E., thence by 5.5 metre channel parallel to the breakwater, entry dolphins lit. Channel depth maintained centre line though opening spans of Al Maktoum and Al Garhud Bridges beyond Al Jadaf Ship Lift in Khor Dubai Lagoon.

PILOTAGE: No organised Pilot service, but Pilot can be arranged by Agents.

ANCHORAGE: Marked by lightbuoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of lightbuoy in approx. position Lat. 25° 17' 4" N., Long. 55° 16' 16" E. Depth 36 ft. to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request Free Pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive/sail at any time.

Departure: No Port Clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: "Khor Dubai" R/T (VHF MF/SSB) near entrance, 24 hour watch on 2182 kHz (MF/SSB), Channel 16/14 VHF. Controls movements and berthing, broadcasting navigation warnings and weather forecasts.

TUGS: Required, on basis of overall length, for Northern reaches and bridges, details available from Khor Dubai Radio and Agents.

BERTHING:

Khor Dubai: 2,300 m. of unnumbered berthing exists on the West Bank of the Khor and 3,300 m. on the East Bank. Depth between 3.0 m. and 5.5 m. Details from "Khor Dubai" Radio. Whereabouts of vessel to be reported on berthing.

Hamriya Port: Main Breakwater Light 25° 18' N., 55° 20' E.

Flag: UAE and Dubai.

Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Approach channel and entrance dredged to 6.0 m. Breakwaters are lit.

Pilotage: No organised Pilot Service, but Pilots can be arranged by Agents.

Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 450 m. in length with a draft of 4.5 m., 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: Required on basis overall length as instructed by "Khor Dubai" Radio and arranged by Agents.

Radio: "Khor Dubai" Radio (VHF MF/SSB) near Khor mouth, the station controls movements, etc. in Mina Hamriya. 24 hours watch on 2182 kHz. and Channels 16 and 14. Navigation Warnings, weather forecasts, etc. are also broadcast.

The Port Signal Station (call sign: "Khor Dubai") equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 kHz. Signal station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is mad by Port & Customs Office and vessels may directly order the requirement or through Agents.

Fuel: E.G.P.C. supply fuel at bunker point opposite entrance.

Cargo Handling: Port is not involved in the cargo discharge operation

There is no equipment available in the port such as cranes, forkli etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted o direct delivery basis only.

Stevedores: No stevedoring company in port, labour arranged by Agen

Telephones: No connections at the quays. However, there ar telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all Passports and Seaman's Books shoul be surrendered to the Customs Office situated in the port area wi 3 copies of Crew List against which shore passes issued. Before sailin of the vessel, a clearance should be obtained from the Port & Custom Office (Launch Section) and produced to the Customs Office for releasin the Seaman's Books/Passports.

Lay-By/Laying-Up Berth: 16 bollards available on Lee Breakwater fo Mediterranean Moor of Lay-by/Lay-up vessels.

Port Authority: Department of Ports & Customs, Government of Duba

DISCHARGE TURN: Priority of discharge given to ships carrying ma and/or passengers for Dubai. Ships carrying less than 100 weight o measurement tons have priority and are supplied with one barge fo discharge of cargo immediately on arrival, whether turn is in force o not. Should there be congestion, Agents require Stowage Plan showin clearly that all Dubai cargo is freely available and Master's signature o a request for discharge turn. Based on this, vessels will be registere for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for tur ships may proceed to other ports for discharge, but must return Duba prior time and date given, otherwise turn is lost. Particular cargoes fo H.H. The Ruler have priority, This should be evidenced by Manifes which will be produced to Customs Authorities in Dubai for approva The cargoes must be accessible for immediate discharge, which shou be verified by stowage plan.

STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerk supervisors, etc., will be supplied from shore at the same time as shi are supplied with barges. These people working under vesse supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hr to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to g stevedores to work third shift unless ship will complete within reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men fro shore but food only to supervisors, tally clerks, watchmen and foreme

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Mo medicines available at fairly low prices. Dentist also available. Walki cases should be brought ashore *in the morning* for treatment, but emergency, a doctor will board the ship.

TANKERS: See "Port Rashid".

FRESH WATER: Supplied at the Bunker Berth, otherwise supply is b road tanker.

FUEL: 3 small vessel bunker berths by Al Shindaga Fish mark otherwise refuelling carried out by road tanker.

FIRE FIGHTING: No facilities available at anchorage.

CONSULS:

Egypt
Great Britain
India
Iran
Italy
Kuwait
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Switzerland
U.S.A.

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and ra technicians capable of carrying out extensive repairs availa Underwater cleaning, repairs and other works connected with this a available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: Two ship-lifts of 450 tons and 2,850 tons (Nomina respectively, plus adjacent berthing, side travellers, etc., are installe Al Jadaf in Khor Dubai Lagoon on the North West Bank. Over five s and engine repair companies have workshops in this compound. *Br transits* through opening span regulated by time and tide, are arran with Police/Ship Docking Yard by Agents.

SURVEYORS: Lloyd's.

CUSTOMS ALLOWANCES: *Tobacco:* 1,000 cigarettes or 200 ciga 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne not more than 150 grams of perfume. *Currency:* Unlimited.

REPATRIATION: Visa is required for non-UAE citizens visiting D for a period exceeding 7 days. Agent can assist provided com Passport details given well in advance. Excepted are British Sub with right of abode in the U.K. who are permitted to remain in U without visas for a period of 1 month. For temporary visitors of d nationalities the Agent can arrange under its sponsorship transi valid for 7 days provided the person holds a ticket showing a conf flight out of U.A.E. However, person must leave U.A.E. via airport th which he entered.

When advise arrival flight details also advise Seaman's Book nu and nationality.

Seven days' transit visa:

From 1st February, 1985 a new form will be used by the Immigration Authorities in Dubai for persons entering Dubai on Transit Visa.

As the form has to be typed out in both English and Arabic it is essential that full details of arriving persons are in hand at least 48 hours prior to arrival.

The information required is as follows:

1. I, the undersigned wish to sponsor the undermentioned who wishes to enter the country for ....
2. Name of the sponsored................Father's Name ....
3. Nationality ....Passport No........................
Category: Normal/Diplomatic Service.
4. Place and Date of Issue.................Expiry Date ....
5. Place and Date of Birth..................Profession ....

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays, End August. 1st November*; 21st November*; 2nd December; 25th December.

*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid Passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The Passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

Ship Spares in Transit: Agents in Dubai advise that spares arriving in Dubai even with valid invoice, certificates of origin and packing lists attached are now opened by the Dubai Airport Customs. All Owners and operators are thus warned not to include any items which are banned in boxes containing spare parts as if detected they will be confiscated.

Further to the above, Agents give below a list of prohibited articles:

(a) All pornographic literature, videos, films, pictures.
(b) Alcohol.
(c) Narcotic drugs.
(d) Wireless transmitters.
(e) Firearms and ammunition.
(f) Products of Israeli – blacklisted manufacturers.
(g) Exposed cinematographic (movie) films.
(h) Political and religious literature.

– need prior approval from the Ministry of Information. The Customs are particularly sensitive about video tapes and when found in luggage they are subject to check. The checking is taking time and passengers are kept waiting sometimes for hours. To avoid trouble and irritation strongly recommend that crew arriving Dubai should be advised by principals not to carry any video tapes.

AUTHORITY: Government of Dubai, Department of Ports and Customs, Marine Adviser's Office, P.O.Box 2001, Dubai, United Arab Emirates. *Tel:* 457772. *Telex:* 49787 Khord Em. *FAX:* 00971-4-450810. *Contact:* Captain W. Nelson, Marine Adviser.

AGENT: Gulf Agency Company (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Tel: 457555 (24 hours service). After office hours 384541, 489212. Telex: 45448, 45809 "Gacdb Em". Cables: "Confidence" Dubai. Fax: 457202, 450644. Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sing "Confidence Dubai".

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers and Ship-to-Ship transfers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah, Khor Fakkan and Mina Saqr (Ras Al Khaimah).

FATEH TERMINAL (offshore Dubai): 25.35 N. 54.25 E. (See Plan)

Oil Loading Terminal of the Dubai Petroleum Company (DPC).

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service (at the present time). However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week. Weather permitting, and providing berth available, tankers arriving within their laydays will normally be berthed on arrival.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh, S.W. Fateh, Falah and Rashid Fields. The terminal limits are bounded by the following co-ordinates:

(i)	Lat. 25° 38' 00" N.	Long. 54° 05' 16" E.
(ii)	Lat. 25° 40' 00" N.	Long. 54° 30' 00" E.
(iii)	Lat. 25° 15' 00" N.	Long. 54° 30' 00" E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

DOCUMENTATION: *Documentation and Ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SPM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

NAVIGATIONAL AIDS: All platforms, structures, SPMs and floating storage vessels are fitted with a white light Fl. "U" ev. 30 secs. vis. 5 miles and horn every 30 secs. sounding "U" in Morse.

Numerous working lights are also fitted on platforms, etc.

Six flares in position:

(1)	Lat. 25° 35' 50" N.	Long. 54° 25' 50" E.
(2)	Lat. 25° 35' 56" N.	Long. 54° 25' 20" E.
(3)	Lat. 25° 35' 48" N.	Long. 54° 25' 18" E.
(4)	Lat. 25° 29' 44" N.	Long. 54° 18' 29" E.
(5)	Lat. 25° 33' 30" N.	Long. 54° 11' 30" E.
(6)	Lat. 25° 21' 00" N.	Long. 54° 29' 00" E.

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (See "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

Lat. 25° 36' N. Long. 54° 31' E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Dubai Trade Centre Light is 298° true, distance 47.8 miles and from Jazirat Sirri Light 185.5° true, distance 18.2 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point moorings have been installed in positions:

SPM No. 1 Lat. 25° 34' 36" N. Long. 54° 28' 18" E.
Bearing 242° true 2.83 miles from anchorage.
Depth of water 150 ft.
The berth is normally restricted to vessels of less than 300,000 tonnes deadweight, but more than 70,000 tonnes deadweight.

SPM No. 2 Lat. 25° 35' 12.6" N. Long. 54° 24' 36.6" E.
Bearing 262° true, 5.85 miles from anchorage.
Depth of water 150 ft.
Berthing normally restricted to tankers of between 50,000 tonnes and 300,000 tonnes deadweight.

Also see "Max. Size".

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.
(c) The tanker is arriving within her accepted laydays.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

MAX. SIZE: Vessel size not to be less than 50,000 d.w.t. or more than 300,000 d.w.t. With prior terminal approval, vessels of up to 350,000 d.w.t.* may be accepted between the months of May and October.

* D.w.t. refers to conventional tonnage. Double hulled tankers and other vessels with reassigned Load Lines to incorporate Segregated Ballast Tanks (SBT) will only be accepted if their overall dimensions do not exceed those of similar sized conventional tankers.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 or 45423 DPC EM. Fax: (9714) 4062200.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (cali sign "A9M") which operates on a 24 hour basis.

Communications Within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 MHz). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on Channel 12.

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable UHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable UHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(i) Name of tanker.
(ii) ETA in GMT (Dubai time is GMT plus 4 throughout the year).
(iii) Quantity of cargo required.
(iv) Maximum loading rate.
(v) Deballasting time (if any).
(vi) Size of hose connections.
(vii) If vessel proceeding to any port(s) prior to Fateh, and if so, any delays anticipated.
(viii) If vessel is fitted with an OCIMF approved SPM/Mooring chain stopper.
(ix) Sailing draft and displacement.
(x) What helicopter landing facilities available.
(xi) Inert gas system status.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged and lowered down so the platform is not more than 10 ft. from the water and a short pilot ladder rigged to facilitate access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene or other man-made fibre.
(b) 2 messenger ropes, minimum lengths of 300 ft.
(c) Selection of shackles, wirestrops and tools.

When the approach to the terminal commences, the berthing tug will be available to assist in berthing. The method and position in which the tug will be utilised will be dependent upon the weather and tidal conditions prevailing. At this time, the mooring launch will prepare the mooring and standby at the SPM.

Approach to the SPMs necessarily involves passing, in close proximity, various platforms and other structures. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.

The mooring launch will be situated about 600 ft. from the SPM with a 10 in. circumference polypropylene pick-up rope secured to the main mooring, which consists of 2×18 in. circumference nylon ropes, connected to a standard O.C.I.M.F. chafing chain and a 40 ft.×3.5 in. circumference pick-up wire rope.

During the approach of the tanker towards the SPM, ship's crew, with the advice of the Mooring Master's Assistant (MMA) will prepare the forecastle for the mooring operation. This will include passing a messenger rope through the centre bow fairlead (or other fairlead designated by the MMA) taking the end to the after port corner of the forecastle and, from this point, lowering the end to the waters edge. The mooring attachment will also be prepared, and will be, in order of preference:

(a) Bow stopper (AKD).
(b) Towing bracket or futtoch (Smit).

Vessels which, in the Mooring Master's opinion, do not have a suitab method of attaching the mooring, will be refused permission to bert Should bitts have to be utilised, or should the towing bracket be locate at a substantial distance from the fairlead, wire snotters of 2 in. diamete and various lengths are available from the berthing tug.

Upon the close approach of the tankers bow, the mooring launch wi manoeuvre alongside the port shoulder and attach the mooring pick-u rope to the ship's messenger line. The tanker will then heave up th messenger and pick-up rope, carefully picking up the slack as the tanke approaches the SPM. The mooring launch will now be stationed at th end of the floating hose string in order to tow the hoses clear of th ship's side should this become necessary.

The pick-up rope should be continually hove in as the tanker nea the SPM. The distance between the bow and the SPM will b continuously relayed to the Mooring Master on the bridge by the MMA from the forecastle and by the berthing tug. When the pick-up wire ha been brought inboard through the fairlead, it may be necessary to adjus the direction of pull and assist the chain through the fairlead. Actio required by the tanker's crew in this respect will be advised by th Mooring Masters Assistant.

When the chain is inboard, depending upon the method of attachme available, the connection will be made. It should be noted that should a Smit Bracket or bitts be utilised, the first triangular plate on the chai must only be connected on tankers of less than 100,000 d.w.t. and o vessels of greater size, the chain must be hove in and the connectio made on the second, larger, triangular plate.

After the connection to the mooring is made, it may be necessary t run the engines astern to ensure the tanker does not contact the SPM The Mooring Master will then advise "Finished with Engines", but at n time during the tankers stay in port shall the engines be immobilised.

Shortly after the mooring operation is completed, the berthing tug wi be secured from the stern of the tanker on a long ships rope polypropylene if possible.

LOADING: *Lifting Hoses:*

SPM 1: Two 16 in. diameter hoses will be lifted by ship's gear on th port side. Each lift is 9 tons.

SPM 2: Two 16 in. diameter hoses will be lifted by ship's gear on th port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. The Moorin Master will advise the ship's officer in charge concerning liftin techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped wi the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., t efficiently effect the hose connection.

Flange Sizes: 16 in. – 12 in. reducers will come on board the tanke with the mooring gear thus enabling tankers with either 16 in. or 12 i ASA 150 lb. flanges to connect directly to the Terminal hoses. Flang size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flange are available if required to enable tankers with 12 in. – 10 in. manifo connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communicatio relative to the loading of the vessel shall be routed through the Moorin Master who will remain in contact with the Production Platform constant via portable UHF units. In case of temporary breakdown of the portab UHF circuit, contact may be continued on International Marine Channe 16 or 12 if the vessel is so fitted.

Failure of Communications: Should communication with the Productio Platform fail, loading will cease.

Emergency Shut-Down: An emergency cessation of loading may b effected by the ship's VHF Channel 16.

Cargo: Oil loaded at Fateh is Dubai Stabilised Crude with an averag API of 31.7. Loading temperature varies between 90°F in the Winter 105°F in the Summer months. The oil is relatively free of sediment a low in wax and asphaltenes.

Loading Rate: At SPM No. 1 the maximum loading rate is 60,0 bbls.p.h. At SPM No. 2 the maximum loading rate is 70,000 bbls.p.h

Terminal equipment dictates a minimum loading rate of 40,000 b.p through 2×16 in. hoses. Vessels which cannot accept this loading ra or 2 hoses will be rejected.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility the ship's Master to see that no crude (or bunkers', diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship whilst in t area. Drip pans should be used, especially when disconnecting hos in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overs scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are slop tanks or facilities for receiving dirty ballast. Tankers must arrive w clean ballast. In the event a tanker does have dirty ballast it will not allowed to be pumped overboard. The dirty ballast will be collected i one tank, measured and left aboard.

Terminal Regulations require that tankers remain seaworthy a manoeuvrable throughout their stay in port. To comply with t requirement, the propellor must remain fully immersed, and a stern-t in excess of 1.5% of the tanker's length must never be allowed develop.

Discharging Ballast at Night: During the discharge of ballast in darkne the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are available. In emergencies requiring hospitalisation, the patient wi taken by boat from the tanker to the Production Platform, hoisted to upper deck of the platform and flown by helicopter to Dubai. shipowner will be charged for all expenses incurred.

DENSITY: 1030.

FUEL: Bunker supply not available at Fateh.

Fuel oil (IFO 180 cSt) can be arranged at Jebel Ali. Gas oil can be arranged.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None, offshore terminal.

CURRENCY: U.A.E. Dirhams (Drhs).

GENERAL: The following are not available at Fateh Terminal: Fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

Charts: Charts covering the approach to and the area of Fateh Marine Terminal are:

British Admiralty Nos. 2837, 2887, 2888, 2889.
U.S. Hydrographic Office No. 3647.

AUTHORITY: Dubai Petroleum Company, P.O.Box 2222, Dubai, U.A.E. *Tel:* Dubai 442990. *Telex:* 45423 or 45557 Dpc EM. *Cables:* Dupetco, Dubai. *FAX:* 4062200. *Contact:* Captain F. Maclennan, Marine Superintendent. Captain J.A. Petty, Mooring Master.

AGENT: Gulf Agency Co. (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (24 hours service). After hours 489212. Telex: 45448, 45809 (Gacdb Em). Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sign "Confidence Dubai". Fax: 457202, 450644.

Operators of ships' supply service and shipping agency; crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil as well as arranging of bunkers and Ship-to-Ship transfers.

Owners, Operators and Masters are welcome to contact GAC Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Khor Fakkan, Fujairah and Mina Saqr (Ras Al Khaimah).

FUJAIRAH: 25.10 N. 56.21 E. (See Plan)

LOCATION: Lat. 25° 10.5' N., 56° 21' E., 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

PORT LIMITS: Within area bounded by a line drawn:–

Lat. 25° 09' 35" N., Long. 56° 21' 00" E. due North to Lat. 25° 10' 05" N., 56° 21' 00" E., thence due West for 65 m. to the West side of the old road and following the West side of the old road to Lat. 25° 11' 30" N., thence due East to Lat. 25° 11' 30" N., Long. 56° 22' 30" E., thence South to Lat. 25° 09' 00" N., Long. 56° 22' 30" E., thence due West to Lat. 25° 09' 00" N., Long. 56° 21' 30" E., thence due West to Lat. 25° 09' 00" N., Long. 56° 21' 00" E. and include all waters, land and installations contained within that area.

DOCUMENTS: The provisional requirements are:–

Immigration:	Crew List	3 copies
	Passenger List	3 copies
Customs:	Crew List	2 copies
	Passenger List	2 copies
	Cargo Manifests	2 copies
	Alcoholic Beverages/ Bonded Stores List	2 copies
Port Operations:	Cargo Manifests	2 copies
	Stow Plan/Hatch List	2 copies
	Dangerous Cargo List	2 copies
	Transhipment Cargo	2 copies
	Heavy Lift List	2 copies
	Ro/Ro Discharge List	2 copies
For Inspection:	Last Port Clearance, Ship's Log.	
Certificates:	Safety Equipment, Construction, Load Line, Radio, Oil Record Book.	

All documents relating to cargo should be forwarded prior to vessels' arrival.

Also see "Notices".

PILOTAGE: Compulsory, except for 'Country Craft' and M.E.N.A.S. tender.

Notice of ETA and request for a Pilot must be made not less than 24 hours before ETA at Fairway Buoy via vessels' Agents. Pilot launch will keep listening watch on VHF Channel 16, 2 hours prior to ETA. Pilots work on VHF Channel 12.

The Pilot boarding point is 0.5 miles E.N.E. of the Fairway Buoy. Pilot boarding arrangements must be according to IMO Rules. Vessels awaiting inbound berth space within Fujairah must anchor East of Long. 56° 25' E. approx. 3 miles offshore. There is good holding ground in 40 m. to 59 m. of water.

ANCHORAGE:

Notice to Mariners No. 42 – Amendment to Fujairah Offshore Anchorage Area:

The Fujairah Ports Authority has made amendments to the geographical co-ordinates of Fujairah Offshore Anchorage due to reasons given below:

(1) Directive has been received from the U.A.E. Coast Guard, which advise us to prohibit vessels anchoring within the Coastal Clear Zone that extends 4 nautical miles seawards from the shore line.

(2) To reduce congestion experienced currently at the 'B' Anchorage area and problems of manoeuvring reported by the Shipmasters, particularly of VLCC and ULCC vessels.

Listed below are the revised geographical co-ordinates of the anchorage area, designated for vessels to anchor according to their nature of calls.

(1) "A" Anchorage: For vessels awaiting orders or long term expected stay. There will be a minimum manning scale for these vessels: 1 qualified Master, 1 experienced Deck Officer, 1 qualified Engineer, 1 Motorman, 2 A.B's and 1 Cook.

Total (13) anchorages.

Co-ordinates:	Lat. 25° 18' N.,	Long. 56° 26' E.
	Lat. 25° 14.5' N.,	Long. 56° 26' E.
	Lat. 25° 14.5' N.,	Long. 56° 27.5' E.
	Lat. 25° 15' N.,	Long. 56° 27.5' E.
	Lat. 25° 15' N.,	Long. 56° 28' E.
	Lat. 25° 18' N.,	Long. 56° 28' E.

(2) "B" Anchorage: For vessels that require bunkering services and S.T.S. operations.

Total (30) anchorages.

Co-ordinates:	Lat. 25° 15' N.,	Long. 56° 27.5' E.
	Lat. 25° 10.5' N.,	Long. 56° 27.5' E.
	Lat. 25° 15' N.,	Long. 56° 32' E.
	Lat. 25° 10.5' N.,	Long. 56° 32' E.

(3) "C" Anchorage: For vessels that require offshore services such as crew changes, stores, water, underwater hull clearing, etc.

Total (13) anchorages.

Co-ordinates:	Lat. 25° 14.5' N.,	Long. 56° 25.5' E.
	Lat. 25° 10.5' N.,	Long. 56° 25.5' E.
	Lat. 25° 14.5' N.,	Long. 56° 27.5' E.
	Lat. 25° 10.5' N.,	Long. 56° 27.5' E.

(4) "D" Anchorage: For vessels carrying hazardous cargoes and explosives.

Total (6) anchorages.

Co-ordinates:	Lat. 25° 18' N.,	Long. 56° 28.5' E.
	Lat. 25° 15.5' N.,	Long. 56° 28.5' E.
	Lat. 25° 15.5' N.,	Long. 56° 30.5' E.
	Lat. 25° 18' N.,	Long. 56° 30.5' E.

(5) "W" Anchorage: For vessels waiting for inbound berth space within Fujairah Port.

Total (6) anchorages.

Co-ordinates:	Lat. 25° 10.5' N.,	Long. 56° 23.5' E.
	Lat. 25° 09.5' N.,	Long. 56° 23.5' E.
	Lat. 25° 09.5' N.,	Long. 56° 26.5' E.
	Lat. 25° 10.5' N.,	Long. 56° 26.5' E.

Vessels arriving to anchor will be allocated their respective anchorage area, and geographical position plus bearing and distance from the North Breakwater Light.

Vessels arriving at the anchorage must have to inform, by VHF, the Fujairah Port Control, 2 hours before their arrival and provide following information: Vessel name, vessel type, vessel condition, anchorage position and time, vessel agency, nature of call, last port, next port and ETD. Also, when sailing from the anchorage area, the vessel has to report the departure time and destination.

Harbour Master's Notice to Mariners No. 43, dated 26th April 1995.

"Please note that the following should be considered as an addendum to our Notice to Mariners No. 42, dated 14th April 1993 (See "above").

1. All LPG/LNG carriers calling at Fujairah offshore anchorage area, whether in loaded or ballast condition, must use 'D' Anchorage Area for required offshore services that include bunkering, de-slopping, etc.
2. We strictly prohibit rendezvous-ing between steaming vessels or between steaming vessels and service boats at Fujairah offshore anchorage area.
3. Movements of vessels in double banking position (side-by-side) are prohibited at Fujairah offshore anchorage area.
4. Every vessel approaching Fujairah offshore anchorage area shall, at all times, be liable to maintain proper actions and apply rules of the "International Regulations for Preventing Collisions at Sea" for averting the risk of collision.
5. Permission to anchor must be obtained from the Port Control Tower prior to anchoring at Fujairah offshore anchorage areas."

Agent's Comment: The Port of Fujairah Authority is endeavouring to improve control of offshore traffic.

In an effort to accomplish this, the port's intention is to introduce a safe passing distance between vessels anchored in the designated areas and vessels on passage (B.A. Chart No. 3521).

Vessels underway and not intending to anchor should, therefore, maintain a minimum safe passing distance of 10 nautical miles from Fujairah Port Breakwater, which will ensure a 1 mile separation from the seaward limit of 'B' Anchorage.

GAC's offshore supply service rendezvous for running vessels will now be located at a position 10 nautical miles East of Fujairah Port Breakwater, in position Lat. 25° 10.5' N., Long. 56° 33.5' E.

Vessels at anchor and vessels in transit will thereby benefit, since it will be unnecessary for moving vessels to pass through the busy designated anchorage areas.

The Port Authority does not require vessels in transit, using ships' supply services, to report arrivals/departures, but they must be outside Fujairah offshore anchorage area.

Vessels requiring Port Authority certification recording arrival/ departure dates and times must, however, anchor in the area designated by the Port Controller and should report ETA, as per Notice to Mariners No. 42.

"Lay-up at Fujairah Offshore Anchorage Area: Please be advised that scrap vessels, VLCCs and ULCCs will not be allowed to be laid up at Fujairah Offshore Anchorage Area".

Also see "Notices".

RESTRICTIONS: *Draft Restrictions – Main Quay:*

1. Vessels with a draft of less than 11.5 m. can be moved at any state of the tide.
2. Vessels with a draft of between 11.5 m. and 12.0 m. can only be moved from 2 hours before to 4 hours after predicted HW.
3. Vessels with a draft in excess of 12.0 m. can be moved only at a time agreed by the Harbour Master.

Any variances to the above restrictions will be agreed by the Harbour Master, Port of Fujairah.

MAX. SIZE: Ships up to 280 m. LOA and 12.5 m. draft can be accepted.
HEALTH: Normal quarantine regulations apply. Radio Pratique can be obtained, via the vessel's Agent, providing the Master can state that no serious illness has occurred on board during the preceding 30 days.
RADIO: *Notice of Arrival:* Vessels should advise their ETA, Fujairah, at least 72 hours prior to arrival, giving draft, LOA and details of cargo operations. Agents should re-confirm 24 hours prior to vessels' arrival.
Also see "Health".
VHF: Fujairah Port Authorities, call sign "Fujairah Port Control" equipped with Marine Band VHF Radio Telephone Transceiver maintains continuous watch on Channels 16 and 12.

Vessels should establish radio contact with Fujairah Port Control Station if they intend anchoring in Fujairah Waters or are proceeding to Fujairah Port.

Following Channels are used by the Fujairah Port Authorities:

Station	*Hours of Watch*	*Channel*	*Function*
Fujairah Port Control	24	16	Distress, Safety and
		10	Calling Frequency
Fujairah Port Operations	24	12	Pilot Services
Tugs	24	10 & 12	Berthing/Unberthing
Working Channels	24	9, 10, 11, 12	

Vessels in the Fujairah area are reminded not to use the above Channels except for the purposes specified.
RADAR: Port Control is equipped with radar. The pilot launch is equipped. However, fog is almost unknown though visibility is restricted by dust mainly – July and August.
TUGS: The use of tugs will be compulsory except at discretion of the Harbour Master. 2 tugs of 16 tonnes bollard pull are in operation fitted with foam monitors. A third tug of 31 tonnes bollard pull is also in service.
BERTHING: There are 4 berths on the Main Quay 780 m. long with a least depth of 12.5 m. for 600 m. and 10.6 m. for 180 m. This is a concrete capped and concrete blockwork constructed quay with rubber fendering.

There is a further 290 m. of quay with a least depth of 7 m. suitable for country craft and shallow draft vessels. This is a concrete capped sheet piled quay with continuous timber fendering.

There are 2 jetties for rock and aggregate cargoes.

There is a transit shed with 12,000 sq.m. of floor space with LCL facility.
PORT EQUIPMENT:

Equipment	*No.*	*Capacity*
Quay Cranes	3	40.0 tons
Quay Cranes	3	40.6 tons
R.T.G.	11	40.6 tons
Mobile Cranes	2	25 tons
Toploader	7	35/40 tons
Empty Handlers	3	12 tons
Forklifts	3	5 tons
Forklifts	5	2.5 tons
Ro-Trucks	37	50 tons
Trailers	40	1×45, 1×40 or 2×20 tons
Low Bed/Goose Neck Trailers	18	Different capacities.

Quay Crane Limits:

Maximum SWL:	3×40 tons	3×40.6 tons
Outreach from face of fenders:	2×34.5 m., 2×40 m.	2×40.7 m.
Height from Quay to U/Side of Spreader:	2×26.2 m., 1×29.3 m.	1×30 m.

Reefer Storage: 152 points × 220 volts. 80 points × 440 volts.
Open Storage (container/general cargo): 54,000 sq.m. paved storage area.
STEVEDORES: The port will work on a 24 hour 7 day week basis. Requirements for port labour must be submitted to Operations Department by 1200 hrs. prior to to day required.
MEDICAL: Hospital facilities are available.
FRESH WATER: Good potable water is available and supplied by road tanker or water barge by prior arrangement through agents.
FUEL: Gas oil available ex-jetty. Fuel oil by prior arrangement through local Agent – supplied by bunker barge.
REPAIRS: Routine maintenance of medium engineering type is available. Offshore hull cleaning and repairs available.
SURVEYORS: Classification Societies and Surveyors can be brought from Dubai at short notice.
HATCHES: Rigging ship's gear, opening and closing of hatches, are the responsibility of the vessel.
REPATRIATION: Permissible via Dubai and Sharjah Airports, about 1.5 hours by road. Valid Seaman's Book and Passport required.
AIRPORT: Fujairah International Airport is a few minutes drive from City Centre. Gulf Air operate a flight on Thursday to and from Bahrain.
DRY DOCKS: None.
TIME: GMT plus 4 hours permanent.
SHORE LEAVE: Shore leave is permitted.
HOLIDAYS: 1st day of Id Al Fitr, 1st day of Id Al Adha.
TELEPHONES: This service will be available aboard ships at the quay by prior arrangement through Agents.
SHIP SERVICING: Gulf Agency Co. operate ship servicing along Lat. 25° 10' N. See "Agent" and "Anchorage".

Barwil Shipping Services, Fujairah. Tel: 224800/224801. Telex: 89040.

Union National Bank. Tel: 222747.
British Bank of Middle East (BBME). Tel: 222221.
Arab Bank. Tel: 222802.

GARBAGE DISPOSAL: Garbage service is compulsory. Skips a provided alongside at Drhs 50 per collection, which is made upon reque from ship. Arrangements can be made through Port Operations Dep Tel: 09-228800, Extension 220.
WASTE OIL DISPOSAL: Service available from local agents.
SEAMAN'S CLUBS: A duty free shop selling wines, spirits, bee cigarettes, cigars, electrical goods, cameras, luxury goods, gift item and providing refreshments, snacks, darts and pool is available.
CURRENCY: U.A.E. Dirhams (Drhs).
NOTICES: Port Clearance/Anchorage Certificates: Quoted below the circular fax, reference MD/FAX/94/415, issued by the Port of Fujair on 12th December 1994:
"Further to our Fax 94/201, dated 23rd January 1994, on this subje please be advised that, henceforth, submission of Port or Anchora Clearance Certificate, issued from the concerned Authority of t vessel's last port of call, is mandatory for obtaining Anchorage Clearan Certificate from this Authority."

Quoted below is the circular fax, reference MD/FAX/94/403, issu by the Port of Fujairah, on 26th November 1994:
"Fujairah Port Authority regulations of S.T.S. Oil Transfer Operations Fujairah Offshore Anchorage Area 'B' only.

Please be advised of the following requirements which must complied with:

1. *Notice of Arrival:*
1.1 Ships should advise their ETA Fujairah at least 72 hours prior arrival, giving ship's particulars and details of cargo operation and when in range they must contact Fujairah Port Control VHF Channel 16.
1.2 Local Agent of the vessel should reconfirm 24 hours prior tanker's arrival and confirm that all certificates specified Clause 5 must be available for inspection and valid. Agents liaise with the Port of Fujairah for arranging permission for S.T operations to proceed.
2. *Vessel's Condition and Operation:*
2.1 Vessel must be normal for cargo transfer operation and mechanical safety devices should be in full working condition.
2.2 Readiness status consistent with SOLAS/MARPOL and the r of ICS/OCIM (International Chamber of Shipping/Oil Compan International Marine Forum) and "Ship to Ship Transfer Guid (Liquefied gases).
3. *Emergency Plan:*
An emergency plan shall be construed as a plan agreed betwe both ships before the operation commences, allocating spec duties for all ship's personnel in an emergency affecting trans operation that should include "Firefighting System and Oil S Contingency Plan".
4. *Oil Spill Incidents:*
4.1 We would like to draw your attention that the Port of Fujairah do not itself have anti-pollution equipment in the event of a major disastrous oil spill at offshore anchorage area, but limi equipment is available from third parties.
4.2 Following is a list of equipment and chemicals currently availa in the event of a minor oil spill incident:
4.2.1 Oil dispersent (Maxiclean) 1,300 U.S. gallons.
4.2.2 Six units of back pack sprayer (capacity 5 gallons each).
4.2.3 250 bags of 'Sanol' oil spill absorbent (for final recovery).
4.2.4 300 m. of 'Sanol' oil spill absorbent in single boom.
4.2.5 4 speed boats.
4.2.6 3 harbour tugs, total capacity of oil dispersent 7 cu.m.
4.3 In case of any major oil spill incident, the ship's Owner and ship's Agent must arrange anti-pollution equipment. With prejudice, the Port of Fujairah reserves the right to raise consequences against the ship's Owner and Agent. The Ag however, has to provide guarantee for the payment of additio cost, such as air surveillance, pollution cleaning, damage marine environment and the fine.
4.4 In the event of an oil spill or sighting of pollution in the vicinit vessels anchored, it is the duty of the ship's Master to immedia inform the Fujairah Port Control Tower.
5. *Documents:*
The following certificates must be available and valid on bo the vessel before commencing S.T.S. operation.
5.1 Load Line Certificate.
5.2 Cargo Ship Safety Construction Certificate.
5.3 Cargo Ship Safety Equipment Certificate.
5.4 Cargo Ship Safety Radiotelegraph/Radiotelephone Certifica
5.5 Oil Liability Certificate (TOVALOP).
5.6 Oil Liability Certificate (CLC).
5.7 The International Oil Pollution Prevention Certificate (IOPP)
5.8 Register Certificate.
5.9 Classification Certificate.
5.10 Derat Certificate.
6. *Information:*
It is the responsibility of the ship's Agent to furnish the follo information. This information shall be relayed by fax or tel the Marine Department of the Port of Fujairah.
6.1 Geographical Position at Anchorage Area 'B'.
6.2 Date and time of hose connection/disconnection.
6.3 Date and time of commencing cargo transfer operation.
6.4 Date and time of completion of cargo transfer operation.
6.5 Quantity and type of cargo transferred.
6.6 Name of vessels involved.

Please advise ship's Masters that we are looking forward to cooperation for a clean marine environment, free from all kin pollution around Fujairah waters."
Agent's Comment: "The Authority will only issue Port Clearanc Anchorage Certificates to vessels which have physically arrive reported their arrival to the Port Authority. Vessels failing to follow instructions will not be provided with these documents.

Vessels proceeding to bunker rendezvous positions, outside F territorial waters, should first enter Fujairah waters and inform the Port Authority on VHF Channels 8, 9, 10, 12 or 16. "Confidence Fujairah" Channels 25 or 16 should be similarly informed.

A copy of the vessel's clearance from her last port of call will also be required by the Port Authority prior to provision of the subject Certificates/ Clearances."

GENERAL: Derat Exemption Inspectors are available.

Ship Chandlers: Complete chandlering facilities will be available.

SHIPMASTER'S REPORT: March 1985.

Called for bunkers (ex-barge) also crew changes.

Anchorage: Instructed by bunker barge to anchor 3 miles East of breakwater entrance in 25 fathoms of water, good holding ground, 6 shackles of cable used.

Stores: Fresh provisions are available by prior arrangement with Agent.

Repatriation: Any crew joining/leaving are landed by fast launch and then taken by minibus to/from Dubai (about 2 hours drive).

Time: GMT plus 4 hours – permanent.

VHF: Agency (Gulf Agency), Port Control and bunker barge all have VHF, contact initially Channel 16 then shift to working frequency.

AUTHORITY: The Fujairah Ports Authority, P.O.Box 787, Fujairah, U.A.E. *Tel:* Fujairah 228800. *Telex:* 89085 Fport Em. *Fax:* 228811 (Administration), 228555 (Operations), 228022 (Marine). *Contact:* Captain Mousa Morad, General Manager. Captain Tamer Masoud, Harbour Master.

AGENT: Gulf Agency Co. (Fujairah) PVT. W.L.L., P.O.Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("Gacfuj EM"). Tel: 228300, 228301, 228302 (24 hour service). After hours 229690. Fax: 228269. VHF: Channels 16 and 25.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers and Ship-to-Ship transfers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah, Khor Fakkan and Ras Al Khaimah.

HAMRIYAH, Sharjah: 25.35 N. 55.24 E. (See Plan)

LOCATION: Hamriyah Oil Terminal is located in the Emirate of Sharjah, United Arab Emirates, and consists of a shore tank with related onshore facilities, an offshore loading berth composed primarily of one single point mooring buoy and a 30 in. submarine pipeline which runs from the shore tank to the loading berth. The shore tank is located outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman in approximate position Lat. 25° 29.5' N., Long. 55° 30.7' E. The loading berth is located in 71 ft. of water and is situated in an open and unsheltered roadstead approximately 7.6 miles offshore on a bearing of approximately 308° (T) from the shore tank and in approximate position Lat. 25° 34' 31.68" N., Long. 55° 24' 5.8" E.

Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.

Company's Facilities: The Company's administrative offices are located in the town of Sharjah and the Company's terminal offices, storage tank and laboratory for testing stock are located onshore near the village of Hamriyah.

FLAG: Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

DOCUMENTS: The following documents are required when calling at Hamriyah Oil Terminal:

Health Declaration.
Crew List.

PILOTAGE: *Mooring Masters:* Vessels to be moored at the loading berth will be boarded by 2 Mooring Masters about 3 miles due North of the loading berth in approximate position Lat. 25° 37.5' N., Long. 55° 24.1' E. The Mooring Masters will be provided by the Company and vessels will not be allowed to approach or depart from the loading berth without the Company designated Mooring Masters being on board. The Mooring Masters will advise vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose and in all other operations within the loading berth area. All manoeuvring of vessels within the loading berth area shall be performed by vessel personnel as directed by the vessel's Officer in charge and in accordance with the procedure advised by the Mooring Masters.

Vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Masters to immediately embark and disembark on the port side of the vessel and of sufficient length to reach the Mooring Masters' launch. At night, adequate lighting must be rigged overside for the Mooring Masters to approach or depart from the port side of the vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Masters' bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Masters in order to effect the safe embarking or disembarking of the Mooring Masters.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Masters shall be supervised by a responsible vessel Officer and shall be effected so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the vessel's side. If, in the opinion of the Mooring Masters, the pilot ladder is not safe, the Mooring Masters may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Vessels shall provide food for the Mooring Masters while on board the vessel and shall accommodate the Mooring Masters in cabins, equivalent to that required for an officer of the vessel. The Mooring Masters shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Masters.

Vessels shall also provide accommodation and food for the Cargo Inspector.

ANCHORAGES: The customary anchorage area for vessels awaiting the loading berth at Hamriyah Oil Terminal is a circle 2.0 miles in diameter and with its centre located 3 miles due North of the loading berth in approximate position Lat. 25° 37.5' N., Long. 55° 24.1' E. Anchorage within 2 miles of the loading berth or of the 30 in. submarine pipeline which runs from the shore tank to the loading berth is prohibited unless otherwise designated by the Company or the Mooring Masters.

HEALTH: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

MAX. SIZE: Max. draft 16.0 m. Maximum displacement at any time is 150,000 tonnes.

Also see "Berthing".

RADIO/VHF: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Company. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Company and with Lamnalco (Sharjah) Ltd. when 3 days distant from Hamriyah Oil Terminal and maintain such contact until just prior to arrival at Hamriyah Oil Terminal. Vessels should send an ETA telex to the Company (Telex: 68685 Amcosh EM) and Lamnalco (Sharjah) Ltd. (Telex: 68433 Lamshj EM) not less than 72 hours prior to arrival at Hamriyah Oil Terminal, providing the following information:

1. The ETA;
2. The estimated draft, fore and aft, upon arrival;
3. The quantity of crude oil to be loaded and the grade of such;
4. The estimated sailing draft and displacement;
5. The last port of call;
6. Whether the vessel has a clean Bill of Health;
7. The distance from the bow to the centre of the vessel's manifold.

This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting the floating cargo hose to the vessel's manifold. Further ETA telexes should be sent to the Company and Lamnalco (Sharjah) Ltd. when the vessel is 48 hours and 24 hours distant from Hamriyah Oil Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's readiness to load on arrival and the number of hours that will be required by the vessel to discharge clean ballast. Local time is GMT plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

Ship-To-Shore Communications: The Company and Lamnalco (Sharjah) Ltd. are equipped with VHF radiotelephone using international frequencies and maintain a radio watch on the international VHF Marine Channel 16 and on Channel 74. Not less than 12 hours prior to the vessel's ETA at Hamriyah Oil Terminal, the vessel is required to maintain a radio watch on R/T frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Mooring Masters will be in direct charge of the portable VHF ship-to-shore radiotelephone and all ship-to-shore communications will be by portable VHF radiotelephone. The use of the vessel's radio station and/ or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on R/T frequency 2182 kHz and on VHF Channel 16 with the Company and Lamnalco (Sharjah) Ltd.

TUGS: *Mooring Launch:* The Company will provide a mooring launch which is owned by Lamnalco (Sharjah) Ltd. to assist in the mooring and unmooring of the vessel. The mooring launch will be harboured in the town of Sharjah at the boat pier used by Lamnalco (Sharjah) Ltd. and will operate under the direct control of the Mooring Masters.

BERTHING: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a vessel in the order of its arrival, provided the vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the vessel will keep its position in line. Should the vessel be required to leave the area on account of weather, the vessel should keep in radio contact with Hamriyah Oil Terminal in order to make the vessel available as soon as the weather moderates. The Company reserves the right to load vessels "Out of turn" following the return of good weather, to the extent that such loading "Out of turn" does not materially delay the loading of other vessels in line. For example, should weather make it necessary for a specific vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another vessel which arrived at the anchorage after the specific vessel but before the return of the specific vessel which was waiting in line ahead of the the other vessel.

When the vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Masters, the mooring lines of the vessel will be carried by the launch to the floating buoy lines, secured thereto, and brought on board the vessel. On the vessel's end of the mooring lines there is a steel chafing chain which can be observed when the floating buoy lines come out of the water. This chafing chain will be secured to the vessel's bitts by way of Company-supplied mooring strops in such a manner that the floating buoy lines shall remain outside the vessel, thereby allowing the chafing effect at the fairleads to be taken by the chafing chain. All mooring details and the sequence of movements shall be directed by the vessel's Officer-in-charge, following consultation with the Mooring Masters. When the mooring operations have been completed, fire wires of at least 150 ft. in length will be secured to the vessel's bitts and run out at the bow and stern of the vessel's starboard side and held in place on short stoppers with the eyes approximately 6 ft. above the surface of the water, so that they can be readily available to a tug in case of an emergency.

Loading Berth: Vessels are loaded by means of a 30 in. submarine pipeline which runs from the shore tank to the loading berth and by means of a floating cargo hose which runs from the loading berth to the moored vessel.

Vessels meeting the following requirements will be accepted at the loading berth:

(1) Maximum draft is 16.0 m., at any time.
(2) Maximum displacement of the vessel is 150,000 metric tons, at any time.
(3) If deballasting is required by the vessel, the vessel must either deballast and load cargo simultaneously or after completion of loading.

In exceptional cases, vessel in excess of these requirements may be allowed to berth at the facility, provided written permission has first been obtained from the operators.

Mooring Facilities: The Single Point Mooring Buoy moors vessels from the bow and consists primarily of a cylindrical buoy which is secured to the seabed by 6 catenary anchor legs each of which are tethered to the seabed by a heavy duty anchor system. The cylindrical buoy is 5.3 m. in height, fitted with a skirt 16 m. in diameter, and equipped with a radar reflector and a racon beacon coded "Zulu", frequency 48 seconds. The cylindrical buoy is also equipped with a navigational light, white flashing code "U", which has a range of 5.7 miles with transmission factor of 0.85 and is visible through 360°.

Vessel's Alertness: The loading berth is on an open and unsheltered roadstead; therefore, from the time the Mooring Masters board the vessel until the vessel has loaded her cargo and the Mooring Masters have disembarked, full power must be available at all times on all deck winches and windlass and other gear of the vessel and the vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the vessel to depart from the loading berth at any time following a request by the Mooring Masters or the Company to do so.

The vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where vessels are equipped with an electric clutch control to the propeller shaft, such vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the vessel is moored. Constant observation in the engine room, control room and deck control room shall be provided at all times while vessels are at or in the vicinity of the loading berth.

Whilst a vessel is moored to the SBM a crew member must be stationed on the forecastle at all times (24 hours) and will report immediately to the officer in charge if the vessel approaches within 10 m. of the buoy.

READINESS: *Loading Readiness and Arrival Time:* Upon arrival of the vessel at the customary anchorage for the loading berth, the Master or his Agent shall give the Company notice by letter, telegraph, wireless, or telephone that the vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the vessel has been nominated to load cargo and the terminal holds such cargo nomination and further provided that the Mooring Masters have deemed the vessel to be in all respects ready to moor and load. As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted only between the hours of 0600 hrs. and 3 hours before sunset, provided that the vessel is apparently in all respects ready to moor and receive the cargo. The time of sunset will be determined by the current nautical almanac. Notice of Readiness will not be accepted during a period when the port is closed, on account of adverse weather, and may not be accepted, if the vessel arrives prior to the date upon which it is nominated to load.

If, however, the vessel is moved to the loading berth without delay after having arrived at any time and the vessel is in all respects ready to moor and load in the opinion of the Mooring Masters, the Notice of Readiness will be accepted at the time the Mooring Masters board the vessel. Laytime shall continue until the floating cargo hose has been disconnected from the vessel's manifold.

LOADING: *Vessel's Gear:* Prior to the arrival of any vessel at the Mooring Masters Boarding Area, the port derrick of the vessel should be up and ready to lift the mooring and hose connection gear on board the vessel from the mooring launch, and the vessel must be equipped on the forecastle head with at least 2 good quality mooring lines, each not less than 120 fathoms in length and of buoyant material if possible, together with an adequate supply of lashing ropes and shackles. The mooring lines should be laid out free for running adjacent to bitts and warping winches. The warping winches or windlass should be in good working order and must be adequate to handle mooring lines un heavy strain.

On the port side, opposite to the vessel's manifold, there must equipment capable of lifting the floating cargo hose, a 7.5 ton lift, saf and efficiently from the sea surface over the port rail to the vesse manifold. Vessels must also have adequate mooring or loading facilit or lines or gear, the Mooring Masters must so inform the vessel's Mas and in such event the vessel will not be brought into the loading be until the facilities or lines or gear are deemed satisfactory by the Moor Masters.

Connecting Hose: After the vessel has been securely moored, t floating cargo hose will be hoisted to the vessel's port side rail amids by vessel's equipment. The floating cargo hose is a 20 in. (reducing 16 in.) diameter floating hose, 920 ft. in length, fitted with a 150 A flat face flange for connection to the vessel's manifold. The vessel sho have adapters and fittings on board so as to enable such floating ca hose to be connected to the vessel's manifold. The raising, connecti disconnecting and lowering of the floating cargo hose will be perform by the vessel's crew as directed by the vessel's Officer-in-charge w must be present at all times during such operation and in accordan with the procedure advised by the Mooring Masters, who will remain board the entire time the vessel is at the loading berth. Particular ca should be taken during all such hose operations to avoid damage to t floating cargo hose and its fittings.

Rate of Loading: The crude oil flow is by pump and the maximum cru oil loading rate for vessels using one 16 in. deck hose and 150 p.s.i. vessel's rail is approximately 23,000 barrels per hour. In order to sa vessel time and make the loading berth available for other vessels, it requested that ballast be pumped as fast as possible and that vesse receive oil as fast as it can be delivered, with both operations havi due regard for safety. It is requested that any impediment (such as "Y's strainers or mud boxes) to the flow of crude oil into the vessel, b removed before the arrival of the vessel at the loading berth.

Responsibility: Prior to the commencement of any cargo loadi operation, the Mooring Masters and the Officer-in-charge of the loadi operations for the vessel shall engage in a pre-loading conference formulate a loading plan and to ensure that the vessel is in all respec ready to load. No cargo loading shall take place without the permissi of the Mooring Masters, which permission shall not be given until t pre-loading conference has been completed. The vessel's Master sh remain responsible for the safety of the vessel and all operations board the vessel at all times. The Mooring Masters will advise t Officer-in-charge of the loading operations for the vessel with respect the loading pressures and hazards but the Mooring Masters will not dire any aspect of the loading except as may be necessary to protect t loading berth and related facilities and equipment. The manipulation the vessel's valves is the direct responsibility of vessel's personnel. T Mooring Masters shall have the right to suspend cargo loading operatio or to require the vessel to unmoor and depart from the loading berth any time when the mooring plan, pre-loading plan or the saf requirements and regulations set forth herein are not being followed the vessel, or at anytime the Mooring Masters believe or become awa of the existence of any other reason which in his opinion shall requ the suspension of the mooring or the loading of the vessel.

Oil Valve Control: The incoming oil stream is controlled onshore and t vessel's valves must not be closed against the incoming oil stream. Su a procedure creates an excessive pressure which may damage the ho or other terminal facilities and could result in a pollution incident. Vess will be held legally responsible for any damage resulting from the vesse failure to observe this precaution. Frequent checks of the cargo load must be made by vessel personnel during the loading operation so t a reduction in the loading rate, before topping of the final tank or tan may be arranged through the Mooring Masters by t Officer-in-charge of the loading operations for the vessel. A nor standby warning should be given about 15 minutes before the shutdo of the loading operations. Upon the request from a vessel to shut do the loading operations, a minimum of 5 minutes will be normally requ to stop the flow of crude oil. Vessel's personnel shall be responsible the call to stop the loading of the vessel. When cargo has ceased flow, the valves on the shore will be closed and the vessel's mani valves may then be closed.

Emergency Signal: Emergency signals and messages will be relayed VHF/UHF radios and radio telephone links available with the Moor Masters.

Code Flag: During all cargo loading operations, the International C Flag "B" shall be displayed from a topmast signal halyard during day hours and a red light shall be displayed during the hours of darkn The red light should be of a character as to be visible at a distanc at least 1 mile and show an unbroken light around the horizon.

Shore Stops: Request for the terminal to stop the flow of crude oil predetermined tonnage must be made in writing to the Company will be deemed to include the statement and understanding tha Company will not be responsible for (1) any errors, costs or claims a from such request and (2) any crude oil loaded in excess of requested will not be pumped back ashore. Some delays in sto the flow of crude oil are always incurred when such a shore stop re is made.

BALLAST: There are no facilities for the off-loading of dirty ballas clean oil-free ballast may be discharged overboard from the ves is the Master's responsibility to see that no oil (crude, bunker, d bunker C, or oily bilge water) is pumped or spilled overboard fro vessel. All deck scuppers must be plugged tight and adequate dri and sand must be provided where necessary on deck for use at all t especially when disconnecting hoses, in order to prevent any suc of oil overboard. The waters in and adjacent to the loading bert not be polluted and only clean oil-free ballast may be discharge

The discharge of oil mixtures from vessels while en-route to Ha Oil Terminal is prohibited.

Masters are warned that when disposing of dirty ballast or bilge water, all pipelines, sea suctions, strainers and pumps which are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Vessels must have sufficient ballast for safe manoeuvring and, where practicable, should arrive at the loading berth with the propeller completely submerged and trimmed 8 ft. to 10 ft. by the stern.

Due to the sudden and often unexpected onset of high winds in this area, it is essential that this condition is maintained, and the vessel is fully manoeuverable at all times, and also that the vessel is able to commence loading without delay as soon as the hose is connected. Therefore, vessels, arriving with clean ballast to discharge, must arrange this ballast in such a way that either it can be discharged concurrently with loading or after departure, while maintaining satisfactory segregation from the cargo.

The Mooring Masters may refuse to permit the mooring of any vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, vessel's tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place.

Vessels must keep a constant watch on the side of the vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Masters shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the vessel and the findings reported to the Mooring Masters. Discharging shall not resume without permission of the Mooring Masters.

If, during any inspection or during the process of loading, it is revealed that a vessel's tank is not oil-tight, the vessel will be rejected by the Mooring Masters and refused further loading until satisfactory evidence of effective repairs is submitted and the vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, vessels are required to illuminate the vessel and the waters around the vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness. Such illumination must be to the satisfaction of the Mooring Masters and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the vessel.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical or hospital facilities are available at Hamriyah Terminal, but private doctors and hospital facilities are available in the town of Sharjah.

CONSULS: There are no consulates in the village of Hamriyah; however, consular or diplomatic representatives for many nations maintain offices in the cities of Abu Dhabi and Dubai.

REPAIRS: The Masters of vessels loading at the loading berth are advised that the loading berth is considered an "open and unsheltered roadstead" and under no circumstances may engines be shut down for repairs while the vessel is at the loading berth. There are no facilities for making vessel repairs at Hamriyah Oil Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's agent to utilise the repair facilities at other ports.

SURVEYORS: No cargo inspectors or marine surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

SHORE LEAVE/REPATRIATION: Vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the loading berth. There are no facilities for crew change at the loading berth.

WEATHER: *Climate:* The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather Data Summary:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55°F.
Highest mean daily maximum air temperature	102°F.
Lowest average monthly sea surface temperature	72°F.
Highest average monthly sea surface temperature	90°F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year. The maximum current is up to 3 knots.

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g., waves over 8 ft. occur 0.2 per cent of the time).

SAFETY: The vessel's personnel are responsible for the safety of the vessel and themselves and shall take all necessary precautions, whether or not so advised by the Company or the Mooring Masters, having in mind the hazards of the loading operation, the cargo being handled, the weather condition and any other circumstances requiring special care or caution. The vessel's personnel shall also adhere to all safety precautions generally followed in the marine industry as well as all requirements and regulations imposed by the Company. Any safety precautions, requirements and regulations imposed by the Company and disregarded by the vessel's Master, Officers or crew will be considered a just cause for rejection of the vessel and all expenses related thereto shall be for the vessel's account. While the vessel is moored or within the vicinity of the loading berth, the vessel's personnel and the vessel's operations must comply or be in accordance with the following safety requirements:

(a) All ports opening onto the decks of the vessel are to be kept closed during cargo loading operations and all doors opened for access other than the pumproom doors must be closed immediately after use.

(b) Smoking is strictly prohibited on board the vessel and on the loading berth except in those areas designated by the Master as smoking areas. No areas outside of the accommodation areas shall be so designated. The Master is responsible for ensuring that all vessel personnel are informed of the designated smoking areas and shall post suitable notices regarding same. The Mooring Masters may request the Master to further limit the vessel's "No Smoking" areas as conditions warrant. Matches and lighters for personal use shall not be carried while outside the designated smoking areas and personnel shall be so instructed. The Master shall instruct the Officers and crew of the vessel not to throw lighted cigars or cigarettes overside or out of port holes. There may be occasions when smoking will be entirely prohibited.

(c) The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited and only approved intrinsically safe self-contained flashlights are permitted on deck.

(d) Ventilators must be so trimmed as to exclude flammable gases entering the area and if this cannot be done the ventilators must be completely closed.

(e) The vessel's engines, steering gear and other essential manoeuvring equipment and deck machinery must remain ready with full power for immediate use to permit the vessel to clear the area upon instruction from the Company or the Mooring Masters to do so.

(f) Window type air conditioners must be disconnected from their power source and not used unless a certificate can be produced from a recognised authority to show that the unit is safe to operate in flammable gas areas.

(g) The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast. The use of intrinsically safe VHF radios for cargo handling and safety operations are permitted.

(h) A continuous and efficient fire watch must be maintained on deck and in the engine room at all times. The vessel's fire fighting equipment shall be ready for instant use at all times throughout the vessel. Fire hoses of sufficient length to reach all parts of the vessel must be laid out and connected to hydrants and there must be full pressure on the deck line.

(i) Recommendations contained in the I.C.S. International Safety Guide for oil tankers and terminals covering the loading and discharge of tankers shall be strictly followed at all times.

(j) The only open flames allowed while the vessel is at the loading berth are those in the vessel's boilers and galley equipment. Sufficient fire extinguishers must always be provided near the galley and boilers.

(k) Burners, tubes, uptakes, exhaust manifolds and spark arrestors shall be maintained in good working order and kept clean. Funnel uptakes and boiler tubes shall not be blown while the vessel is at the loading berth. Highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever while the vessel is at the loading berth.

(l) In the event of fire breaking out on any part of the vessel, however minor the fire may be, the fire alarm must be given immediately. The fire alarm will consist of a succession of long blasts on the vessel's whistle together with a rapid and continuous ringing of the vessel's bell.

(m) Not less than 1 Deck Officer and 3 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the vessel is at the loading berth.

(n) Not less than 1 engineer shall be on duty, alert, available and in charge of the engine room at all times while the vessel is at the loading berth.

(o) A member of the vessel's crew, not one involved in any way with the loading operation, must be stationed on the bow of the vessel while the vessel is at the loading berth and a constant watch must be maintained on the moorings.

(p) During the discharge of clean ballast and the loading of crude oil, the vessel and the waters around the vessel must be illuminated during the hours of darkness with all available and suitable searchlights and floodlights.

(q) Before the floating cargo hose is brought on board the vessel, all deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times. The deck scuppers must remain plugged until the floating cargo hose has been disconnected. All other materials necessary to clean up any oil spillage on deck must be on hand for immediate use.

(r) All unused bunker connections, cargo connections and vessel manifolds must be fitted with blank flanges including the stern discharge line if fitted.

(s) All cargo tank hatch covers and ullage port covers are to be kept closed except where tanks are to be hand sampled or hand ullaged in which case the ullage openings may be opened to sample or ullage the cargo.

(t) All cargo and ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

(u) Prior to the commencement of any loading operations, all empty vessel cargo tanks and tanks carrying cargo must be under positive pressure and fully inerted with gas having an oxygen content of less than 8 per cent.

(v) THE COMPANY DOES NOT HAVE A TUG OR VESSEL IN THE AREA EQUIPPED WITH FIRE FIGHTING APPARATUS.

GENERAL: *Government Officials:* Sharjah Officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and Police, are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the loading berth, it is expected that the vessel will provide food for these guards and other Sharjah Officials. Vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such Sharjah Officials.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the loading berth.

Supplies: Commissary supplies, steward's stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Contraband: The Company prohibits unauthorised craft from coming alongside vessels while at the loading berth without the permission of the Mooring Masters. To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage any such craft from coming alongside while vessels are at or in the vicinity of the loading berth.

Garbage: The dumping of garbage and refuse overside is prohibited.

Agency: The Company does not perform any vessel Agency functions. Vessels calling at Hamriyah must arrange for their own Agents.

SHIPMASTER'S REPORT: July 1983 (Updated 1986).

Location: Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company. The terminal is located in the Emirate of Sharjah, United Arab Emirates. A 30 in. pipeline runs from the shore tank to a S.P.M. located in position Lat. 25° 34' 31.68" N., Long.55° 24' 05.8" E. and is operated by Lamnalco.

Documents: Health Declaration and Crew Lists. Customs, Immigration and Quarantine Officers have an office in Sharjah but usually do not come on board.

Pilotage: A pilot ladder to be prepared on vessel's Port side and lowered to about 12 ft. above the waterline. If the height of the deck exceeds 30 ft. a pilot ladder in conjunction with the accommodation ladder must be rigged.

Anchorages: The customary anchorage for vessels awaiting the loading berth of Hamriyah Oil Terminal is 3 miles North of the S.P.M. Anchorage within 3 miles is strictly prohibited unless instructed by the Mooring Masters.

Max. Size: Vessels up to 250,000 tons have been accepted, subject to weather conditions.

Health: Rules are the same as found all over the world.

Radio/VHF: Amoco Sharjah and Lamnalco should be contacted by radio 3 days prior arrival via Bahrain Radio and maintain contact until prior arrival.

Telex: 68685 Amcosh EM and 68433 Lamshj EM.

Following information is required by both parties:

1. ETA.
2. Arrival Draft.
3. Quantity to be loaded.
4. Estimated sailing draft.
5. Last port of call.
6. Whether vessel has clean bill of health.
7. Distance bow to manifold.
8. Confirm vessels ability to load/deballast concurrently or alternatively to deballast after loading.

Both companies keep watch on international VHF Marine Channel 16.

Berthing: This cylindrical buoy is equipped with a navigational white flashing light code "U", range 5.7 miles, a radar reflector and a racon beacon coded "Zulu".

On forecastle, vessel should have 4 good quality mooring lines, minimum length of 120 fathoms and preferably of the floating type. Vessel's lines to be used to pick up the mooring lines of the buoy. The end of the buoy's mooring line consists of a steel chafing chain and will be secured onto vessel's bitts by mooring strops supplied by Lamnalco.

Port derrick should be up and ready for lifting moorings and cargo hose connecting gear and capable of lifting 7.5 tons safely.

Mooring Masters and Cargo Oil Surveyor stay on board while vessel is on the berth and both to be accommodated in an officer's cabin and meals served in officer's messroom.

Notice of Readiness: Will only be accepted between 0600 and 1800 h but will not be accepted at times when the Hamriyah Oil Terminal closed on a public holiday or Friday (Moslem Sabbath). However, if t vessel is moved to the berth without delay after having arrived at a time and vessel is ready for mooring and loading the Mooring Maste will accept the N.O.R. at the boarding time. Laytime shall commen upon expiration of 6 hours after accepting the N.O.R. and shall contin until hose has been disconnected from vessel's manifold.

Loading: The floating hose is 20 in. diameter with a 16 in. hose t connecting to the vessel's manifold. Loading rate approximately 23,0 bbls.p.h. Only one type of oil available, being crude oil condensa approximate API 50/60° and loading temperature approximately 95°F

Ballast: There are no dirty ballast reception facilities and all vessels mu arrive with sufficient clean ballast for manoeuvring with the prope submerged and a trim of 8 ft. – 10 ft. by the stern. Non-permanent clea ballast to be discharged prior to commencing of loading.

Medical: Neither medical nor hospital facilities are available at Hamriya Oil Terminal. Requests for emergency medical assistance should passed to Hamriyah Oil Terminal by VHF and the information will passed to vessel's Agent. Private doctors and hospital are available the town of Sharjah.

Supplies: Stores, fresh water, laundry services, bunkers and lubrica not available via Amoco and may not be loaded at the berth. Availabi of items should be handled through vessel's Agent and loading carrie out elsewhere.

Consuls: No consulates in Sharjah; however, many nations ha consular or diplomatic representatives in Abu Dhabi and Dubai.

Repatriation/Shore Leave: Not permitted while at loading berth.

Currents: Predominantly counter-clockwise circulation throughout t year along the Sharjah coastline and is generally not strong. Stronge in January (0.4 – 0.8 knots) and in April (0.6 – 1.7 knots).

Weather: Winds are usually light from Western quadrant, except dur June to September when the Shamal blows and from November to Ap during passing of cold fronts with winds up to 20 knots producing rou seas.

SHIPMASTER'S REPORT: August 1994.

The SPM Buoy is owned by Amoco, but on their behalf operated a maintained by Lamnalco. ETA's and N.O.R. are to be telexed to Amo Sharjah (Telex: 68685 Amcosh Em).

Vessel is usually not accepted for loading before Laydays speci in Charter Party, even if the loading berth is vacant. On an avera 4-5 ships are loading at this buoy in a month.

There are no formalities for Health Clearance, Free Pratique a Immigration, etc., for vessels calling to load at Hamriyah Off-sho Terminal.

While vessel is at the SBM, no operations, such as receiving sto or crew changes, can be carried out. These operations should undertaken while at anchorage. Provisions and bonded stores a available through local ship chandlers. Crew shore leave is not allow

Vessel is moored to SPM Buoy using 2 chains. If vessel is equipp with only one bow chain stopper, the other chain is made fast to b using additional snotters and shackles, etc. Loading Master advised t for insurance purposes, 2 chains have to be fastened, even thou OCIMF recommends one chain sufficient for vessels of less t 100,000 d.w.t. Terminal should be informed in advance if vesse equipped with only one bow chain stopper, so that additional gear c be supplied.

Two Loading Masters and one surveyor board the vessel Nort SPM Buoy from a service vessel, which also brings the required g (shackles/snotters/plates, etc., for mooring and ship/shore connectio Mooring, unmooring, hose connection, disconnection is handled ship's crew under Loading Master's supervision. While moor unmooring (as is usual), one Loading Master stays on forecastle w Chief Officer and the other on bridge. Mooring is done during dayt only, unmooring any time. Mooring procedure/sequence is given "Guide to Port Entry" in detail.

Loading Masters require "Officers" accommodation and sepa cabins. They refuse to accept ship's hospital or crew's accommoda (vessel had to move one Officer out of his cabin to provide room Loading Master).

Floating hose has a 16 in. connection flange and is always connec on port side. Max. loading rate is 24,000 bbls./hr. Only crude conden is handled at this SBM. Loading Master advised that A.P.I. of condensate never varies beyond 59.8 to 60.1.

Vessel can request either "Ship stop" or "Shore stop". Howeve "Shore stop" is requested at a certain cargo quantity, specified by s ship-shore difference should be taken into account, which can be c large at times. Ship-shore difference in quantity pumped by shore quantity received onboard can be checked every hour by asking Term by radio for quantity pumped.

After completion of loading, vessel is immediately unmoored moved slightly closer to breakwater, towards Fairway Buoy. Vessel drifts and awaits documents, which usually takes 2 hours. An representative comes by launch and brings all documents, Bill of La and Port Clearance. All Protest Letters by vessel are signed by Loa Master. Agents do not board the vessel, and if Crew List is to be for Visa Endorsement (if vessel proceeding to U.S.A.), it should be to Agents through Loading Master.

AUTHORITY: *Operator:* Amoco Sharjah Oil Company, P.O.Box Sharjah, United Arab Emirates. *Tel:* (9716) 355100. *Telex:* 6 Amcosh EM. *FAX:* 355142. *Contact:* B. G. Bramley, General Man

AGENT: See "Sharjah".

HAMRIYAH LPG TERMINAL: 25.28 N. 55.29 E.

(See Plan)

LOCATION: The Terminal is located in position Lat. 25° 27' 37.3" N., Long. 55° 29' 12" E. outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman.

The Hamriyah LPG Terminal is owned by Sharjah LPG Company Limited ("Shalco") and operated by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting.

The Terminal consists of 2 storage tanks for propane and butane, and a marine loading facility capable of loading vessels ranging in size from 30,000 cu.m. to 83,000 cu.m. 2 liquid loading lines and 2 vapour return lines are mounted on the trestle connecting the breakwater and the loading platform.

DOCUMENTS: The following documents are required when calling at the Hamriyah LPG Terminal:

Health Declaration.
Crew List.
Clearance from last port of call.

Officials: No immigration, Customs or Health Officials stationed at the Terminal.

APPROACHES: *Approach Channel:* The approach channel's entrance is located in an approximate position of Lat. 25° 30' 45" N., Long. 55° 27' 23" E. The Fairway Buoy (Fl. "A" ev. 15 sec.) is located in position Lat. 25° 32' 05" N., Long. 55° 25' 59" E. The channel's length is 4,000 m. The width is 180 m. in the seaward channel, 250 m. in the intermediate channel and 180 m. in the near harbour channel. the channel depth has been dredged to 15 m.

Buoys:

Northern Training Wall	5	Red
Southern Training Wall	5	Green

PILOTAGE: Pilotage is compulsory from the seaward entrance of the dredged channel. The Pilot will board at or near the designated anchorage. The Pilot will be provided by the Operator and vessels will not be allowed to approach or depart from the port without the Operator's designated Pilot being on board. The Pilot will advise vessel's personnel on the approach through the channel to the jetty and all operations of mooring and unmooring. All manoeuvring of vessels within the loading berth area shall be performed by vessel's personnel as directed by the vessel's Master in accordance with the procedure advised by the Pilot. The vessel's Master must be on the bridge at all times while the vessel is manoeuvring.

Vessels shall provide food for the Pilot and Terminal Supervisor while on board the vessels and shall accommodate the Pilot and Terminal Supervisor in suitable accommodation equipped with private toilet facilities. The Pilot and Terminal Supervisor shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Pilot and Terminal Supervisor.

Vessels are required to have a clean and efficient pilot ladder, fitted with spreaders and manropes, safely and securely rigged ready for the Pilot to immediately embark and disembark and of sufficient length to reach the Pilot's launch. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Pilot's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Pilot in order to effect the safe embarking or disembarking of the Pilot.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. The rigging of the pilot ladder for the embarkation and disembarkation of the Pilot shall be supervised by a responsible officer and shall be positioned so that the ladder is well clear of any overboard discharge and such that each step of the ladder rests securely against the vessel's side.

If, in the sole opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Pilotage Radio Contact: Pilot/Vessel contact will be maintained on VHF Channel 16 or other frequency as mutually agreed by Operator's Marine Representative and vessel's Master.

Arrival at Anchorage/Pilot Boarding Area: Means of access to the vessel by the Pilot shall be provided by the vessel in accordance with the requirements of SOLAS. At night, the access area shall be adequately illuminated to provide a safe approach and boarding by the Pilot, Government Officials and Terminal Representatives.

The Conditions of Use of Shalco's Terminal Facilities will be presented to the Master for acceptance and signature on behalf of himself and the Owners prior to departures from the Anchorage/Pilot Boarding Area.

As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1500, provided that the vessel is apparently in all respects ready to moor and accept the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, and may not be accepted if the vessel arrives prior to the date upon which it is nominated to load. Berthing is not allowed during winds from Northeast.

ANCHORAGE: The customary anchorage area for vessels awaiting loading at the Hamriyah LPG Terminal is a circle 1 mile in diameter with its centre in an approximate position of Lat. 25° 30' N., Long. 55° 25' E. There is an existing SBM located at approximately Lat. 25° 34' N., Long. 55° 24' E. for the Hamriyah Oil Terminal. the SBM is fitted with a flashing light and racon. This existing SBM may be used as a reference to the LPG Terminal anchorage which is 3 miles W.S.W. of the LPG entrance channel.

When within VHF communication range, Masters of vessels should ascertain berthing prospects from the terminal. In all cases where tankers are instructed to anchor, Masters should obtain clearance for their intended anchorage position from the Operator.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on VHF Channel 16 with the Terminal Operator.

Caution: Masters are cautioned that a 30 in. submarine pipeline runs 7.6 miles from the Hamriyah Oil Terminal to an offshore SBM facility.

RESTRICTIONS: Vessels will be moored/unmoored in daylight only, but the loading will be performed at any hour, weather and circumstances permitting.

Also see "Pilotage".

MAX. SIZE: The harbour has been dredged to a depth of 14 m. Maximum draft for vessels calling at the Hamriyah LPG Terminal is 12.6 m.

Max. Size: 83,000 cu.m. Max. LOA 230 m.
Minimum LOA 186 m. Minimum flat side 80 m.

HEALTH: No officials stationed at the terminal.

RADIO: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Operator. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Operator and with the Operator's designated marine service when 3 days distant from Hamriyah LPG Terminal and maintain such contact until just prior to arrival at Hamriyah LPG Terminal. Vessels should send an ETA telex to the Operator (Telex No. 68685 a/b Amcosh EM) and to the Operator's designated marine service (Telex: 68433, a/b Lamshj EM) not less than 72 hours prior to arrival at Hamriyah LPG Terminal, providing the following information:

1. ETA.
2. Estimated arrival draft, fore and aft.
3. Estimated sailing draft, fore and aft.
4. Whether part-loaded or in ballast. If part-loaded, nature and quantity of cargo.
5. Last port of call.
6. Last 3 cargoes carried.

Further ETA telexes should be sent to the Operator and the Operator's designated marine service when the vessel is 48 hours and 24 hours distant from Hamriyah LPG Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's Readiness to Load on arrival. Local time is Greenwich Mean Time plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

VHF: *Ship-to-Shore Communications:* The Company and its designated agents are equipped with VHF radios using international frequencies and maintain a radio watch on the international VHF marine Channel 16.

On approach to Hamriyah LPG Terminal, the vessel is required to maintain a radio watch on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Pilot may be replaced by a Mooring Master (Safety Officer) who will be in direct charge of the portable VHF ship-to-shore radio and all ship-to-shore communications will be by portable VHF radio. The use of the vessel's radio station and/or radar is prohibited during cargo loading operations.

The following are terminal call signs in use during loading:

LPG Terminal UHF Channel 1, Monitor VHF Channel 3:

Amoco 410 – LPG Terminal Control Room.
Amoco 411 – LPG Terminal Operator.
Amoco 412 – LPG Terminal Spare Operator.
Amoco 415 – LPG Jetty Control Operator.
Amoco 416 – LPG Jetty Mooring Crew.
Amoco 417 – Lead Tug.
Amoco 418 – Second Tug.
Amoco 419 – LPG Tanker.
Amoco 420 – Amoco Terminal Supervisor.

TUGS: Tugs will be provided by the Terminal Operator. Due to the infrequency of LPG liftings, tugs will vary as to individual specifications. However, 2 tugs will normally attend each lifting and each will have a minimum of 1,500 h.p. and a bollard pull of 15 tons.

BERTHING: *Due to equipment limitations, it is not possible to purge inert gas from arriving vessels. Only vessels arriving in an LPG purged and cooled down condition will be accepted at Hamriyah LPG Terminal. Checks made with an oxygen analyser must read at 2 per cent oxygen or lower.*

Berthing: The berth is fitted with 2 shock absorbing fenders, 70 m. apart. Design is based on a 57,000 d.w.t. LPG vessel. Dredged depth alongside the jetty face is 14.8 m. at mean lowest low water level. The vessel turning diameter in the harbour is 600 m.

Vessel Specifications: Based on the above, vessel specifications *must be:*

Length: Maximum 230 m., minimum 186 m.
Draft: Maximum 12.60 m.

Mooring: The berth is equipped with 2 breasting dolphins which have 2 quick-release hooks along with powered capstans. The 4 mooring dolphins are each equipped with 3 quick-release hooks. All quick-release hook units are provided with attached powered capstans. All quick-release hooks have a capacity of 60 tonnes, and can be manually operated. The capstan capacity is 2 tonnes with a rope speed of 30 m. per minute. Bollards, bitts and cleats are also provided.

For safety reasons, vessels will be moored with their portside only to the jetty.

Ships should remain adequately secured in their moorings. Ranging of the ship is to be prevented by the vessel's personnel keeping all mooring lines taut. Attention is to be given by vessel's personnel to the movement caused by passing ships, wind, currents, tides, and the cargo operation in progress. Adequate mooring of the vessel is the Master's responsibility and the vessel and its Owner shall be responsible for all damage to the loading berth and related facilities in any way attributable to the failure of the vessel's personnel to keep all mooring lines taut. Operator may suspend cargo operations and have the vessel put off the berth for any failure to comply with this provision with all resulting delay to be for the account of the vessel.

Vessel's personnel should be at their duty stations and alert at all times during mooring, unmooring, hose handling and cargo operations. Ships fitted with automatic tension winches should not use such winches in the automatic mode as they may not always hold the vessel in position at the berth.

LOADING: *Tanker/Jetty Manifold Connections:* The jetty has a basic configuration of VLLV. Butane and propane can be loaded down either liquid line, and concurrently. However, the Terminal's preferred configuration is butane forward and propane aft, and ships should endeavour to comply with this if possible. Complete vessel's particulars shall be supplied for Company's approval at the nomination stages. Vessels are required to load both products concurrently when lifting both products. Therefore, manifold configuration must be adhered to stringently. The vessel manifold arrangement must be VLLV.

The maximum loading rate for one product at a time is 1,300 metric tonnes per hour, and the minimum 600 metric tonnes per hour. For concurrent loading, the maximum loading rate is 1,000 metric tonnes per hour per product, and the minimum acceptable loading rate 600 metric tonnes per hour per product, apart from commencement and completion.

It is emphasised that venting of vapour to atmosphere is not allowed. Vapour should be returned to the Terminal via the vapour return lines provided or reliquified and returned to the cargo tanks.

The propane and butane loading arms are 12 in. in diameter. The return vapour arms are 8 in. in diameter. Each arm is fitted with a hydraulic coupler which can be adapted to fit different sizes. The loading arms can be adapted to fit 16 in., 12 in. and 10 in. standard 150 lbs ANSI flanges. The vapour return lines can be adapted to fit 10 in. and 8 in. standard 150 lbs ANSI flanges.

Any other flange size or ratings other than the above stated will require special fabricated spool pieces to meet the foregoing flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the hydraulic couplers to the proper ship's flange. Vessels without proper spool pieces will be rejected.

Ship's manifold connections must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

	Min.	*Max.*
Distance of ship's manifold from ship's side:		
12 in. Loading Arm	2.0 m.	6.0 m.
Distance centre to centre for 12 in. ship's manifold	1.5 m.	3.5 m.
Height of centre point of manifold above deck	0.85 m.	2.1 m.

Jetty Emergency Shutdown Systems and Purge Systems: The jetty is equipped with an Emergency Shutdown (ESD) system to stop loading operations. The system is activated by pushing an electronic stop button in the jetty control room or on the pendant which will be placed on board the vessel. The pendant with the ESD button placed aboard the vessel is to be used only in an emergency, and is used in preference to the ship's systems. On activating the ESD system, all loading pumps and loading arms will be shut down.

Documentation: Before and after completion of loading operations the vessel shall be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Time Sheet, Certificate of Quality, Certificate of Quantity and Certificate of Origin will be completed. All such documents will be signed by the Master of the vessel prior to the vessel's departure and by the Operator's Terminal Supervisor, as appropriate. If required or requested by the Master of the vessel, the Agent of the vessel may sign the documents on behalf of the vessel's Master. The official quantity of the LPG delivered to the vessel shall be determined by the use of vessel gauges applied to cargo tank volume calibrations. Tests for quality determinations shall be carried out by the Licensed Inspector.

The vessel may depart after receipt of the Port Clearance document duly signed by the appointed Government Official and the Operator's Terminal Supervisor.

Cargo Information: The vessel's Master will be informed of th approximate gravity and loading temperature of the LPG prior t commencement of loading. An official and final figure for specific gravi will be provided as soon as practical after completion of loading.

BALLAST: There are no facilities for off-loading ballast at Hamriya LPG Terminal. Oil-free ballast suitable for pumping directly to the se may be discharged overboard from the vessel. Export vessels arrivin with ballast unsuitable for pumping to the sea may be rejected for loadin or made to keep such unsuitable ballast segregated on board. It is strict against the law to pollute the waters of the United Arab Emirates, an any Master, his vessel and Owners, shall be subject to prosecution b the United Arab Emirates authorities if such pollution does occur.

FIRE PRECAUTIONS: The vessel's fire fighting appliances, includin its main and emergency fire pumps shall be kept on standby and read for immediate use. Before berthing operations comence, fire hoses sha be uncoiled and connected to the fire main which should be ke pressurised. Fire monitors should be elevated and maintained f immediate use. The water spray system of the vessel must be teste and maintained ready for use. The dry powder system or portable uni shall be ready for use and in close proximity to the vessel's manifold

The vessel is solely responsible for, and presumed capable of, fightin any fire on the vessel without assistance from terminal sources.

Should fire break out on either the vessel or the berth, the vessel Master or deputy must immediately report the fire by the quickest mean possible (VHF/UHF/telephone contact, sounding ship's siren, etc.) to th Terminal. The vessel's Master or deputy must also notify the Jet Supervisor by means of VHF Channel 16. All cargo and balla operations will be stopped immediately and then all valves closed. A the vessel's Master or deputy assisted by the crew is responsible f fighting the fire on board the vessel, he should stand-by to disconne hoses or metal arms.

The jetty supervisor will be responsible for initiating the terminal fi alarm system and actuating the terminal emergency plan. He sha contact the senior deck officer on board the vessel to ascertain wh assistance can be rendered by Terminal equipment and personnel.

In the event of an emergency, an alarm signal (continuous siren) w be sounded.

The loading platform fire fighting system has one main motor drive fire water pump and one stand-by diesel engine driven fire water pum Both pumps are capable of handling 1,500 g.p.m. at 150 p.s.i.g. pressu and are located on the jetty trestle.

The vessel's Master or his deputy will alert ship's personnel to stan by for special instructions from the Terminal Supervisor. Thes instructions may require immediate departure of the vessel from t berth.

MEDICAL: Vessels requiring emergency medical assistance shou contact Hamriyah LPG Terminal by UHF Radio (Amoco 210) or t Terminal Supervisor by UHF Radio (Amoco 420). Private doctors a hospital facilities are available in the town of Sharjah.

DENSITY: 1029.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no Consulates in the village of Hamriya however, the Consular or Diplomatic Representatives for many natio maintain offices in the towns of Abu Dhabi and Dubai.

REPAIRS: There are no facilities for making vessel repairs at Hamriy LPG Terminal and no repairs will be allowed at the jetty. Howev arrangements can be made through the vessel's Agent to utilise t repair facilities at other ports.

SURVEYORS: No Cargo Inspectors or Marine Surveyors are based the village of Hamriyah but inspectors and surveyors who reside at ot ports can be arranged through the vessel's Agent.

CUSTOMS: Masters are advised that drinking or sale of alcoh beverages is strictly forbidden to U.A.E. national citizens and is contro for other nationals. Masters are warned of the serious consequences offering such drinks to the Terminal staff or other officials who may bo the vessel.

REPATRIATION: Not possible as no officials based at the terminal.

POLICE/AMBULANCE/FIRE: Contact terminal operator.

WEATHER/TIDES: *General:* The Company can advise of the follow general environmental characteristics for the Sharjah coastline area the navigator is referred to the published sailing instructions a directions for the area for more detailed information on the clima weather, wind, tide, current and sea.

Climate: The climate along the coastline of Sharjah is characterised cool Winters and very hot Summers. The annual mean rainfall is 4.2 and the relative humidity varies considerably according to the time day with the highest relative humidity generally in the early morning the lowest relative humidity generally in the early afternoon. The temperature is generally moderate in the Winter, but is high in Summer and can be extremely high in the interior on Summer afterno

Weather:

Annual mean rainfall	4.2
Lowest mean daily minimum air temperature	55°
Highest mean daily maximum air temperature	102°
Lowest average monthly sea surface temperature	72°
Highest average monthly sea surface temperature	90°

Winds: The winds in the Southern part of the Gulf are usually ligh generally blow from the Western quadrant most of the year bu occasionally interrupted by winds from varying directions. The vis along the Sharjah coastline is generally good but from June to Septe the Shamal blows over the Gulf area and frequently produces r seas and stirs up dust clouds which can affect visibility at sea. The fronts which move down the Gulf from November to April frequ cause a North or N.W. wind of 20 knots or more along the Sh coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable acc through use of the tide tables for Shatt Al Arab with the appro correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g. waves over 8 ft. occur 0.2 per cent of the time).

GENERAL: *Flag:* Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

Government Officials: Sharjah officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Port Authorities and Police are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the jetty it is expected that the vessel will provide food for these Guards and other Sharjah officials.

Quarantine Regulations: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

Contraband: During loading it is prohibited for any unauthorised craft to come alongside vessels while at the LPG Terminal.

Garbage: The dumping of garbage and refuse overside is prohibited.

Shore Leave and Crew Changes: Vessel's personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the jetty. There are no facilities for crew changes at the jetty.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the jetty.

Supplies: Commissary supplies, stewards stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Operator and may not be loaded at the jetty. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Readiness: As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1800 provided that the vessel is apparently in all respects ready to moor and receive the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather or when the vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

Agency: The Operator does not perform any vessel agency functions. Vessels calling at Hamriyah LPG Terminal must arrange for their own Agents.

AUTHORITY: *Owner:* Shalco (Sharjah LPG Co.) P.O.Box 787, Sharjah, United Arab Emirates. *Tel:* 543666. *Telex:* 68799.

Operator: Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* 355100. *Telex:* 68685. *FAX:* 355142.

Contact: B. G. Bramley, General Manager.

LPG Terminal, Hamriyah, Sharjah, United Arab Emirates. *Tel:* 883744, 883894. *Contact:* Captain H. Dietze.

AGENT: See "Sharjah".

HULAYLAH TERMINAL, Ras Al Khaimah:
25.58 N. 55.56 E.

LOCATION: The geographical location of the Hulaylah Terminal SPM is: Lat. 25° 57' 26" N., Long. 55° 56' 11" E.

Hulaylah Terminal is the export crude oil facility operated by Ras Al Khaimah Gas Commission (RAKGAS) and is located approximately 7 miles offshore from Mina Saqr, Ras Al Khaimah, United Arab Emirates.

Crude oil from the Saleh Offshore Field is transferred to shore tanks located in approximate position 25° 58' 26" N., 55° 56' 17" E. from where it is transferred to the SPM by pipeline.

Saleh Field production facilities are located at the following positions:

	Latitude	*Longitude*
Saleh 1 and Production Platform	26° 11' 31" N.	55° 42' 27" E.
Saleh 1 Flare	26° 11' 45" N.	55° 42' 35" E.
Saleh 2 Platform	26° 10' 43" N.	55° 42' 16" E.
Saleh 3 Platform	26° 10' 11" N.	55° 41' 47" E.
Saleh 4 Platform	26° 10' 27" N.	55° 45' 37" E.
Saleh 5 Platform	26° 09' 51" N.	55° 45' 11" E.
Saleh 6/7 Platforms	26° 11' 34" N.	55° 43' 51" E.

DOCUMENTS: None required.

PILOTAGE: The Mooring Master Boarding Area for the Hulaylah Terminal is 3 miles Westward of the SPM, or boarding will be at the anchorage as appropriate.

The RAKGAS Mooring Master will remain on board throughout the export vessel's stay on the berth to co-ordinate the petroleum transfer operation; therefore, suitable and adequate accommodation shall be provided for him on board the export vessel.

Arrival at Pilot Station/Anchorage: Means of access to the vessel by the RAKGAS Mooring Master shall be provided in accordance with the requirements of SOLAS, and early advice will be given by RAKGAS as to the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to provide for the approach and boarding of the RAKGAS Mooring Master, Government Officials and for RAKGAS Representatives.

The Conditions of Entry into and Use of Hulaylah Terminal and Agreement for the Hiring of Tugs will be presented to the Master of the export tanker and shall be signed by him on behalf of himself, the vessel and its Owners prior to departure from the Pilot Station/anchorage and commencement of berthing operations.

The Notice of Readiness will be accepted only between the hours of 0600 and 1500 provided the RAKGAS Mooring Master is satisfied that the export vessel is apparently in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, or when an export vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the export vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

ANCHORAGES: Should it be necessary to anchor, then vessel should proceed to the recommended Tanker Anchorage Area which is within a circle 0.5 miles in diameter and with its centre located in position Lat. 25° 58' N., Long. 55° 53' E.

MAX. SIZE: Max. deadweight 300,000 tons. Larger vessels require prior clearance by the terminal.

HEALTH: No health clearance requirements currently in force.

RADIO: Following receipt of a nomination of an export vessel to load at the Hulaylah Terminal, RAKGAS will cable to that vessel via Bahrain Radio (A9M) or advise vessel's Agent details of nomination, loading API and temperature, and berthing prospects.

On receipt of this cable, and in any case not later than 72 hours prior to arrival time at Hulaylah Terminal, the export vessel is required to cable to RAKGAS via Bahrain Radio or via the Agent, the following information:

(a) Name of vessel.
(b) ETA in GMT (U.A.E. time is GMT plus 4 hours throughout the year).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft, and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Hulaylah, and if so, any delays anticipated.

Sections (a) and (b) of above message should be repeated via Bahrain Radio 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Hulaylah Terminal and at any other time when ETA changes more than 1 hour.

When approaching the Terminal, an export vessel should contact the Terminal on VHF Channel 16 (156.8 MHz), establishing a working channel and confirm ETA.

VHF: *Export Tanker:* When the export tanker is berthed at the SPM, communication between the Terminal and the export tanker will be established on VHF Channel 16 or on a mutually agreed VHF channel.

In those cases where the VHF equipment on board the export tanker is not compatible with the Terminal equipment, the RAKGAS Mooring Master will arrange for the availability of compatible VHF sets for use during the transfer operation. These sets shall be returned to the RAKGAS Mooring Master prior to his departure from the export tanker.

Approach to the Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Suitable tugs and line boats are chartered for each lifting and are for export tanker's account.

BERTHING: *Mooring/Unmooring Arrangements:* The export tanker will be moored to the SPM according to a mooring plan to be agreed between the RAKGAS Mooring Master and the Master of the export tanker.

LOADING: *Transfer Operations:* The RAKGAS Mooring Master will remain aboard the export tanker throughout the petroleum transfer operation and will co-ordinate all activities on board the export tanker with the Terminal.

The maximum loading rate available for the transfer operation will be about 10,000 bbls.p.h.

At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. A crew member shall be kept on watch on the bow.

When the responsible export tanker officer has declared the export tanker ready to load with all necessary valves open, the Mooring Master will instruct the Terminal to commence the transfer.

At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker.

The RAKGAS Mooring Master shall be given advance notice by the Master or responsible officer on the export tanker when a reduction of loading rate is required preparatory to completion of transfer.

After completion of loading, the vessel will be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Certificate of Quantity, Certificate of Quality, Certificate of Origin, and Port Time Log will be completed. All such documents shall be signed by the Master of the export tanker prior to that vessel's departure. If required or requested by the Master of the export tanker, the Agent for the export tanker may sign the cargo documents on behalf of the export tanker's Master. The official quantity and quality of the crude oil delivered to the export tanker shall be determined by RAKGAS and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: The storage vessel will present a single 16 in., 150 ASA connection, hose will be connected on the port side. Hose connection/disconnection will be carried out by the export tanker's crew who are required to be at all times under the control of a responsible deck officer and undertake hose handling operations in co-operation with procedures advised by the RAKGAS Mooring Master.

The export tanker will be required to have ready a derrick at the port manifold area for the handling of the flexible hose.

Minimum Derrick Capacity:

Vessel size	*Derrick capacity*
up to 70,000 d.w.t.	7.5 tons
70,000 – 150,000 d.w.t	10.0 tons
over 150,000 d.w.t.	15.0 tons

Cargo Information: Oil loaded at the Hulaylah Terminal is Saleh Crude with an average API gravity of approximately 60°. The loading temperature will vary from 73°F in the Winter to 85°F in the Summer months. Some H_2S may be present in the crude oil.

Hydrogen Sulphide: Vessels nominated to load at the Hulaylah Terminal SPM should be advised that Saleh Crude may contain H_2S. Continued exposure over long periods to even small concentrations of hydrogen sulphide can cause headache and nausea. Exposure to high concentration may be dangerous and even fatal. Masters should ensure that personnel involved in the loading operation take the appropriate precautions as recommended by their Owners for handling cargo containing H_2S.

Deballasting Operations: Export vessels are required to arrive with sufficient ballast or cargo and be adequately trimmed for safe manoeuvring.

Hulaylah Terminal has no ballast reception or slop disposal facilities, and therefore, export vessels are required to arrive with sufficient clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. RAKGAS will not accept any claims for vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, may be subject to prosecution by the United Arab Emirates Authorities if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: Under certain weather/sea conditions this practice may be necessary. In such circumstances, simultaneous deballasting and loading may be requested by the RAKGAS Mooring Master.

If such operations are found necessary, it shall be done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker. The Owners, shall remain fully responsible for, and indemnify and hold RAKGAS, its parent companies, subsidiaries, and affiliates, harmless from, any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All crude tankers of 20,000 d.w.t. or greater nominated to load shall arrive with cargo tanks inerted to 8% oxygen or less by volume and pressurised as required by the SOLAS Convention. Normally cargo tanks under pressure will not be inspected by the Terminal Representative provided a declaration is signed by the Master prior to commencement of loading confirming that all compartments of the vessel have been prepared in all respects as required for the cargo to be loaded.

(a) Tank Inspection, Gauging, Sampling, Water Dips and Temperatures: Should it be necessary for tanks to be inspected, then it should only be done on a tank-by-tank basis. The system shall be maintained at about 200 mm. water gauge pressure except for the individual tank to be opened which, if possible, is to be isolated from the system and the sighting port opened with care. On completion of inspection the tank shall be secured and re-pressurised. The next tank is not to be isolated and opened until the preceding tank is secured and open to the IG system. All gauging, sampling, water dips and temperatures will be taken either through special fittings provided; or if it is necessary to open up tanks for this purpose, then this will be done one tank at a time as described above.

(b) Failure of IGS: If at any time the IGS is not maintaining the prescribed conditions, the RAKGAS Mooring Master shall order a suspension of transfer operations. The cost of any delays will be for the export vessel's account.

MEDICAL: Doctors and dentists available.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: It is not permitted to load bunkers while berthed at the SPM. Bunkers can be arranged at anchorage by vessels' local Agents.

CONSULS: At Dubai.

REPAIRS: Repair facilities are not readily available.

Repairs will not be permitted when the export vessel is berthed at the SPM.

SURVEYORS: At Dubai.

CUSTOMS ALLOWANCES: Most crew transit through Dubai where import allowances are:

1. 1,000 cigarettes or 200 cigars or 1 kilo of tobacco.
2. One litre toilet water and 150 gms. perfume.
3. No alcohol of more than 2% permitted without an import licence.
4. There are no restrictions outbound.

REPATRIATION: Launch service available.

AIRPORT: Ras Al Khaimah has an international airport but Dubai Airport has greater frequency of flights.

SHORE LEAVE: Permitted.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: Offshore facility – no services.

WEATHER: The winds in the Southern part of the Gulf are usually l and generally blow from the Western quadrant most of the year but a occasionally interrupted by winds from varying directions. The visib along the Ras Al Khaimah coastline is generally good, but from June September the Shamal blows over the Gulf area and frequently produ rough seas and stirs up dust clouds which can affect visibility at s The cold fronts which move down the Gulf from November to A frequently cause a North or N.W. wind of 20 knots or more along t Ras Al Khaimah coastline with accompanying swells.

High waves generally do not occur along the Ras Al Khaimah coast since the winds are usually light in this area. On those occasions wh the wind does become strong, the wave heights generally remain limi since the distance over which the wind can blow to generate waves relatively short from most directions. This is due to the bend in the G which tends to reduce the fetch of North winds (e.g. waves over 8 occur 0.2% of the time).

Currents are omnidirectional and variable in strength. During the mo of January 1984, currents in excess of 1 knot were recorded.

SAFETY: *Safety Requirements:* Masters will be given the RAKG Safety Requirement Letter by the RAKGAS Mooring Master prior commencement of berthing operations, and a signed acknowledgem will be required.

Safety Check List: On completion of berthing and prior to t commencement of deballasting or cargo loading, the Ship Safety Che List will be completed following a joint inspection by the RAKG Mooring Master and a responsible export tanker's officer. The RAKG Safety Check List is based on the recommendations of the "Internatio Safety Guide for Oil Tankers and Terminals" (ISGOTT).

GENERAL: *Operating Procedures:* Procedures for cargo and ball operations shall be agreed in writing between the RAKGAS Moor Master and the export tanker's Master and Chief Officer.

Flags: The national flags of the United Arab Emirates and Ras Khaimah shall be permanently displayed by vessels at the Hulay Terminal.

Alcohol: Masters are advised that drinking or sale of alcoholic beverag is strictly forbidden to U.A.E. National Citizens and are warned of t serious consequences of offering such drinks to the Terminal staff w may board the vessel.

Storing: It is not permitted to load stores while berthed at the SPM.

Agency: RAKGAS does not perform any vessel Agency functio Vessels calling at the Hulaylah Terminal are required to arrange th own Agency representation from an Agency operating in Ras Khaimah.

AUTHORITY: Ras Al Khaimah Gas Commission (RAKGAS), P.O.B 434, Ras Al Khaimah, United Arab Emirates. *Tel:* (07) 222555, 6683 *Telex:* 99155 Raknoc Em. *FAX:* (07) 222733, 6680 *Contact:* D. Van Galen Last, Manager (Tel: 222555). E.J. Shree Operations Superintendent.

AGENT: See "Mina Saqr".

JEBEL ALI, Dubai: 25.00 N., 55.03 E. (See Pla

FLAG: U.A.E. and Dubai Emirate.

LOCATION: The Port of Jebel Ali is a major port situated some 35 S.W. of the city of Dubai.

The Port Control Tower is situated in position Lat. 24° 59.4' Long. 55° 02.9' E.

The Jebel Ali approach channel commences 12 km. off shore, entrance to the channel being marked by a fairway buoy. The buo situated in Lat. 25° 06.9' N., Long. 54° 56.5' E.

The approach channel with a depth of 15.0 m. is buoyed and run a direction 315°T – 135°T towards the port. After 10.5 km. the cha takes a 25° bend and becomes the entrance channel which leads the port on an alignment of 340°T – 160°T.

The approach channel has a width of 280 m. reducing to 235 m the bend the channel widens to 300 m. and in the entrance chann 340 m.

The Outer Basin is 2.3 km. long and 600 m. wide with depth of 14 and the Inner Basin is 3.7 km. long and 425 m. wide with a dept 11.5 m. The main axis of both basins is 047° – 227°.

All channel, basin and docks' bottoms are sandstone.

A dual purpose berth for LPG and other tankers is situated in the o basin. Ships using this berth, for which a berth booking system opera will generally be berthed starboard side to. A second tanker berth been opened at Berth No. 2 in the 14 m. basin and is used main vessels loading or discharging high flash point products. On this b vessels will normally berth starboard side to. A chemical tanker be situated on Quay 7, Berth 51, with depth of water at 11.5 m. Ves may berth port or starboard side to. No ballast reception facilities provided at these berths.

In all other berths ships can secure port or starboard side to.

DOCUMENTS: The following documentation shall be delivered t Authority's Documentation Section at least 48 hours prior to the ves arrival. The Authority reserves the right not to commence o operations until the below listed documents are received.

(a) Discharging Vessels

3 copies Cargo Stowage Plans
3 copies Cargo Manifests
3 copies Cargo Declaration
3 copies Crew List
3 copies Hazardous and Dangerous Cargo Declaration
3 copies Hatch List
3 copies Arrival/Cargo Advice
1 copy Each Bill of Lading/Packing List
3 copies Passenger Manifest

(b) *Loading Vessels:*
- 3 copies Cargo Stowage Plans
- 3 copies Cargo Loading List
- 8 copies Hazardous and Dangerous Cargo Declaration
- 1 copy Customs Endorsed Export Declaration (for each consignment).
- 3 copies Passenger Manifest

On completion of loading, 3 copies of the vessel Manifest endorsed by Ports & Customs must be provided.

Note: For categories (a) and (b), in the absence of any hazardous or dangerous cargo, "Nil" Declaration *must* be made.

(c) *Tankers:*
- 3 copies Manifest
- 3 copies Cargo Plans
- 1 copy Certificate of discharge of previous cargo.

A copy of the "Notice of Readiness" should be made available to the Harbour Master on rquest.

Immigration: Three Crew Lists are required on arrival.

Immigration Offices are established in the port. The service is available 24 hours a day. However, Masters should advise their Agent that the ship may leave outside normal office hours and that the Agent should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Masters are advised that "Immigration Clearance" must be on board and sighted by the Pilot before he can take the vessel to sea.

MINIMUM REQUIREMENTS:

In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:
- (i) Fully operational Radar.
- (ii) Fully operational VHF Radio with normal marine channels.
- (iii) Sufficient crew to handle tugs' lines and moorings efficiently.
- (iv) Efficient propulsion and deck machinery.
- (v) Efficient and adequate moorings to secure vessel safely.
- (vi) Efficient signalling equipment.
- (vii) Fully operational Tachometer, Rudder and Helm indicators.
- (viii) Efficient mooring stations communications systems.
- (ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master should be advised prior to arrival via "Jebel Ali Port Control".

APPROACHES: Ships should make for "Mina Jebel Ali" light float in position Lat. 25° 10.5' N., Long. 54° 52.3' E. (Gp. Fl.3 every 12 secs. 15 miles). This float lies on the axis of the channel leading into Jebel Ali Port, i.e. from this float vessel should steer 135° to approach Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of the buoyed channel, marked by a fairway buoy. This buoy is a safe water mark painted red and white vertical stripes. Light character is LF1. 10 sec. The centre of this waiting area, with a radius of 1 mile, is Lat. 25° 09' N. and Long. 54° 54' E.

PILOTAGE: Pilots are available on a 24-hour/day basis. Ships requiring a Pilot should call "Jebel Ali Port Control" on VHF Channel 16 at least 2 hours before arrival at Pilot Boarding Area.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Jebel Ali shall be under the charge of a pilot.

The following ships will be excepted ships:
- (i) Ships of War.
- (ii) Pleasure Craft.
- (iii) Ships of less than 150 n.r.t.
- (iv) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Gulf.
- (v) Tenders of M.E.N.A.S.
- (vi) Country Craft.

Pilots will board from fast launches, marked "Pilots" equipped with VHF, watch kept on Channel 16. Call sign "Jebel Ali Pilots".

Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area, but vessels may be instructed to approach the channel entrance by Port Control.

Outbound ships should request Pilot at least one hour prior to departure. Masters should obtain "Master's Report" from the Inward Pilot and return it completed before the Pilot leaves. Masters are advised, that Outward Pilot cannot take the ship to sea, without having sighted valid "Immigration Clearance" first.

Pilot Boarding Areas: The Pilot boarding area is located North of the channel entrance. The centre of this area is in position Lat. 25° 09' N., Long. 54° 54' E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the above mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:
- (i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
- (ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
- (iii) Every pilot ladder shall be secured in a positon where the Pilot can gain convenient access to the ship after climbing not less than 5 ft. and not more than 30 ft..
- (iv) Whenever the distance from the water to the point of access to the ship exceeds 30 ft., access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
- (v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.
- (vi) Lifebuoy and heaving line should be available at the ladder.
- (vii) When a pilot hoist is provided as the method of access, it must be of an "approved" type, complying with the recommendations of the "European Maritime Pilots Association".

ANCHORAGE: The holding ground is poor, ships are recommended to use more chain than usual.

The anchorage is an area enclosed by the following four positions:

1.	Lat. 25° 11.3' N.	Long. 54° 49.8' E.
2.	Lat. 25° 08.3' N.	Long. 54° 53.2' E.
3.	Lat. 25° 04.9' N.	Long. 54° 49.5' E.
4.	Lat. 25° 07.9' N.	Long. 54° 46.2' E.

Ships will anchor here in a depth of approximately 16 m. – 20 m. (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipeline lies East of the channel. This line comes ashore in position 25° 01' N., 55° 04' 30" E. From this position it lies in a direction of 345° for approximately 10 miles, thence assumes a direction of 313° towards the "Fatah Field" i.e. it is from 2 to 5 miles East of the buoyed entrance channel. Other untrenched pipelines are laid on the seabed and are clearly marked on the Admiralty Charts of the area. Ships should **not** anchor near this or other pipelines, nor should they approach the area with anchors walked back or trailing.

MAX. SIZE: No limit on LOA except Tanker Berth. Max. LOA Tanker Berth 273 m.

Also see "Berthing", "Bulk Handling Facilities" and "Tankers".

RADIO: *ETA requirements:* (Also see "Tankers").

Vessels arriving at the Port of Jebel Ali are required to provide the Harbour Authority with the following estimated times of arrival:
- (i) At least 48 hours prior to arrival or on leaving the last port, whichever is later, via Bahrain Radio, Inmarsat, Telex No. 47398 DPA EM or Fax: 04-835430. Ship/shore telephone may be used on 04-835326 only.
- (ii) Confirm the vessel's estimated time of arrival at least 24 hours before arrival at the designated pilotage area.

Communications: The Port radio station maintains continuous listening watch on VHF Channels 16 and 69. The Port Emergency Channel is 18A. On coming within VHF range of "Jebel Ali Port Control", vessels should establish VHF contact for the purpose of updating the estimated time of arrival, and at least 2 hours' notice of arrival in the Boarding Area should be given.

Vessels are warned that VHF Channels are monitored and taperecorded and any misuse of VHF Channels will be reported to the proper Authorities.

Notice of Arrival: Each vessel Owner, Operator or Charterer expecting to dock a vessel at the port for the purpose of loading or discharging cargo shall give the Authority 2 days prior notice of the arrival of such vessel and furnish such information as the Authority may require. Reconfirmation of the vessel's arrival shall be made by the vessel's Master on the day prior to arrival.

Pre-Arrival Information: Prior to arrival, all vessels regardless of tonnage calling at the Port of Jebel Ali should provide "Jebel Ali Port Control" with the following information:
- (i) Name of vessel
- (ii) Port of Registry
- (iii) Name of Master
- (iv) Gross Tonnage
- (v) LOA
- (vi) Draft
- (vii) Cargo to discharge or load
- (viii) Pilot boarding arrangements
- (ix) Number of crew, indicating the number of deck crew available for manoeuvring
- (x) Health information
- (xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: VTS harbour radar in Port Control Tower in position 29° 59.4' N., 55° 02.9' E.

The Control Tower is equipped with a Sperry Radar Vessel Traffic System. This equipment consists of a dual radar system combined with a data processor and computer. Traffic movements are monitored, and recorded within the Port limits and approaches. The Tower is continually manned by qualified Radar/Radio Operators.

TUGS: Three fire-fighting tugs "Asad", "Namer" and "Shadeed" are maintained in service by Dubai Ports Authority. These tugs are fully equipped with radar, VHF, towing winches and towlines. "Asad" and "Namer" are of 2,300 h.p. with a bollard pull of over 30 tons; "Shadeed" is of 3,100 h.p. with a bollard pull of over 40 tons. These vessels are fitted with multi-channel VHF radios. Other privately owned tugs are occasionally available in the port to assist if necessary.

Mooring boats: Three mooring boats, the "Dina", "Laila" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING:

Berths No. 1 – 17: Depth 14.0 m.
Berths No. 18 – 66: Depth 11.5 m.
Tanker/LPG Berth No. 1: Depth 15 m.
Tanker Berth No.2: Depth 14 m.
"Star Energy" Berths: Depth 14.0 m.
Bulk Grain Berths: Depth 14.0 m.
Dubal Terminal: Depth 14.0 m.

Moorings: Bollards on the various quays and wharves are of capacity and spacing as listed below.

Quay/Wharf	*Capacity* (Tonnes)	*Spacing* (m.)
1, 2, 3	100	27
4A, 4B	70	30
5, 6, 7	70	30
8, 8 Basin	30	30
9 West	70	30
9 East, 10	70	20
West Wharf	15	14.4
East Wharf	15	14.4
Bitumen Wharf	30	20

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns for ship sizes. The average rise and fall is 1.14 m.

There are special 250 tonne bollards on Berths No. 5, 7, 22, 23, 25, 26, 43, 44, 45, 46, 48 and 49 for vessels over 300 m. in length. These berths can cater for laid-up VLCCs and are fitted with electric points and shore telephone points. All berths can be connected to fresh water points. Enquiries for further information and conditions to the Harbour Master.

General Cargo Areas: These are located on Quays No. 5, 6 and 10 with 21 m. – 30 m. wide paved aprons, covered and open storage, truck delivery and receiving docks.

Prior arrangements must be made with the Cargo Handling Manager for the discharge of obnoxious and hazardous cargo.

Storage: Seven transit warehouses provide more than 50,000 sq.m. of covered storage. Nine Dutch barns provide 24,000 sq.m. of semi-covered storage. Over 400,000 sq.m. paved open storage areas are provided.

Equipment: A full supply of supporting cargo handling equipment to complement general cargo operations is available. This includes 5 mobile hydraulic cranes (1×20 tons, 2×40 tons, 1×60 tons and 1×100 tons capacity) and 2 Gottwald cranes (1×260 E and 1×280 E) capable of lifting 80 tons and 100 tons respectively. Port Operations should be contacted to verify weight limits at various radii.

Ro-Ro Terminal: The Ro-Ro Terminal is situated at Berths 32-34, with two ramps specially designed for stern discharging vessels, and a water depth of 11.5 m.

Cold Store: The Cold Store is situated at Berth 31 and has a capacity of approximately 7,000 tons. Temperature can be separately controlled in each of eight rooms in the range of −29°C. to 13°C.

BULK HANDLING FACILITIES: *Dubai Terminal:* This facility is located on Quay 1, Berth No. 1. A travelling unloader equipped with 2 booms having a travel of 140 m. is used for discharging of alumina powder. Hourly capacity 380 t.p.h. through 2 booms. Outreach of boom 27 m. Max. draft 13.25 m.

Bulk Grain Terminal: This facility is located on Quay 1, Berths No. 3 – 4. Two travelling loader/unloader arms, with an outreach of 22.5 m. and a loading/unloading rate of approximately 800 t.p.h. each, are installed, and can travel 460 m. parallel with quay face. Max. draft 13.25 m.

CONTAINER FACILITIES: The Container Terminal is situated at Berths No. 13 – 17, totalling 1,535 m., with 60 m. wide concrete aprons and a water depth of 14 m. Max. draft 13.25 m.

Storage: The Container Yard can accommodate over 46,000 T.E.U's.

The Container Freight Station provides 10,000 sq. m. of covered storage.

Temperature-controlled warehouse provides 6,700 sq.m. of cool storage at +10°C to +15°C as required.

Equipment: 2 fourth generation Reggianis, 1 third generation Deer Park, 3 third generation Mitsubishi and 2 Hitachi. All gantries are electric with telescopic spreaders to handle 20 ft., 35 ft., 40 ft. and 45 ft. containers and appropriate fittings for overheight and flat rack units. Maximum crane specifications:

S.W.L. under the spreader	41.0 tons.
S.W.L. under cargo hook beam	51.0 tons.
Distance from face or rubber fender to centre line of container at maximum outreach	43.0 m.
Top of container at maximum lift above quay level	32.3 m.
Top of container at lowest position below quay level	16.5 m.
Quay level above highest tide	2.0 m. (6 ft. 6 in.)
Quay level above lowest tide	4.0 m. (13 ft. 1 in.)
Container crane travel	1,535 m.
Container crane reach behind back rail	15.0 m.
Maximum weight of 20 ft., 35 ft., 40 ft. and 45 ft. container handled by spreader	41 tons
Maximum heavy lift with spreader removed	80 tons.

34 rubber tyred gantries, 30 at 1 over 5 stack height, four at 1 over 4 stack height. 20 toploaders of 35 tons capacity and 16 empty container handler lift trucks.

400 × 380 Volt reefer ISO and 42 × 230 Volt Mipco refrigerated container plugs with 24 hour monitoring service.

Flat bed trailers, low bed trailers, tractor units, mafis, goosenecks and an assortment of trucks.

Truck scale with a capacity of 50 tons.

A container cleaning service is available.

Container Terminal Crane Booking: Dubai Ports Authority operates a Crane Booking System for the Container Terminal. Cranes are booked in order of receipt of request. Agents should be consulted to assure timely booking of container cranes.

STEVEDORES: Dubai Port Authority (Jebel Ali).

Normal Working Hours:

The normal working hours from Saturdays to Thursdays inclusive (but excluding Public Holidays) will be 0700 hrs. – 1200 hrs. and 1300 hrs. – 1600 hrs.

Any activity outside of normal working hours must be arranged with the Authority and overtime rates may apply.

Working hours are subject to change during the month of Ramadan.

MEDICAL: Medical facilities are provided by Dubai Hospitals, arrangements should be made by Agents. 24 hour emergency medical services are available. Ships should call Jebel Ali Port Control on VHF Channel 16 (Tel: 04-835251) or Port Security (Tel: 04-816222) to arrange ambulance.

TANKERS: *Tanker/LPG Berth No. 1:* This berth provides facilities for product tankers as well as LPG and condensate carriers. 6 loading arms are available to handle Product tankers through 10 in. connections with reducers available. On the LPG half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is 15 m. Max. draft 14.00 m. on H.W. Max. LOA 273 m.

This berth is equipped with mooring hooks of 100 tons strength, each fitted with electric capstan. The hooks are tripped manually.

Tankers will generally be berthed starboard side to the Berth.

Tanker Berth No. 2: This berth provides facilities for product tank using 10 in. Chicksan arms. For certain products flexible pipe connections are permissible. Various reducers are available. On t berth, Class 1 products can also be handled. Max. draft 13.25 Max. LOA 225 m.

Chemical Tanker Berth: A designated Chemical Tanker berth operational at Berth No. 51. Depth of water at the berth is 11.5 Max. draft 10.75 m.

"Star Energy Resources" Berths: Star Energy Resources oper 2 product tanker berths on Quay 2 (Berths No. 8 and 9). Two ships u 255 m. LOA each can be accommodated simultaneously on the berths, which are equipped with 2×12 in. Chicksan arms. Berths a also equipped with mooring hook assemblies, each fitted with capsta The hooks are tripped manually. Maximum draft 13.25 m. Tankers c be berthed port or starboard side to the quay.

Vessels are warned that no dirty ballast discharge will be allow within the limits of Jebel Ali. There are no shore ballast reception facilit

Also see "General".

Vessel Requirements: Below, are details of information required by t terminal operators for accepting vessels for LPG, LNG and Condensa loading and Port Authority of Jebel Ali's requirements and regulatio for a tanker in berth.

Dubai Port Authority (Jebel Ali) – Tanker Berth: Uniform mooring syst is advisable, i.e., all synthetic or all wire for all moorings exce backsprings. D.P.A. does not allow the use of nylon tails on w moorings. Backsprings must be of wire.

Concerning deballasting requirements P.A.J.A. allows the dischar of permanent segregated clean ballast in the harbour. Clean tank ball can only be discharged if a surveyor appointed by Agents at Owne Charterer's expense, certifies that the tank ballast is clean, that all car pumps and lines are clean and the surveyor remains on board to witne and if necessary stop the discharging of cargo tank ballast if it prov to be unclean. This operation takes place during daylight hours only

It is also recommended that all efforts be made to cut down time tak by ships for documentation purposes after completion.

Bunkers may not be taken during cargo operations.

On all occasions, D.P.A. would berth all ships starboard-side-to the tanker berth unless some particular "one off" technical reas prevents this.

LPG – Vessel Particulars: The following items shall be submitted w each vessel nomination. In the event that all the data is not availab the nominated vessel acceptance shall be tentative and subject to t approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection: (a) Size. (b) Rating. (c) System – ASA/Met British, etc.
7. Height of the loading connection from the centre line of the flan to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading and vapour return connection centr
10. Distance from the loading flange to the first obstacle toward manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Manifold sequence of the loading and vapour return connectio
14. Loading rate per product for this particular lifting.
15. Cargo tanks temperature per product upon vessel arrival at loading port.
16. Can propane and butane be loaded simultaneously?
17. Cargo on board, its origin and specification per tank upon ves arrival for loading.
18. Vessel meets Government, D.P.A. and seller regulation, or spe which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screens in their mani during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quanti be loaded and its ETA 72, 48 and 24 hours before the first da the vessel's scheduled ETA.
25. Can propane and butane be purged and/or cooled simultaneou (If applicable.)

LNG – Vessel Particulars: The following items shall be submitted each vessel nomination. In the event that all the data is not avail the nominated vessel acceptance shall be tentative and subject t approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the f to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Distance from the loading flange to the first obstacle towa manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Vessel gas vapour venting system.

14. Loading rate for this particular lifting, per single loading arm connection.
15. Ballast on board condition (clean, dirty, etc.).
16. Deballasting estimated time required after berthing.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, D.P.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screen in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.

Condensate – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Arco Dubai.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, arrival draft fore and aft, estimated departure draft, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
   (d) Is manifold located centre line of LOA.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Flange thickness. Maximum acceptable: 37 mm.
11. Clearance behind connecting flange for coupling claws. Minimum requirement: 240 mm.
12. Height of the ship's rail in front of the loading manifold.
13. Previous cargo and its origin.
14. Loading rate for this particular lifting. Minimum requirement 25,000 bbls p.h. per single loading arm connection.
15. Specify quantity of permanent and cargo tank ballast on board. Only permanent segregated ballast discharge allowed at Jebel Ali port. Repeat only permanent segregated ballast discharge allowed.
16. Estimated deballasting time required after berthing. Specify if simultaneous with loading.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel in possession of reducers, their type, size and rating.
19. Please confirm agreement release inert gas pressure in all tanks for inspection by Arco Surveyor.
20. Buyer or Agent to notify Arco of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
21. Arco Dubai advise starboard side alongside.
22. Arco Dubai advise loading arm size nominal 16 in. with provision for 16, 14 and 12 in. connection by hydraulic coupler.
23. Quantity to be loaded, in barrels. Arco Dubai advise
    API:– Temp.:–

DENSITY: 1032.

FRESH WATER: Supplied by Dubai Water Department (Tel: 04-816749). Order through Agents. Water laid on at all berths.

FUEL: A Bunkering Barge is stationed in Jebel Ali operated by "E.P.P. Co.". Arrangements for bunkers are to be made through vessels' Agents. Barge can deliver diesel oil and/or fuel oil. Delivery by road tanker also available. Tel: 04-816759.

Lubricating Oils: Available, transported by road.

CONSULS: Embassies and Consulates in Dubai (Area Code 04).

Embassies:

Germany	Tel: 523352
United Kingdom	Tel: 521070

Consulates:

Bangladesh	Tel: 628966.	Norway	Tel: 533833
China	Tel: 453357	Pakistan	Tel: 524412
Egypt	Tel: 511222	Panama	Tel: 263366
France	Tel: 232442	Qatar	Tel: 221216

Malaysia	Tel: 285695	U.S.A.	Tel: 313115
Netherlands	Tel: 528700		

The foregoing are Embassies and Consulates situated in Dubai. Most countries maintain diplomatic missions/embassies, etc., in Abu Dhabi – some 120 km. from Jebel Ali.

REPAIRS: Berths are available for afloat repairs to be done by local contractors.

Lay-up Berths for long and short periods can be arranged for vessels up to 550,000 d.w.t. with draft up to 13.25 m. Special bollards are installed to provide 6 berths for ULCC class vessels.

Marine engineering firms with specialised workshops in Dubai, undertake engineering repairs. Agents will make necessary arrangements.

Repairs to radar, radio, echo sounders and other electronic navigational and communication aids are available by major manufacturers' Agents, (i.e. Marconi, Decca, Kelvin-Hughes, Telefunken, etc.), being represented in Dubai and sets serviced by trained engineers. Agents will advise.

A Port Authority diver can be arranged through vessel's Agent.

SURVEYORS: Lloyd's, B.V., A.B.S., N.V., N.K. and the Salvage Association as well as other private qualified cargo, hull and engine surveyors and consultants are available.

Gas Free Certificates, Inert Gas Certificates and Hot Work Permits can be obtained through independent qualified surveyors who must be on Dubai Port's Authority (Jebel Ali) approved list. Agents will arrange.

Surveys: The following surveys and certification can be carried out in Jebel Ali: Load Line, Safety Equipment, Safety Construction, Radio.

TELEPHONES: Ship board telephones available by arrangement.

Important Telephone Numbers at Jebel Ali:

Port Control	835326
Harbour Master & Port Control	835251
Police	816111
Port Health	816892
Customs	816374/5
Immigration	816844/816334
Ambulance and Fire Service	816222 (24 hours)
Security	816846/816578 ext. 218, 232, 394, 395

SHORE LEAVE: The following is the standard procedure for shore leave as dictated by the Port Immigration Department.

Crew members wishing to go ashore are to report to the Port Immigration Office (Agent to arrange) and collect a "Marine Landing Permit" which should be carried at all times. On returning to the ship, the permit should be handed back to the Port Police. The process is to be repeated on every subsequent shore leave.

GARBAGE DISPOSAL: Skips are compulsory for domestic garbage and are provided alongside ships and changed as necessary. Charges Drhs. 70 per day and Drhs. 150 per skip change. Skips can also be rented for industrial garbage. Contact Harbour Master for details.

WASTE OIL DISPOSAL: The port has no waste oil disposal facilities but several local companies can arrange disposal by tanker truck. All agents can arrange these facilities. Charges are negotiable. Municipality kapproval is required. Contact Harbour Master for details.

SEAMAN'S CLUBS: International Seamen's Club (Tel: 435551). Norwegian Seamen's Mission (Tel: 470561/3). Jebel Ali International Seamen's Centre: Situated on Quay No. 10. Tel: 835297. Hours: 1100-2359 daily. Facilities: Bus service to and from berths; international telephones; post box and stamps; small shop for tobacco, toiletries, writing materials, etc.; money changing; pool and darts; T.V. and video; library; snacks and full bar service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.65 (Fixed Rate).

WEATHER: *Weather and Currents:* Cross currents of up to 1.75 knots may be experienced in the Approach Channel. These currents are wind and tide induced.

Fresh winds are frequently experienced at Jebel Ali. However, during evening, night and morning hours, light Southeasterly winds prevail, veering to N.W. by noon and freshening to Force 4-5.

On occasions, especially during November-March, fog may be prevalent during early morning.

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned that no dirty ballast, bilges, etc., should be pumped out in the vicinity of the Port of Jebel Ali. Offenders will be prosecuted and the U.A.E. and Dubai Police maintain maritime and helicopter patrols to ensure no dirty ballast is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Master may instruct offending vessels to leave or bar them from returning to Jebel Ali.

Rubbish skips supplied by the Port Authority at a charge and are compulsory.

Ballast Requirements: For the purpose of safe manoeuvring, the Harbour Master requires all vessels to maintain an acceptable ballasted condition.

Vessels should carry sufficient ballast so that the propeller can have maximum immersion whilst maintaining an acceptable stern trim.

Masters are reminded that no dirty ballast will be allowed to be discharged in Jebel Ali.

Tanker Ballast Discharge Rules:

1. Clean water ballast from tankers segregated ballast tanks may be discharged overside.

2. Clean water ballast from dedicated clean ballast tanks as defined in Marpol 73/78 may also be discharged in the port. However, if no separate ballast pumping system exists then such discharge must be monitored by an independent surveyor and the ballast discharged must be certified clean. This discharge operation may take place during daylight hours only.

3. Ships in the "C.O.W." mode may not discharge ballast from cargo tanks, unless such tanks have been thoroughly cleaned and have reverted to the status of C.B.T. since last carrying oil.

4. "Clean" ballast means ballast containing less than 15 parts per million of Hydro Carbons.

5. Not withstanding all the above, if any visible signs of pollution are seen on or below the surface around the ship discharging ballast, the ballast discharge will be stopped and no further discharge will be permitted.

Fumigation: Fumigation can be carried out by specialist firms.

Ships' Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Dubai. Arrangements through Agent and/or through direct VHF contacts with ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Visitors Port Passes: Any Person entering the Port is required to have either a permanent or visitors temporary/day pass. Passes can be obtained from the Pass Office situated at the Main Entrance. The Pass Office operates daily from 0700 hours to 1900 hours.

Permanent passes cost Dh. 25 each and are valid for 12 calendar months from date of issue. Applicants are required to produce a Sponsor's letter and complete an application for Pass Form. Documents such as Passports and photographs are not required.

Temporary or Day passes which are free of charge are only issued to irregular visitors who have a confirmed appointment to visit the Port. No more than one of these passes a month will be issued to any individual. Day Passes can be obtained from the Pass Office or any Terminal Checkpoint.

Shops: A small supermarket is open in the port. Hours of work are: 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: A bank complex is situated just outside of the port main gate. Most major banks or their correspondents have branches there.

Transport: Arrangements for taxis can only be made through the Agent.

Charts and Publications:

Charts:

British Admiralty Charts 2889, 3176, 3739.

Pilot Books: Admiralty Sailing Directions Volume No. 63, Defence Mapping Agency Publication No. 62.

Lights: Admiralty List of Lights Volume D. United States List of Lights Publication No. 117B (Pacific/Indian Ocean Area).

Radio Aids:

British: Admiralty List of Radio Signals, Volume 6.

American: Radio Navigational Aids (Defence Mapping Agency), Publication No. 117B (Pacific/Indian Ocean Area).

SHIPMASTER'S REPORT: June 1990.

Location: A third tanker loading/discharging facility is situated at Berths No. 8 and No. 9, on the N.E. face of the 14 m. basin. This facility is operated by Star Energy Corporation (See "Berthing").

Star Energy are based in Abu Dhabi, Telex No. 24160.

Documents: The documents listed in the "Guide" do not apply to tankers. Requirements for tankers are:

- 1 copy Arrival/Cargo Advice (supplied by Pilot).
- 2 copies Bonded Stores List.
- 2 copies Drugs and Firearms Declaration.
- 2 copies Crew Declaration.
- 3 copies Crew List.
- 1 copy Maritime Declaration of Health (only if sickness on board, or if it is necessary to have any vaccinations performed).

Ship's Agency also usually has own Arrival/Sailing forms to be completed.

Anchorage: The Eastern corner of the anchorage area has been found to have very poor holding ground, and it is suspected that there may be scattered coral heads in this area, as this vessel dragged anchor there in moderate weather conditions, and anchor flukes were later found to have been damaged by the nature of the bottom.

Radio: Jebel Ali Port Control listen on Channel 16, and usually conducts operations thereafter on Channel 69.

Tugs: There are usually 3 modern tugs, owned by the Port Authority, on duty: The 'Asad', 'Namer' and 'Shadeed'.

Tankers: Tanker Berth No. 8: Alongside continuous fendered quay at N.E. end of 14 m. basin, equipped with 1×12 in. Chickan arm. Products handled at present are naphtha, gas oil and fuel oil.

Tanker Berth No. 9: Adjacent to No. 8, on same continuous quay, equipped with 2×12 in. Chicksan arms. As far as is known same products handled as at Berth No. 8.

Both berths can accommodate product carriers of up to, and sometimes in excess of 100,000 d.w.t., the larger vessels usually only part-load.

The terminal acts as a trans-shipment depot, for oil products supplied from other ports and refineries in the Gulf.

Vessels are berthed either side alongside at both berths.

Star Energy Complex: This is a self-contained area within the Jebel Ali Port Complex. The Operators enforce very strict security and safety procedures.

Crew members are not permitted to wander about or walk to the entrance gate, but must use the transport provided. This only operates on the hour, being summoned by radio. A pass is issued to each person leaving the area, and also a book must be signed. The passes will allow re-entry to the area on return, and are quite separate from the passes required by the Immigration Authorities. Provided the seamen are not leaving the Port Complex itself, e.g. visiting the Seaman's Club, no further passes are necessary.

Should, however, anyone wish to leave the Jebel Ali Port Area itself, to go to Dubai, the following procedure is necessary.

On arrival, most Shipping Agents supply forms which act as requests to the Immigration Authorities to issue a Shore Pass. This form is taken, along with a Passport size photo, and either Seaman's Book or Passport, to the Immigration Office near the Main Gate. An official pass will then be issued, with the photo affixed, after which the individual may leave the Port Area. *It is very important that this document is not lost.*

On return to Jebel Ali, the reverse procedure is necessary, presentation of the official pass will usually obtain the return of the identity document, after which the individual may proceed to his vessel. If the vessel is berthed at the Star Energy facility, their previously mentioned pass is required for admittance.

There are occasions when it may not be possible for individuals to recover their identity documents personally, or some may not have time to wait, in which case the official passes should be returned to the Master, and the Agent can take these to Immigration when Clearance is sought, when the documents in question will be given to him for return to the vessel. Clearance will not be issued until everything is in order, which is the reason for taking care not to allow anything to happen to the official pass.

Lengthy delays may be incurred in the case of any lost pass, as the individual in question must then go, in person, with the Agent, to the Immigration Office, if possible with an explanatory letter from the ship's Master. The procedure outlined above must be adhered to, so that there are no problems.

Departure: Pilots require minimum 1 hour's notice, via Harbour Con of vessel's sailing time. They are required to sight the clearance bef leaving the berth, therefore it has been found advisable to actually ha it on board before confirming sailing time.

AUTHORITY: Dubai Port Authority (Jebel Ali), P.O.Box 17000, Dub U.A.E. *Tel:* Jebel Ali (04) 835251/816578. *Telex:* 47398 DPA E *FAX:* Jebel Ali (04) 816093, 835430 (Marine). *Contact:* Capta P.J. Derry, Harbour Master. Captain J.P. Snape, Assistant Harbo Master. D. Gibbons, Executive Director.

Two Port Officers working on rotational basis represent the P Authority at the Port. They are Captain A.Osman and Captain S.A.Sha Telex: 52207 Apocru Em. Tel: Ruwais (081) 72089. Fax: (081) 721

PORT LIMITS: All waters Southward of Lat. 24° 26' 48" N., to the co up to Spring High Water Mark, between meridians of Long. 52° 33' 36 and Long. 52° 46' 36" E., (that is, with reference to Chart 3780 B.A USHO, the whole waters of that Chart) and shall include all jett wharves, structures, sea-berths, reefs, rocks, sand-bars and islan excluding Sir Bani Yas Island, within the said area.

PILOTAGE: Pilotage is compulsory for all ships navigating within limits other than exempted ships (See "General"). Ships may, howe drop anchor or sail from Gasha Anchorage without a Pilot. This ru not applicable to U.A.E. Naval, Coast Guard vessels or country c who may, having ascertained channel clearance from Port Con proceed without the service of a Pilot.

Pilot Station: Pilots will board and disembark at the main Gasha P Station as delineated on B.A. Chart No. 3780.

Use of North Channel: Masters of Exempted ships of suitable draft sh use the North Channel and East Yabr Relief Channel when enterin leaving the port.

Pilotage Exemption Certificate: Port Pilotage Exemption Certificate be granted to Masters of regular trading vessels of less than 3,000 upon the Port Officer's satisfaction of their competency. Such certific shall be renewed annually.

Berthing and Unberthing at Oil and Gas Berths: Notwithstanding any contained in these Rules berthing or unberthing at oil and gas bert Jebel Dhanna or Ruwais shall be under the control of a Pilot.

Pilot Ladder: A clean and efficient pilot ladder fitted with spreaders manropes shall be made available for the Pilot to embark or disem and at night the ladder shall be illuminated with an efficient and light.

Accommodation Ladder and Pilot Ladder: Whenever as in the cas large vessels, the height of the deck above the water exceeds 3 the accommodation ladder shall also be used in conjunction wi pilot ladder, and shall be lowered to about 22 ft. (7.0 m.) above the with the pilot ladder immediately adjacent to the bottom platform accommodation ladder.

Mechanical Hoist: A mechanical hoist of an approved pattern sh considered an acceptable alternative to a conventional pilot ladder used in conjunction with the accommodation ladder.

NOTE: Mechanical hoists whose operation relies upon a sing are not of approved pattern under these rules.

Supervision of Pilot Ladders: The rigging of the pilot ladders for the embarkation and disembarkation of Pilots shall be supervised by a responsible ship's officer, and shall be so effected that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the side of the ship.

Safe embarkation and disembarkation: A Master of any ship navigating in the port, shall afford such suitable "weather lee" and speed reductions as may be directed by the assigned Authority Pilot in order to provide a safe embarkation or disembarkation operation.

Pilot to Advise Course and Speed: Vessels navigating within Port Limits shall proceed on such a course and at such speed as the Pilot advises.

Provided that when passing through the inner anchorage areas every vessel whether under Pilotage charge, or navigated by her Master with an Exemption Certificate, shall proceed with caution and at a moderate speed duly considering other vessels and cargo operations in the area.

Small High Speed Vessels: High speed vessels as of "Crew Boat" type shall proceed at a moderate speed to reduce the wave making wash in the vicinity of vessels, working cargo, dredging or construction works, diving operations, etc., until past and clear of these vessels or operations.

Anchors Ready for Use: Every ship prior to any movement within the port shall have both Bower Anchors (if two fitted) prepared for immediate emergency use. Masters shall, however, consult with the assigned Pilot (if any) before lowering an anchor to the sea surface.

Any Damage to Ship to be Notified: Before entry the Master shall inform the Port Authority of any damage to the vessel or any projection from the hull above or below water which may affect the vessel's draft, shiphandling qualities or berthing capability.

NOTE:

To ensure greater safety in the Jebel Dhanna Channel, in consultation with Messrs ADPPOC and executive manager of Petroleum Ports Authority, it has been decided to minimise the amount of paperwork the Pilot is expected to complete while in transit from Gasha Beacon to inner anchorage area.

Therefore a vessel arriving at Gasha while tendering her "Notice of Readiness" will henceforth be required to pass to Jebel Dhanna:

1. Name of vessel.
2. Tonnage required.
3. Her maximum loading rate, always assuming 2×16 in. hoses.
4. Number of hours ballast.
5. Any health hazard infectious diseases/or none.
6. Draft outwardbound.
7. Any other pertinent information.

The Pilot is to obtain signature on "acceptance of port regulations" booklet prior to entering channel. All other documentation can be completed after vessel is made fast in the berth. This will ensure no distractions while in transit in the channel and further enhance the exemplary safety standards.

All parties are kindly requested to comply with the slight change in Jebel Dhanna/Ruwais documentation procedures to enhance safety requirements.

Note:

(i) The date, which the ship was built, is to be included in Ship's Particulars.

(ii) Vessels over 20 years old will be subject to a daylight safety inspection.

TIDAL STREAMS: In the outer approaches to Jebel Dhanna-Ruwais, tidal streams would appear to attain a maximum of 1 knot while 1.7 knots may be encountered in the channel N.E. of Jazirat Sir Bani Yas.

Tidal currents in the area of the berths seldom exceed 0.4 knots.

The tides are generally diurnal, winds from N.E. and N.W. may cause an increase up to 0.6 m. in the height of the tide.

The highest average, spring high tide is 2.0 m. above chart datum.

The highest average, neap high tide is 1.0 m. above chart datum.

AIDS TO NAVIGATION: Approaches to Jebel Dhanna-Ruwais (See Admiralty Charts No. 3778, 3779 and 3780).

The outer channel for deep drafted vessels between Jazirat Zarakhuh (Zirku) and Gasha Anchorage is marked by 6 buoys and 2 light floats as follows:

Name/No.	*Description*	*Characteristic*	*Position*
Outer Fairway	Safe Water Mark	Iso 10 secs.	24° 45' 48" N. 52° 53' 12" E.

Gasha	West Cardinal	Qk.Fl.(9) 15 secs.	24° 25' 46" N. 52° 34' 25" E.

MENAS Notice No. 49/92:

Southern Gulf:

Jebel Dhanna Outer Fairway. The following buoy stations have been established:

Position: Lat. 24° 36.70' N., Long. 52° 35.70' E.
Name: JBD 05A.
Character: Fl (3) 10 sec. Shape – Pillar. Colour – BYB.

Position: Lat. 24° 34.80' N., Long. 52° 32.40' E.
Name: JBD 06.
Character: Fl R 6 sec. Shape – Can. Colour – Red.

Charts effected B.A. 3779 and 3780.

A relief route known as North Channel passes from the outer fairway buoy S.E. of Creagh Shoal and enters the port East of Gasha Island. It is marked by:

Obstruction	Isolated Danger Mark	Gp.Fl.(2) 10 secs.	24° 37' 50" N. 52° 47' 17" E.
North Channel	Safe Water Mark	Iso. 10 secs.	24° 30' 00" N. 52° 41' 36" E.
West Kurkum	West Cardinal	Qk.Fl.(9) 15 secs.	24° 23' 51" N. 52° 41' 31" E.
East Gasha	Green Conical	Fl.G. 5 secs.	24° 23' 54" N. 52° 41' 15" E.

The least depth in this channel 7.5 m. (1980) occurs about 0.8 nautical miles North of the Gasha/Kurkum entrance.

A Beacon was established at Price Shoal (1980) consisting of a pile with a bottle chamber at the top and a gas lantern.

Price Shoal	Red Pile Structure	Fl. 5 secs. 12 m. 14 miles Racon "P" 48 secs.	24° 17' 24" N. 52° 42' 09" E.

ANCHORAGES: The main anchorage positions are defined on Chart No. 3780, and are identified by the letters of the alphabet. Vessels to anchor not less than 2 miles West of Gasha Buoy and to keep Channel Entrance clear.

Explosives Anchorage: Anchorage bounded by the following points:

(i) 24° 13' 30" N., 52° 44' 55" E.
(ii) 24° 12' 46" N., 52° 45' 48" E.
(iii) 24° 13' 18" N., 52° 46' 18" E.
(iv) 24° 14' 00" N., 52° 45' 27" E.

Explosives Buoy: Mooring buoy in position Lat. 24°09'36" N., Long. 52°46'18" E., for the purpose of temporary mooring of barges or pontoons carrying explosives.

CHANNELS:

Deep Water Channel: The channel marked at its outer end by:

Gasha Buoy in position Lat. 24° 25' 46" N., Long. 52° 34' 25" E. marked on the West side by:

Buoy No. 1 in	Lat. 24° 24' 28" N.	Long. 52° 36' 26" E.
No. 3	Lat. 24° 23' 50" N.	Long. 52° 37' 18" E.
No. 5	Lat. 24° 23' 02" N.	Long. 52° 38' 37" E.
No. 7	Lat. 24° 21' 33" N.	Long. 52° 40' 14" E.
No. 9	Lat. 24° 20' 33" N.	Long. 52° 41' 22" E.
No. 11	Lat. 24° 19' 49" N.	Long. 52° 41' 52" E.

CW4	in	Lat. 24° 08' 34" N.	Long. 52° 45' 08" E.

PROHIBITED AREAS: Prohibited Areas exist for a distance of 2 cables (1,200 ft. – 365 m.) around any berth at which any ship is engaged in loading or discharging any petroleum cargo of whatever description including crude oils and refined products whether in bulk or containers, LNG or LPG and no vessels or craft may enter such restricted areas without instructions from the Port Authority or Oil Company.

RESTRICTED AREAS:
Sea Berths: A restricted area exists around ADCO's sea-berths within an area bounded by a line from:

(a) Jebel Dhanna Jetty Light in Lat. 24° 11' 20" N., Long. 52° 37' 51" E., thence 359° to

(b) Light Beacon "T.13" in Lat. 24° 13' 06" N., Long. 52° 37' 49" E., thence 060° to

(c) in Lat. 24° 14' 00" N., Long. 52° 39' 30" E., thence to 139° to

(d) Buoy No. 17 in Lat. 24° 11' 41" N., Long. 52° 41' 42" E., thence 255.5° to the coast to

(e) in Lat. 24° 10' 48" N., Long. 52° 37' 57" E.

Navigation and anchorage within this area is strictly prohibited to all unauthorised vessels and those not under the control of a Pilot.

Refinery/GASCO/FERTIL: A restricted area exists around the Refinery, GASCO Jetties and FERTIL Jetties at Ruwais within an area bounded by a line from:

(a) in Lat. 24° 08' 36" N., Long. 52° 42' 12" E., thence 000° to
(b) in Lat. 24° 10' 24" N., Long. 52° 42' 12" E., thence 035.75° to
(c) in Lat. 24° 10' 48" N., Long. 52° 42' 30" E., thence 103.5° to
(d) in Lat. 24° 10' 18" N., Long. 52° 44' 42" E., thence 119.5° to
(e) in Lat. 24° 09' 57" N., Long. 52° 45' 24" E., thence 195° to
(f) Construction harbour jetty head in Lat. 24° 08' 12" N., Long. 52° 44' 54" E.

Navigation and anchorage is prohibited to all unauthorised vessels not under control of a Pilot. Within this area no vessel or craft may secure or make fast to the Petroleum Jetty without instruction from the Pilot, Port Officer or the Oil Company.

RESTRICTIONS:
Times of Entry or Leaving: Subject to limitations upon draft, under keel clearance and extreme adverse weather conditions, vessels may enter or leave at any time during the day or night.

Minimum Under Keel Clearance: To ensure safe channel passage, a minimum under keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:

(a) 3 ft. (0.91 m.) for ships of less than 100,000 Summer d.w.t.
(b) 4 ft. (1.22 m.) for ships between 100,000 and 250,000 Summer d.w.t.
(c) 5 ft. (1.52 m.) for ships of over 250,000 Summer d.w.t.

And such under keel clearance may be increased at any time at the Port Authority's discretion having due regard to weather conditions.

NOTE: While observing the safety requirements of under keel clearance, tidal delays may be experienced as follows:

(a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
(b) Ships drawing 45 ft. (13.7 m.) will rarely have to wait for the tide.
(c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
(d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
(e) Ships drawing 48 ft. (14.6 m.) will occasionally be neaped.
(f) Ships drawing 49 ft. (14.9 m.) will be neaped ±294 days per year.

The best months are June, July and August.

Meteorological conditions may reduce the height of the tide by up to 1 ft. (0.305 m.)

Movements Within the Port Limits: No vessel may enter, leave or move within the confines of the port unless permission for moving is first obtained from the Port Control Office.

Outward Priority: When one ship is ready to leave and another to enter simultaneously, a deep loaded outward bound ship which requires to transit the "Deep Water Channel" on account of draft in excess of 30 ft. (9.14 m.) shall have priority subject to the provisions of Rules mentioned above.

HEALTH: *Quarantine and Medical Clearance:* The standard International Declaration of Health is required upon arrival. Free Pratique is obtained by radio.

There are no facilities for Derat at Ruwais.

If Free Pratique has not been granted prior to the vessel's arrival, the Master may contact Port Control for advice/instruction as per Port Health instructions.

Every vessel within the port shall display the appropriate quarantine signals as prescribed in the International Code of Signals.

ARRIVAL/DEPARTURE NOTICES: *Notice of Arrival:* The Master Agent shall inform the Port Officer 72 hours prior to the vessel's arriv giving the following details:

1. Name of vessel.
2. Flag.
3. G.r.t., n.r.t. and Summer Deadweight.
4. Arrival draft.
5. Nature of cargo and amount to be discharged or loaded if know
6. ETA and subsequent amendments.
7. Deballasting time, type and quantity of ballast to be discharged
8. Inerting time.
9. Date of expiry of the following certificates:
   (a) Load Line.
   (b) Ship Safety Construction Certificate.
   (c) Ship Safety Equipment Certificate.
   (d) Ship Safety Radio-Telegraphy – as appropriate.
   (e) Ship Safety Radio-Telephony – as appropriate.
   (f) Oil Liability Certificate (TOVALOP).
   (g) International Oil Pollution Liability (CLC).
   (h) Derat/Exemption Certificate.
   (i) Any other service required.

And shall confirm or amend such information at 48 hours and 24 hou before arrival.

Vessels should also advise:

1. The date and final port and country of her last loading at an G or Omani port.

2. A list of ports and countries at which the vessel has called betwe 1. above and her arrival at Jebel Dhanna.

3. Should the tanker not have loaded in the Gulf or an Omani p since building, then a list of ports and countries at which the vessel h called from the date of building to her arrival at Jebel Dhanna.

In order to expedite Pilot attendance, Masters should endeavour confirm their final ETA to "Port Control" Jebel Dhanna/Ruwais on V radio, Channel 9, 6 hours and 2 hours prior to arrival at anchorage.

Notice by Agent: The Agent shall also supply the Port Health Offic Customs and Immigration, the requisite ship information 48 hours pr to arrival.

Notice of Departure: The Master or Agent of any ship within the p shall inform Port Control giving at least 12 hours' notice of depart and shall further confirm the time of departure 2 hours before bei ready to sail.

BERTHING FACILITIES: The Port of Jebel Dhanna-Ruwais consists two main oil terminals, one petroleum gas terminal, one bulk car terminal, a sulphur handling jetty and a small cargo harbour (S Admiralty Chart No. 3780).

The Crude Oil Terminal at Jebel Dhanna is operated by the Abu Dha Company for Onshore Oil Operations (ADCO) and consists of 3 C.B Berths and 1 SBM capable of accepting tankers up to 330,000 d.w and 1,215 ft., (370.3 m.) in length. Minimum depths at the berths ar

Berth No. 1: 51 ft. (15.54 m.) max. length of ship 950 ft. (289.6 m
Berth No. 2: 52 ft. (15.85 m.) max. length of ship 1,100 ft. (335.3 m
Berth No. 3: 55 ft. (16.76 m.) S.B.M.
Berth No. 4: 55 ft. (16.76 m.) max. length of ship 1,215 ft. (370.3 m
Also see "Section B".

The Refinery Terminal at Ruwais about 2.5 miles S.E. of the Je Dhanna Terminal Berths is owned and operated by the Abu Dh National Oil Company Ruwais Refinery and consists of a 3 km. jetty w 2 deep water berths and 4 coastal tanker berths for the exportatio refined petroleum products and importation of crude oil.

Also see "Section C".

The Abu Dhabi Gas Industries Ltd. (GASCO) Terminal consisting a 2.6 km. trestle jetty and one berth lies about half a mile East of t Refinery Jetty and can accept LPG carriers in the range 28,000 cu to 125,000 cu.m. There is a minimum depth alongside of 17.0 m.

Also see "Section D".

The Ruwais Fertiliser Industries (FERTIL) Jetty is designed berthing combinations of vessels up to 2 fully laden 200 m. lo 25,000 d.w.t. bulk cargo vessels along its Eastern side. Provision is ma at the Northern end of the jetty for the loading of liquid ammonia.

Also see "Section E".

A bulk sulphur export jetty with 6 berthing face piles capable handling cargo vessels up to 25,000 tons d.w.t. with a depth of 3 Loading via a single gantry. The jetty is also capable of receiving li sulphur.

Also see "Section F".

RUWAIS CARGO HANDLING SERVICE CONSTRUCTION JETT
General Information: ADPPOC, as the Port Operator, provides ca handling service for the prime purpose of serving the construction commissioning of the ADNOC and GASCO Refineries and Petro Export Terminals.

This undertaking is provided on an independent basis as an addi port facility and may be utilised by any importer who wishes to cargo through the port to destinations in the Western region of Abu Dh

A harbour, known as the Construction Jetty, consisting of 4 small c ship berths and 1 Ro-Ro Berth, is situated to the East of the Ru Petroleum complex. Vessels and barges with a draft of less than 4. may enter and lie safely alongside to discharge cargo. Larger c ships with a draft in excess of 4.2 m. will anchor in the cargo anchorages located N.N.W. 2 miles (approximately) from Construction Jetty and discharge onto barges.

Extent of Service: Cargo will be worked in the cargo anchorages, wea permitting, during daylight hours only. The target minimum ra discharge of general cargo will be 700 freight tons per day. In sp circumstances these limitations may be modified to suit the dispatc turn-round of the discharging freighter.

Procedure:

1. Consignee or his Agent must sign a Cargo Handling Indemnity form before discharge and vessel's Manager must sign Port's Conditions of Use receipt before entering port and berthing.

2. All Customs cargo documentation and clearance of vessels is the responsibility of the Shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.

3. The ship will normally be charged for port dues only as per 1984 Regulations and Tariff, except that, for working overstowed cargo, a charge per gang hour will be levied to the ship.

4. The consignee will normally pay the full handling charge per freight ton. The charge covers ship stevedoring, barge and towage, and either barge discharge to landed on quay, direct to trailer, or delivered to Custom's Pound.

5. Agents and/or consignees should advise their requirements, vessel ETAs and supply cargo manifests and stowage plans to: The Port Officer, Jebel Dhanna-Ruwais Port, ADPPOC, Ruwais, P.O.Box 61, Abu Dhabi. Tel: Ruwais 72018 daytime or Port Control Ruwais 75700, ext. 5762 (24 hours). Telex: 52207 Apocru EM. Fax: 72102.

PORT EQUIPMENT/CRAFT: The following craft and equipment are available in the port and subject to utilisation may be chartered or hired on application to the Station Manager who will advise the current rates.

Vessels:

3×3,200 h.p. twin screw shiphandling tugs with a bollard pull of 40 tons.

Equipped for fire fighting and oil dispersant spraying, fitted with 2 centrifugal pumps producing 680 cu.m. water/foam per hour to a height of 120 m. through a horizontal distance of 85 m.

Each tug carries 45 metric tons of foam and 11 metric tons oil concentrate dispersant.

3×15 m. twin screw mooring launches, 480 h.p. with 2 live-on-board crew.

4×15 m. single screw mooring launches, 360 h.p. each, no accommodation.

3×16 m. twin screw pilot-cum-ambulance vessels, 20 knots with live-on-board accommodation.

1 twin screw diving tender vessel.

1×12 m. single screw general purpose workboat.

1 barge with reinforced deck for heavy lifts.

Shore Equipment:

1×55 ton Manitowoc mobile crane with 30 m. boom.

1×10 ton forklift.

Miscellaneous:

Fully equipped marine workshops for repairs, overhauls to tugs, launches, vehicles, mooring buoys, etc.

Two double lock (2 man) decompression diving chambers in air conditioned module.

MEDICAL: If any person suffers a serious injury or sickness within the port limits and immediate medical attention becomes necessary the Master of the vessel concerned or the person in charge of the location shall notify the emergency to the Port Control on VHF Channel 9.

N.B. The Port "Casevac" system for such emergencies will be put into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concise description of the injury or sickness must be stated at the time of reporting. In the event a crew member has to be landed for hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious person) comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed.
(e) Masters of vessels which are not berthed alongside the Ruwais jetties should prepare invalid cases for landing in a fast launch or picking up by helicopter e.g. Niel Robertson stretcher; and afford a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port for which Medical or Police assistance is required shall make request for such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths and should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should be arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	*ASTM*
1. Viscosity Kin. at 33°C, CS, Max.	1.4	D445
2. Carbon Residue Conradson Wt. Pct. Max.	1.5	D189
3. Flash Point °C, Min.	66	D93
4. Water Cont. Pct. Vol. Max.	0.25	D95
5. Sediment Pct. Wt. Max.	0.02	D473
6. Ash Pct. Wt. Max.	0.02	D482
7. Sulphur Pct. Wt. Max.	1.80	D129

7. Pour Point °C. Max.	24	D97
8. Sp. Gravity at 60/60° F. Max.	0.990	D1298

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs).

CLIMATE: The cool winter season extends over November to February with mean daily maximum temperatures of 25° C. to 30° C. and night temperatures of 10° C. to 15° C. The lowest recorded temperature being 4° C. Ground frost can occur inland.

The hot summer season extends over May to September with maximum day temperatures between 40° C. to 45° C.: the highest recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year averaging between 50 and 60 per cent by day and 75 to 80 per cent by night. Heavy dew may be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are prevalent from November to May giving a total annual rainfall of 10 mm. to 50 mm. Rain is rare during the remaining months while in some years there is none at all.

Throughout the year the prevailing winds are from the West to North North-East sector. They are strongest during November to April when they occasionally reach gale force. Gusts of up to 50 knots have been recorded (April) and a 24-hours mean wind speed of 32 knots from the North-West is on record (January) the Shamal or strong North-West wind may blow for periods up to three days and raise a rough sea with waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Jebel Dhanna. 'Land and Sea' breezes are experienced throughout the year.

Visibility is 10 nautical miles for 70% of the time and less than 2 nautical miles up to 5% of occasions due to dust haze or radiation fog. Fog can occur during any month of the year but is most frequent in Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards Sir Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C. (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' notice to the Ship's Agent. These stores are not permitted to be loaded at an oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents who are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertake the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft, on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipelines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   (a) Port of discharge.
   (b) Discharge quantity in tonnes.
   (c) Date(s) of discharge.
   (d) Name and nationality of vessel.
   (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

LOCATION: 24° 11' N. 52° 38' E.

OPERATOR: ADPPOC is service contractor to Abu Dhabi Company Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beac marked by 2 light floats and 4 buoys. The 2 light floats are both p hand marks, and the buoys starboard hand, as indicated by shape, col and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna mark by 21 light buoys. Least depth in this channel is 46 ft. and minimu width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pa midway between Buoys No. 13 and 20, leaving Alaq Island to starboa From Buoys No. 13 and 20 the same track is followed as for inwa passage.

Navigation in shallow waters: The navigation of deep drafted vessels high speeds in shallow waters introduces certain hazards. Masters ships should be guided by the following:

Due consideration should be given to the effect of squat at speed vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if n bear in mind that after strong winds the actual height of tide may reduced and extra caution must be exercised for a few days during a after bad weather.

Ensure accuracy of vessel's draft reading, including the midship dra having in mind the tendency of vessels to sag and the adverse effe of a small list.

Reduce to minimum safe speed to pass over and near shoal area

Reduce to a minimum safe speed when negotiating turns in order reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, ex vigilance is required, and allowance made for set, particularly at reduc speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth no berth, either six hours after such Notice of Readiness or at t time of connection of cargo loading hoses, whichever is the earli

(ii) Prior to the commencement of its Set Range then running hou shall commence at 1400 hrs. on the first day of its Set Range, be or no berth, notwithstanding the fact that loading may ha commenced for any reason prior to 1400 hrs. on the first day of Set Range; or

(iii) After expiry of the Set Range, then running hours shall commen at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo load hoses.

The Company will make every effort to load the tanker on arr provided a berth is available and weather permitting.

MAX. SIZE: See "Berthing".

Also see Section "A" – "Restrictions".

VHF: Vessels are to maintain watch on VHF Channel 9 when berth

EQUIPMENT: Port and Starboard anchors to be fitted with anchor bu and sufficient line to facilitate recovery of anchor in the event of los

4 good mooring lines of not less that 120 fathoms each and suitable size for the vessel. 2 additional 120 fathoms lines securely ta to the first lines for occasions where 120 fathoms may not reach stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably pa carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prev turning. A suitable line to be ready for hauling gear on board, such hose clamps, reducers and elbows. A lifebuoy should be placed ha to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ball an accommodation ladder lowered to about 12 ft. above water. This be adjusted to suit the conditions. A pilot ladder should be rig immediately adjacent to the accommodation ladder platform, to w 2 ft. of the water. This will enable the Pilot and others when the ve is moored to ascend the pilot ladder clear of the launch and then on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operat with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring

BERTHING: Berthing is by mooring to 2 anchors and stern buoy CBM's or to SPM Berth. Arrangements in advance by contacting Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Is Leading lights have been established which will lead ships on th of the 2 anchors when in berth. A small marker buoy has established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36 in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth Criteria:

Parameters	*Berth 1* *CBM*	*Berth 2* *CMB*	*Berth 3* *SPM*	*Berth 4* *SPM*
DWT (tons) Max.	140,000	250,000	450,000	450,000
DWT (tons) Min.	20,000	70,000	100,000	100,000
Length (ft.) Max.	950	1,100	1,237	1,237
Length (ft.) Min.	559	800	820	950
Max. Loading Rate (t.p.h.)	6,000	6,000	7,500	9,500
Strings of Flexible Hose	2×16 in.	2×16 in.	2×16 in.	2×16 in.
Length of Sealine Approx. (ft.)	16,200	16,000	20,500	17,200

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipelines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses. It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on port side for CBM berths and the tanker rail hoses on port side for SPM berth.

S.B.M.: 30 sections × 30 ft. × 16 in.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban Crude contains concentrations of H_2S (Hydrogen Sulphide). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be readily available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in Berth 1 and 7,500 t.p.h. in Berth 3, and 9,500 t.p.h. in Berth 4. Availability of max. loading rates is dependent on the number of berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, then ADCO will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Port Authority or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

MEDICAL: A hospital run by the Abu Dhabi National Oil Company (ADNOC) is situated adjacent to the Ruwais Industrial Complex. Ambulance facilities are available.

DENSITY: 1031.

FRESH WATER: Not available.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 of 1973 and ISGOTT Safety Guide.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978.

All alcoholic liquor must be under bond and sealed.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires Full Name/nationality/Seaman's Book/Passport Number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978.

Immigration Authorities require at least 4 days' notice and preferably 7 days' notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations to clocks during year.

POLICE/AMBULANCE/FIRE: The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and Ruwais and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Ruwais Hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait until vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

(C) RUWAIS – REFINERY TERMINAL

OPERATOR: ADPPOC is the service contractor to Abu Dhabi National Oil Co., (ADNOC).

GENERAL: The ADNOC Ruwais Refinery Terminal is situated about 2.5 miles SE of the Jebel Dhanna Sea Berths and consists of a trestle jetty 3 km. in length with 2 deep water berths and 4 coastal tanker berths. Vessels will berth port or starboard side at the discretion of the Pilot having regard for the tide and weather conditions.

RADIO: *Format for information required from vessels prior to berthing at Ruwais Refinery Terminal:*

A. Firm ETA Ruwais 72, 48, 36, 24 and 12 hours prior to arrival.
B. Cargo(es) (with quantity in M.tons) to be loaded and acceptable loading rate per hour per line. Number of lines for each cargo.
C. Cargo(es) on board on arrival (if any), with tanks and last port loaded.
D. Will cargo(es) ex-Ruwais be commingled with cargo on board. If so, indicate details.
E. Stowage of clean ballast to be discharged overboard. Indicate under ballast details below if discharge will take place during or prior to loading, as applicable.
   1. Quantity of clean ballast in tanks No.... nominated for Cargo loading at Ruwais.....M.tons
   2. In segregated ballast tanks.....M.tons
   3. In permanent ballast tanks.....M.tons
   4. Total time required for ballast discharging, prior to loading.....Hours

Note: Clean ballast oil content must be below 15 p.p.m. and samples will be drawn for tests to ensure compliance.

F. Quantity of dirty ballast (if any) to be discharged to the Refinery dirty ballast system and time required for discharging. This is subject to acceptance by the Refinery. Dirty ballast must be free of lead and/or chemical washings.
G. Last three cargoes handled by vessel in the following sequence:
   (i) The very last Cargo(es)/Stowage arrangements.
   (ii) The 2nd last Cargo(es)/Stowage arrangements.
   (iii) The 3rd last Cargo(es)/Stowage Rrangements.
H. Full details of tanks washing and cleaning carried out since the discharge of the last Cargo(es).
I. Draft on arrival and maximum expected draft on sailing.
J. Maximum freeboard on arrival after discharging ballast prior to loading and expected freeboard on sailing (including height from deck to connections at manifold) in metres.
K. Distance from vessel's rails to manifold connection and height of rails from deck.
L. Distance between manifold connections centre to centre in metres.
M. Displacement on arrival and expected displacement on sailing.
N. Bunkers/Water requirements.
O. Any other requirements.
P. SOLAS Protocols with latest revisions are strictly applied in this port and vessels should fully comply with all relevant regulations while in the port area.
   Accordingly, please advise if tanks are inerted per SOLAS requirements and condition of inert gas system fitted in vessel.

Please note vessels should arrive with all tanks properly inerted as applicable under SOLAS Protocol, unless otherwise advised by Ruwais Refinery to arrive in gas free condition to enable internal inspection at inner cabotage by Third Party Inspectors, prior to loading. In this case please advise time required to inert vessel's tanks after completion of inspection.

The above information should be made available 72 hours prior to arrival at Ruwais and is additional to the requirements of the Ruwais Port Officer.

Also see "Shipmaster's Report" dated January 1992.

VHF: The Refinery Terminal maintains VHF watch on Channel 16 and Channel 9 for ship/shore communications and once berthed, the vessel will be connected to the terminal by land line telephone, and a UHF hand set will be provided by shore.

The Pilot will bring on board UHF Hand Set for manoeuvring purposes only.

Arrival Telegram Ship/Shore: After the Pilot boards the Ship/Shore Arrival Telegram will be passed by VHF Radio Channel 16/9 as follows:

(1) Name of Vessel.
(2) Nationality and Port of Registry.
(3) a – Gross Registered Tonnage.
  b – Net Registered Tonnage.
  c – Summer Deadweight.
(4) Size of manifold.
(5) Are reducers to 12 in., 10 in. and 8 in. available on board?
(6) Are adequate nuts and bolts and gaskets available on board?
(7) Number of hours required to de-ballast and quantity.
(8) Vessel's maximum loading rate.
(9) Quantity and type of cargo.
  a –
  b –
  c –
(10) Last Port.
(11) Next Port.
(12) Master's Name.
(13) Date and time of arrival.
(14) Date and time of Pilot on Board.
(15) ETA at Berth.
(16) Arrival Draft.
(17) Estimated Departure Draft.
(18) Bunkers requirements (quantity and type).
(19) Drinking Water requirement quantity.
(20) Is the ballast lead free?

Also see "Shipmaster's Report" dated January 1992.

BERTHING:

Berth "B"

Berth "B" is designed to accommodate tankers in the range 9,10 104,000 tons displacement. Length of ship 118.5 m. to 280 m. T minimum depth alongside the berth is 12.7 m.

The berth consists of the Loading Platform, four mooring dolphins a four breasting dolphins connected by walkways.

On the Loading Platform a bank of six cargo Chicksan arms serve load or discharge ships, namely:

2×12 in. dia.	Each arm is provided for Fuel Oil loading and ba unloading.
2×12 in. dia.	Each arm is provided for Gasoline (Premium a Regular), Kerosene, Jet Fuel and Diesel Oil.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Fuel Oil, Gasol Kerosene/Jet Fuel, Diesel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	2,000 cu.m./h.
Reformate	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,800 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote Control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Berth "C"

Berth "C" is designed to accommodate vessels with range 26,00 130,000 tons displacement. Length of ship 180 m. to 295 m. T minimum depth alongside the berth is 16.8 m.

The berth consists of the Loading Platform, six mooring dolphins four breasting dolphins connected by walkways.

On the Loading Platform a bank of seven cargo Chicksan arms s to load or discharge the ship, namely:

3×12 in. dia.	Each arm is provided for Crude Oil, ballast unloa and Fuel Oil loading.
2×12 in. dia.	Each is provided for Gasoline, Kerosene, Diese loading.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Gasoline, Kerosen Fuel, Diesel Oil, Fuel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	2,000 cu.m./h.
Reformate	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,800 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Also see "Shipmaster's Report" dated January 1992.

Berth "E"

	Minimum	*Maximum*
Vessel Deadweight	20,000	333,000 (Partially loaded to 210,000)
Vessel Length Overall (m.)	180	360
Vessel Beam (Extreme) (m.)	22.4	57.5
Parallel Body Length (m.)		345
Displacement (tons)		255,000
Water Depth (m.)		19.6
Draft (m.)	9.5	17.0 (Partially loaded)
Freeboard up to Manifolds (m.)	4.9	24.1
Distance between Manifolds (m.)	1.6	3.0
Height – Deck to Centre of Manifold (m.)		2.1
Distance Rail to Manifold (m.)		4.6
Distance between Breasting/ Mooring Dolphins		48 m. – 2 Inner B.D. 30 m. – Inner/Outer B.D.

Product	*Arm No.*	*Size (in.)*	*Flow Rate (cu.m./hr.)*
Bunker C	260-VLA-34	10	1,000
Marine Diesel			300

Gasoil B			1,800
Prem. Gasoline	260-VLA-43	12	1,400
Reg. Gasoline			1,400

Coastal Berth 1

Coastal Berth 1 is the Inner Berth on the North side of the Cabotage Jetty. The Berth consists of the loading platform, four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m. The loading platform has a bank of five Chicksan loading arms with 8 in. diameter connections. The minimum depth alongside the berth is 9.1 m. Vessel size 2,600 to 9,100 tons displacement.

Products available are: Fuel Oil, Diesel, Kerosene/Jet Fuel, Gasoline, Bunker 'C' and Marine Diesel Oil. Ballast will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berth 2

Coastal Berth 2 is the Inner Berth on the South side of the Cabotage Jetty and consists of the loading platform; four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement. The minimum depth alongside the berth is 8.7 m. The loading platform has a bank of two 8 in. diameter loading arms.

vis. 1×8 in. to discharge ballast.
1×8 in. to load Bunker 'C', Marine Diesel or Fuel Oil. TEL unloading facilities are available by flexible hose.

Flow rates are as follows:

Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berths 3 & 4

The Outer Berth North and South side of the Cabotage Jetty each consist of four breasting dolphins and three mooring dolphins with a fourth common mooring dolphin with Berths 1 & 2. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement.

The minimum depth alongside the berth is 9.4 m. (No. 3) and 9.2 m. (No. 4). The berths are equipped with four 8 in. loading arms and a 3 in. water connection.

Products available are: Diesel Oil, Kerosene/Jet Fuel, Gasoline, Marine Diesel Oil, Bunker 'C'.

Ballast water will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Vacuum breaker.
(iv) Remote control system.
(v) Range control system.
(vi) Connecting flange mating device.

BERTHING AIDS:

Berths 'B' and 'C' are equipped with a radar operated safety berthing system indicating by means of coloured lights the forward and aft berthing velocity of the ship.

Two groups of coloured lights one forward and one aft indicate the safe/acceptable/dangerous lateral approach of the ship from a distance of 50 m. off the berth.

BALLASTING/DEBALLASTING: Ruwais Refinery has dirty ballast water treatment equipment and all dirty ballast shall be discharged ashore for treatment. (No dirty ballast may be discharged into the sea and pollution of the waters of the port is an offence against the Port Regulation and the laws of Abu Dhabi).

Accepting dirty ballast into the refinery storage is subject to approval by refinery, a sample of the dirty ballast may be required for analysis, a letter from Master requesting permission to discharge is to be made (letter is provided for Master's signature).

During loading/unloading all deck scuppers must be plugged. All precautions shall be taken to prevent oil or oily waters escaping into the sea during connection and disconnection of loading arms.

Normally the terminal Control Room will give a 10 minutes warning before deballasting may commence. Deballasting shall commence at slow speed to check systems and back pressure.

Simultaneous deballasting with loading of cargo is permitted only in the case of cargo of Bunker 'C'.

While encouraging quick turn around and the use of minimum ballast upon arrival, sufficient ballast must be retained on board for the safe manoeuvring of the vessel at the Pilot's discretion.

LOADING AND UNLOADING:

(i) The Master should give the terminal a 'STAND BY' warning 10 minutes before ready to commence loading or discharging.
(ii) Upon 'COMMENCE LOADING' from the Master only one pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.
(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that the tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.
(iv) During the hours of darkness vessels loading products or discharging crude oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

DERAT: There are no facilities for Derat at Ruwais.

FUEL: Bunkers are obtainable at Refinery berths and should be arranged through the ship's Agent.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the ship's Agent.

STORES/PROVISIONS: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

SHIPMASTER'S REPORT: January 1992 (Updated 1994).

Vessel called to load 25,000 tonnes of Reformate.

Documents:

1 copy Port Clearance.
2 copies Crew List.
2 copies Crew Personal Effects List.
2 copies Bonded Stores List.

As Customs and Immigration Officers do not come on board anymore for sealing Bonded Stores, etc., all paperwork is dealt with by ship's

Agent. Consequently alcoholic liquor will not be under bond and sealed. However conveyance ashore or to another vessel is prohibited.

Restrictions: With winds of 18 knots or more, port is closed.

Radio: Prior to arrival, vessel received two telexes from ship's Agent, one for the Port Officer – Petroleum Ports Authority, and the other for Ruwais Refinery.

Message:

Following information required by Port Officer – Petroleum Port Authority 72 hours prior to the vessel's arrival, giving the following details in the given format:

Question Answer
1. ETA.
2. Flag.
3. G.r.t., n.r.t., and Summer d.w.t.
4. Arrival and departure drafts.
5. Cargo to be loaded/discharged.
6. Type and quantity of ballast and deballasting time.
7. Status of Inert Gas System (I.G.S.).
8. Status of Air Conditioning (A.C.).
9. Expiry of certificates.
I. Load Line.
II. Safety Construction.
III. Safety Equipment.
IV. Safety Radio.
V. Oil Liability (Tovalop).
VI. Oil Pollution Liability (C.L.C.).
VII. International Oil Pollution Prevention (I.O.P.P.).
VIII. Classification.
IX. Certificate of Fitness (Gas Carriers).
X. Derat Certificate.

The ETA is to be amended as necessary 48 hours, 24 hours and 12 hours prior to arrival.

Deballasting: Dirty ballast/slops can be discharged ashore as long as it does not contain any leaded petroleum residues or cleaning chemicals.

(D) RUWAIS – NGL TERMINAL:

LOCATION: 24° 09' 49" N. 52° 43' 16" E.

OPERATOR: Abu Dhabi Gas Industries Ltd. (GASCO).

GENERAL INFORMATION: The Terminal Regulations are issued for the information and guidance of Masters of vessels loading at the GASCO Jetty at Ruwais. After receipt of the first ETA advice from a gas carrier GASCO will cable the Master of the vessel instructions to carry out following tests and checks 24 hours prior to arrival:

1. Check condition (oxygen content) of atmosphere in void spaces around cargo tanks.
2. Check all reliquefaction units fully operational.
3. Check settings of cargo tank safety relief valves.
4. Test ESD (Emergency Shut Down) of cargo valves/pumps/boosters from all activating stations.
5. Check gas detecting unit with suitable spangas and have unit working continuously.
6. Test water spray system deck area, flush all lines and check nozzles for proper operation and coverage.
7. Check ventilation of control room and compressor room and have ducts set for LPG.
8. Check over-pressurising and motor-trip system of motor room.
9. Check navigation equipment and steering gear fully operational.

The results of above tests should be cabled to GASCO not less than 18 hours prior to arrival.

On arrival at the terminal, the Terminal Representative will discuss with the Master the safety requirements. Attention is drawn to the International Safety Guide for Oil Tankers and Terminals (ISGOTT) and the Safety Inspection Guildelines and Terminal Safety Check List for gas carriers as published by the International Chamber of Shipping and Oil Companies International Marine Forum (OCIMF). For efficient loading it is essential that the ship should be fitted with adequate equipment. Improvisations made after the ship has arrived alongside the jetty are not sound practice and result in delays and possible damage to the loading arms and other equipment.

Abu Dhabi Gas Industries Ltd. (GASCO) have equipped their terminal with loading machinery and mooring arrangements which will ensure tankers and gas carriers receiving their cargoes at a reasonable rate, thereby extending to the ship the benefit of a rapid turnaround.

Mooring, loading and unmooring are carried out by night as well as by day. Co-operation between the Ship's Officers and Terminal Representatives is essential to secure the full benefit of the facilities provided.

MAX. SIZE: *Gas Carriers:* 28,000 cu.m. – 125,000 cu.m.

Tankers: Minimum Size – 15,000 tonnes S.D.W.T. Max displacement on arrival 95,000 tonnes. Max. LOA 320 m.

TUGS: Twin screw tugs (35 tons bollard pull) are used for both berthing and unberthing of vessels. The number of tugs to be used is to the discretion of the Pilot but will normally be two for berthing and for unberthing. The tugs will use their own ropes and/or wires. The tugs are fitted with foam/water monitors, including one at approximately 19 m. above sea level, to assist in fire-fighting. Also fitted are spray booms to apply dispersants in case of oil spills.

BERTHING: *The Jetty:* The centreline of the GASCO-NGL Jetty Loading Platform is situated in 17 m. of water in position Lat. 24° 09' 49" N., Long. 52° 43' 16" E. with the berthing line in direction 305°/125°. Vessels are normally berthed heading 305°. A piping trestle and road, approximately 2,650 m. long, leads to the shore where the processing plant and storage tanks are located.

The jetty head comprises a loading platform (10 m. above chart datum), a utilities building, 4 breasting dolphins and 6 mooring dolphins. The dolphins are inter-connected by walkways. The distance between the 2 outermost dolphins is 340 m., between the 2 innermost breas dolphins 42 m. and between the 2 outermost breasting dolphins 97

On the loading platform there are 2×12 in. loading arms for load Pentane Plus and discharge of dirty ballast/slops, 4×12 in. loading ar for loading/vapour return of Propane and Butane and 1×8 in. load arm for bunkering (Rate – MFO 400 cu.m.p.h. and MDO 300 cu.m.p. (For distance and disposition of loading arms see "Plan"). The L loading arms are fitted with an Emergency Release System (ERS). loading arms except the bunker arms are fitted with an Emergen Shutdown System (ESD). Both ERS and ESD can be actua automatically or manually. For detailed information about these syste you are referred to the separate letter on ESD/ERS handed over Master by the Terminal Representative. The Master is to ensure t the personnel responsible for cargo operations are fully familiar w these systems.

On the Western end of the loading platform is a gangway tower w a 1.5 ton crane forming a integral part of this tower. On the Eastern e of the platform there is a tower mounted fire water and foam moni This monitor can be controlled manually or remotely from the jetty he or from the foot of the jetty aided by a television monitor.

An additional manually controlled firewater monitor is situated on ea of the 2 inner breasting dolphins. In addition to this, water spray delu systems are covering the loading arms area, the gangway, the su drum area and the utilities building. Gas detection equipment strategically placed near the loading arms and will give alarm in ca of inadvertent gas escape. The loading arms area and tanker manif area are monitored by closed circuit television from the control roo situated in the utilities building on the jetty and from the main cont room.

On the Eastern side of the loading platform is a boat landing sta where the mooring boats can tie-up.

Draft: The minimum water depth alongside the jetty is 17 m. below ch datum (C.D.). However, the Deep Water Channel imposes d limitations on vessels departing from and entering the Port of Je Dhanna – Ruwais:

Also see Section "A" – "Restrictions".

Moorings: When at berth, vessels must be moored to the en satisfaction of the Pilot and Terminal Representative. Vessels can be either side alongside, depending on the ship's manifold layout and the prevailing weather conditions. The breasting dolphins are ea equipped with 1,250 KN double quick release hooks and a pow operated capstan. The mooring dolphins are each equipped w 1,250 KN triple quick release hooks and power operated capstan.

The minimum mooring requirements are 3 heading, 3 breast lin each end, 2 spring lines each end and 3 stern lines. Vessels must ready at all times to put out extra moorings as requested by Termi Personnel or dictated by weather changes. It is the Maste responsibility to ensure that vessel's mooring lines are check frequently to prevent excessive movement of the vessel in berth, wh could activate the ESD/ERS systems and/or cause severe damage the loading arms and other terminal equipment.

Experience has shown that wholly synthetic moorings have too mu elasticity and allow the vessel to range or drift away from the berth dur periods of adverse weather.

Therefore the moorings should preferably be all steel wires.

As it is recognised that some vessels are not fitted out with compl steel wire moorings, such vessels may use synthetic moorings for he or stern ropes, but breasting and spring moorings are to be steel wir However, mixed mooring for the same service is strictly prohibited. NOTE: (October 1982). With immediate effect all vessels calling at t GASCO NGL Jetty are to be fitted with wires, for spring lines. Vess unable to comply will be subjected to an inspection of mooring ropes the Pilot on arrival and will be berthed only if Pilot is satisfied with mooring lines available, and provided the weather forecast is favoura during the vessel's stay alongside. Pilot inspection of mooring lines be carried out only during daylight hours.

The breasting dolphin's fender design criteria are based on provid for berthing energies acting in the horizontal plane for maxim displacement of 95,000 tonnes with an approach angle to the bert line of 7° at a contact velocity of 15 cm. per second.

Yokohama Fenders protrude approximately 3.3 m. from the fac the loading deck, they provide for 100% contact of fenders on the vess perpendicular mid-body at light and loaded drafts, for the full rang vessel sizes.

Tension Winches: Vessels equipped with automatic tension wind should not use the automatic device and set the manual brake on th winches.

BALLAST: The jetty is equipped with dirty ballast/slops recep facilities. Tankers discharging dirty ballast/slops ashore will use Pentane Plus loading arms from where a 24 in. pipeline runs to t in the Refinery adjacent to the LPG plant. The maximum ballast recep rate is 1,500 cu.m./hr. At least 48 hours prior to arrival, the Master advise GASCO how much dirty ballast/slops he expects to dischar the shore facilities.

When the vessel arrives with clean ballast for overside discharge ballast water must be clean and a declaration to this effect needs t signed by the Master and delivered to the Terminal Represent There is a danger of violating pollution regulation if ballast taken polluted water is discharged in port. If it is necessary to take on ba in polluted areas, this should be discharged during passage and repl by cleaner ballast.

Ashes, oil, oily water, garbage or other refuse must not be discha overboard in port waters. Scuppers must be effectively plugged leakage or spillage of oil aboard ship must not be swept or wa overboard whilst in Port waters. However, gas carriers scuppers be kept unplugged when not engaged in bunkering operations.

It is essential that the vessel is adequately ballasted to ensure handling and manoeuvring. Masters will be expected to accept the advice as to the ballast quantity and disposition.

There must be no cleaning of boiler tubes whilst the ship is in

POLLUTION: Abu Dhabi Gas Industries Ltd. (GASCO) follows a clean seas policy, and in this respect the "Oil Record Book" referred to in the International Convention for the Prevention of Pollution from Ships, of 1973/78 can be inspected. Any vessel, the Master of which does not allow inspection of the "Oil Record Book," will be refused the use of the Company facilities at Ruwais.

If it is found that the information entered in the "Oil Record Book" is not in accordance with the requirements of the Convention the matter will be reported to the appropriate authority.

It is an offence to discharge dirty ballast, pump bilges or discharge refuse within the Port limits.

The Port Officer, or his nominee, is authorised to take samples, in accordance with an approved procedure, of ballast water to be discharged, or being discharged at Ruwais. Should test carried out on these samples indicate an average oil in water content of more than 15 p.p.m. then this may be used in evidence in any proceedings against you brought by the Port Authority in accordance with the Law.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and other expenses and fines shall be borne by the vessel.

COOLDOWN OF GAS CARRIERS: Vessels, when presenting themselves to load at GASCO terminal should in all cases be ready to load in all respects. For a gas carrier this means that the cargo tank atmosphere should be compatible with the product to be loaded and the cargo tank temperature close to the temperature of the product to be loaded (Propane −42°C, Butane −4°C).

Notwithstanding the above and providing notice is given well in advance, GASCO may, in exceptional cases, accept gas carriers not fully cooled-down. Each occasion will be considered separately giving due regard to the shipping programme and any other circumstances or restrictions.

GASCO will not accept any responsibility for the failure by the Master of any gas carrier loading at Ruwais to take appropriate action to receive cold liquefied gas, prevent any damage to his vessel and jetty installation and/or injury to his crew or Terminal personnel.

VENTING: During the loading of Pentane Plus, vessels should only allow vapours to escape via the agreed venting arrangement. If there is little wind movement, vapour may persist on deck. When there is a wind, it may, in crossing a deck house or structure, create a low pressure on the lee side thereby causing vapour to be carried towards the house or structure.

Either of these wind conditions may result in high local vapour concentration and, if so, it may be necessary to stop loading while the conditions persist.

Gas carriers are not allowed to have any vapours escape to atmosphere. During loading the pressure in the cargo tanks should be controlled by the use of their reliquefaction plant or by the use of the vapour return line to the shore. The control room should be notified prior to returning vapour ashore via the vapour return line and before stopping the return of vapour ashore.

Your attention is drawn to the information, as provided to you by the Terminal, on the properties and dangers of the cargo to be loaded on board your vessel, together with the actions required in case of an accident.

LOADING: *Loading Arms:* The LPG and Pentane Plus loading arms presentation flanges are 12 in. ANSI – 150 – flat face spiral groove.

For centre to centre distances and disposition of the loading arms, see "Plan Section". The LPG arms operating envelope parameters are as follows:

Vertical plane : From 7.7 m. to 24.0 m. above chart datum.
Horizontal plane : From 4.1 m. to 8.7 m. off the jetty face over the full vertical plane.
Safety Provision : Horizontal plane drift of 4.6 m. on either side of the centre line.
Lateral plane drift of 4.6 m. outside the normal operating box envelope.

All four LPG loading arms can be connected to ships' manifold with a centre to centre spacing range of 1.6 m. to 3.5 m. for the full envelope including the outer drift envelope box.

The Pentane Plus loading arms operating envelopes are as follows:

Vertical plane : From 2.3 m. to 20.75 m. above chart datum.
Horizontal plane : From 6.4 m. to 9.3 m. off the jetty face over the full vertical plane.
Safety Provision : Horizontal plane drift of 4.6 m. on either side of the centre line.
Lateral plane drift of 4.6 m. outside the normal operating box envelope.

However, to secure free access of Pentane Plus loading arms towards vessel's manifold, the height of railing in way of manifold on arrival should not exceed 16.2 m. above Chart Datum.

The Pentane Plus loading arms can be connected to ships' manifolds with a centre to centre spacing range of 0.6 m. to 2.1 m. for the full envelope including the outer drift envelope box.

Notwithstanding the above, the loading arms are fitted with ESD systems and additionally the LPG arms with ERS which is actuated before the loading arms reach the outer limits of their envelopes.

The LPG loading arms are linked to the shore system which provides the following flexibility:

Loading arms are numbered from the gangway tower to East.
No. 1 – Propane Liquid or Propane Vapour Return
No. 2 – Propane Liquid or Propane Vapour Return
No. 3 – Butane Liquid or Butane Vapour Return
No. 4 – Butane Liquid or Butane Vapour Return

After berthing you are required to remove the blind flanges from the manifold connections to be used for loading and to indicate which product is to be loaded through them and which connections are to be used for the Vapour Return lines, if required. The connection/discon- nection of the 12 in. ANSI 150 loading arms and 8 in. ANSI 150 bunker arm will be carried out by Terminal personnel under the supervision of a responsible ship's officer. If your manifold sizes do not correspond with the loading/bunker arms, you are requested to provide and fit the appropriate reduction pieces accordingly. Masters of gas carriers are to ensure that the reduction pieces and gaskets used are suitable for loading of cryogenic cargoes.

Communications: To maintain necessary communications permanently during cargo operations and also in emergencies, you will be provided with a handie-talkie and a telephone.

We require that the handie-talkie is at all times attended to by the officer responsible for cargo operations. The handie-talkie enables the officer to communicate directly with the main control room and the jetty control room.

Furthermore, a telephone will be placed on your vessel. Additionally a console for activating the ESD will be put on board.

A ship's crew member, able to converse in English, must be present near the ship's manifold at all times. The loading arm and ship's manifold area are covered by closed circuit televisions from the jetty control room and main control room.

Emergency Procedures: In case of an **emergency on board** your vessel, we require you to take the following action:

Raise the appropriate alarm and take the required action
Inform the Terminal via handie-talkie, telephone and jetty attendant or by activating the ESD.
Cease all cargo operations immediately and shut-down cargo system completely.
Prepare to vacate the berth.

In case of an **emergency ashore,** we require you to take the following action:

Cease cargo operations immediately and shut-down cargo systems completely.
Stand-by on handie-talkie and telephone and keep contact with jetty attendant.
Stand-by to give any assistance.
Prepare to vacate the berth.

NOTE: The shore installation has been equipped with a range of safety devices and emergency shutdown systems, these could be activated automatically or manually from the jetty or on board the vessel as the situation will call. All shutdowns are preceded or accompanied by an alarm.

Loading Operations: The maximum loading rates for each product are as follows:

Product	*Tons/hr.*	*cu.m./hr.*
Propane	1,500	2,550
Butane	1,800	3,000
Pentane Plus	2,800	4,200

Propane and Butane can be loaded simultaneously. Loading rates can be adjusted either by stopping/starting one or more pumps or by opening/closing of the recirculation valves on the loading platform.

After berthing, the terminal representative will discuss with you the loading operations and emergency procedures. You are reminded that the responsibility as to the quantity of cargo to be loaded, rests with you as Master of the vessel and no cargo may be sent back ashore.

Whilst alongside the jetty, ships should be ready to move under their own power in the event of their breaking adrift, catching fire or emergencies. No repairs are to be carried out whilst alongside which would immobilise the ship or impair her fire-fighting efficiency.

CAUTION: The loading rates are controlled on shore and due to the long pipelines from the shore product tanks to the jetty head, and the high loading rates, an extremely dangerous situation can arise if ship's valves are closed against the flow of liquids, which could lead to pressure surges liable to cause the blowing out of pipeline gaskets and/or severe damage to the loading arms.

Loading rates, loading rate reductions and stopping of cargo procedures will be discussed with you prior to commencement of loading.

While alongside the jetty, no craft are allowed alongside the vessel. The lowering of lifeboats whilst alongside the jetty is strictly prohibited except in emergencies.

Immediately after completion of loading, the loading arms will be disconnected and the vessel must be ready to proceed to sea or anchorage as directed.

STORES: The taking-on and/or landing of stores and ship's spares over the jetty is not allowed.

SHORE LEAVE: Crew members are not permitted shore leave.

SIGNALS: Vessels, whilst alongside the GASCO NGL-jetty, shall, in addition to those described in the port regulations, display the following signals: by day: a red flag, by night: a red light visible from all directions.

SHIPMASTER'S REPORT: December 1981 (Updated 1994). (Vessel loading Propane/Butane, g.r.t. 45,000, d.w.t. 56,000, draft 13.1 m., capacity 79,970 cu.m.).

Ruwais lies in the same general port area that encompasses Jebel Dhanna and at the moment consists of a petroleum products jetty and another to the S.E. which handles Pentanes and LPG.

Further again to the S.E. there is more port development for an ammonia/fertiliser berth and dry-cargo berths.

Ruwais is administered by ADPPOC, Abu Dhabi Petroleum Ports Operating Company, while the LPG berth comes under the immediate control of GASCO, Abu Dhabi Gas Industries Ltd.

The LPG loading platform is situated in position: Lat. 24° 09.8' N., Long. 52° 43.3' E., the trend of the platform and mooring dolphins being about 305° True, more or less in line with the current flow.

Approach: The vessel should have B.A. Charts 3778, 3779, 3780 and the recommended track on these should be followed for arrival and departure since it provides adequate water for a vessel of this size and draft. The route is well marked with large buoys and light floats which show up well visually and on the radar. An approach in poor visibility should thus be possible and made with confidence.

See Pilot Books and "Guide to Port Entry".

A waiting anchorage is provided off Gasha Buoy.

Pilotage: Pilots board off Gasha Buoy from launch of about 12/16 m. length; at the moment two launches are in commission.

Pilot ladder required about 1 m. above the water.

The length of pilotage to the first line ashore is about 2 hours.

Communications: Through Bahrain Radio. There is considerable evidence pointing to huge delays in cables between this radio station and the eventual recipient.

Before arrival the Agents sent a comprehensive questionnaire requesting safety checks and ship information. This is a standard cable and originates from GASCO.

VHF contact originally made on Channel 16 with the Pilots and Port Control, but their usual working frequency is Channel 9.

On boarding the Pilot issues a copy of the Port Regulations which should be studied prior to berthing.

Berth: This consists of the loading platform and mooring dolphins at the end of a 3 km. trestle. Minimum reported depth alongside is 16 m.

The jetty head consists of the loading platform, 42 m. long with two breasting dolphins at each end. Beyond these are the mooring dolphins, three forward and aft, the total length of the mooring system being 340 m., thus providing adequate moorings for most vessels.

The loading platform carries seven Chicksans, two for Pentane, one for bunkers and four for LPG. There is a control building on the berth together with closed circuit TV, gas detecting equipment, fire fighting monitors and sprinkler system.

The loading arms are all 12 in. 150 ASA. The Chicksans are fitted with automatic quick release and this will operate if the vessel surges more than 4 m. (two for'd and two metres aft) from her moored position. An automatic shutdown system is also fitted and the vessel is provided with a control box for these together with comprehensive instructions. A time of 10 secs. is quoted from operation to complete shutdown.

There is provision for two vapour return lines and two loading lines within the four Chicksan configuration and these are interchangeable to a degree.

Ship/shore communication is provided by the terminal who place on board, 2 portable VHF radios and a telephone close to the gangway.

Mooring: The normal 3.2.2 was recommended and there is a large mooring boat to assist. Dolphins are fitted with quick release hooks. Wires are required for spring and breast lines. Mixed mooring for the same servcie is not allowed.

Springs must be on mooring winches and the use of self tensioning winches is not allowed.

There are powerful tugs (3,300 h.p.) available for berthing.

Gangway: Ship's gangway should be turned in for berthing, a shore gangway is provided.

N.O.R.: Agent advised me to tender Notice of Readiness at the time of passing the Gasha Buoy.

E.D.P.: There is no Early Departure Procedure, the Master must sign Bills of Lading before sailing. Allow three to four hours after completion of loading to complete all paperwork.

Load Rates: Maximum loading rates for Propane and Butane are 2,550 and 3,000 cu.m./hr. respectively. The plant were able to supply at a very low initial rate at the commencement of loading.

Note: The Propane delivery temperature at vessel's manifold is −40°C during initial loading and −41°C thereafter.

Butane loading temperature was about 0°/−1°C.

Cargo Survey: Watson Gray, Inchape, S.G.S. and Saybolt are extending their service.

Density: Water density 1031.

General:

Stores: Not available.

Shore Leave: Definitely not allowed under any circumstances other than medical urgency.

Relief/Repatriation: Not possible.

Lloyd's Surveyor: A minimum of seven days' notice required.

Repairs: There are no repair facilities available. Whilst alongside main engines must be kept in immediate readiness.

Lifeboats: Permission *must* be sought from Port Authorities to carry out lifeboat drills. However, offshore lifeboat to be lowered to embarkation deck for emergency escape purpose.

Bonded Stores: No restrictions on tobacco. All alcohol should be collected and sealed. All cameras have to be collected and placed under seal.

Medical: Unless in cases of extreme urgency, totally unavailable.

Rat Guards: Must be fitted to all moorings.

Fresh Water: Not available.

Walport Films: Exchanges readily available with usual notice.

Entering Inwards: After the vessel's cargo nomination has been accepted she is allowed an "acceptance period" of one or two days in which to arrive at the port. Thus we arrived 7.5 hours after the expiration of our acceptance period and a vessel arriving 20 hours later received priority. This should be brought to the notice of Owners or Charterers, before arrival.

Papers: 1 copy Crew Declaration.
1 copy Bonded Stores List.
2 copies Crew List and Maritime Declaration of Health.

Bonded stores' seal checked on sailing. Customs checked both bars.

Note: Abu Dhabi operates a boycott against Israel.

The Master has to sign an undertaking to the effect that the cargo will not be discharged at a port under boycott and is given a form to be posted to Abu Dhabi from the discharge port as proof.

SHIP OPERATOR'S REPORT: February 1982 (Updated 1994).

The following is the criteria for gas carriers programmed to load propane/butane at Ruwais Terminal:

1. Maximum capacity 125,000 cu.m.
2. Minimum capacity 28,000 cu.m.
3. Minimum distance centre of manifold to end/start of flatside is 28 m.
4. Height of manifold above Chart Datum between 7.7 m. and 24.0 m.
5. *Maximum height of railing above Chart Datum in way of manifold is 21.8 m.*
6. Distance between ship's side and 12 in. manifold connectio between 1.5 m. and 6.1 m.
7. Four loading arms (2 liquid, 2 vapour) can be connected if cen to centre distance between 12 in. connection is between 1.6 m. a 3.5 m.
8. Two loading arms (vapour or liquid) can be connected if centre centre distance is between 1.1 m. and 1.6 m.
9. Vessel not to have carried ammonia on her latest two subseq voyages.
10. Cargo tanks will be cooled down on arrival as per follow temperatures:

    Propane Bottom −40°C
    Middle −30°C
    Top (excluding dome space) −20°C
    Butane Bottom −2°C
11. The cargo tanks pressure on arrival not to exceed 70 mbs.
12. Vessels calling at Ruwais for the first time, to inform GASCO Ruw not less than 48 hours prior to arrival of the disposition of manif connections from bow to stern, indicating which connection to used for Propane, Butane, liquid or vapour together with the cen to centre distances between them (e.g. P/V-2.1, P/L-1.7, B/L-2 B/V), also an indication whether connections are dedicated or c be changed at short notice.

    Vessels fitted with non-standard OCIMF manifold will load one gra at a time, delays resulting from consecutive loading will be to t vessel's account.
13. Vessel to be able to load at combined minimum rate 1,800 tonnes.p.h. if loading Propane/Butane simultaneously 1,000 tonnes.p.h. when loading Propane or Butane only, with t vapour return connected and operational.

    Failure to load at above rate will result in delays to the vesse account.
14. Minimum mooring requirements are as follows:

    3 head lines
    3 breast lines each end
    2 spring lines each end
    3 stern lines

    Preference is for all wire moorings, but 2 wires each end for spr lines are essential. Also mixed mooring for the same service is n allowed.

    Vessels unable to present wires for spring lines will have t mooring lines inspected by the Pilot on boarding. This inspect can only be carried out during daylight. If found satisfactory, t vessel will berth, provided the weather forecast, for the period t vessel is expected to be alongside, is favourable. Any dela resulting from vessel not able to present wires for spring lines, be for vessel's account.
15. Although it is recommended to regulate vessel's manifold valv closure time is 30 seconds. The minimum allowed time to close t liquid manifold valves in case of ESD activation is 20 seconds case of non-compliance, manifold valve closure time may dict the loading rate.
16. Maximum allowable tank pressure throughout vessel's s alongside is 70% of pressure safety relief valve (PSRV) set val
17. Towing-off wires shall be made fast to bitts as far forward and as practicable on the offshore side. The wires shall be in g condition, of adequate strength and secured with minimum 5 tu on the bitts, a towing-off wires shall lead directly to the chock w 20 m. slack on deck. A heaving line made fast to the eye shal used to maintain the eye of the wire between 1 m. and 2 m. ab the water line at all times.
18. Vessel to possess valid Certificate of Fitness or relevant lette compliance.

The following criteria for tankers programmed to load Pentane Plus Ruwais Terminal:

1. Maximum displacement on berthing 95,000 tonnes.
2. After berthing and throughout the period when the loading arms connected to the ship's manifold, height of railing in way of mani shall not exceed 16.2 m. above Chart Datum.

    Note: Maximum water depth alongside is 17.0 m. below C Datum.
3. On completion of loading the minimum distance of manifold ab Chart Datum is 2.3 m.
4. Maximum distance centre of manifold to bow/stern is 160 m.
5. Minimum distance centre of manifold to start/end of flatside is 3
6. Distance ship's side to 12 in. manifold connection:

    Maximum 6.4 m.
    Minimum 3.5 m.
7. Centre to centre distance between manifold connections:

    Maximum 2.5 m.
    Minimum 0.6 m.
8. A minimum under-keel clearance is required for all ships ente or leaving the port when deep loaded, as follows:

    (a) 3 ft. (0.91 m.) for ships of less than 100,000 S.d.w.t.
    (b) 4 ft. (1.22 m.) for ships of between 100,000 250,000 S.d.w.t.
    (c) 5 ft. (1.52 m.) for ships of over 250,000 S.d.w.t.

    While observing the safety requirements of under-keel cleara tidal delays may be experienced as follows:

    (a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
    (b) Ships drawing 45 ft. (13.7 m.) will occasionally have t for the tide.
    (c) Ships drawing 46 ft. (14.0 m.) will usually have to wa the tide.
    (d) Ships drawing 47 ft. (14.3 m.) will always have to wa the tide.
9. Vessel normally to arrive with segregated ballast for over discharge. Vessel arriving with dirty ballast/slops can disc these ashore, at a cost, provided:

(a) ADNOC Refinery has adequate space to receive slops/dirty ballast.
(b) Ample notice is given.
(c) Composition of slops/dirty ballast is given.
(d) Slops/dirty ballast is free of lead and chemicals.

GASCO cannot be held responsible for delays/deadfreight/etc., in case of the Refinery cannot accept dirty ballast/slops.

10. Vessels should be able to vent gases only through suitable vent stacks fitted with proper spark arresters. High velocity valves shall be strictly maintained on "Auto" mode during the vessel's stay alongside.

11. Vessels fitted with fixed ullaging machines should load with a closed system. Manual ullage could be taken during topping, provided the ullage openings are opened momentarily only, and fitted with spark arresters.

12. Vessel's tanks to be inerted on arrival, with oxygen content below 6% by volume.

13. Minimum mooring requirements are as follows:
    3 head lines
    3 breast lines each end
    2 spring lines each end
    3 stern lines

Preference is for all wire moorings, but 2 wires each end for spring lines are essential. Also mixed mooring for the same service is not allowed.

Vessels unable to present wires for spring lines will have their mooring lines inspected by the Pilot on boarding. This inspection can only be carried out during daylight. If found satisfactory, the vessel will berth, provided the weather forecast, for the period the vessel is expected to be alongside, is favourable. Any delays resulting from vessel not able to present wires for spring lines, will be for vessel's account.

14. Vessels should be able to load at a rate of 6% of their S.d.w.t. in tonnes (e.g. S.d.w.t. 30,000 tonnes = Loading rate 1,800 tonnes). Failure to load at above rate will result in delays to the vessel's account.

GASCO maximum loading rate through 2 loading arm connections is 4,200 cu.m./hr.

15. Towing-off wires shall be made fast to bitts as far forward and aft as practicable on the offshore side. The wire shall be in good condition, of adequate strength and secure with minimum 5 turns on the bitts, a towing-off wire shall lead directly to the chock with 20 m. slack on deck. A heaving line made fast to the eye shall be used to maintain the eye of the wire between 1 m. and 2 m. above the water line at all times.

SHIPMASTER'S REPORT: December 1995.

Charts: B.A. Chart No. 2889, 3733, 3779 and 3780.

Location: A sub-port of Jebel Dhanna, about 110 miles West of Abu Dhabi.

Ruwais was developed about 20 years ago to cater for the increasing products offtake from crude oil.

Channel: Long and somewhat tortuous, although well buoyed and little traffic. 95 miles from Zaqqum Racon. Maximum draft is 13.5 m. at anytime, generally 14.3 m., dependant on tidal state.

Draft restriction is between the pilot boarding ground at Gasha Racon Buoy to the berths, notably near Buoys No. 8, 10 and 18, where 14.0 m. CD is charted (verified by echo sounder).

The channel is narrow in these areas, being only 160 m. in width at Buoys No. 7/10.

VHF: As per ALRS. Communication is normally established around Creagh Shoal, about 40 miles in a direct line from Ruwais.

Vessel to have all particulars ready as per ALRS, notably GRT, NRT, draft on arrival and departure, Agent, cargo to be loaded, tank status, is vessel ready to load on arrival.

Public correspondence can be established through Emirates Radio as ALRS, but expensive.

Pilots: A mixture of British and Arab personnel are employed by the oil company.

24 hours berthing possible at jetties with wind speed up to 15 m./sec. A higher wind speed can be handled at Jebel Dhanna buoy berths.

Pilot for all berths boards at Ghasha Racon Buoy from a fast black hulled cutter with blue upperworks. Pilot boat comes out from Ruwais.

There is no set wind speed for departure from berths, but when above 15 m./sec. conditions are closely monitored.

Tugs: 6 tugs up to 8,000 h.p. are available for both Jebel Dhanna and Ruwais. One tug is on stand-by off jetties at all times. Pilots report that tugs are generally too powerful for Ruwais berths. When mooring a 75,000 cu.m. gas carrier, tugs only use half power. Tug's lines used.

Anchorage: Vessels awaiting a cargo nomination anchor off Ghasha Buoy (as per B.A. 3779) in 30 m. Holding not good, especially in 'Shamal' conditions.

Vessels with nomination awaiting free berth or gas carriers cooling down anchor off Ruwais berths/Jebel Dhanna as per B.A. 3780. Anchorages "A" to "K" for Jebel Dhanna and Anchorages "N" to "T" for Ruwais, including ammonia/fertiliser berths.

Berths: The LPG berth is marked as LNG on B.A. 3780, known as Gasco Jetty. Steel pile loading platform with outlying mooring dolphins connected by catwalks.

Flat face between fenders 97 m.

Jetty platform length 42 m.

Three mooring dolphins each side of jetty, extending 121 m.

Fenders consist of 4×4.5 m. Yokohama type floating fenders secured by chains against *former* flat face piling. Flat face discontinued some years ago after damage. Yokohama fenders present berthing difficulties as securing chains liable to part, so vessels cannot slide into position.

Port or starboard berthing dependent on vessel's manifold configuration.

Berth line is 305° – 125°.

Minimum depth alongside 17.0 m. CD.

Connected to shore by trestle pier 1.4 miles in length, running North/South.

Quick release mooring hooks on each dolphin.

Shore gangway on North end of loading platform.

Moorings: Normally 3-3-2. One line boat. Springs sent away first. Wires and ropes cannot be mixed on same system. Springs to be wires. All wires to have tails.

Cargo: At present the Gasco Pier loads propane, butane and pentane. By the end of 1995, pentane loading moving to the Liquid Products Jetty.

LPG shipments to be increased in near future.

Chicksans (See "Plan" for layout).

LPG arms have airdraft envelope of 7.7 m. to 24.0 m.

Product comes from tanks about 3.0 km. away along 16 in. pipeline. Presently, 2×20,000 cu.m. propane tanks interconnected and 1×30,000 cu.m. butane tank. Tankage is being increased.

Propane is generally warm. From experience, when loading at 1,000 tonnes/hr., temperature at manifold is −40.6°C.

Propane ethane content is high at 1.8%.

Maximum loading rate using 2 shore pumps on each grade – Propane 1,470 tonnes/hr. and butane 1,780 tonnes/hr. at maximum back pressure of 5 kg. With one pump, up to about 800 tonnes/hr.

When topping-off tanks, rate can be stopped from 500 cu.m.

Butane can be loaded into propane atmosphere but VRL not allowed, except in emergencies.

Loading will be stopped if pressure in ship's tanks exceeds 70% of MARVS.

For berthing acceptance, tank conditions to be as follows:
  Propane bottom – 40°C.
  Propane middle – 30°C.
  Propane top – 20°C.
  Butane – 4°C.
  Pressure 100 mbs.

Vapour return line: In theory available for usage without charge. Always connected for emergency use.

On investigation a charge is levied indirectly by way of reduced Bill of Lading compared to ship figures, even though vapour is being returned to shore tank, generally not same tank as that loading from.

Samples of ship's tanks taken before use (except in emergency). Minimum acceptable standards:

	Propane	Butane
Ammonia	Nil	Nil
Propane	Min. 85% Vol.	Butane Min. 80% Vol.
Dewpoint	−55° or lower	−28° or lower
Nitrogen	less than 1%	less than 1%
Carbon-Dioxide	Nil	Nil

Terminal gives vessel walkie-talkie for communication to Jetty Control Tower. Telephone to Control Tower at gangway steps (48735/48740).

Gas carriers cannot cool down alongside, after taking coolant, they have to proceed to inner anchorage to cool tanks to Gasco specification.

General: Gasco: Telex 0893-352224.

Offside lifeboat to be turned out alongside.

Safety check round before loading. Valve closing times and gas analyser liable to be checked.

No personnel – Joiners/repatriations allowed.

No stores/freight allowed.

Medical attention, by prior arrangement if possible, can be arranged.

Security on jetty is very tight.

The Liquid Products Jetty is being extended N.W. by about 300 m. to incorporate a third products berth, due to commence operation by December 1995. Pentane loading will then move to Liquid Products Jetty.

Pilots and tugs also cover the Ammonia/Fertiliser Bulk Cargo Terminal about 1 mile S.E. of Gasco Berth.

Bunkers: Available ex-Gasco and Liquid Products Jetties. 8 in. Chicksans. IFO 180 cst and MDO.

Documentation: Agent boards once only, soon after arrival, and clears vessel inwards giving outward clearance at same time.

No port officials/Customs/Immigration board.

Agent requires:
  6 copies Crew List plus 2 copies to Jetty.
  1 copy Ship's Stores List.
  1 copy Crew Declaration.
  1 copy Ports of Call List.
  1 copy Maritime Declaration of Health.

Long Arrival Check List given by Pilot and has to be filled in before berthing. He requires photocopy of Tonnage Certificate, particulars of all Ship's Certificates and Officer's Licences.

On completion of loading, at present, vessel remains alongside to complete Cargo Documentation/Bills of Lading. Normally Pilot booked about 2.5 hours after completion of loading.

EDP probably to be instituted shortly when terminal capacity increases.

OPERATOR: Abu Dhabi Gas Industries Ltd., P.O.Box 665, Abu Dhabi, U.A.E. *Tel:* 651100. *Telex:* 22365. *Cables:* Ongas. *FAX:* 6047414. *Contact:* Marine Superintendent.

(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

The bulk cargo terminal (FERTIL) at Ruwais comprises a 512 m. long jetty with in line berths to suit the export of bulk/bagged Urea and Liquid Ammonia. Three mooring dolphins at the seaward end of the jetty serve a Liquid Ammonia berth. Max. draft is 11 m., a 500 m. turning circle is provided off the jetty and vessels will normally be berthed port side alongside with ship providing its own access. Mooring lines should preferably be all steel wires. If this is not possible ropes and wires are not to be led to the same dolphin. A shore deballasting system is provided.

Provision has been made along the jetty for bag and bulk conveyors to load vessels with urea from a fertiliser plant 1 km. inshore.

The loading of ammonia is carried out from a loading arm at the North end of the jetty where vessels can berth using 3×100 ton capacity mooring dolphins.

OPERATOR: ADPPOC is the service contractor.

LOCATION: The jetty alignment and conveyor main setting out line is 10° West of North. The seaward limit of the jetty works are defined by the Northernmost mooring dolphin.

The terminal is located in 12 m. of water, due East of the NGL Jetty, and West of the Construction Wharf and is approached from a deep water channel serving other Ruwais jetties.

A turning basin is located N.E. of the jetty and is of 500 m. diameter and has a minimum dredged depth of 12 m. below chart datum.

Vessels will normally be berthed against fender piles alongside the jetty on a heading of 350°.

NOTICE: *Ship's Arrival Advice:* It is strongly requested that full details of the vessel including the number of crew and their nationalities should be advised to us. This information is required by the oil installations protection unit. In the absence of this information the protection unit would refuse permission for berthing of the ship. Therefore, you must ensure timely availability of this information so that it can be forwarded to the authorities. Any delay caused in berthing due to non-availability of information shall be to your account.

Further, please note that the above information should be made available as soon as the ship is nominated but not later than 24 hours after the nomination is confirmed. *Signed*: Plant Manager, Fertil.

BERTHING: *Jetty:* The jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long (25,000 d.w.t.) bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

The jetty deck is of concrete construction and is supported by vertical 1 m. diameter tubular steel pipes.

Two turnround areas for jetty traffic are provided, one mid-way along the jetty, the other at the Northern end.

The jetty is designed to support up to 3 ship loaders with a backing conveyor system and up to 3×300 mm. diameter liquid ammonia lines.

The 3 mooring dolphins at the Northern end of the jetty serve the Ammonia Berth and each has a bollard capacity of 100 tonnes and is connected to the jetty by a system of concrete walkways.

The jetty and dolphins have a deck level 7.4 m. above Jebel Dhanna Chart Datum.

The minimum dredged depth at the berth is 12 m. below Chart Datum.

Fenders: The fender system has a design capacity of 55 tonne metres per fender pile and the recommended berthing angle is 5°. The fender system absorbs energy by deflection of single 1,300 mm. diameter tubular steel cantilever piles and twin Bridgestone Cell units which have a frontal frame 4.2 m. high by 1.7 m. wide.

The fender face is set 4 m. seaward of the jetty deck edge.

The fender spacing is generally 15 m. along the main length of jetty and this extends to 31 m. for the Northern fenders located East of the mooring dolphins.

The fenders are suitable for vessels between 5,000 d.w.t. and 25,000 d.w.t.

Mooring: Ship lines will be taken to 100 ton "Bean Type" mooring bollards located along the cope edge of the jetty. The general bollard spacing is 15 m. whilst at the shore end this extends to 30 m.

100 ton "Bean Type" bollards are positioned on the 3 mooring dolphins located at the seaward end of the jetty. Ships' lines may be taken to the dolphins by boat or via the concrete walkways provided from the jetty deck.

Landing Stage: A landing stage for small harbour craft is located adjacent to the jetty near Pile Bent 55, some 600 m. South of the outermost dolphin.

Access Ladders: Access ladders to water level are provided on the fender piles at a spacing of 60 m. All mooring dolphins are provided with access ladders.

Services: Provision has been made for future electrical and mechanical services in the jetty by ducts cast into the concrete deck or provision for hanger supports beneath the deck.

Loader Rails: A flat bottom loader rail having a gauge of 11 m. is secured to the concrete deck by Molyneaux Clips. Buffer stops are provided at both the inshore and offshore limit of the rail. Provision has been made for the future extension shorewards of the loader rail.

Approach From Shore: The approach to the jetty is via a dual carriageway off the Corniche Road. The access road leading to the jetty is 600 m. long and 8 m. wide and bounded on one side by the export conveyor housing.

Breakwaters: Rubble mound breakwaters protect the cooling water intake channel located West of the jetty.

Rubble mound reclamation bunds built just landward of the reef define the land area.

A rock armoured cooling water outfall channel is located within the reclamation and located mid-way between the jetty and construction wharf.

LOADING: *Urea Loading Operation Procedure:* Firstly, the Shift Supervisor, after the arrival of the vessel, and after getting Clearance Certificate, will discuss the necessary loading sequence for keeping the vessel trim with ship's Cargo Officer.

When the sequence of operation has been agreed, the Shift Supervisor will inform operational group in Bagging Control Room and shiploaders of the sequence required.

On receipt of this information, Bagging Control Operators will pre-set the bag counters or scales and line up other conveyors and machines depending upon the method of shipping required (i.e. bagged or bulk product) to the quantity agreed with the ship Cargo Master. Meanwhile, the Shiploader Operator will have positioned his machine ready for loading into the appropriate cargo hold defined by the sequence of operation.

Shiploader Operator will then give signal as "Shiploader in Load Position" and Bagging Control Room Operator will start sending bag bulk urea to jetty.

The pre-set bag counters or belt weighers will trip the conveyor syst (excluding the jetty conveyors) when the pre-set capacity has be realised. The signal to start again will be given by the "Shiploa Running" signal. On receipt of this signal in the Bagging Control Roo the shiploader will have traversed to its new loading position and will ready for the next batch of product.

Photocells are provided in conveyors at bagging area to indicate act number of bags loaded in ship's load. A cumulative reading (in numbe is recorded in Bagging Control Room.

For bulk urea loading, urea going to jetty conveyor is measured weighing scales inside the Bagging Building. The weighing scale h load cells and belt speed detector for measuring the flow rate. The fe rate is indicated and also totalised cumulatively at Bagging Con Room, and also at the local control panel of weighing scale.

Normal operational shut-down shall be sequential and initiated fro Bagging Control Room.

(F) ADNOC RUWAIS SULPHUR HANDLING TERMINAL (SH

The ADNOC Ruwais Sulphur Handling Terminal is situated at the E of the existing Fertil's Bulk Cargo Terminal at Ruwais and consists an overall water length of 350 m., which lies in a S.E. direction at t existing jetty. This facility will accommodate at the present, the exp of only granulated sulphur in bulk into bulk cargo vessels between t range of 5,000 d.w.t. to 25,000 d.w.t. and max. LOA 175 m.

The overall berthing arrangement includes 3 mooring dolphins a 6 breasting piles. The 2 centre breasting piles are equipped with qu release hooks for receiving vessels spring lines.

The loading of bulk sulphur is carried out by the telescopic boom the quadrant shiploader which has 123 m. long travelling arc, having design loading capacity of 1,000 tonnes/hr. and minimum loading r of 400 cu.m./hr.

RADIO: *Format for Information required from Vessels prior to Berth at SHT:*

(AAA) ETA Ruwais.
(BBB) Cargo quantities (in tonnes) to be loaded with intend stowage and acceptable loading rate per hour.
(CCC) Cargo on board on arrival (if any) with stowage.
(CCC) Last 3 cargoes carried by the vessel with stowage.
(EEE) Details of hatch cleaning after the discharge of last cargo
(FFF) Any deballasting prior/during loading, quantity and t required.
(GGG) Arrival and sailing draft/displacement.
(HHH) G.r.t., n.r.t., Official No., year of built, Owner's name.
(III) S.d.w.t., LOA, beam, flag, Port of Registry and Master's nar
(JJJ) No. and type of hatches and their capacities.
(KKK) No. of derricks and their capacities.
(LLL) Last Port of Call, last port of discharge and next Port of C
(MMM) Any requirements.
(NNN) Any special requirements by Charterers/Owners with resp to N.O.R., loading before Laydays, etc.

Please note that vessels older than 15 years will be subject to day inspection by PPA prior to berthing.

OPERATOR: ADPPOC is the service contractor to ADNOC.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., Je Dhanna, United Arab Emirates. Tel: (971-2) 730500. After hours: A Dhabi 794490. Cables: "Confidence", Abu Dhabi. Telex: Abu Dh 22248 ("Gacauh EM"). Fax: Abu Dhabi 731328.

KHOR FAKKAN, Sharjah: 25.22 N. 56.22 E. **(See Pl**

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518

DOCUMENTS: The following documents must be in the possessio the ship's Master on arrival, or must be forwarded to ship's Agent to arrival:

Immigration: board on arrival
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Passports/Seaman's Identity Cards

Customs:
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Cargo Manifests (2 copies)
- List of Alcoholic Beverages (2 copies)

Port Operator:
- Certificate of Registry (1 copy) on request
- Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator ship's Agent at least 24 hours prior to the vessel's arrival.
- Cargo Plan (1 copy)
- Discharge List (1 copy)
- Transhipment List (1 copy)
- Dangerous Cargo Manifest (1 copy)
- Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the Fairway Buoy. Port Khor Fakkan operates a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the Fairway Buoy. The extremity of the breakwater (Lat. 25° 21' 28" N., Long. 56° 22' 43" E.) is marked by a white occulting light visible 10 miles.

"Gulf Pilot Khor Fakkan" on VHF Channel 16. Also on 2182, 2638, 2738, 3270, 3710 and 4136.3 kHz.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator. Otherwise, anchoring not permitted within 12 miles of Khor Fakkan as the area is a prime tourist area.

MAX. SIZE: Max. draft entering and leaving is 39 ft., range max. 3.0 m., height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio Pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid cholera certificate. The Health Officer will board when the vessel is alongside.

RADIO: Bahrain Radio A9M.

Notice of Arrival: Vessel should advise its Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival and confirm 48 hours and 24 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan Signal Station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 2 tugs of 2,100 h.p. each

BERTHING: Length of berth 430 m. Depth alongside 12.5 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Booatse Gantry Cranes, 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Operator.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew change facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

BANKS: British Bank of the Middle East, P.O.Box 10030, Khor Fakkan, U.A.E. *Telex:* 89011 Bbmefj EM (stating for KFK.)

Grindlays Bank Ltd., P.O. Box 10149, Khor Fakkan, U.A.E. *Telex:* 89025 Grnly EM.

STORING: At anchorage – by off-shore crew change boats. Alongside – by truck alongside ship. Fork lift trucks and local labour available if required.

SHORE LEAVE: Shore leave is permitted.

GARBAGE DISPOSAL: Garbage skips can be arranged through the Port Authority and are placed alongside at the quay. Charges are U.A.E. Dirhams 50 per day.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (Fixed Link).

GENERAL: Pollution: The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

SHIPMASTER'S REPORT: January 1986

If vessel calling for bunkers only Port Control insist that vessel anchors at least 4 miles off the Fairway Buoy. No Agent or port entry papers required in this case. If however, stores are taken or any crew members changed, an Agent must be appointed and port entry papers completed.

AUTHORITY: Sharjah Ports Authority, Port Khor Fakkan, P.O.Box 10542, Khor Fakkan, U.A.E. *Tel:* Khor Fakkan 85324/85027. *Telex:* 89023 SEAGUL EM. *Cables:* Mina Khor Fakkan. *Contact:* Captain Abdul Razik El Sharif, Harbour Master.

Port Operator: Khor Fakkan Container Terminal Ltd., (A Division of Gulftainer), P.O.Box 10326, Khor Fakkan, U.A.E. *Tel:* 85604/5. *Telex:* 89064 Servic EM. *Contact:* Captain N. Smith, Terminal Manager.

AGENT: See "Sharjah".

MINA SAQR, Ras Al Khaimah: 25.59 N. 56.03 E.

(See Plan)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58' 48.35" N., Long. 56° 02' 43.7" E.

LOCATION: The Port of Mina Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On Chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58' N., Long. 56° 03.5' E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessel's arrival:

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ship's Certificates, etc. to be kept ready for inspection by the Officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at Approach Buoy (R and W pillar buoy Int. Qk. Fl.) in position Lat. 26° 00' N., Long. 56° 02' E. and in all cases a pilot ladder should be provided and a lee given. Pilotage service available 24 hours. Leading light PEL on 20 m. high tower, Red 3°, White 4°, Green 3°.

Master to contact "Mina Saqr Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. The co-ordinates of the anchorage on Chart B.A. 3737 are:

1. Lat. 25° 58' 36" N., Long. 56° 01' 48" E.
2. Lat. 25° 59' 24" N., Long. 55° 59' 02" E.
3. Lat. 26° 01' 12" N., Long. 56° 02' 11" E.

Depths are from 20 m. to 28 m.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 244 m. for easy berthing. Permissible draft in all the berths is 11.5 m. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and Pratique is granted subject to Port Health Authorities' approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with other working Channels, port working Channel 67. Port Signal Station is manned 24 hours a day and should be contacted at least 2 hours prior to vessel's arrival. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Port is equipped with 2 radars with range of 90 miles.

TUGS: 3×5,000 h.p. Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.

BERTHING: The harbour and entrance channel is 12.2 m. MLWST. A draft limit is imposed of 11.5 m. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,690 m. in length will provide berthing facilities for 8 ships. Included in this are 2 Ro/Ro ramps. 4 container cranes and supporting equipment are available.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 4.5 m.

All the 8 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using port cranes. All berths are general cargo berths. Berths No. 3 and 5 have ramps for Ro/Ro vessels.

CRANES: 4 shore cranes available at any berth. Max. capacity 45 tons at 29 m. and 29.5 tons capacity at 41 m. radius, to handle containers loaded up to 35 tons under automatic spreader, as well as bulk materials with 10 cu.m. max. grab capacity at maximum of 41 m. outreach, and 3 mobile cranes 35 tons capacity available for small ships up to 7,000 tons d.w.t.

BULK CARGO FACILITIES: Berth No. 5 is allocated for loading of bulk cargo and Berth No. 7 for loading bulk cement. Bulk cargoes handled at present are iron ore, gypsum, cement, bauxite, clinker and aggregates, and vessels with these cargoes are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present.

SPECIALISED CARGO HANDLING FACILITIES: 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. There is also one berth for bulk cement loading (Berth No.7). Length 180 m. Max. draft 11.5 m., rate of loading cement with hoses is 600 t.p.h. maximum.

An automatic moving shiploader for aggregate and limestone has been installed on Berth No. 5, length 200 m. Max. draft 11.5 m. alongside. The shiploader maximum loading rate is 1,500 t.p.h.

The port has container handling facilities at Quay No. 1, rate 50 – 60 TEU/hr.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by RAK Stevedoring Company. Telex No. 99129 RSC EM. Fax: (077) 67363., (who can be contacted via the Signal Station) and the gangs work on board the vessel directly under the supervision of the vessel's Officers RAK Stevedoring Company accepting no responsibility whatsoever for any damage either to the vessel or its cargo. *Working Hours:* 0700 – 1400 hrs. and 1500 – 2100 hrs.

MEDICAL: Advisable for Agents to receive at least 24 hours' advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Cholera and Yellow Fever Certificates.

TANKERS: No tanker berth in port. Tankers will discharge at Berths No. 1, 2 and 3 through bunker line – this will be fuel and diesel oils only. Fuel line 12 in., diesel line 8 in. and 6 in. hose. SBM offshore for loading crude oil (See "Hulaylah Terminal").

DENSITY: 1024 – 1028.

FRESH WATER: Fresh water available in Berths No. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will be Dh. 7/– per ton.

FUEL: Fuel oil, marine diesel oil, and gas oil can be supplied through RAK Refuelling (Shell) or E.G.P.C. Telephone and telex numbers are available through the Port Signal Station. All sizes of reducers are available and pumping rates are fuel oil 200 t.p.h. and gas oil 250 t.p.h. – 300 t.p.h., subject to vessel's receiving capacity. Presently there are 6 bunker points in Berths No. 1, 2 and 3.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers is received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah Fire Brigade are available.

CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.

REPAIRS: Small repairs can be carried out in the port, but major work can only be carried out by companies in Dubai.

DRY DOCK: No dry dock in Mina Saqr. The nearest drydocks are at Ajman and Dubai.

SURVEYORS: Draft, on-off hire and Bunker surveys are arranged through the Port Authority. All Classification Societies, Salvage Associations and cargo inspection companies are available in Dubai and Sharjah.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCES: Normally, bonded stores are not sealed by the Customs Authorities. However, only limited stock should be left with the Officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 km. South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: All police, fire and ambulance emergencies should be notified on 999. General telephone numbers are: 29351 for Police, 26668 for Ambulance and 21212 for Fire.

TELEPHONES: No telephones available for placing on board vessels. However, a telephone is available in the Port Signal Station 24 hours a day.

For international calls, Agent's offices situated outside port area should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/radar repairs, tank cleaning equipment, scamping (underwater cleaning) facilities, etc. can be arranged. Garbage reception facilities available.

BANKS: National Bank of Ras Al Khaimah, Bank of Melli Iran, United Arab Bank, National Bank of Abu Dhabi, Bank of Baroda, Bank of Oman, British Bank of Middle East, Banque du Caire, Commercial Bank of Dubai, Bank of Arab Coast, Middle East Bank and Bank Libanaise pour le Commerce.

STORING: See "Prelims".

1. By truck or barge.
2. No restrictions.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Can be granted and for this purpose the Agents should hand over a Crew List to the Immigration Department who will issue shore passes in exchange for Seaman's Book or Passport. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the Immigration Department, Seaman's Books/Passports will then be returned. Agents should advise Immigration Department by letter if any crew changes to be effected.

GARBAGE DISPOSAL: Service available, drums are provided alongside. Tel: 668444. Charges Dhs 50.00 per trip (24 hour service).

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Local currency is the U.A.E. Dirham.

REGULATIONS: None.

DELAYS: No berthing delays.

AUTHORITY: Ras Al Khaimah Port Services, P.O.Box 5130, Ras Khaimah, U.A.E. *Tel:* (07) 668444 (4 lines). *Telex:* 99280 Rakps E *FAX:* (07) 668533. *Cables:* Minasaqr. *Contact:* Captain Hazem Ra Assaad, Port Manager.

AGENT: Gulf Agency Co. (Ras Al Khaimah) Ltd. L.L.C., P.O.Box 51 Ras Al Khaimah, U.A.E. Cables: "Confidence", Ras Al Khaima Telex: 99226 ("GACRAK EM"). Tel: 221266, 7221966. After office ho 352449. Fax: 229499. VHF: Channel 16 during office hours.

Operators of ships' supply service and shipping agency: Cr changes, mail, spares and/or delivery of provisions, fresh water and lu oil, as well as arranging of bunkers and Ship-to-Ship transfers.

Owners, Operators and Masters are welcome to contact G.A.C. Du by cable or telex regarding requirements and for coordination of rend vous positions off Dubai, Fujairah, Khor Fakkan and Ras Al Khaima

MINA ZAYED, Abu Dhabi: 24.32 N. 54.23 E. (See Pla

COURTESY FLAG: Vessels calling at ports in the Emirate of Abu Dh should fly the flag of the United Arab Emirates as a courtesy flag.

DOCUMENTS: 5 copies of Cargo Manifest are required, with full ca particulars, such as Bill of Lading number, marks/numbers, descripti weight and measurement and IMO Class if any. It is essential that this information against consignee/notify parties name, full cont address is given on the Manifest for each consignment. The Manife should reach the Agent prior to arrival of vessel in order to be submit to the Port Authorities 48 hours before the ship's arrival.

Also stowage particulars should be submitted with the Manifest in or that the Agent may advise the Port Authority of the equipment and lab required for efficient handling of the vessel.

Customs Require:

1 copy Crew List.
1 copy Stores List.

Immigration Require:

2 copies Crew List.
2 copies Passenger List, if any.

Quarantine Require:

Crew List
International Health Certificate.
Vaccination List.

PILOTAGE: Pilotage is compulsory for all vessels entering/leaving M Zayed. Pilotage 24 hours. Pilot will board incoming vessels withi radius of 1 nautical mile seaward of the Fairway Buoy (Lat. 24° 39.15' Long. 54° 14.1' E.). Ships should wait for Pilot in the area stated ab and not enter the channel unless instructions to the contrary are giv

ANCHORAGE: Recommended anchorage for ships over draft of 9.45 is approximately 1 mile N.E. of Abu Dhabi Racon and for ships u 9.45 m. draft approximately 0.9 miles S.W. of "Z 11" in posi Lat. 24°35.5' N., Long. 54°18.93' E.

MAX. SIZE: Largest vessel up to draft 13.0 m. at general cargo ber 13.0 m. at Container Terminal, no restriction on beam or length.

Max. rise and fall of tide is 2.0 m.

RADIO: Vessels are to give their ETAs by cable through Musca Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harb Office" at least 72 hours prior arrival. Port Control Tower equipped HF transceiver operating on 2 frequencies and continuous watch 2182 kHz.

VHF: Port Control Tower on VHF Channels 16, 12, 11, 9 and 6.

TUGS: 4 harbour tugs available, 2×2,400 h.p. and 2×1,250 h.p. T fitted with VHF.

BERTHING: 21 deep water berths with a total quay length of 4,30 Berths No. 1, 2, 3 and 4 Container Terminal with depth 10.5 m. to 13.0 Berths No. 5, 6, 7, 8 and 9 with depth 9.5 m.; Berths No. 10, 11, 12 13 with depth 6.0 m.; Berths No. 14, 15, 16, 17, 18 and 19 with d 11.5 m.; Berths No. 20 and 21 with depth 10.5 m.

Storage: The Port has 13 closed storage sheds over an area 102,300 sq.m. There are also 9 open sheds with a total are 45,000 sq.m. and an open area (paved) of 1,104,000 sq.m. fo stacking or storage of various types of cargo such as timber, s construction materials and cars.

CRANES: Cranes for discharging available. Mobile cranes from 5- tons available. 3 container cranes 40 tons, fork-lift trucks and tra 2×40 tons straddle carriers.

CONTAINER HANDLING FACILITIES: *Container and Ro/Ro Faci* Container Terminal has 4 berths with a total length of 800 m. Two b have a depth of 13.0 m. and 2 berths have a depth of 10.5 m. The b are equipped with 3 Krupp modern container cranes of 40 tons cap with an outreach of 39 m. 2×40 ton rail-mounted yard cranes, 2 tons, 2×15 tons, 2×8 tons Forklift trucks, 2×40 ton straddle ca 25 HK stacking containers, which accommodate 15,000 TEU's and is a large LCL Terminal and a large area set aside for Ro/Ro equip 148 reefer plugs (480 volt, 32 amp), workshop for maintenanc repair of cranes and other equipment. Computer equipped control radio network linking cranes, other equipment and offices and sh

BULK HANDLING FACILITIES: Bulk grain silo at Berth No. 19 storage capacity of 60,000 tons with discharge rate of 240 t.p.h.

STEVEDORES: Skilled manpower available for all kinds of operations.

Working Hours: Working hours for stevedoring from 0700-2100 hrs overtime on request.

Cargo is also handled on Fridays.

Container Terminal works 24 hours, 7 days a week.

MEDICAL: Fully equipped Government hospital, most medicines available. Private clinics available.
TANKERS: See "Das Island", "Umm Al Nar" and "Jebel Dhanna – Ruwais".
FRESH WATER: Available at all berths, or by barges.
FUEL: Diesel oil and gas oil is available by barges.
FIRE PRECAUTIONS: Port Zayed Fire Brigade is available 24 hours a day. The harbour tugs are fitted with fire-fighting equipment.
SURVEYORS: Lloyd's Agents: Abu Dhabi Maritime & Mercantile International, P.O.Box 247, Abu Dhabi, Tel: (2) 323131. Telex: 22245.
LAUNDRY: Reasonably good laundries available.
PROVISIONS: Can be arranged through ship's Agent.
AIRPORT: Abu Dhabi International Airport is 40 km. There are daily flights to all Gulf State Countries.
TIME: GMT plus 4 hours.
HOLIDAYS: Friday is weekly holiday. Cargo movement generally not affected by holidays.
SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid Seaman's Book.
GARBAGE DISPOSAL: Garbage collection service is available by providing drums alongside free of charge.
WASTE OIL DISPOSAL: Waste oil collection service is available. At present waste oil is collected by tankers which are provided by ship's agents at any time.
SEAMAN'S CLUBS: No clubs operating at the port. Public telephone service and postage facilities are available.
CURRENCY: U.A.E. Dirham (Drhs).
GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of all shipping agencies in Abu Dhabi, to supply the Traffic Department with the date of arrival of ships which are going to discharge their cargo at anchor.

To enable the Traffic Department to take the necessary action and to render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.
DEVELOPMENTS: Fishing harbour under construction South of the Dhow Harbour.
AUTHORITY: Abu Dhabi Seaport Authority – Port Zayed, P.O.Box 422, Abu Dhabi, U.A.E. *Tel:* 730600. *Telex:* 22731 Portex EM. *FAX:* 731023.
Officials: H.H. Sheikh Saeed bin Zayed Al Nahyan, Chairman.
H.E. Hassan Mousa Al Qamzi, Under Secretary.
Mr. Mubarak Mohamed Al Buainain, Port Director.
Mr. Hamad bin Ali Al Darmaki, Deputy Port Director.
Mr. Hamad R. Al Nouami, Manager, Chairman's Office.
Captain Said Darwish Al Rumaithy, Harbour Master.
Mr. Rashid Hilal Al Busaidy, Container Terminal Manager.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 730500 (10 lines). After office hours Tel: 794490. Fax: 731328. Radio: Marine VHF radio, stand-by on Channel 16, Call sign "Confidence, Abu Dhabi". Telex: 22248 ("Gacauh EM").

MUBAREK TERMINAL, Sharjah: 25.49 N. 55.11 E.
(See Plan)

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.
DOCUMENTS: One Crew List and valid Health Certificate.
EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master including Bills of Lading.
PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Mooring Master shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.
NAVIGATION AIDS: A floating oil storage vessel (F.S.U.) *Mubaraka* (87,000 d.w.t.) is used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored to the SPM in position 25° 49' N., 55° 10' E. The *Mubaraka* is equipped with normal navigational warning lights and aids as required by convention.

A fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at Lat. 25° 50' 43" N., Long. 55° 11' 49" E. Said structures are equipped with 1 clear light and a fog horn, each with characteristics Mo(U) 30 secs. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at Lat. 25° 50' 56" N., Long. 55° 12' 00" E., approximately 037°, 1,716 ft. from the oil production platform. In addition, there are numerous oil well head structures within the restricted area described below. All structures have standard navigation aids with characteristics the same as mentioned above.
READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.
ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position Lat. 25° 46' 45" N., Long. 55° 13' 13" E.
RESTRICTED AREA: A restricted area of approx. 38 square miles has been established with a boundary formed by an imaginary line from:
(a) 25° 54' 26" N., 55° 13' 49" E. in a W.S.W. direction to
(b) 25° 15' 14" N., 55° 07' 19" E. thence in a S.S.E. direction to
(c) 25° 46' 33" N., 55° 09' 37" E. thence in a E.N.E. direction to
(d) 25° 49' 44" N., 55° 16' 08" E. thence in a N.N.W. direction to the position above.
Note: There are now 11 platforms within the restricted area and a New Central Platform was installed in position Lat. 25° 50.7' N., Long. 55° 11.7' E. in 1992.
RESTRICTIONS: Max. distance bow to manifold 555 ft. (169 m.).
MAX. SIZE: Max. berthing deadweight 275,000 tons.
HEALTH: When arriving fly "Q" flag by day, and red over white light at night for quarantine service.
RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", operating on a 24 hour basis or directly by telex to 68015 CRESPT EM.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 71 and 17 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 5" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position: Lat. 25° 49' N., Long. 55° 10' E.
Frequencies: Channels 71 and Marine Private 33 (157.650 MHz).
Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 71 and 33. Vessel approaching the terminal not having Channel 71 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 71 is reserved and as an alternative Channel 17 for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 71, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:
ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in barrels at 60°F.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.
TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.
BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign "Mubarek Terminal", in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.
Mooring: Mooring is by the "Tandem" method, with the bow of the export tanker moored to the bow of the storage tanker *Mubaraka*. The mooring rope is a standard 21 in. circumference × 200 ft. nylon SPM rope, fitted with a 3 in. OCIMF chafe chain.

During the mooring-up operation a tug is made fast to the stern of the visiting tanker and remains attached throughout the entire loading operation, in order to maintain both vessels in alignment.

Tug and mooring boats are supplied by the Terminal, also vessels should note that mooring crews must be available fore and aft. Normally the tug will use its own tow rope, therefore a good quality messenger must be ready aft, as well as forward.

Average loading rate is 16,000 b.p.h.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle and poop decks.

All vessels should have ready messenger lines on forecastle head for bringing the mooring line aboard from single point mooring.

Mooring winches on forecastle head for handling 1×12 in. circumference synthetic fibre floating pick-up line.

Adequate mooring bitts to secure mooring line. A bow stopper designed to O.C.I.M.F. standard is required at all times.

Hose lifting winch, derrick and gear rigged for 10.0 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the port side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ASA 150 pound flat face 12 in. "Camlock" coupling and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *Mubaraka*.

CARGO SPECIFICATIONS: Mubarek Condensate Blend: Approximate API 50°.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GARBAGE DISPOSAL: No facilities (Offshore Terminal).

WASTE OIL DISPOSAL: No facilities.

CURRENCY: U.A.E. Dirham.

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

SHIPMASTER'S REPORT: December 1979 (Updated 1988).

Pilotage: Pilot flies out from Sharjah by helicopter and he carries out all entry procedures. He will also take mail ashore for delivery to vessel's Agents. Mail must be placed in one envelope, addressed to Agents and marked ship's mail.

Tankers: Loading rate commences at 1,000 t.p.h. and when everything satisfactory increased to max. 2,000 t.p.h. Normal parcel is 500,000 bbls. ±0.0%. If vessel requires a plus % then give a Note of Protest to the Pilot.

AUTHORITY: *Operator:* Crescent Petroleum Company, P.O.Box 211, Sharjah, U.A.E. *Tel:* Sharjah 543000. *Telex:* 68015 Crespt EM. *Cables:* "Crespt Sharjah". *FAX:* Sharjah 54200. *Contact:* Captain R. Harcus, Marine Superintendent.

AGENT: Gulf Agency Co. (Sharjah) W.L.L., P.O.B. 435, Sharjah, U.A.E. Cables "Confidence", Sharjah. Telex 68019 ("Gacshj EM"). Tel: (971-6) 544446. After office hours 354249. Fax: (971-6) 722093.

MUBARRAZ ISLAND, Abu Dhabi: 24.26. N. 53.32 E. (HALAT AL MUBARRAZ) (See Plan)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
International Maritime Declaration of Health.

FLAG: All vessels calling at Mubarraz are required to fly the national flag of U.A.E. which are available from ship's Agent.

LOCATION: Mubarraz Island is located approximately Lat. 24° 28' N., Long. 53° 22' E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarraz oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarraz Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 2,238,000 barrels of crude oil on the island.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 36.5° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarraz and its approaches cover area bounded by straight lines connecting the following points:

(a) Lat. 24° 30.0' N., Long. 53° 36.0' E.
(b) Lat. 24° 24.0' N., Long. 53° 36.0' E.
(c) Lat. 24° 24.0' N., Long. 53° 27.0' E.
(d) Lat. 24° 26.7' N., Long. 53° 21.7' E.
(e) Lat. 24° 30.0' N., Long. 53° 21.7' E.

Masters of all vessels entering the Port must follow instruction fr the Company's Port Master as to approaches, anchoring, berthing a unberthing.

APPROACHES: *Approaches to Mubarraz:* Japanese Charts No. 31 and No. 3174 cover the approaches to Mubarraz. For tankers arriv at Mubarraz without necessary charts full information shall be given telegram if a request is sent to "Confidence" Abu Dhabi via "A9 Bahrain Radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be giv to her upon request to "Mubarraz Terminal" as she approaches but pr notice of requiring this service should be given in the vessel's arri message.

Charts: The following charts are recommended for use in Abu Dha waters:

Japanese Charts No. 3173 and 3174
British Admiralty Charts No. 3733, 3734, 2889 and 3716.

Approaches to Mubarraz – Navigational Aids:

9	24° 25.70'	53° 33.05'		
			Total Distance:	46.2

Anchorage Position	Lat. 24° 26.80' N.	Long. 53° 34.00' E.
S.B.M. Position	Lat. 24° 25.98' N.	Long. 53° 31.54' E.

Navigation in Shallow Waters: There are some shoals with dep 14.9 m. (49 ft.) in the area between Buoys No. 14 and No. 15. Mas of outgoing vessels should pay due consideration to the effect of s at speed on vessel's draft in the shallow water, bearing in mind ves trim.

Conspicuous Marks: Quick flash white navigation lights (visibility n 5 miles) are fixed on following platforms and the flare stacks adj to each platform are visible from distance:

MR-6 Platform	Lat. 24° 35' 44" N.	Long. 53° 43' 53" E
CFP	Lat. 24° 30' 09" N.	Long. 53° 42' 09" E
AA Platform	Lat. 24° 26' 10" N.	Long. 53° 39' 55" E

PILOTAGE: Pilot is provided by the Oil Company at the request o vessel's Master based on express understanding and condition th is aboard the vessel for the purpose of assisting the Maste becomes, for such purpose, the servant of the owners of the ves

It is recommended that the Master of the vessel calling at Mub for the first time requests Pilot to go aboard the vessel for both i and outward passage of the channel. The Pilot will normally boa vessel in the vicinity of Buoy No. 5 and will advise the Mas approaches to the berth and he will remain on board to act as M Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of Buoy No. 17. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8' N., Long. 53° 34' E. Depth of water from 15.5 m. – 18 m. (50 ft. to 59 ft.). The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat.24° 57' N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipelines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarraz Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarraz at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (A9M) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarraz Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarraz should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarraz.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.
(14) Acceptance of E.D.P. (Early Departure Procedure).

Radio Station in Mubarraz Terminal Office.

Short-range communication to Mubarraz Terminal Office can be made by calling "Mubarraz Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarraz Terminal".

Frequency:	*Reception*	*Transmission*
F3	Channel 16	Channel 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: One tug/workboat is always available for use for marine operations at this port and one mooring boat is available during loading.

BERTH: *Position of Buoy:* Lat. 24° 25.98' N., Long. 53° 31.54' E.

Depth of Water: 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipeline and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 32,700 bbls./hr. or 5,200 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches Buoy No. 5 at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the company

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's Ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

MEDICAL: The Company operates a small clinic at Mubarraz. Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarraz except in case of extreme emergency.

FUEL: Not available.

FIRE-FIGHTING: Tug/workboat stationed at Mubarraz Island is equipped for fire fighting and is usually on emergency stand-by during tanker loading operations.

CONSULS: No consular business is available at Mubarraz. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarraz. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarraz for repairs through notifying the ship's Agent.

SURVEYORS: Lloyd's, ABS, Veritas Surveyors are available in Abu Dhabi and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarraz.

After loading is completed the Mooring Master will sign on behalf of Customs an Outward Manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Not possible.

TIME: Local standard time at Abu Dhabi is GMT plus 4 hours throughout year.

GARBAGE DISPOSAL: Not available (S.B.M.).

WASTE OIL DISPOSAL: Not available (S.B.M.).

SEAMAN'S CLUBS: None.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarraz and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarraz is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarraz Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarraz.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio, radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan), P.O.Box 630, Abu Dhabi, United Arab Emirates. *Tel:* Abu Dhabi 661100. *Telex:* 22260 Adoco EM. *Cables:* "Oiljapan Abu Dhabi". *Contact:* Manager – Marine & Transport Department.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarraz Terminal. The address particulars are as follows:

National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh EM"). Tel.: 730500 (10 lines). Fax: 731328. After office hours 794490.

ETA messages shall be sent to National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Dammam Radio.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 and transmitting on Channel 10, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E. (See Pla

FLAG: U.A.E.

DOCUMENTS: The following should be airmailed to Agent to arr 48 hours prior to arrival of vessel.

3 copies Hazardous and Dangerous Cargo Declaration.
3 Stowage Plans.
3 Hatch Lists.
8 Cargo Manifests.
1 each Bill of Lading.
3 copies Passenger Manifest.
3 copies Cargo Declaration.
3 copies Arrival/Cargo Advice.
3 Crew Lists.

Radio Officer's Report: May 1989.

Agent: 5 copies Crew List.

Customs:
2 copies Crew Declaration.
2 copies Goods in the Care of the Master (i.e. Foreign Currency).
2 copies Drugs and Firearms Declarations.
2 copies Bonded Stores List.

Quarantine:
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Immigration:

Officials will not board the ship. Shore passes are obligatory and c be obtained at the main gate. The Agent will provide the shore pa request forms and photographs if needed. Our ship was at the contai terminal so this might be different to other parts of the port.

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs position Lat. 25° 21' N., Long. 55° 14' E. Marked "Dubai Approach".

Main light in position Lat. 25° 13' 33" N., Long. 55° 17' 15" E. (Situat on top of the Dubai Trade Centre – Centre Building) Gp. Fl. (2) wh every 30 secs. 157 m. above MHWST. Visible 44 km.

Main Breakwater Light: Flash green twice every 30 sec.

Lee Breakwater Light: Flash red every 2.5 sec.

There are no hazards. Minimum depth in channel 13.0 m. Approa is from the North on a course of 182° true.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a laun and a regulation pilot ladder must be provided, with manropes, and lee given. Large vessels calling should provide an accommodation lad with its lower platform within about 12 ft. above the waterline and a p ladder rigged on ship's side adjacent to the accommodation lad platform.

The Master must sign the indemnity form provided by the Pilot bef entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control on V Channel 16, shifting to a working channel as instructed. Fai instructions they should anchor approximately 2 miles from the p entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and 2.0 m.

Vessels not working cargo immediately may enter port at the discret of the Port Authority. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid Container Termina 12.8 m. and the tide is not expected to go as low as zero heigh average more than 55 days in any one year. Therefore, Port Rashid prepared to berth vessels up to 12.8 m. draft, at minimum speed a times, provided vessels can discharge in such a manner as not to so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 11.5 m. Depths of wate general cargo berths varies from 9.3 m. – 11.5 m.

Vessels in excess of 260 m. length overall will be berthed at Harbour Master's discretion.

Port Rashid consider that keel clearance is at the Master's discret and are prepared to berth vessels with minimum of 0.25 m. clearance.

RADIO: The Port Signal Station (Call sign "Port Rashid Control" equipped with VHF radio and watch is maintained 24 hours per da Channel 16, switching to Channel 68 for port operations.

The Control Room is situated on the top floor of the Marine Opera Building situated at the seaward end of Berth No. 1 at a height of above sea level.

Vessels should contact the signal station by VHF Channel 16 request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft position of bunkering points should bunkers be required. Amended should be advised by VHF, telex or radio. Vessel's Agent will in pass on the above information to the Port Authority.

Also see "Jebel Ali".

HEALTH: Normal quarantine regulations apply and Pratique ca given by the Pilot on cargo vessels, always subject to the H Authorities approval. Health Authorities only board when the vess alongside, except in the case of a suspected ship.

TUGS: Three tugs of 2,400 h.p. are available with fire-fighting, po and salvage facilities, the practice being to secure alongside with ropes therefore, gangway and derricks should be secured in-boa

Tugs are fitted with VHF. Contact should be made via Duba Control or the Harbour Master.

STEVEDORES: Ship's gangs are available for distribution to ve through Agents, vessels should advise their requirements before The gangs board and operate under the supervision of ship's o No quay cranes are provided, so ship's derricks/cranes must be

General Cargo: 30 deep water berths with 17 storage sheds (each 120 m. × 60 m.) adjacent are available plus a coastal berth for small craft and vessels with less than 6.10 m. (20 ft.) draft. All berths are backed by extensive hard surface yard storage area.

Container Terminal: Comprising of Berths 31-35 with quay length of 1,350 m. served by 2×30 ton Tango, 4×41 ton Mitsubishi, 1×45 ton Kocks and 2×41 ton Regganne cranes.

Storage area with CFS consisting on 8 sheds (120 m. × 60 m. each).

27 straddle carriers and 18 RTG's radio linked to controller, 6 terminal/Ro-Ro tractors, 3×15 ton forklifts and 130 roll trailers.

Bunkers and water available alongside.

Computer controlled stacking areas and container tracking available to Agents/Owners.

Berth No. 35 also has large Ro/Ro ramp and Berths No. 15 and 17, each have a small Ro/Ro ramp.

Side and quarter ramp vessels can be accommodated at all berths.

CARGO HANDLING: *General Cargo Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Container Terminal: Shift arrangement. 0700-1900, 1900-0700, seven days a week, 365 days a year.

Working hours are at the discretion of the Port Operations Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Operations Manager may require full night work or special shifts in the interest of the Port. Overtime charges apply to all shifts worked outside of Normal 0700 hrs. – 1400 hrs. Saturday to Thursday, and all shifts worked on Fridays and Public Holidays.

Refrigerated cargoes should be stowed consignment by consignment, to facilitate discharge and Direct Delivery to consignees.

Each general cargo berth is provided with fork-lift trucks and tractor units and trailers.

Pallets are provided free of charge to assist cargo handling.

MEDICAL: A comprehensive range of medical and dental services are available at Dubai.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd., capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at Berths No. 1 to 4, 6 to 9 and 16 to 35 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O.Box 307, Dubai. Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

REPAIRS: All types of deck and engine-room repairs available.

Container repair yard located near container terminal.

DRY DOCK: *Dubai Dry Dock:* A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1	370 m.×66 m.	(350,000 tonnes)
No. 2	525 m.×100 m.	(1,000,000 tonnes)
No. 3	415 m.×80 m.	(500,000 tonnes)

Dockside Cranes:

2×120 tonnes Safe working load at 65.5 m. radius.
1× 25 tonnes Safe working load at 80.0 m. radius.
2× 15 tonnes Safe working load at 70.0 m. radius.

Tank Cleaning: Facilities available.

JOINING/REPATRIATION: Arriving crew holding valid Seaman's Book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

According to the Immigration Regulation in force Agent is required to furnish the following Passport particulars to the Authorities for arranging the Transit Visa:

Full Name.
Father's Name.
Present Nationality.
Sex.
Occupation.
Religion.
Marital Status.
Place of Birth.
Date of Birth.
Qualifications.
Passport No.
Place and Date of Issue and Date of Expiry.

At times Agent receives incomplete details and there were instances when Agent had to collect the full details from the transit passenger himself to process the application prior to his clearance.

It is absolutely essential that wives wishing to join their husbands onboard vessels off Dubai or Fujairah must carry a photocopy of their husband's Seaman's Book.

This is essential as if a photocopy of the husband's Seaman's Book cannot be shown to the Immigration Authorities, the wife will be repatriated immediately.

Repatriating crew can be brought ashore with a similar guarantee tendering the air ticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

SURVEYORS: Cargo, Ship, Classification Societies and Salvage Association Surveyors available locally.

AIRPORT: International airport, 3.2 km.

EMERGENCY CO-ORDINATION CENTRE: Coastguard located adjacent port. Tel: 450520.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHIP SUPPLY SERVICE: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. Service is carried out by all local shipping Agents. See "Agent".

STORING: Complete shipchandling facilities available at short notice (via Agent).

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of Crew List. Temporary shore leave passes are issued by the Immigration Office against Passports and Crew Lists.

GARBAGE DISPOSAL: Use of garbage skips in the port is compulsory. Skips are provided alongside each vessel at a daily rate of Drhs 30 per day, collection as required. Skips are also available for rubbish other than garbage at a daily rate of Drhs 150 per skip. Additional skip or rubbish disposal can be arranged via the agents.

WASTE OIL DISPOSAL: A waste oil disposal service is available. The service is carried out by Dubai Labour Supply Co. Tel: 534020. Fax: 534082. There are no shore storage tanks available, so waste oil is disposed of at Municipality disposal dumps, prior permission is required from Dubai Municipality. Road tanker capacity up to 6,000 gallons. Arrangements for disposal can be made via the vessel's agent who will obtain costs on application.

SEAMAN'S CLUBS: Dubai International Seafarers Centre, situated outside Port Rashid, approximately 10 minutes walk from main port gate. The centre is a non-religious club catering for all nationalities. Facilities include telephone, food and coffee shop, bar, swimming pool, pool table, darts, currency exchange, postal service, library, TV and video, family room, barbeque area, table tennis, bus and information service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.673 (Fixed Rate).

AUTHORITY: Dubai Ports Authority, P.O. Box 17000, Dubai, U.A.E. *Tel:* 971-4-51800. *Telex:* 47398 Dpa Em). *FAX:* 4-816093 (Main Fax), 815929 (Admin.), 835430 (Marine), 816354 (General Cargo).

Officials: Sultan Ahmed Bin Sulayem, Chairman & Managing Director.
Jamal Majid Bin Thaniah, Assistant Managing Director Administration and Human Resources.
Saeed Al Tayer, Assistant Managing Director Free Zone.
H. Edward Bilkey and David Gibbons, Executive Directors.
Ahmed Butti Ahmed, Assistant Managing Director.

AGENT: Gulf Agency Company (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Tel: 457555 (24 hours service). After office hours 384541, 489212. Telex: 45448, 45809 "Gacdb Em". Cables: "Confidence" Dubai. Fax: 457202, 450644. Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sign "Confidence Dubai".

Operators of ships' supply service and shipping agency; Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers and Ship-to-Ship transfers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah, Khor Fakkan and Mina Saqr (Ras Al Khaimah).

RAS AL-KHAIMAH: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and dredged to a depth of 3 m.

This is a small port for very small vessels only. *All* cargo vessels with cargo for Ras Al-Khaimah should assume discharge/loading will be carried out in Mina Saqr. For all other information, see entry for Mina Saqr.

Also see "Mina Saqr".

GARBAGE DISPOSAL: Available, drums are provided alongside. Service free of charge in daylight only. Tel: 332422.

AUTHORITY: Ras Al-Khaimah Port Services, P.O.Box 5130, Ras Al-Khaimah, U.A.E. *Tel:* 668444. *Telex:* 99280. *Cables:* Minasaqr. *FAX:* (07) 668533. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

AGENT: See "Mina Saqr".

SHARJAH (Mina Khalid): 25.22 N. 55.24 E. **(See Plan)**

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration: The U.A.E. Immigration Department's office in Port Khalid, Sharjah operates 24 hours, 7 days per week. Master to submit Crew List, photographs of each crew member (photos not returned) and Passports/C.D.C. to Immigration Office on arrival. Passport/C.D.C. will be returned to vessel before sailing. Joining/leaving crew must report to the Immigration Office before proceeding to vessel/airport.

Customs:
2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic Beverages.
2 Cargo Manifests.

Port Operations:
2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

The original of all the ship's Certificates shall be produced to any Port Official on demand. Where a ship is more than 15 years old, a valid Certificate of Condition issued by a recognised Surveyor shall be on board.

Where Certificates are found to be invalid, the ship may be removed from the Port Area, at ship's expense and re-entry permitted only after validity has been established.

Failure to produce any Certificate to a Port Official when demanded renders the Master liable to a fine of up to Dh. 5000, and the removal of the ship from the Port Area.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the Fairway Buoy; a pilot ladder should be provided. Port Khalid operates a 24 hour, 7 day week pilotage service. Notice is required before 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hrs.

ANCHORAGE: The Fairway Buoy in position Lat. 25° 22.9' N., Long. 55° 22.9' E. is a red and white pillar, Isophase every 6 secs. Vessels approaching should await Pilot to seaward of Fairway Buoy, anchoring if necessary.

Protected Anchorage: A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.

MAX. SIZE: Approach channel dredged to 12.0 m. MLLW. Max. draft 11.5 m.

HEALTH: Normal Quarantine Regulations apply.

Radio Pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding 30 days. All crew members must be in possession of valid cholera certificates. The Health Officer will only board when the vessel is alongside.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, LOA, and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator.

VHF: Vessels should contact Port signal station on VHF Channel 16 (Call sign "Sharjah Port Control") when within range. Working Channels 6, 12, 11, 74 and 67.

TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	*Depth at MLLW*	*Usage*
1A	11.5 m.	Containers
1	10.5 m.	Containers
2	10.5 m.	Containers
3	8.5 m.	General Cargo
4	8.5 m.	General Cargo

UMM AL NAR, Abu Dhabi: 24.27 N. 54.29 E. (See Plan)

LOCATION: The Umm Al Nar Petroleum Port is situated at the South Eastern tip of Abu Dhabi Island and consists of 2 island type berths connected to the shore through a causeway. Vessels will use Mina Zayed and Khawer Al-Bhagi navigation channels to the Port. The total length of both channels is 16 nautical miles. Vessels will berth port or starboard side to, at the discretion of the Pilot.

APPROACHES: *Water Depths:*

The channel depths are as follows:

(a) 13.0 m. for Mina Zayed navigation channel.

(b) 11.0 m. for Khawer Al Bhagi Navigation Channel keeping in mind that all levels are relative to C.D.

MAX. SIZE: The 2 jetties have been equipped with marine facilities to accommodate vessels having the following characteristics:

Max. size of vessel	30,000 d.w.t.
Min. Size of vessel	5,000 d.w.t.
Length overall	170 m.
Beam (max.)	26.50 m.
Draft (max.)	9.25 m.

HEALTH: Masters will be required to produce the standard International Bill of Health.

RADIO: *Arrival Telegram Ship/Shore:* On ship's arrival at the Pilot Station, a telegram shall be passed to the refinery through the ship's Agent with the following information:

ETA at berth.
Arrival draft.
Estimated departure draft.
Quantity and type of Cargo/Cargoes.
Vessel's maximum loading/discharging rate.
Quantity of dirty ballast and discharging rate.
Quantity of clean ballast to be discharged overboard and time required.
Size of manifold.
Are reducers to 6 in., 8 in. and 10 in. available on board?
Any vessel's requirements.
Master's Name.

VHF: All tankers calling at Umm Al Nar Petroleum Port should adhere to the following:

1. Tanker has to call Umm Al Nar Port Control on VHF Channel 9 2 hours prior to arriving Abu Dhabi Fairway Buoy.
2. Tanker has to call Umm Al Nar Port again on arrival at the Fairway Buoy and to confirm ETA Mina Zayed Breakwater.
3. In case of any changes of the ETA (Earlier/later than the scheduled time), tanker should report the same to Umm Al Nar Port Control on Channel 9.
4. All tankers should keep watch on Channels 9 and 67 at all times.

Non-compliance will cause unnecessary delay.

Please note that vessels can also contact Abu Dhabi Port Control on Channels 16 and 67 for movements/berthing/unberthing arrangements.

BERTHING: Umm Al Nar Refinery Jetty consists of 2 berths, each of which accommodates vessels in the range of 5,000 d.w.t. to 30,000 d.w.t. and is provided with the following facilities:

(a) Loading platform.
(b) 4 mooring dolphins.
(c) 5 breasting dolphins (with 2.16 m. berthing line).
(d) 4 × 60 ton quick release hooks with capstan.
(e) 2 × 30 ton bollards.
(f) Hydraulically operated gangway.
(g) 2 fire-fighting monitor towers.

Each platform is provided with 6 loading arms having the following flexibility:

No.*	Size of Flanges (in.)	Cargo Flexibility	Max. Rate cu.m./hr.
1	6	Lub. oil	400
2	8	A.T.K.	1,000
3	6	Straight Run Residue	500
4	8	Mogas	1,000
5	10	Gas oil/Naphtha	1,500
6	10	Straight Run Residue/Ballast	1,000
7	3	Fresh water	13

*The loading arm numbers are from the gangway side.

Berthing Aids: Umm Al Nar Refinery Jetties are equipped with navigational aids to allow safe navigation during day and night, namely:

(a) 2 white coloured leading lights to affix navigation for channel's centre line, placed ashore at 5.0 m. and 11.0 m. above the ground level.

(b) 6 navigation lights with radar reflectors to define basin limits.

(c) Each jetty is provided with 4 red coloured lanterns, 2 at each end, at 5.0 m. above deck level. This is in addition to the operational flood lights.

(d) Each mooring dolphin is provided with flood lighting.

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. The breasting dolphins are each equipped with 60 ton quick release hooks and a power operated capstan. the mooring dolphins are each equipped with 60 ton quick release hook and a power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by terminal personnel, or as dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

LOADING/UNLOADING: Also see "Berthing."

(i) The Master must give the Terminal a "Stand By" warning 10 minutes before being ready to commence loading or discharging.

(ii) Upon "Commence Loading" from the Master or his deputy only 1 pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading/discharging products, lub. oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

Deballasting: The jetties are equipped with dirty ballast/slops receiving facilties. Vessel discharging dirty ballasts/slops ashore will use the deballasting arm. The maximum ballast reception rate is 1,000 cu.m./hr.

Prior to arrival the Master is to advise Umm Al Nar Refinery (through the arrival telegram) how much dirty ballast/slops on board to be discharged to the shore facilities. (A "Declaration Letter" is provided for Master's signature) accepting clean ballast for overside discharge is subject to a declaration signed by the Master and delivered to the terminal representative.

Communications: To maintain the necessary continuous communications between refinery, vessels and shore control rooms during cargo operations and also in emergencies, the vessel will be provided with a walkie-talkie set. It is required that this set must remain at all times with the officer responsible for the cargo operation.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the Ship's Agent.

FUEL: No Bunker facilities in Umm Al Nar Refinery Terminal.

GENERAL: *Customs:* Custom's officers will board the ship on arrival and prior to sailing for necessary port clearance.

Stores and Provisions: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

South Basin: The South Basin has been closed for shipping recently due to its proximity to the intakes of the Power Station.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* 6023450/1 and 6026386. *Telex:* 22215 ADNOC EM. *FAX:* 562687, 660106. *Contact:* Captain H. Masri, PPA – Manager. Captain A. M. Massoud, Port Officer.

AGENT: See "Mina Zayed".

ZIRKU ISLAND, Jazirat Zarakku, Abu Dhabi: 24.52 N. 53.04 E. (See Plan)

LOCATION: Zirku Island is located at 24° 52' N., 53° 04' E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located in the N.N.W. with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

(A) SERVICE HARBOUR
(B) OIL TERMINAL

(A) SERVICE HARBOUR

PORT LIMITS:

(a) Lat. 25° 03.0' N., Long. 52° 53.3' E.
(b) Lat. 25° 00.0' N., Long. 52° 53.3' E.

(d) Lat. 24° 48.9' N., Long. 53° 11.0' E.
(e) Lat. 24° 56.8' N., Long. 53° 11.0' E.
(f) Lat. 25° 03.0' N., Long. 53° 04.4' E.

Refer to British Admiralty Chart 3778.

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the Prevention of Collision at Sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations for the Prevention of Collisions at Sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available, accordingly, vessels calling at Zirku harbour should have very good manoeuvrability.

Navigation Aids:

1. Flashing lighthouse (Zirku, Zarakuh or Zarqa) located at the top of the pylon on the hill.
Height = 200.86 m.
Lat. 24° 53.0' N. Long. 53° 04.1' E.
One flash every 10 seconds.
2. Flashing lighthouse at the end of the sea water intake.
Lat. 24° 53.0' N. Long. 53° 05.3' E.
Height=9 m.
V.Q. (3) 5 secs.
3. Flashing lighthouse at the end of the main jetty.
Lat. 24° 52.3' N. Long. 53° 05.5' E.
Flash=Fixed and flashing (1) 10 secs.
Height=11 m.
Colour=Green.
Obscured approximately 70° – 150° (80°).
4. *Aero Lights* (occasional).
Located on the airport control tower (green).
Lat. 24° 51.6' N. Long. 53° 04.6' E.
Located on the hill (red).
Lat. 24° 52.5' N. Long. 53° 04.1' E.
Height=67 m.
5. *Two Flares:*
Lat. 24° 52.5' N. Long. 53° 04.3' E.
Height=145 m.
Fixed red lights.
6. *Pylon on the hill top.*
Height=200 m.
Fixed red lights.
7. *Anchorage Buoy.*
Lat. 24° 51.3' N. Long. 53° 06.9' E.
Yellow cylindrical.
Flashing yellow (1) 5 secs.
8. *Zirku Flare Platform "ZFP".*
Lat. 24° 51.5' N. Long. 53° 02.6' E.
Height=85 m.
Mo "U" every 15 sec.
Range=15 miles.

ANCHORAGE:
Waiting Anchorage: Small vessels and barges waiting for a berth alongside the main jetty can anchor beyond 0.5 mile in the S.S.E. of the end of existing jetty in approximately 7 m. of water depth.

Three fixed mooring buoys without lights have been installed at around 0.7 mile in the South and S.E. of the main jetty.

Sharp lookout must be kept when navigating in these areas.

An anchoring buoy (yellow Fl. (1) 5 secs.) has been installed in position: Lat. 24° 51.3' N., Long. 53° 06.9' E. marking the N.E. corner of the waiting anchorage area (See Admiralty Chart 3778).

Prohibited Anchorage Areas: To avoid the underwater oil pipelines being damaged, prohibited anchorage areas are defined as follows:

0.5 nautical miles on each side of the M.O.L. (Main Oil Line) input line.

0.5 nautical miles on each side of the loading lines.

0.5 nautical miles on each side of the SATAH lines.

M.O.L. input line from Zakum field comes ashore on the middle of the East Coast.

Loading lines to the oil terminal SPMs leave the Island from the N.N.W. point of the Island.

Anchorage Berths and Moorings: All vessels or barges entering the port should occupy such anchorage berth or mooring as may be directed by the Port Supervisor and shall move to any other anchorage, berth or mooring as and when required by this authority.

No vessel or barge shall shift or change the anchorage, berth or mooring allotted without Port Supervisor authorisation except if instructed to do so.

No claim will be accepted by Company for berthing or mooring due to arrival priority.

RADIO: International VHF Channels 16, 64, 68 and 19 have been allotted to "Zirku Island Traffic". Permanent watch maintained by "Zirku Island" on Channel 68, semi-duplex for vessels to Zirku Island and vice versa.

When contact established, change to Channel 64 or 19.

Channel 68 is to be used for ship to ship calling and conversation.

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges calling at Zirku harbour should advise their ETA at least 48 hours before their arrival by telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Zirku Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at Zirku as soon as a radio link can be set up on VHF Channel 62 or 68 with "Zirku Island" radio room.

Berthing prospects will be given to incoming ships by "Zirku Marine" at this time. If the vessel is instructed to anchor, she must keep a permanent watch on VHF Channel 16 or 68.

During berthing operations contact will be set up with "Zirku Marine" on VHF Channel 68.

Arrival Message: The first message should be sent according to the following form but any items which are the same as a recent previous voyage to this port may be omitted.

Name of vessel (tug or barge):
ETA Zirku.
Type of vessel.
Length.
Width.
Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only vess and barges chartered by the Company Zadco (Zakum Developm Company), acting on behalf of ADNOC (Abu Dhabi National Company) and its contractors are allowed to moor alongside the jett

Jetties: The main jetty located on the East coast of the Island is allot to the general supplying of the Island and the transit of equipment the Company.

Temporary jetty "A" (on the South of the Island) is now comple silted up.

Temporary jetty "B" (on the West of the Island) is now deteriorat and no longer in use.

Vessels: Contractors shall charter tugs, barges, landing crafts, sup boats, etc. whose dimensions, weight and draft are suitable to t existing jetty.

Emergency use: Other craft may use this harbour only in emerge and must immediately report their arrival to the Port Supervisor.

All craft using the harbour are subject to the control of the p operating company representative. (Zirku Marine Superintendent or deputy) and the Petroleum Ports Authority (Port Officer)

Berth Occupancy: The Port Supervisor will define the allocation of be in accordance with the Company's requirements of priority up Manager's recommendations.

Contractors should start discharging as soon as vessel or barge berthed and should unload until all the cargo has been discharged.

Contractors should not store their cargo on the jetty. They must remo it as unloading proceeds.

Vessels and barges should leave as soon as the handling of carg completed in order to free the quays. The Port Supervisor can or vessels and barges to leave the quay at any time (even though completely unloaded), so they must be able to move, therefore ba shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the E coast of the island is approximately 1,200 m. long and orienta N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. a is 12.5 m. long (41 ft.) at the inward end; 2.3 m.×40.5 m. long (132 in the centre and 3 m.×57 m. long (187 ft.) at the seaward end (wa depth is calculated under chart datum C.D.)

The quay is fitted with 8×30 ton bollards, 12 pairs of rubber fend from a level of 1.50 below C.D. to top of quay level and 3 steel ladd running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orienta N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is availa for small launches though badly equipped with mooring points.

The Port Supervisor Office and Police ward room are located on top part of the jetty. The jetty working area has been asphalted.

CRANES: Mobile cranes up to 100 tons are available.

Contractors have to supply the Island with their own mobile equipm to discharge vessels and barges, if not previously arranged Company.

As soon as the unloading is completed users should remove mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 ton cr (up to 45 tons for exceptional cases). For heavy loads two locations defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. f the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. f the edges of the jetty seaward end.

MEDICAL: A medical officer is resident on the Island for emerge cases only. The Company maintains a small hospital.

FRESH WATER/FUEL:
Water and Fuel Loading and Unloading Critical Area:

Connection pipes are located on the inward and outward ends of quay.

Inward end of the quay is fitted with 3 in. and 1 in. diesel oil connect and with 3 in. fresh water connection.

The outward end of the quay is fitted with 3 in. connections for f water and diesel oil and 8 in. line for fresh water. The Ship's Ma should apply the safety rules and inform Zirku Marine about any un conditions.

Ships coming for diesel oil or fresh water should be fitted with suffic length of hoses to be connected to the Island fixed pipe.

A safety ball valve is required on shore and diesel oil hose.

SHORE LEAVE: No person may go on shore without authorisation the Zirku Police Authority and only if in possession of Oil Field Sec Pass.

SAFETY: *Reporting of emergency:* Should any vessel be in da through fire, explosion, collision or whatsoever cause, the Master s immediately report the fact to the Port Supervisor and Port O (Petroleum Port Authority) by VHF Channel 62 or 68.

When alongside the main jetty they can report through the s telephone system located on the jetty. Grey for Island Network, Re Safety.

Phone Numbers:
Day and Night: Safety 56333
Radio Room 56666/56403
Clinic 56222.
Day: Marine Superintendent 56400.
Port Officer (PPA) 56471

Fire fighting equipment: There are 2 monitors and 3 hydrants su by a 12 in. pipe able to reach any point of the main jetty on emer call.

Ship's fire fighting equipment: This equipment must be in co readiness at all times with sufficient skillful personnel on board efficient operation.

Particular safety requirements for vessels unloading inflammable products:

All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied with water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck.

Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ship's hoses' connection.

A checking will be performed by the Safety Supervisor jointly with the Port Supervisor and the vessel's Master, and a form will be signed by the same, after which offloading of said hazardous cargo will be authorised.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels. Barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island: The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. some 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

Zirku Island tide prediction supplied by operating company, copy can be obtained from Marine Zirku.

There is a tide recorder on the main jetty. Tidal information also available from Zirku Marine on VHF, Channel 68.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable Vessels: The Port Officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of Sea Pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National Courtesy Flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & Diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

GARBAGE DISPOSAL: See "Section B".

WASTE OIL DISPOSAL: See "Section B".

SEAMAN'S CLUBS: See "Section B".

CURRENCY: See "Section B".

(B) OIL TERMINAL

PORT LIMITS: The port area of Zirku Petroleum Port covers the area bounded by straight lines connecting the following points:

A:	Lat. 25° 03' N. Long. 52° 53.3' E.	B:	Lat. 25° 00' N. Long. 52° 53.3' E.
C:	Lat. 24° 48.9' N. Long. 53° 04.8' E.	D:	Lat. 24° 48.9' N. Long. 53° 11' E.
E:	Lat. 24° 56.8' N. Long. 53° 11' E.	F:	Lat. 25° 03' N. Long. 53° 04.4' E.

Masters of all vessels entering the port must follow instructions given by the Company's Marine Superintendent as to approach, anchoring, berthing and unberthing.

DOCUMENTS: On arrival the tanker should prepare the following documents to be handed over to the different authorities coming on board:

Tanker Enquiry Form (ZADCO Form).
Navigation Aids Dues Certificate (M.E.N.A.S. Form).
Notice of Readiness.
Crew List.
Certificate of Registry.
Load Line Certificate.
Safety Certificate (Equipment).
Oil Liability TOVALOP/CLC.
Derat Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.
Suez Canal Tonnage Certificate.
Panama Canal Tonnage Certificate.

PILOTAGE:

1. *General:* On arrival and on departure the pilotage is compulsory within the Port Limits. The Company reserves the right to render the pilotage compulsory through the departure route for any reason. Nevertheless, upon Masters request Zirku Pilots could assist any tanker on Zirku Departure Route to and from Buoy No. 6 (Lat. 25° 13' N., Long. 52° 59' E.). Within Port Limits and on Zirku Departure Route the speed *shall not exceed 8 knots.*

2. *Direct Berthing:* Instructions for berthing having been received by voice communication the tanker should proceed to the agreed Pilot boarding point.

3. *Waiting:* In case of a berth not being available, the approaching tanker will be instructed to proceed to an anchorage area and anchor at the agreed location. The tanker will wait at this allotted location until further instructions.

4. *On Departure:* A Pilot will assist loaded tanker as stipulated in No. 1 above.

5. *Pilot Access:* The Pilot access should be in good condition, safe, clean and ready. Pilot ladders constructed of light material such as aluminium will not be accepted. Where the freeboard exceeds 10 m. the vessel should have a combination of accommodation ladder and pilot ladder rigged. The bottom of the accommodation ladder shall be at least 7 m. above the water line.

6. *Pilot Embarkation:* To embark the Pilot safely, the incoming tanker should reduce speed (no more than 5 knots), make a good lee to minimise adverse weather conditions and take the way off. On the tanker's deck the boarding of the Mooring/Loading Master should be attended by at least one officer and one A.B.

7. *Pilot Boat:*

Name	Gain
Engine	2×860 h.p.
Speed	20 knots
Marked	Zirku Pilot
Fibre Glass Hull	

NAVIGATION AIDS:

Separation Scheme: A traffic separation scheme between Zakum Field and Umm Shaif Field crosses the port area.

This scheme includes:

(a) A separation zone, 0.75 nautical miles wide.
(b) A traffic lane for Westbound traffic, 1.25 nautical miles wide.
(c) A traffic lane for Eastbound traffic, 1.25 nautical miles wide.

The main traffic directions are: 050° – 230°
072° – 252°

This scheme is marked by the following two light buoys.

1. Zakum Middle
Lat. 25° 59.15' N. Long. 53° 08.50' E.
R.W.V.S. Pillar L.Fl. 10 sec.
2. Zakum West
Lat. 24° 56.60' N. Long. 52° 59.85' E.
R.W.V.S. ISO 6 sec.

Reference Charts: British Admiralty 3733, 3952, 2889, 3778.

Zirku Island:

Zirku, Zarakuh or Zarqa beacon:
Lat. 24° 53.0' N. Long. 53° 04.2' E.
Fl. 10 sec. 22 miles Height 200 m.

Main Jetty:
Lat. 24° 52.2' N. Long. 53° 05.4' E.
Fixed Green 7 miles and Flash 10 sec. Height 11 m. 9 M.

Sea Water Intake:
Lat. 24° 53' N. Long. 53° 05.3' E.
3 Fl. W. 5 sec. Height 9 m.

Radio Tower:
Lat. 24° 53' N. Long. 53° 04.1' E.
Fixed Red light – Height 198 m.

Zirku Flare Platform 'ZFP":
Lat. 24° 51.5' N. Long. 53° 02.6' E.
Flashing White light, morse "U" every 15 sec. Range 15 miles.

Flares:
Lat. 24° 52.5' N. Long. 53° 04.3' E.
Fixed Red light – Height 145 m.

Repeater Platform:
Lat. 25° 01.7' N. Long. 52° 55.7' E.
2 White flashing lights Morse "U" 15 sec. at level +18 m.
2 Red lights at level +34 m.
2 Red lights at level +51 m.
Horn Morse "U" every 30 sec.

Isolated Danger Mark:
Capped well-head.
Lat. 24° 59.8' N. Long. 52° 57.1' E.
Black-Red-Black – Pillar Fl. 2.5 sec.

Navigation Warning within Port Limits:

All vessels transiting through the Zarakkuh Port Limits are to follow the following procedures:

1. Vessels transiting along the Separation Zone may do so as normal.
2. Vessels intending to cross the Separation Zone Northwards must inform Zarakkuh Radio on Channels 16 or 68 of their intention and follow the instructions given.
3. Vessels Southbound, intending to cross the Northern Port Limits, must inform Zarakkuh Radio of their intention on Channels 16 or 68 and follow the instructions given.

4. No vessel is to pass between Buoy No. 1 (Lat. 25° 02' N., Long. 53° 00.8' E.) and the oil loading terminal or enter the no unauthorised entry limits around the oil loading terminal or the Repeater Tower (Lat. 25° 01' 42" N., Long. 52° 55' 40" E.), or "ZFP" (Lat. 24° 51.5' N., Long. 53° 02.6' E.).

MAX. SIZE: The SPMs are suitable for berthing tankers from 30,000 d.w.t. up to 350,000 d.w.t. loaded at 80% of their capacity.

The max. draft allowed for departure is 21 m.

ANCHORAGES: *Small Vessels Anchorage:* Located close to Zirku Main Jetty is designated for small vessels to service harbour.

1 Yellow buoy Fl. 5 sec. in N.E. corner (Lat. 24° 51.3' N., Long. 53° 06.9' E.).

Limits:	Lat. 24° 51.3' N.	Lat. 24° 50.0' N.
	Long. 53° 07.0' E.	Long. 53° 07.0' E.
and	Lat. 24° 51.3' N.	Lat. 24° 50.0' N.
	Long. 53° 05.4' E.	Long. 53° 05.4' E.

Tankers East Anchorage:

Limits:	Lat. 24° 56.8' N.	Lat. 24° 54.8' N.
	Long. 53° 11' E.	Long. 53° 11' E.
and	Lat. 24° 56.8' N.	Lat. 24° 54.8' N.
	Long. 53° 07.8' E.	Long. 53° 07.8' E.

Tankers North Anchorage:

Limits:	Lat. 25° 03' N.	Lat. 25° 00' N.
	Long. 53° 02.2' E.	Long. 53° 02.2' E.
and	Lat. 25° 03' N.	Lat. 25° 00' N.
	Long. 53° 04.4' E.	Long. 53° 04.4' E.

where 2 buoys are installed at Eastern corners. Colour yellow – Flash yellow 5 sec.

This area is designated for incoming and outgoing deep draft tankers.

Prohibited Anchorage Area: Anchorage within Port Limits, outside waiting anchorage areas is prohibited. Exceptional authorisation may be given by the Port Officer.

Sea-bed: The sea-bed in the Terminal area is rock, covered by a few inches of loose sand. Some patches of coral can be found. Holding is poor and vessels are advised to pay out more cable than usual.

RADIO: Messages can be sent to the Company by the following means:

Telex or Telegram through Bahrain Radio addressed to ZADCO Marine. Telex No.: 22948 ZDCAUH EM. Cable: ZIR Marine.

Voice communication to "Zirku Marine" by SSB. Operation Mode A3J Upper Side Band within a range of approximately 250 km.

Permanent watch on carrier frequency: 2036.4 kHz.

Talking on standard Marine Duplex HF Channel: 405, 605, 828

Notice of Arrival: Arrival Message shall be sent to ZADCO Marine 96 hours before arrival at the Port Limits.

Confirmation shall be given 72 hours, 48 hours, 24 hours and 6 hours from ETA.

Voice contact shall be made with "Zirku Marine" by SSB or VHF 6 hours prior to arrival.

Arrival Message: Arrival Message should contain the following:

Vessel's name and Master's Name/Abu Dhabi Agent's Name/Port of Registry/n.r.t.
ETA Port Limits
Arrival drafts/Departure draft forward and aft
Quantity of ballast
Estimated deballasting time
Possibility of simultaneous operation/permanent ballast
Cargo required
Maximum loading rate and IGS and air-conditioning operative.
Part cargo and slops/to comingle
Expiry date Tovalop/CLC/IOPP
Derrick capacity/No. and size of manifolds/mooring brackets
Last Port of call and next Port/EDP accepted
Direction of approach

VHF: Voice communication to "Zirku Marine" by VHF Channels: 16, 19, 64 and 68. Channel 68 is used by the Pilots.

Permanent simultaneous watch maintained on these Channels.

Arrival: VHF contact should be made with Zirku Marine requesting instructions.

Once contact has been established through Channel 16 further conversation should be conducted on either Channel 64 or 19 upon operator's instructions.

Pilot/Loading Master on board: Although he will bring on board his own VHF communication units with private frequencies, the tanker VHF should remain operational at all times.

At Anchorage: Permanent watch should be kept on Channel 16 and on other Channels (64 or 68) as requested by the Zirku Marine operator.

Traffic Separation: North-bound vessels intending to cross the Separation Scheme, and South-bound vessels intending to cross the North port limit, should report their intention on Channels 16 or 68 and follow instructions.

TUGS: A tug of 2×1,500 h.p. and a mooring launch of 2×275 h.p. will assist the berthing. A second tug of similar dimensions will be added to the terminal operations in late 1994.

SPMs: The terminal of Zirku Petroleum Port is located about 8 nautical miles N.N.W. of Zirku Island and consists of two single Point Mooring buoys whose exact coordinates are as follows:

SPM "Alpha"	Lat. 25° 00' 32" N.	Long. 52° 59' 02" E.
SPM "Bravo"	Lat. 25° 01' 36" N.	Long. 52° 59' 30" E.

A small mooring buoy for small craft is in position: 0.3 miles West of No. 1 channel buoy.

SPM Description: Both buoys are identical.

Buoy Body: The buoy is a circular steel structure with a diameter of approximately 12.5 m. It has a rotating assembly. The colour is orange.

Hoses: The buoy is equipped with 2×20 in. floating hoses with a 16 in. tail end hose connection. The outer hose string is 296 m. and the inner one 285 m. Each string is equipped with winker lights.

Hawser: The mooring systems consist of a single 18 in. circumferen grommet hawser of double braided nylon, with an overall length 53.4 m., ended by a short length of 76 mm. diameter chafe chain.

Light: The buoy is fitted with a navigation light emitting a Morse flashing signal every 15 seconds visual on 360° up to a 5 nautical mi range.

Fog Horn: Fitted on the buoy, emits a Morse "U" blast every seconds and is activated when necessary by a remote control syste

Radar Reflector: A radar reflector is installed on the buoy structur

Water Depth: The minimum water depth in the vicinity of the SPM Bu is 27 m. above chart datum.

MOORING: All vessels arriving at this port are required to have adequa draft and trim for safe manoeuvring purposes. The propeller should completely immersed. The recommended trim for manoeuvring in balla is 3.0 m. List will not be tolerated.

Tanker Material Equipment: The tanker must have the port side derr rigged for lifting the shore equipment on board, the minimum derr capacity shall be 10 tons.

A good messenger line of approximately 4 in. circumference nylon li to be ready on the forecastle.

The forecastle should be fitted with Smit or Chain Stopper ty brackets, strong mooring bitts and Panama Leads.

Terminal Material Equipment: One basket will be lifted on board w hose connection equipment and tanker mooring equipment if necessa

Procedure: Full power must be available on tankers' main engine.

Once the optimum approach route has been selected the tug will p away the hose strings and the tanker will proceed toward the buoy a suitable speed.

When approximately 300 m. from the buoy the mooring launch will instructed to bend on the messenger line from the Panama Lead to t mooring hawser pick up line.

The tanker will be brought to a dead stop at 60 m. from the buoy.

The chafe chain will then be winched aboard and secured.

Once the tanker is secured, the tug will pass its towline to the tanke stern and then maintain tension on the towline throughout, to avoid a buoy kissing.

Emergency Fire Wire: All ships shall have a fire wire hanging from t bow and the stern to enable tugs to immediately connect in case emergency – Circumference of wire to be at least 6 in.

Weather Limits: Mooring operation can be carried out in up to 25 kn wind speed and significant waves up to 5 ft.

HOSE CONNECTION: *Terminal Connection Team:* After mooring completed, the hose connection team will board, to assist the crew.

Tanker Connection Team: An officer should attend the hoses with least 3 deck hands and 1 boatswain. In addition one skilful winchm will be required.

Tanker Material Required: Miscellaneous tools, shackles, wires, rop plus fire hose and extinguisher should be ready close to the manifo The area around the manifold should remain free of all equipment enable safe hose handling.

Terminal Material Supplied: 16 in. to 16 in. Spool pieces. Chain hois tirfors, gaskets, wrenches, flange bolt sets, butterfly valve handles, of miscellaneous chains, ropes, slings, etc.

Flange size: The tail end hose flange size is a 16 in. camlock coupli Before berthing the tanker manifold should be ready for di connection, blind flange removed, and 16 in. to 16 in. spool piece fit

The two tanker manifold connections should be chosen in such a w that access to both flanges is possible.

Procedure: Having completed the mooring operation, the mooring lau will proceed to the end of the floating hoses to tow them to a posi beneath the tanker's derrick hook.

The inner (or shorter) of the hoses will be lifted above deck level a the end swung inboard.

The hose will be lifted by such length to match the distance betw the rail and the tanker manifold, then held with snubbing chains and hose end lowered and connected to the manifold flanges.

The same operation will be performed on the outer (or longer) o

LOADING: *Rate:* The maximum loading rate will be 12,500 cu.m. using both hoses.

Care will be taken not to exceed the rated working pressure t supported by the hoses which is 15.5 bars (225 p.s.i.).

Procedure: Once the hoses have been connected and checked, butterfly valves opened and the tanker pipe network set up, the Loa Master can give the go-ahead upon request from the Chief Officer pumping will commence at slow speed at the beginning (by grav approximately 7,000 bbls./p.h., then the rate increased up to the requested by the Chief Officer.

An inspection of the floating hose strings and the buoy, inclu waters around the terminal, should also be made during the first minutes of cargo transfer to ensure there is no leakage.

Once reached, the flow rate will be maintained until further instru is given by the Chief Officer to the Mooring/Loading Master.

Valve Closure: No valves which will stop or seriously impair or red the flow rate of oil from the shore pumps are to be operated wi prior agreement with the shore control room (ZCC) through the Loa Master.

10 minutes' notice should be given to the Loading Master for red the loading rate or stopping.

The practice of throttling back on the ship's cargo valves is t avoided. If a lower rate is required, the shore is to be advised an pumping rate will be reduced to the required level.

The Master will be held liable for any damage arising from the su cessation of flow caused by default of the ship.

It cannot be over-emphasised that to do so can be extr dangerous and cause extensive damage to equipment in addi possible oil pollution.

Failure of Communication: In case of failure of communications be the Loading Master and Zirku Control Room (ZCC), the loading automatically stopped.

Accommodation: Cabins: Two single cabins on board the tanker must be allotted to the Mooring/Loading Master and his Assistant.

Terminal Team: A rest room must be allotted to the hose connection team (3/4 people) should they be required to stay on board by the Mooring/Loading Master. This will only be the case in adverse weather conditions.

Working Location: The working location of the Mooring/Loading Master is the cargo control room.

A portable unit of around 25 kgs. will be installed in this room and operate from either a 110/115 v. or 220/240 v., 50/60 kHz. supply, such a socket must be available in the cargo control room.

Terminal Personnel: As long as the tanker is secured to the Buoy a permanent watch will be performed by the Mooring/Loading Master and/or his assistant in the cargo control room with the portable unit.

Contact will be permanently kept with the Zirku Control Room (ZCC) private VHF Channel.

Tanker Personnel: A tanker officer speaking English should be permanently on duty with the Mooring/Loading Master. The Chief Officer must be available at any time during the deballasting and loading operations (room and telephone number).

In addition to the tanker officer at least two crew members will be in contact with control room through adequate W/T and must be on duty permanently on the deck keeping watch on the tanker and terminal equipment.

Accommodation ladder will be continuously adjusted by the crewmen with regard to the sea state and tanker draft to provide safe access to the deck at any time of the operations.

Ullages: Ullage measurements shoud be taken by remote gauge while loading.

Opening the tank ullage lids should be avoided.

When necessity involves opening the lids the Mooring/Loading Master's approval must first be obtained.

The Mooring/Loading Master will check and approve the Ullage Report according to ullage measurements.

Characteristics:

API: around 34.5
S.G.: around 0.85
Temperature 20°C. to 35°C.

More accurate characteristics will be transmitted to the tanker on arrival.

BALLAST: *Quantity:* Tankers arriving at Zirku Petroleum Port for berthing should keep onboard at least 30% of their d.w.t. as ballast until further instructions received from the Mooring/Loading Master.

Tankers capable of deballasting and loading simultaneously should have on board a total of not less than the 30% d.w.t. requested for berthing so that in normal circumstances they will not be flying light whilst moored at the buoy.

Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring/Loading Master consider it necessary.

Quality: Vessels arriving with ballast on board to be discharged into the sea must ensure that the ballast, lines and pumps are clean and free from oil before commencing discharge. If necessary the initial quantity and the drainings should be pumped into the slop-tank. A permanent deck watch shall be kept during this operation with overside lights displayed at night on both sides of the vessel at the discharge points.

Deballasting Facilities: There are no deballasting facilities at Zirku Terminal for receiving dirty ballast.

UNMOORING/DEPARTURE: As soon as the loading operation is completed, the vessel will vacate the berth.

The tanker's cargo manifold valves and butterfly valves at the hose end will be closed. The hoses once disconnected will be swung outboard and lowered to the water with the derrick and released.

The tanker will leave the terminal by slipping the mooring. Once the mooring is slipped, the tanker will put the engines astern, drop back until clear of the floating hose, and then steam clear of the terminal.

The mooring launch will be positioned to tow the floating hoses clear, where necessary. The tug will help the tanker to clear the terminal if so required by the Mooring/Loading Master. The mooring connection team will disembark at this stage and the terminal equipment be lowered into the tug. It will be necessary to make a lee to perform these operations safely.

Waiting Area: In the case of no "Early Departure Procedure" arrangements having been made, the tanker will be anchored in one of the anchorage areas waiting for cargo, documents which will be sent by the pilot boat as soon as possible.

In case of the tanker being delayed from sailing for any reason (engine repairs, waiting order, etc) the Mooring/Loading Master will disembark once securely anchored.

When the tanker is ready to sail through the North Departure Route, 2 hours' notice will be given to the Mooring/Loading Master.

Departure Route: Any deep draft tanker leaving Zirku Petroleum Port will proceed through the following departure route at a speed not exceeding 8 knots.

Buoy No. 1	Lat. 25° 02' N., Long. 53° 00.8' E.
East Mark	BYB VQ(3)5s.
Buoy No. 2	Lat. 25° 04.4' N., Long. 53° 02.4' E.
Safe Water	RW Occ 15s.
Buoy No. 3	Lat. 25° 06.4' N., Long.53° 03.0' E.
Safe Water	RW LFl 10s.
	Crossing Pipe 30 in.
Buoy No. 4	Lat. 25° 09.8' N., Long. 53° 02.6' E.
Safe Water	RW Occ 8s.
	Crossing 3 pipes 18 in. & 30 in.
Buoy No. 5	Lat. 25° 11.2' N., Long. 53° 00.2' E.
Safe Water	RW MO(A) 10 s.
Buoy No. 6	Lat. 25° 13.0' N., Long. 52° 58.9' E.
West Mark	YBY VQ(9) 10s.

To Das Channel Buoy No. 10. Leave to starboard.

MEDICAL: Although a medical officer is resident on Zirku Island, consultations will be possible only on an emergency basis.

DENSITY: The salinities are high as a result of the high rate of evaporation.

At the terminal, the water density depending on the sea temperature ranges from 1030 to 1035.

SERVICES: Following services are NOT available at Zirku Petroleum Port:

Bunkers.
Fresh Water.
Food.
Engine Repairs.
Deratisation.
Shore leave for the crew.
Crew changes.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams.

WEATHER: *Seasons:* Two principal seasons can be distinguished in the Gulf. The cool "Winter" season extends from mid November to mid March and the hot "Summer" season from mid May to mid September. The two intermediate periods are transitional and the weather experienced may have either Summer or Winter characteristics.

Winds: The most frequent (54% of the time) is named 'Shamaal' and blows from W.N.W. to N. principally in Winter. The 'Noshi' blows from N.N.E. to E.N.E. for 20% of the time.

Local effects of Monsoon, called the 'Kaus', blows from E. to S. 17% of the time.

Finally, during Winter only, the 'Suhaili', blows for 9% of the time from W.S.W. to W.

The strength of these winds is approximately proportional to their probability of occurrence but at their strongest they can give rise to sandstorms and rough seas for several consecutive days.

Temperature: The extreme monthly mean values of air temperature are 20°C in February and 34°C in August with a lowest minimum of 9°C and a highest maximum of 44°C during the same months.

Tides: Around Zirku Island the tide is variable with small diurnal predominance. However this semi diurnal effect is not of great significance and for all practical purposes it can be said that there is only one high water and one low water per day.

The maximum range is about 1.5 m.

The mean usual range is 1.0 m.

Currents: At the terminal tidal currents are semi diurnal.

The current speed reaches 1 knot regularly at each tide.

Roughly the flood runs S.W. and the ebb N.E. but the turn of tide is very slow when the current directions are variable.

Predictions may be found to be considerably influenced by strong winds, especially the 'Shamaal'.

GENERAL: *Navigation Aids Dues:* The light dues for the Gulf navigational aids will be levied for the account of M.E.N.A.S.

These dues will be paid once per voyage at the first port of call in the Gulf.

Masters are requested to keep the receipt as a voucher if requested by any other Port authority within the Gulf.

Agency: Ship-owners must have their own representative Agency in Abu Dhabi.

Zadco will be acting as a sub-Agency to liaise with the main Agency in Abu Dhabi for all queries regarding mail, telexes, medical assistance, letters of Protest etc.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* Abu Dhabi 6023450/1 or 6056471. *Telex:* 22948 ZDC AUH EM – Zirku. *FAX:* 6056472. *Contact:* Captain A. M. Gabal, PPA – Acting Manager. Captain H. Al-Holli or Captain M. Abu Shahba, Zirku – Port Officers.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 730500. After hours 794490. Fax: 731328.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations) 1979.

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of
(a) death, other than by accident,
(b) illness where the person or persons concerned
(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;
(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of
(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease
(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority
or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);

(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the excepted area of the Council of Europe, i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. The Port Health/Medical Officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £5,000.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

Animals/Animal Products: Animals and products of animal origin (including fishery products, eggs, honey, etc.), imported from countries outside the European Union, are subject to veterinary control and can only be landed at ports designated by the EC as Border Inspection Posts for specific products.

INTERNATIONAL CODE OF SIGNALS
PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request Free Pratique	Q
	*I require Health Clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)..........(indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate Pratique signal.	
ZY	You have Pratique.	
ZZ	You should proceed to anchorage for Health Clearance (at place indicated).	
	ZZ1 Where is the anchorage for Health Clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, whe it can best be seen, by vessels requiring Health Clearan These lights should *only* be about 2 m. (6 ft.) apart, sho be exhibited within the precincts of a port, and should be vis all round the horizon *as nearly as possible.*

Health Clearance may be given in three ways:
(a) Wholly in plain language.
(b) Partly in the above signal code, remainder in pl language.
(c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdo

AUTHORITY: Association of Port Health Authorities, Dutton Hou 46 Church Street, Runcorn, Cheshire WA7 1LL. *Tel:* (01928) 58044

GENERAL:

Regulations for tankers entering or leaving ports in the Uni Kingdom:

Application of the Regulations: The British Government have issued t following regulations, which came into force on 15th October, 19 applicable to tankers of 1,600 g.r.t. and over of any nationality whic

Have a cargo of chemicals, gas or oil in bulk, or;

Have not been declared gas free after having carried such a carg

Reports: Before entering the limits of any harbour a report must be ma to the Harbour Master of that harbour giving the following informatio

(a) Name and call sign.
(b) Country of register.
(c) Length, draft and beam.
(d) Destination. (This may not be the same as the harbour throu which the tanker is passing).
(e) ETA at Pilot Station or harbour limits.
(f) Brief description of cargo and quantity in tonnes.
(g) Is vessel fitted with inert gas system?
(h) If inert gas system is fitted, is it operational?
(i) Have cargo tanks been rendered non-inflammable?
(j) Has a certificate been issued that the vessel complies with t IMO Codes for the Construction and Equipment of Ships carryi
  (i) Dangerous chemicals in bulk, or;
  (ii) Liquefied gases in bulk?
(k) Any defect in the hull, machinery, or equipment which may:
  (i) affect the safe manoeuvrability of the tanker or;
  (ii) affect the safety of other vessels in the vicinity of t harbour, or;
  (iii) constitute a hazard to the marine environment, or;
  (iv) constitute a hazard to persons or property in the vici of the harbour.

Any changes to the above which occur before entering the harb limits or while within those limits must be notified to the Harbour Mast

Check List: A Check List is required by the Pilot and the Harbour Mas giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and ra equipment.

State of Safety Certificates and other documents.

Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transp Marine Offices at the following ports: Aberdeen, Avonmouth, Belf Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, H Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcas Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986

Ship Movement Reporting in the English Channel and Dover Str

From 1st July, 1986, a revised message format is to be used in t voluntary ship movement reporting system for the English Channel a Dover Strait (MAREP). The changes will bring the MAREP system i agreement with the General Principles for Ship Reporting Syst adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also inclu amendments to the description of the MAREP system which was g in former Notice No. 1520/81.

Ship Movement Reporting (MAREP): *Introduction:*

(1) The objective of the MAREP scheme is to assist the Marine improve safety of navigation in the English Channel and Dover St and to reduce the risk of pollution of the coasts of the United King and France in this area. Participation in the scheme is voluntary and International Maritime Organisation (IMO), through its Maritime Sa Committee, has recommended that ships to which the scheme app should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ship report-in to a number of designated shore stations in the area o Traffic Separation Schemes and associated Inshore Traffic Zones Ushant, off Casquets and in the Dover Strait. Broadcasts will be m by shore stations on a regular basis and as required and will inc information on any known situations which could affect the navigation of ships in these Traffic Separation Schemes or asso Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the described in paragraph 5 below are invited to participate:

(a) All loaded oil and chemical tankers and loaded gas carrie 1,600 g.r.t. and over.
(b) Any ship "not under command" or at anchor in a traffic sep scheme or associated inshore zone.
(c) Any ship "restricted in her ability to manoeuvre", ships eng in towing, deep draft ships, or ships with a defect in propulsion or steering.
(d) Any ship with a defect in those navigational aids which adversely affect her navigation under prevailing condition

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

(a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:

(i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.

(b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:

(i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.

(ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.

(iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a) Ushant	Ouessant Traffic	16 – 11
(b) Casquets	Jobourg Traffic	16 – 11
	Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c) Dover Strait	Gris Nez Traffic	16 – 69
	Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

APPENDIX: Ship Reporting System:

System Identifier	MAREP
Type of Report	POSREP (Position Report) or DEFREP (Defect Report) or CHANGEREP (Change Report)

Heading	*Text*	*Explanation or Example*
Identification of message	MAREP	
Type of message	POSREP	
Identity of ship	ALFA+name of ship plus call sign	
Group date/hour	BRAVO+6 figure (Zulu)	Date of month: 2 figures. Hours and minutes: 4 figures
Position	CHARLIE+Latitude and Longitude	Latitude: 4 figures followed by N or S Longitude: 5 figures followed by E or W
	or CHARLIE+name of port of departure	If the vessel is sailing from a port in the coastal zone
	or DELTA+bearing – distance in relation to a sea mark	Bearing: 3 figures in degrees. Distance: 2 figures in miles from land/sea mark indicated
True Course	ECHO+true course	3 figures in degrees from North
Speed	FOXTROT+speed in knots and tenths of knots	3 figures
Destination	INDIA+name of port of destination and probable time of arrival	
Radio-Communications	MIKE+VHF Channel number	Give number of VHF Channel monitored and if applicable number of second Channel monitored
Draft	OSCAR+maximum present draft	4 figures in metres and centimetres
Cargo	PAPA+industrial name of product or IMDG Code No.+quantity	Nature of cargo. Quantity expressed in tonnes
Navigational Restrictions	QUEBEC+brief description in clear	Stopped, moored, hampered by draft; generally any restriction on manoeuvrability
Additional Comments	X-RAY+brief particulars	Any other information which may be useful.

Note: The headings QUEBEC and X-RAY can be omitted when there is nothing to report.

Specimen Messages:

GARBAGE/WASTE OIL DISPOSAL: *General Information:* Ports and terminals in the United Kingdom must by law provide reception facilities for oily mixtures, chemicals and garbage from ships which need to discharge these substances. The level of provision varies according to the requirements of the ships usually visiting the port, some facilities are only provided to meet specialised needs, whilst facilities for garbage are almost universal. In some ports waste disposal companies are contracted to provide the service, this is often by means of road vehicles. *Advance Notice Requirements:* The use of specialised facilities may demand advance notice and when this is required arrangements are usually made by the ship's agent or by radio. Information on advance notice requirements is detailed, where available, under the relevant ports entry, and is also available from the ports or terminals.

Fees: Ports and terminals may make a reasonable charge for the use of reception facilities.

General: The responsible authorities must be informed if any waste to be landed is contaminated by pest or disease organisms or where its disposal on land would present a risk to human or animal health or to the environment.

Should any inadequacies be observed in the system, then such information should be reported to the local Marine Office of the Department of Transport, which are listed below.

Marine Offices, Department of Transport:

London District, Central Court, 1 B Knoll Rise, Orpington BR6 0JA. Tel: (01689) 890400. Telex: 8812573 dtisurg. Fax: (01689) 890446.

Bristol Channel District, Oxford House, Hills Street, Cardiff CF1 2TD. Tel: (01222) 29556. Telex: 497663 dtisurg. Fax: (01222) 229017.

South and South West of England District, Southwestern House, Canute Road, Southampton SO9 1NP. Tel: (01703) 223061. Telex: 47124 dtisurg. Fax: (01703) 335818.

Liverpool District, 2nd Floor, Derby Square, Liverpool L2 7SQ. Tel: (0151) 2366901. Telex: 628474 dotlvg. Fax: (0151) 2360032.

West of Scotland and Northern Ireland District, 15 Muirhouse Street, Glasgow G41 1QW. Tel: (0141) 4240330. Telex: 778410 dotglag. Fax: (0141) 4230807.

East of Scotland and Northern Ireland District, Blaikies Quay, Aberdeen AB9 2AZ. Tel: (01224) 574122. Telex: 73689 dtiabng. Fax: (01224) 571920.

North East and East of England District, Government Buildings, Broadway West, Gosforth, Newcastle upon Tyne NE3 2JL. Tel: (0191) 2857171. Telex: 537045 dotsurg. Fax: (0191) 2847464.

ABERDEEN: 57.09 N. 02.03 W. (See Plan)

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory except for vessels under 75 m. in length and there are 6 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

Vessels requiring a Pilot should give at least one hour's notice to Port Control.

Pilots normally board vessels in the vicinity of the Fairway Buoy. The pilot vessels fitted with VHF radio are of the MFV type and have a black hull with white cabin and the word "Pilot" displayed in front of the cabin.

There is Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has been handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	*Depth* MHWS
Tidal Harbour	1,574 m.	8.4 – 10.3 m.
Albert Basin	1,525 m.	8.4 – 13.6 m.
River Dee (Navigable)	928 m.	8.4 – 10.9 m.
River Dee Dock	410 m.	9.3 – 10.9 m.
Upper Dock	429 m.	9.0 – 10.3 m.
Victoria Dock	1,500 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 137 m. long with 9.3 m. at MLWS. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 205 m. long with 9.9 m. at MLWS. Open quay. 2×20 ton and 1×50 ton electric portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor, outreach of boom 27 m.

No. 3 Waterloo Quay: This is 172 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 255 m. long with 9.9 m. at MLWS. Two transit sheds. Excellent road connections. Forest products terminal in operation.

No. 5 Multi Berth Facility: 520 m. long with 9.6 m. of water at MLWS and 13.3 m. at MHWS. Two transit sheds.

CRANES: *Mobile Cranes:* 1×30 tons and 6×18 tons.

Specialised Facilities:

(i) One of the largest tank storage facilities in Britain with tank capacity of more than 110,000 cu.m. suitable for oil, chemicals, and natural gas.

(ii) The port is licensed to handle explosives both in dock and at specially approved anchorages.

(iii) A bulk loading conveyor installed at No. 2 Dock is capable of handling coal and coke at a speed of 450 tonnes per hour and is served by road and rail, with stocking areas.

(iv) Windward Terminal: 6,400 sq.m. of storage area (temperature controlled). 4×6 ton quay cranes. Terminal can accommodate vessels of 10,000 d.w.t.

BRIDGES: Bridge swung to vessel's requirements.

STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.

Port Working Hours: Monday – Thursday: 0700 – 1630 hrs. Friday 0700 – 1530 hrs.

Daily and weekend overtime available and shiftwork can also be arranged on request.

MEDICAL: Hospital facilities available. Advance notice desirable.

TANKERS: 6 tanker berths, maximum draft 28 ft.

DENSITY: Density 1020.

FRESH WATER: 15/20 t.p.h. per hose.

FUEL: By barge or road transport.

CONSULS: None. Many located at Cardiff 8 miles East of Barry.

REPAIRS: All types of repair undertaken by private ship repairers.

DRY DOCKS: One dry dock, length 286.5 m. and width 23.9 m. – not in use.

GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.

OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.

CUSTOMS ALLOWANCES: Refer to Customs. Tel: (01446) 420240.

REPATRIATION: All facilities available.

AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.

TIME: GMT, except late March – late October when British Summertime (GMT plus 1 hour) is in operation.

HOLIDAYS: Bank Holidays. Arrangements made to work if essential.

POLICE/AMBULANCE/FIRE: Call operator by dialling 999.

TELEPHONES: At main berths.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent NP9 2NP. Tel: Newport 56835/6.

IDENTIFICATION CARDS: Not needed by Port Authority.

AUTHORITY: Associated British Ports, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH. *Tel:* (01222) 471311. *Telex:* 498542. *FAX:* (01222) 471100. *Contact:* L.R. Gravestock, Port Manager, Cardiff and Barry. Captain R.S. Grubb, Dock and Harbour Master.

Barry: A.H. Starke, Dock Superintendent, Barry. *Tel:* (01446) 700311. *FAX:* (01446) 700100.

BELFAST: 54.36 N. 05.56 W. (See Plan)

DOCUMENTS:

1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.

PILOTAGE: Pilotage compulsory for vessels over 100 m. LOA in the Outer Harbour and vessels over 75 m. in the Inner Harbour. Pilot station is situated at Belfast. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 2 hours. Pilots may be ordered through:

Port Operations Station, Tel. 553010 or VHF Channel 12.
Belfast Harbour Office, Tel. 554422, 0900 – 1700 hrs. Monday-Friday.

There are 3 motor launches servicing Pilots. "Pilot Boat 1" is 33 ft. long, "Pilot Boat 2" is 44 ft. long, and "Mabel Helen" is 46 ft. 8 in. long. All vessels are painted orange with word "Pilot" in white letters on each side.

Pilot launches may be contacted on VHF Channel 12.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.

ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.

RESTRICTIONS: Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson Wharf – 26 ft. below datum.

Musgrave Channel, 24 ft. below datum.
Herdman Channel, 24 ft. below datum.

MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing" and "Tankers".

HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorised officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, Free Pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify "Portelth Belfast" by radio in advance.

Also see "Health – All Ports" before first U.K. port.

RADIO: The best station for messages, cables, etc., is Port Patrick, call signal GPK.

VHF: Belfast Port Operation and Information Service is situated at Port Control Office, located in Milewater Basin. A continuous watch is maintained on VHF on Channel 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. 777447. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of No. 20 beacon. Use of tugs' lines is optional.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Victoria Terminal 1 Ro/Ro	24
Victoria Terminal 2 Ro/Ro	24
Donegall Quay 4 – Ro/Ro	18
Donegall Quay 5 – Fast Ferry	18
Albert Quay – Ro-Ro	18
York Dock 1 and 2 (1×30 ton transporter crane)	24
Herdman Channel West – Unit load/Ro-Ro	18
Stormont Wharf 2 (200 tonne cantilever crane)	28
Pollock Dock 7 (1×35 tonne derrick crane)	28

Numerous general cargo berths and cranage from 3 – 15 tonnes.

Gatx Terminals Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. and Flogas at Musgrave Channel.

STEVEDORES: Direct employment by private stevedores, 24 hours if required.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made.

TANKERS: Tankers have to observe (i) Chamber of Shipping Tanker Safety Code. (ii) The M.S. (Reporting Requirements for Ships carrying Dangerous and Polluting Goods) Regulations 1995. (iii) The Dangerous Substances in Harbour Areas Regulations (Northern Ireland) 1991.

Tanker Berths: Oil Berth No. 4 – 35 ft. Oil Berth No. 1 – 28 ft. Oil Berth No. 2 – 28 ft. Oil Berth No. 3 – 28 ft.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Harbour Radio.

FUEL: All grades of fuel oil are available by road tanker only. 48 hours' advance notice of requirements should be given.

FIRE PRECAUTIONS: Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

Also see "Tankers".

CONSULS:

Belgium	Hillsborough 682671
Denmark	Belfast 230581
Dominican Republic	Belfast 230321
France	Belfast 660325
Germany	Ballymena 41412
Greece	Belfast 242242
Italy	Belfast 778353
Netherlands	Belfast 243126
Norway	Belfast 242242
Spain	Belfast 227571
Sweden	Belfast 230581
Switzerland	Carrickfergus 61195
U.S.A.	Belfast 228239

REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: Belfast Dry Dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff Building Dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Two other dry docks available.

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.
OPENING/CLOSING HATCHES: By crew or stevedores.
CERTIFICATES: Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.
REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.
AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast City Airport has daily flights to many U.K. cities.
TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.
POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast; Ambulance 241212; Harbour Police 232235; *or* through Belfast Harbour Radio on VHF Channel 12.
TELEPHONE: Telephone can be placed on board at certain berths.
SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

Charts and publications available from Class A Admiralty Chart Agent, Todd Chart Agency Ltd., 4 Seacliff Road, The Harbour, Bangor, County Down, BT20 5EY. Tel: (01247) 466640. Fax: (01247) 471070.

SHORE LEAVE: Normally no restrictions on shore leave.
IDENTIFICATION CARDS: Seamen's identity cards required.
GARBAGE DISPOSAL: Services available through local agent.
WASTE OIL DISPOSAL: Service available. Contact Capital Fuels Ltd., Ballynahinch, Co.Down. Tel: (01238) 561574. Fax: (01238) 561576.
SEAMAN'S CLUBS: Stella Maris (Residential), and Flying Angel. All services and facilities available.
GENERAL: *Charts:* B.A. No. 2198, 1753.
Pilot Books: NP40, Irish Coast Pilot.
Lights: Admiralty List of Lights, Volume A (NP74).
AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (01232) 554422. *Telex:* 74204. *FAX:* (01232) 554411. *Contact:* Captain W.E. Luney, Harbour Master. G. Irwin, Chief Executive. I. Watson, Port Operations and Development Manager. W. Wilson, Port Services Manager.

BERWICK-UPON-TWEED: 55.46 N. 00.59 W.

(See Plan)

PORT LIMITS: One mile from Berwick Lighthouse.
DOCUMENTS: Usual U.K. requirements.
PILOTAGE: Compulsory for all vessels over 40 m. LOA.
ANCHORAGES: 8 cables E.S.E. from lighthouse.
MAX. SIZE: 110 m. LOA if fitted with bow thruster and 70 m. LOA if not fitted with bow thruster. Max. beam 17.0 m. Max. draft 4.6 m.
VHF: Forth Radio on Channel 24. Harbour Master on Channels 16 and 12.
TUGS: None available.
BERTHING: Tweed Dock: 3 berths (1×110 m., 1×100 m. and 1×90 m.).

Vessels take bottom on level mud bottom.

Stone Berth: Max. LOA 22 m.

Vessels take bottom on sandy bottom.

CRANES: 3×7 tonnes.
BULK CARGO FACILITIES: Bulk stone handling at Stone Berth, maximum 400 t.p.h.

4 elevators available for loading at Tweed Dock.

STEVEDORES: W. Lindsay & Co. (Stevedore Ltd.), 1 Dock Road, Tweedmouth.
MEDICAL: Hospital available locally.
TANKERS: No facilities available.
DENSITY: 1010 – 1025.
FRESH WATER: Available.
FUEL: Available by road tanker.
REPAIRS: Facilities available.
DRY DOCKS: None.
SURVEYORS: Available from Newcastle or Edinburgh.
GANGWAY/DECK WATCHMEN: Not available.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Usual U.K. allowances.
CARGO GEAR: Shore gear normally used.
REPATRIATION: Facilities available.
AIRPORT: Newcastle, 60 miles. Edinburgh, 60 miles.
EMERGENCY CO-ORDINATION CENTRE: Forth Coastguard.
TELEPHONES: Not available.
BANKS: All major U.K. banks.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: No requirements.
GARBAGE DISPOSAL: Collected from ship.
WASTE OIL DISPOSAL: Small quantities only.
SEAMAN'S CLUBS: None.
AUTHORITY: Berwick Harbour Commission, Harbour Master's Offic Tweed Dock, Tweedmouth, Berwick-upon-Tweed TD15 2A *Tel:* (01289) 307404. *FAX:* (01289) 306101. *Contact:* Capta J.H. Jenkinson, Harbour Master.

BIDEFORD: 50.01 N. 04.13 W.

(See Pla

PILOTAGE: Pilotage district of the port of Bideford lies within line dra 270° for 2 nautical miles from Baggy Point (Lat. 51° 09' Long. 04° 16' W.) thence 180° to the coast. Pilotage is compulsory all vessels over 350 g.r.t., except those exempted by law. Pilot boar at Bideford Bar, weather permitting. ETA 12 hours prior to arrival. Pi boat operates on VHF Channels 16 and 12.
ANCHORAGES: Weather permitting, 5 cables West of Bideford Fairw Buoy.
RESTRICTIONS: Tidal estuary protected by sand bar. Entry only flood tide.
MAX. SIZE: LOA 80 m., beam 12.0 m., airdraft 24.0 m., draft depen on height of predicted tide.
VHF: Pilot on Channels 16 and 12.
BERTHING: 2×82 m. length loading berths. Cargo handled: Bu fertiliser and clay.
CRANES: 2×3 ton capacity crawler cranes.
BULK CARGO FACILITIES: All cargo handled by 2 cranes.
BRIDGES: One road bridge, North of harbour. Airdraft 24.0 m.
STEVEDORES: Evans Transport, Pottington Industrial Esta Barnstaple.
MEDICAL: Bideford Hospital, 1 mile.
TANKERS: Tankers (LOA 70 m. × 12 m. beam and 1,600 d.w.t.) be at B.P.Yelland in the lower estuary on River Taw.

No tanker facilities in Bideford harbour.

DENSITY: Tidal river.
FRESH WATER: Available.
FUEL: Supplied by road tanker at quay.
REPAIRS: Facilities available.
SURVEYORS: M.S.A. Plymouth.
AIRPORT: Exeter, 40 miles.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: Normal U.K.
POLICE/AMBULANCE/FIRE: Dial 999.
BANKS: Main U.K. banks located in High Street.
GARBAGE DISPOSAL: Daily collection.
AUTHORITY: Torridge District Council, River Bank House, Bide Devon FX39 2QG. *Tel:* (01237) 476711. *FAX:* (01237) 478 *Contact:* R.J. Hopkins, Harbour Master.

BLYTH: 55.08 N. 01.30 W.

(See Pl

DOCUMENTS:
- Certificate of Registry.
- Load Line Certificate.
- Safety Radio Certificate.
- Safety Equipment.
- Safety Construction.
- Light Dues Payments.
- Customs Forms C13 and C142.
- Bills of Lading, Manifest and Stowage Plan usually sent in adv of vessel.
- List of Members of Crew (of ship arriving in U.K.) who are alie were engaged outside U.K. (Home Office Form I.B.6A). Pass form to be completed when reporting vessel's arrival from f ports.

PILOTAGE: Call by VHF Channels 12 and 16 when approxim 2 hours off port. Pilot boats have black hull with white superstru with word "Pilot" in black letters on the superstructure. Letters in Fly International Pilot Flag at masthead and at night show Interna Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or e International Code Flag "G". By night flashes International Code S "G" or "PT". Pilot boats operate and will board within radius of 2 of East Pier Lighthouse, or further, weather permitting. Pilots bo Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good w vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio, VHF Channel 26.

VHF: Details of movements within port given over VHF from Port Control Office (Tel: (01670) 352678). Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (01670) 352066. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.

FUEL: Not available.

CONSULS: (At Newcastle-upon-Tyne) Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel: 999.

TELEPHONES: Can be fixed aboard by arrangement.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

GARBAGE DISPOSAL: Disposal skips are provided on BHC general cargo quays, for ships domestic garbage. Arrangements for other garbage should be made direct by agents or through the port authority for a contractor. As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: (01670) 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: (0191) 4106621).

WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

Cleanaway Ltd., Waste Services Division, Service Centre, Meadowfield, Ponteland, Newcastle upon Tyne, NE20 9SN. Tel: (01661) 72640.

Hargreaves Clearwaste Ltd. Environment & Construction Materials Division, Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham DH3 2QN. Tel: (0191) 4106621.

Effluents Services Ltd., 140 Moss Lane, Macclesfield, Cheshire, SK11 7YT. Tel: (01625) 29666.

SEAMAN'S CLUBS: None.

CURRENCY: U.K. Pound (U.K.£).

AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (01670) 352066. *FAX:* (01670) 368540, 355169. *Contact:* I. Robertsham, Chief Executive. M. Lawlor, Commercial Director.

BOSTON: 52.58 N. 00.01 W. (See Plan)

DOCUMENTS: Usual U.K. requirements.

PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards at Clay Hole from launch in the approaches to River Witham or at Boston Roads (non-compulsory). Pilot Office Tel: (01205) 362114.

ANCHORAGES: Vessels awaiting tide anchor to South of Buoy No. 9 in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.

Lock Dimensions: Lockable length 88.0 m., width 13.6 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m. Larger vessels may be accepted, tides permitting.

HEALTH: Normal U.K. procedure. Port Health Officer, Tel: (01205) 363271.

VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 2.5 hours before till 1.5 hours after HW.

TUGS: 1 tug available, 7 tons bollard pull.

BERTHING: *Boston Dock:*

North Quay: Length 251 m.

South Quay: Length 257 m. Transit shed 2,787 sq.m.

West Quay: Length 137 m. Transit shed 2,160 sq.m.

Two Ro/Ro ramps.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.

CRANES: At Boston Dock:

3×6 tonnes electric portal cranes.

1×25 tonnes Scotch Derrick.

3 mobile cranes.

1 Gottwald mobile heavy lift crane (50 tons).

At Riverside Quay: 1×7.5 tonnes electric portal crane.

Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos, each capable of storing 5,000 tonnes.

(i) Banks Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. Mobile shiploaders available.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (2.1 ha.) with two reach stackers.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.

MEDICAL: Doctors, dentists and hospital available locally.

FRESH WATER: Available.

FUEL: Available from road tankers. Contact Agents to make arrangements.

CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.

REPAIRS: Can be undertaken by local companies.

CUSTOMS ALLOWANCES: Usual U.K. Regulations. H.M. Customs, Tel: 01205-363070.

TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).

POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.

GARBAGE DISPOSAL: MARPOL skips situated on dock. Larger quantities by arrangement with the port.

WASTE OIL DISPOSAL: By arrangement with Orcol (Tel: (01532) 533571) or Hall & Campy, Nottingham (Tel: (01602) 780321).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Port of Boston Ltd., Dock Office, Boston PE21 6BN. *Tel:* (01205) 365571. *FAX:* (01205) 310126. *Cables:* Neptune, Boston. *Contact:* Captain B.D.C. Franklin, Harbour Master. Tel: (01205) 362328 (direct). J.S. Sutcliffe, Managing Director. J. Healy, General Manager.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Exxon Chemical Olefins Inc. and Shell U.K. Exploration and Production, as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and is separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Exxon Chemical Olefins Inc. and exports Ethylene, Gasoline and Pentane Plus products in ships between 4,000 cu.m. and 12,000 cu.m. capacity and gasoline in ships up to 20,000 tonnes S.d.w.t. and not exceeding 165 m. LOA.

The Western Jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m. Ships of less than 15,000 cu.m. may be accommodated by special arrangement, provided their moorings are suitable and their manifolds are compatible with the loading arm envelope.

Each jetty carries out loading operations independently, while the co-ordination and administration of marine activities is the responsibility of the Braefoot Bay Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Exxon Chemical Olefins Inc. with direct responsibility for the Management of all ship-related activities at Braefoot Bay.

The products from Mossmorran are Ethylene, Propane, Butane, Gasoline and Pentane Plus products, of which the Ethylene and Pentane Plus product are manufactured and handled over the Eastern Jetty of the Terminal by Exxon Chemical Olefins Inc., while the other products are handled by Shell U.K. Exploration and Production over the Western Jetty of the Terminal. Shell U.K. Exploration and Production also have the facility to export Gasoline across the Eastern Jetty.

DOCUMENTS: See "Leith".

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports PLC and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 6 and 71, with working Channels 2 and 20.

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are authorised by the Forth Pilotage PLC and must be ordered for both inward and outward passages through the ship's agent.

Vessels bound for the Forth must give 4 hours' notice of ETA and should confirm their ETA 2 hours before arrival at Pilot Station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 71 and working on VHF Channel 72.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

Pilotage Exemption Certificates are not acceptable at Braefoot Bay Marine Terminal.

(b) (i) *Vessels will not be berthed if the weather as forecast by Glasgow Weather Centre over the planned time alongside indicates sustained wind speeds of 45 knots or more.*

(ii) *Vessels are not allowed to berth at the Braefoot Bay jetties if the mean wind speed exceeds 27 knots. Vessels will not sail if the wind speed exceeds 27 knots. However, if the forecast is for the wind to increase to greater than 50 knots, the berths may be cleared following consultation with the Chief Harbour Master.*

(iii) *Vessels will not be accepted for berthing at Braefoot Bay and departures will not be authorised unless visibility is at least half a nautical mile at the Braefoot Bay jetties.*

(c) In accordance with the agreement of the Terminal and Forth Ports PLC, the following directions for Navigation apply or as advised by the Terminal from time to time:

(i) All vessels may approach and depart from the Terminal via the Eastern or Western Channel of Mortimers Deep. Those vessels approaching from the East will berth starboard side alongside on the ebb tide, whilst vessels approaching from the West berth, port side alongside on the flood tide. Berthing and sailing times are dependent on the tidal range.

(ii) A 2.0 m. under-keel clearance along the intended ship's track should be maintained. Vessels may sail at any state of the tide, provided a minimum calculated under-keel clearance of 2.0 m. is available. An allowance for 30 minutes passage time between berth and Bar on a rising tide and 1 hour passage time on a falling tide should be allowed for Easterly departures.

(iii) On arrival at the pilot station, anchors should be cleared and at least two crew members standing-by on stations. On departure, anchors should be cleared and at least two crew members should be on station both forward and aft until the tug has finally departed.

(iv) No two ships are to move in Mortimers Deep at the same time.

(v) A minimum separation distance of 50 m. is to be maintained for ships passing one already alongside the other berth.

(vi) If a vessel is berthed starboard side alongside, she will in general depart to the West, and if berthed port side alongside, she will generally depart to the East. However, where a swing off the berth is required, it shall be done under the following conditions:

All vessels over 145 m. LOA requiring to swing off the berth shall have a minimum of two tugs.

Vessels over 185 m. LOA can only swing off the berth after consultation and agreement between Forth Ports, the Duty Pilot and the Braefoot Bay Ship Scheduler.

(vii) Vessels departing to the West shall maintain a 2.0 m. under-keel clearance.

(viii) When the Shell Jetty is occupied, a vessel over 145 m. LOA berthed on the Exxon Jetty shall not depart to the West on a flood tide.

(ix) Vessels over 145 m. LOA require 2 tugs for departure to the West.

(x) Where possible and when the mean winds exceed 20 knots, consideration will be made for berthing vessels head to wind and tide.

Also see "Regulations".

MAX. SIZE: Western Jetty: Depth 15.0 m. Eastern Jetty: Depth 10.0 m. Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message, excluding items (l) to (s) will be sent to Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may affect cargo operations or manoeuvrability.

(b) Confirm vessel has full P & I Club cover.

(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters are operational and fully submerged.

(d) Last port of call.

(e) Last 3 cargoes. Last: 2nd Last: 3rd Last:
Bottom temperature of each tank, for LPG cargo.

(f) Amount and grades of any cargo required.

(g) Anticipated maximum loading rate and the arrival tank botto temperature.

(h) Anticipated loading time.

(i) Arrival drafts.

(j) Sailing drafts.

(k) Confirm that only clean segregated ballast will be discharged a the Terminal.

(l) Confirm that remotely-operated valves have been operated through a complete open/closed cycle to ensure prope functioning and ascertain valve type (Ball, Gate, etc.) and actua valve closing time.

N.B. *Remote valves must close within 30 seconds o operation but so that the final 20% of valve movemen takes at least 6 seconds.*

(m) Gas detection system is operational and set (high or low sensors) Calibrated for the cargo to be loaded.

(n) Cargo transfer emergency stops tested from all locations t ensure correct operations of valves, alarms and interlocks.

(o) Ensure operation of the Tank high level and pressure alarms and interlocks.

(p) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be loaded.

(q) Confirm fire-fighting equipment, including water spray system fully operational and tested. Ship's fire main to be pressurised whilst alongside at Terminal.

(r) Manifold configuration and presentation (forward to aft), e.g LVVL. It is most important that the specific duty (Ethylene Propane, etc., liquid or vapour service) of each presentatio flange is known to the Terminal at least 24 hours prior to the ship's arrival. Vessels should arrive alongside with the correct size spoo pieces fitted to allow immediate connection of the loading arms Delays consequential on non-compliance with this requiremen will be for ship's account.

(s) If loading more than one grade, confirm that both can be loade concurrently.

N.B. *Vapour samples taken on arrival. Masters must ensu all tanks have positive pressure.*

(t) FOR FIRST TIME CALLERS – MANIFOLD CONFIGURATIO

(i) Size rating and standard of connecting flanges, e.g 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300/10 i ANSI 300.

(ii) Distance of manifold centre line from bow.

(iii) Height above uppermost continuous deck.

(iv) Distance of manifold from ship's side.

(v) Maximum loaded draft.

(vi) Minimum draft whilst at berth.

(vii) Distance from face to first retaining bracket (maximu acceptable is 1,200 mm.).

(viii) Height of manifold above keel.

(ix) Distance between manifold flange centres.

(u) Details of *any defects in vessel or equipment* affecting carg operations or manoeuvrability or confirmation that there are n known defects.

(v) Slip tubes must not be operated without prior written agreeme from the Terminal.

(w) Confirm that the minimum mooring deployment will be as th mooring analysis information supplied by the Terminal.

(x) To allow the Terminal to monitor ships navigational standar within pilotage waters, Masters are required to ensure charts us during pilotage showing courses and position fixing througho the pilotage are available for Terminal inspection until 4 hou after berthing.

(y) Masters of gas carriers and tankers berthing at and sailing fr Braefoot Bay Terminal should have anchors cleared and rea for letting go prior to arrival at the pilot station and upon depart the berth. Additionally, at least two crew members should be station both forward and aft, on arrival prior to entering Mortim Deep and on departure, until the final tug has been dismissed

(z) Confirm SIGGTO link for ship/shore shut-down, if fitted operational.

Notes: The foregoing information is required in addition to the p arrival information requirements of the Forth Ports PLC, the Merch Shipping (Reporting Requirements for Ships Carrying Dangerous Polluting Goods) Regulations 1995 and Merchant Shipping No M1630.

Condensate Tankers fitted with Inert Gas systems are to arrive t inerted (oxygen content below 8%) ready to load as inerting of ca tanks is not permitted alongside.

Under Forth Ports guidelines, Tanker Masters are advised that Authority does not permit tank washing and/or other like operation illicit discharges to take place within port limits. Masters of liquefied carriers are advised that the Authority does not permit venting of ga atmosphere while the vessel is within port limts.

Failure to send this message may result in the vessel being dela outside port limits.

Telex: A telex machine is sited at Braefoot Bay. The number is 728 MOSHIP G and is operable 24 hours per day. This telex number sh be used when relaying ETA, pre-arrival or other information relat expected loading. Otherwise messages should be transmitted thro the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The number is (01383) 892100.

VHF: "Braefoot Terminal" maintains a listening watch on VHF fro least 3 hours before a vessel's berthing time until clear of port lim departure on Channel 16 and may work on Channels 10, 12, 1 48, 69 or 73. (Channel 69 is the normal working Channel for Bra Bay Marine Terminal). Vessels at other times may establish ne communication with Braefoot Bay Marine Terminal via Forth Navi Service or ship's agent.

RADAR: Port and Estuary Radar Service operated by Forth Navigation Service. (See "Leith").

TUGS: Only tugs licensed by the Forth Ports PLC to operate at Braefoot Bay Marine Terminal may do so. Tugs are available, provided 24 hours' notice of requirement is given through the ship's agent to Forth Estuary Towage Ltd.

The Companies reserve the right to suspend berthing/unberthing operations if, in the reasonable opinion of the Braefoot Bay Supervisor, vessels have not obtained adequate tug attendance. Delay costs incurred from such suspension will be for the vessel's own account.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call-out procedures set out in the published Tariff. Tug orders placed through ships' Agents are to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:

1×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×30 tonne bollard pull Voith Schneider.
1×50 tonne bollard pull Voith Schneider.

Minimum Requirements: As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

East Jetty Towage Requirements:

LPG Carriers:

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small	1 × Small	2 × Small
Sailing	1 × Small	1 × Small	2 × Small

Condensate Carriers with Bow Thruster:

	Under 20,000 S.d.w.t.	Over 20,000 S.d.w.t.
Berthing	1 × Small	2 × Large
Sailing	1×Small (12 ton B.P.)	1 × Large

Condensate Carriers without Bow Thruster:

	Max. 20,000 S.d.w.t.	Over 20,000 S.d.w.t.
Berthing	2 × Small	2 × Large
Sailing	2 × Small	2 × Large

Western Jetty Towage Requirements:

LPG Carriers:

	Under 16,000 cu.m.	16,000 – 40,000 cu.m.	Over 40,000 cu.m.
Berthing	2 × Small	2 × Large	3 × Large
Sailing	2 × Small	2 × Large	2 × Large

All Berthings and Sailings are classed as Full Towage.

Condensate Carriers with Bow Thrusters:

	Under 20,000 S.d.w.t.	Over 20,000 S.d.w.t.
Berthing	1 × Small	2 × Large
Sailing	1 × Small	1 × Large

Condensate Carriers without Bow Thruster:

	Under 20,000 S.d.w.t.	Over 20,000 S.d.w.t.
Berthing	2 × Small	2 × Large
Sailing	2 × Small	1 × Large

All vessels over 145 m. LOA require 2 tugs for a departure to the West and swinging off the berth.

Tugs attending vessels will normally rendezvous with arriving ships North of Inchkeith Island, and also escort departing vessels to Buoy No. 9. Tugs will make fast East of the Oxcars when approaching from the West and Braefoot Buoys No. 1 and 2 when approaching from the East.

At all times that the vessel is alongside the berth, a harbour tug will be in attendance. This tug will be moored at its dedicated buoy, 1 mile to the East of the Terminal. In the event of adverse weather with wind speeds above 35 knots, the tug will be called upon to provide assistance as required. A Pilot will also be called to attend the vessel.

Out of hours and in emergency, tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16, or direct on Channel 71.

Procedure for Stand-by Tug at Braefoot Bay: A minimum of one tug will be in attendance at Braefoot Bay whenever there is a vessel on either jetty. The tug will be moored to a specially laid mooring buoy situated to the South of the Eastern exit channel between Buoys No. 4 and No. 6, maintaining a listening watch on VHF Channel 69. Alternatively in the case of a heavy Easterly swell, the tug may moor to an Admiralty buoy off Dalgety Bay.

Vessels will not berth if forecast winds for the duration of the stay alongside indicates sustained wind speeds of 45 knots or more. If forecast wind speed exceeds 30 knots, then extra moorings, i.e. extra stern lines and forward spring, will be deployed on arrival at the Terminal.

Trigger Points for Action: These are based on a vessel already alongside the Terminal, with action to be taken when the actual sustained wind registered on the jetty wind anemometer or forecast wind as indicated in the following:

Wind Speed:	Action to be taken:
30 knots actual	Tug on stand-by. If additional moorings not deployed at time of mooring, ship will be requested to run out extra moorings as required.
35 knots actual	Tug will be requested to come alongside vessel after loading has stopped. Pilot will be called out.
40 knots actual	Request tug to push "on" vessel. Pilot on board.
50 knots actual	Discuss with Braefoot Bay Supervisor sailing/re-berthing intentions.

Boatmen: Only boatmen licensed by the Forth Ports PLC and approved by the Companies to do so may operate at Braefoot Bay Marine Terminal. Mooring boats will be available provided 24 hours' notice of requirement for berthing and reasonable notice of unberthing is given through ship's agent to the Mooring Contractor.

Pre-ordered mooring boats and mooring crews will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF Channel 69.

Cancellation charges will be levied in the event of less than 3 hours' notice being given for amendments to previously confirmed berthing/sailing arrangements.

MOORING:

(a) All vessels will be subject to a computer mooring analysis to prove the required integrity of the mooring arrangements. This will be carried out by Braefoot Bay Marine Terminal. Every vessel will be required to deploy a minimum of 7 lines at each end.

If a vessel has a cubic capacity of greater than 39,000 cu.m., this analysis must be carried out prior to the vessel being accepted by the Terminal.

If a vessel has a cubic capacity of less than 39,000 cu.m., she may berth prior to the results of the analysis being known. In this interim period, the vessel will be required to deploy 6 head/stern lines, 2 breast lines and 3 springs at her Western extremity and 4 head/stern lines, 2 breast lines and 3 springs at her Eastern extremity.

Once the mooring integrity has been proven by the analysis, the vessel will be supplied with a copy of the required mooring pattern. The vessel will then be required to deploy her moorings as per this analysis. This mooring pattern is only permitted so long as the vessel complies with the lines and leads used in the mooring analysis. If the Master wishes to deviate from the mooring pattern upon which the analysis was carried out, he must first obtain the express permission of the Terminal and the Harbour Master. It must be stressed however, that permission would not normally be granted. Masters may increase the number of moorings to their requirements, over and above those required by the Terminal.

All mooring lines should be in good condition and without splices in their working length. Mooring ropes should be turned up on the bitts in the figure of eight style.

Masters should not hesitate to increase the number of moorings if the weather is forecast to deteriorate.

Mooring wires/ropes must be spooled in the correct direction on the winch drum, ropes made fast on the drum ends backed up on bitts are not acceptable.

(b) Mooring lines used in any particular direction of service (head/stern lines, breast lines, springs) shall be of similar breaking strength, elasticity and material. Under no circumstances will a mixture of wire and synthetic ropes in the same direction of service and to the same dolphin be acceptable, except moorings additional to the requirements of (a) above.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected.

(d) Once moored, ship's winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

Winch brakes should be tested as per OCIMF Guidelines and Recommendations, which states that they should be tested individually every two years or after completion of any modification or repair involving the winch brakes, or upon any evidence of premature brake slippage or related malfunctions. The Braefoot Bay Supervisor may ask to see records to confirm that such test have been carried out.

(e) Masters of vessels are responsible for ensuring that:

(i) their vessels are safely secured in accordance with the preceeding paragraphs.
(ii) a strict watch is kept on the vessel's moorings and that they are tended as required to prevent slack or overtaut lines and undue movement of the vessel.
(iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose, additionally fixed moorings are correctly wound onto the winch drums.
(iv) sufficient persons are on duty to attend moorings whilst vessel is alongside.

(f) Whilst not removing the responsibility from the Master of ensuring that his vessel is securely moored, regular checks on moorings will be undertaken by the Braefoot Bay Supervisor, accompanied by a Ship's Officer.

(g) Failure of vessels to adequately tend to moorings will be considered as a breach of the Jetty Regulations.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any ship operations commence, a meeting will take place between the Braefoot Terminal Supervisor and the Ship's Master (or his authorised deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safety Inspection in accordance with the O.C.I.M.F. Standards.

(b) Discuss any deficiencies shown up by (a) above and agree any additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:

Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (See "Loading" – Pressure Surges)
Deballasting procedure (See "Ballast")
Vapour return procedure
Cargo line cooldown procedures.
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Shore ESD Pendant.

Ensure that ship has on board data sheets for product being handled

Emergency Procedures (See "Safety").

Assigned smoking areas.

Static precautions.

(d) Check the previous cargo record (last 3 cargoes) and agree that ships' tanks are ready to receive product.

The Companies reserve the right to:

(i) Sample and analyse the condition of ships' tanks or quality of cargo and ballast tanks before commencing to load or discharge.

(ii) Instruct a third party independent surveyor for the sampling and measurement of cargo and/or tanks, the costs of which will be for the account of the Jetty Operating Company.

(iii) Place approved portable equipment on board as required for sampling, testing or communication purposes during loading/discharging operations.

(iv) Refuse to load product and/or accept return vapour when ships' tanks are not within specification for product to be loaded.

(e) The Master shall certify that, in accordance with the cargo plan of operation that has been tabled and discussed, the stress on the vessel's hull will not exceed tha maximum permissible level by the Classification Society and that she will have adequate stability throughout to leave the berth at any time.

BERTHING FACILITIES:

Western Jetty:

Jetty Operating Company: Shell U.K. Exploration and Production.

Manifold Limitations:

LPG/GASOLINE 12 in. 150 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
9.6 – 3.0	19.65	5.15
2.7	13.00	5.15
2.0	8.00	5.15

For multiple 12 in. arm connections, centre-to-centre distances for adjacent connections are minimum 1.3 m. and maximum 3.0 m.

For connection to 8 in. flange manifold, maximum allowable manifold height above waterline is 12.8 m.

LPG 8 in. 300 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
8.6 – 2.0	11.15	1.95

For connection of 2×8 in. arms, centre-to-centre distances for adjacent connections are minimum 0.75 m. and maximum 2.5 m.

N.B. For connection to any arm: Distance between ship's outboard presentation flange and the ship's first manifold piping restraining bracket must not exceed 1,200 mm. to prevent cantilever overstressing of ship's manifold pipework.

Berth Limitations: Maximum LOA 210 m., vessels over 39,000 cu.m. must have had a satisfactory Mooring Analysis carried out by Braefoot Bay Marine Terminal before being accepted as suitable for loading.

Minimum acceptable dimensions are: From mid-point of manifold to bow – 50 m.; from mid-point of manifold to stern – 60 m., provided that adequate moorings can be deployed and the vessel can comply to OCIMF mooring standards.

Product Loading and Vapour Return Facilities: Marine loading arms are capable of liquid or vapour service. Arrangement of loading arms is as follows when viewed from seaward:

West <——> East

Arm No.	7	4	3	2	1	6	5
Size (in.)	8	12	12	12	12	8	8
ASA	150	150	150	150	150	300	300
Duty	Unused	Butane or Gasoline	Butane or Gasoline	Propane	Propane	Butane or Propane	Butane or Propane

Only one loading arm can be designated for liquid duty for each product loaded. Provided vessel's manifold arrangement is suitable, propane and butane may be loaded simultaneously using 12 in. loading arms. For LPG loading, 2 arms will be connected for each product, one for liquid duty and the other for vapour return.

The following loading rates are available:

LPG via 12 in. arm	3,000 cu.m./hr.
LPG via 8 in. arm	1,100 cu.m./hr.
Gasoline via 12 in. arm	2,000 cu.m./hr.

LPG Loading: Product will be delivered to ships in a fully refrigerated state, i.e. Propane −42°C and Butane −4°C.

The operating company, at its sole discretion, will accept vapour return to storage, always subject to quality being acceptable to the company. Vapour samples will be taken from ship's tanks on arrival. Masters must be sure of positive pressure, and provided the following specification is not exceeded, then vapour return to storage will normally be authorised.

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non-condensable gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 1.0% vol. nitrogen
(vi) 10 ppm ammonia
(vii) 10 ppm VCM
(viii) 5 ppm water vapour
(ix) 1 ppm H_2S
(x) 50 ppm methanol
(xi) 100 ppm acetone

Acceptance for vapour return to storage does not imply ship's tanks are suitable for loading from a commercial cargo contamination point of view.

In an emergency or in exceptional circumstances, the use of the shore vapour system to the flare will be permitted for a very limited period to prevent possible venting of cargo vapours to atmosphere. Under n circumstances may the shore vapour system be used if the oxyge content of the vapour contained within the ship's tanks exceeds 4 volume.

Eastern Jetty:

Jetty Operating Company: Exxon Chemical Olefins Incorporated.

Manifold Limitations:

Ethylene: 6 in. 300 ASA flanged presentation arms:

	Max. (m.)	*Min.* (m.)
Manifold height above waterline	11.2	2.75
Manifold set back from ship side	4.6	0.85

For connection of 2 arms, the minimum centre-to-centre adjace connection distance is 0.75 m. and the maximum distance is 1.5 m.

Vapour Return Requirements: Vapour return arm will be connecte before loading operations commence to enable vessels to return vapou to storage tanks or flare. Vapour return may go to flare, always provide the oxygen content of such vapour to flare does not exceed 2.0% b volume maximum, as may be established under the pre-operation meeting/inspection.

Exxon Chemical Olefins Inc., at its sole discretion, may accept vapou return to storage, always subject to the quality being acceptable to Exxo Chemical Olefins Inc. and provided that the last cargo was Ethylene o that the vessel has been purged with Ethylene vapour to the satisfactio of Exxon Chemical Olefins Inc.

Specification for ship's vapour for return to Shore Storage Tanks:

(i)	Ethylene	99.90 min. Mol %
(ii)	Methane and Ethane	1,000 max. Mol ppm
(iii)	Ethane	500 max. Mol ppm
(iv)	Hydrogen	10 max. Mol ppm
(v)	Propylene and Heavy Hydrocarbons	10 max. Mol ppm
(vi)	Acetylene	5 max. Mol ppm
(vii)	Carbon Monoxide	2 max. Mol ppm
(viii)	Carbon Dioxide	5 max. Mol ppm
(ix)	Oxygen	5 max. Mol ppm
(x)	Sulphur	2 max. Mol ppm
(xi)	Ammonia	1 max. Vol ppm
(xii)	Nitrogen	100 max. Vol ppm
(xiii)	Water	10 max. Wt ppm
(xiv)	Solvents	10 max. Vol ppm
(xv)	Oil	Negligible Vol ppm

However, Exxon at its sole discretion may accept vapour return fro any vessel to shore storage provided that the quality of such vapou return is acceptable to Exxon. When appropriate, ships returning vapou to shore storage will be automatically credited for such returns.

Ethylene Loading/Vapour return rates available to ships are, via 6 i loading arms, upto 460 cu.m./hr.

Note: Ethylene is delivered to ships in fully refrigerated sta i.e. approximately −101°C.

There are no cargo heating facilities at this Terminal.

Gasoline/Pentane Plus Product: 1×10 in. 300 ASA flanged presentati arm with a piggy back 6 in. vapour return line suitable for loading gasoli and Pentane Plus Product.

10 in. × 300 ASA – 6 in. 150 ASA
10 in. × 300 ASA – 4 in. 150 ASA

	Max.	Min.
Manifold height above waterline	16.5 m.	1.45 m.
Manifold set back from ship side	4.6 m.	0.85 m.

Maximum loading rate for Gasoline 2,000 cu.m./hr.

Maximum loading rate for Pyegas 550 cu.m./hr.

LOADING:

Marine Loading Arms: All products are delivered to ships via mar loading 'hard arm' units which are individually fitted with Emergen Release Systems (ERS).

The emergency release systems consist of 2 ball valves located abo the presentation flange. Only after closure of the ball valves, will t hydraulic clamp between the ball valves open, leaving one ball va closing off the ship's manifold and the other closing off the loading a The loading arm then returns to a position clear of the vessels's manif

On hearing 'ERS' alarm (an audible oscillating tone accompanied a flashing red beacon) all staff should vacate the vicinity of the manif loading arms. The emergency release system will be manually initia from onshore or AUTOMATICALLY in the case of over extension of loading arms, e.g. if ship drifting outside the loading arm envelope.

Pressure Surge Precautions: Non-routine closing of the loading syste automatic intervention or 'fail-safe' closure of shipboard Emergency S Down (ESD) valves can generate dangerous surge pressures. A ca check of ship's ESD system will be made prior to loading. The Ma (or his deputy) will be asked to operate the system to enable timin the valves and may be requested to have valves adjusted accordi the provisions of the IMO Codes for Ships Carrying Liquified Gase Bulk. The Terminal Operating Companies reserve the right to res loading rates if valve closure times are not compatible with otherwise agreed. Excess loading times caused by such a restrictio be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge press which can be generated and safe emergency shut down wi accomplished by using the shore ESD pendant control provide vessels.

In the event of an emergency the pendant 'ESD' must be activ which will immediately result in:

1. On shore loading valves closure.
2. The stoppage of cargo flow.

Only Then May The Vessel Manually Activate Its Own ESD.

Ships Must Never Close Valves Against The Shore Loading Pu

Those ships, fitted with a SIGGTO Link for linking ship and shore systems, are required to use this when berthed on the Western J

Masters are referred to ICS Safety Guide (Liquified Gas) paras and 4.5.2 and the International Safety Guide for Oil Tankers Terminals paragraphs 6.5.5, 7.3 and 7.6.8 and Appendixes A and

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer. In the event that the vessel does not have the appropriate reducer, a shore reducer may be available. The Terminal must be advised in the pre-arrival message of this requirement. The fitting and removal of the reducer is the responsibility of the ship. The Master must take adequate precautions to ensure the safety of Company workers and ensure that, where necessary, suitable guard rails are provided.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern Jetty, 10 cu.m. at the Western Jetty.)

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations, ship will confirm with the shore at intervals not exceeding 1 hour that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY.

All such displaced vapour must be reliquified on board by ship's systems and/or returned to shore via the vapour line

During loading of liquified gas carriers, the Jetty Operator must be advised of and log the ship's tank pressure every half hour if the vessel is retaining vapours on board, and every hour if vapours are being sent to shore or at the discretion of the Braefoot Bay Supervisor.

In all cases, the LPG vapour return line will be connected and available for pressure relief.

Displaced Gasoline vapour shall only be vented to atmosphere as prescribed in the International Safety Guide for Oil Tankers and Terminals, Sections 3.3.2, 6.2.3 and 7.6.3. Closed loading procedure to be adopted at all times.

(f) During transfer operations:
  (i) An Operator/Technician will remain on the jetty at all times whilst the vessel is alongside.
  (ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times. A portable radio will be provided on loan from the Terminal.
  (iii) A responsible member of the ship's crew capable of understanding and relaying the Jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
    (a) observe the manifold connections
    (b) observe the gangway
    (c) exchange visual/vocal signals with the Jetty Operator/Technician.
    (d) keep a visual check on moorings.
  (iv) The ship must inform the Terminal and the Terminal must advise the ship of any deviation from the agreed Loading/Discharge Plan.
  (v) Ships loading Gasoline must inform the Terminal 15 minutes before topping off any cargo tank.
  (vi) On both jetties, cargo operations will be stopped when a vessel lists at 3°. Vessels MUST maintain an upright condition during loading and take early remedial action to correct any list. Any delays to the loading operation caused by excessive listing will be for the ship's account.
  (vii) On the East Jetty, cargo operations will be stopped when a vessel rolls 2° (e.g. 1° either side of the upright). Cargo operations may be stopped earlier by the Duty Supervisor, should he consider the movement so excessive that it may cause damage to the facility.

(g) At least 5 minutes' notice must be given of transfer rate changes being required, and at least 15 minutes' notice for final completion of loading, except in emergency when the requirements of "Pressure Surge Precautions" (see above) must be observed.

(h) If for any reason there is an unusual evolution or accumulation of gas, loading shall be stopped or the loading rate into a particular tank reduced at the discretion of either the Terminal Supervision or responsible Ship's Officer. This includes sustained wind speeds of less than 5 knots for gasoline tankers venting to atmosphere.

(i) The vessel must by day fly Flag 'B' of the International Code, and by night exhibit an all round red light.

(j) Prior to, and on completion of loading/discharging an Operating Company Representative will witness ship's dips/ullages and obtain from the Master the quantity loaded according to ship's figures.

(k) Operations shall be stopped during electrical storms in the vicinity of the ship and all cargo valves shall be closed.

(l) During periods of high winds and/or on the instruction of either the Harbour Master or Braefoot Bay Supervisor, operations shall be stopped and the loading arms disconnected in accordance with tables (tables are in "Jetty Regulations and Information", supplied to vessel). Wind speeds are measured on the respective jetty anemometer. Suspension of operations will occur when sustained wind speed limits or frequent gusts are experienced.

(m) At suitable intervals (not exceeding 4 hours) with regard to the estimated duration of cargo transfer, the responsible Terminal Representative and Ship's Officer will carry out a repetitive check and confirm that:

The Safety Check List remains valid
Operational procedures are satisfactory
Jetty Regulations are not being contravened.

BALLAST: *Avoidance of Pollution:*

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the terminal, the approaches or in the River and Firth of Forth.

No garbage, or other materials, either liquid or solid shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge of clean, segregated ballast water overboard is permitted subject to approval and/or inspection by the Braefoot Supervisor. It is expected that ships will be exercising ballast water control procedures as described in British Merchant Shipping Notice "M" 1533 and to IMO M.E.P.C. Resolution 50(31), adopted 04/07/91.

The Fort Ports Plc Harbour Master will be informed if inspection, either before or during discharge, shows ballast water is contaminated and such discharge shall immediately cease.

All ballast water other than that contained in segregated ballast tanks shall be retained on board.

DIRTY BALLAST CANNOT BE DISCHARGED AT THIS TERMINAL

(c) Prior to the transfer of any Gasoline, the Anti-Pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs, sawdust or sorbents used for mopping up spillages must be brought ashore for destruction.

(d) Vessels are prohibited from the internal transfer of any oil or slops whilst alongside.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage or spillage has been cleaned up to the satisfaction of the Terminal Supervisor and the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship, without the authority of the Master but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is statutory requirement that any pollution be immediately reported to the Harbour Master.

MEDICAL: Doctors and Hospitals in Kirkcaldy and Inverkeithing.

DENSITY: 1015 – 1025 (depending on rainfall).

FRESH WATER: Potable fresh water is normally available from hydrants at each jetty. Ships requiring water are responsible for supplying and connecting their own hoses to the jetty hydrant as indicated available by the Jetty Operator. Shore technicians will start and stop potable water on West Jetty at ship request.

FUEL: Supply of Bunker Fuel Oil is not possible from the jetties, however, bunkering arrangements can be made at anchorage or, if suitable, from Grangemouth.

CONSULS: See "Leith".

REPAIRS/DRY DOCKS: See "Grangemouth".

AIRPORT: Edinburgh Airport 20 miles.

POLICE/AMBULANCE/FIRE: Control have a direct line.

TELEPHONES: A public telephone is located at the jetty trestleway root. This telephone will only accept phone cards, a supply of which can be purchased from the ship's agent.

Smoking is expressly prohibited in the telephone kiosk, infringements by individuals of this regulation will necessitate withdrawal of the facility.

A public card-operated payphone is located in the Security Gatehouse at the main entrance. There is also a metered telephone available at the Gatehouse for use at the Master's discretion, all charges being authorised by the Master for payment by ship's agent.

STORING: *General cargo, bunkering and stores handling:*

(a) Handling of general cargo is not permitted at the Terminal.

(b) Bunker services are not available to ships ex-jetty.

(c) The handling of ship's stores may be permitted during cargo operations provided the Terminal is given prior notice of the requirement. On arrival, the Braefoot Bay Supervisor and Master will agree the timing for taking stores and any special precautions required, subject to the following:
  (i) the cargo operations remain adequately supervised.
  (ii) any cargo operation which may allow vapours to escape on deck should be stopped whilst stores are being handled, e.g. sampling or disconnection of loading arms.

(d) Flammable or dangerous goods in drums or other containers, liquified gas in cylinders, drums of oil or paint, steel plates and any other heavy metal parts shall not be handled during:
  (i) loading or transfer of LPG, Ethylene or Natural Gasoline.
  (ii) gas-freeing, purging or tank cleaning.
  (iii) whenever loading arms are connected.

(e) Stores items contained within section (d) should not be landed directly onto a vessel's steel deck. Rubber or suitable matting should be used to prevent possible spark generation. At no time may drums or gas cylinders be rolled along the deck or jetty.

(f) The jetty cranes are for hose-handling and other jetty purposes. They may only be operated by Terminal staff and may only assist in loading items of ship's stores, provided that Terminal staff are available to operate a crane without detriment to their other duties.

(g) Under no circumstances will stores delivery vehicles be allowed on the jetty head or approach beyond the designated points for setting down ship's stores. One vehicle at a time is permitted to visit a vessel. Other vehicles scheduled to deliver stores must queue outside the main gate until given permission to enter. All delivery vehicles are to be parked as directed by Terminal staff, such that access for the Emergency Services is not obstructed.

(h) The size and weight of ship's stores delivered by road vehicle are to be such that they can always be physically manhandled and carted between set-down point and ship by delivery staff or ship's crew. Larger deliveries of stores and heavy items of equipment may be loaded from a barge by arrangement with agents and subject to Regulation 15.

(i) Delays due to storing are for vessel's account where lay/port time is exceeded.

GARBAGE DISPOSAL: The terminal provides facilities for the reception and disposal of ship's garbage. Under SI.1988 No.2293, "Garbage" is defined as all kinds of victual, domestic and operational waste, excluding fresh fish and parts thereof, generated during the normal operation of the ship and liable to be disposed of continuously or periodically, except sewage originating from ships.

To comply with the regulations, the following arrangements have been made:

(a) 6 Eurobins (capacity 1.1 cu.m.) are positioned at the jetty root for the disposal of double bagged and tied food waste. Additionally one mini-skip has been placed with the above disposal of solid waste, e.g. general rubbish but *not food waste*.

(b) All garbage must be double-bagged and sealed. A stock of heavy-duty plastic bags and ties are held and issued on request to vessels requiring to land garbage.

(c) After berthing, vessel confirms request to land garbage by completing relevant section in Ship/Shore Check List. All garbage must be sealed and labelled as to their contents. No leaking or open bags will be acceptable and cost of cleaning shore facilities in the event of spillage will be passed on to vessel. Garbage bags must not be thrown from the ship onto the jetty. They must be either hand-carried or the shore crane utilised before loading arms are connected or after loading arms are disconnected.

Note: Vessels requiring to dispose of hypodermic needles, pharmaceutical compounds, pyrotechnics, etc., must make special arrangements through their Agents.

(d) Ship's crew must collect the Eurobins from the jetty root area and return them there after completion of landing garbage. The bins should not be filled to such extent that the covers will not close.

(e) The Eurobins are mounted on wheels for easy transportation.

WASTE OIL DISPOSAL: The terminal regulations state that:

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the Terminal, the approaches or in the River and Firth of Forth.

No garbage or other materials, either liquid or solid, shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge of clean, segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection, either before or during discharge, shows ballast water is contaminated and such discharge shall immediately cease.

All ballast water other than that contained in segregated ballast tanks shall be retained on board.

(c) By arrangement with the Terminal Supervisor, oily residues and bilge slops may be discharged ashore provided that such discharge is not concurrent with product transfer and that delays so incurred are for ship's account if port time/lay time is exceeded.

(d) Prior to oil (including natural gasoline) or slops transfer, the anti-pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

(e) Vessels are prohibited from the internal transfer of oil whilst alongside.

(f) Dirty ballast cannot be discharged at this Terminal.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage has been cleaned up to his satisfaction and that of the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship without the authority of the Master, but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is a statutory requirement that any pollution be immediately reported to the Harbour Master.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

SAFETY: *Emergency Signals:*

(a) Fire and onshore emergency alarm.
1. At the Western Jetty: Intermittent siren.
2. At the Eastern Jetty: Continuous sound for 30 seconds.

In the event of siren failure alarm will be sounded by air horns.

(b) Onshore emergency (other than fire).
1. At the Western Jetty: Air Horns.
2. At the Eastern Jetty: Continuous warble for 30 seconds.

(c) Shipboard emergency (or reported from ship): At least 6 blasts, each of not less than 10 seconds duration.

NOTE: Onshore, alarm may be raised by activating one of the "Break Glass" fire alarms situated at numerous points throughout the terminal – this will also automatically activate the jetty spray systems.

Actions in Event of Emergency:

Ashore: Sound alarm signal.
Terminal staff will communicate with you via:
1. The UHF portable radio (supplied on arrival).
2. The jetty operator.
3. The jetty loudspeaker system.
4. The Marine VHF Channel 16.

In any emergency, terminal staff will shut down loading operations, may activate fixed water spray system and implement the Terminal Emergency Plan as appropriate to the incident:

Aboard: Sound alarm signal.
Inform terminal by communications systems as listed above.
You must be prepared to:
1. Cease all cargo operations.
2. Close all cargo valves.
3. Disconnect ship to shore pipelines (shore hard loading arms may be emergency disconnected by terminal staff).
4. Move your ship (engines to immediate readiness) subjec the overriding control of the Harbour Master.

Emergency Towing Wires: Emergency towing wires of adequate streng and condition must be positioned on both the offshore bow and quart of the ship with the towing eyes maintained just above water level.

They must be properly made fast on the ship's bollards while havin sufficient slack flaked out on deck for effective towing, the slack bein secured from running free by rope yarns or other easily broken mean

Emergency Precautions: In order to meet emergencies ships must:

(a) Retain sufficient suitable crew members on board at all times t man emergency services and to move the ship if so directed by Termin or Port Authority personnel.

(b) Have adequate emergency equipment and fire fightin appliances, including main emergency fire pumps, ready for immedia use. Fire main to be pressurised *before berthing* and for the duration o berth occupancy. The appliances will include at least:

(i) Two fire hoses, fitted with jet/spray nozzles, uncoiled an connected to the fire main on the main deck.

(ii) Portable fire extinguishers, of the dry chemical typ conveniently placed near the ship's fire manifold.

(iii) An International Ship/Shore Connection available and *clea signposted* at an agreed position on the ship's fire main for read connection to the shore main.

(iv) Where a vessel is equipped with a fixed dry powder syste hoses should be run out and control boxes open for access.

(v) The ship's offshore lifeboat shall be rigged ready for lowerin and use as an emergency escape.

(vi) A pilot ladder or accommodation ladder shall be rigged positioned on the outboard side of the vessel ready f immediate lowering as a means of escape in the event of a emergency.

In the event of an emergency, the Master must proceed as agreed the "Pre-Operations Meeting and Inspection".

State of Readiness and Engine Immobilisation:

(a) The ship must be able to move under its own power at sho notice.

(b) Repairs or other work which may immobilise the vessel are n allowed. If unavoidable breakdown occurs, then repairs may be allowe alongside provided approval is given in writing by the Braefoot Ba Supervisor who shall also obtain the Harbour Master's agreement a is conditional on the Master hiring sufficient standby tugs to move t vessel if so required.

(c) Should immobilisation as in (b) above occur, the respective je Operating Companies reserve the right to order tug or tugs as abo on the Master's behalf.

(d) *Engines are not to be tested whilst hard-arms are connected a or the gangway is on deck.*

Vehicle and Personnel Access and Security:

(a) Only authorised persons or those with entry permits issued b the Terminal Management will be allowed through the terminal secu gates.

Ship's personnel must have a temporary pass for clearance with t security guard at the entrance gate.

Masters will be provided with a supply of suitable pass envelopes the Braefoot Bay Supervisor. The Master or ship's Agent is require furnish a list of chandlers, services, new crew members and authoris visitors expected during the ship's stay at the terminal. Ship's agen required to provide Security staff with a crew list as soon as possi after berthing.

Persons who have not been authorised or notified as above wil refused entry to the terminal until the Security Guard has been gi clearance from the Braefoot Bay Supervisor.

(b) As pedestrians (other than plant employees and authoris personnel) are not allowed passage through the terminal, transpor the main gate will be provided by Security staff on request from the j root (Western Jetty) or the safety boat landing (Eastern Jetty), by cal "Braefoot Control" on the radios provided.

(c) Visiting vehicles are not normally allowed beyond the gateho parking area and must not proceed onto the jetty trestleways wi the express permission of the Braefoot Bay Supervisor. No vehicle proceed past any "NO ENTRY" sign indicating that Class A petrol is being handled or that petroleum vapour may be present.

Vehicles and their contents which are permitted to enter the Ma Terminal do so at the owners' risk and drivers must obey all traffic s plant traffic regulations, or directions given by Terminal Staff. S vehicles shall not be parked in position obstructing fire hydrants, road alarms or other traffic. If parked, keys will be left in ignition, the ig switched off and the doors unlocked. If required, any unattended ve may be moved by Terminal Staff.

(d) In the interests of Safety and Security any vehicle or pe entering or leaving the terminal is liable to be searched for contra material or unauthorised persons. Acceptance of this requiremen condition of entry. Persons who appear to be under the influen alcohol or drugs will not be allowed access to or from ships at the ter unless escorted by a responsible Ship's Officer.

Personnel Access to/from Ships:

(a) When available, access between jetty and vessel will be pro by the Company by means of a gangway tower structure. The ope of such gangway will be the responsibility of the jetty Ope Company, but Masters shall ensure that personnel can safely tr between the ship's main deck and the gangway. When, for any re the gangway tower is not available, Masters of vessels shall pro means of safe access between jetty and ship, which shall necessary include an upper platform and bulwark ladder to provid access to the ship's deck. The means of access shall be provide stanchions, guard ropes, securing lines and safety netting, sh adequately illuminated and shall be maintained in a clean and well condition.

A lifebuoy with at least 25 m. of lifeline attached shall be positioned on the vessel near the gangway.

(b) No person other than H.M. Customs and Excise, Port Health Authorities, Pilots or other H.M. Customs Authorised personnel is allowed to board or disembark from a vessel berthing at the Marine Terminal from a foreign port until Clearance and the Master's permission has been obtained.

(c) Boarding and disembarking shall be by gangway only except in emergency.

Scuppers and Drip Trays: During transfer of gasoline and slops, deck scuppers and drain holes must be suitably plugged and accumulated water drained off as required. Scuppers should otherwise remain open during LPG loading operations.

Drip trays must be placed under connections and likewise drained of accumulated water.

Prior to transfer of any oil product the ANTI-POLLUTION CHECK LIST MUST BE COMPLETED.

Portable R/T Sets, Hand Lamps and Electrical Equipment: Portable R/T sets, lamps and hand lamps, electric or otherwise shall not be used unless of an approved type (e.g. B.A.S.E.E.F.A.).

The use of portable electric lamps and equipment on wandering electric cables is prohibited in any cargo or adjacent ballast space, pumproom, compressor room, cofferdam, bunker compartment, hold or anywhere over the cargo tanks.

Portable domestic radios, photographic flash equipment, electronic calculators, tape recorders or any other battery powered equipment of non-approved type shall not be used on the main deck nor in any other place where petroleum gases may be encountered. Mobile telephones may be transported through the Terminal to the ship for use in an approved area providing all battery power is disconnected and transported separately during the transit.

Ship's Radio and Radar Equipment: Except for VHF and UHF communications (with radiated power of 1 watt or less), ship's main radio station, including emergency transmitters, shall not be used while the ship is within 400 m. of the Terminal. While berthed at the Terminal, the transmitting aerials shall be disconnected and earthed.

It is *prohibited* to operate ship-borne radar having a *peak pulse in excess of 60 kW.* within the following distances of the Terminal:

1. Radar operating below 2 GHz – 400 metres.
2. Radar operating above 2 GHz – 200 metres.

The preceding prohibitions and restrictions do not preclude the testing of a vessel's normal communications transmitter operating on a frequency between 415 kHz and 26 kHz or ship-borne radar with a peak pulse power exceeding 60 kW in the area of the Terminal, providing the vessel's associated electrical equipment does not present a source of ignition, *and that the express permission of the Harbour Master and Marine Superintendent have been obtained prior to testing.*

Repair Work: Repair work involving either hot or cold work or the use of naked lights is prohibited unless the permission of the Braefoot Bay Supervisor has been requested and granted in writing and the conditions and precautions required by the Braefoot Bay Supervisor are rigidly observed.

Repair work includes but is not restricted to boiler tube clearing, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar and radio installations).

If permission is granted a list of shore workmen employed on the vessel must be given to the Braefoot Bay Supervisor before work commences.

(The Harbour Master's permission is also required in the case of hot work and certain repair work including test transmissions of radio or radar equipment.)

Tank Cleaning/Gas Freeing: Tank cleaning, inerting, purging or gas freeing *may not* be carried out at this terminal. In unavoidable and exceptional cases, and then under specific circumstances, approval in writing may be granted in advance or under a repair work permit as in "Repair Work" above.

Movements of Tugs and Other Craft: During berthing, unberthing and cargo handling operations no vessel or small craft shall be allowed alongside the vessel unless authorised by the Braefoot Bay Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless tanks are gas free.

GENERAL:

Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports PLC is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports PLC, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb, with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel's Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through *"Shell Braefoot Control" for vessels on the Western Jetty and through "Exxon Braefoot Control" for vessels on the Eastern Jetty.*

Klaxon: The Western Jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.

2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.

3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.

4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.

5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.

6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.

7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (Updated 1996).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5' N., 03° 00' W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channel 69.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 4 tugs are available, 1×50 tonnes bollard pull, 1×30 tonnes bollard pull and 2×19 tonnes bollard pull.

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: Not available.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation. Braefoot security provide transport to the main gate when necessary.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding (Normally done by ship's Agent).

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife KY4 8EL. *Tel:* (01383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* (01383) 892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor. Captain P.W. Marsland, Day Co-ordinator.

BRIDGWATER (including Dunball and Combwich Wharves): 51.10 N. 03.00 W. **(See Plan)**

PORT LIMITS: Bridgwater Bay, from Brean Dawn to Hinkley Point, and River Parrett to Bridgwater Town.

DOCUMENTS:

2 copies Crew List.
2 copies Passenger List.
2 copies Master's Declaration C.13.
2 copies Arms and Ammunition List.
1 copy Health Declaration.
1 copy Derat Certificate.
1 copy Load Line Certificate.
1 copy Tonnage Certificate.
1 copy Nationality Certificate.
1 copy Safety Equipment Certificate.

1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).
In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the Pilot Station.

From the English and Welsh Grounds Lightbuoy inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots. The channel, however, is well buoyed.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over and for vessels carrying dangerous substances in bulk of 70 m. LOA and over.

Boarding and landing station is one mile North of Breaksea Lightfloat. Pilots board from 50 ft. motor pilot boat, black hull, white superstructure, "Bristol and Gloucester Pilots" in white letters amidships, operating from Barry Harbour. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0117) 9822257. Fax: (0117) 9235320. Telegraphic Address: "Brispilot Avonmouth". Details of rates and other particulars available from Haven Master, R.E. Dock Entrance, Avonmouth.

Pilotage is from sea to berth and vice versa.

ANCHORAGES: Barry Road affords good anchorage in moderate weather for small vessels awaiting a Pilot. Large vessels should anchor West of Breaksea, clear of pilot boarding area.

RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW.

MAX. SIZE: *Royal Portbury:* Max. length 300 m., max. beam 41.5 m., draft 14.5 m.
Royal Edward: Max. length 200 m., max. beam 30.1 m., draft 11.0 m.
Avonmouth Dock: Max. length 170.7 m., max. beam 22.9 m.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: See Admiralty List of Radio Signals, Volume 1.
Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel: (0117) 9822257 or by Fax: (0117) 9235320 or by Telex: 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".

VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lightfloat, English and Welsh Grounds Lightbuoy and Welsh Hook Buoy. Radar coverage of all port approaches maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Large ships for Royal Portbury Dock are normally met by tugs West of Portishead and other vessels in King Road.

Ships for Royal Edward Dock docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

The port is owned and operated by First Corporate Shipping Ltd. trading as the Bristol Port Company. The Bristol Port Company is the statutory harbour authority for the commercial port and its tidal approaches.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipeline systems. The LPG berth is in the oil basin.

Other berths are equipped to handle forest products (crane discharge), bulk commodities, animal feedstuffs, metals and general cargo. There are dedicated berths for the Bell Line Container Terminal, food grains, cement, sulphuric acid and dredged aggregates.

Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 100,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 are predominantly dedicated to car and vehicle imports and exports, and can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offer fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 100 acres.

The Bristol Port Co., in a joint venture with National Power, has built and commissioned the most advanced bulk terminal in Europe on Berths No. 5 and 6. The bulk stockyard is connected to a rail loading facility at Avonmouth via a tunnel under the River Avon. The bulk terminal is capable of handling animal feedstuffs direct to 2 major new storage warehouses located on Berth No. 5, operated as a joint venture by the Bristol Port Co. and Tate & Lyle Ltd.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. Proton Cars of Malaysia has its new U.K. Headquarters on the Portbury Estate.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.

FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: Approval needed to carry out hot work on board or on the adjacent quay. Special regulations apply in the oil basin.

CONSULS:

Belgian Consul
Chilean Consul
Danish Consul
French Consular Agent
Finnish Vice Consul
German Consul
Greek Consul
Italian Consular Agent
Netherlands Vice Consul
Norwegian Vice Consul
Spanish Vice Consul
Swedish Vice Consul

REPAIRS: Most types of repairs are carried out. Contact Avonmouth Ship Repairers Ltd., Royal Edward Dock, Avonmouth, Bristol. Tel: (0117) 9820615.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES: Load Line Certificate, Safety Equipment Certificate, Lloyd's Construction Certificate, Derat Certificate, Ship's Register, Light Bills, Safety Radio Certificate.

CUSTOMS ALLOWANCES: Current allowance for crew members of British and foreign ships in British waters available on request from H.M.Customs.

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, except 25th December.

POLICE/AMBULANCE/FIRE: *Royal Portbury and Avonmouth Docks:* Dock services can be contacted by dialling 4444 on port's exchange or 820000, Extension 4510, on British Telecom exchange.

Otherwise dial 999 on British Telecom. Exchange for national emergency services.

MARINE RESCUE CO-ORDINATION CENTRE: H.M. Coastguard, Mumbles, Swansea, West Glamorgan. Tel: (01792) 366534, 367761.

GENERAL: Port little used by commercial shipping.

GARBAGE DISPOSAL: By arrangement.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30' (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30' (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.

SEAMAN'S CLUBS: Nearest seamans clubs are in Belfast, 12 miles distant. Mission to Seamen and Stella Maris.
CURRENCY: U.K.Pound (U.K.£).
SHORE LEAVE: After clearing inwards no restriction on shore leave.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Carrickfergus Borough Council and Harbour Master, Town Hall, Carrickfergus, Co. Antrim BT38 7DN. *Tel:* (019603) 51604 (Council), 51292 (Harbour Master). *FAX:* (019603) 66676 (Harbour Master). *Contact:* Captain R.S. Heddles, Harbour Master/Manager.

CASTLETOWN, Isle of Man: 54.04 N. 04.39 W.

PORT LIMITS: Castletown Bay, North of line between Scarlet Point and Langness Lighthouse.
DOCUMENTS: Same as U.K.
PILOTAGE: Not compulsory. If required, Pilot will board East of can buoy in bay.
ANCHORAGE: About 2 cables East of red can buoy. Exposed to S.-S.W.'ly weather.
RESTRICTIONS: Berthing at HW only. Max. draft 11.5 ft. Springs, 9.5 ft. Neaps.
MAX. SIZE: LOA 170 ft., beam 27.5 ft., draft subject to tides.
HEALTH: Same as U.K. ports.
VHF: Calling Channel 16, working Channel 12. Listening only when vessels due.
TUGS: None.
BERTHING: 2 berths, 170 ft. max. length. All dry out.
CRANES: Mobile crane, SWL up to 25 tonnes available.
BRIDGES: At entrance to Inner Harbour. Opened on request.
STEVEDORES: 24 hours notice should be given to Agent.
MEDICAL: Full hospital facilities available.
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available ex-hydrant at all berths.
FUEL: Diesel available by road tanker.
FIRE PRECAUTIONS: Usual.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: None.
SURVEYORS: I.O.M. Department of Transport, Marine Administration. Tel: (01624) 686643. Fax: (01624) 627238.
HATCHES: Crew or stevedores to operate hatches.
CUSTOMS ALLOWANCES: Same as U.K.
CARGO GEAR: Ship's gear or mobile crane used.
AIRPORT: 2 miles away. Daily flights to U.K. and Eire.
TIME: GMT and BST.
HOLIDAYS: December 25th and 26th, January 1st and 2nd, Go Friday, Easter Monday, Spring Bank Holiday, July 5th and August Ba Holiday.
POLICE/AMBULANCE/FIRE: Police – Tel: (01624) 8222 Ambulance/ Fire – Tel: 999.
EMERGENCY CO-ORDINATION CENTRE: Liverpool Coastgua Tel: (0151) 9313341.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book sufficient.
AUTHORITY: Department of Transport, Harbours Division, S Terminal Building, Douglas, Isle of Man IM1 2RF. *Tel:* (01624) 6866 *FAX:* (01624) 626403. *Contact:* Captain E.E. Kaighin, Director Harbours.

Castletown Harbour is administered from Port St. Mary Harbo (Tel/Fax: (01624) 833206). See "Port St. Mary".

CLYDE PORT (Including Glasgow, Greenock, Finnart a Hunterston): 55.51 N. 04.16 W. **(See Pla**

PORT LIMITS: For limits of jurisdiction see "Plans" – "Firth of Cly and Sea Lochs".
DOCUMENTS: Following required on arrival:

3 Crew Lists on IMO Standard Form.
3 General Declarations. Customs Form C13.
3 Ships Stores Declarations. Customs Form C14.
2 Cargo Manifests. Customs Form C16.
1 Personal Effects Declaration. Customs Form C142.
Declaration of Health.
Bills of Lading.
Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Derat or Derat Exemption Certificate.

PILOTAGE: Compulsory pilotage.

1. *The Seaward Limit of Compulsory Pilotage* means an imaginary commencing at the intersection of the line of Longitude 05° 06' with the North shore of Loch Striven, and then proceeding due So to the North shore of the Island of Bute, and by the same line Longitude, from the South shore of the Island of Bute, to the Latitu of Gull Point on Little Cumbrae Island; thence by a line extend due East (T) to Gull Point; thence by a line proceeding in the direct 143° (T) for a distance of 7 nautical miles; and thence by a l proceeding in the direction 053° (T) to the Northern boundary of Harbour of Saltcoats.

   The Landward Limit of Compulsory Pilotage means the West s of Albert Bridge in the City of Glasgow.

   The Inner Pilotage Area means that part of the River and Firt Clyde, including Greenock. The navigable river channels Garelo Loch Long and Loch Goil contained within an imaginary line fr Kempock Point proceeding in the direction 295°(T) to Strone Po

   The Outer Pilotage Area means that part of the Firth of Clyde, H Loch and Loch Striven within the area bounded by an imaginary from Kempock Point proceeding in the direction 295°(T) to Str Point and The Seaward Limit of Compulsory Pilotage.

   The Compulsory Pilotage District means that part of the area jurisdiction of the Clydeport Ltd. as defined in the Clydeport Autho Confirmation Act 1965 and subsequent amendment(s) contai between the seaward limit of Compulsory Pilotage and the landw limit of Compulsory Pilotage.
2. The following vessels will be required to engage the services o authorised Clyde Pilot when navigating within the Compu Pilotage Area of Clydeport.
   (a) Vessels over 80 m. length overall (LOA), carrying danger substances as defined in the Dangerous Substances in Har Areas, Regulations 1987, in bulk and all vessels which are Gas Free.
   (b) All vessels of 25 m. length overall (LOA), carrying in exce 12 passengers.

Note: Passenger vessels as above (b) proceeding to Loch Fyne or K of Bute will also require the services of a licensed Pilot.

3. A vessel not carrying passengers navigating within the Compu Pilotage Areas and complying with the following conditions sh exempt from Compulsory Pilotage.

   In the Inner Pilotage Area:
   (a) Vessels not exceeding 70 m. length overall (LOA).
   (b) Vessels not exceeding 60 m. length overall (LOA) proce East of No. 1 Buoy.
   (c) Vessels under tow, dumb barges, etc., when proceeding of No. 1 Buoy not exceeding 35 m. length overall (LOA)

In the Outer Pilotage Area:

(a) All vessels up to 120 m. length overall (LOA) transiting the area. Vessels up to 80 m. length overall (LOA) proceeding to Hunterston, Loch Strivan, Inverkip, or other berths or anchorages within the Outer Pilotage Area.

(b) Ardrossan, vessels not exceeding 100 m. length overall (LOA).

4. In the event of the Master or First Mate of any of above vessels holding a current Pilotage Exemption Certificate issued by Clydeport, the services of an Authorised Clyde Pilot will not be required unless requested and available.

5. *Voluntary Pilotage:*
If requested and subject to the services of a Pilot being on offer, any vessel may request pilotage when navigating within the jurisdiction of Clydeport.

6. The Clydeport directs that vessels, which are subject to Compulsory Pilotage or request voluntary pilotage as aforementioned, shall:

(1) Give such notice of estimated time of arrival or departure as may be required by Clydeport Notice to Mariners or other appropriate notification. Failure to provide such notice, or failure to arrive or depart within 2 hours of the notified time, will be penalised by a charge in accordance with that specified in the Clydeport Schedule of Charges.

(2) Board or disembark a Pilot at a previously arranged location determined by the Pilotage Area to be served and weather conditions prevailing.

ANCHORAGES: Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

Anchorages are allocated by Clyde Port Estuary Radio. The anchorage positions are shown on Admiralty Charts Nos. 1907 and 1994.

RESTRICTIONS: Vessels entering the river channel are restricted to a maximum fresh water draft of 9.7 m. Entry time for deeply laden vessels is dependent on the rise of tide.

Damaged vessels and vessels that are not in class must have a current Seaworthy Certificate and prior permission from the Harbour Master before entering the area of jurisdiction of the port.

MAX. SIZE: As agreed by Clydeport Ltd. for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: Masters should report by radio to "Porthealth Glasgow" any infectious illness which has occurred, or which has been suspected, during the voyage.

Also see "Health – All Ports" before first U.K. port.

RADIO: Traffic should be routed through any British coast station.

VHF: Clyde Port Estuary on Channels 16, 14, 12 and 11 for all communications regarding pilotage and navigation.

RADAR: There is no port radar.

TUGS: As required by Master and under advice of the Marine Management. Tug's lines are always used.

BERTHING: *General, Bulk, Scrap and Project Cargoes:* Discharged and loaded at Shieldhall Riverside Quay and King George V Dock, Glasgow.

Bulk Cargoes, Forest Products, Container and Ro-Ro Vessels: Handled at Greenock Terminal where 2 ships can work simultaneously. Berth is equipped with 1×40 ton and 2×35 ton transporter cranes with an outreach of 105 ft. beyond the line of the cope. The quay is 1,200 ft. long with a depth of 12.6 m. at Chart Datum.

Ro-Ro Units: Can be handled at King George V Dock, Glasgow and at James Watt Dock and Garvel Basin, Greenock.

BULK HANDLING FACILITIES: Iron ore and coal are handled at Clydeport Hunterston Terminal where discharging vessels up to 350,000 d.w.t. and loading vessels up to 70,000 d.w.tonnes can be accommodated. Depth alongside up to 29 m. Max. draft 26.0 m. 2 unloaders, rates up to 3,000 tonnes per hour for ore and 1,000 tonnes per hour for coal.

Scrap iron and minerals are handled at Rothesay Dock (Clydebank) where vessels up to 535 ft. in length with a draft up to 9.4 m. in fresh water may be accommodated. With prior arrangement vessel in excess of 535 ft. may be accepted. Product tankers are also handled within this dock.

Bulk molasses is handled at a berth within the Great Harbour Greenock. Vessels using this berth are restricted to a fresh water draft of 7.1 m.

Bulk cargoes are grab discharged at Meadowside Quay (Glasgow) to shore transport. Max. draft for vessels using Meadowside Quay is 9.7 m. in fresh water.

CRANES: Cranes presently in use by Clydeport Ltd. at Glasgow are: 2×10 tons, 1×25 tons, 1×30 tons, 1×35 tons, 1×160 tons.

BRIDGES: Erskine Bridge, which spans the navigable river channel, has a 59.92 m. on centre line, clearance above chart datum 1975.

STEVEDORES: Arranged by ship's Agent in accordance with Master's advice of ETA.

MEDICAL: Full medical and hospital facilities available.

TANKERS: BP Oil Ltd.: Privately operated crude oil terminal at Finnart.

The terminal is located on the East side of Loch Long (Lat. 56° 07' N., Long. 04° 50' W.) 25 miles from the Pilot Station off Little Cumbrae. There are 2 berths of which No. 3 accommodates about 300,000 d.w.t. tankers with a max. draft 75 ft. and No. 2 Berth, to the S.W., is used for about 200,000 d.w.t. with a max. draft 54.5 ft. and smaller tankers.

Berth Approach and Berthing: The berths are well sheltered, the water in Loch Long is deep and, with little tidal flow, berthing can be done at any state of the tide.

Berthing is done only in daylight, but ships can sail at any time. Vessels are turned about 0.5 miles seaward with tug assistance and backed up to the berth port side to, head out.

Tugs push on the off-shore side to breast the vessel alongside until secured.

Moorings: Ship's moorings are landed by launches. The usual pattern of moorings at Berth No. 3 is 5 head ropes, 5 stern ropes, 1 ship's breast rope at each end and 2 backsprings at each end to the jetty head. A 5.5 in. wire with "braidline" tail is provided by the shore as an additional breast mooring at each end. All ship's ropes are secured to quick release hooks.

At Berth No. 2 vessels secure to bollards with 4 head ropes, 4 stern ropes and 1 backspring at each end to the jetty head. A shore wire is provided at each end as a breast mooring.

Gangway: At Berth No. 3 a shore gangway is provided. At Berth No. 2 the ship must provide a safe gangway. Access to and from the ship must be by the gangway only.

Limitation on Height of Ship's Manifold: Prior notice must be given to the terminal if the height of the ship's manifold will exceed 68 ft. above waterline.

Cargo Handling: Each berth has the following Woodfield Combination hose/booms: 4 for crude oil (10 in. on Berth No. 2, 16 in. on Berth No. 3), and 2 for fuel oil imports and bunkering (8 in. on Berth No. 2, 10 in. on Berth No. 3). These connect with tankfarm by 2×12 in. fuel oil pipelines and 14×12 in., 24 in., 42 in. crude oil pipelines.

The maximum pressure allowed is 200 p.s.i.

There are facilities for loading lube oils.

Ballast and Slops: There is no facility for receiving dirty ballast or slops at the terminal. The tank cleaning berth at Greenock is no longer in operation.

Density of Water: The specific gravity averages 1.012 at the berths.

Services: No bunkers are available over the jetty. Ample prior notice is required for delivery by barge. Fuel and diesel oils are delivered by a barge with a fuel oil capacity of 440 tons and a diesel oil capacity of 118 tons. A 6 in. hose is used and the barge delivers both grades at 100 t.p.h.

Fresh water, of good soft quality, is piped to the berths at 50 t.p.h. Maximum quantity is 500 tons.

Normal domestic services, stores, laundry, etc. may be handled over the jetty with permission of the Terminal Authority.

A 1.5 ton crane is available for use at the berths.

A coin-operated telephone will be put on board, upon request.

Esso: Located at Bowling. This is a privately owned product distribution terminal, located 11 miles from Kempock Point and 9 miles up the River Clyde on the North Bank. The terminal is now supplied by land pipeline. The tanker berth is currently non-operational.

DENSITY: Glasgow – Fresh; Greenock – Brackish; Hunterston – Salt.

FRESH WATER: Available by hose at all berths operated by Clydeport Ltd.

FUEL: Most major oil companies are represented in Glasgow. All grades of bunker oil can be supplied by road tanker and by pipeline at Bowling Terminal.

FIRE PRECAUTIONS: Masters of vessels at the Authority's berths are given, on arrival, a copy of the Port Regulations and Emergency Procedures.

Oil tanker berths are privately owned and the operators issue their own Fire Regulations.

CONSULS:

Belgium
Brazil
Canada
Cyprus
Denmark
Domincan Republic
Ecuador
Finland
Gambia
Germany
Greece
Iceland
India
Italy
Netherlands
Norway
Panama
Peru
Philippines
Poland
Portugal
Spain
South Africa
Sweden
Thailand
Uruguay

REPAIRS: All types of repairs can be effected in the area.

DRY DOCKS: Largest dry dock is 1,000 ft. long with 145 ft. clear width at entrance.

In addition there are 4 other smaller dry docks in the Glasgow and Greenock area and 2 Patent slipways at Renfrew (1×1,000 tons and 1×125 tons).

SURVEYORS: The following are represented in the area: Lloyd's Register of Shipping, Norske Veritas Register of Shipping, Bureau Veritas Register of Shipping, American Bureau of Shipping, The Salvage Association.

In addition, a number of independent marine and cargo surveyors are available.

GANGWAY/DECK WATCHMEN: Shore watchmen are available from private contractors but need only be engaged at the discretion of the Master.

HATCHES: Opening and closing of hatches may be carried out by ship's crew.

CUSTOMS ALLOWANCES: Standard United Kingdom allowances.

CARGO GEAR: Under normal circumstances, cargo is handled by shore equipment.

REPATRIATION: Repatriation can be arranged to all countries.

AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are both served by a number of major airlines.

Air UK have flights from Glasgow to Amsterdam and London (Gatwick and Stanstead).

TIME: GMT, but British Summer Time (1 hour ahead of GMT) in force during the Summer.

HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority, on request.

POLICE/AMBULANCE/FIRE: Can be called on the public telephone system by dialling 999 or by contacting Clyde Port Estuary Radio on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coast Guard (Marine Rescue and Co-Ordination Centre), Navy Buildings, Eldon Street, Greenock. Tel: (01475) 729988. Fax: (01475) 786955. Telex: 777006.

TELEPHONES: British Telecom can supply telephones at most berths. Agent will arrange and advise costs.

SERVICES: Facilities are available for repairs and service to radio equipment and navigation aids. A compass adjuster is based at Glasgow.

There are no facilities for cleaning oil tankers, but small quantities of oil/sludge may be removed by road vehicles.

BANKS: All National and many European and International banks have branches in Glasgow.
SHIP SUPPLY SERVICE: *Surface Craft:* Clyde Marine Motoring Co. Ltd., Princes Pier, Greenock, Renfrewshire.
Clyde Shipping Tugs Ltd., Clydesdale Bank Building, Greenock, Renfrewshire.
Cory Ship Towage (Clyde) Ltd., 12 Brymer Street, Greenock, Renfrewshire.
Maritime Craft Services (Clyde) Ltd., 87 Main Street, Fairlie, Ayrshire.
R. Ritchie, Esq., Royal Street, Gourock, Renfrewshire.
Talisman Offshore Services, 46 Cambusdoon Place, Kilwinning, Ayrshire.
Helicopters: Air Charter (Scotland) Ltd., Glasgow Airport, Paisley.
Burnthills Aviation Ltd., Glasgow Airport, Paisley.
McAlpine Helicopters Ltd., Glasgow Airport, Paisley.
SHORE LEAVE: Shore leave is at Master's discretion.
IDENTIFICATION CARDS: Not required to be carried.
GARBAGE DISPOSAL: Disposal carried out by contractors with covered skips.
WASTE OIL DISPOSAL: Disposal carried out by contractors with road tankers.
SEAMAN'S CLUBS: Stella Maris Guest House, 10 Hillhead Street, Glasgow. Tel: (0141) 3392494.
CURRENCY: U.K.Pound (U.K.£).
REGULATIONS: Special regulations apply to the handling and transit of explosives.

There are special requirements in force regarding the production of a gas free certificate for OBO and ore/oil vessels calling at Clydeport Hunterston Terminal.

It is a requirement of Clydeport Ltd. that every vessel in excess of 1,600 g.r.t., constructed or adapted for the carriage of oil, chemicals or gas in bulk, complies with the reporting procedures as specified in Merchant Shipping Notice No. M1630 reporting requirements for vessels bound for or leaving Community ports and carrying dangerous and polluting goods (European Council Directive 93/75/EEC), and general requirement for United Kingdom ships carrying dangerous or polluting goods.
AUTHORITY: Clydeport Operations Ltd., 16 Robertson Street, Glasgow G2 8DS. *Tel:* (0141) 2218733. *FAX:* (0141) 2483167. *Contact:* J. Mather, Chairman and Chief Executive. Captain W. Gillespie, General Manager Marine.

COLCHESTER: 51.54 N. 00.55 E. (See Plan)

PORT LIMITS: Colne Point – No. 1 Buoy.
DOCUMENTS: As normal British port.
PILOTAGE: If Pilot required from Sunk to Brightlingsea, notice to be given to vessel's local Agent. Pilots board near Sunk Light Vessel. ETA's for ships proceeding directly to Brightlingsea can be passed through Harwich, which has a far greater range than Colchester. River pilots can also be ordered directly via "Colchester Harbour Radio", if during operating hours on Channel 68.
ANCHORAGES: Off Brightlingsea, in approximately 8 m. – 10 m.
RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.
MAX. SIZE: Max. length at Colchester, 63 m. Max. length at Rowhedge up to 96 m. Vessels over 85 m. LOA must be cleared with the Harbour Master. Depths of water available – Tables supplied on request.
HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.
Also see "Health – All Ports" before first U.K. port.
RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kHz.
VHF: "Colchester Harbour Radio", VHF Channel 68. Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving draft fore and aft and total cargo tonnage, and keep listening watch on Channel 68 when manoeuvring.
RADAR: None.
TUGS: Small motor tug available through Harbour Master. Private tugs also available.
BERTHING: 1,500 m. of public (corporation) quays. 150 m. quay at Rowhedge.
CRANES: A number of 4 ton – 6 ton mobile cranes.
BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.
STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 100 t.p.h.
MEDICAL: Advance notice if possible. Hospital available.
TANKERS: No facilities.
DENSITY: Density varies with tide, average 1015.
FRESH WATER: Fresh water points on quays, rate approximately 9 tonnes/p.h., cost £43.30 per delivery.
FUEL: All fuel deliveries by road tanker.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No facilities.
SURVEYORS: Lloyd's Agent (W. Fieldgate & Son) or ship's Agent can arrange.
GANGWAY/DECK WATCHMEN: Not normally required.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: British standard allowance.
CARGO GEAR: Shore gear, no heavy lifts.
REPATRIATION: Arranged by Agents.
AIRPORT: London 70 miles. Stansted 30 miles.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: Normal British holidays, work sometimes arranged.
POLICE/AMBULANCE/FIRE: Tel. 999.
EMERGENCY CO-ORDINATION CENTRE: U.K. Coastguard – Dial or VHF Channel 16 or Tel: Walton-on-Naze 5518. Harbour Emergenc – Call on VHF Channel 16 or Tel: 827316.
TELEPHONES: None.
SERVICES: Compass adjusting arranged by Agents.
BANKS: Barclays, Midland, Nat-West and Lloyd's all have branches the town.
STORING: See "Prelims".
1. By truck.
2. Not applicable.
3. Yes, subject to cargo handling.
4. Yes
5. Normal U.K. Requirements.
6. Yes.
GARBAGE DISPOSAL: Bins on quays.
WASTE OIL DISPOSAL: By arrangement with Harbour Office.
SEAMAN'S CLUBS: None.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DELAYS: Normally tidal delays only.
AUTHORITY: Colchester Borough Council, Harbour Office, Wa Radcliffe Way, Wivenhoe, Essex CO7 9JR. *Tel:* (01206) 8273 *FAX:* (01206) 827023. *Contact:* Captain R. Harris, Harbour Master.

COLERAINE: 55.08 N. 06.40 W. (See Pla

PORT LIMITS: 5.5 mile tidal stretch of the River Bann to the entrance.
River entrance: 55° 10' N., 06° 46' W.
DOCUMENTS: Normal U.K. requirements.
PILOTAGE: Compulsory, order through Agents or direct from Harb Office or Pilot. 24 hours notice preferred. Pilot Station, Portstewart B Pilot boat call sign "S. G. Martin", call on Channel 12, working Chan 12.
ANCHORAGES: Vessels awaiting tide can anchor in Portstewart B in offshore winds or in Skerry Roads, East of Portrush.
RESTRICTIONS: The port is tidal and deeper vessels are restricted high tides. Limited night working.
MAX. SIZE: The recommended maximums are 75 m. length, 12.0 breadth and 4.2 m. draft.
HEALTH: Normal U.K. procedure.
TUGS: Not normally required, nearest available tug is at Londond Harbour.
BERTHING: Main Quay 900 ft., 2 detached wharves 140 ft. and 15 Max. draft vessels may ground safely on mud at LWST.
CRANES: Two Priestman Lion 35 grabbing cranes for bulk coal, 1×35 ton Henderson derrick crane for containers or heavier lifts.
SPECIALISED CARGO HANDLING FACILITIES: No facilities Ro/Ro traffic.
BRIDGES: A railway bridge with 60 ft. lifting span crosses the 0.5 miles down stream from the Harbour.
STEVEDORES: Messrs. Callan Enterprises Shipping. Tel: (012 320829. Fax: (01265) 321191.
MEDICAL: Full hospital/medical facilities available.
DENSITY: Varies between fresh and salt, depending on weather tide conditions.
FRESH WATER: Fresh water is available from mains hydrants berths.
FUEL: All grades available, 48 hours notice advisable.
REPAIRS: Local engineers can carry out most repairs. Divers available for underwater work.
DRY DOCKS: None.
HATCHES: Hatches normally opened or closed by the crew.
AIRPORT: Belfast International (Aldergrove) 40 miles. Belfast (har airport) 60 miles, Eglinton, 24 miles.
HOLIDAYS: 1st January, Easter Monday/Tuesday, May Day, 12th July, Last Monday in August, 25th/26th December.
POLICE/AMBULANCE/FIRE: Tel: 999 in emergencies.
GARBAGE DISPOSAL: Plastic bags made available and remove harbour staff. No charge. Skips can be arranged at cost throug harbour office. Large skips £35.25, small skips £25.85, plus £15.5 tonne landfill tax.
WASTE OIL DISPOSAL: Service available using local contractors clean waste oil, contact Capital Fuels, Ballynah Tel: (01238) 561574. For dirty waste oil, contact Irish Waste Serv Belfast. Tel: (01232) 746327. Small quantities can be accepte harbour's own facility.
SEAMAN'S CLUBS: No seaman's clubs.
CURRENCY: U.K.Pound (U.K.£).
DELAYS: Vessels may be delayed by swell at the river entrance weather conditions.
AUTHORITY: Coleraine Harbour Commissioners, The Harbour 4 Riversdale Road, Coleraine, Co. Londonderry BT52 1RY. *Tel:* (0 42012. *FAX:* (01265) 52000. *Contact:* W.J.L. Duddy, Harbour Ma

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W. (See Plan)

PORT LIMITS: As shown on British Admiralty Charts.
DOCUMENTS: As for "Portsmouth".
PILOTAGE: Pilotage is compulsory for vessels of 50 m. and above in length overall and passenger vessels of 20 m. and above in length overall whilst carrying more than 12 passengers/sub-standard ships.

Boarding/landing points for Cowes Pilots: Vessels up to 61 m. in length overall, in vicinity of Prince Consort Buoy. Vessels of 61 m. and above in length overall (bound to/from Cowes): (a) Western Limit ABP Southampton, in vicinity of Gurnard Buoy. (b) Eastern Inner Limit ABP Southampton (North Sturbridge Buoy).
Note: Vessels of 61 m. – 150 m. LOA may board a Cowes Pilot on a voluntary basis at the New Grounds – in the vicinity of the Eastern Outer Limit (Nab Tower).
Note: 6 hours (minimum) notice required.

Cowes Pilots also conduct vessels to berths in Newport Harbour area of jurisdiction.

Pilots board from launches "Thosbro"/"Blaavand", which are equipped with multi-channel VHF radio. During office hours Pilots can be obtained by link call to the Harbour Office Cowes (01983) 293952 or by VHF radio ("Cowes Harbour Radio") Channel 69. After office hours telephone (01983) 292033/882935/295733.
ANCHORAGES: Vessels less than 61 m. LOA waiting to proceed to Cowes or Newport should anchor in Cowes Roads, S.E. of Prince Consort Buoy and North of all yacht moorings. Vessels of more than 61 m. LOA, awaiting a Pilot, should anchor in the vicinity of the Saltmead Buoy (Western Solent) or St. Helens Roads (Eastern Solent) (Note: If these anchorages are unsuitable, owing to weather conditions, then vessels of 61 m. – 150 m. LOA may embark a Cowes Pilot and proceed to anchor in Cowes Roads (Triangle) to await entry into Cowes Harbour). The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoy is reserved for the Trinity House lighthouse tender and naval vessels. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.
MAX. SIZE: Cowes – 95 m. (312 ft.) long, 4.7 m. (15 ft. 06 in.) draft at MHWN, 5.3 m. (17 ft.06 in.) draft at MHWS. Vessels must expect to take the bottom in soft mud at LW. Newport – 150 ft. long, 9 ft. 06 in. draft at MHWS. Newport Harbour practically dries out at LW.
RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.
FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round flashing white light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away and establish VHF radio contact before passing (See "Radio/VHF"). The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.
HEALTH: See "Portsmouth".
RADIO/VHF: Commercial vessels should make an "All Ships" call on VHF Channel 69 before entering the harbour or leaving a berth in the harbour. The call should give the name of the vessel and its intentions. Such vessels should maintain a listening watch on VHF Channel 69 when underway within the harbour and respond to other vessels' calls.

Port radio: Call sign "Cowes Harbour Radio", VHF Channel 69. Listens during office hours Monday – Friday, and harbour launches listen at weekends.

Commercial vessels should establish contact with Floating Bridge, call sign "Cowes Chain Ferry", on VHF Channel 69 before passing, both inward and outward.

Southampton VTS, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton VTS on VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Niton Radio.
TUGS: Harbour tug (3.5 ton bollard pull) and tow-boat launches are available to assist vessels.
BERTHING: *Medina Wharf:* Vessels 17 ft. 06 in., Spring draft, LOA 312 ft. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc.
Kingston Wharf: Vessels of 17 ft. 06 in. draft (MHWS). LOA 245 ft. Unloading bulk cargoes of stone, aggregates and fuel oil.
CRANES:

Medina Wharf: 2 grabbing cranes of 4.5 cu.m. for bulk cargoes.

Kingston Wharf: 1 grabbing crane for stone/aggregate cargoes. 3 marine arms for bulk fuel oil.
STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800 – 1700 hrs. Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.
MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.
DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.
FRESH WATER: Available on all commercial wharves.
FUEL: Fuel and Diesel oil available by arrangement with Agent.
OPENING/CLOSING HATCHES: By ship's crew.
REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry.
SERVICES: Compass adjuster, radar and radio mechanics available locally. Charts and general stores available locally.
SHIP SUPPLY SERVICE: *Thomas Bros.:* 2×40 ft. launches (20 knots) available throughout 24 hours for stores – 12 persons – liberty boats, surveys, etc., and marine contract work – U.K. and Northern France. Tel: (01983) 293812.
Solent Cruises: 2×45 ft. fast vessels with twin screw, D.O.T. Load Line Exemption, able to carry up to 89 persons (reduced number in Winter).

Solent Cruises are contractors to the local authorities for the transfer of sick persons from the Isle of Wight to the mainland.

Contact on VHF Channel 16, (Jenny Lee – 2 RAH) when afloat or Telephone Isle of Wight (01983) 564602.

A 24 hour service is offered for transport of personnel, stores and passengers.
Marine Support and Towage Limited: Tel: (01983) 295369, 296424, 297363 (24 hours). Office (01983) 296934.

Details of Vessels:

Name	*Length*	*General Description and Capabilities*
Roperunner	33 ft.	Heavily fendered steel work launch, used for running mooring ropes/wires for large vessels 6,000 tons – 250,000 tons. Large open after work space, forward wheelhouse. Fitted with radar and multi-channel VHF radio. 120 h.p. diesel, 1 ton bollard pull. Speed 8 knots.
A. Stopford	40 ft.	Keith Nelson twin screw diesel fast launch, for personnel transport and light storage duties, open after cockpit with towage facility. Licenced for 12 passengers. 2×145 h.p. diesels. Speed 16 knots – 18 knots. Fitted with radar, VHF radio and echo sounder.
Beaver	32 ft.	Steel work launch used for running mooring ropes/wires and towage. Large open after work space, forward wheel house. Fitted with multi-channel VHF radio, radar pending, diesel engine, 2 tonne bollard pull.
Trio	47 ft.	Steel work launch used for running mooring ropes/wires and towage duties. Fitted with radar and multi-channel VHF radio, diesel engine, 4 tonne bollard pull.

These vessels are available on hourly, daily or long term charter, U.K. coast or continent. Company is experienced in offshore back-up, ship supply, etc. A 24 hour office facility call out is maintained.
St. Helens Laundry Ltd.: Tel: (01983) 872250, 873731.

Able to supply laundry and dry cleaning services to any vessels at Southampton Docks, Fawley Terminal, Netley, The Solent, Portsmouth Harbour or Docks, and the St. Helens Roads and Nab Anchorages.
OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.
EMERGENCY CO-ORDINATION CENTRE: H.M.Coastguard, Lee-on-Solent. Call "Solent Coastguard" on VHF Channel 16 (24 hours) for all emergencies, including oil pollution.
GARBAGE DISPOSAL: All commercial wharves are privately owned and operated. Owners/operators are required to provide garbage collection. Shipping agents can arrange.
WASTE OIL DISPOSAL: By arrangement with shipping agents.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Cowes Harbour Commissioners, Harbour Office, Town Quay, Cowes, Isle of Wight PO31 7AS. *Tel:* (01983) 293952. *FAX:* (01983) 290018. *Contact:* Captain H.N.J. Wrigley, Harbour Master/Chief Executive Officer. Captain P.G. Wood, Deputy Harbour Master.

CREAKSEA: 51.37 N. 00.47 E.

PILOTAGE: Pilotage is compulsory for all vessels of 50 m. LOA and over.

Pilot boards and lands in the vicinity of the Sunk Light Vessel, using Harwich Haven Pilot vessels. See "Harwich" for contact and other information.
ANCHORAGE: Vessels awaiting a Pilot anchor in the "Sunk" anchorages. Temporary anchorage is available off Holliwell Point and in Cliff Reach, as designated by the Pilot.
BERTHING:
Overall Site: 42 acres (17 hectares).
Sheds/Warehouses: 19,973 sq.m.
Berth Frontage: Outer 110 m., inner 69 m.

Both berths have minimum 7.6 m. at low water.
Draft: 6.8 m. (Neap Tide), 7.3 m. (Spring Tide).
Maximum Size Vessel: Outer Berth: LOA 137 m. Inner Berth: LOA 82 m.
Equipment: Mobile cranes: 2 × Jones HLB, with capacity of 6 tons – 18 tons at 18 m.
Forklift Trucks: 22 × 5/7 tons capacity.
Terminal Trailers: 12 × 30 tons capacity.
Tugmasters: 4 Plan Equipment.
Operator: Baltic Terminal Ltd., Baltic Wharf, Wallasea Island, Rochford, Essex SS4 2HA. Tel: (01702) 258551. Fax: (01702) 258221/258455. Telex: 99107.
GENERAL: The Crouch Harbour Authority's jurisdiction covers the whole of the River Crouch and Roach and out to Whittaker Buoy No. 6.
AUTHORITY: The Crouch Harbour Authority, Harbour Office, The Quay, Burnham-on-Crouch, Essex CM0 8AS. *Tel:* (01621) 783602. *Contact:* Commander W.A. Twist, OBE, Harbour Master/General Manager.

CROMARTY FIRTH PORT (See Plan)

(A) INVERGORDON/EVANTON: 57.41 N. 04.10 W.
(B) NIGG OIL TERMINAL: 57.41 N. 04.02 W.

(A) INVERGORDON/EVANTON

DOCUMENTS: *At Boarding on arrival:*
1 copy Derat Exemption.
Form I.S.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom. (in duplicate).
Form C.13 – General Declaration (in duplicate).
Cargo Manifest (in duplicate).
Form C.142 – Crew Declaration (in duplicate).
Form C.196 Coastwise Shipping (Transire).
Form C.44d Coastwise removal of uncleared foreign cargo.
Vessels arriving from outside the E.C. require Form C 1600A (For presentation of goods carried).
Delivery of forms. When a vessel is not boarded by a Customs Officer on arrival, 1 copy of each of the forms listed must be delivered by the Master or his authorised agent to the proper place at the port of arrival. The Regulations require delivery of these forms within 3 hours of the vessel's arrival at the place of loading or unloading. The second copy of Forms C.13 and C.142 must be retained on board by the Master or other responsible officer for use by Customs Officers who may subsequently visit the vessel.
Certificate of Registry.
Certificate of British Tonnage.
Light Dues Certificate relating to the vessel.
To the Agent:
Bills of Lading.
Cargo Manifests.

PILOTAGE: Pilotage available 24 hours. Vessels under 300 G.T. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse where Pilot will board. Pilot boat painted black hull, orange upper structure.

Pilot boards from tug at Fairway Buoy for large tankers and oil rigs.

Approaching vessels may give their ETA to Pilot Station via VHF Channel 16, when in the vicinity of 30 miles, but a 24 hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 11 (24 hours) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Port Control". Local weather forecasts available.

ANCHORAGES: Large tankers anchor 1 mile South of Fairway Buoy (L. Fl. 10 secs. Racon). Main anchorage West of Cromarty Ness Light.

RESTRICTIONS: Vessels bound for Invergordon or Evanton with a draft over 13.0 m. are not handled at low water.

MAX. SIZE: Max. permissible length 1,000 ft., max. draft 40 ft.
Ro-Ro: LOA 108 m., beam 18.4 m., draft 6.0 m.
Nigg Oil Terminal: See "Section B".

HEALTH: International quarantine signals to be used. Advise "Portelth Dingwall" in advance if any suspected diseases on board.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 to their Agents.

VHF: Link calls through Cromarty Radio on Channel 16 and working Channel 84. Also see "Pilotage".

TUGS: J.P. Knight (Caledonian) Ltd. Tel: Invergordon 852611. Suitable tugs up to 50 tonnes bollard pull stationed at the port which work in conjunction with Pilots. Tug's lines used.

BERTHING: *Admiralty Wharf:* Berths 1 and 2 (Outer South): Lengths 135 m. Max. draft 10.9 m. Max. LOA 294 m.
Berth 3: Max. draft 5.5 m. Max. LOA 89 m.
Berth 6: Max. draft 5.5 m. Max. LOA 61 m.

British Alcan Pier: Outer Berth: Length 97 m. Dredged depth 11.0 m. MLWS (1990). Max. berthing length 244 m. approx. using dolphins. (50,000 d.w.t.)

Inner Berth: Length 61 m. Depth 6.0 m. MLWS (1990).

Invergordon Oilfield Support Base, Invergordon: Front berth 150 m., side berth 60 m. Front dredged to 8.9 m. below C.D. Side 5.5 m. minimum. New deep water Berth No. 4 opened late 1993. Dredged to 14.5 m. at Chart Datum. Berthing face length 52 m. By using Berths No. 2, 3 and 4 combined, vessels up to 300 m. and 9.0 m. draft can be accommodated for berthing or voyage repairs. Bunkers diesel – see "Fuel".

A Ro/Ro freight service to Kirkwall operates from the West Harbour, Invergordon to Kirkwall, passage time 9 hours. Also see "Developments".

Queen's Dock: Length 150 m. Depth at Chart Datum 12.0 m. Also see "Developments".

Highland Deephaven – Evanton: Berthing face length 35 m. Minimum dredged depth 6.0 m. at Chart Datum. Berthing is mainly used by pipe-spooling vessel "Apache" for mooring stern on to berth. Berth also used for conventional coasters and supply vessels up to about 80 m. length and 6.0 m. draft.

CRANES: Mobile cranes up to a maximum 130 tonnes available from stevedoring firms, plus crane-barge of up to 200 tonnes capacity.

STEVEDORES: F. Lyons (Stevedores and crane hirers) – Tel: (01343) 835360. James Jack (Stevedores and crane hirers) – Tel: (01349) 853000. Bannerman Bros. (Stevedores and crane hirers) – Tel: (01862) 892322.

MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.

TANKERS: See "Section – B".

DENSITY: 1022.

FRESH WATER: Obtainable alongside quay. Rate of delivery 30 t.p.h., each hydrant. Rate of delivery at Supply Base is 80 t.p.h.

FUEL: This can be ordered through local Agent, delivery by road tanker, or ex-quay at Invergordon Supply Base (up to 2,500 tonnes of diesel).

REPAIRS: General repairs undertaken by:
J.P.Knight (Caledonian) Ltd. Tel: (01349) 854100.
MacKay & MacLeod. Tel: (01349) 830363.
MacGregor Engineering. Tel: (01349) 853853.
Scottish Rig Repairers. Tel: (01349) 852788.

GANGWAY/DECK WATCHMEN: Ship's gangway and safety required. Watchmen from ship's personnel.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: The following Certificates are required to be held board for production when required:
International Load Line Certificate.
International Tonnage Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Oil Pollution Prevention Certificate.
Oil Pollution Insurance Certificate (Tankers).

CUSTOMS ALLOWANCES: Following quantities are generally left for use on board by each member of crew:

Ships from foreign ports: Tobacco 250 gm. (8 oz. or 200 cigarette Spirits 0.5 litre, wine 2 litres.

REPATRIATION: Can be arranged.

AIRPORT: Dalcross Airport at Inverness, flights by British Airwa Business Air and Loganair, distance from Invergordon 30 miles. Flig to London, Manchester, Glasgow, Aberdeen, Kirkwall, Stornowa Dundee and Shetland.

TIME: British Summer Time, 1 hour advanced on GMT. GMT in Win months.

HOLIDAYS: 1st and 2nd January and Christmas Day. These holida can be worked by arrangement.

POLICE/AMBULANCE/FIRE: Police, tel. Invergordon 852222 or d 999; Ambulance, arrangements through local doctor, tel. Invergord 852522; Fire Station, dial 999 and ask for their service.

TELEPHONES: By arrangement in advance at Admiralty Pier or Sup Base.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage skips available. Contact ship's Age for service.

WASTE OIL DISPOSAL: Various waste oil disposal contract available. Contact ship's Agent for service.

SEAMAN'S CLUBS: None.

DEVELOPMENTS: Queen's Dock, opened in late 1987, includ warehousing and nearly 30 acres of lay down area for cargoes such timber, coal, scrap, containers, etc.

A new Ro/Ro Terminal opened in Spring 1992, and is served by M "Contender" (owned by Orcargo), which operates a daily service Kirkwall in the Orkney Islands. The M.V. "Contender" is 80 m. in leng 2,292 g.r.t., and carries 12 freight trailers and 12 passengers.

(B) NIGG OIL TERMINAL

LOCATION: Nigg Oil Terminal operated by B.P., provides shipp facilities for crude oil piped ashore from the Beatrice Field in the Mo Firth and third party traffic brought in by sea. The terminal is located the North side of the Cromarty Firth in approximate posit Lat. 57° 41.5' N., Long. 4° 02.5' W. and comprises a single berth je linked to the shore by a trestled roadway.

PILOTAGE: Pilotage is compulsory. Invergordon Pilot will board fro tug at the Fairway Buoy. Call "Invergordon Pilots" on VHF Channels or 11, working on Channel 13.

ANCHORAGE: The recommended anchorage for vessels awaitin berth is 1 mile South of the fairway buoy in approximate posi Lat. 57° 40' N., Long. 3° 54' W. An anchorage within the Cromarty F may be made available by the Port Authority.

RESTRICTIONS: *Depth alongside berth:* A minimum depth of wate 21 m. below chart datum is available alongside the berth.

Channel depths: The least depth in the approaches to the termina March 1988 was 15.1 m. below C.D. and occurred in the buoyed fair approximately 0.5 nautical miles within the port limits. Loaded tank may sail with a draft up to 17.5 m. dependent on the tide. Advice sho be sought from Cromarty Firth Port Authority prior to vessel's arriva

Tidal range: M.L.W.S. 0.8 m., M.H.W.S. 4.3 m.

Tidal restrictions: Subject to draft, vessels will be able to berth and at any state of the tide, possibly excepting Spring ebbs. Berthing h Eastwards is to be preferred.

MAX. SIZE: *Length restrictions at berth:* Max. 290 m. LOA. Minim 190 m. LOA.

Max. displacement: 157,500 tonnes.

VHF:

Communications:	Port Authority	Channel 11 & 16
	Port Emergency	Channel 11
	Invergordon Pilot	Channel 13
	Tugs	Channel 13
	Pollution Control	Channel 10
	Nigg Oil Terminal	Channels 49, 50

Portable VHF/UHF sets: These must not be used within the Term Area unless they are classed as "intrinsically safe". The Termina lend approved VHF equipment if necessary.

TUGS: Berthing and unberthing operations will be assisted by a min of 2 tugs of 50 tons and 38 tons bollard pull respectively. A relief t 40 tons bollard pull may be substituted for either of these tugs. A tug of 34 tons bollard pull will also be available if required. The ves agent will arrange for tugs as required by the Master. A firefightin will remain on standby at all times when a tanker is at the Nig Terminal Jetty. Whilst underway within Port limits a 1 tug esc required.

BERTHING: *Berthing velocity:* Vessels must not exceed a berthing velocity of 20 ft./min., regardless of displacement, and should aim to achieve a berthing velocity of less than 10 ft./min.

Mooring arrangements: The Plan (See "Plan") depicts a mooring arrangement for a typical 80,000 d.w.t. vessel. Similar configurations will be employed for all vessels in the range 40,000/160,000 d.w.t.

Seebeck quick release mooring hooks are fitted on all dolphins.

Each mooring dolphin is fitted with a 3-hook assembly; each hook of 100 tonnes capacity.

Each berthing dolphin is fitted with a 2-hook assembly; each hook of 100 tonnes capacity.

The 50 tonnes bollards at the corners of the jetty head are for use by small craft only.

LOADING: *Loading arms:* 3×16 in. Emco Wheaton loading arms, each designed to ANSI 150 lb. pressure rating, are installed on the jetty head. Each arm may be used either for deballasting or for loading and these operations can take place concurrently provided that the terminal approves the system of onboard separation. These loading arms are also used for discharging crude oil.

The minimum acceptable ship's figure size is 12 in. Nominal Bore. The M.I.B. couplings can be adjusted to 12 in., 14 in. or 16 in. flange sizes. Vessels must present manifold flanges with a minimum clearance of 8 in. behind the flange and 3 ft. axial clearance around the centre of the flange face in order to provide adequate clearance for the coupling jaws. If necessary spool pieces must be fitted. Flanges of steel or nodular iron must be presented. Cast iron manifold materials are not acceptable. The vessel's manifold connections must remain within an envelope between 2.85 m. and 6.1 m. off the berthing face and between 4.6 m. and 25.6 m. above chart datum.

If ranging or drift-off exceeding 2.7 m. occurs the coupling ball valves will close and the couplings will automatically disconnect.

If sustained wind speeds exceed 35 knots loading operations will stop and arms will be drained. Arms will be disconnected if wind speeds exceed 40 knots.

Loading rates and pressures: Loading rates of 50,000 bbls.p.h. are attainable utilising 2 loading arms. the maximum pressure permitted at the ship's rail is 128 p.s.i.

Ballast reception: Ballast water reception facilities are available at the Terminal. Ballast must not be discharged overboard within the port. Vessels not having segregated ballast tanks must deballast ashore. Vessels with segregated ballast must retain their ballast onboard for inspection and analysis after berthing, and disposal of this ballast is subject to the results of this inspection and analysis. Permission will not be granted for the overboard discharge of segregated ballast with an oil content in excess of 5 parts per million.

FRESH WATER: Fresh water is available on request from the Terminal from a connection on the jetty head. Approximate maximum delivery rate is 30 t.p.h.

FUEL: Bunkers are not available at Nigg Oil Terminal but may be available at Invergordon (See Section "A").

REPAIRS: Repairs may only be commenced upon receipt of a work permit signed by the Terminal Superintendent. Immobilisation of a vessel alongside the jetty is only permitted with the written permission of the Terminal Superintendent and of the Port Authority.

Readiness to vacate berth: Engines and all other essential equipment of vessels alongside the jetty must be maintained in a state of readiness for vacating the berth at short notice.

STORING: Loading of stores onto a vessel alongside the jetty may be carried out only with the specific permission of the Terminal Superintendent and in a manner and at a time approved by him.

SHORE LEAVE: A pass system will operate. Shore leave will normally be by launch from the jetty launch landing pontoon. Shore leave arrangements are the responsibility of the vessel's Master and will normally be made by the ship's Agent. Details of the arrangements are to be provided to the Terminal Superintendent.

GARBAGE/WASTE OIL DISPOSAL: See Part (A).

GENERAL: *Loading Master:* A B.P. Loading Master remains on board the vessel at all times during the vessel's stay at Nigg Oil Terminal.

Permanent watch: During operations a responsible member of the ship's crew must be stationed in the vicinity of the manifold.

Smoking: No smoking is permitted in the Terminal Area or on the weather deck of any vessel in the Terminal Area. Smoking may be permitted at the Master's discretion in two onboard locations, to be approved by the Terminal Superintendent.

Emergency: In the event of an emergency any assistance required must be summoned via the Terminal Control Room.

Craft alongside: Craft may not lie alongside a vessel at the jetty without the written permission of both the Master of the vessel and the Terminal Superintendent.

Refuse: No refuse or waste may be disposed of overboard from a vessel within the Port.

I.S.G.O.T.T.: Vessels must be provided with a copy and be familiar with the contents of the International Safety Guide for Oil Tankers and Terminals. Reference copies are available on temporary loan from the Terminal.

Important telephone numbers:

Nigg Oil Terminal: Nigg (01862) 851631.
Cromarty Firth Port Authority: (01349) 852308.

AUTHORITY: Cromarty Firth Port Authority, Port Office, Shore Road, Invergordon, Ross-shire IV18 0HD. *Tel:* (01349) 852308. *Telex:* 75263. *FAX:* (01349) 854172. *Contact:* Captain D.R.F. Miller, Harbour Master. Captain I. Dunderdale, Deputy Harbour Master. Captain W. Thomas, Pilot/Marine Officer. Captain N. Robertson, Pilot/Marine Officer. Captain S.R. Thompson, Pilot/Marine Officer.

DARTMOUTH: 50.21 N. 03.34 W. (See Plan)

PORT LIMITS: A line from Inner Froward Point to Combe Point.

DOCUMENTS: Normal documents for U.K. ports.

PILOTAGE: No direct radio contact with Pilots. Contact local Agent, Harbour Authority or Berry Head Coastguard Station who will telephone Pilot.

Pilot station 5 cables S.S.E. Castle Ledge Conical Buoy.

ANCHORAGE: Anchor at Pilot Station.

MAX. SIZE: Max. length 143 m., max. draft 8.3 m.

HEALTH: Contact Port Health (Tel: (01803) 861234).

Also see "Health – All Ports" before first U.K. port.

RADIO: Route cables, etc., through Niton or Lands End Radio Stations.

VHF: Watch maintained on Channels 11 and 16, 0900 hrs. – 1700 hrs. during weekdays and 0900 hrs. – 1200 hrs. on Saturday. Call sign "Dartnav".

TUGS: No tugs available.

BERTHING: All berthing on midstream buoys.

MEDICAL: All medical services are available; if possible give notice of requirement.

DENSITY: Normally salt. 1025.

FRESH WATER: Available at the South Embankment.

FUEL: Diesel available by barge.

FIRE PRECAUTIONS: Normal.

GANGWAY/DECK WATCHMEN: It is advisable to have watchmen.

OPENING/CLOSING HATCHES: Crew open.

CARGO GEAR: Ship's gear.

REPAIRS: All repairs unless of a major or underwater type can be carried out.

SURVEYORS: Philip Ltd. Tel: (01803) 833351.

REPATRIATION: Facilities exist.

AIRPORT: 35 miles from Exeter airport. Internal and short range Continental flights.

TELEPHONES: Not available.

HOLIDAYS: Not applicable.

POLICE/AMBULANCE/FIRE: Dial 999 for emergencies. Local hospital adjacent to Harbour Office.

SHORE LEAVE: Permitted. Seaman's Book adequate.

GENERAL: Dartmouth does not now operate as a commercial port although the harbour is suitable for ships of 18,000 displacement tons and cruise liners, mooring buoys are available for such vessels.

Lay-up facilities available for vessels up to 18,000 tons displacement.

AUTHORITY: Dart Harbour and Navigation Authority, Dart House, Oxford Street, Dartmouth, Devon TQ6 9RL. *Tel:* (01803) 832337, 833767. *FAX:* (01803) 833631. *Contact:* Captain C.J. Moore, Harbour Master.

DOUGLAS, Isle of Man: 54.09 N. 04.28 W. (See Plan)

PORT LIMITS: That part of the coast including all creeks, bays and headlands from HW mark Ordinary Spring Tides which extends from Port Soderick Landing Jetty (Lat. 54° 07' 24" N., Long. 04° 31' 48" W.) in a Northerly direction to the most Easterly point of Clay Head (Lat. 54° 11' 42" N., Long. 04° 23' 05" W.) thence in a straight line drawn in a 135° True (S.E.) direction for 3 nautical miles, thence in a straight line drawn to a position 3.5 nautical miles 135° True (S.E.) from Port Soderick Landing Jetty, thence in a straight line drawn to Port Soderick Landing Jetty.

All shipping entering the above defined area should contact Douglas Radio on Channel 16 VHF.

DOCUMENTS: Same as for all U.K. Ports.

PILOTAGE: Not compulsory. Arrangements usually made at least 24 hours before vessels' arrival, through Ships' Agent, or to Harbour Master, Douglas – Tel: 686628. Call Douglas Radio on Channel 16 and then transfer to Channel 12 for instructions 1 to 2 hours before ETA Douglas Bay.

RESTRICTIONS: Enter only on Harbour Master's instructions.

Traffic Signals: International Port Traffic Signals (See Admiralty Notice to Mariners 568/83) are exhibited when required, by day and night, from a mast at the head of Victoria Pier, visible from seaward and from inside the harbour, as follows:

Signal	*Meaning*
3 fixed red lights, disposed vertically	Vessels may not proceed
Fixed green, white, green lights, disposed vertically	A vessel having received specific permission by RT may proceed
3 fixed green lights disposed vertically	All vessels may proceed

ANCHORAGES: In Douglas Bay:

Douglas Head bearing 196° (T) 7 cables in 6 fathoms.
" " " 199° (T) 9.3 cables in 7 fathoms.
" " " 200° (T) 8 cables in 6.5 fathoms
" " " 212° (T) 7.9 cables in 10 fathoms

MAX. SIZE: Max. size of cross channel vessels 125 m. LOA, draft 6.0 m.

Max. size of cargo vessels 62 m. LOA, draft 4.0 m. Spring tides, 2.75 m. Neaps to Inner Harbour, dries out at LW.

Max. size of tankers 90 m. LOA, draft 5.5 m. at LWOST.

HEALTH: See "Health – All ports" before first U.K. port.

RADIO: Port Patrick for vessels coming from North. Anglesey for vessels coming from South.

VHF: Douglas Harbour Radio manned at all times. Channel 16 and 12 only.

RADAR: Port Radar available for use in fog or when required. Used with Channel 12 VHF.

TUGS: None available.

BERTHING: Passenger vessels – 4 berths for vessels of 350 ft. in length, 15 ft. draft LWST at Victoria Pier.

Cargo vessels up to 350 ft. and 4.0 m. draft handled on South side of Edward Pier, and Ro-Ro vessels up to 410 ft. and 6.0 m. draft handled at North side of Edward Pier.

Office Berth – vessels 68 m. LOA, draft 5.0 m. spring tides. 3.5 m. neap tides, dries out at LW.

Coffee Palace Berth will accommodate vessels of 62 m. LOA, draft 4.0 m. Springs, 2.75 m. Neaps, dries out at LW.

Market Berth same as Coffee Palace Berth.

Battery Pier – Tankers up to 90 m. LOA, draft 5.5 m. at LWOST. Discharging of cargo vessels and container vessels can be done by shore crane.

All berths at Douglas are salt water.

CRANES: *Mobile Cranes:* 2×25 tonnes, 1×72 tonnes, 1×5 tonnes and 1 mobile grab crane.

BULK CARGO FACILITIES: Bulk cargoes of coal and scrap metal are handled at Coffee Palace and Market Berths described above, and timber at King Edward Pier.

Rate of discharge for coal about 60 t.p.h. – 70 t.p.h. by grab crane.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro service operated to Victoria Pier by I.O.M. Steam Packet Co.

Ro/Ro cargo service operated by Isle of Man Steam Packet Co. to King Edward VIII Pier.

LPG cargoes are handled at Battery Pier as described above.

BRIDGES: Swing Bridge only to Inner Harbour.

STEVEDORES: Advice required to Ship's Agent. Rate of discharge – cement 60 t.p.h.; coal 60 – 70 t.p.h.

MEDICAL: Advise Agent when possible, alternatively contact Harbour Master with advance warning. Hospital available.

TANKERS: Tankers pipelines 6 in. Tanker berth at Battery Pier – Max. draft. 5.5 m. at LW Spring tides. Discharging rate 180 t.p.h. – 200 t.p.h.

DENSITY: Density of water salt (1025).

FRESH WATER: Fresh water available on request to Agent or Harbour Master.

FUEL: Fuel delivered by road tanker only. Contact Manx Petroleum, Esso or Total.

FIRE PRECAUTIONS: Fire precautions as normal.

CONSULS: None.

REPAIRS: Limited facilities only.

DRY DOCKS: None.

SURVEYORS: Four I.O.M. Marine Department Surveyors.

GANGWAY/DECK WATCHMEN: Could be arranged by Agent.

OPENING/CLOSING HATCHES: Handled by crew.

CUSTOMS ALLOWANCES: Same as U.K.

CARGO GEAR: Cargo can be discharged by ship's own gear or mobile cranes.

REPATRIATION: Repatriation only done through arrangement with Agents.

AIRPORT: Ronaldsway Airport 8 miles from Douglas and served by regular airlines.

TIME: Same as U.K.

HOLIDAYS: Good Friday, Easter Monday, Spring Holiday, T.T. Friday (1st week in June), Tynwald Day (5th July), August Holiday, Christmas Day, Boxing Day, New Year's Day.

TELEPHONES: Connections to ships can be arranged at passenger piers.

POLICE/AMBULANCE/FIRE: Police Tel: 631212; Ambulance Tel: 663322; Fire Brigade Tel: 673333.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Liverpool. Tel: (0151) 9313341.

STORING: See "Prelims".

1. By truck.
2. Not applicable.
3. Trucks can go alongside vessels except tankers when working cargo or ballasting.
4. Fork lift trucks could be permitted.
5. U.K. Customs regulations.
6. Storing usually done by crew.

SERVICES: None.

SHIP SUPPLY SERVICE: General Marine Services Limited (Tel: (01624) 628904, 629710), who operate the pilot launch and ship to shore transfers of personnel, stores, etc. This launch is kept afloat and a 24 hour service is available.

There is no helicopter service on the Island.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Identification Cards not required for British Ships. Same as U.K.

REGULATIONS: No unusual regulations.

DELAYS: Delays can be expected due to tidal conditions, or awaiting a berth; also delays caused by N.E. gales, which make Douglas Outer Harbour untenable.

GARBAGE DISPOSAL: 4 skips are available on harbour property. Contact Island Skip-Hire (Tel: (01624) 629525) or Merit Skip-Hire (Tel: (01624) 824569). Charges are £58.75 for 2/3 days hire.

WASTE OIL DISPOSAL: Not available.

SEAMEN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Isle of Man Department of Transport, Harbours Division, Sea Terminal Building, Douglas, Isle of Man IM1 2RF. *Tel:* (01624) 686628. *FAX:* (01624) 626403. *Contact:* Captain E. Kaighin, Director of Harbours.

DOVER: 51.07 N. 01.18 E. (See Pl

PORT LIMITS: The seaward boundary of the Port extends 1 mile both the Eastern and Western entrances.

DOCUMENTS: Required on arrival:

Crew List H.O. Form I.S.6. or IMO FAL Form 5 (in duplicate).
Crew Declaration Form C.142 (in duplicate).
Ship's General Declaration (in duplicate) C13.
Ship's Surplus Stores Declaration (in triplicate) C14.
Derat Certificate available for inspection.

It is required to report and clear a vessel at Customs Hous remaining in port more than 24 hours for loading and discharging ca or embarking and disembarking passengers, with following:

Passenger List.
Cargo Manifests (2 copies).
Ship's documents.

PILOTAGE: Requests for pilotage are normally made by local agen Pilotage is compulsory for all ships navigating within the Dover Pilota Area (defined as port limits above) subject to the following exceptio

(a) Ships of less than 20 m. overall, fishing boats of less than 47.5 H.M. Ships and foreign war ships.

(b) Ships (other than those referred to in (a) above) of less than 80 overall length, provided that any such ship is either not carry dangerous substances in bulk or not substandard or in any w hampered.

All ships subject to compulsory pilotage shall board or land pilots or close to the seaward limit of the Dover Pilotage area.

DEEP SEA AND COASTAL PILOTS: For Channel, North Sea a British Coast.

Contact agency 48 hours before arrival by radio, giving ETA Do and destination port(s).

Agencies are: "Deep Sea and Coastal Pilots" (Telex: 911847 Pilots and "Hammond Dover" (See "Agent").

On approaching Dover contact Port Control by VHF Channel 74 instructions.

Pilots will also board at any U.K. or continental port as required.

ANCHORAGE: Limited space available in Outer Harbour. Contact P Control in advance for instructions.

The Outer Harbour comprises an area of approximately 600 acr The Northern extremity indicated by two buoys 'East' and 'West' an intermediate marker buoys, the Southern extremity denoted by a l through the Southern most tip of the Prince of Wales Pier and t Southern most tip of the Eastern Arm. The Eastern boundary is form by a S.E.'ly line drawn through East Buoy and the Western boundar formed by a S.E.'ly line drawn through West Buoy.

The maximum depth at MLWS is 7.3 m.

RESTRICTIONS: Attention is drawn to the strict requirement of obtain permission from Port Control to enter or leave the harbour.

It will be noted that although the traffic control signal may be exhib for entry/departure, every vessel manoeuvring to enter or leave the p is required to obtain specific permission to enter or leave, as the ca may be.

Vessels awaiting permission to proceed should keep at a safe distan of at least 1.5 miles clear of the entrance until so authoris Responsibility for entering or leaving with caution and the safe navigat of each vessel subsequent to the receipt of permission to proce continues to remain the responsibility of the Master.

Explosives – Dangerous Cargo: Declaration is to be made a permission obtained prior to entering the harbour. Dover Harbour Bo is not compellable to receive within the harbour any articles which their opinion would endanger safety of harbour or vessels or goods

HEALTH: Pratique, obtained by radio via Coastguard Station giv name of ship, ports of call during voyage, nature of cargo, numbe crew and passengers, port of destination and Agent, condition and he of all on board with details of any sickness. Coastwise vessels from U ports have automatic Pratique.

Also see "Health – All Ports" before first U.K. port.

RADAR/VHF: Port Control and Admiralty Pier Signal Station are fi with radar and VHF, vessels can make initial contact with "Dover P Control" on VHF Channels 74, 16 and 12. Operational frequenc Channel 74. See "Pilotage".

BERTHING: All berths in the Outer Harbour can be reached at all tim There are 3 berths available on the Eastern Arm fitted with Yokoha fenders, depth at MLWS is 8.5 m. Berths are used for lay-by, gen cargo and vessels taking water, stores and crew changes. There is a berth on the South Jetty of Eastern Docks having 200 m. of q available with a depth of 8.5 m. at MLWS. There is 5,500 sq.m. of co shed and open storage space and additional temperature contr storage of 7,500 sq.m.

Those berths in the Wellington and Granville Docks can normall reached from 1 hour before each high water. All berthing requirem are allocated by Port Control.

Western Docks: This comprises the International Hoverport, catam berth and the Admiralty Pier, and Train Ferry Berth, the Inner Har Tidal Basin incorporating the tug haven, Granville and Wellington Do

Granville Dock: This dock is non-tidal and comprises an area of 4.5 a with depths of water of 21 ft. (6.4 m.) at MHWS, 17 ft. (5.2 m.) at MH The entrance is 65 ft. (19.8 m.) wide and depth on the sill at MHW 21 ft. (6.4 m.). Transit sheds and open storage space are availab the Dockside.

Berth No.	*Length* (m.)		
1/2	146	Fruit/Veg/General	Portal crane
3	76	Fruit/Veg/General	Portal crane
4	40	Lay-by/Ro/Ro	
5	73	For lay-by only (no hot work)	
6	137	Grain	No cranes
7	96	Coal/Limestone/Coke/Pumice (leased to Cory Bros.)	

Wellington Dock: This dock is non-tidal and comprises an area of 8 acres with depth of water 15 ft. (4.6 m.) at MHWS, 11 ft. (3.4 m.) at MHWN. The entrance is 70 ft. (21.3 m.) wide and depth on the sill at MHWS is 15 ft. (4.6 m.). Transit sheds and open storage space are available.

This dock is now principally used by pleasure craft.

Prince of Wales Pier: This separates the inner and outer harbours. Please note that berthing alongside the Prince of Wales Pier is only permitted by special arrangement with the Harbour Superintendent.

Hoverport: All hovercraft services operate from the Hoverport adjacent to and West of the Prince of Wales Pier. "Hoverspeed" operate daily to Calais.

Admiralty Pier: Length 4,140 ft. (1,260 m.), with depths alongside ranging from 6.0 m. to 9.1 m., incorporating the Cruise Terminal (360 m.) with depth alongside 10.0 m.

Tidal Basin: This forms the entrance to the Wellington and Granville Docks and is entered between the Admiralty and Prince of Wales Piers. It comprises an area of approximately 12 acres.

The entrance is 140 ft. (42.7 m.) wide, with a depth of 10.8 m. at MHWS. Much of the Tidal Basin is used for pleasure craft berths.

A tug haven has been constructed in the Tidal Basin adjacent to Clarence Quay. The jetty 45 m. in length is positioned perpendicular and to the Southern end of Clarence Quay. To the North of the new breakwater is positioned a pontoon 90 m. long parallel to Clarence Quay, providing berths for all harbour craft including the 2 tugs, dredger, patrol launch, work boats and RNLI Lifeboat. Private berth users will not be allowed to use the berth without express permission from the Harbour Superintendent or Duty Marine Officer.

Eastern Docks:

The docks comprise the Eastern Arm and Car Ferry Berths.

Car Ferry and Freight Terminal: Operated by Dover Harbour Board. Berth No. 1, situated at the North end of the Eastern Arm, is a general purpose Ro-Ro berth for all classes of Ro-Ro vessels.

Berths No. 2 and 3, situated either side of Pier A are for large Ro-Ro ferries of length 168 m. and beam 28 m. with double deck and double width loading bridges. Pier "B" is used as a lay-by berth. Berths No. 5 and 6 situated at Pier 'C', with double lane loading bridges of 23 m. plus covered passenger bridges. The Seacat berth is situated on the East side of Pier D, whilst Berth No. 7 on the West side of Pier D is now operational and similar to Berth No. 3. The car ferry/freight berths provide berthing for vessels up to 180 m. in length with depths of water of 7.0 m. at MLWS. Berths are connected with loading bridges to enable cars, coaches and freight to drive on direct on board the vessels, operating to Calais and Zeebrugge. Shore facilities provide modern reception buildings, a new passenger handling complex, Customs clearance halls, 2 restaurants/shop complexes, banking facilities, shipping operators' offices, spacious assembly car parks.

TUGS: Two tugs of 2,900 h.p. each. Tug names 'Deft' and 'Dextrous'. Twin engined Voith Schneider. Tugs will normally join vessels outside harbour entrance, but may meet vessels inside by arrangement. Tug's rope used. Tug charges on application from Dover Harbour Board.

BULK HANDLING FACILITIES: 2×550 t.p.h. shiploaders for grain operated by Dover Stevedoring Co. Ltd. Two shiploaders for grain operated by P.D. Wharfage.

CRANES: *Enclosed Docks:* There are 2 electrical portal cranes of SWL 3 tonnes installed at Berths 1, 2 and 3 in the Granville Dock also 3 mobile cranes with SWL of 10, 20 and 70 tonnes available for cargo handling. The 2 mobile cranes may be employed for other duties. Hire charges on application to Dover Harbour Board.

Eastern Docks: 2×20 tonnes SWL and 1×36 tonnes SWL container cranes are available for hire. There are 2×40 tonnes mobile cranes available. Hire charges are available from Dover Harbour Board.

CARGO HANDLING FACILITIES: Seven berths equipped for handling scheduled Ro/Ro traffic.

STEVEDORES: No particular ETA required as ship's Agent makes all necessary arrangements.

MEDICAL: Medical assistance can be arranged by Agent to vessels passing Dover Harbour. Doctor will board a vessel in English Channel or on arrival at anchorage in Outer Harbour. Hospital facilities are available.

DENSITY: 1020.

FRESH WATER: Available to all vessels by pipeline 25 t.p.h.

FUEL: All grades of fuel oil and gas oil available by barge from Shell UK Ltd. (Tel: 071-257-3018).

CONSULS:

AUTHORITY: East Lothian Council, Council Buildings, Court Street, Haddington, East Lothian. *Tel:* (01620) 824161. *Contact:* R. Brunton (Tel: (01368) 863206).

DUNDEE: 56.28 N. 02.57 W. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived ship" when:
(a) For berthing turn-arrival at Fairway Buoy.
(b) For Laytime – usually "off or at the berth" and subject to Charter-Party terms.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Tobacco Manifest.
Health Declaration.
Cargo Manifests.
Bills of Lading.
Derat Certificate.
Lights Certificate.

PILOTAGE: The port is approached by a well-defined main channel with up-to-date navigational aids and radar surveillance. To provide information on navigation and safety the Authority operates a Port Control Service which maintains a 24 hour listening watch on VHF Channels 16 and 12.

Pilotage is compulsory in Dundee Pilotage District. Pilots board incoming vessels at either inner Pilot Station (Lady Buoys) or outer Pilot Station (Fairway Buoy), depending on weather conditions and/or type of vessel. The pilot boat is only on sea station when shipping is expected and accurate ETAs are essential.

ETA should be given 6 hours before arrival either by radiotelephone link call to Dundee Port Control (Tel: (01382) 224121. Fax: (01382) 200834) or by radiotelegram to "Dockyard Dundee" Dundee. Amendments should be made up to 2 hours before the original ETA. When within VHF range (approx. 25 miles from Tay Fairway Buoy) ETAs may be confirmed by contacting "Dundee Harbour Radio" on Channel 16 and transferring to Channel 12 to pass messages.

Pilot boats, when on station, keep a listening watch on Channel 12.

ANCHORAGES: Pilots are instructed where to anchor vessels. There are 3 deep-water anchorages to accommodate vessels up to 8.5 m. draft. Two anchorages for vessels up to 6.7 m. draft, and other minor anchorages.

RESTRICTIONS: Tide and draft 9.0 m. at MHWS. Vessels enter 3 hours before HW. 8.0 m. at MHWN. Vessels enter 3 hours before HW.

MAX. SIZE: Length 245 m., beam 44 m., draft 9.0 m.

HEALTH: Health Declaration on arrival – if clean, automatic Pratique. Suspect disease as per international requirements. Pratique automatic if already called at another port.

Also see "Health – All ports" before first U.K. port.

RADIO: Any UK coast station. Nearest stations – Stonehaven and Forth.

VHF: See "Pilotage" and "Tugs".

TUGS: Towage is operated by the Authority's tug – 'Abertay' (1,280 h.p. Bollard pull 17 tons). Tug joins vessel in the vicinity of Craig Buoy. Tug operates on Channels 16, 12 and 6 (Channel 6 when attending vessels). Tug lines optional, charge made if tugs lines used. Additional towage by arrangement.

CARGO HANDLING FACILITIES: All types of general cargo are handled, including packaged timber and side-loading of forest products. Grab facilities for bulk material. 4 conveyors are arranged for grain and suitable bulk materials.

Cold Storage: Private cold storage in the vicinity of the port is accessible on application.

Containers: Container handling with ship's gear or mobile cranes and stevedores' transporters.

Cranage: Wide range of cranage, both mobile and portal, with grabb facilities. Heavy lifts up to 100 tonnes can be arranged.

Grain Handling: Grab facilities.

Grain Storage: Temporary shed accommodation leased by Grainfax a Port of Dundee.

Minerals Handling: Lander hydraulic grabs.

Sheds: All riverside berths are equipped with transit sheds not less t 30.5 m. wide, fronted by broad concrete aprons. Total shed area 69,672 sq.m. Within the harbour area there is extensive storage a and warehouse facilities.

Ro/Ro Berth: At Eastern Wharf. Accepts vessels up to 25 m. beam w stern ramps up to 12.5 m. wide. Linkspan single-lane carriageway 4 wide. Road vehicles up to 50 tonnes. Trailer park adjacent. Also 2 Sec Trailer Parks.

STEVEDORES: One ETA to Agent or port suffices for all services. Full stevedoring facilities are arranged by Port of Dundee Ltd.

MEDICAL: Advance notice required for ordinary medication for arriva week-ends. Hospitals and casualty stations available.

TANKERS: Diameter of hoses – 10 in. Slop discharge facilities n available. One tanker berth with depth 9.5 m. at L.A.T.

DENSITY: 1010 at MLWS. 1015 at MHWS.

FRESH WATER: Available, 24 hour service. Delivery, hose from qua Rate, 30 t.p.h.

FUEL: Bunkering is available to any vessel by direct pipeline or by ro tanker. Large quantities of any fuel type by coastal tanker, subject 3 or 4 days' notice.

FIRE PRECAUTIONS: Regulations are handed to Master on arrival

CONSULS: (Area Code 01382)

Denmark	223044	Netherlands	223111
Finland	223111	Norway	223044

Ship's Certificate of Registry.	For clearance to outside E.E.C.
Mercantile Marine Office Certificate for British ships only.	
Load Line Certificate.	
Safety Equipment and Construction Certificates, Radio Certificate.	
Derat Certificate.	
International Oil Pollution Prevention Certificate.	

The Crew Effects Lists (C142) and the General Declarations (C13) must be delivered to the Customs Officer if boarded on arrival. If not boarded on arrival one copy of each must be delivered to the designated post box at the Customs House within 3 hours of arrival.
PILOTAGE: This is a compulsory pilotage district with certain exemptions. The Pilot will board from a boat, 3 miles South of St. Anthony's Lighthouse. Pilots maintain VHF watch on Channel 16 and can be contacted through coast stations throughout 24 hours – Call sign "Falmouth Pilot Radio"; preferred working frequency Channel 9 or Vodaphone (0836) 661668.
ANCHORAGES: Vessels in excess of 203 m. usually anchor in Falmouth Bay. Other vessels in outer harbour. Mooring Buoys available.
MAX. SIZE: See "Tankers".
HEALTH: See "Health – All ports" before first U.K. port.
VHF: Falmouth Harbour Radio (office hours) Channels 16, 14, 13 and 12.
TUGS: 4 tugs available. On call during working hours and outside of hours when required if advance notice given. Tug's lines are to be used.
STEVEDORES: Falmouth Cargo Handling: Tel: (01326) 212100. Telex: 45175. Fax: (01326) 211674.
MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.
TANKERS: Berth available at Eastern Jetty (248 m.) for tankers with max. draft 8.4 m. (approx.), depending on length of vessel. Fuel oil receiving terminal for loaded vessels up to approximately 28,000 tonnes d.w.t. Slop reception and tank cleaning facilities available.
BERTHING:

Name	*Length of Wharf* (m.)	*Length of Berth* (m.)	*Depth (at C.D.) Alongside* (m.)
County Wharf	204.0	160.0	7.8

Eastern Breakwater	291.0	150.0	8.5
		180.0	7.3
		210.0	5.3

* Wharf partially demolished. Works and in-fill in progress, 184 m. remaining up to new in-fill.

13 deep-water berths. Combined frontage 8,000 ft. Vessels of 865 ft. have been accommodated. Draft LWOST 5.5 m. – 7.5 m. depending on berth.
CARGO HANDLING FACILITIES: 25 ton dockside crane, grab cranes and elevators. 100,000 sq.ft. warehousing and 4 acres open storage.
Cross Roads Buoy and St. Just Moorings: Max. size of vessel normally permissable on the Cross Roads Buoy, except by special arrangement with the Harbour Master: LOA: 183 m. (600.5 ft.): Draft: No limit. Anchor cable size: 77 mm. SQ (U2) steel.

Max. size of vessel on fore and aft St. Just Mooring normally permissable except by special arrangement with the Harbour Master: Length overall: 205 m. (672.5 ft.) Draft: No limit. Anchor cable size: 82 mm. SQ (U2) steel.
Caldy and Frigate Buoys: Max. size of vessel normally permissable on either of these buoys except by special arrangement with the Harbour Master: Length overall: 61 m. (200 ft.) Draft: 3.5 m. (11.5 ft.). Anchor cable size: 28 mm. SQ (U2) steel.
Offshore Exploration: Falmouth Docks and Engineering Co. operates an offshore supply base with all services and on an exclusive basis.
FUEL AND FRESH WATER: Full marine bunkers service by Falmouth Oil Services (Tel: (0326) 211333). Gas oil is available and water is piped on the Dock Company wharves. At the repair berths, or in Carrick Roads or Falmouth Bay, bunkers and water must be delivered by barge.
Offshore Bunkering:
Falmouth Oil Services – Bunkering Procedure:

Whenever possible, the barge will make fast along your starboard side. The Barge Master and/or Terminal will advise you of the barge's ETA.

Please expedite the operation by ensuring the following:
(A) Your derrick/crane/hoist is rigged ready for lifting the barge hose(s).
(B) Sufficient crew are standing-by (with heaving lines) to receive the barge's mooring ropes.
(C) Sufficient crew are available for connecting the hose(s) on board your vessel.
(D) The completed and signed copies of forms "Important Notice" and "Safety Check List" are both returned to the Barge Master before bunkering commences.
(E) A crew member is continually present by your bunker manifold throughout the operation (A crew member of the barge will always be on the barge deck throughout the operation).
(F) Sufficient crew are available for disconnecting the hose(s) and letting-go the barge's mooring ropes.

Contact Numbers:

Terminal:	Tel: (01326) 211033 Telex: 45764 Fosoil G Fax: (01326) 211539
Barges:	'Falmouth Enterprise' (Fuel/clean oils) 'Falmouth Endeavour' (Fuel/clean oils) 'Falmouth Industry' (Gas oil/water)
VHF Channels:	16 – All barges 16/9 – 'Falmouth Pilots' 11 – 'Spindrift' Dockmaster 102 – 'Fos Terminal' (Private channel)

Agents Instructions to Master: Master to advise 45764 Fosoil G and ETA's immediately 72/48/24 hours and 12 hours prior arrival Falmouth, thereafter any change exceeding 1 hour – all times GMT (Z).

Following information required with first communication:

AA	Ship's name.
BB	Flag/Port of Registry.
CC	Last port.
DD	Next port.
EE	Ballast/loaded?
FF	Tonnage g.r.t./n.r.t./d.w.t.
GG	ETA Falmouth in GMT.
HH	Arrival draft.
II	Freeboard at bunker manifold.
JJ	Length overall.
KK	Quantity/grade bunker required.
LL	Distance from stern to manifold.
MM	Manifold size(s) in pitch circle diameter.
NN	Average receiving rate per grade.
OO	Last port: Agent's Tel.No./telex No./station monitored.

Master to call 'Falmouth Pilots' on VHF Channels 16/9. Pilot boarding position is 2 cables N.E. of Helston (2D) Buoy, which is in position Lat. 50° 04.9' N., Long. 05° 00.7' W.

Normal agency services available, including arrangement of repair facilities (afloat, alongside, or D/D) diving services, chandlery, etc.

CONSULS: France, Germany, Netherlands, Norway and Spain represented by G. C. Fox & Co.

REPAIRS: All ship repairs can be carried out by A & P Falmouth Ltd. Dockmaster – call sign "Spindrift", maintains VHF watch on Channel 16, working on Channel 11 during office hours. Tel: 212100 (Ext. 251) or Fax/Tel: (01326) 319451.

DRY DOCKS: A & P Falmouth Ltd. (Tel: (01326) 212100).

Total wharf space: 2,438 m. Minimum depths alongside 6.10 m. to 7.5 m. LWOST. 24 hour access.

Cranage up to 48 tons.

Services: Electricity, water, steam and air.

Gas-freeing and tank cleaning facilities.

Bunkering.

Dry Docks	*Length* (m.)	*Breadth* (m.)	*Depth on Sill at HWOST* (m.)
No. 1	169	22.9	7.9
Queen Elizabeth Dock	259	39.6	11.0
No. 3	229	26.8	8.5
No. 4	198	26.2	8.2

Dry docks can accommodate vessels up to 100,000 d.w.t.

Repairs can be carried out at 13 deep-water berths and in deep-water harbour.

Engineering, fabrication and electrical services; grit blasting and high pressure water-washing. Sea-going maintenance teams.

Personnel experienced in handling all types of cargo, including explosives. Rail links to berths. Open storage, warehousing and office accommodation. Diving services. Management and secretarial services. Helicopter Pad. Security – 24 hour patrol.

GANGWAY/DECK WATCHMEN: Available in shipyard on request.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Usual U.K. allowances.

REPATRIATION: Facilities available.

AIRPORTS: London (Heathrow) 75 minutes by air from Newquay Airport, or 4.5 hours by train from Truro.

Distances from Falmouth: Newquay – 28 miles. Bristol – 183 miles. London – 277 miles.

TIME: British Standard Time is GMT. British Summer Time – GMT plus 1 hour (Summer).

HOLIDAYS: 1st January; Good Friday (variable date); Easter Monday (variable date); Spring Bank Holiday (variable date); August Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required. Or County Police, 72231; Dock Police, 212100; County Fire Service, 212412; Docks Fire Service, 212100; Ambulance, Truro (01872) 78181.

EMERGENCY CO-ORDINATION CENTRE: Coastguard MRCC, dial 999 or 317575 or VHF Channel 16 – Falmouth Coastguard.

TELEPHONES: Can be placed on board in dry dock and most repair berths but not at Eastern Oil Wharf.

SERVICES: *Storing:* Storing by sea or alongside and no restrictions on vehicle access at most berths.

GARBAGE DISPOSAL: For collection alongside the docks, applicaton should be made to the port's General Manager. For collection whilst afloat, arrangements should be made through ship's agent.

WASTE OIL DISPOSAL: Full tank cleaning and slops receipt service available on the Eastern Jetty.

SEAMEN'S CLUBS: Falmouth Seafarer's Centre, Bar Road, Falmouth (Tel: 0326-312149). Facilities include accommodation, transport, chapel, shop, video/TV, games, laundrette, telephone, currency exchange, postage facilities, snacks, books, juke box, bar and football.

CURRENCY: U.K.Pound (U.K.£).

SHORE LEAVE: Granted.

AUTHORITY: Port of Falmouth, Falmouth Harbour Commissioners, 44 Arwenack Street, Falmouth TR11 3JQ. *Tel:* (01326) 211376. *FAX:* (01326) 211352. *Telex:* 45349 Falhar G. *Contact:* Captain D.G. Banks, Chief Executive and Harbour Master.

FELIXSTOWE: 51.57 N. 01.21 E. (See Plan)

DOCUMENTS:

Stores List.
Crew List.
Health Declaration.
Manifests.
Bills of Lading.
Ship's papers, including Register, Load Line Certificate, Safety Equipment Certificate, Radio Certificate, U.K. Light Dues, if any.

Radio Officer's Report:

2 copies Master's Declaration.
2 copies Crew List.
1 copy Crew Declaration (No "Magazines" permitted).

APPROACHES: Traffic Regulatory Systems in effect. Details of current harbour Bye-laws and General Directions for navigation available. See "Radar/VHF" – "Harbour Operations Service".

PILOTAGE: PROCEDURE AND INFORMATION ON ETAs/ETDs FOR SHIPS REQUIRING THE SERVICES OF AN AUTHORISED PILOT:

Arrival Notification: Ships bound for the Haven Ports of Harwich, Felixstowe, Ipswich and Mistley and requiring a Pilot, shall notify Harwich Operations Control, 8 hours in advance, giving the ETA at the "Su or "Cork" Pilot Stations, as appropriate and LOA, gross tonna maximum draft, departure port and destination port.

Confirmation of ETA should be given at least 3 hours before ar on VHF Channel 9.

Failure to provide the ETA and subsequent confirmation could re in delay to the ship.

In the case of a ship engaged in the short sea trade, the initial E may be passed at the time of leaving the last port of call, if passa time is less than 8 hours.

A ship having complied with the above conditions and then hav anchored before embarking a Pilot must give Harwich Operations Con adequate notice of requiring the services of a Pilot. Failure to give su notice could result in delay to the ship.

Requests from inward-bound ships for the services of a Pilot for Rivers Blackwater, Colne, Crouch or Roach may also be passed thou Harwich Operations Control.

Departure Notification: Outward-bound ships, or ships moving within compulsory Area, which require the services of a Pilot, shall give at le 2 hours' notice of their Estimated Time of Departure and update required by giving 30 minutes confirmation.

Boarding and Landing Arrangements: The pilot boarding point for inwa bound ships will be within the voluntary pilotage area, (see below), su that the Pilot is boarded in good time before entering the Compuls Area.

The boarding position will be agreed with Harwich Operations Cont having due regard to the size and draft of the ship and the prevail circumstances.

For vessels arriving from the North via the Shipway, and small a medium sized vessels from the South, the normal boarding point is t Cork Pilot Station, which is 2 miles E.N.E. of the Shipway Buoy. La and deep draft vessels will normally be expected to board their Pi at the Sunk Pilot Station, 1.5 miles E.N.E. of the "Sunk" Light Flo Small vessels unfamiliar with the area will also be boarded at the "Su Pilot Station on request.

Boarding and landing will take place from pilot launches operat from Harwich Harbour. The launches will have the word "HAV PILOTS" on the side of the wheelhouse, fly the pilot flag by day and night, exhibit lights and signals in accordance with Rule 29 of t International Regulations for Preventing Collisions at Sea.

If the pilot launch is unable to operate in the normal locations due stress of weather, or other unforeseen circumstances, alterna arrangements will be advised by Harwich Operations Control.

GEOGRAPHICAL LIMITS OF THE HAVEN PORTS PILOTAGE AR (THE COMPULSORY AREA):

The area bounded by the following limits:

(a) As much of the River Orwell as lies below Ipswich Dock.
(b) As far up the River Stour as the tide flows.
(c) To seaward of Landguard Point, the area bounded as follow
  (i) In an Easterly direction as far as 01° 24' E.
  (ii) In a Southerly direction as far as 51° 54.5' N.
  (iii) In a Northerly direction as far as 51° 57.4' N.

Voluntary Pilotage: The Board will provide pilotage upon request in area to seaward of the compulsory Area as far as a line drawn betw the following points:

(a) Bawdsey Cliff – Lat. 52° 00' N., Long. 01° 26' E.
(b) Lat. 52° 00' N., Long. 01° 41' E.
(c) Lat. 51° 49' N., Long. 01° 41' E.
(d) Lat. 51° 49' N., Long. 01° 15' E.

ANCHORAGES: For vessels needing to anchor at the Sunk to a Pilot or berthing:

(i) Recommended Deep Water Anchorage approximately 4 m N.E. of the "Sunk" Light Float.
(ii) Inner Sunk Anchorage approximately 3 miles S.W. of L Vessel.

For vessels proceeding via Cork:

(i) Recommended Deep Water Anchorage at the Bawd Anchorage.
(ii) The Cork Anchorage North of the Harwich Channel Approa

Inside Harwich Harbour are the:

(i) Platters Anchorage, South of the Pitching Ground Buoy.
(ii) For small vessels, the Shelf and River Stour Anchorages.

Information on all these anchorages is available from Harwich Har Radio VHF Channel 71. See "Radar/VHF" – "Harbour Operat Service".

RESTRICTIONS: Approach Channel dredged to 12.5 m. (below C Datum). Deepest water alongside is 14.0 m. (C.D.) at Trinity Conta Terminal. At least 0.3 m. keel clearance (except Landguard whic 0.5 m.) required at all times between channel bed and keel of vess

MAX. SIZE: General cargo vessels: Dock Basin 39.0 m. wide entra Depth 6.7 m. (C.D.). No lock gates. Suitable vessels able to leav any state of tide.

North Quay: 191 m. in length.
South Quay: 186 m. in length.
East Quay: 132 m. in length.

Container Vessels: Landguard Container Terminal, depth 11 (C.D.) for 280 m. of quay, 9.75 m. (C.D.) for remainder. Max. draft 9 – 11.4 m.

Trinity Terminal – Berth No. 1: Depth 11.6 m. (C.D.). Max. draft 11
Trinity Terminal – Berth No. 2: Depth 11.9 m. (C.D.). Max. draft 11
Trinity Terminal – Berth No. 3, 4 and 5: Depth 13.4 m. (Max. draft 13.1 m. Berths No. 6 and 7: Depth 14.0 m. (C.D.). Max 13.7 m.

Ro/Ro vessels Ferry Terminal: Ro/Ro Bridge No. 1: Vessels 184.6 m. overall, depth 7.3 m. (C.D.). Ro/Ro Bridge No. 2: Vess to 151.0 m. length, depth 7.3 m. (C.D.) Ro/Ro Bridge No. 3: Vess to 137.2 m. length, depth 7.3 m. (C.D.). Ro/Ro Bridge No. 4: 9.75 m. (C.D.). Vessels up to 213 m. overall.

Tanker Jetty: Vessels 180 m. overall, depth 9.75 m. (C.D.).

All berths subject to siltation between maintenance dredging p

HEALTH: Pratique flag in daylight and lighted signals in darkness to be displayed by vessel on arrival. Health Declaration to be given in writing or verbally by Master on arrival. If disease suspected, then report to Pilot Station who will advise Health Authorities.

Also see "Health – All ports" before first U.K. port.

RADIO: North Foreland, Humber, Niton (or any other radio station convenient to vessel's position).

RADAR/VHF: *Harbour Operations Service:* An Operations Service is operated by the Harwich Haven Authority, and is provided from the Harbour Master's Office, Navigation House, Harwich on a 24 hour basis to provide all vessels using the harbour with navigational information and advice. The following facilities are available:

VHF Radio:	Channel 16	Safety.
	Channel 9	Pilotage and ETAs.
	Channel 71	VTS and Reporting.
	Channel 6	Pilot Launches.
	Channel 69	Tugs.
	Channel 20	Harwich Radar Assistance.
	Channel 11	Harbour Craft.
Telephone:	(01255) 243000	Harbour Operations.
	(01255) 243111	Pilot Orders.
Telex:	98472 HAROPS G.	
Fax:	(01255) 241325	

Dangerous substances in Harbour Areas notifications should be sent by telex or fax 24 hours prior to arrival or at time of leaving last port.

The centre is equipped with comprehensive radio and telecommunications, advanced radar surveillance displays, VHF and direction finding equipment, electronic tide gauges, and wind instruments, to provide full and up to date navigational information to seafarers.

All vessels over 50 gross tons must carry suitable VHF R/T equipment, capable of communicating with the Harwich Harbour Operations Service (Call sign "Harwich Harbour Radio") and must maintain a listening watch on Channel 71 (156.575 MHz) while navigating within the harbour and approaches. Vessels entering or leaving the harbour must contact the Operations Service for permission to navigate through the area, in accordance with the procedures laid down in current Harwich Harbour General Directions for Navigation.

Traffic regulatory procedures exist with respect to the Harwich Deep Water Channel and within other areas of the harbour, depending on circumstances. The Harbour Operations Service will keep vessels suitably advised.

TUGS: Up to 5 tugs (Up to 40 tons bollard pull) join vessels in Harwich Approaches, or where ordered by Pilot. Tugs listen on Channel 16 and Channel 71 (24 hours). Main tug working Channel when engaged in towing is Channel 69.

In addition 3 dock tugs up to 13 tons bollard pull are available. Contact on Channel 71 or via Harbour Operations.

BERTHING: All berthing information available through Harbour Operations via Harwich Harbour Radio, who have direct links to Berthing Master's Office at the Port of Felixstowe.

CONTAINER TERMINALS:

Terminal	*Berth* No.	*Length* (m.)	*Depth* (m.)
Landguard	–	440	9.75 – 11.90
Trinity	1	2,084	11.6
Trinity	2		11.9
Trinity	3, 4, 5		13.4
Trinity	6, 7		14.0

All berths are dredged annually.

Container Handling Equipment:

Landguard:

Container Cranes:	1 Paceco ship/shore container crane (1×50 ton capacity). 2 Morris ship-shore container cranes (2×50 tons capacity). 1 OMG ship/shore container crane (Post Panamax 70 tons capacity).
Park Gantry Cranes:	13×35 ton Paceco rubber tyred gantry cranes.
Container Park:	28 ha. (ground slots – 3,893 TEU's; capacity – 9,733 TEU's).
Reefer Points:	120 (20 ft.).

Trinity:

Container Cranes:	10 Davy Morris ship-shore container cranes (Post-Panamax) 7×50 tons capacity and 3×70 tons capacity. 2 I.H.I./M.G.M. container cranes (Post-Panamax) 50 tons capacity. 2 I.H.I./M.G.M. container cranes 50 tons capacity. 2 Conrad Stork container cranes 50 tons capacity.
Park Gantry Cranes:	47×35 ton rubber tyred gantry cranes. 35×Davy Morris, 5×M.G.M., 9×Paceco and 4×Morristac.
Container Park:	76 ha. (ground slots – 14,200 TEU's; capacity – 46,600 TEU's).
Reefer Points:	752.

Rail Facilities: All berths are served by rail including 2 Freightliner Terminals, one situated at the Landguard Container Terminal and the other situated at Trinity Container Terminals.

CARGO HANDLING FACILITIES: *General Cargo Division:* 4 mobile cranes up to 33 tonnes capacity and 2 Scotch derrick cranes, capacity 32 tons at 90 ft. radius.

Roll-on/Roll-off Division: No. 1 Berth: P & O European Ferries Terminal. Upper and Lower deck loading ramps. Electric travelling crane, capacity 32 tons at 110 ft., depth 6.7 m. – 7.3 m.

No. 2 Berth: P & O European Ferries Terminal: One hydraulic loading ramp designed to carry loads up to 140 tons. Upper loading ramp designed to carry loads up to 32 tons. Least depth 7.3 m.

No. 3 Berth: Hydraulic loading ramp designed to carry two lanes of traffic with loads up to 140 tons. Electric travelling crane with capacity of 35 tons at 95 ft. radius, least depth 7.3 m.

No. 4 Berth: Allows a combination of Roll-on/Roll-off and container vessels to be accommodated. The hydraulic loading ramp is designed to carry two lanes of traffic with loads of up to 140 tons. Depth 9.75 m.

STEVEDORES: 24 hours notice required by Agent to advise stevedores of vessel's ETA, in order to arrange berthing and allocation of labour. All stevedoring arranged between Dock Company and vessel's Agent.

MEDICAL: Prior notice desirable through Agent to arrange attention. All services available.

TANKERS: 4 in. and 6 in. connections. No slop facilities, except as required by MARPOL Regulations. No facilities for gas freeing alongside or in harbour.

One tanker berth available. Vessels up to 180 m. overall, 25,000 tons displacement and max. draft 9.1 m. at C.D.

DENSITY: 1025 salt water.

FRESH WATER: Pipeline connections to all quays. Delivery approx. 40 t.p.h. Tug service available for supplies to vessels at anchor.

FUEL: Marine diesel and gas oil available, pipeline and barge delivery. 24 hours notice required.

FIRE PRECAUTIONS: Standard precautions at all berths.

CONSULS: Royal Swedish Vice-Consul, Harwich 241063; Icelandic Vice-Consul, Felixstowe 285651/4; Netherlands and Germany, Harwich 506666; Finnish Honorary Consul, Felixstowe 604500.

REPAIRS: Facilities exist for small repairs only.

DRY DOCKS: None available.

OPENING/CLOSING HATCHES: Work undertaken by crew.

CERTIFICATES: Valid Derrick and Rigging Certificates, Ship's Register, Load Line, (Light Dues Receipts), Safety Equipment, Radio, Derat, Construction.

CUSTOMS ALLOWANCES: 100 cigarettes or equivalent in tobacco or cigars per man. 1 bottle spirits.

REPATRIATION: All facilities available.

AIRPORTS: Ipswich – 10 miles; Stanstead – 65 miles; Southend – 70 miles; Heathrow – 90 miles. International flights.

Air UK flights from Norwich to Aberdeen, Amsterdam, Bergen, Edinburgh, Humberside, Leeds/Bradford and Teesside.

TIME: GMT. In Summer months, April to October, time advanced 1 hour.

HOLIDAYS: Shipwork every day except Christmas Day. Parks and warehouses closed at Easter and Christmas/New Year. Exact dates and times advised in advance.

POLICE/FIRE/AMBULANCE: Emergency points on all quays. Tel. 4300 or, outside dock area, 999.

TELEPHONES: Shore connections available by prior arrangement for vessels on regular trades.

SERVICES: Most services available for dry cargo vessels, but no special tank cleaning or tank washing facilities for tankers.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not necessary if in possession of Seaman's Book or Passport.

GARBAGE DISPOSAL: Skips are placed at strategic points on quayside, and are emptied as and when required by Hales Waste Control, Papermill Lane, Bramford, Ipswich IP8 4DE (Tel: (01473) 831725) who can also arrange to dispose of excessive amounts of waste.

WASTE OIL DISPOSAL: Can be supplied by Hunting Secon Ltd., Cecil House, 27 High Street, Hoddesdon, Herts EN11 8UZ. Tel: (01992) 451848. Fax: (01992) 446596. They will collect sludge and waste oil by 20 ton tanker lorry. Any reasonable quantity can be accepted. 24 hour/7 days a week service. Cost on application, depending on water content, no special berth necessary.

SEAMEN'S CLUBS: Felixstowe Seafarers Centre, The Dock, Felixstowe (Tel: (01394) 673599). Facilities include games room, pool table, TV, darts, table tennis, food available, shop, international telephone, church services, minibus collection, postage facilities. Open 7 days a week.

CURRENCY: U.K.Pound (U.K.£).

GENERAL: ETA to Agent required 72 hours, 48 hours, and 24 hours prior arrival.

AUTHORITY: Felixstowe Dock & Railway Co., Tomline House, The Dock, Felixstowe, Suffolk IP11 8TB. *Tel:* (01394) 604500, 604789. *Cables:* Dock, Felixstowe. *Telex:* 98277 or 98535 (Operations). *FAX:* (01394) 604998. *Contact:* D. Harrington, Managing Director. P. Bennett, Deputy Managing Director. D. Barr, Director of Operations. Captain J.M. Bubb, Port Operations Manager.

FISHGUARD: 52.01 N. 04.58 W. (See Plan)

DOCUMENTS: See "Cardiff".

PILOTAGE: Local Pilot available on request. Pilotage compulsory.

ANCHORAGES: Eastward of a line joining Northern and Eastern breakwaters.

MAX. SIZE: Max. draft 18 ft.

HEALTH: See "Health – All ports" before first U.K. port.

RADIO/VHF: Fishguard Radio, VHF Channel 16 and 14.

TUGS: None.

FACILITIES: Stern loading, car and Roll-on/Roll-off Ferry Port. Also Lift-on/Lift-off crane of 22 tons.

CRANES: 1×6 tons and 1×22 tons.

STEVEDORES: No stevedores – vessels worked by Stena Line staff.

MEDICAL: Doctors available. Hospital facilities 16 miles away.

DENSITY: 1025.
FRESH WATER: Available alongside quay.
FUEL: Available with prior warning.
GANGWAY/DECK WATCHMEN: Ship's crew.
OPENING/CLOSING HATCHES: Crew.
REPAIRS: Minor repairs by Stena Line workshops and contractors.
SURVEYORS:

1. Cargo Surveyor: Captain D. Hughes. Tel: 873880.
2. Lloyd's Surveyor. Tel: (016462) 4811.

CUSTOMS ALLOWANCES: (Crew allowance) 40 cigarettes. No wine or spirits unless proceeding on leave.
AIRPORT: Cardiff, Swansea and Haverfordwest.
POLICE/FIRE/AMBULANCE: Dial 999. British Rail police and Stena Line Port Supervisor on duty 24 hours.
EMERGENCY CO-ORDINATION CENTRE: Coastguard – Tel: Dale 218.
BANKS: Barclays Bank, The Square, Fishguard, Dyfed. Tel: 873226. No telex.

Midland Bank, West Street, Fishguard, Dyfed. Tel: 872232. No telex.

Lloyds Bank, West Street, Fishguard, Dyfed. Tel: 872309. No telex.

STORING: See "Prelims".

1. Vessel can be stored by barge or truck, limited space of approximately 15 ft. width available for trucks.
2. Loading of stores can be carried out from barge with ships equipment.
3. Trucks of limited size can proceed alongside berth.
4. Fork lifts can be used to handle stores.
5. Prior notification to local customs,.
6. Stena Line can assist with stores if given prior notification.

SHORE LEAVE: Allowed.
AUTHORITY: Stena Line Ports Ltd., Fishguard Harbour, Goodwick, Pembrokeshire SA64 0BU. *Tel:* (01348) 404406. *FAX:* (01348) 404443. *Contact:* N. Saul, Ship and Port Manager.

FLEETWOOD: 53.55 N. 03.00 W. (See Plan)

LOCATION: The Port of Fleetwood is situated on the Lancashire coast approximately 38 km. (24 miles) North West of Preston and 42 km. (26 miles) South West of Lancaster.
DOCUMENTS:

Manifests.
Bills of Lading.
Ship's papers.
Crew Lists.
Customs Documents.
Health Documents.

PILOTAGE: Pilot to be picked up off No. 1 Fairway Buoy. Ordered through ship's Agent giving 24 hours notice of ETA.
ANCHORAGES: Good anchorage 1.0 miles North of Fairway in outer limits of harbour in Lune Deeps in 14 fathoms.
RESTRICTIONS: Vessels under power must not navigate any portion of this harbour above Beacon No. 11 at a greater rate of speed than is necessary to navigate safely, also on passing other vessels, either steam or sail, hopper barges, pontoons in tow, etc., in the channels outside the above mentioned Beacon No. 11 and within harbour limits due care must be taken to pass them at a rate of speed that will not cause risk from displacement or what is commonly called "backwash", and that all vessels must be navigated in this harbour strictly in conformity with Rule 9 (Narrow channels) contained in the Collision Regulations for Preventing Collisions at Sea, 1972.

Vessels bound into Fleetwood must not enter the river without being sure they have sufficient depth of water to ensure their getting to the quays or piers to which they are bound.

In the event of any vessel grounding on the "Tiger's Tail" or in any other part of the Fleetwood Harbour, the Master shall not attempt to refloat the vessel by reversing the engines, or by any other means whatsoever, until all incoming vessels following have passed the stranded vessel and the channel is clear of shipping.

Locks are normally open from 2 hours before HW and after HW.

MAX. SIZE: (Within enclosed docks): 58 m. LOA: 14.1 m. beam.

So far as draft is concerned, allowances have to be made for clearing the lock invert. These allowances vary according to the beam of the ship and the following scale may be taken as a guide:

Beam of Vessel (m.)	*Clearance Required* (m.)
11.28	0.69
13.41	1.22
14.02	2.21
14.17 maximum	3.12

HEALTH: See "Health – All ports" before first U.K. port.
VHF: VHF Port Operations and Information Service. Fleetwood Harbour works on Channel 11 and Fleetwood Dock works on Channel 12.

All movements of vessels arriving for and sailing from the Harbour and Docks are controlled by the Harbour Master using the VHF Port Operations and Information Service located in the Harbour Master's Office on the West side of Fleetwood Harbour. (Lat. 53° 55' 30" N., Long. 3° 00' 12" W.).

TUGS: Tug service available.
MEDICAL: Ship's Agent will organise medical attention if required.
DENSITY: 1015 at half tide; 1025 at high water.
FRESH WATER: Fresh water available through stand pipes. Charge according to consumption (sliding scale).
FUEL: All grades of fuel available.
FIRE PRECAUTIONS: No specific requirement outside usual "No smoking" precautions.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
BERTHING: Under normal conditions the lock gates operate for 2 h before and after HW.

There is a Roll-on/Roll-off berth in the harbour. This is a twice d service to Larne for wheeled vehicles and trailer loads.

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Min.)* (m.)	*Max. Size of Vessel Length* (m.)	*Beam* (m.)	*Draft* (m.)	*App d.w*
Fish Dock	800	5.5	107	14.1	5.5	3,50

	To suit vessel					
Isle of Man Berth	91	As required	107	—	4.2	–

Fish Dock: Modern facilities for fish handling, marketing processing are available operated by Wyre Fish Dock Management and a large number of wholesale fish merchants.

Ro-Ro Berths: Separate berths handling Irish Sea and Isle of freight and passenger ferry services are located within the port. An land is available for development of Ro-Ro business.

OPENING/CLOSING HATCHES: Normally carried out by crew.
REPAIRS: One slipway located in Fish Dock with lifting capacity 1,050 tons.
REPATRIATION: Arranged through ship's Agent.
AIRPORT: Squires Gate, Blackpool, 10 miles away.
TIME: GMT in Winter. GMT plus 1 hour in Summer months.
HOLIDAYS: Christmas Day and Boxing Day; New Years Day; G Friday and Easter Monday; Spring Bank Holiday; May 1st; Autumn B Holiday.
POLICE/AMBULANCE/FIRE: Police 999; Ambulance 999; Fire 999
TELEPHONES: Can be arranged through Post Office.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
GARBAGE DISPOSAL: Service available through Wyre Mini S (Tel: 872171, mobile: 01860-771530) every working day.
WASTE OIL DISPOSAL: Service available through B & M Salv Fuels, Fleetwood (Tel: 779650).
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Associated British Ports – Fleetwood, Dock Office, W Dock, Fleetwood, Lancs. FY7 6PP. *Tel:* (01253) 872323. *FAX:* (012 777549. *Contact:* Captain J. Green, Port Manager. Captain P.L. Sh Pilot/Harbour Master. C. Couper, Port Superintendent.

FOSDYKE BRIDGE: 52.52 N. 00.02 W.

APPROACHES: Common approach channel shared with Port of Bos
PILOTAGE: Compulsory. A joint service for the two ports is provide conjunction with the Port of Boston Authority. Tel: (01205) 362114. Channels 16and 12.
MAX. SIZE: Spring tides: Draft up to 5.0 m.; LOA 58 m. (exceptio *with prior approval* 59 m. – 90 m.).

Lowest Neap tides: Draft 2.8 m.; LOA 50 m. – 52 m.

VHF: Fosdyke Port Radio operates on Channel 12. A listening wat maintained during shipping movements on the River Welland.
TUGS: Service operated by wharfingers.
BERTHING: Private wharf 69.50 m. long, giving 1/2 berths alongsi vessel up to 90 m. LOA, subject to hold length not exceeding 70 m. wharf is situated on the North bank of the river, operated Port of Fosdyke Ltd.
FRESH WATER: Available.
GARBAGE DISPOSAL: A skip is provided for disposal of dom refuse, etc.
WASTE OIL DISPOSAL: Not available.
SEAMEN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Port of Fosdyke Ltd., Fosdyke Bridge, Boston, PE20 2DB. *Tel:* (01205) 85240. *FAX:* (01205) 85400. *Contact:* A. or Mrs. P. Fish.

AGENT: Welland Ships' Agents, Fosdyke Bridge, Fosdyke, Lincs. PE20 2DB. Tel: (01205) 85240. Fax: (01205) Contact: A. Blay or (After hours – K. Peak, Tel: (01406) 425092).

FOWEY: 50.20 N. 04.39 W. (See P

PORT LIMITS: The whole of the Fowey River to a line acros entrance to the harbour. A vessel is considered to have arrive entering the harbour unless she is anchored just outside by the await suitable conditions for entering, in which case she is cons to have arrived on being so anchored.
DOCUMENTS:

Crew and Passenger Lists are essential, using IMO forms.
Aliens List is essential.
List of Bonded Stores, including beer.
List of Personal Dutiable Articles owned by Crew.
Bill of Health, if available.
Derat Certificate.
Manifest of all cargo on board.
Copies of Bills of Lading.
Stowage plan, if available.
Normal Ship's Papers.

PILOTAGE: Compulsory within the harbour limits. Vessel requiring Pilot gives ETA as far in advance as possible to Agent. Vessel displays normal signals off port. VHF calling Channel 16, working Channel 9. Pilot cutter (LOA 16.5 m.) has a black hull and orange upperworks. The Pilot boards off entrance. Vessels can anchor South of entrance if necessary.

Pilots VHF station open for messages from arriving ships up to 2 hours before time of ETA received by Agent. Pilots telephone No. (01726) 832816 (Fax: (01726) 832826) (calls are automatically diverted to duty pilot).

RESTRICTIONS: Vessels can enter at any time, if their draft is less than 6.0 m. Otherwise according to tide. Depth of ship channel at LWOST – 7.0 m.

MAX. SIZE: LOA 164 m., beam 18.0 m. Loaded draft of 8.5 m. Vessels of this draft have to be handled at or near high water.

Beam restriction is for loading purposes only. No restriction on manoeuvring.

Max. LOA for cruise vessels in the lower harbour is 200 m.

Vessels up to 164 m. in length are handled, but subject to prior consultation with the Harbour Master and owners of the loading berths.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Land's End Radio, Niton, Pendennis or Portishead.

VHF: For arriving vessels see "Pilotage".

Fowey Harbour Commissioners "Fowey Harbour Radio" calling Channel 16, working Channel 12, ECC Ports Ltd., loading berths operators, "Fowey Port Radio", calling Channel 16, working Channel 12. Note: A listening watch is kept on Channel 12. Vessels are requested to call on this channel in preference.

TUGS: Three diesel tugs are available and normally join vessels at harbour entrance. Ship's lines usually used. No tug required for vessels under 90 m. in length under normal conditions. Only 1 tug required for vessels under 100 m. length. Two tugs required for vessels over 100 m. length. Harbour Master may require particular vessels to enter with tug assistance.

BERTHING: Vessels waiting for berths are normally moored, using their own anchor with their stern to a buoy. On the berth, vessels require long ropes.

Berth	*Max. LOA (approx.)* (m.)	*Depth of Water at LWOST* (m.)
Jetty No. 3	110	7.0
Jetty No. 4	120	7.3
Jetty No. 5/6	170	6.7
Jetty No. 8	164	8.5

CARGO FACILITIES: The port is specially equipped to handle china clay and ball clay in bulk and to a limited extent in bags. Occasional cargoes of timber are handled. Discharge is by mobile crane. There are 5 berths. Berth No. 4 has a bulk conveyor capable of handling up to about 330 t.p.h., Berth No. 6 up to 500 t.p.h. and Berth No. 8 up to 1,000 t.p.h. Berth No. 3 for liquid slurry coal only. 6 tonne and 3 tonne mobile cranes are available.

STEVEDORES: Earliest ETA possible is required, especially when a vessel arrives over week-end.

MEDICAL: If Medical Officer is required on arrival, advise Agent earliest opportunity. Hospital facilities are available.

DENSITY: River fully salt at all states of the tide.

FRESH WATER: Available at all jetties, delivered by hose and rate very variable.

FUEL: Gas oil only available by bunker barge in port (deliveries by sea for quantities over 50 tons from Falmouth or Plymouth) or by road. 2×80 ton storage tanks available in the port. As much notice as possible is advisable.

CONSULS: None.

REPAIRS: Fowey Harbour Commissioners have repair facilities for engine repairs, minor repairs and welding.

SURVEYORS: West Marine Surveyors & Consultants Ltd., Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: (018045) 2604. After normal office hours: Tel: (01803) 842925. Cables: Surveyor, Brixham. Telex: 42962 Survey G.

GANGWAY/DECK WATCHMEN: Not normally employed.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes *or* 100 cigarillos *or* 50 cigars or 250 grams tobacco. Drink over 22% alcohol 0.5 litre *or* under 22% alcohol 1 litre *or* 1 litre fortified sparkling wine. 2 litres still wine. 50 grams perfume. 0.25 litre toilet water. Half this allowance for vessels arriving from home trade ports which for this purpose is from Elbe/Brest range of ports.

REPATRIATION: Facilities exist.

HOLIDAYS: Saturdays, Sundays, and all Public Holidays.

POLICE/AMBULANCE/FIRE: Telephone 999 or VHF Channel 16.

Emergencies in harbour handled by Fowey Harbour Emergency and Pollution Plan under Harbour Master's direction.

TELEPHONES: No arrangements made for connection on board.

SERVICES: Compass adjusting can be arranged.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

DELAYS: There is a possibility of delay in heavy rain and wind.

GARBAGE DISPOSAL: Skips are provided on quays adjacent to loading berths. Special arrangements made by agents and ECC Ports for Haul Waste to provide specific services. In Summer months a skip is afloat in the harbour for leisure craft and ashore at landing points (Port Waste management plan details available from Harbour Master).

WASTE OIL DISPOSAL: Can be arranged by Agent with contractors.

SEAMEN'S CLUBS: Flying Angel Mission to Seaman is in the dock area adjacent to agent's office. Tel: (01726) 833102, 833505.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Fowey Harbour Commissioners, Albert Quay, Fowey, Cornwall PL23 1AJ. *Tel:* (01726) 832471. *FAX:* (01726) 833738. *Contact:* Captain M.J. Sutherland, Chief Executive and Harbour Master. Captain D.I. Gammons, Deputy Harbour Master.

GARLIESTON: 54.47 N. 04.21 W. (See Plan)

LOCATION: Garlieston Harbour is situated approximately 15 km. North of Burrow Head on the West coast of Wigtown Bay in the Solway Firth.

PILOTAGE: Larger vessels require to be piloted.

APPROACHES: The approach to this sheltered harbour is along the Pouton Burn Channel, which can be negotiated by fishing vessels up to 3.5 hours either side of high tide.

RESTRICTIONS: Tidal restrictions.

BERTHING: There is a shipway and 3 main berths which dry out at low tide, so vessels must be able to take the bottom. The longest berth is approximately 85 m., and maximum beam at Berths No. 1 and 3 is 7.5 m. due to siltation. Depth of water at M.H.W.S. is 5.5 m. Vessels up to 1,000 tons can be accommodated at Berth No. 1.

Grain and fertiliser are landed at the harbour which is also used regularly by fishing vessels.

CRANES: None available.

BULK CARGO FACILITIES: None.

MEDICAL: Stranraer Hospital, 32 miles. Dumfries Hospital, 60 miles.

FRESH WATER: Available on quay.

FUEL: By tanker lorry.

REPAIRS: Local craftsman available.

AIRPORT: Prestwick, 70 miles. Glasgow, 100 miles.

POLICE/AMBULANCE/FIRE: Stranraer (01776) 702112. Newton Stewart (01671) 402100.

BANKS: At Whithorn and Newton Stewart.

AUTHORITY: Dumfries and Galloway Regional Council, Council Offices, English Street, Dumfries DG1 2DD. *Tel:* (01387) 53141 (ext. 227/237). *Contact:* Robert Houston, Harbour Master (part-time), 13 North Crescent, Garlieston. Tel: (019886) 00259.

GARSTON: 53.21 N. 02.54 W. (See Plan)

LOCATION: On the North bank of the River Mersey, 10 km. from Liverpool city centre.

DOCUMENTS, HEALTH: and all general information, refer to "Liverpool".

RESTRICTIONS: Locking into/out of Garston commences 3 hours before HW and ceases 3 hours after for vessels up to 76.2 m. length. Larger vessels enter or leave the dock in the period approximately 1 hour before to 30 minutes after HW, when the dock is open to the river.

MAX. SIZE: Length 152.4 m. and beam 19.2 m.

VHF: Docking and berthing instructions can be supplied through (call sign) "Garston Docks" on Hague Channel 20, or through Liverpool Port Radar (call sign) "Mersey Radio" on Hague Channels 12, 18 or 22.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Maximum Size of Vessel* *Length* (m.)	*Beam* (m.)	*Approx Draft* (m.)	*d.w.t.*
Stalbridge Dock	975	152	19.2	8.3*	10,000
Old & North Docks	1,405	152	19.2	8.3*	6,500

* Subject to tidal condition.

Storage and Warehousing: Garston in association with its customers provides covered storage facilities in excess of 16,000 sq.m.

Port Facilities:

	No.	*Capacity*
Cranes – Stalbridge	1 (Scotch Derrick)	32 tonnes
	2	10 tonnes
	2	7 tonnes
	1	6 tonnes
Old	1 (Scotch Derrick)	32 tonnes
	2	7 tonnes
North	2	6 tonnes

Frank Armitt & Son operate, at Stalbridge Dock, a specialised steel handling terminal, offering 1,022 sq.m. of covered storage served by 2×25 tonnes overhead gantry cranes.

A specialised bulk export facility of 2,880 sq.m. at the East side, North Dock has recently been developed between Associated British Ports and Frank Armitt & Son Ltd.

A bulk loading coal shipping terminal is situated in Stalbridge Dock with a loading capacity of 300 tonnes per hour.

STEVEDORES: *Port Working Hours:* By arrangement.

(a) Garston Port Stevedores Ltd.,
Dock Road, Garston, Liverpool.
Telephone: (0151) 4273835
Fax: (0151) 4278110

(b) Mersey Stevedores Ltd.,
Johnsons Lane, Widnes, Cheshire.
Telephone: (0151) 4941040
Fax: (0151) 4941044

(c) North West Stevedores Ltd.,
26-30 South Road, Weston Point, Runcorn, Cheshire.
Telephone: (01928) 575926
Fax: (01928) 568150

DENSITY: 1025.

FRESH WATER: Available Monday to Friday 0800 to 1600 hrs. All watering required outside of these hours is by arrangement.

OPENING/CLOSING HATCHES: Hatches to be opened and closed by the crew except on request.

AIRPORT: Liverpool Airport, 3 km. distant.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.

TELEPHONES: Shore based facilities available.

AUTHORITY: Associated British Ports – Garston, Port Office, Dock Road, Garston, Liverpool L19 2JW. *Tel:* (0151) 4275971. *FAX:* (0151) 4943232. *Contact:* S.F. Pearse, Port Manager.

GIRVAN: 55.15 N. 04.51 W. (See Plan)

DOCUMENTS: Normal U.K. documentation. H.M. Customs attendance obtained by contacting Harbour Master.
PILOTAGE: By local fishermen only – contact Harbour Master.
ANCHORAGES: To seaward clear of channel approaches. This area is hazardous in gales, particularly from the N.W.
RESTRICTIONS: Draft occasionally restricted at MLWS due to siltation. Harbour Master will advise on water depths available.
MAX. SIZE: LOA 50 m., beam 9 m., draft 3.5 m. Vessels with max. draft will only be moved at or near HW.
HEALTH: Under H.M. Customs control.
RADIO: ETA messages, etc. via Portpatrick Radio Station, Call on 2182 kHz – VHF Channel 16 (British ships may call on 2381 kHz but listen on 1792 kHz).
VHF: Harbour VHF ship to shore available 0900 – 1700 hrs. daily, Monday to Friday inclusive. Calling: Channel 16; Working: Channel 12.
TUGS: None.
BERTHING: South Pier Quay: 107 m. long, depth 2.1 m. MLWS.
Ailsa Berth: 49 m. long, depth 2.2 m. MLWS.
Fish Wharf: 42 m. long, depth 2.1 m. MLWS.
Fish Quay: 62 m. long, depth 2.2 m. MLWS.
Note: Fish Wharf and Fish Quay used only for fishing vessels.
CRANES: No port cranes available. Mobile cranes can be hired from local companies.
MEDICAL: Small local hospital, contact Harbour Master for assistance.
DENSITY: Water brackish, being sea water with fresh water river discharge.
FRESH WATER: Available.
FUEL: Diesel fuel only.
FIRE PRECAUTIONS: Normal safety procedures.
CONSULS: None, nearest at Glasgow.
REPAIRS: Small engine and deck gear repairs may be carried out alongside.
DRY DOCKS: None. 2 slipways, max. length of vessel which can be slipped, 21 m. – 33 m. overall.
SURVEYORS: Not available.
GANGWAY/DECK WATCHMEN: None. If desired would have to come from ship's crew.
HATCHES: Worked by crews.
CUSTOMS ALLOWANCES: Apply to H.M. Customs Officers.
CARGO GEAR: Hire-in mobile cranes or ship's own gear.
REPATRIATION: No arrangements.
AIRPORT: Prestwick, distance 38.4 km. Glasgow, distance 91 km. Internal U.K./Europe/Scandinavian and North Atlantic services.
TIME: Winter – GMT. Summer – March to October, British Summer Time i.e. 1 hour ahead of GMT (dates as announced).
HOLIDAYS: Cargo working unlikely on Christmas Day and New Year's Day.
POLICE/FIRE/AMBULANCE: In emergency dial 999 otherwise telephone numbers are: Police: (01465) 3587. Fire: (01292) 267471. Ambulance: (01465) 2571.
EMERGENCY CO-ORDINATION CENTRE: Marine Rescue Co-ordination Centre, (H.M. Coastguard), Greenock. Tel: (01475) 29014, 29988. Telex: 777006.
TELEPHONES: No ship links.
SERVICES: No special services available locally. Compass adjuster available from Glasgow.
BANKS: Local banks only.
STORING: See "Prelims".
3. Yes.
4. Yes.
There is no accommodation for storage.
SHORE LEAVE: Unrestricted after Customs clearance.
IDENTIFICATION CARDS: Clear requirements with Customs.
GARBAGE DISPOSAL: Refuse bin available adjacent to Harbour Master's Office.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
REGULATIONS: No unusual regulations.
DELAYS: Normal breakdown/weather delays.
GENERAL: The harbour is formed at the mouth of the river known as "Water of Girvan". The water in the channel and basin is, therefore, a mixture of sea and fresh water.

A breakwater protects the inner part of the channel on the North side. A timber and steel sheet pile jetty protects the basin from river scour. Access is hazardous in N.W. gales.

In 1988 the harbour channel was deepened to give a minimum depth of water of 3 m. at MLWS. Siltation is a continuing problem and the depth available has been reduced as noted in previous sections.

The harbour is primarily a fishing port. However, it is used regularly by small tankers and cargo vessels of the coasting type, bringing in raw materials for local industry. As may be noted, berthing accommodation is very restricted.
AUTHORITY: South Ayrshire Council, Department of Strategic Services, Wellington Square, Ayr KA7 1DR. *Tel:* (01292) 612000. *FAX:* (01292) 612143. *Contact:* Neil McC Provan.
R. Lietch, Harbour Master, Girvan. *Tel:* (01465) 713648.

GLENSANDA: 56.34 N. 05.32 W. (See Pla

LOCATION: Glensanda is on the Western shore of Loch Linnhe so 9 miles North of Oban in approximate position 56° 34' N., 05° 32' Glensanda is over 6 miles along a track from the nearest road and t road is only a narrow highland lane, thus it is necessary to apprec that Glensanda is remote and that its services are severely restric The only commodity that can be supplied at Glensanda is crush granite.
PORT LIMITS: The limits of the Company's jurisdiction are from posi 56° 35.862' N., 05° 29.982' W. on the shore, S.E. to posi 56° 34.826' N., 05° 27.922' W., then S.W. to position 56° 31.165' 05° 33.975' W., then N.W. to the shore at position 56° 31.839' 05° 35.312' W.
DOCUMENTS: Usual U.K. requirements. Customs attend from Oba
APPROACHES: The approaches to Glensanda Harbour and to the be are deep and clear. The port is well served by a Pilot, mooring launch lighthouses and beacons. Vessels can enter Loch Linnhe from the So via the Firth of Lorne, between the islands of Mull and Lismore, and fr the North via the Sound of Mull.
PILOTAGE: Compulsory for vessels over 6,000 d.w.t. Vessels un 6,000 d.w.t. generally berth without a Pilot, under the Harbour Master instructions from the jetty. Pilot boards vessels over 6,000 d.w.t at t Southern harbour limits in position Lat. 56° 31' N., Long. 05° 35' 3.5 miles from Glensenda Jetty.
ANCHORAGE: Large vessels: 2 miles South of Glensenda Jetty in 60
Vessels under 6,000 d.w.t.: East of Jetty in 25 m.
RESTRICTIONS: Berthing of conventional Panamax vessels is genera restricted to daylight hours only. Unberthing can be performed at a time.
MAX. SIZE: Panamax or 100,000 d.w.t. – 120,000 d.w.t. part load.
VHF: The Quarry Office and Pilot maintain watch on Channel 14.
TUGS: 1 tug (25 ton bollard pull). The tug is available from the Ri Clyde at 14 hours notice for berthing large vessels without bow thruste
RADIO: Masters should keep Glensanda well informed of their approa with notices to the Glensanda Harbour Master (Telex: 777792. Ca address "Glensanda Oban") 5 days, 3 days, 2 days and 1 day prior arrival. Over the last 3 days these ETA's should be timed to rea Glensanda for their opening (0700 hrs.) to permit their day's work to planned and to be ready for the ship.

Ships are asked to guard Portishead Radio Station whilst on pass to Glensanda as the Agent and Harbour Master will use that station preference should they have a message for the ship.

Masters are especially asked to telex Yeoman (Morvern) Ltd. (S "Authority") with the following details from their previous port:
1. Ship's particulars.
   (a) Ship's name.
   (b) Master's name.
   (c) Flag.
   (d) Radio call sign.
   (e) Satcom number.
   (f) Marine telex number.
   (g) Summer deadweight.
   (h) Gross registered tonnage.
   (i) Number of hatches.
2. Proposed Stowage.
   (a) Tonnage to be loaded in each hold.
   (b) Grade to be loaded in each hold.
   (c) Sequence and Tonnages in which each hold is to be loaded

VHF: All vessels should call "Glensenda Harbour" on VHF Channe when passing Lady Rock Lighthouse, when approaching from the So or, on entering Loch Linnhe after clearing the Sound of Mull, w approaching from the North.

VHF watch is only maintained when vessels are expected, and w vessels are in port.
BERTHING: The depth of water at the berth is at least 12.3 m. at c datum. To this depth may be added the rise of tide in the range of 0. at low water to a maximum of 4.4 m. at high water (spring tides).
LOADING: *Conditions:* The matter of ballast is of particular interes manoeuvrability must be maintained. The vessel's propeller and thr must be fully submerged for berthing.

The air draft of the ship loading arm can be raised to 21 m. above highest high tide, so high that there is no need to ballast deeply t a ship below it.

The shiploader is intended to load at 6,000 tonnes per hour and almost to achieve this speed if demurrage is to be avoided on s contracts of affreightment.

It is Glensanda's experience that large bulk carriers (i.e. Pana class) can berth and rapidly deballast if they approach with their tanks, ballast hold and top wing tanks full and their double bottom b tanks empty. If the ballast hold is needed for cargo, it is of no con if its tank top is damp or even has puddles when it is loaded.
CARGO: The aggregate is manufactured in 4 basic grades, by diam
(a) 40 mm. – 20 mm. – for rail ballast.
(b) 20 mm. – 10 mm. – for concrete.
(c) 10 mm. – 5 mm. – for road surfacing.
(d) 5 mm.– dust – for various uses.

These basic grades are frequently mixed to form special cate for specific requirements. The final grades must not be co-mi For each final grade, hold separation is required.

Base Grades Diameter (mm.)	*Stowage Factors* (Tonnes per cu.m.)	*Angles Repos*
(a) 40 – 20	1.37	36°
(b) 20 – 10	1.45	38°
(c) 10 – 5	1.46	39°
(d) 5 – dust	1.56	43°

(i.e. every grade stows at about 24 cu.ft. to 28 cu.ft. per long ton

All holds must be thoroughly cleaned prior to arrival Glensa remove all traces of previous cargo residues.

On self-discharging vessels, all conveyor belts, transfer chutes, etc. must be thoroughly cleaned of all previous cargo residues.

Holds will be inspected at Glensenda prior to commencement of loading.

For loading aggregate, holds may be damp, as the material is immune to fresh water. On completion of loading, hatches are to be covered to reduce the weight of rain water in the cargo. However, salt water is an unacceptable contaminant and must be avoided. Hatches must be watertight.

The cargo is loaded by automated shiploader. This machine can span the full length and width of all the hatches of a 60,000 ton – 70,000 ton bulk carrier without having to shift the ship. The loader operates at up to 6,000 tonnes an hour and can distribute the cargo without peaks forming. It is operated from the deck of the ship by radio control allowing direct contact between the ship's staff and the loading supervisor.

Loading is performed around the clock on every day of the year except for Christmas Day and New Year's Day. Rain will not interrupt loading but the shiploader will cease work if the wind speed exceeds 48 knots.

MEDICAL: Emergency medical services are available. Glensanda has a small airstrip. The Yeoman staff includes first aid men and a doctor is available from Oban's small hospital and Port Appin.

DENSITY: 1023 – 1025.

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: If required, surveyors attend from Glasgow.

Belt weight figures used for Bill of Lading.

REPAIRS: Repairs are not to be contemplated, partly because the weather can rapidly deteriorate and partly because there is no service for repairs in the vicinity.

REPATRIATION: Not recommended.

HOLIDAYS: Christmas Day and New Year.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

GENERAL: *Visitors:* To visit Glensanda, other than by ship, needs Yeoman's co-operation. Visitors can take a train to Oban or fly to Glasgow and take a car to Yeoman's Rhugh Garbh depot which is some 10 miles North of Oban on the A828 main road towards Fort William. Yeoman's passenger launches ply on a regular schedule between Rhugh Garbh and the Glensanda Quarry. This journey takes about 30 minutes to cover the 8 miles down Loch Creran and across Loch Linnhe to the quarry.

Harbour Conditions: Loch Linnhe is free of swell as its approaches are well protected by the islands of Mull and Lismore.

The waters of Glensanda Harbour are virtually free of tidal streams at any depth. A sluggish stream of up to 1 knot has been irregularly observed during the fall ebb of spring tides.

Glensanda's times of high and low water are observed to follow closely those of Oban. Glensanda has a tide pole clearly visible from the berth. It is noticeable that the level of high water stands for about 90 minutes after each high tide before falling rapidly.

Wind observations have been made from a meteorological station set on a knoll some half a mile from the berth. At the berth the Harbour Master believes winds are less strong and more inclined to blow from the N.E. or S.W. It is difficult to draw any conclusions, but Glensanda is a windy place. Winds tend to vary in strength and direction in an unpredictable manner though S.W. and N.E. winds do predominate. The berth lies along this S.W./N.E. axis.

Services: Glensanda ought not to be depended upon for any services except those to cover the immediate work in hand of loading aggregate.

Cash: By prior arrangement and transfer, the Agent can supply the Master with cash, in Sterling, on arrival.

Notary: A local Oban Notary can accept Notices of Protest, though the time taken to reach his office and to return to the ship may delay vessel's sailing.

AGENCY: *The Glensanda Harbour Agent:* Morvern Shipping Agency Limited, Rhugh Garbh Depot, Barcaldine, Oban, Argyll PA37 1SE. Tel: (01631) 730441. Telex: 777792. Fax: (01631) 730460. Cables: "Glensanda Oban".

The Quarry Office maintains radio watch on VHF Channel 14 during office hours and around the clock when a ship is approaching or is in the port.

The Glensanda Harbour Master shares these communication facilities with the Agent. The Harbour Master's Office and home telephone number is (01631) 73537. He may be reached on VHF radio by calling "Glensanda Harbour Master".

The Agent can provide Masters with details of any other services that are required. H.M. Customs attend ships in the normal manner. Masters can always contact emergency services if the Agent is not available through the Oban Coastguard on VHF Channel 16.

AUTHORITY: Yeoman (Morvern) Limited, Rhugh Garbh Depot, Barcaldine, Oban, Argyll PA37 1SE. *Tel:* Office (01631) 730441. *Telex:* 777792. *FAX:* (01631) 730460. *Cables:* Glensenda Oban. *Contact:* Captain J.A. Jackson, Harbour Master. Tel: (01631) 730537 (Office and house on-site), 01967-402470 (Home, when not on-site).

GOOLE: 53.42 N. 00.50 W. (See Plan)

PORT LIMITS: Goole is a river port with Conservancy jurisdiction to the junction of rivers Humber, Ouse, Trent. However, laytime commences from commencement of next normal working shift after ship is on berth and ship's Agent has issued "Notice of Readiness". This may be 0800 hrs. or 1300 hrs. dependent on time of issue of notice.

Precedence of order of arrival of vessels is determined by arrival time at Ocean Lock Entrance – Goole Docks.

DOCUMENTS:

Bills of Lading/Manifests (prepared by Agents at port of origin).
"Imperfect" Customs Entry.
Request (to work vessel).
*Request for Immigration Officer to be in attendance – if carrying passengers.
*Crew List to Immigration Officer (for foreign personnel).
Ship's Register.

*Ship's Agent will normally notify Immigration Officer.

PILOTAGE: Compulsory from Spurn to Goole, except for vessels claiming exemption by reason of length or by possession of a Pilotage Exemption Certificate.

ANCHORAGES: Bull Anchorage on chart of Humber Estuary, or in Hull Roads, otherwise only on advice of Pilot.

RESTRICTIONS: State of tide, Springs or Neaps. Port entered during tidal hours, 3 hours 30 minutes before HW to 1 hour (approx.) after HW, according to draft. Pilots will advise.

Locks: 3 entrance locks, largest being 104 m. long and 24.4 m. wide. Depth on sill 8.0 m. (MHWS) and 6.0 m. (MHWN).

MAX. SIZE: Subject to suitable tides, vessels of approximately 100 m. overall length, 5.5 m. draft, 24 m. beam and 4,500 d.w.t. (approx.) can be accepted. It should be noted that vessels with a beam in excess of 13.4 m. will find certain berths in the port inaccessible due to bridgeway restrictions.

HEALTH: Pratique issued by H.M. Customs Waterguard (in absence of Port Health Official). Pratique accepted when entering after calling at another port in the U.K.

Also see "Health – All Ports" before first U.K. port.

TUGS: Tugs available but not normally used. If required, to be arranged through Ship's Agent.

BERTHING: Berthing instructions given to vessel on arrival at entrance locks. No specific requirements.

RADIO: Via Humber Radio, call sign GKZ – call on Channel 16. Give ship's name and call sign and pass message.

VHF:

Station	*Call Sign*	*Channel No.*	*Operational Times*	*Remarks*
Vessel Traffic Services Humber, Queen Elizabeth Dock, Hedon Road, Hull	"Vee Tee Ess Humber"	16 12	Continuous watch maintained	Calling and safety. Navigation and safety information etc. for Rivers Humber, Ouse and Trent.
Blacktoft Jetty	"Blacktoft Jetty Radio"	14	3 hours before HW Goole until 1 hour after HW Goole	Port Operations and berthing instructions for Blacktoft.
Goole Docks	"Goole Docks Radio"	14	Continuous watch maintained	Port operations and docking instructions for Goole.

Also see "Hull".

SPECIALISED CARGO HANDLING FACILITIES: Boothferry Terminal for specialised container handling, 26,000 sq.m. hard standing and sheds, equipped with 4 heavy duty fork lift trucks, Liebherr gantry crane and a 70 tonne capacity crawler crane.

Aldam Terminal served by mobile container crane and Scotch Derrick crane on Jubilee Quay.

1 mobile shiploading conveyor for grain, rate 100 t.p.h.

10×7.5 tonne and 5×6 tonne quay cranes, equipped with suitable grabs for sand, ores, fertilisers, coal, grain, sulphur, scrap, etc.

5 mobile cranes up to 40 tonne capacity and fleet of forklift trucks with capacities up to 35 tonnes and capable of lifting 20 ft., 30 ft. and 40 ft. containers.

3×32 tonne Scotch derrick cranes for container handling, one at Stanhope Dock, one at Jubilee Quay East and one at Jubilee Quay West.

50 tonne electric travelling crane for heavy lifts.

2 Ro/Ro ramps for abnormal loads of up to 450 tonnes – otherwise no special facilities needed as water is maintained at a constant level.

Some bulk liquids (creosote, tar), direct to or from road tanker vehicles.

Timmgrain Ltd. operate 2 separate silo facilities which give 13,000 tonnes of storage capacity for grain, maize, maize products, etc.

Damac Bulk Handling Ltd. operate 2×3,000 tonne silos for cement cargoes. Discharge rate 180 tonnes per hour.

STEVEDORES: Arrangements made by ship's Agent who should be given ample notice of time of arrival of vessel.

Port Working Hours:

Monday to Thursday	0800 – 1200	1300 – 1700
Friday	0800 – 1200	1300 – 1600

Overtime available 24 hours a day, 7 days a week.

MEDICAL: Ship's Agent will arrange for attendance of doctor on notification. Doctor's, dentists and hospital services available. Ship's Agent can arrange service required.

DENSITY: Water in Goole Docks is fresh water and is maintained at constant level. Entry is by locks. Density 1000.

FRESH WATER: Delivery by waterboat through hose pipes. Rate 30 t.p.h.

FUEL: All grades available on reasonable notice being given to Ship's Agent.

FIRE PRECAUTIONS: No specific precautions unless there are exceptional circumstances, when special arrangements can be made with local Fire Service.

CONSULS: France, Netherlands and Denmark.

REPAIRS: All types of deck and engine repairs possible by local ship repairers.

DRY DOCKS: Dry Dock No. 2: 91 m. length, 15.2 m. width at entrance, 4.75 m. depth on sill. One other dry dock. The water in the wet docks at Goole is maintained at a constant level and all dry docks are entered direct from the wet docks.

GANGWAY/DECK WATCHMEN: Necessary. Usually provided from crew. Otherwise by negotiation locally.

OPENING/CLOSING HATCHES: Responsibility of crew.
SHIP CERTIFICATES:

- Ship's Register (including load-line)
- Ship's Gear Certificates (when gear is used in port)
- Radio Safety
- Life-Saving
- Light Dues
- Change of Articles
- Derat Certificate

CARGO GEAR: Normally not required, as ample port facilities available.
REPATRIATION: Arranged by Ship's Agent.
AIRPORT: Humberside Airport. Daily services to Amsterdam, Aberdeen, Bergen, Edinburgh, Newcastle, Norwich, Stavanger and Teeside.
TIME: GMT in Winter; GMT plus 1 hour in Summer months.
HOLIDAYS: Facilities available on all Bank Holidays, except Christmas Day, Boxing Day and New Year's Day.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
EMERGENCY CO-ORDINATION CENTRE: Contact Port Manager's office.
BANKS: Midland Bank, Tel: 762401. Barclays Bank, Tel: 762431. National Westminster Bank, Tel: 764541.
TELEPHONES: No arrangements for ship connection.
GARBAGE DISPOSAL: Waste disposal skips placed at a number of locations on quays. Skips emptied on a weekly basis.
WASTE OIL DISPOSAL: Disposal by road tanker available through ship's agent.
SEAMEN'S CLUBS: Goole Mariners Club, Bridge Street, Goole. Tel: (01405) 764730, 762058.
CURRENCY: U.K.Pound (U.K.£).
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: May be required to be produced to Immigration Officer or H.M. Customs Offical, especially in the case of foreign flags.
REGULATIONS: Visitors to vessels require permits from Port Authority and Master or ship's Agent. Smoking not permitted ashore in dock area.
AUTHORITY: Associated British Ports – Goole, East Parade, Goole, North Humberside DN14 5RB. *Tel:* (01405) 762691 (6 lines). *Telex:* 57626. *FAX:* (01405) 767419. *Contact:* C. Silvester, Port Manager.

GRANGEMOUTH: 56.01 N. 03.43 W. (See Plan)

PORT LIMITS: At Grangemouth a vessel is not considered to be an "arrived vessel" until she is tied up at the allocated berth.
DOCUMENTS:

- 1 Crew List.
- 1 Passenger List.
- 1 List of all high duty goods in crew's possession.
- 1 Cargo Manifest.

All Valid Certificates.
PILOTAGE: Compulsory in river. Pilot boards at Inchkeith. Pilot boat on VHF, also see "Radio".
ANCHORAGES: North of Grangemouth West Buoy, 2 fathoms. Charleston Roads 5 fathoms. East of Inchkeith, up to 8 fathoms.
RESTRICTIONS: 24 hour locking system in operation depending on draft. The height of the tide must always be taken into account when dealing with larger vessels.
MAX. SIZE: Dry cargo vessels: Length 600 ft., beam 90 ft.

Tankers: Length 575 ft., beam 90 ft. Draft according to state of tide. Vessels other than tankers max. draft 25 ft. 6 in. Tankers, up to 34 ft. max. draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick, Stonehaven and Cullercoats coastal stations and Forth Radio.

Port VHF (FM) Communications: Station: Lock Control Office, Lock Entrance, Grangemouth. This centre will maintain a continuous watch. Call sign: Grangemouth Docks.

Channel 16 (156.8) calling and safety. All vessels should maintain a listening watch on this Channel and use it to establish contact with Grangemouth Docks. Once contact is established the Duty Operator will request vessels to shift to the Port Operations Channel.

Channel 14 (156.7 MHz), Port Operations. A working Channel restricted to messages relating to the movement and safety of ships, and in emergency, to the safety of persons.

Channel 10 (156.6 MHz), Inter-ship. A working Channel for tug-to-tug and tug-to-bridge communications.

Channel 6 (156.3 MHz), Inter-ship. A working Channel for communication with other vessels.

Channel 9 (156.5 MHz). A working Channel for tug to tug and tow to tow communications.

No message of a personal character or messages of any other nature than those pertaining to the general navigation and safety of ships and persons within the Port Area can be accepted.
TUGS: Tugs can join vessel at Hen and Chicken Buoy or Lock Gates and should be pre-booked. Tugs' lines used. 2×25 ton bollard pull tugs available.
BERTHING: The water in Grangemouth Docks is maintained at the same level by impounding pumps. On passing through the lock entrance berthing is allocated according to the nature of the cargo and draft of vessel.

The depth of water available at the berths varies in each dock, the max. depths being approx.: Grange Dock 26 ft.; Carron Dock 23 ft.; Old Dock 17 ft.

CARGO HANDLING FACILITIES: Bulk cargoes can be handled at m berths within the port. The East Wall berth has 4×10 ton grabbing cran 2×7.5 tonne mobile cranes are available. Other berths have 10 and 6 cranes. 1×35 tonne Scotch derrick. Container berth is 1,000 ft. long a has 2×32 ton transporter cranes.

A Ro-Ro berth in operation. Liquid chemicals and LPG Carriers a handled at the LPG berth and BP jetties. No. 1 North Jetty, which i common user jetty handles chemicals.
STEVEDORES: No particular advice necessary to stevedor Essential, however, advise Agent 24 hours prior arrival, who will adv stevedores.
MEDICAL: No advance notice necessary. Hospital facilities availabl immediate district.
TANKERS: B.P. Refinery (Grangemouth) Limited. Private jetties Eastern Channel. South Side Jetties "J2" and "J3" 34 ft. "J4" and "J 19 ft. 6 in. North Side Jetties "E1" and "E2" 34 ft. No. 1 North Side Je pipelines connected to Ross Chemical and Storage Co. are 1.5 nitrogen line, 6 in. chemical line, 10 in. heavy fuel line, 2 in. fresh wa supply, 8 in. motor spirit line, 8 in. gas oil line. Draft at No. 1 No 32 ft. 6 in.
DENSITY: 1019 average.
FRESH WATER: Available in most berths. Watermen supervise deliv on request. Delivery rate varies depending on berth.
FUEL: All grades available from oil installations.
GANGWAY/DECK WATCHMEN: Not necessary but can be done ship's personnel.
OPENING/CLOSING HATCHES: Custom of port is crew open and clo hatches but stevedores will do so if required.
CUSTOMS ALLOWANCES: At the discretion of Local Custo Inspector. Normal allowances are equivalent of 5 ounces tobacco man and equivalent of 1 bottle of wine per man. Allowances may halved for home trade vessels. Vessels in port more than 3 or 4 da may receive extra allowances.
CERTIFICATES: For Customs Clearance valid Certificates in resp of Radio, Load Line, Construction, Safety Equipment, Deratisati necessary.
CONSULS: Norwegian, Danish and Swedish Consuls available loca
REPAIRS: All types of repairs can be carried out afloat.
DRY DOCKS: Carron Dry Dock: Length 350 ft., breadth 50 depth 22 ft.
SURVEYORS:

(1) Macleod & McAllister Ltd., Old Granary Office, Meadowside Qu Glasgow G11.
(2) Thomas Nicol and Son, 11 Bothwell Street, Glasgow G2.
(3) S. A. Greer & Co., 15 North Claremont Street, Glasgow G3.
(4) E. K. Wallace & Son Ltd., 11 Bothwell Street, Glasgow G2.
(5) Lloyd's Register of Shipping, 27 Thistle Street, Edinburgh.

REPATRIATION: All facilities exist.
AIRPORT: 1 hour from Glasgow and Edinburgh airports wh numerous connections for London thence world wide travel.
TIME: British Standard Time (1 hour ahead of GMT). GMT during Wi months.
HOLIDAYS: First 3 weekdays in January; Easter Monday; 1st Mon May; 3rd Monday July; 2nd Monday September; Christmas Day a 26th December.
POLICE/AMBULANCE/FIRE: In public telephone dial 999 and ask appropriate service. With dock circuit telephone dial 222 and ask Police/Fire/Ambulance.
EMERGENCY CO-ORDINATION: Coastguard Fifeness Tel: 013 666. Major Port Emergencies are controlled by the Police dial 99 contact through Harbourmaster Grangemouth Tel: 486839.
SERVICES: Compass adjusting, calibrating, etc., can be done in n No equipment for tank cleaning but can accept tank washings ash
BANKS: Royal Bank of Scotland, La Porte Precinct, Grangemouth.

Bank of Scotland, La Porte Precinct, Grangemouth.
STORING: See "Prelims".

Vessels may be stored by trucks alongside dry cargo berths. T are no facilities for storing, by trucks, vessels berthed at jetties in Eas Channel.

Trucks may, by prior arrangement, proceed alongside dry cargo be to store vessels.

Stevedores fork lifts may be employed to handle ship's stores.

Customs regulations are in force for stores remaining on board. De of stores, including bonded goods such as spirits, etc., must be sup to Customs on arrival, and a constant check is kept whilst the ship Port. Regarding stores loaded aboard, any bonded goods mus presented to Customs for inspection and approval. Restricted amo only are permitted.

Local riggers may be employed for storing.
SHORE LEAVE: Allowed.
GARBAGE DISPOSAL: Skips are provided on quayside an collected as required.
WASTE OIL DISPOSAL: Collection by road tanker by Kelvin Wa
SEAMEN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Forth Ports PLC, Dock Office, Grangemouth, Stirling FK3 8UE. *Tel:* (01324) 482591. *Telex:* 777432. *FAX:* (01324) 66 *Contact:* A. McEwen, Port Manager.

GRANTON: 55.59 N. 03.13 W. (See Plan)

DOCUMENTS: See "Leith".
PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station West of Fairway Buoy at Longitude 3° West. Contact with pilot cutters can be made on VHF Channel 16 and R/T 2182 kHz. Pilotage not compulsory for vessels passing South of Inchkeith Island.
ANCHORAGES: Good holding ground at Leith roadstead 8 m. – 19 m. at C.D. Request should be made to Forth Navigation Service for suitable anchorage position.
RESTRICTIONS: The entrance between the breakwaters is 103 m. in width. The rise of tide, 5.182 m. at Springs and 3.658 m. at Neaps, permits the entry or exit of vessels up to 7.07 m. draft at HW.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Forth, Stonehaven and Cullercoats radio stations.
RADAR/VHF: Port and estuary radar service. Contact should be made with "Leith Harbour Radio" for berthing instructions on VHF Channel 12. Forth Navigation Service should be contacted on VHF Channel 71 by all vessels passing Forth Ports Authority seaward limit (line joining North and South Carr Beacons), working on Channels 20 and 12.
TUGS: Sound signal for vessels requiring tug services is four long blasts. Tugs, if required, join the vessel in the roads. Tugs towing gear available, and compulsory.
BERTHING: Middle Pier: Quayage 210 m. max. depth 5.1 m. LWOST. In addition, there is a 122 m. crosspiece at the end of the pier where depth of water is 5.1 m. LWOST. Ro-Ro ramp available.
West Pier: Closed to all traffic.
MEDICAL: No advance notice of medical attention required. All hospital facilities available.
TANKERS: Jetty closed.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject 24 hours notice in advance.
CONSULS: See "Leith".
REPAIRS: Facilities available for all minor repairs.
AIRPORT: Edinburgh Airport, served by regular airlines, situated about 6 miles away.
HOLIDAYS: Public holidays observed annually: Third Monday in April; third Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd and 3rd January.
AUTHORITY: Forth Ports PLC, Leith Port Office, 1 Prince of Wales Dock, Edinburgh EH6 7DX. *Tel:* (0131) 5544343. *Telex:* 72192. *FAX:* (0131) 5551212. *Contact:* Captain H. MacLellan, Harbour Master – Leith and Granton. A. Burns, Port Manager.

GREAT YARMOUTH: 52.34 N. 01.44 E. (See Plan)

DOCUMENTS: Usual U.K. requirements.
PILOTAGE: A 24 hour service is provided, subject to 8 hours notice and confirmation 2 hours before arrival. Pilots can be contacted on VHF Channel 12.
RESTRICTIONS: When large or awkward vessels are navigating within the port, it may be necessary to hold or slow down other vessels.
TRAFFIC CONTROL SIGNALS:
By Night:
(a) When entrance to the Haven is *prohibited* 3 fixed red lights vertically disposed (3 F.R (vert)) 2.0 m. apart, will be exhibited on the South Pier brick building, the lower being at a height of 11.0 m. above MHWS, arc of visibility 235° (T) through 270° (T) to 295° (T) from seaward.

In the event of it not being possible to exhibit these lights, the night signal for prohibiting entrance to the Haven will be the extinguishing of: The Brush Light, the Leading Lights, the Main Light and the South Pier Lights and/or as advised by Yarmouth Port Radio on VHF Channel 12.

(b) Control of vessels proceeding South down the Haven:
3 fixed red lights vertically disposed (3 F.R. (vert)) 2.0 m. apart are exhibited on the North side of the White Port Control Office Gorleston at the root of the South Pier, to indicate that NO vessel when proceeding down the Haven is to come South of the lifeboat shed on the Gorleston side of the river.

In the event of failure of these lights vessels will be advised by Yarmouth Port Radio on VHF Channel 12.

By Day:
(c) The lights as described in (a) when entrance to the Haven is prohibited also the lights as described in (b) for controlling vessels proceeding South down the Haven will also be exhibited during the day. In the event of failure, vessels will be advised by Yarmouth Port Radio on VHF Channel 12.

TIDAL SIGNAL: When the tide is flooding between the piers, a quick flash amber (Q.Am) is exhibited on the South Pier brick building, arc of visibility from 235° (T) through 270° (T) to 295° (T) from seaward.
Also see "Bridges".
MAX. SIZE: Max. length 138 m., max. draft 5.7 m. HWOST.
With a tidal range of only 1.9 m. and a minimum entrance depth of 4.3 m., Great Yarmouth can be used by vessels up to 4,000 d.w.t. and with a length of up to 120 m.
HEALTH: Usual U.K. procedure. Contact Port Health Officer for Derat, Fumigation, Quarantine or Livestock Quarantine.
VHF: Masters of vessels intending to enter the harbour must notify the Harbour Master at least 1 hour before arriving off South Pier, giving ETA, max. draft, gross tonnage, any dangerous cargo and last port of call (Also see "Pilotage"). Masters must also obtain clearance before starting to navigate through the entrance between the piers.
Where possible, VHF Channel 12 must be used for giving information and obtaining clearance to navigate from the Harbour Master.
Yarmouth Radio keeps a continuous watch on Channels 12 and 16. The Haven Bridge operates on Channel 12.
Reporting: All vessels over 50 g.r.t. and any others fitted with VHF must report to Yarmouth Radio when passing Ocean Terminal, Atlas Berth and Turntide Jetty (Breydon Water), giving direction of travel.
TUGS: The port's 550 h.p. tug *Hector Read* has a bollard pull of nearly 7 tonnes and can be used for all harbour work. It is fully equipped with salvage and fire fighting pumps. Contact should be made through the Harbour Master.
BERTHING:
East Side:
Bowling Green Wharf: Length 65 m. Bulk cargoes.
South Quay: Length 475 m. General cargo and Lay-By.
Mayer Parry: Length 98 m. Scrap cargoes.
ABC Wharf: Length 123 m. Repairs afloat.
Atlas Terminal: Length 460 m., including Ro-Ro, container and general cargo.
Wood Group Berth: Length 349 m. Offshore vessels and bunkering.
Milpark Berth: Length 59 m. Offshore vessels.
Former Phillips Berth: Length 85 m. All vessels.
GY Warehousing: Length 154 m. General cargo and offshore vessels.
Ocean Terminal: Length 130 m. Heavy lift quay.
Amoco Berth: Length 131 m. Offshore vessels.
East Quay: Length 160 m. General and bulk cargoes.
Lay-By Berth: Length 100 m. Offshore and general cargoes.
North Discharge Berth: Length 158 m. Lay-by, offshore and general cargoes.
South Discharge Berth: Length 82 m.
Discharge Bunker Terminal: Length 172 m., offshore and general cargoes.
South Denes Marine Base: Length 320 m. Offshore vessels.
West Side:
Clarkes Quay: A.W. Cushion. Length 78 m. Durum wheat.
Bunns Quay: Length 125 m. Fertiliser imports.
Southtown Wharf: Length 73 m. General and bulk cargoes.
British Gas berth: Length 76 m. Offshore vessels.
Turmerics Berth: Length 170 m. Fabrication Yard.
Portland Wharf: Length 120 m. Offshore vessels.
Richards Shipbuilders: Length 152 m. Ship construction repair yard.
Palgrave Browns: Length 225 m. General and bulk cargoes.
Yeoman Berth: Length 179 m. General and bulk cargoes.
Bollard Quay: Length 394 m. General cargoes and lay-by.
Gas House Quay/Grootcon Quay/EAE Quay: Length 370 m. Offshore vessels, general cargoes and fabrication.
CRANES: The Port Authority have 5 mobile cranes, including 3 that can lift up to 24 tonnes and two that can lift up to 32 tonnes. All are equipped with grabs and hooks. Truck mobile cranes up to 80 tonnes S.W.L. and higher are available from the Port Authority.
BRIDGES:
Haven Bridge Lights:
1. Western Buttress: At both the North and South ends, 2 fixed red lights vertically disposed (2 F.R. (vert)).
2. Eastern Buttress: At both the North and South ends, 2 fixed green lights vertically disposed (2 F.G. (vert)).
3. At Centre Span: On both the North and South sides, a fixed red light (F.R.).
4. Traffic Control Signals: By Day and Night.

When *passage* through the bridge is *prohibited* from the South going upriver, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Eastern Buttress.

When *passage* through the bridge is *prohibited* from the North going downriver, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Western Buttress.

In the event of failure of these lights, vessels will be advised by the Haven Bridge Master on VHF Channel 12.

Breydon Bridge Lights:
1. Southern Buttress: On both the upriver and downriver ends, 2 flash red lights vertically disposed every 5 seconds (2 Fl.R. 5s (vert)).
2. Southern Dolphins: On both the upriver and downriver, 2 fixed red lights vertically disposed (2 F.R. (vert)).
3. North Buttress: On both the upriver and downriver ends, 2 flash green lights vertically disposed every 5 seconds (2 Fl.G.5s (vert)).
4. Northern Dolphins: On both the upriver and downriver dolphins, 2 fixed green lights vertically disposed (2 F.G. (vert)).
5. At Centre Span: On both the upriver and downriver sides, a fixed amber light (F.Am.).
6. When the bridge is lifted above a 45° angle, on each side near the end of the lifting span, a fixed red light is exhibited (F.R.) (Aircraft warning light).
7. Traffic Control Signals: By day and night.

When *passage* through the bridge is *prohibited* going West upriver on to Breydon Water, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited on the main structure of the bridge on the Southern Buttress.

When *passage* through the bridge is *prohibited* going East downriver towards Haven Bridge, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Control Building.

In the event of failure of these lights, vessels will be advised by the Breydon Bridge Operator on VHF Channel 12.

8. Restricted Visibility – Fog Signal: This is a horn which gives 2 blasts every 30 seconds (2 Bl.ev 30s).

STEVEDORES: There are various stevedoring companies offering a full range of services for offshore and cargo vessels.
MEDICAL: Doctors and dentists can be arranged through Agents. Hospital facilities available.
FRESH WATER: Water is available on most operational quays.
FUEL: Wood Group operate two bunkering facilities with a gas oil delivery rate of up to 100 t.p.h. Storage capacity about 3,000 tons and 1,200 tons, depending on berth.

CONSULS: Belgium: Consul, Harwich. Tel: (01255) 252101.
Denmark: Vice-Consul, Great Yarmouth. Tel: 856831.
Finland: London Embassy. Tel: (0171) 2359531.
France: Consul, London. Tel: (0171) 5815292.
Italy: London Embassy. Tel: (0171) 2358643.
Netherlands: Vice-Consul, Great Yarmouth. Tel: 856831.
Norway: Vice-Consul, Great Yarmouth. Tel: 850431.
Spain: London Embassy. Tel: (0171) 2355555.
Sweden: Consul, Felixstowe. Tel: (01394) 673884.

REPAIRS: Several ship repair companies are located in Great Yarmouth and most types of repairs can be undertaken.

DRY DOCKS: Richards Dry Dock and Engineering Ltd. repairs ships up to 85 m. long and 12.5 m. beam. Sill depth 4.4 m. at MST. Also a shipbuilding berth.

SURVEYORS: Both Marine and Cargo Surveyors can be arranged through the Agent.

AIRPORT: Flights are available by helicopter and light aircraft from North Denes Airfield, 5 km. from the North of the town.

Air U.K. operate scheduled daily flights from Norwich to British and Continental destinations.

TIME: GMT. Summertime (GMT plus 1 hour) kept from March to October.

POLICE/AMBULANCE/FIRE: Dial 999 in an emergency.

SEARCH AND RESCUE CO-ORDINATION CENTRE: H.M. Coastguard, Tel: 851338.

SERVICES: Compass adjusting can be carried out.

As this port services the oil industry, many types of oil-related services are available from several companies.

BANKS: Barclays Bank Plc. Tel: 634100.
Lloyd's Bank Plc. Tel: 855177.
Midland Bank Plc. Tel: 843631.
National Westminster Bank Plc. Tel: 857521.

GARBAGE DISPOSAL: Regular collection service from alongside by waste disposal company. Domestic refuse must be double wrapped prior to disposal.

WASTE OIL DISPOSAL: Waste oil disposal by various companies arranged direct or via local ship's agents.

SEAMEN'S CLUBS: Great Yarmouth International Seafarer's Centre, South Denes Road, Great Yarmouth, Norfolk. Tel: (01493) 331222.

CURRENCY: U.K.Pound (U.K.£).

DEVELOPMENTS: There are plans for the development of an outer harbour.

AUTHORITY: Great Yarmouth Port Authority, 20/21 South Quay, Great Yarmouth, Norfolk NR30 2RE. *Tel:* (01493) 855151. *FAX:* (01493) 852480. *Telex:* 975102 (Gyportg). *Contact:* M.C.M. Boon, Chief Executive. M.L. Goodall, Commercial and Marketing Manager.

Operations and Dangerous Goods: Captain A. Goodlad, Harbour Master. *Tel:* (01493) 855153. *Telex:* 975367 Gyuts. *FAX:* (01493) 653464.

GRIMSBY: 53.34 N. 00.04 W. (See Plan)

VESSEL TRAFFIC SERVICES HUMBER: See "Hull".

NOTICES: See "Hull".

DOCUMENTS: See "Immingham".

PILOTAGE: See "Immingham".

ANCHORAGES: Hawke and Sunk Roads, Haile, Spurn and Bull Anchorages. See "Hull". The Pilots will advise where to proceed to anchor and also provide Pilot.

RESTRICTIONS: See "Berthing" – entrance locks.

MAX. SIZE: Maximum breadth 20.6 m., maximum length of vessel that can be locked 81.7 m. but vessels of greater length can enter docks on HW when all lock gates are open. 0.91 m. clearance under the keel is required. Vessels having a draft of 5.8 m. can normally enter the docks on any tide when the height of water is sufficient to allow 0.91 m. clearance. Vessels with 6.4 m. draft can be taken on spring tides. Vessels can enter usually approx. 3 hours before and 2.5 hours after high water.

Commercial Docks: Max. LOA 145 m., draft 5.8 m., beam 20.6 m.

Fish Docks: Max. LOA 73 m., draft 5.8 m., beam 12.8 m.

HEALTH: Master has to report any "Reportable" illness as detailed in Form "Port 38" to "Porthealth Grimsby". Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio, 2182 kHz, or VHF Channel 16. Also see "Hull".

VHF: See "Hull" – Vessel Traffic Services Humber.

TUGS: Normally join in Grimsby roads. Optional whether use ship's or tug's lines. Tugs operate from Immingham so plenty of notice required.

BERTHING: *Grimsby Docks:*

	Commercial Docks	Fish Docks
Entrance Locks:		
Length	85.0 m.	21.4 m.
Width	21.4 m.	13.0 m.
Sill level MHWN	6.8 m.	6.8 m.

There are 2 Ro/Ro berths in the Royal Dock. There are also 2 Ro/Ro berths in the Alexandra Dock for motor vehicles.

There is a Lo/Lo Terminal operated by Humber Terminals Ltd. on the West side of the Royal Dock. It is equipped with a 35 ton gantry crane.

CRANES: 3×7.5 tonne electric grabbing cranes, 6×3 tonne electric and 1×30 tonne (private) gantry crane.

STEVEDORES: Vessels are allocated labour in order of arrival so it is only necessary to give the Agent the ETA preferably before noon on the previous day. Normal working hours 0800 – 1700 hrs. Monday to Thursday, and 0800 – 1600 hrs. on Friday. Overtime can be worked 1700 – 1900 hrs. Monday to Thursday. On Saturdays and Sundays as required.

MEDICAL: Hospitals and all other medical facilities are readily available. If immediate attention is required on arrival please advise Agent by radio or telegram.

FRESH WATER: Available at all quays. Rate approx. 20 t.p.h.

FUEL: Normal gas and diesel oils available by both road and barge w at least 24 hours notice. This is also quayside tankage in fish docks

CONSULS:

Belgium, Vice-Consul	Hull	227255

HARTLEPOOL: 54.42 N. 01.12 W. (See Pl

PORT LIMITS: The Port facilities extend from Hartlepool Fairway B to all berths.

Arrival Time is accepted as time of passing Hartlepool Dock He time of anchoring in Hartlepool Bay.

DOCUMENTS: *Ship's Official Papers including:*
Ship's Register.
Ship's Construction Certificate.
Load Line Certificate.
Derat Certificate.
Safety Equipment Certificate.
Radio Equipment Certificate.
U.K. Light Dues Certificate.
Crew List.
Bills of Lading, Manifest and Stowage Plan (Usually sent in adv
Ship's Stores List.

RESTRICTIONS: Small vessels can berth in outer harbour at any of tide. Deep draft vessels enter in accordance with tide.

Vessels for the enclosed docks enter or depart from 3 hours b High Water to 1 hour after High Water.

Entrance Channel 1.1 km. long., 65 m. wide. Nominal dredged 5.7 m. below LAT.

PILOTAGE: Call by VHF when 2 hours from port and again 30 m before arrival. 2 hours required for sailing. VHF Channels 9, 14 a Tel: (01642) 485648.

Pilotage compulsory for:
(a) Vessels of 95 m. LOA and over navigating in Victoria Harbo
(b) Vessels of 85 m. LOA and over navigating in Impounded Do
(c) Vessels requiring services of a tug.

Pilot usually boards in vicinity of Longscar Buoy from a cutter s the usual international signals.

ANCHORAGE: Vessels are prohibited from anchoring:
(i) Inside the dredged channel.
(ii) Within a radius of 1,113 m. of the charted position of the Fairway Buoy.
(iii) Within the limits of divergent lines starting and extending from the dredged channel limits 244 m. apart at the South Gare Light Station, to 550 m. apart between their respective points of intersection with the circumference of the circle defined in (ii)

Vessels should not anchor within 2.5 cables of the Ekofisk Oil Pipeline or Everest Gas Pipelines.

Caution should be exercised by the Mariners wishing to anchor in Tees or Hartlepool Bays, especially during periods of onshore winds. Local weather forecasts may be obtained from the Coast Guard or Coast Radio Station. Continuous anchor watches must be maintained and frequent confirmation of the vessel's position obtained to ensure the vessel is not dragging. Engines should be maintained in a state of readiness so that the vessel may heave up if required.

MAX. SIZE: Overall length 190 m. Beam 30.5 m., draft of 8.00 m. Vessels approaching any of the max. sizes must consult the Tees Harbour Master in advance. Keel clearance of 1.2 m. required.

HEALTH: The Public Health (Ships) Regulations in force.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: VHF watch kept on Channels 16 and 12, working Channel 12.

V.H.F. Station	*Call Sign*	*Channel*
Tees Harbour Master	"Tees Port Control"	14, 16

1. Yes.
2. Yes – no regulations concerning storing.
3. Yes.
4. Yes.
6. Yes.
5. Normal standing regulations.

IDENTIFICATION CARDS: Seaman's Book or Passport advisable.

GARBAGE DISPOSAL: A skip is provided at the end of the finger pontoon.

WASTE OIL DISPOSAL: No shore facilities.

SEAMAN'S CLUBS: None.

GENERAL: *Charts:* B.A. Charts No. 2566 and 2567.

Depths: All depths given are subject to siltation and updated information may be obtained from the Tees Harbour Master. Tel: (01642) 452541.

Tidal and Weather Information: Strong winds from the N.W. through N. to N.E. increases tides. The flood tide sets S.S.E. on the coast, therefore strong S.E. winds depress the heights of the tides.

Tidal Variations:

M.H.W.S.	5.05 m.	M.H.W.N.	4.01 m.
M.L.W.S.	0.75 m.	M.L.W.N.	1.75 m.

AUTHORITY: Tees and Hartlepool Port Authority – Hartlepool Docks, Middleton Road, Hartlepool, Cleveland TS24 0SE. *Tel:* (01429) 276771. *Telex:* 58669. *FAX:* (01429) 222291. *Contact:* N. Britton, Director.

HARWICH (Including Harwich International Port (Previously Parkeston Quay) and Navyard Wharf): 51.56 N. 01.15 E. (See Plan)

The Harbour Authority is the Harwich Haven Authority whose jurisdiction extends from the Shipwash Bank to the mouth of the River Orwell on one hand and as far up the River Stour as the tide flows on the other.

The Harbour Master's Office is at Navigation House, Angel Gate, Harwich (Tel: (01255) 243030. Telex: 98472), at which is based the Harwich Harbour Operations Service maintained on a 24 hour basis.

The Harbour Operations Service (Call sign "Harwich Harbour Radio") maintains a listening watch on Channel 16, and operates on Channel 71.

The service is equipped with surveillance radar, radar information is available on request.

Harwich International Port Ltd. (H.I.P.) keep a 24 hour listening watch on Channel 16 and work on Channel 18.

DOCUMENTS:

1 Home Office Form 1.B.6 may be obtained from H.M. Customs Boarding Officer.
1 C.142 Crew Declaration List.
1 Maritime Declaration of Health ("Q" Flag procedure).
2 Ship's Report by Master.
1 Stores List.
1 Certificate of Deck Cargo Tonnage (if carried).
1 Grain Certificate (if carried).
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List required by vessels other than packet vessels.
1 Landing Card for each passenger.
1 Ship's Certificate of Registry.
1 Mercantile Marine Office Certificate – for British vessels only.
1 Load Line Certificate.
1 Safety Equipment Certificate.
1 Lloyd's Certificate.
1 Derat Exemption Certificate.
1 Ship's Register.
1 Lights Bill.
1 Radio Safety Certificate.

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

Dangerous Goods: Notification is required to Harwich Harbour VTS 24 hours in advance of the vessel's arrival at the port. Notification may be made by the following means:
(1) By facsimile – Fax No. (01255) 241325.
(2) By telex – Telex No. 98472.
(3) By telephone – (01255) 243000 (24 hour number) in exceptional circumstances only.

PILOTAGE: PROCEDURE AND INFORMATION ON ETAs/ETDs FOR SHIPS REQUIRING THE SERVICES OF AN AUTHORISED PILOT:

Arrival Notification: Ships bound for the Haven Ports of Harwich, Felixstowe, Ipswich and Mistley and requiring a Pilot, shall notify Harwich Operations Control, 8 hours in advance, giving the ETA at the "Sunk" or "Cork" Pilot Station, LOA, gross tonnage, maximum draft, departure port and destination port.

Confirmation of ETA should be given at least 3 hours before arrival at the pilot station.

Failure to provide the ETA and subsequent confirmation could result in delay to the ship.

In the case of a ship engaged in the short sea trade, the initial ETA may be passed at the time of leaving the last port of call, if passage time is less than 8 hours.

A ship having complied with the above conditions and then having anchored before embarking a Pilot must give Harwich Operations Control adequate notice of requiring the services of a Pilot. Failure to give such notice could result in delay to the ship.

Requests from inward-bound ships for the services of a Pilot for the Rivers Blackwater, Colne, Crouch or Roach may also be passed though Harwich Operations Control.

Departure Notification: Outward-bound ships, or ships moving within the compulsory Area, which require the services of a Pilot, shall give at least 2 hours' notice of their Estimated Time of Departure.

Boarding and Landing Arrangements: The pilot boarding point for inward bound ships will be within the voluntary pilotage area, such that the Pilot is boarded in good time before entering the Compulsory Area.

The boarding position will be agreed with Harwich Operations Control, having due regard to the size and draft of the ship and the prevailing circumstances.

For ships arriving from the North via the Shipway, and small/medium sized ships from the South, the normal pilot boarding point is the "Cork" Pilot Station, which is 2 miles E.N.E. of the Shipway Buoy. Large or deep draft vessels will normally be expected to board their Pilots at the "Sunk" Pilot Station, 1.5 miles E.N.E. of the "Sunk" Light Float. Small ships, unfamiliar with the area will also be boarded at the "Sunk" Pilot Station on request.

Boarding and landing will take place from pilot launches operating from Harwich Harbour. The launches will have the word "HAVEN PILOTS" on the side of the wheelhouse, fly the pilot flag by day and, at night, exhibit lights and signals in accordance with Rule 29 of the International Regulations for Preventing Collisions at Sea.

If the pilot launch is unable to operate in the normal locations due to stress of weather, or other unforeseen circumstances, alternative arrangements will be advised by Harwich Operations Control.

GEOGRAPHICAL LIMITS OF THE HAVEN PORTS PILOTAGE AREA (THE COMPULSORY AREA):

The area bounded by the following limits:
(a) As much of the River Orwell as lies below Ipswich Dock.
(b) As far up the River Stour as the tide flows.

(c) To seaward of Landguard Point, the area bounded as follows:
 (i) In an Easterly direction as far as 01° 24' E.
 (ii) In a Southerly direction as far as 51° 54.5' N.
 (iii) In a Northerly direction as far as 51° 57.4' N.

Voluntary Pilotage: The Board will provide pilotage upon request in the area to seaward of the Compulsory Area as far as a line drawn between the following points:
(a) Bawdsey Cliff – Lat. 52° 00' N. Long. 01° 26' E.
(b) Lat. 52° 00' N., Long. 01° 41' E.
(c) Lat. 51° 49' N., Long. 01° 41' E.
(d) Lat. 51° 49' N., Long. 01° 15' E.

APPROACHES: Traffic Regulatory System in effect.

ANCHORAGES:

Erwarton: Situated to the North and West of Harwich International Port with an average depth of 5.5 m. at LW.

Parkeston: Situated to the North of Harwich International Port with an average depth of 5.5 m. at LW.

Shelf: Situated on the Western side of the main Channel between the North and South Shelf Buoys. Average depth of 3.7 m. at LW.

Platters: Situated at the Pitching Ground. Average depth 8.0 m. at LW.

Cork: Situated to the North of the Harwich Channel. Area approx. 2 miles×1 mile. Average depth 6.5 m.

RESTRICTIONS: *H.I.P.:* Normal max. draft allowed alongside the berths at Harwich International Port is 8.0 m. – 10.0 m.

Normal cargo working at Harwich International Port throughout 24 hours.

MAX. SIZE: *H.I.P.:* Normal max. permissible length 250 m. Arrangements for larger vessels can be made. Normal max. permissible breadth for Roll-on/Roll-off is 24 m. Normal max. permissible draft – 8.0 m. The height of the tide does not restrict a vessel berthing alongside the quay if her draft is within 8.0 m.

HEALTH: Maritime Declaration of Health required ("Q" Flag procedure). Obtain Pratique through H.M. Customs Boarding Officer if no sickness on board.

If there is sickness on board the Customs Official will notify the Duty Port Medical Officer.

If the vessel is from another port in the U.K. Pratique is automatic.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio (call sign GNF) or Humber Radio (call sign GKZ) are the most convenient stations to pass ETA cables, etc., to Agents or receivers

VHF: *Port Operations:*

TUGS: None available locally. Tugs on call from Liverpool.

BERTHING: Vessels may be berthed at any time, subject to vess draft. 2 Ro/Ro ramps, 1 berth exclusively for gas base, 1 general ca berth North Quay, 2 general cargo berths South Quay and 1 berth W Quay.

CRANES: 1×30 ton portal crane on North Quay; 1×23 tonne p crane, 4×7.5 ton portal cranes and 1×10 tonnes on South Quay.

DENSITY: Salt water.

FRESH WATER: Available at all quays, except West Quay.

FUEL: Gas oil by road vehicle.

REPAIRS: Small repairs possible, no docking facilities.

GANGWAY/DECK WATCHMEN: Ship's watchmen required.

AIRPORT: Nearest, Liverpool and Manchester; 60 miles.

PROVISIONS: Available locally.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency.

SHORE LEAVE: No restrictions on landing.

GARBAGE DISPOSAL: Skips and road vehicles available. Charge variable by arrangement with local contractor. Contact Heysham Limited (Tel: (01524) 852373).

WASTE OIL DISPOSAL: A waste oil collection service can be arra with a local contractor (prior notice required). Contact Heysham Po (Tel: (01524) 852373).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.63 (31.1

AUTHORITY: Heysham Port Ltd., Heysham, Lancs. LA3 *Tel:* (01524) 852373. *FAX:* (01524) 853301. *Contact:* Ca P.A. Read, Port Manager. P.L. Fenton, General Manager.

HOLYHEAD: 53.19 N. 04.41 W. (See P

DOCUMENTS:

1 Crew List and where applicable a Passenger List.
1 Pratique issued by Customs.
1 Crew Declaration (C.142 for H.M. Customs).
1 List of Consumable Stores (tobacco, alcohol).
1 Declaration of Health.
1 Cargo Manifest.
1 Ship's Report.

PILOTAGE: Pilotage is compulsory for all vessels over 40 m. in Any vessel requiring a Pilot should give at least 24 hours notice wh possible, by contacting the Harbour Authority on Tel: 01407-6 Fax: 01407-606622, or via VHF Channels 16 or 14 (Port Op Channel), call sign "Holyhead Radio". The Pilot will board at the limits. Pilot boat has a black hull.

ANCHORAGES – PROHIBITED ANCHORAGE: The breakwater affords partial shelter to the outer anchorage and complete protection to New Harbour; there are depths of up to 12.0 m. in the former and of up to 12.0 m. in the latter.

The accommodation for vessels of deep draft in New Harbour is limited. Small vessels should always proceed into New Harbour and anchor in the S.W. part, leaving the outer part and the roadstead for large vessels. The bottom is hard, overlaid with mud but the holding ground is sufficiently good if an adequate amount of cable is veered. During Easterly winds an uncomfortable sea is raised; vessels may then obtain shelter in the Eastern part of outer anchorage. Anchorage is prohibited within 1.5 cables on either side of the track followed by Passenger Ferries from the head of the breakwater to the entrance to Old Harbour; the limits of this area are shown on charts.

MAX. SIZE:

Inner Harbour: Restricted to vessels of 4.5 m. draft and vessels exceeding this draft will only be accepted after consultation with the Port Manager or Harbour Master.

New Harbour: Vessels of approximately 60,000 tons can be accepted alongside the Anglesey Aluminium Jetty where the berth is dredged to 13.5 m. at L.A.T.

Ro-Ro vessels up to 150 m. length and 7.0 m. draft accepted.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO/VHF: Call sign "Holyhead Radio". Stena Line Ports Ltd., the Port of Holyhead, maintains a listening watch on Channels 16 and 14 throughout 24 hours.

RADAR: Port radar surveillance only, no VTS.

TUGS: Available through Agents. Tugs up to 1,375 h.p.

BERTHING: By prior arrangement with the Port Authority via Port Control.

Terminal 1:	Situated within the Inner Harbour, there is a facility which is designed to berth HSS vessels only, these high speed craft berth stern to, to a linkspan.
Refit Berth:	Also within the Inner Harbour for lay-over berthing. Alongside depth 4.4 m. Quay length 110 m. Fresh water available.
Public Quay:	Within the Inner Harbour. Alongside depth 3.0 m. Quay length 90 m. Fresh water available.
Terminal 2:	Admiralty Pier, at the entrance to the Inner Harbour. Ro-Ro berth. Alongside depth 5.2 m. Quay length 200 m. Beam 22.0 m. Pontoon linkspan 38 tonnes. Fresh water available.
Terminal 3:	East side of Salt Island. Ro-Ro berth. Alongside depth 7.1 m. Quay length 190 m. Beam 25.0 m. Hydraulic double linkspan 38 tonnes.
Terminal 4:	North side of Salt Island in New Harbour. Ro-Ro berth. Alongside depth 7.1 m. Quay length 180 m. Beam 25.0 m. Ramp 50 tonnes.
South Quay:	Run by the Anglesey County Council, Langefni, Gwynedd. Suitable for small craft and fishing vessels only, due to max. depth of 3.5 m. Pontoons and fuel/ice facilities on Quay.

STEVEDORES: No stevedores. Vessels loaded and discharged by making prior arrangements with Agent.

MEDICAL: Local hospital, medical assistance available through Port Control or Holyhead Coastguard.

DENSITY: Salt water (1025).

FRESH WATER: Available at all berths within the Inner Harbour and alongside Anglesey Aluminium Jetty.

FUEL: Notice to Port Authority required. Available via road tanker and at South Quay for smaller vessels.

GANGWAY/DECK WATCHMEN: Required at all times when vessels are in port.

REPAIRS: No facilities.

SURVEYORS: Cargo Inspectors can be contacted, if required.

Surveyors representing Lloyd's Register, Bureau Veritas, etc., can be contacted on request.

AIRPORT: Manchester International Airport, 184 km.

HOLIDAYS: No restrictions due to holidays, port available 365 days.

POLICE/AMBULANCE/FIRE: Tel. 999.

EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Sub-Centre, Coastguard. Tel: (01407) 762051.

TELEPHONES: No telephone connection for outside vessels. Public telephone within port limits.

SERVICES: Compass adjusting can be arranged. Agency can be arranged through Port Authority.

BANKS: British banks only available in the Holyhead area, exchange facilities are provided.

STORING: See "Prelims".

1. Vessels can be stored by barge or truck, usually by truck.
2. Vessels can be stored during loading or discharging.
3. Trucks can proceed alongside at the berth.
4. Forklift trucks can be used to handle stores.
5. Customs Regulations, where applicable, in force.
6. Local riggers can be employed, if necessary.

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Garbage disposal can be provided on request.

WASTE OIL DISPOSAL: Waste oil disposal can be provided on request, 48 hours notice required.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Stena Line Ports Ltd., Stena House, Holyhead, Gwynedd LL65 1DQ. *Tel:* (01407) 606700. *FAX:* (01407) 606622.

Contact: C. Hetherington, Ship and Port Manager.

HOUND POINT: 56.00 N. 03.22 W. (See Plan)

LOCATION: The Terminal consists of 2 steel and concrete island structures, situated to the East of the Forth Railway Bridge. Berth No. 1 in position Lat. 56° 00.3' N., Long. 3° 21.7' W., and Berth No. 2 in position Lat. 56° 00.3' N., Long. 3° 21.0' W.

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Crew's Effects List.
1 Stores List.
All valid Certificates.

PILOTAGE: Pilotage in Firth of Forth is compulsory. Contact "Forth Pilot" VHF Channel 16. Pilot boards large vessels in vicinity of Fairway Buoy (56° 03.5' N., 03° 00' W.) as there is limited depth and manoeuvring space at normal Pilot boarding ground East of Inchkeith. For large vessels in ballast, Pilots require gangway/pilot ladder combination rig.

Shipmaster's Report: January 1993: The Terminal has its own Check List and the Pilots require Pilot Card on boarding.

ANCHORAGE: When vessel has to wait for Pilot, berth or tide, "Forth Navigation Service" will assign anchorage. These anchorages are in a line E.S.E. to S.W. of Fairway Buoy. Good holding ground at anchorages.

RESTRICTIONS: Vessels will be berthed at any state of the tide, except where tidal range is more than 4.9 m.

MAX. SIZE: Berth No. 1 is designed to accommodate vessels in the range of 50,000 – 300,000 tonnes deadweight, where the maximum permissible berthing displacement is 150,000 tonnes. The minimum parallel mid-body length acceptable is 47.5 m. on either side of the vessel's manifold centreline.

Berth No. 2 is designed to accommodate vessels in the range of 50,000 – 150,000 tonnes deadweight, where the maximum permissible berthing displacement is 174,000 tonnes. The minimum parallel mid-body length acceptable is 32.0 m. on either side of the vessel's manifold centreline.

Max. Draft: Maximum Departure Draft: Following discussions at the Pilotage Management Committee and the Sub-Group of the Hound Point Liaison Committee, the following system has been established to obtain the maximum draft of a vessel sailing from the Hound Point Terminal.

The minimum depths in the approaches to the Hound Point Terminal are two patches of 19.0 m. and 19.2 m. respecitively which lie approximately 200 m. to the North and East of the berthing face of No. 2 Jetty (see Admiralty Chart No. 736).

The maximum draft of a vessel sailing from the Terminal should be established as follows:

Minimum Charted Depth	19.0 m.
Plus Predicted Height of Tide (Leith Gauge) at departure time	+
Less	– 2.5 m.
Maximum Draft	

Vessels of maximum draft should have a departure time no later than 2 hours before predicted High Water (Leith) in order to be at Buoy No. 1 by High Water.

To establish the Height of Tide (Leith) required before a vessel can safely depart from the Terminal on a rising tide, the following rule applies:

Height of Tide required = Draft – 16.5 m.

N.B. The above maximum draft calculations must be used for all vessels having loaded draft of 16.5 m. or greater.

This maximum draft calculation supersedes any previous information issued on this subject.

Berth No. 1: Minimum Depth 24.50 m.
Max. Draft (Springs) 21.30 m.
Max. Draft (Neaps) 20.24 m.

Berth No. 2: Minimum Depth 22.40 m.
Max. Draft (Springs) 21.30 m.
Max. Draft (Neaps) 20.24 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: *Pre-Arrival Telex Format:* Prior to arrival at the Terminal, the Master shall advise the Company of the following:

AA	ETA – Last Cargo – Last Port – Destination.
BB	Quantity of ballast to pump ashore.
CC	Estimated Deballasting time.
DD	Can vessel load/deballast simultaneously.
EE	Quantity and type of any slops to be discharged.
FF	Confirm vessel carries onboard valid Oil Pollution Certificate.
GG	Confirm vessel carries onboard all appropriate charts and that these are up to date.
HH	Confirm aft leading accommodation ladder available.
II	Confirm I.G. System fully operational and all cargo tanks inerted to 8% or less oxygen content.
JJ	Confirm cargo tanks do not contain high concentrations of H_2S which may result in emissions during loading being in excess of the Threshold Limit Value.
KK	Was the Last Cargo carrying a High Sulphur Crude.
LL	Required Loading Rate.
MM	Confirm vessel can perform Closed Loading Operations.

RADAR/VHF: Estuary radar service. VHF contact can be made with Forth Navigation Service on Channels 16 and 71, working Channels 20 and 12. B.P. Grangemouth VHF Channel 16 (calling) and Channel 19. Berth Supervisor on Channel 19. Forth tugs, Fire tug and Anti-Pollution tug on Channels 16 and 9.

Hound Point Terminal operates on VHF Channel 9 for berthing and unberthing operations.

If simultaneous operations are being carried out at both berths, Berth No. 1 will operate on Channel 9 and Berth No. 2 on Channel 17.

TUGS: Two tugs of 60 tonnes bollard pull and 4 tugs of 35 tonnes bollard pull available. Tugs wires are used.

Berth No. 1: Vessels up to 265 m. LOA normally use 3 tugs for berthing and 2 tugs for unberthing. Vessels over 265 m. LOA normally use 4 tugs for berthing and 3 tugs for unberthing.

Berth No. 2: Vessels berthing and unberthing use 2×60 tonnes bollard pull tugs in the push/pull mode.

BERTHING: Hound Point Terminal (leased and operated by British Petroleum) is in the Firth of Forth about 13 miles from Fairway Buoy. The datum depth in the approach channel is 19.9 m. and least depths of 24.5 m. (Berth No. 1), and 22.0 m. (Berth No. 2), are available. Both berths are aligned in a 064° – 244° direction on the North Western faces of the structures. Mean tidal range is 4.8 m. (Springs), and while stream rates of 3.5 knots are normal, rates of 5 knots can be experienced.

Vessels are berthed either side to with the assistance of tugs. Rate of approach equipment is fitted on both berths. A combination of vessel and shore moorings is used, and vessels must have available a minimum of 6 suitable lines at each end.

Vessels above 1,600 g.r.t. shall comply with the requirements of Statutory Instrument 1077 The Merchant (Tankers) (EEC Requirements) Regulations 1981, and Statutory Instrument 1637 The Merchant (Tankers) (EEC Requirements) (Amendment) Regulations 1982.

A vessel will only be accepted at a berth providing it is compatible with all aspects of the berth design.

Special attention is made to a vessel's manifold arrangements, which must be of a fixed and permanent design (including pipelines, valves, supports, etc.), and form part of the vessel's structure. Cast iron manifolds are not acceptable.

All vessels should have manifold arrangements which comply with the standards recommended by the Oil Companies International Marine Forum – Standards for Tanker Manifolds and Associated Equipment.

Operators of vessels which are unable to comply with the above recommendations must confirm with the Company the suitability of a vessel for a cargo operation.

Shore gangways are normally provided.

Marine band VHF radio operating on Channels 9, 10, 12, 16, 19 and 46 are used on Berth No. 1, and full multi-channel VHF is used on Berth No. 2.

Crude Oil (approximate density 0.8250 (API 40.0), temperature 15° – 33°C), is loaded at rates up to 14,000 tonnes/hr. (Berth No. 1), and 12,000 tonnes/hr. (Berth No. 2).

Ballast water contained in cargo tanks must, where necessary, be discharged to the shore facility which can normally receive up to 50,000 tonnes without prior approval (Max. shore capacity from any one vessel is 100,000 tonnes). The Terminal is capable of simultaneous handling of crude oil and ballast.

Masters should note that it is necessary to overcome a system back pressure of 4.5 bar when discharging ballast and should estimate deballasting time accordingly.

Ballast water containing chemicals or waste incompatible with shore facilities must not be discharged ashore.

Clean ballast from a Segregated Ballast System may be discharged overboard, subject to the approval by the Port Authority and the Company.

Contents of a vessel's slop tanks may be dicharged to the shore reception facility after analysis and with the prior approval of the Company. If material for discharge is incompatible, arrangements for disposal of the material must be made with the vessel's Agent, who keeps a list of contractors licensed to handle hazardous material.

Vessels normally receive full documentation at time of departure, but it may, on occasions, be necessary to utilise an Early Departure Procedure.

On completion of operations, vessels may be required to vacate the berth and proceed to an anchorage to carry out cargo measurements (this includes operations carried out by Independent Cargo Surveyors).

Four loading arms are normally available for use on each berth presenting 16 in. ASA 150 conection flanges. The loading arms are designed to operate within an envelope 4.5 m. – 31.0 m. on Berth No. 1 and 4.5 m. – 25.1 m. on Berth No. 2. Vessels should arrive with appropriate reducing pieces fitted to the manifold.

Loading arms on Berth No. 2 are fitted with an Emergency Release System (ERS), which activates in the event of a vessel movement outside the arms operating envelope.

Mooring hooks on Berth No. 2 are fitted with a Mooring Load Monitoring System, with remote readout visually displayed in the control room.

Remote Release of moorings can be activated from the control room.

Berthing and Unberthing: The number of tugs employed will vary according to the size of the vessel and the prevailing weather conditions.

Berthing is undertaken during daylight or darkness.

Minimum acceptable visibility for berthing and unberthing is 1 mile.

Berthing will not be attempted if the wind is in excess of 20 knots (Force 5) blowing onto or off the berth from a direction up to 45° either side of a line at right angles to the longitudinal axis of the berth, or if in excess of 30 knots (Force 7) from any other direction.

The unberthing of vessels in excess of 54 ft. draft will also be restricted by the tidal rise, otherwise, any other limit conditions will be assessed at the time of unberthing.

At Berth No. 1, speed of approach equipment is provided to assist in ensuring a safe speed during the final breasting in manoeuvre. The equipment operates a display panel which indicates the distance each end of the vessel is off the berthing fenders by means of 2 white bar lights which diminish in length as the vessel approaches. Speed of approach for each end of the vessel is indicated by 2 "traffic light" systems which show:

Flashing Red – dangerous speed, 8 cm./sec. and above.
Flashing Amber – marginally safe speed, 5 – 8 cm./sec.
Steady Green – safe speed, 5 cm./sec. and below.

At Berth No. 2, the equipment operates a display panel giving digital readings of distance off, speed of approach and angle of approach.

A stand-by fire tug on 15 minutes notice will remain in attendance at the specially provided buoy mooring while the berth is occupied. A stand-by pollution tug is also on 15 minutes notice.

Mooring Arrangement: The Master shall ensure that:

1. Ropes and Wires: The vessel is secured alongside with suita ropes or wires which are to the satisfaction of the Manager minimum of 6 mooring lines must be used at each end of the ves The use of mooring lines of dissimilar materials in the same direc shall be avoided. The use of wire springs (with or without synthe fibre rope tails which should not exceed 11.0 m. in length ove and should have a breaking strain at least 25% greater than breaking load of the wire to which they are attached), is requi Alternatively, low stretch synthetic ropes may be substituted for if the elongation of the rope at 55% breaking load does not exc 3% of the rope length.
2. Winches: Mooring ropes or wires shall only be fastened to the pro fixtures provided for this purpose. Self-tensioning winches must be used in automatic mode, and winch brakes must be k hardened up, except when moorings are being tended.
3. Wire Reeling: Mooring wires and lines shall be reeved on their dru in the direction which enhances brake holding power.
4. Deck Watch: A strict watch is kept on moorings, and they are ten to prevent undue movement of the vessel.
5. Emergency Towing Wires: Towing wires of a minimum 50 ton breaking strength (approximately 32 mm. diameter), are provid rigged and secured to the offshore bow and quarter with the tow eyes maintained just above water level, and with sufficient sl maintained on deck.

SAFETY:

Health Hazard: *Partly Laden Vessels:* The Master will inform Terminal of the name and nature of the part cargo on board. If the cargo has characteristics which indicate a health hazard may e e.g. Hydrogen Sulphide (H_2S):

1. Will be required to isolate the venting system of the tanks contai cargo from that of the tanks to be loaded.
2. Ensure that the tanks to be loaded are not contaminated with ga from the cargo on board.
3. Release gases from the part cargo only in an emergency.
4. Gauge the tanks containing the part cargo using fixed system sonic tapes with approved vapour locks.
5. Sample the cargo onboad using closed sampling devices approved vapour locks.

Note: If no such system is fitted and samples are required, arrangeme should be made to carry out such operations either before vessel berths or after the vessel sails.

Vessels in Ballast: The Master of a vessel whose previous cargo characteristics indicating a health hazard may exist:

1. Will take all precautions to prevent high concentration of H_2S ga being vented to atmosphere during loading. Precautions sho include Crude Oil Washing and the purging of all tanks prior to ar so that venting does not result in emissions which are above Threshold Limit Value (TLV). Under United Kingdom Contro Substances Harmful to Health (COSHH), this is referred to Occupational Exposure Standards (OES).
2. If any doubt exists whether an acceptable tank atmosphere has b attained, then before the vessel berths arrange for an indepen chemist to issue a certificate which records the level of H_2S in a tank.
3. Will incur a delay in berthing when cargo tank atmospheres co levels of H_2S.

Note: *If on arrival tank atmospheres are found to contain high leve H_2S, the vessel will be required to vacate the berth.*

DENSITY: 1020 – 1025.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: See "Leith".
TIME: GMT in Winter. GMT plus 1 hour in Summer.
GARBAGE DISPOSAL: Heavy duty bags supplied to vessel. Gar is then transported to the terminal by ship's staff and handed i terminal vessel by B.P. staff for carriage ashore.

A minimum of £120 is charged for this service, but if a sizeable qu of garbage is transported then additional charge will be le Arrangments made via B.P. Berth Supervisor.

WASTE OIL DISPOSAL: Slops can be discharged to shore rece via ballast facilities, but this may be restricted dependent upon the n of the slops.

No alongside barge facilities available for waste oil.

SEAMAN'S CLUBS: None.

GENERAL: Outside the Firth of Forth, clear of the land on the S side, streams are weak, spring rate up to 1 knot, but at spring ti velocity at the terminal is up to 3.5 knots (Refer to Tidal Stream A

Storing: The exposed location of the Terminal does not normally p the safe handling of bulk stores. Subject to prior authorisation permitted to transfer small packages which can be hand carried a the Terminal.

HOWDEN (Howdendyke): 53.44 N. 00.51 W.

DOCUMENTS: From non-EEC ports:

Master's Declaration, C13.

Crew Declaration, C142.

Crew List.

From EEC ports:

Crew List.

PILOTAGE: Spurn Pilot embarks at Spurn Roads at least 5 hours before H.W. at Howdendyke. Pilots changed at Goole, where a Selby Pilot takes over.

RESTRICTIONS: Vessels berth/unberth on or near H.W. (N.A.A.B.S.A. berths). Airdraft restriction 26.0 m. (Hook Railway Bridge 3 miles below berths).

MAX. SIZE: LOA 88 m., beam 14.0 m., max. draft 5.0 m. (F.W.).

Large vessels acceptable after prior consultation.

HEALTH: Any major illness to be advised to U.K. Coastguard prior to arrival.

RADIO: Portishead Radio.

VHF: Call on Channel 14 to advise VTS Humber of arrival anchorage 2 hours prior to arrival. Vessel uses Channel 12 whilst on passage up river.

RADAR: VTS Humber on VHF Channel 12.

TUGS: None available at Howdendyke.

BERTHING: Four N.A.A.B.S.A. berths available over 3 jetties. Variety of cargo, including steel, timber and bulk cargo handled over 3 main berths. Western Jetty usually reserved for bulk cargo. Fresh water along berths.

No. 1 Jetty (2 berths): Length 110 m.

No. 2 Jetty: Length 36 m.

No. 3 Jetty: Length 39 m.

Shore equipment used for all discharge and loading.

CRANES: 6 mobile crawler cranes available. Max. Lift 35 tonnes. Also see "Cargo Gear".

BULK CARGO FACILITIES: No. 3 Jetty: Specialised cargo silos and associated equipment located adjacent.

Weighbridge with 50 ton capacity.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: Hook Railway Bridge, max. beam 14.0 m. Max. airdraft 26 m.

STEVEDORES: Normal hours 0700 hrs. – 1800 hrs. Overtime by arrangement. Order labour before 1700 hrs. previous day.

MEDICAL: Doctor and dentist available locally. Nearest hospital at Goole (3 miles).

TANKERS: No facilities.

DENSITY: Fresh water (1000).

FRESH WATER: Available. Rate 1 tonne/hr. No charge.

FUEL: Available by road tanker at 48 hours notice.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: None. Most European countries represented at Hull and Goole.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

SURVEYORS: Most representatives available at short notice.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: As per current U.K. regulations.

CARGO GEAR: 3×35 tonne cranes; 3×5 tonne cranes; 1×25 tonne forklift; 2×18 tonne forklifts; 2×12 tonne forklifts; 4×7 tonne forklifts; 4×4 tonne forklifts.

REPATRIATION: Possible.

AIRPORT: Humberside Airport, 40 miles. Leeds Airport, 40 miles. Manchester Airport, 80 miles.

TIME: GMT. GMT plus 1 hour in Summertime (March – October).

HOLIDAYS: New Year's Day; Good Friday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 in an emergency.

TELEPHONES: Only from Office (200 m. – 300 m. from berth).

SERVICES: Most available for equipment purposes: Radio/radar repairs, surveys, extension of Certificates.

BANKS: All major U.K. banks represented locally.

STORING: See "Prelims".

HULL: 53.44 N. 00.14 W. (See Plan)

VESSEL TRAFFIC SERVICES HUMBER:

The Humber Ports Operation and Information Service operates radar surveillance between Spurn and Humber Bridge, and VHF (FM) radio telephone service available to all vessels navigating the Rivers Humber, Ouse, and Trent from the Queen Elizabeth Dock.

A continuous watch is maintained on Channels 10, 12, 14, 16 and 52. The call sign is "VEE TEE ESS" Humber. The telephone number is (01482) 701787. Telegraphic address "Humberops". Telex: 597656. Fax: (01482) 795221.

The Service provides information regarding the arrival, berthing, anchoring and departure of vessels and also information on navigational aids, navigation generally, visibility, and the safety of vessels and persons. Tidal information, including the height of tide at Spurn Pilot Jetty, Immingham, Hull, Humber Bridge, Blacktoft and Keadby, is also available on request. Messages of any other nature and messages of a personal character cannot and will not be accepted. Messages of this kind should be passed through the British Telecom Ships Telephone Service via "Grimsby Radio" on Channel 27.

Other VHF (FM) Stations situated on the River Humber and the Channels used are shown in the Appendix to this Notice. These Stations provide direct communication between a vessel and the Dock or Pier Master at the place of destination. In general, vessels should obtain their navigation and safety information from the Vessel Traffic Services Humber and their berthing, docking and other pre-arrival information from the Station serving their destination.

A general broadcast giving weather reports, tidal information and navigational warnings is made by the Vessel Traffic Services Humber on Channel 12 every 2 hours commencing at 0103 hrs., prior notification being given on Channel 16.

Procedure:

(i) Vessels fitted with appropriate VHF R/T equipment on approaching the Humber should set watch on Channel 16.

(ii) Vessels wishing to communicate with the Pilot Station should call "Spurn Pilot" on Channel 16 and shift to Channel 14 for exchange of traffic.

(iii) On entering and before sailing or moving in the Humber, vessels should call "VEE TEE ESS" Humber on Channel 16. When contact is established they will be requested to transfer to Channel 12 for exchange of arrival or departure information. Watch should then be resumed on Channel 16 and 12.

(iv) Vessels wishing to communicate with the Station serving their destination should do so at the appropriate time on the Channels shown in the Appendix, reporting their departure from Channel 12 to "VEE TEE ESS" Humber. Vessels are advised that, when communicating with these Stations, contact with the Vessel Traffic Services Humber can only be re-established through Channels 16 and 12 and it is particularly advisable to maintain a listening watch on Channel 16 whenever practicable in the event of unforeseen circumstances developing in the River.

All times in messages should be given in local time using the 24 hour notation.

To achieve the full advantage of efficient communication, strict telephone discipline and attention to procedure, particularly on the Calling Channel, is imperative. The operating procedure should be in accordance with that laid down in Chapters VI and VII of the G.P.O. Handbook for Radio Operators (1975 Edition, with Supplements).

These services will be offered and will be rendered on the condition that neither the Associated British Ports, nor any of its servants or Agents, shall be liable to any person for loss or damage of any kind howsoever caused or arising whether as a result of negligence or otherwise or as a result of the non-availability of the services.

NOTICES:

GENERAL DIRECTIONS FOR NAVIGATION IN THE HUMBER:
PROCEDURE AND INSTRUCTIONS FOR SHIPS USING
THE RIVER HUMBER

1. *Time of arrival. ETA:*

1.1 Ship Owners, Masters and Agents are required to inform the Associated British Ports (A.B.P.) of the Estimated Time of Arrival of their vessels as per the General Directions together with relevant information regarding draft, air draft if proceeding under the Humber Bridge, EEC Check Lists, hazardous cargo, last port of call, nationality of vessel. In this context the Associated British Ports means the Dock Master at the particular port to which the vessel is bound, the Vessel Traffic Services Humber and the Pilot Office at Spurn. Reference British Transport Docks Board Notice to Mariners Nos. 2 and 3 of 1974.

1.2 Ship Owners or Agents are requested to inform the Masters of their vessels of the importance of amending ETA's as necessary due to changing circumstances. Such amendments can be passed to the Associated British Ports by radio through Grimsby Radio either in the form of a link call or telegram.

Appendix:

Station	Call Sign	Channel Nos.	Operational Times	Remarks
ASSOCIATED BRITISH PORTS				
Vessel Traffic Services Humber, Queen Elizabeth Dock, HULL	"VEE TEE ESS" Humber	16 12 10, 14 and 52	Continuous watch maintained	Calling and safety. Navigation and safety information, etc., the Rivers Humber, Ouse and Trent
Grimsby Docks	"Grimsby Docks Radio"	16 18 9	Continuous watch maintained	Calling and safety Docking instructions for Grimsby Docks Short range berthing instructions.
Immingham Docks	"Immingham Docks Radio"	16 19 22 9	Continuous watch maintained	Calling and safety Berthing instructions for tankers. Docking instructions for Immingham Docks. Short range berthing instructions.
Saltend Jetties	"Saltend Radio"	16 19	Continuous watch maintained	Calling and safety. Berthing instructions for tankers.
King George Dock	"King George Dock Radio"	16 20 9 10	Continuous watch maintained	Calling and safety. Docking instructions for King George Dock. Short range berthing instructions.
Blacktoft Jetty	"Blacktoft Jetty Radio"	16 14	3.25 hours before HW Goole until 0.75 hour after HW Goole	Calling and safety. Port Operations and berthing instructions for Blacktoft.
p				
Goole Docks	"Goole Docks Radio"	16 14	Continuous watch maintained	Calling and safety. Port Operations and docking instructions for Goole.
CRUDE OIL TERMINALS (HUMBER) LIMITED (Operated by Conoco, Ltd.)				
Tetney Oil Terminal	"Tetney Base"	16 19 48	Continuous watch maintained	Calling and safety. Berthing instructions for Mono-Mooring Buoy.
SPURN SHIPPING COMPANY LIMITED	"Oil Base"	9	Continuous watch maintained	Short range berthing instructions for Immingham Oil Terminal.
HULL CORPORATION				
River Hull Port Operational Service	"Drypool Radio"	16 9 6	2 hours before HW Hull until 1 hour after HW Hull, Mon. to Sat. 0900 – 1100 hrs. Sat. irrespective of tide.	Calling and safety. Port Operations in River Hull. Inter-ship use.

1.3 Within the Associated British Ports organisation Vessel Traffic Services Humber will disseminate relevant information received to all interested parties.

1.4 Within the river any message related to the movement and safety of vessels will be passed by Vessel Traffic Services Humber to the vessel concerned and Ship Owners and Agents may avail themselves of this service at any time.

2. *Time of Departure. ETD:*

2.1 In order to maintain a complete and up to the minute picture of traffic movement Dock Masters are requested to notify the Vessel Traffic Services Humber of the intended time and actual time of departure of vessels from their docks. This information should be passed by land line. Exchange of information thus engendered should ensure that all Officers of the Associated British Ports are fully informed of traffic movements. In the case of berths not under the jurisdiction of a Dock Master (e.g. wharves on the River Trent), requests for services of Pilots on Telex No. 527393 Spilot g duplicated to Telex No. 597656 Vtshumg.

3. *Navigation of the river:*

3.1 Vessels entering the river should communicate with the Vessel Traffic Services Humber (VHF Channels 16 and 12). A two way exchange of information is essential to ensure the smooth flow of traffic on the Humber necessary for the safety of vessels using the ports. In addition the Vessel Traffic Services Humber can fully advise Owners, Agents and Dock Masters, etc., as to the movement on the river of the vessels in which they are interested. Vessels approaching their destinations desirous of communication with the station serving their destination should do so as per the instructions in Notice to Mariners No. 3 of 1974.

4. *Completion of passage or departure from river:*

4.1 Inward bound vessels should on completion of their passage report to Vessel Traffic Services Humber indicating the closing down of their station. R/T should not be used whilst laid alongside in dock.

4.2 On departure from the river vessels are requested to report the disembarking of their Pilots and their intention of proceeding to sea.

4.3 All reported departures from normal traffic movement (e.g. engine failures, vessels weather bound at Spurn etc.), will be disseminated by the Vessel Traffic Services Humber to the appropriate authorities.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British Ships only.
Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
EEC Check List.

In addition Manifests and Bills of Lading are usually sent to Ag direct from the loading port.

PILOTAGE: Compulsory. *Humber Pilotage District – Spurn Pilot Sta* Mariners are advised that the Pilotage Control Station (Tel: (019 650392; Telex: 527393 Spilot G) is established on the Spurn Penins in a position Lat. 53° 34' 29" N., Long. 00° 06' 48" E.

The station is manned at all times with a Pilot Master in attenda and vessels bound to the Humber requiring the services of Humber Pi must give advance notice by signal through a G.P.O. Coast Statio by telex to the Spurn Pilot Station giving ETA at the seaward limit the Humber Pilotage District, draft, and destination at least 12 hou advance. Any adjustment to the time should be given at least 2 ho before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Sta by VHF radiotelephony may if within VHF range (approximately 20 mi call "Spurn Pilot" on VHF Channel 16 and after contact transfe Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme ra can cause unnecessary interference).

All requests for Pilots for ports or berths on the Humber, Ouse or T will be processed from Pilotage Control Station at Spurn (Telex: 52 Spilot G. Tel: (01964) 650392).

Compliance with this procedure will ensure, as far as possible shipping of Pilots without delay.

ANCHORAGES: The undermentioned anchorages have designated for the use of sea-going vessels. Masters are asked t operate by using these anchorages and to avoid anchoring in the Fa or elsewhere.

Spurn Anchorage for vessels awaiting Pilot, Bull Anchorage for ve awaiting berth and vessels outward (awaiting orders, etc.), Anchorage for small vessels and vessels sheltering and Haile Anch for vessels carrying explosives.

Spurn Anchorage. From position "A" 121° distant 3.65 miles from S Lighthouse, in a 125° direction 1.60 miles; thence in a 020° di 0.60 mile; thence in a 077° direction 1.00 mile; thence in a 347° di 0.70 mile; and thence in a 257° direction 2.40 miles to position "

Haile Anchorage: (Explosives): From position A, 216° distant 2.18 from Spurn High Lighthouse in a 284° direction 0.77 mile; then 139° direction 0.80 mile; and thence in a 027° direction 0.46 position A.

Bull Anchorage: From Position "A", 193° distance 2.1 miles from High Lighthouse, in a 090° direction 1.96 miles thence in a 294° di 1.76 miles, thence in a 274° direction 0.93 miles, thence in a direction 1.0 miles, thence in a 116° direction 0.88 miles, then 026° direction 0.55 miles to Position "A".

Hawk Anchorage:

(1) Lat. 53° 35' 00" N., Long. 00° 04' 14" E.
(2) Lat. 53° 36' 16" N., Long. 00° 01' 33" E.
(3) Lat. 53° 36' 09" N., Long. 00° 00' 52" W.
(4) Lat. 53° 34' 51" N., Long. 00° 04' 02" E.

RESTRICTIONS: Vessels may be accepted through the day and night, the only restrictions on the larger vessels being influence of tides together with the undermentioned physical limitations. The larger deep drafted vessels are usually docked from 3 hours before HW until HW, with similar restrictions on vessels sailing. Ships drawing up to 19 ft. can have access to the docks over the full 24 hours on Neap tides and can be docked/undocked over an 18 hour period on Spring tides.

Locks	*Entrance lock* *Length* m.	*Width* m.	*Depth of water on sill* *at MHWS* m.	*at MHWN* m.
King George Dock	228	25.7	12.75	11.25
Albert and William Wright Docks	97	24.3	8.52	7.02
			at MLWS	
Salt End Jetty Number 1	tidal		10.64	
Salt End Jetty Number 3	tidal		10.64	
Alexandra Dock	167	25.7	10.20	8.70

MAX. SIZE: The maximum permissible dimensions for a general cargo/bulk carrier vessel (excluding tankers) requiring a berth in the enclosed docks are as follows: King George & Queen Elizabeth Docks, length 196 m., beam 25.5 m., draft 9.5 m. at Neaps, up to 10.4 m. at Springs.

A vessel of LOA 222 m. recently entered King George Dock by special arrangement.

HEALTH: Pratique is normally automatic. In case of suspected illness, death on board or the presence of captive birds or animals on board, Master must radio the Hull and Goole Port Health Authority through the Post Office or Coastal Radio Stations not more than 12 hours or less than 4 hours before arrival using the following telegraphic address "Portealth Hull" or through the Vessel Traffic Services Humber using call sign "Vee Tee Ess" Humber on VHF Radio Channel 12. The usual flag or light signals should be shown except where only animals are present and Free Pratique should be obtained from the Hull and Goole Port Health Authority.

RADIO: Portishead Radio – call sign GKL but when within 200 miles of the Humber can go through Grimsby Radio – call sign GKZ.

VHF: See "Vessel Traffic Services Humber".

TUGS: Head boat normally joins vessel in vicinity of Salt End, about 2 miles from dock, and the other tug or tugs connect with vessel when approaching the dock. Where vessel supplies own ropes for towage these to be good stout hawsers. Wire ropes will not be accepted. There is a charge for use of tug's hawsers.

BERTHING:

Dock or Jetty	*Length of Operational Quays* (m.)	*Normal Depth* (m.)	
Alexander Dock	4,082	6.5	Tidal
King George	3,423	11.5	Impounded
Queen Elizabeth	1,646	11.5	
Albert and William Wright	3,453	HW	
Salt End Jetty No. 1	79	9.8	At C.D. which is at L.A.T.
Salt End Jetty No. 2	121	9.8	
Riverside Quay	325	4.8	

CONTAINER FACILITIES: Container terminal at Queen Elizabeth Dock equipped with 3 container gantry cranes of 35 tonnes, 40 tonnes and 45 tonnes capacity, 5 rubber-tyred gantries and a fleet of tractors and trailers.

Ro/Ro container services operated from King George and Queen Elizabeth Docks.

BULK HANDLING FACILITIES: Cargill UK operate a grain storage and export facility for vessels up to 34,000 d.w.t. Loading rate 1,200 tonnes/h. Storage capacity 60,000 tonnes. The facility can handle vessels with length 650 ft., beam 83 ft. and draft 32 ft.

Edible oil storage available.

CRANES: 41×3-10 tonnes, 2×32 tonnes and 1×35 tonnes capacity.

STEVEDORES: Enable Agent order gangs important receive accurate ETA. See "Holidays".

Working hours: 24 hours a day.

MEDICAL: Necessary for Agents to be advised of any urgent cases of illness in order that they can arrange for a doctor or if necessary an ambulance to be available immediately on berthing. Hospital facilities available.

If vessel required to remain in river awaiting berth, arrangements can be made for any serious case to be taken from vessel by lifeboat and conveyed to Grimsby for immediate treatment.

TANKERS: The Oil terminal at Salt End handles refined or semi-refined chemical, liquefied ammonia and petroleum products which are transferred from the vessel along the oil jetties through a series of chemical and service pipes which range from 4 in. for chemicals, 8 in. and 12 in. for spirit, 16 in. for fuel oils and molasses and 8 in. (300 ASA) for ammonia.

There are 2 tanker berths at Salt End and maximum dimensions of vessels are length 214 m., draft 10.4 m. Max. size 40,000 d.w.t.

Berthing Operations: Vessels normally berth on a rising tide from 2.5 hours before HW, swinging off berth and mooring port side to jetty. Late arrivals may be taken on up to 1 hour after HW, berthing starboard side to jetty but this is subject to tidal and weather conditions prevailing at time.

Moorings are to dolphins and buoys and normally consist of a minimum 2 head lines (to buoys), 2 stern lines (to dolphins), 2 breast lines forward (to buoys), 2 breast lines aft (to dolphins), 2 springs forward (to jetty), 2 springs aft (to jetty).

Cargo Handling and Requirements: Ship's derricks are needed to assist in hose connection. Shore hoses have 6 in., 8 in. and 10 in. 150 ASA flanges.

Discharge rates are governed by a maximum back pressure of 7 kg. (100 p.s.i.).

Facilities and Services:

Fresh water available.
Ship's gangway required.
Public telephone situated at jetty head.
No deballast or slop facilities are available.

Unberthing: Normally up to one hour either side of HW or LW slack.

DENSITY: 1013/1015.

FRESH WATER: King George and Queen Elizabeth Docks. Rate of delivery – 15 t.p.h. Also available at Salt End if berth vacant, at 50 t.p.h.

At Albert Dock water is delivered by water boat.

If water required urgently after 1700 hrs. weekdays or on Saturdays or Sundays Agents must be notified in good time to enable them order men out.

FUEL: Fuel oil available, viscosity up to 3,500 secs. Redwood. Gas oil and diesel also available. At least 24 hours notice required. Delivered by barge or road tanker.

FIRE PRECAUTIONS: Masters receive an emergency services dock plan with an explanatory leaflet.

CONSULS:

	Tel.		*Tel.*
Denmark	(01482) 655875	Netherlands	(01482) 224911
Finland	(01482) 25781	Norway	(01482) 224151

Iceland	(01482) 24024	Thailand	(01482) 29925
Italy	(01482) 447118		

REPAIRS: Facilities available for all types of deck and engine repairs.

DRY DOCKS: Wm. Wright Dock.

Net length	137.0 m.
Width at cope level	25.9 m.
Width at entrance.	15.2 m.
Depth of water on sill MHWS	6.6 m.
Depth of water on sill MHWN	5.1 m.

GANGWAY/DECK WATCHMEN: Watchmen available if required by Master.

OPENING/CLOSING HATCHES: Can be carried out by stevedores when ordered. Ship charged with actual cost, but ship's crew may do so if required.

CUSTOMS ALLOWANCES: Foreign trade – max. allowance 0.5 lb. cigarettes or cigars or tobacco. Home Trade – (Elbe/Brest limits) half the above. Wine and/or Spirits. Foreign Trade – 1 pint – opened. Home Trade – (Elbe/Brest limits) half the above allowance.

CARGO GEAR: When working with ship's gear a Register of Machinery, Chains and Wire Ropes, etc., with all Test Certificates and record of inspections to be produced to the stevedores before work commences.

REPATRIATION: Crew changes can be effected and repatriation arranged by sea or air.

AIRPORT: Humberside Airport. Air UK operate flights to Aberdeen, Amsterdam, Bergen, Norwich, Stavanger and Teesside.

TIME: BST (British Standard Time) GMT plus 1 hour, GMT during Winter months.

HOLIDAYS: New Year's Day; Good Friday (movable Holiday); Easter Monday (movable Holiday); May Day (1st Monday after May 1st.); Spring Holiday (last Monday in May); Bank Holiday (last Monday in August); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Emergency Calls – Police – Fire – Ambulance – Coastguard – Dial 999 and ask the operator for the service required, or by VHF Channels 16 or 12 to VTS Humber.

TELEPHONES: Can be placed on board at the majority of berths in King George and Queen Elizabeth Docks.

SERVICES: Tank cleaning, facilities for discharge of tank washings slop (residue), compass adjusting, etc., available.

SHORE LEAVE: Crew members allowed ashore.

DEVELOPMENTS: The Alexandra Dock, which closed in 1982, is to re-open to cater for increased trade using the port.

Parliamentary powers have also been granted allowing A.B.P. to construct 3 riverside Ro/Ro berths adjacent to King George and Queen Elizabeth Docks.

AUTHORITY: Associated British Ports, P.O.Box No. 1, Port House, Corporation Road, Hull, North Humberside HU9 5PQ. *Tel:* (01482) 27171. *Telex:* 592251. *FAX:* (01482) 26283. *Contact:* M.G. Fell, Port Manager.

IMMINGHAM: 53.37 N. 00.12 W. (See Plan)

VESSEL TRAFFIC SERVICES HUMBER: See "Hull".

NOTICES: See "Hull".

DOCUMENTS:

2 copies Immigration, Crew and Passenger List, H.O. Form I.S.6 Supplied by Agents.
Form C.13 General Declaration (In duplicate).
Form C.14 Ship's Stores (In triplicate).
Form C.142 Crew Declaration (In duplicate).
Form C.143 Small Parcels List. (1 Copy) if appropriate.
Form D.C.1 Self Declaration Deck Cargo (In duplicate).
1 copy Cargo Manifest.
1 copy Dangerous Cargo List.

PILOTAGE: Compulsory.

Humber Pilotage District – Spurn Pilot Station: A Pilotage Control Station (Tel: (0196) 46392; Telex No. 527393) is established on the Spurn Peninsula in a position Lat. 53° 34' 29" N., Long. 00° 06' 48" E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "Spurn Pilot" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward vessels bound for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least two hours advance notice of their ETA in Hull Roads to the Vessel Traffic Services Humber on VHF Channels 16 or 12 or through a Coast Station (telegraphic address "Humberops") or by telex No. 527656.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: "Hawk", "Bull" and "Haile Explosives Anchorage".

The Pilot station will advise where to proceed to anchor and also provide Pilot. See "Hull".

RESTRICTIONS: No restrictions, vessels may enter the harbour day or night. Max. draft for entering harbour 10.36 m. HW. Compulsory Pilots boarding Spurn Light-vessel, decide whether vessel shall proceed up river or anchor and await suitable state of tide.

Locks: Length 256.2 m., width 27.4 m.

MAX. SIZE: Also see "Tetney Terminal" and Immingham Oil Terminal under "Tankers".

Immingham Dock: Max. length 198 m., breadth 26.2 m., draft 10.36 m. on density 1010.

HEALTH: Master to report any "Reportable" illness as detailed in form "Port 38" to "Porthealth Immingham".

See "Health – All Ports" before first U.K. port.

RADIO: Humber Radio – 2182 kHz or VHF Channel 16. Dock Master VHF Channel 16. Tankers use Channel 19.

VHF: See "Hull" – Vessel Traffic Services Humber.

TUGS: Will join vessel off dock entrance, optional use of tow lines. If using tug's tow lines, charge for this service, depending on vessel's length.

BERTHING: Unless Master or Agent indicates preference, the Port Authorities will decide which side alongside. River Pilot deciding in conjunction with Dock Master most suitable berthing time for harbour and river installations.

Ro/Ro Terminals: The enclosed dock system incorporates 2 Ro/Ro freight terminals: 1×4 berth facility is operated by Exxtor while a second single berth terminal is available on a common user basis.

BULK HANDLING FACILITIES: Immingham Bulk Terminal – Ore, Coal and Coal Products:

Immingham Bulk Terminal is an off-shore jetty, some 525 m. long, sited approximately 0.5 miles upstream from Immingham Dock.

It is serviced from the shore by a single lane roadway, which has height and weight restrictions, which must be conformed with.

Ore Berth: All depths are to L.A.T. Datum.

Sea Channel	A deep Buoyed Channel to Humber Light Vessel.
Sunk Channel designed depth **	9.2 m.
Berth designed depth **	14.8 m.
Average Tidal Range – Springs	6.4 m.
Average Tidal Range – Neaps	3.2 m.
Max. Berth length	303.0 m. Stern lines to mooring dolphin.

Ship's Dimensions:

Max. length overall	303.0 m.
Beam	47.0 m.
Draft **	14.5 m.
Max. height of hatch coaming or side covers above High Water	15.80 m.
Max. working length of vessel	260.42 m.

** Subject to alteration due to local tidal conditions.

Additional Berth Data:

Designed stockpile capacity imported coal	350,000 tonnes
Seasonal restrictions	None
Designed stockpile capacity (ore)	600,000 tonnes
Discharge system	2 unloaders
Maximum designed hourly discharge	4,000 tonnes (ore) 2,600 tonnes (coal)
Average hourly discharge	2,300 tonnes (ore) 1,200 tonnes (coal)
Outreach of grab beyond fender line	37.4 m.
Clearance of unloader boom from High Water	29.84 m.
Clearance of unloader boom from Low Water	35.94 m.
Travelling length of unloader along jetty	287.72 m.

All oil/ore carriers must be in possession of a valid Gas Free Certificate, and be fitted with an Inert Gas System. If any slops remain on board, these must be inerted as per Charter Party B.S.C. CORE 7 CL48.

Discharge is continuous, including Bank Holidays.

Small quantities of stores can be supplied by road. However, chandlers must consult with the Jetty Officer before delivery (Tel: 571300, Ext. 127). Larger quantities and heavy loads are by barge only.

All oil bunkers are supplied by barge only.

Parking facilities on the Jetty are very limited.

A ship-shore access gangway is available.

Garbage disposal by arrangement with Agents and Termi management.

Maximum vehicle dimensions are:

Height – 3.20 m. (10 ft. 6 in.).

Width – 3.05 m. (10 ft. 0 in.).

Length – 9.70 m. (32 ft. 0 in.).

Axle weight – not to exceed 9 tonnes.

Contact: Immingham Bulk Terminal, Humber Road, Sou Killingholme, South Humberside DN40 3LZ. Tel: (01469) 5713 Fax: (01469) 571750.

Grain: 2×500 t.p.h. shiploaders available.

CRANES: 16 electric cranes 3 – 20 tonnes capacity and 3 mobile cran with capacity 40/60 tonnes.

1×40 ton crane at Exxtor berths.

STEVEDORES: Firm ETA to Agent required if possible before noon previous day before arrival.

Working Hours: Monday – Thursday, 0800 – 1700 hrs.; Friday, 080 1600 hrs.; overtime by arrangement.

MEDICAL: No advance notice necessary for medical treatment as hospital facilities available.

TANKERS: Also see "Tetney Terminal".

Immingham Oil Terminal: Berths No. 1 & 2: Up to 284,480 d.w.tonn with max. load displacement of 172,720 tonnes. Length up to 1,100 breadth no restriction and max. draft 42 ft. Four 12 in. lines for crude Two 12 in. lines for fuel oil and three 10 in. lines for white oils. One 8 line for fuel oil bunkers. Gas oil bunkers by barge.

Berth No. 3: Max. 80,000 d.w.tonnes with max. load displacem 110,000 tonnes. Length up to 1,100 ft. and max. draft 42 ft. 3 load arms (2×12 in. for fuel oil and ballast and 1×12 in. for distillate, s and ballast). All bunkers by barge.

Finger Pier: 8 in. loading arms for fuel and white oils

Mooring Operations: Large vessels normally berth at HW port side jetty. Ideally, vessels of maximum size should stop off jetty and appro beam on at rates of no more than 55 ft. per minute. Number of t depends on vessel size.

Mixed moorings in the same service (i.e. headlines, stern lines, brea and springs) are not permitted unless previous authorisation has b given and then only when stand-by tugs and Pilot remain on stand throughout vessel's stay alongside.

Vessels are not allowed to berth or unberth without the attendanc the Associated Petroleum Terminal's Berthing Master.

There is no fixed doppler or berth approach rate indicators instal on jetty.

Normal mooring pattern is indicated in the "Plan Section".

Various wind speed restrictions in force for berthing and sai operations.

Gangway: Shore gangways available if sufficient deck space availa – and will be used where possible. In the event of shore gangway be out of service, the vessel will be informed via Pilot/VTS and will rig gangway.

Unberthing: Due to the strong tidal currents which develop in the vici vessels normally sail on or around HW or LW slack.

Maximum size vessels, having made fast their tugs, come off the b bodily, and swing in a position just to the N.E. of the terminal.

Eastern Jetty: Max. Length approx. 650 ft. breadth, no restriction, d depends on LW, range 27 ft. to 36 ft. Lines 10 in., 8 in., 6 in. depe on Receivers. Bunker line available.

Western Jetty: Max. Length approx. 800 ft. breadth, no restriction, d depends on LW, range 27 ft. to 36 ft.

Berthing Operations: (Eastern and Western Jetties): Normal ber time for vessels is not more than 1 hour either side of HW or LW sl

Vessels berth either port or starboard side to jetty dependin weather and tidal conditions prevailing at time.

Jetties are of wooden piling and fender construction and consequ care should be taken to ensure vessel does not land too heavily w berthing.

Draft restrictions can be calculated by taking the ABP predictio the outer sill at Immingham for LW and adding 0.5 m. (1.6 ft.).

Normal mooring pattern is 3 headlines, 3 sternlines, 2 breast forward, 2 breastlines aft, 2 springs forward and 2 springs aft.

Unberthing; Normal sailing time, in view of strong tidal conditions w develop, is at HW or LW slack or up to one hour either side of t times.

Killingholme North: Max. length 580 ft., beam, no restric Draft 30 ft. 6 in. One 8 in. line. One 4 in. bunker line.

Berthing Operations: Normal berthing time for vessels is at HW o slack and not more than 1 hour either side of these times. Vessels either port or starboard side to jetty depending on weather o conditions prevailing. The mooring pattern is similar to that us Immingham East and West Jetties (see above).

Unberthing: Normally up to one hour either side of HW or LW sla

Killingholme South: Max. length 800 ft.; beam, no restriction. Max will be advised. 10 in. loading arms. Bunkers by barge. Ship's ga required.

Berthing Operation: Vessels berth at H.W. or L.W. (if draft accep

Unberthing: One hour before H.W. or at L.W. (if draft acceptabl

Small vessels normally berth and unberth at anytime.

Head and stern lines must be a minimum of 100 m. length.

LPG FACILITIES: Humber Gas Terminal located at South Killing

Max. Vessel Size: LOA – 280 m. (Min. 65 m.). Beam – No res Capacity – 80,000 cu.m. (L.P.G) or 55,000 d.w.t. (white oil)

Max. Draft: Berth dredged to 12 m. Draft dependent on low wate Mud bottom on berth. Capable of future dredging to 14.8 m belo

Tidal Range: Springs – 6.4 m. (21 ft.) (approx.) Neaps – 3.2 m. ((approx.)

Max. Tidal Ebb Speed: Springs – 4.5 – 5 knots. Neaps – 2.54 –

Approach to Berth: Sunk Dredged Channel and Main Chann Channels are marked by light buoys and light floats. Pilotage com

Jetty Berth: 6 facing fenders. 6 mooring dolphins (3 Fore/3 Aft). Minimum flat side vessel – 32 m. with manifolds midships.
Presentation Arm: 1 × 10 in. L.P.G and 1×10 in. white oil.
Jetty Pipelines: 1×14 in. L.P.G., 2×10 in. and 2×12 in. white oil lines.
Cargo Handling Rates: L.P.G. exports – 2×300 cu.m.p.h. pumps. L.P.G. imports – up to 1,000 cu.m.p.h. White oil exports – up to 1,200 cu.m.p.h.
Fresh Water: Available from berth.
Bunkers: Available only by barge.
Gangway: Ship's gangway required.
Stores: Limited access to Jetty. Rigid vehicles only but no parking facility at Jetty Head. (Always refer to Agent).

DENSITY: In harbour 1010.
FRESH WATER: Available all berths by hose. Rate of delivery 20 t.p.h.
FUEL: 24 hours notice required. All grades available.
FIRE PRECAUTIONS: Copy of these regulations handed to the Master on arrival.
CONSULS:

Finland	Immingham 573187	Netherlands	Immingham 76246
Denmark	Grimsby 357521	Norway	Hull 224151
Greece	Hull 224151	Sweden	Immingham 571387

REPAIRS: No facilities.
DRY DOCKS: None.
SURVEYORS: Classification/P&I and cargo surveyors available.
GANGWAY/DECK WATCHMEN: Watchmen not usually employed, but left to the discretion of the Master.
OPENING/CLOSING HATCHES: See "Grimsby".
CERTIFICATES:

Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction and any British Light Dues Receipts.
Derat Certificate.
Oil Pollution Certificate (Tankers).

CUSTOMS ALLOWANCES: 8 days – 200 cigarettes per person approx. Wine/spirits, 4 days – 0.25 pt. per day; this depends on the Customs Officer's discretion.
CARGO GEAR: This must comply with the Department of Employment and Productivity regulations. Normally discharge carried out by shore cranes, although overside berths available.
REPATRIATION: All facilities exist for dealing with crews and passengers.
AIRPORTS: Leeds Bradford Airport and Humberside Airport for Amsterdam (3 flights from each daily), Aberdeen and London for International destinations.
TIME: GMT. Summertime, GMT plus 1 hour.
HOLIDAYS: See "Grimsby".
POLICE/AMBULANCE/FIRE: Port Security – 72067, 72068. County Police – 76444. Ambulance; County – Cleethorpes 692912. Fire; 999 ask for Fire.
EMERGENCY CO-ORDINATION CENTRE: Humber Estuary, Humber Ports Operations and Information Service. Tel: Hull 35599 – Hull Radio on VHF Channels 16 and 12.
TELEPHONES: Public telephones available.
BANKS: All major U.K. Banks have branches in the area.
STORING: See "Prelims".

1, 2, 3. It is normal practice for such stores to be delivered to ships side at in-dock berths by road vehicles. At the Eastern and Western River Jetties at Immingham, however, vehicles are not permitted and the approximate distances fom the root of the Jetties to ships side is from 400 m. to 500 m. South Kilingholme Jetty – access by foot only.

4. Forklift trucks could be used at in-dock berths, if necessary.

If proceeding to NCB/BSC or Immingham Oil Terminals – check with Terminal Authorities.

IDENTIFICATION CARDS: Seaman's Book or Passport sufficient for crew members going ashore.
GARBAGE DISPOSAL: In dock, collection service available alongside vessels using private hire skips for kitchen/galley waste. Contact BIFFA (Tel: (01472) 351185). Some Port Authority skips available on the quayside for dunnage waste disposal only.

At the jetties, garbage skips are also available.

Immingham Oil Terminal: Garbage disposal available at each berth. Skips permanently in position and are emptied 3 times per week. Service administered by jetty contractor, Delta Catalytic Port Services (Tel: (01469) 574044). Ships up to 6,000 d.w.t. included in mooring tariff at finger pier. Other vessels at other berths, £39.00 per vessel. Same facilities at South Killingholme Jetty and Immingham Gas Terminal.

WASTE OIL DISPOSAL: In dock, collection service available using tanker trucks alongside vessel. Contact Waste Oil Services (Tel: (01472) 827112) or BIFFA (Tel: (01472) 351185).

Killingholme Jetty has no access for vehicles to come alongside vessels, but other jetties can be facilitated similarly to vessels in dock.

SEAMAN'S CLUBS: Immingham Seaman's Club, Immingham Dock. Tel: 0469-574195. Danish Mission, 2 Cleethorpe Road, Grimsby. Tel: 0472-342257.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Associated British Ports, Port Office, Cleethorpes Road, Grimsby, South Humberside DN31 3LL. *Tel:* (01472) 359181. *FAX:* (01472) 242488, 240255. *Contact:* D. Dunn, Port Manager.

Dock Office, Immingham Docks. *Tel:* (01469) 571555. *FAX:* (01469) 571559. *Contact:* Dock Superintendent.

INVERNESS: 57.29 N. 04.14 W. (See Plan)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Customs and Excise and Health Documents.
Manifest.
Bills of Lading, etc.

PILOTAGE: Compulsory for all vessels over 50 m. Apply direct to Agent or to Pilot, telephone Inverness 715715. ETA 24 hours. Pilot equipped with VHF. Pilot cutter is a blue launch. Pilot station Meikle Mee Buoy. Location of anchorage while awaiting Pilot – Munlochy Buoy.
ANCHORAGES: Munlochy Buoy in 5 – 8 fathoms. Beauly Basin in 15 fathoms.
RESTRICTIONS: Vessels may enter and leave from 2 hours before HW until HW.
MAX. SIZE: Ship max. 125 m. length, 6.25 m. draft, high water springs. 5.5 m. draft, high water neaps
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick Radio.
VHF: Harbour Office on VHF Channels 16, 14 and 12 during office hours.
TUGS: Available from Invergordon.
BERTHING: *Longman Quay:* Length 180 m. Depth 5.0 m L.A.T.
Thornbush Quay: Length 156 m. Depth 3.0 m L.A.T.
New Citadel Quay, Old Citadel Quay and *Central Quay:* Each about 100 m. in length, and *Shore Street Quay,* about 150 m. in length, form a continuous length of quayside on the East side of the harbour at its upper end; there are depths of 3 m. alongside. L.A.T.
BRIDGES: Kessock Road Bridge, max. clearance 29 m. at MHWST.
STEVEDORES: Arrange through Agent. 24 hours notice required.
MEDICAL: Doctor available.
DENSITY: 1002.
FRESH WATER: Available on demand, 5 t.p.h., ex-hose on quay.
FUEL: Marine diesel and petroleum on request.
CONSULS: Sweden (Mr. John Fraser), Tel: 238366.
REPAIRS: Thornbush Slipway Tel: 711048.
GANGWAY/DECK WATCHMEN: Supplied by ship.
OPENING/CLOSING HATCHES: Done by crew.
CUSTOMS ALLOWANCES: Tobacco/Wines/Spirits. Usual amount allowed by Customs and Excise.
REPATRIATION: Facilities available.
AIRPORT: Dalcross, 7 miles from Inverness.
HOLIDAYS: 1st and 2nd January; Easter Monday; July Bank holiday; First Monday in October; and Christmas Day. All official holidays, cargo work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Police 715555; Fire Brigade 222722; Ambulance 231511.
TELEPHONES: Adjacent to quays.
SHORE LEAVE: Unrestricted.
IDENTIFICATION CARDS: None.
GARBAGE DISPOSAL: Rubbish bins available on quay, free of charge, emptied as required.
WASTE OIL DISPOSAL: Full service into tanker trucks available. Charges according to quantity and commodity. Contact Agent for details.
SEAMAN'S CLUBS: None.
AUTHORITY: Inverness Harbour Trust, Harbour Office, Longman Drive, Inverness IV1 1SU, Scotland. *Tel:* (01463) 715715. *FAX:* (01463) 715705. *Contact:* Captain J.B. Fairgrieve, Harbour Master.

IPSWICH: 52.03 N. 01.10 E. (See Plan)

DOCUMENTS: Masters can conclude all documentation in port. Ship's Agent will give the necessary advice.
PILOTAGE: On behalf of the Ipswich Port Authority. Pilotage Authority – Harwich Haven Authority.
Compulsory Area: River Orwell and Harwich Harbour as far seaward as the following outer boundaries:

Eastwards to Longitude 01° 24' E.
Southwards to Latitude 51° 54.5' S.
Northwards to Latitude 51° 57.4' N.

Pilotage is compulsory for all vessels over 50 m. LOA navigating within this area except H.M. Ships and vessels of less than 100 m. LOA operating exclusively within the port area.

Boarding Point: Boarding and landing of pilots is carried out by fast launches operating from Harwich. The boarding position will be outside the compulsory area, and must be agreed with Harwich Harbour Operations, having regard to the size and draft of the ship, and other prevailing circumstances.

ETA's/ETD's: Inward vessels to give 8 hours Notice of Arrival at Harwich Approach Buoy, (Latitude 51° 56.4' N., Longitude 01° 31.2' E.), together with details of Gross Tonnage/Gross Register Tonnage, Draft (Maximum), Departure Port and Destination.

Confirmation of ETA required 3 hours before arrival.

Outward vessels must give a minimum of 2 hours' notice before sailing from or moving within the compulsory area.

Communications: Call sign "Harwich Harbour Radio", VHF Channel 9.

VHF Radio:	Channel 16	Safety
	Channel 9	Pilotage and ETAs
	Channel 71	VTS and Reporting
	Channel 6	Pilot Launches
	Channel 69	Tugs
	Channel 20	Harwich Radar Assistance
	Channel 11	Harbour Craft

Telephone: (01255) 243000 Harbour Operations, or (02155) 243111 Pilot Orders.
Telex: 98472 HAROPS - G.
Fax: (01255) 241325.

Pilot Launches: VHF Channels 6 and 71.
Director of
Pilotage: Captain I.T.Whale, Tel: (01255) 243030.
Ipswich Harbour
Master: Captain D.H.Winter, Tel: (01473) 211066 (manned 24 hours).

ANCHORAGES: No anchorages within port. All vessels will proceed direct to berth, otherwise anchorage provided in Harwich Harbour or as indicated by Harwich Harbour Radio (VHF Channel 71).

RESTRICTIONS: Up to 80 m. in length the lowest permissible U.K.C. is 0.75 m. Over 80 m. and up to 110 m. in length the lowest permissible U.K.C. is 1.0 m. Over 110 m. in length by special arrangement. (U.K.C.=Under Keel Clearance).

See "Notices" – "Guidelines – Vessels Navigating the River Orwell and the Port of Ipswich" and "Dangerous Substances in Harbour Areas Regulations".

MAX.SIZE: LOA 140 m., draft 7.7 m. (inward) and draft 7.4 m. (outward), both on a 3.6 m. tide.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Masters to contact ship's Agent through North Foreland, Humber, Niton or Portishead depending on position of vessel. All these radio stations hold cable addresses and staff telephone numbers of Agents.

VHF: A 24 hour VHF radio facility is in operation. Vessels arriving should contact "Ipswich Port Radio" on VHF Channels 16/14 on entering the River Orwell and report and/or maintain a listening watch as instructed. Channels 14 and 12 will be used for the passing of messages which should be restricted to the safety of navigation or persons.

TUGS: Vessels of 110 m. in length and up to 130 m. will use 1 tug. Vessels of 130 m. in length and over will use 2 tugs.

Special consideration may be given to vessels fitted with bow thrust facilities trading regularly to the port.

BERTHING: Vessels bound for berths in the Wet Dock should arrive off the lock 2 hours before HW.

Power Station Quay: Length 143 m.
Depth of water alongside: 7.5 m., subject to silting.
Approach channel: 5.6 m. below chart datum.

Cliff Quay: Length: 3,250 ft (990 m.).
Depth of water alongside: 7.5 m. below Chart Datum. Subject to silting.
Approach Channel: 5.6 m. below Chart Datum.
Cranes: 5 portal jib cranes from 10 tonnes to 35 tonnes lifting capacity. A Karrilift container gantry is also available.

Largest vessel which can be accommodated: 460 ft. (140.2 m.) overall in length, 25 ft. 6 in. (7.7 m.) draft inwards, 24 ft. 6 in. (7.4 m.) outwards.

The Quay handles containers and heavy lifts up to 35 tonnes and is particularly well equipped to handle cargoes direct to and from both road and rail transport. The South end has been developed as a modern terminal for handling all types of general cargo, including containers, flats, palletised units and bulk cargoes. Spacious modern transit sheds and a container park are sited on part of this Quay. Vessels up to 25 ft. 6 in. (7.7 m.) draft can be handled at the terminal.

Grain Terminal: Located at Cliff Quay. Capable of handling vessels up to 10,000 tonnes capacity at a loading rate of 550 t.p.h. (malt) and 700 t.p.h. (other grain products). Grain silo capacity 11,000 tonnes.

Container Terminal: The terminal has a 40 tonne ship to shore luffing crane and 2 shoreside gantries with 1-9-1 configuration.

West Bank Terminals: These terminals provide 3 berths with a total quay frontage of 310 m. and are dredged to 5.8 m. below Chart Datum. 2 container berths are backed up by 5.5 hectares of hardstanding, including a transit shed of 2,750 sq.m. floor area. The berths are served by portal cranes of 40 tonnes, 37.5 tonnes and 10 tonnes capacity and are adjacent to a Freightliner Terminal offering daily services and incorporated into the Railfreight Speedlink network.

A Ro-Ro berth is backed up by 7 hectares of hardstanding. The bridge ramp is designed to carry a load of 180 tonnes with maximum axle loads of 45 tonnes. The ramp has a carriageway of 36.9 m. long×7 m. wide and can handle traffic at all states of the tide.

The Dock: The dock is situated within the town of Ipswich. It is some 26.25 acres (10.63 hectares) in extent and is approached by an entrance lock.

NAVIGATION - THE ENCLOSED DOCK, ISPWICH

VHF Radio: The Lock Master is equipped with VHF Marine Radio and may be contacted through the Orwell Navigation Service (Ipswich Port Radio) on Channel 14.

Maximum Size Vessels that can:
(a) Lock In or Out: 80.76 m. LOA and 14.50 m. beam.
(b) Enter the Dock: 114 m. LOA and 14.50 m. beam. (Vessels over 80.76 m. LOA can only enter the Dock when the Outer and Inner Lock-gates are open, that is for approximately one hour prior to HW on most tides but this is not guaranteed).
(c) Maximum Draft: Owing to the shape of the Lock Pit, modern vessels require a minimum Under Keel Clearance depending upon their beam. To ascertain the maximum permissible draft *add* the following to the height of the Tide above Chart Datum at time of entry.

Vessel's Beam (m.)	(m.)
12.00	+2.09
12.50	+1.81
13.00	+1.59
13.50	+1.43
14.00	+1.28
14.50	+1.17

Notwithstanding the above, the maximum draft for any vessel in the enclosed dock is 5.50 m.

Locking Times:
(i) Commercial Vessels:
May Lock In or Out from 2 hours before HW to 40 minutes at HW.
Special arrangements may be made for vessels to enter or lea one hour either side of these times, subject to the Lock Mas being advised during the preceeding tide, there being suffic water and at additional cost to the User.
(ii) Non-Commercial Vessels:
Should enter or leave the Dock from one hour to quarter ho prior to HW, if possible.

Entry Signals:
Lights fixed above the Orwell Navigation Service Building on t East-side of the Lock indicate to vessels whether the Lock is op or closed for entry from the River or the Dock as appropriate.
ONE RED LIGHT *Lock closed* to vessels entry.
ONE GREEN LIGHT *Lock open* for vessels entry.

Flood Protection Gates:
These gates are closed when the tide level is 4.6 m. or mo above Chart Datum. During this period the Dock Entrance closed to navigation.

Inside, in addition to some 2,700 ft. (823 m.) of private quays own by merchants having warehouses or mills adjoining, where small vess can berth, there are the following quays owned by the Authority:

(i) *South West Quay:* This quay is 800 ft. (244 m.) in length wit depth of 19 ft. (5.79 m.) of water alongside at mean dock level. The qu is served by 3 modern 7.5 tonne portal electric travelling cranes a mobiles as required.

(ii) *Timber, Public Warehouse,* and *End Quays* total 940 ft. (286 in length and have a depth of water alongside varying from 12 ft. (3.65 to 20 ft. (6.09 m.). Public warehouse is served by mobile cranes capa of lifting up to 5 tonnes.

(iii) *Tovell's Wharf* is a 600 ft. (183 m.) reinforced concrete quay w 22 ft. (6.70 m.) of water alongside. It is served by mobile cranes up 5 tonnes lifting capacity.

(iv) *Orwell Quay* is 775 ft. (236 m.) in length, with 18 ft. (5.48 m.) water alongside and includes a Ro/Ro berth. One transit shed, wit floor area of 10,100 sq.m. is situated immediately behind the quay ap together with further extensive covered and open areas.

BRIDGES: The River Orwell Bridge has a clearance of 38.8 m. abo MHWOST (43.07 m. above Chart Datum).

Masters of larger vessels are advised to check their air drafts an in any doubt contact their Agent or the Ipswich Port Authority bef proceeding up the River Orwell.

STEVEDORES: Ship's Master normally advises his Agent of his E distribution of cargo on board, and all relevant details. The Agent pas this information to Stevedores.

MEDICAL: All medical facilities available in port. Vessels requ medical assistance on arrival should advise all details by radio teleph or in their ETA cables.

TANKERS: It is desirable that when Master of a tanker gives an E he also indicates the size of pipeline, size of connection and dischar point in order that necessary arrangements can be made at dischar point of receiving oil terminal. There are no slop facilities at Por Ipswich, however arrangements can be made, through the Port Autho (Tel: (0473) 231010) for firms using road tank vehicles to remove slu or oily-waste. All cleaning and gas-free operations must be carried outside precincts of the Harwich Harbour Board. Only one tanker b at Ipswich but there are 6 intake points on quay and it is usual 3 coastal tankers to be accommodated, depending on the overall len and berth availability. A maximum draft on the berth of 23 ft. (7 subject to silting.

Also see "Notice".

DENSITY: Approximately 1020, depending on the amount of fresh w in river due to heavy rain.

FRESH WATER: Available at all quays. Delivery by hose through m at 10 t.p.h.

FUEL:
Gas oil 35 secs. Redwood.
Light fuel oil 200 secs. Redwood.
Medium fuel oil heated 950 secs. Redwood.
Heavy fuel oil heated 3,500 secs. Redwood.
At least 24 hours' notice required.

CONSULS: Vice-Consul for Sweden and Vice-Consul for Nor Tel: (01473) 59281.

REPAIRS: Only small repairs on board.

DRY DOCKS: Slipway available for vessels up to 80 m. LOA 1,000 tons.

SURVEYORS: Lloyd's Register, Tel: (01502) 81117.

GANGWAY/DECK WATCHMEN: No watchmen required by Authority, but sufficient men available at all times to move vess necessary.

OPENING/CLOSING HATCHES: Hatches opened and closed by s crew.

CERTIFICATES: Following certificates are required by Agents in to arrange Customs Clearance: Ship's Register, Radio Certificate, Line Certificate, Safety Equipment Certificate, Derat Certificate, B Tonnage Certificate, if required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes, or equiva tobacco, per man. Wine and/or Spirits, 1 bottle per man.

CARGO GEAR: Cargo working gear is supplied by steve Normally, quayside cranes are used for discharging and loading. In of cargo gear being used in port, Ship's Gear Certificate, duly cer that all gear has been examined and is in every way workab suitable for discharge and/or loading of cargo, is to be produced.

REPATRIATION: Facilities exist at port for effecting crew chang arranging repatriation.

AIRPORT: Ipswich Airport is 2 miles from the port. Charter available for ship's crew. Tel: (01473) 70111. Stansted Airport 40 all international flights available.

HOLIDAYS: Normal holidays for English ports.
TIME: GMT in Winter months. Summer time, GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: In emergency dial 999. Otherwise Police - (01473) 725363.
SHORE LEAVE: Allowed.
DENTIFICATION CARDS: Not required as long as each crew member as in his possession a Seaman's Book and/or Passport.
GARBAGE DISPOSAL: Garbage disposal is available, skips are placed longside vessels. Contact Port Authority.
WASTE OIL DISPOSAL: Service available using private contractors. Contact Cleanaway Ltd. (Dry Cargo, Tel: (01953) 452374. Wet Cargo, el: (01223) 423231) or Hales Containers. (Tel: (01473) 831725).
SEAMAN'S CLUBS: Ipswich Mission to Seamen, 20 Camberley Road, pswich IP4 5QF. Tel: (01473) 727822.
CURRENCY: U.K.Pound (U.K.£).
NOTICES: *Guide Lines – Vessels Navigating the River Orwell and the Port of Ipswich (B.A. Chart No. 2693).*

. *Length and Under Keel Clearance (UKC):*
Vessels up to 80 m. LOA – lowest permissible UKC 0.75 m.
Vessels between 80 m. LOA – 140 m. LOA – lowest permissible UKC 1.0 m.
Vessels over 140 m. will only be accepted by special arrangement with the Harbour Master.
Air draft under the Orwell Bridge is 43.07 m. above Chart Datum.

2. *Towage:*
Up-river from Buoy No. 5, vessels between 110 m. LOA and 130 m. LOA – 1 Tug. Vessels 130 m. LOA and above – 2 Tugs.
Special consideration may be given by the Harbour Master to vessels fitted with bow thrust facilities which trade frequently to the Port of Ipswich.

3. *Speed:*
A Master of a vessel will at all times navigate with caution and at such speed that no damage to the environment, or hazard will be created to other craft which may be navigating or moored in the vicinity.
The speed of vessels must be reduced to the minimum consistent with safe navigation when passing the yacht anchorages at Pin Mill, Woolverstone and other places, or other vessels moored, or dredgers operating; or works of repair, maintenance or construction in progress within the Harbour and from a point abreast of East Fen Buoy to the Lock Gates and while within the Dock.
The maximum speed for vessels under 50 g.r.t. shall be deemed to be 6 knots.

4. *Position Reporting:*
(a) A Master shall report to the Orwell Navigation Service on VHF Channel 14/12.
  (i) On entering the River approaching Buoy No. 1.
  Passing Buoy No. 4.
  Passing Cathouse.
  Passing Buoy No. 9.
  When secure on berth.
  If any such vessel is in a damaged condition which renders such vessel in any way unseaworthy, or inhibits the vessel's ability to manoeuvre, full particulars of the damage shall be given in such report.**
  ***Note:* The Harbour Master on receiving a report from a Master of a vessel may give directions to the Master of such vessel under powers in that behalf given by Section 59 (2) of the Ipswich Dock Act 1971.
  (ii) On leaving the Port, report to the Orwell Navigation Service at the following positions:
    Prior to leaving the berth
    On clearing berth and proceeding
    Passing Cathouse Buoy
    Passing Buoy No. 4
    Passing Buoy No. 2
    Immediately before leaving the Port.
  (iii) While navigating within the Port at all times maintain a listening watch as directed by Orwell Navigation Service.
(b) If such vessel is not fitted with VHF radio-telephone or is fitted with one which is not operational at the time of entry into the Port or departure from a berth therein, on arrival at a berth owned or occupied by the Authority, prior to leaving a berth in the Port and before moving from one berth to another, report to the Orwell Navigation Service in person or by telephone.

5. *Restrictions (Navigational):*
(a) Inward Bound Vessels:
To satisfy the conditions in 5/1 and 5/2, Masters and/or Pilots of Inward bound vessels *must* contact the Orwell Navigation Service and liaise, if necessary, with any outward bound vessel.
(b) Outward Bound Vessels:
The Master and/or Pilot of outward bound vessels *must* ascertain the position in the Channel from the Orwell Navigation Service, prior to leaving the berth and liaise, if necessary, with any Inward bound vessel.
(1) Vessels over 90 m. LOA:
A vessel of 90 m. LOA or more, *must not pass* or *overtake* another vessel of 90 m. LOA or more in the River Orwell between the Butt Buoy and the Port of Ipswich.
(2) Petroleum Tankers and Chemical Tankers with Hazardous Cargo:
These vessels may navigate at any time (subject to the above and to tidal constraint if appropriate) provided that:
(i) Between one hour after sunset to one hour before sunrise there is no opposing traffic on the River above the Butt Buoy, the size or draft of which would present a potential hazard.
(ii) Weather and visibility conditions are of a standard acceptable to the Master and the Pilot concerned.

6. *Sound Signals:*
In addition to the Sound Signals required to be made by the Regulations for the Prevention of Collisions at Sea, the following signals will be used by vessels navigating in the River Orwell:
  4 short blasts followed by 1 short blast = Vessel swinging to starboard.
  4 short blasts followed by 2 short blasts = Vessel swinging to port.
  1 long blast, given when approaching the Woolverstone and Pin Mill areas between the hours of sunrise and sunset. (Inward bound vessels between Buoys No. 4 and 5, and outward bound vessels when passing Buoy No. 7.).
  1 long blast when leaving Cliff Quay or West Bank berths during daylight hours on Saturdays and Sundays.

7. Nothing in these Guide Lines will remove from any Pilot the right to advise Masters against navigating in the River if in the professional opinion of the Pilot a proposed course of action is considered to be imprudent.

8. Notwithstanding anything contained in the generality of these or other arrangements regarding the navigation of the River Orwell, vessels of over 140 m. LOA may, under certain special circumstances and conditions, navigate in the River subject to prior consultation with the Ipswich Harbour Master.

9. Nothing in these Guide Lines shall preclude the Ipswich Port Authority Harbour Master, after consultation, if relevant, with the Haven Pilots, from giving consideration to the exemption of a specific vessel from any of the conditions and requirements herein before mentioned.

Signed: Harbour Master
Date: 1st February 1990.

Dangerous Substances in Harbour Areas Regulations 1987:

1. A Ship Master; Agent; Transport Operator; Contractor or any person who intends to bring a dangerous substance, as defined in Regulation 1(a) of the Merchant Shipping (Dangerous Goods) Regulations 1981, into the Harbour or Harbour Area of the Port of Ipswich, either from Inland or from the Sea, is required under the above regulations to give the Harbour Master and the Berth Operator advance notice of their intention.
The Harbour Master reserves the right to refuse transit through the Harbour Area of certain highly dangerous substances, or to require them to be handled direct to or from transport into a vessel or vice versa.

2. Notification should be made to both the Harbour Master and the Berth Operator from 14 days to 24 hours prior to the goods entering the Harbour Area. However, under certain circumstances the following may apply:
Inward Cargoes: Harbour Master's Information.
In the case of ship reporting Inward from Continental passage, where it is impracticable to comply with the foregoing, then the maximum notice possible should be given but *never less* than *6 hours*.
This to include R O B (Remaining on board) Dangerous Substances in transit through the Port.
This information to be telexed to No. 98642 or Fax to (0473) 230915 at the Orwell Navigation Service (Port Radio) and should also be sent to the Berth Operator.
Export Cargoes: Berth Operator's Information.
In cases where it is not possible to comply with the above regulation, a lesser notification *may* by accepted but *never less* than *12 hours* prior to the arrival of the goods in the Harbour Area.
This information to be transmitted to the Berth involved (Berth Operators – See No. 3).

3. *Berth Operators:*

4. *Notification:*
Notification must include full details of Dangerous Substance to be presented into the Harbour Area, which should be given in the following format.
(a) Name of Agent and/or Operator presenting the notification.
(b) Name of Vessel.
(c) Berth.
(d) Date/Time due.
(e) Dangerous Substance.
(f) UN Number/Flash Point.

(g) Quantity.
(h) Method of Packaging.
(i) Transport Company involved.

5. *Radio Active Substances and Explosives:*
Radio Active Substances and Explosives which are subject to the Port's Licence may only be brought into the Harbour Area after prior booking and by agreement with the Harbour Master and the Berth Operator as to the type, quantities and dates of transit in line with the foregoing.

6. *Other Regulations:*
A Dangerous Substance brought into the Harbour or Harbour Area under the Merchant Shipping (Dangerous Goods) Regulations 1981, must also conform to the following regulations:

International Maritime Organisation – Dangerous Goods Code.

Classification, Packaging and Labelling of Dangerous Substances Regulations 1984.

Dangerous Substances (Conveyance by Road in Road Tankers and Tank Containers) Regulations 1981.

The Classification and Labelling of Explosives Regulations 1983.

Radioactive Substances (Carriage by Road, GB Regulations 1974). Regulations for the Safe Transport of Radioactive Materials. – Ionising Radiation Legislation 1985.

International Carriage of Dangerous Goods by Rail (RID).

International Carriage of Dangerous Goods by Road (ADR) Geneva 1957.

Road Traffic (Carriage of Explosives) Regulations 1989.

7. *Documentation:*
When Dangerous Substances arrive at the Harbour Area, the Ipswich Port Authority will require, in addition to the Unit Load Note/Interchange Note, the following:

(1) Dangerous Substance Documentation Showing:
  (a) IMO Class.
  (b) The UN Number.
  (c) The correct Chemical name of substance – Trade Name not acceptable.
  (d) Flash Point (if applicable).
  (e) The number and type of packages and, if explosive, the nett explosive content.
  (f) Emergency contact telephone number.
(2) Labelling:
The Packages/Unit to be labelled in accordance with the IMDG Code and old label/s to be removed.
(3) Certificates and Licences:
If Radioactive Substances, the appropriate packaging certificates and Licences.

Signed: Harbour Master.
Date: 6th November 1989.

REPAIRS: Facilities available to carry out all types of deck and engine repairs.

DRY DOCKS: Largest dry dock "Imperial", length 167.6 m., width of entrance 21.3 m. and depth over blocks at 7.3 m., also 2 smaller dry docks.

GANGWAY/DECK WATCHMEN: Usually supplied by ship but shore watchmen arrangeable by special agreement.

OPENING/CLOSING HATCHES: Custom of the port is that this work is normally carried out by ship's crew.

CERTIFICATES: Ship's Register, Load Line, Safety Radio, Safety Equipment, Cargo Construction, Derat Certificates, Light Dues receipt.

CUSTOMS ALLOWANCES: Usual amounts allowed by Customs and Excise.

CARGO GEAR: No additional requirements necessary to comply fully with local safety regulations as all gear supplied by stevedores.

REPATRIATION: All facilities available for effecting crew changes and repatriation by sea, air and rail.

AIRPORT: Edinburgh Airport served by regular airlines and located approx. 9 miles from Leith.

TIME: British Standard Time, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Public holidays observed annually: 3rd Monday in April; 3rd Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd, and 3rd January. Cargo work can be arranged on public holidays except 25th December and 1st and 2nd January.

POLICE/AMBULANCE/FIRE: Tel. 999 and ask for service required or call Leith Harbour Radio on VHF Channel 12.

TELEPHONES: Can be arranged with B.T.

SERVICES: Compass adjusting facilities available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE: Local ship's Agents order skips as required from local disposal companies. Small amounts of garbage can be arranged through the port.
WASTE OIL DISPOSAL: Collection by road tanker, contact Agent.
SEAMAN'S CLUBS: No local clubs. Agents can arrange social activities and tours.
CURRENCY: No restrictions. Exchange rates available in all local banks.
DELAYS: Minimal delays in berthing, loading and discharging.
AUTHORITY: Forth Ports PLC, Leith Port Office, 1 Prince of Wales Dock, Edinburgh EH6 7DX. *Tel:* (0131) 5544343. *Telex:* 72192. *FAX:* (0131) 5551212. *Contact:* Captain H. MacLellan, Harbour Master – Leith & Granton. A. Burns, Port Manager.

LERWICK: 60.09 N. 01.08 W. (See Plan)

PORT LIMITS: All waters contained within the following boundaries including Dales Voe and Aith Voe.

Straight line drawn from the N.E. extremity of Hawks Ness (Lat. 60° 13' 27" N., Long. 1° 10' 00" W. approx.) in an East Southeasterly direction to the N.E. extremity of Green Holm and thence in a Southeasterly direction to the N.E. extremity of Score Head in the island of Bressay. Thence in a Westerly and Southerly direction along the HW mark of all foreshores to Bard Head thence in a direction 259°(T) to Skeo. Thence along high water mark of all foreshores in a generally Northerly direction to Hawks Ness.
BUOYAGE: Buoyage in Lerwick Harbour is IALA System "A".
DOCUMENTS: See "London".
PILOTAGE: *Pilot Office:* Pilot Office and Harbour Master's Office located at Albert Building on the Esplanade. Licenced Pilots always available on 24 hour service subject to following correct procedure given below.
Call Sign: Lerwick Harbour Radio.
Frequencies: Calling: VHF Channel 16. Working: VHF Channel 12. Pilot Cutter: VHF Channels 6, 11, 12 and 16.
Port Control: Fitted with VHF Channels 11, 12 and 16. Continuous watch is maintained 24 hours per day, 7 days per week on Channel 16 except when working vessels on Channel 12.
Procedure: The Port Control Office controls the movement of all vessels arriving or departing by either entrance and all movement within the harbour from public or private quays or supply bases, whether such vessels are under the control of Pilots or not.

(a) Vessels requiring pilotage should arrange with Agent not less than 24 hours before arrival. Vessels without Agent should contact Lerwick Harbour Master through Coast Radio Stations not less than 24 hours before arrival. Vessels leaving ports less than 24 hours steaming away should advise time of sailing, projected speed and ETA at time of leaving last Port. Vessels inward from Continental Shelf should advise time of leaving location, projected speed and ETA at time of leaving last location. Amended ETAs should be advised 2 hours before the time given in the last transmitted ETA. VHF contact should be made with Lerwick Harbour Radio while still 1 hour away when final pilotage and berthing arrangements will be made. Port control cannot guarantee a Pilot on station unless 1 hour's notice is given.

(b) ETA messages should also contain information on which harbour entrance is to be used, draft and length overall. Vessels entering by the South entrance will be boarded West of Kirkabister Lighthouse or near Knab Point if weather conditions are unsuitable. Vessels entering by the North entrance will be boarded abeam of the Green Holm and 0.5 miles N.E. of Beosetter Holm. If boarding conditions in this area are unsuitable the South entrance must be used.

(c) "Knab", 18.6 m. black hull, white upperworks. Pilot boat and tug, can be used for towing, bollard pull 8 tons.

(d) Outward vessels should call the Port Control 1 hour before departure when information on traffic movement will be given and arrangements for pilotage will be made. When moving within the harbour all vessels should maintain a continuous listening watch on Channel 16. All vessels moving within the harbour should report to the Port Control immediately prior to leaving the berth or anchorage, whether a Pilot is on board or not.

(e) Pilotage compulsory for oil tankers over 1,600 g.r.t. and for all vessels over 3,000 g.r.t. in the Inner Harbour defined by; in the North, a straight line between Rova Head and the Ness of Beosetter, and in the South, a straight line between the Knab and Taing of Ham.

(f) Telephone number of Lerwick Harbour Master and Pilot Station is Lerwick (01595) 692991.
ANCHORAGE: Ample anchorages in harbour roads.
Inner South Harbour depth up to 60 ft.
Breiwick Bay (Inner South Harbour) depth up to 90 ft.
MAX. SIZE: Vessels up to 9.0 m. draft and 169 m. long alongside berth as routine. Vessels of greater length and for draft may be accommodated alongside after discussion with Harbour Master. Anchorages available for any size of vessel subject to prior consultation with Harbour Master, if above 10,000 g.r.t.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO/VHF: Nearest Coast Radio Station "Shetland Radio" Freque and other details as for "Wick Radio" except for VHF working Chan which is Channel 27.
"Lerwick Harbour Radio" see "Pilotage".
TUGS: A tug "Kebister" of 24 tons bollard pull is available. The p cutter will also give towage assistance.
BERTHING: Berths are available for the handling of most carg including Roll-on/Roll-off and arrangement should be made thro Agents well in advance of arrival. No berths available for handling li chemicals. Mobile cranes available from Harbour Authority up to 50 t capacity or through private operators to 110 tons capacity.

	Length of Quay (ft.)	*Depth* (ft.)
South Harbour	3,000	10 – 35
Shell & B.P. Bases, Holmsgarth	1,000	15 – 25
Holmsgarth, 5 berths, including 2 Ro-Ro	3,000	18 – 35
O.I.L. (Shetland) Ltd.	2,656	18 – 24
Dales Voe Rig Repair Base	164	41

STEVEDORES: Arranged through Agent.
MEDICAL: Medical aid can be arranged through Agent or Coastgu at any time day or night.
TANKERS: BP Oil have their own discharging berth. Tankers are a able to discharge at various offshore oil industry supply berths Power Station supplied from Holmsgarth No. 1.
DENSITY: Density 1025 at all states of tide.
FRESH WATER: Available at most berths, 65 t.p.h. to 100 t No water boat.
FUEL: Gas oil available on demand.
FIRE PRECAUTIONS: No-smoking regulations in operation inside transit sheds. Usual tanker terminal regulations in operation. Hand of explosives covered by local Bye-Law.
CONSULS:

SEAMAN'S CLUBS: Missions to Seamen, Southern Regional Headquarters. Tel: Littlehampton 726969.
AUTHORITY: Littlehampton Harbour Board, Harbour Office, Pier Road, Littlehampton, West Sussex BN17 5LR. *Tel:* (01903) 721215. *FAX:* (01903) 721215. *Contact:* P.R. Naish, Harbour Master.

LIVERPOOL: 53.28 N. 03.02 W. (See Plan)

DOCUMENTS: Required on arrival, Crew List Form I.B.6 to be completed; this list to include all passengers and any British subjects who joined vessel outside of U.K. If any person falling into this category should be on board they must not leave until permission to land is granted by Immigration Officer.

Customs Form C.142, Declaration of goods obtained abroad or during a voyage, must be completed and signed by Master, and each crew member. Health Declaration must be completed. Above forms should be obtained from Pilot.

Manifest and Bills of Lading should be forwarded to vessel's Agent so as to be available before vessels arrival.

Ship's Papers Required:
Ship's Register.
Certificate for British Tonnage (if issued).
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
International Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Pilotage is compulsory for all vessels navigating within the Port of Liverpool (as defined in the M.D. & H.C. Act 1971). The M.D. & H.C. is also empowered to act on behalf of Garston Docks for Pilotage Directions. The following vessels shall be exempt from Compulsory Pilotage:

1. Any vessels belonging to Her Majesty.
2. Any vessel which is under 82 m. LOA, provided that this exemption shall not apply to any such vessel which is:-
   (a) Carrying hazardous cargoes.
   (b) The navigation of which is, in the opinion of the company, affected by a defect in or damage to the vessel or her equipment, or inadequacy of the Master or crew.
   (c) Navigating solely to adjust her compasses within the Port limits.

Attention is drawn to the General Directions for Navigation in the Port of Liverpool No. 4, the Pilotage Directions 4:1 and the Mersey Channel Collision Rules.

Boarding Position: The normal boarding position will be in the vicinity of the Bar Buoy, but vessels may, by arrangement, board their Pilots at Point Lynas. Both stations are served by launches controlled from "Port Operations Control" in Liverpool. The Control Centre operates on VHF Channel 11 (and 9, 12 or 16) with the call sign 'Liverpool Pilot'. The Pilot launches will show the appropriate Pilot Flag or Lights and will have the words "Liverpool Pilot" painted on the superstructure.

Inward Bound Vessels: Vessels requiring a Pilot must give not less than 24 hours notice before the expected time of arrival of the relevant vessel at the Pilot Station at which the Pilot is to be boarded; via Agents, via G.P.O. Coast Stations to the Liverpool Pilotage Control Centre, or via telex to 626264 P.T.O.P.S. Liverpool and ETA's must be kept up-dated. Penalty charges are made for non-compliance with the ETA Regulations (Reference Pilotage Directions No. 7).

Outward Bound Vessels: Vessels requiring a Pilot must give not less than 3 hours notice before the expected time of departure of the relevant vessel to the Port Operations Control Centre, between the hours of 0800 hrs. to 1630 hrs. on weekdays and 0800 hrs. to 1000 hrs. on Saturdays, Sundays and Bank Holidays.

ANCHORAGE: In the event of berths not being readily available for vessels, normally they must wait at the Mersey Bar Anchorage which is in the open roadstead. There are river anchorages, but these are only usually for vessels about to enter the dock system.

RESTRICTIONS: No restrictions on night entry, except VLCCs, tidal restrictions depend on vessel's draft and to which berth vessel proceeding, larger vessels usually have to wait for HW.

MAX. SIZE: Tranmere: up to 41 ft. (12.5 m.) draft dependent on tide. Birkenhead: Up to 28 ft. 6 in. (8.68 m.) draft.
Liverpool Docks: Up to 42 ft. (12.8 m.) draft.
Royal Seaforth Dock: 42 ft. (12.8 m.) of water depth, up to 75,000 d.w.t.

HEALTH: Maritime Declaration of Health Form must be completed and handed to Customs Officer or Port Health Officer, whoever first boards ship. This form is obtainable from Pilot. In event of any suspected disease or fever on board, or if ship has called during last 4 weeks at any port in Brazil, China, Indo-China, India, Pakistan, Myanmar (Burma), Colombia and the port of Dar-es-Salaam, West African ports between Lat. 20° North and 20° South, the Master should, prior to entering port, make radio contact with Liverpool Port Health Authority, via Portishead Radio or Port Radar Station (Signal "Portelth Liverpool") giving them following information:

1. Name of Ship. 2. Date of departure from and name of last infected port. 3. Number, ages and sex of any cases of infectious diseases or other relevant information. 4. Expected time of arrival at Rock Light.

Before reaching the Rock Light, if medical clearance has not been obtained, the following signal must be displayed: By day – fly the flag signal "Z W". By night – show red light over white light.

When medical clearance is obtained Pratique will be issued at discretion of Customs Officer.

If there is no suspected disease on board and vessel has not called at any of the above ports listed, Master can radio for Free Pratique. Unless otherwise instructed, Customs Officer will again issue Pratique.

Vessels arriving from another U.K. port do not require Pratique or health clearance.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio, call sign: GKL; Landsend Radio, call sign: GDL; Wick Radio, call sign: GKR; but on approaching Liverpool, the local radio station is Anglesey Radio, call sign: GLV.

RADAR/VHF: VTS operational. Vessels should establish contact by VHF with the Port Operations Control, call sign "Mersey Radio", before sailing and inward bound when within VHF range and not later than when in the vicinity of the Bar Lighted Buoy.

Harbour Radar: The radar coverage extends seaward over Liverpool Bay for a radius of 20 miles from the station and in the River Mersey as far South as the approaches to the Manchester Ship Canal.

Vessels entering or leaving the Port in conditions of low visibility can, on request, be supplied with continuous information of their position whilst navigating in the river or sea channels.

A general situation and movement statement, giving all intended movements inwards and outwards for the Port of Liverpool, Eastham, Garston and Cammell Lairds and approximate times at the dock entrance or river berth, together with a list of Local Navigation warnings in force, latest weather reports and area forecast, is broadcast on Channel 9 at 3 hours before each HW. This full statement is repeated with any amendments and the disposition of the River Anchorages North and South at 2 hours before each HW.

Any local navigation warning, gale warnings and amendments to gale warnings are broadcast on receipt on Channel 12.

A full list of navigation warnings and gale warnings is broadcast on Channel 9 every 4 hours, commencing at 0001 hrs. No separate broadcast of this list is made during the period from 4 hours before HW to 1 hour before HW as such warnings are included in the General Situation and Movement Statement.

Docking Instructions: The VHF Stations at the Dock Entrances and Stages are provided to facilitate docking and berthing operations and to provide direct communication between the Dock Master or Stage Master and a vessel. The Range of these stations is limited to a distance of 6 miles to 8 miles.

Tug Communications: Channels 8 and 10 are reserved for tug communications and should not be used for any other purpose. Due to the heavy working of these Channels, especially at tide time, and in order to minimise interference, vessels and their tugs when communicating to one another on VHF, should, when possible transmit on reduced power.

Large Vessels Swinging: Vessels of 150 m. or over in length intending to swing in the river should give advance notice of at least 10 minutes to Mersey Radio of their intentions so that Mersey Radio can broadcast on Channel 12 a swinging warning to all ships.

Port VHF Radio Telephone Communications System:

Station	*Call Sign*	*Hague Channel Number*	*Remarks*
Liverpool Port Operations Control	Mersey Radio	16	Calling and safety
		12	Port Operations – Calling and navigation.
		9	Port Operations and routine broadcasts
		18	Port Operations and Radar information
		19	Radar information and general, for tanker traffic for Tranmere only.

A continuous watch is kept on Channels 16 & 12 at Port Radar Station

GARBAGE: Local ship's Agents order skips as required from local disposal companies. Small amounts of garbage can be arranged through the port.
WASTE OIL DISPOSAL: Collection by road tanker, contact Agent.
SEAMAN'S CLUBS: No local clubs. Agents can arrange social activities and tours.
CURRENCY: No restrictions. Exchange rates available in all local banks.
DELAYS: Minimal delays in berthing, loading and discharging.
AUTHORITY: Forth Ports PLC, Leith Port Office, 1 Prince of Wales Dock, Edinburgh EH6 7DX. *Tel:* (0131) 5544343. *Telex:* 72192. *FAX:* (0131) 5551212. *Contact:* Captain H. MacLellan, Harbour Master – Leith & Granton. A. Burns, Port Manager.

LERWICK: 60.09 N. 01.08 W. (See Plan)

PORT LIMITS: All waters contained within the following boundaries including Dales Voe and Aith Voe.

Straight line drawn from the N.E. extremity of Hawks Ness (Lat. 60° 13' 27" N., Long. 1° 10' 00" W. approx.) in an East Southeasterly direction to the N.E. extremity of Green Holm and thence in a Southeasterly direction to the N.E. extremity of Score Head in the island of Bressay. Thence in a Westerly and Southerly direction along the HW mark of all foreshores to Bard Head thence in a direction 259°(T) to Skeo. Thence along high water mark of all foreshores in a generally Northerly direction to Hawks Ness.
BUOYAGE: Buoyage in Lerwick Harbour is IALA System "A".
DOCUMENTS: See "London".
PILOTAGE: *Pilot Office:* Pilot Office and Harbour Master's Office located at Albert Building on the Esplanade. Licenced Pilots always available on 24 hour service subject to following correct procedure given below.
Call Sign: Lerwick Harbour Radio.
Frequencies: Calling: VHF Channel 16. Working: VHF Channel 12. Pilot Cutter: VHF Channels 6, 11, 12 and 16.
Port Control: Fitted with VHF Channels 11, 12 and 16. Continuous watch is maintained 24 hours per day, 7 days per week on Channel 16 except when working vessels on Channel 12.
Procedure: The Port Control Office controls the movement of all vessels arriving or departing by either entrance and all movement within the harbour from public or private quays or supply bases, whether such vessels are under the control of Pilots or not.

(a) Vessels requiring pilotage should arrange with Agent not less than 24 hours before arrival. Vessels without Agent should contact Lerwick Harbour Master through Coast Radio Stations not less than 24 hours before arrival. Vessels leaving ports less than 24 hours steaming away should advise time of sailing, projected speed and ETA at time of leaving last Port. Vessels inward from Continental Shelf should advise time of leaving location, projected speed and ETA at time of leaving last location. Amended ETAs should be advised 2 hours before the time given in the last transmitted ETA. VHF contact should be made with Lerwick Harbour Radio while still 1 hour away when final pilotage and berthing arrangements will be made. Port control cannot guarantee a Pilot on station unless 1 hour's notice is given.

(b) ETA messages should also contain information on which harbour entrance is to be used, draft and length overall. Vessels entering by the South entrance will be boarded West of Kirkabister Lighthouse or near Knab Point if weather conditions are unsuitable. Vessels entering by the North entrance will be boarded abeam of the Green Holm and 0.5 miles N.E. of Beosetter Holm. If boarding conditions in this area are unsuitable the South entrance must be used.

(c) "Knab", 18.6 m. black hull, white upperworks. Pilot boat and tug, can be used for towing, bollard pull 8 tons.

(d) Outward vessels should call the Port Control 1 hour before departure when information on traffic movement will be given and arrangements for pilotage will be made. When moving within the harbour all vessels should maintain a continuous listening watch on Channel 16. All vessels moving within the harbour should report to the Port Control immediately prior to leaving the berth or anchorage, whether a Pilot is on board or not.

(e) Pilotage compulsory for oil tankers over 1,600 g.r.t. and for all vessels over 3,000 g.r.t. in the Inner Harbour defined by; in the North, a straight line between Rova Head and the Ness of Beosetter, and in the South, a straight line between the Knab and Taing of Ham.

(f) Telephone number of Lerwick Harbour Master and Pilot Station is Lerwick (01595) 692991.
ANCHORAGE: Ample anchorages in harbour roads.
Inner South Harbour depth up to 60 ft.
Breiwick Bay (Inner South Harbour) depth up to 90 ft.
MAX. SIZE: Vessels up to 9.0 m. draft and 169 m. long alongside berth as routine. Vessels of greater length and for draft may be accommodated alongside after discussion with Harbour Master. Anchorages available for any size of vessel subject to prior consultation with Harbour Master, if above 10,000 g.r.t.

HEALTH: See "Health – All Ports" before first U.K. port.
RADIO/VHF: Nearest Coast Radio Station "Shetland Radio" Freque and other details as for "Wick Radio" except for VHF working Cha which is Channel 27.
"Lerwick Harbour Radio" see "Pilotage".
TUGS: A tug "Kebister" of 24 tons bollard pull is available. The cutter will also give towage assistance.
BERTHING: Berths are available for the handling of most carg including Roll-on/Roll-off and arrangement should be made thro Agents well in advance of arrival. No berths available for handling li chemicals. Mobile cranes available from Harbour Authority up to 50 t capacity or through private operators to 110 tons capacity.

	Length of Quay (ft.)	*Depth* (ft.)
South Harbour	3,000	10 – 35
Shell & B.P. Bases, Holmsgarth	1,000	15 – 25
Holmsgarth, 5 berths, including 2 Ro-Ro	3,000	18 – 35
O.I.L. (Shetland) Ltd.	2,656	18 – 24
Dales Voe Rig Repair Base	164	41

STEVEDORES: Arranged through Agent.
MEDICAL: Medical aid can be arranged through Agent or Coastgu at any time day or night.
TANKERS: BP Oil have their own discharging berth. Tankers are a able to discharge at various offshore oil industry supply berths Power Station supplied from Holmsgarth No. 1.
DENSITY: Density 1025 at all states of tide.
FRESH WATER: Available at most berths, 65 t.p.h. to 100 t No water boat.
FUEL: Gas oil available on demand.
FIRE PRECAUTIONS: No-smoking regulations in operation inside transit sheds. Usual tanker terminal regulations in operation. Hand of explosives covered by local Bye-Law.
CONSULS:

LITTLEHAMPTON: 50.48 N. 00.33 W. (See Plan)

PORT LIMITS: Harbour limits at end of West Pier.
Pilotage limits 3 miles offshore.
DOCUMENTS: Standard U.K. documentation (EEC ruling would apply).
PILOTAGE: Compulsory for all vessels over 50 G.T. Pilots cruise for vessels giving ETA's. Listening watch on VHF Channels 16 and 71 (Port Operations).
ANCHORAGES: 2 nautical miles South of harbour. Sheltered anchorage in Solent.
MAX. SIZE: 70 m. LOA, 15.0 m. beam and 4.5 m. draft.
HEALTH: Port Health. Tel: (01903) 716133.
RADIO: Niton Radio.
VHF: For Port Operations, footbridge and pilotage, call Littlehampton Harbour on Channel 71.
TUGS: None available.
BERTHING: UMA Wharf: 80 m. length. Drying berth. Shore crane discharge.
Railway Wharf: 80 m. length. Drying berth. Electric crane discharge.
CRANES: 3 tonne Stothert and Pitt travelling crane.
BRIDGES: Retractable bridge organised by Pilots.
STEVEDORES: Available through Agent.
MEDICAL: Worthing Hospital.
TANKERS: No facilities.
DENSITY: Variable.
FRESH WATER: Available.
FUEL: By road tanker.
OPENING/CLOSING HATCHES: By crew.
AIRPORT: Gatwick Airport, 35 miles.
POLICE/AMBULANCE/FIRE: Police, Tel: (01903) 716161.
EMERGENCY CO-ORDINATION CENTRE: Lee-on-Solent Coastguard, Tel: (01705) 552100. Littlehampton Coastguard, Tel: (01903) 715512.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: By skip.
WASTE OIL DISPOSAL: By arrangement.
SEAMAN'S CLUBS: Missions to Seamen, Southern Regional Headquarters. Tel: Littlehampton 726969.
AUTHORITY: Littlehampton Harbour Board, Harbour Office, Pier Road, Littlehampton, West Sussex BN17 5LR. *Tel:* (01903) 721215. *FAX:* (01903) 721215. *Contact:* P.R. Naish, Harbour Master.

LIVERPOOL: 53.28 N. 03.02 W. (See Plan)

DOCUMENTS: Required on arrival, Crew List Form I.B.6 to be completed; this list to include all passengers and any British subjects who joined vessel outside of U.K. If any person falling into this category should be on board they must not leave until permission to land is granted by Immigration Officer.

Customs Form C.142, Declaration of goods obtained abroad or during a voyage, must be completed and signed by Master, and each crew member. Health Declaration must be completed. Above forms should be obtained from Pilot.

Manifest and Bills of Lading should be forwarded to vessel's Agent so as to be available before vessels arrival.

Ship's Papers Required:
Ship's Register.
Certificate for British Tonnage (if issued).
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
International Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Pilotage is compulsory for all vessels navigating within the Port of Liverpool (as defined in the M.D. & H.C. Act 1971). The M.D. & H.C. is also empowered to act on behalf of Garston Docks for Pilotage Directions. The following vessels shall be exempt from Compulsory Pilotage:

1. Any vessels belonging to Her Majesty.
2. Any vessel which is under 82 m. LOA, provided that this exemption shall not apply to any such vessel which is:-
   (a) Carrying hazardous cargoes.
   (b) The navigation of which is, in the opinion of the company, affected by a defect in or damage to the vessel or her equipment, or inadequacy of the Master or crew.
   (c) Navigating solely to adjust her compasses within the Port limits.

Attention is drawn to the General Directions for Navigation in the Port of Liverpool No. 4, the Pilotage Directions 4:1 and the Mersey Channel Collision Rules.

Boarding Position: The normal boarding position will be in the vicinity of the Bar Buoy, but vessels may, by arrangement, board their Pilots at Point Lynas. Both stations are served by launches controlled from "Port Operations Control" in Liverpool. The Control Centre operates on VHF Channel 11 (and 9, 12 or 16) with the call sign 'Liverpool Pilot'. The Pilot launches will show the appropriate Pilot Flag or Lights and will have the words "Liverpool Pilot" painted on the superstructure.

Inward Bound Vessels: Vessels requiring a Pilot must give not less than 24 hours notice before the expected time of arrival of the relevant vessel at the Pilot Station at which the Pilot is to be boarded; via Agents, via G.P.O. Coast Stations to the Liverpool Pilotage Control Centre, or via telex to 626264 P.T.O.P.S. Liverpool and ETA's must be kept up-dated. Penalty charges are made for non-compliance with the ETA Regulations (Reference Pilotage Directions No. 7).

Outward Bound Vessels: Vessels requiring a Pilot must give not less than 3 hours notice before the expected time of departure of the relevant vessel to the Port Operations Control Centre, between the hours of 0800 hrs. to 1630 hrs. on weekdays and 0800 hrs. to 1000 hrs. on Saturdays, Sundays and Bank Holidays.

ANCHORAGE: In the event of berths not being readily available for vessels, normally they must wait at the Mersey Bar Anchorage which is in the open roadstead. There are river anchorages, but these are only usually for vessels about to enter the dock system.

RESTRICTIONS: No restrictions on night entry, except VLCCs, tidal restrictions depend on vessel's draft and to which berth vessel proceeding, larger vessels usually have to wait for HW.

MAX. SIZE: Tranmere: up to 41 ft. (12.5 m.) draft dependent on tide. Birkenhead: Up to 28 ft. 6 in. (8.68 m.) draft.
Liverpool Docks: Up to 42 ft. (12.8 m.) draft.
Royal Seaforth Dock: 42 ft. (12.8 m.) of water depth, up to 75,000 d.w.t.

HEALTH: Maritime Declaration of Health Form must be completed and handed to Customs Officer or Port Health Officer, whoever first boards ship. This form is obtainable from Pilot. In event of any suspected disease or fever on board, or if ship has called during last 4 weeks at any port in Brazil, China, Indo-China, India, Pakistan, Myanmar (Burma), Colombia and the port of Dar-es-Salaam, West African ports between Lat. 20° North and 20° South, the Master should, prior to entering port, make radio contact with Liverpool Port Health Authority, via Portishead Radio or Port Radar Station (Signal "Portelth Liverpool") giving them following information:

1. Name of Ship. 2. Date of departure from and name of last infected port. 3. Number, ages and sex of any cases of infectious diseases or other relevant information. 4. Expected time of arrival at Rock Light.

Before reaching the Rock Light, if medical clearance has not been obtained, the following signal must be displayed: By day – fly the flag signal "Z W". By night – show red light over white light.

When medical clearance is obtained Pratique will be issued at discretion of Customs Officer.

If there is no suspected disease on board and vessel has not called at any of the above ports listed, Master can radio for Free Pratique. Unless otherwise instructed, Customs Officer will again issue Pratique.

Vessels arriving from another U.K. port do not require Pratique or health clearance.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio, call sign: GKL; Landsend Radio, call sign: GDL; Wick Radio, call sign: GKR; but on approaching Liverpool, the local radio station is Anglesey Radio, call sign: GLV.

RADAR/VHF: VTS operational. Vessels should establish contact by VHF with the Port Operations Control, call sign "Mersey Radio", before sailing and inward bound when within VHF range and not later than when in the vicinity of the Bar Lighted Buoy.

Harbour Radar: The radar coverage extends seaward over Liverpool Bay for a radius of 20 miles from the station and in the River Mersey as far South as the approaches to the Manchester Ship Canal.

Vessels entering or leaving the Port in conditions of low visibility can, on request, be supplied with continuous information of their position whilst navigating in the river or sea channels.

A general situation and movement statement, giving all intended movements inwards and outwards for the Port of Liverpool, Eastham, Garston and Cammell Lairds and approximate times at the dock entrance or river berth, together with a list of Local Navigation warnings in force, latest weather reports and area forecast, is broadcast on Channel 9 at 3 hours before each HW. This full statement is repeated with any amendments and the disposition of the River Anchorages North and South at 2 hours before each HW.

Any local navigation warning, gale warnings and amendments to gale warnings are broadcast on receipt on Channel 12.

A full list of navigation warnings and gale warnings is broadcast on Channel 9 every 4 hours, commencing at 0001 hrs. No separate broadcast of this list is made during the period from 4 hours before HW to 1 hour before HW as such warnings are included in the General Situation and Movement Statement.

Docking Instructions: The VHF Stations at the Dock Entrances and Stages are provided to facilitate docking and berthing operations and to provide direct communication between the Dock Master or Stage Master and a vessel. The Range of these stations is limited to a distance of 6 miles to 8 miles.

Tug Communications: Channels 8 and 10 are reserved for tug communications and should not be used for any other purpose. Due to the heavy working of these Channels, especially at tide time, and in order to minimise interference, vessels and their tugs when communicating to one another on VHF, should, when possible transmit on reduced power.

Large Vessels Swinging: Vessels of 150 m. or over in length intending to swing in the river should give advance notice of at least 10 minutes to Mersey Radio of their intentions so that Mersey Radio can broadcast on Channel 12 a swinging warning to all ships.

Port VHF Radio Telephone Communications System:

Station	*Call Sign*	*Hague Channel Number*	*Remarks*
Liverpool Port Operations Control	Mersey Radio	16	Calling and safety
		12	Port Operations – Calling and navigation.
		9	Port Operations and routine broadcasts
		18	Port Operations and Radar information
		19	Radar information and general, for tanker traffic for Tranmere only.

A continuous watch is kept on Channels 16 & 12 at Port Radar Station

Point Lynas Shore Station	Lynas Pilot	16 9	Calling and safety Ship to shore.
Liverpool Control Centre	Liverpool Pilot	16 12 11	Initial calling Initial calling Calling & ship to shore

Local Priority Messages: A vessel which has an urgent message to transmit to Mersey Radio concerning urgent navigation matters and which message should receive priority over normal Port Operations R/T Communications, should indicate the urgency of the message by prefixing the call sign of the Port Operations Control with the spoken word "PRIORITY" i.e. "PRIORITY MERSEY RADIO" repeated 3 times followed by normal procedure.

In special circumstances such as the launch of a vessel or in an emergency such as a wreck, it may be necessary temporarily to establish a patrol for the control of traffic. Vessels will be warned of the existence of any such patrol by "Mersey Radio" and any such patrol vessels or launches will maintain a listening watch on Channel 12 and communicate with other vessels on Channel 6.

VHF Procedure

Channels to be used for Calling and for Preparatory Signals: Mersey Radio and ship stations will call on Channel 12. Channel 16 should only be used for distress, urgency or safety communications.

Channels for Reply: Calls received on Channel 12 should be replied to on the same Channel, but if calls are received on Channel 16, replies should be made on this Channel.

Indication of the Channel to be used for VHF Traffic: When communication has been established on Channel 12 between a ship and "Mersey Radio", the shore station will indicate the Channel to be used for passing and receiving information if Channel 12 is busy.

Times: All times in messages should be given in local time, i.e. BST or GMT, using the 24 hour notation.

VHF Discipline: To ensure that the full advantage of efficient communication is achieved, strict VHF discipline and attention to procedure, particularly on the calling Channel is imperative. Channel 16 must only be used for establishing contact between ship and shore or ship and ship, and must not be used for the passing of messages except in cases of distress within Port limits. Channel 12 should be used for establishing contact between ship and shore or ship and ship.

Sequence of VHF Communication for Vessels Entering the River Mersey: (i) Vessels wishing to communicate with the Liverpool Pilotage District Point Lynas Shore Station should call "Lynas Pilot" on Channel 9. Channel 16 shall only be used in case of difficulty in establishing initial contact.

(ii) Vessels wishing to communicate with the Liverpool Pilotage Control Centre should call "Liverpool Pilot" on Channel 11. Channels 16 and 12 should only be used in cases of difficulty in establishing initial contact.

(iii) When within VHF range and not later than when in the vicinity of the Bar Lighted Buoy the vessel should establish contact with Mersey Radio on Channel 12 and pass her arrival information on Channel 12 or other Channel indicated by Mersey Radio, watch should be kept on Channel 12 unless instructed to remain on another working Channel for Port Operational reasons. A vessel at anchor at the Bar anchorage should keep watch on Channels 16 and 12.

(iv) Vessels requiring radar information or assistance will be requested to shift to Channel 18.

(v) Vessels should inform Mersey Radio when they are ceasing to keep a listening watch on Channel 12. If they are shifting to a tug or a dock entrance or Tranmere Oil Stage Channel they should inform Mersey Radio of such intention.

Vessels Sailing from the River Mersey: Vessels, on sailing from any Stage or Dock, should establish contact with Mersey Radio on Channel 12 and then maintain watch on that Channel unless instructed to remain on another working Channel for Port Operational reasons. Vessels requiring radar information or assistance will be requested to work on Channel 18.

TUGS: Join vessel after passing Rock Light. Normally use tug's lines but optional. Charge for tug's hawsers.

BERTHING: 35 general cargo berths.

BULK CARGO FACILITIES: *Grain Berths:* Royal Seaforth Grain Terminal accommodates ships of up to 75,000 d.w.t. up to 260 m. overall length and 12.8 m. draft. Discharge is by 2 marine towers at up to 2,000 tonnes p.h. into 133,000 tonnes capacity silo. 2×750 tonnes per hour dischargers (Buhler) for animal feedstuffs at Berth S.2, storage capacity 30,000 tonnes. 1 × 220 tonnes per hour Vigan pneumatic discharger for heavy grains and animal feedstuffs ex-small vessels up to 4,000 d.w.t.

Grab Cargoes: (Minerals, ores, coal, meals, etc.).

S.1 Canada Dock: Equipped with mobile crane (10 m. reach) with grab.

S.E.2 Alexandra Dock: Vessels up to 8.84 m. draft, equipped with 3 grabbing cranes for handling animal feeding stuffs; discharge to road via hoppers and direct by conveyor to silo storage.

Cavendish Quay: 2 × 20 tonnes level luffing jib cranes with a grab capacity of 15 tonnes. Each designed to handle up to 450 t.p.h. Load to road or rail with 2 × 100 tonnes capacity mobile weigh hoppers.

Duke St. Wharf: Vessels up to 8.7 m. draft discharged 2 × 7.5 tonnes electric level luffing cranes.

S.2 Gladstone Dock: Bulk terminal with length 250 m. a depth 12.5 m. The terminal handles Panamax (75,000 tonnes) vess with 4 grab cranes. Daily rate 14,000 tons.

BULK LIQUID FACILITIES: *Tranmere:* Petroleum oils at Tranm South Stage, accommodating tankers up to 115,000 tons displacem max. draft 11.1 m. plus height of tide and Tranmere North St accommodating tankers after lightening up to 210,000 t displacement, max. draft 12.0 m. plus height of tide. Facilities opera by Shell U.K. Ltd.

Cautionary Advice: Vessels which are required to pump over the t must discharge so as to reach, 30 minutes before LW, a draft not grea than 41 ft. plus height of LW at the North stage, or 38 ft. plus heigh LW at the South stage. (These figures may vary slightly from tim time and should be checked with the Berthing Master).

Liverpool: N.2 Gladstone (edible oils berth, total quay length 175 12.8 m. draft).

S.1 Canada (edible oils and molasses, up to 213 m. len 9.75 m. draft).

S.E. Nelson (wines and spirits, for vessels up to 99.1 m. len 6 m. draft).

Birkenhead: N. Alfred (8.6 m. draft, edible oils).

Ilchester Wharf (8.6 m. draft).

E. Lewis (edible oils, bulk chemicals and molasses for vessels u 192 m. in length, 8.7 m. draft).

SPECIALISED CARGO HANDLING FACILITIES: *Containers:* T container terminal at Royal Seaforth Dock has a continuous q 1,100 m. in length, served by 6 gantry cranes up to 40 tons capa and a fleet of straddle carriers working to a 22 ha. container p supported by a 26 ha. back-up area. Tractor trailer units are used feed the integral Freightliner Rail Terminal, which links with di services through the channel tunnel.

Containers can also be handled at all general cargo berths.

Timber and Forest Products: At the Royal Seaforth Timber Termi 793 m. of continuous quay are served by 4 × 10 tonnes cra discharging packaged timber to a 26 ha. stacking and back-up ar 3 sheds provide covered storage of 16,000 sq.m. for plywood, pulp- dried timber.

Ro/Ro: There are 10 berths in the port with Ro/Ro ramp facili Royal Seaforth, S.3, S.6 and S.10; Gladstone No. 3. N.W. Alexan E. Langton, N.E. 3 Canada, S.E. Nelson, S.E. Trafalgar and S. Bids (Birkenhead).

Heavy and Indivisible Loads: Good road access and specialised faci include 3 berths strengthened to accept loads of up to 300, 400 1,000 tonnes respectively. 250 tonne capacity sea-going floating cra

STEVEDORES: Earliest possible ETA to be given to arrange gang

MEDICAL: If doctor is required to attend immediately on arrival of ves prior notice will be required, but generally doctor is arranged for m convenient time after vessel's arrival.

Hospitalisation is available, but seamen will only be admitte immediate treatment is required. It is preferred for foreign sea requiring hospital treatment to be repatriated, if able to travel.

Dentist available by appointment only.

TANKERS: See "Bulk Liquid Facilities".

DENSITY: River Mersey salt water. Docks approximately 1024.

FRESH WATER: Available at all berths, ex-quay. No water ba available. Rate of delivery 15-20 t.p.h.

FUEL: Most major oil companies are represented and can supply ra of fuels of various viscosities. Notice required depends on the ber which vessel is lying as bunkers are supplied ex-lighter at most be Notice required can vary depending on availability of barges. generally at least 3 to 4 days notice is required.

FIRE PRECAUTIONS: Tankers may not carry out repairs whil discharging berth unless permission is obtained from Har Authorities. Fire precautions notice is placed on board by Har Authorities.

CONSULS: The following countries have representatives in Liverp

Dominican Republic
Ecuador
El Salvador
Finland
France
Germany
Panama
Thailand

REPAIRS: All types of deck and engine repairs can be carried ou

DRY DOCKS: 5 small dry docks (M.D.H.C., Wright and Beyer Mannings Marine).

SURVEYORS: (1) Caleb Brett and other companies available.

(2) Lloyds, A.B.S. and B.V. are available.

GANGWAY/DECK WATCHMEN: Watchmen not necessary available if required.

OPENING/CLOSING HATCHES: Carried out by ship's crew fo cargoes and by stevedores for general cargoes.

CERTIFICATES:

Register/Certificate of Measurement.
Certificate of British Tonnage (if issued).
Safety Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Derat Certificate.
Cargo Gear Test Certificates.

CUSTOMS ALLOWANCES: Crew members who remain on during vessel's stay in port may be allowed, under certain condi keep, for their own use on board, small quantities of any tobacco and other goods declared on Customs Form C.142. The amount a depends on the number of days the vessel is in port.

CARGO GEAR: Cargo Gear Certificates must be produced w necessary up-to-date endorsement.

EPATRIATION: Can be effected, but must be arranged through Agent, o that Immigration Clearance can be arranged.

IRPORT: City Centre to Airport approximately 7 miles, regular service London for international connections.

egular Services from Liverpool Airport to:

Belfast	British Airways
Dublin	Ryan Air
Isle of Man	Manx Airlines
Jersey	British Midland

IME: British Standard Time, which is 1 hour in advance of Greenwich ean Time, reverting to GMT in Winter months.

OLIDAYS: Good Friday; Easter Monday (movable); 1st Monday in ay; last Monday in May; last Monday in August or first Monday in eptember, whichever may be closest to August 31st. December 25th-th and New Year's Day. Weekly holidays Saturday, Sunday. Cargo an be worked on official holidays, other than 25th-26th December, also rangements can be made for cargo to be worked on Sundays.

OLICE/AMBULANCE/FIRE: Telephone 999, ask for service required.

MERGENCY CO-ORDINATION CENTRE: "Liverpool Coast Guard" el: (0151) 9313341/43.

ELEPHONES: A temporary telephone can be placed on board a vessel, most berths, whilst in port.

ERVICES: Compass adjusting, D.F. calibration can be arranged.

ANKS: Allied Irish Bank Ltd, 5/9 Renshaw Street, Liverpool 1; Banco xterior C A, 6 Victoria Street, Liverpool 1; Bank of Ireland, 25 Victoria treet, Liverpool 1; *Citibank Trust Ltd, Tower Buildings, 22 Water Street, verpool 2; *American Express International, Travel Agents, Lord Street, verpool 2.

*Not Banks as such but possibly undertake closely allied functions.

TORING: See "Prelims".

1. All vessels can be stored by either barge or truck.
2. Barge storing at Tranmere Oil Stages is restricted to "Approved" arges.
3. Trucks do not always have direct access to vessels by driving along uayside. Approach may be via sheds.
4. Forklift trucks can be used in most cases.
5. As per British Customs Regulations.
6. Riggers can be employed.

HIP SUPPLY SERVICE: Howard Smith Towage, Castle Chambers, 3 Castle Street, Liverpool 2. Tel: (0151) 2272151.

Carmet Tug Co. Ltd., Lock Head, Bromborough, Wirral. Tel: (0151) 455579.

Cory Towing Co. Ltd., Odyssey Works, Corporation Road, Birkenhead, erseyside. Tel: (0151) 6476263.

In addition the Port of Liverpool has the Buoyage Tender and Salvage essel "Vigilant" which has fire fighting capability and is classed 100 A1 r River Mersey and Liverpool Bay Service.

HORE LEAVE: All bona fide crew members may be granted temporary hore leave during the vessel's stay in port, on condition that they leave the same ship. This permission does not apply to any alien member f the crew who is refused leave to land by an Immigration Officer, or whom an Immigration Officer has given notice prohibiting him from anding without leave.

DENTIFICATION CARDS: Not required.

ARBAGE DISPOSAL: Skips can be provided alongside. Bootle Barge td: (0151) 4422508. M.D.H.C. (Cleansing and Salvage Section) (0151) 005124.

VASTE OIL DISPOSAL: Not available.

EAMAN'S CLUBS: Stella Maris Seamans Club, Washington Parade, iverpool 20. Tel: (0151) 9226161.

URRENCY: Pound Sterling.

EVELOPMENTS: Floating crane "Mersey Mammouth" with capacity 50 tonnes operational.

UTHORITY: The Mersey Docks and Harbour Company, Maritime entre, Port of Liverpool, Liverpool L21 1LA. *Tel:* (0151) 9496000. *elex:* 626264. *FAX:* (0151) 9496150. *Contact:* Captain G. McShane, arine Operations Manager (Tel: (0151) 9496112 (Direct). Fax: (0151) 496150 (Direct)).

LIVERPOOL BAY (OSI): 53.41 N. 03.33 W. (See Plan)

LOCATION: The OSI (Oil Storage Installation) is situated North of the Douglas Production Platform in Liverpool Bay, in position Lat. 53° 41.0' N., Long. 03° 32.6' W.

The Liverpool Bay Oil Storage Installation: The Liverpool Bay Oil Storage Installation is a purpose-built Fixed Floating Oil Storage and Off-loading Installation, classified by Lloyd's Register as a Fixed Floating Installation. The OSI consists of an oil storage barge, permanently moored on location, by means of a CALRAM (Catenary Anchor Leg Rigid Arm Mooring).

Stabilised crude oil is transferred to the OSI by sub-sea pipeline from the Douglas processing platform.

The OSI has a storage capacity of 137,000 cu.m.

Crude oil is transferred, via a single 16 in. (40.64 cm.) double carcass floating hose string, to off-take tankers using 2 electrically driven single stage centrifugal pumps, rated at 2,250 cu.m./hr. each, giving an expected maximum loading rate of 4,500 cu.m./hr.

DOCUMENTS: *Documentation and U.K. Port Requirements:*

Pratique and Quarantine: There is no formal requirement to declare whether the ship is healthy and free of disease, unless this is not the case.

Customs and Immigration: H.M. Customs & Excise do not require any documentation. Tel: 0151-922-9661. Fax: 0151-922-7697 (Liverpool).

H.M. Immigration do not require any documentation. Tel: 01772-254212. Fax: 01772-204993 (Preston).

Should any crew changes occur (due to medical emergency), then H.M. Immigration will be advised of this, and an Immigration Officer will ensure the completion of the necessary documentation at the doctor, hospital, or airport.

PILOTAGE: Pilotage at the Terminal is compulsory, and any such service provided by the Terminal shall be strictly subject to Terminal Regulations & Terminal Conditions. The Terminal Mooring Master and his Mooring Assistant will board the off-take tanker approximately 2 miles N.E. of the OSI, and the Master is reminded of the IMO Rules for pilot ladders and the provision for safe access to and from the tanker, including the need for a good lee. In addition, the off-take tanker must have its port side derrick/crane rigged, and be ready in all respects to take on board the mooring equipment basket.

A responsible English speaking watchkeeping officer MUST be in attendance for the embarkation/disembarkation of all personnel.

APPROACHES: *Anchoring and Exclusion Zone:* Off-take tankers visiting the Terminal shall not anchor or manoeuvre in or near to the Exclusion Zones, which currently extend to a 800 m. radius, centred on the OSI. Masters of visiting off-take tankers may, at their discretion, use the recommended anchorage (See "Plan"). The Plan also gives all pipeline co-ordinates, and Masters of off-take tankers must not anchor in or near these areas.

Approaches to Terminal: The Terminal Mooring Master will advise the off-take tanker on arrival at the Terminal of any anchoring and/or berthing instructions. Anchoring and manoeuvring in, or close by, any of the Exclusion Zones is prohibited, see "Plan", where recommended anchorage areas are shown. The Master of off-take tanker arriving at the Terminal should bear in mind, that berthing at the Terminal may be delayed or refused, if the tanker's trim is excessive, or the draft is too light, or the propeller is not fully immersed.

Hazards to Navigation: Off-take tankers visiting the Terminal shall not manoeuvre within any of the Exclusion Zones, or their associated structures. Numerous sub-sea pipelines and equipment exist in close proximity to the installations listed below:

Douglas Platform	Lat. 53° 32' 17" N., Long. 03° 34' 32" W.
Lennox Platform	Lat. 53° 37' 56" N., Long. 03° 10' 30" W.
Hamilton Platform	Lat. 53° 34' 01" N., Long. 03° 27' 11" W.
Hamilton North Platform	Lat. 53° 38' 50" N., Long. 03° 28' 35" W.

For the positions of sub-sea pipelines, Masters of off-take tankers visiting the Terminal, should consult the relevant charts of the area and current Notices to Mariners.

Off-take tankers visiting the Terminal shall keep well clear of the above structures and manoeuvre with extreme caution whilst navigating in this area. Various off-shore support vessels work in, and near, the areas mentioned above and should be given a wide berth.

READINESS: *Notice of Readiness:* The off-take tanker upon arrival at the Terminal may tender its Notice of Readiness when the tanker is ready in all respects to load cargo in accordance with the Terminal Regulations and Conditions. The Terminal representative will only accept an off-take tanker's Notice of Readiness when he is satisfied that the tanker is ready, in all respects, for loading at the Terminal. This acceptance time will normally be hose connection time.

RESTRICTIONS: Berthing daylight only. Unberthing at any time.

Bow to centre manifold not to exceed 150 m.

MAX. SIZE: 150,000 d.w.t. (175,000 tonnes displacement).

Depth at mooring in excess of 30 m.

RADIO/VHF: *Pre-Arrival Information:* An off-take tanker intending to use the Terminal shall advise the BHP Petroleum Marine Superintendent and the Terminal OIM (Offshore Installation Manager) of their ETA and ship's particulars, initially at 72 hours prior to arrival, and then their ETA only at 48 hours and 24 hours respectively, by Telex or Fax, using the standard format message listed as follows:

AA	Ship's name, and previous name (if applicable).
BB	Off-take tanker's international call sign.
CC	Inmarsat I.D. No., Tel. No. and Fax No.
DD	Arrival draft.
EE	Maximum displacement.
FF	Distance from bow to manifold.
GG	Last port.
HH	Last cargo.
II	Master's full name.
JJ	Tanker's ETA at Terminal Anchorage (local time).
KK	Cargo quantity required: GSV bbls./cu.m.

Communications with the OSI: The OSI is equipped with all modern radio communications equipment, and a continuous watchkeeping routine is maintained. Contact with the OSI may be made using any of the following links:

Landline	Tel: (44) 1492511460. Fax: (44) 1492511461.
Inmarsat 'A' Voice/Telex	871-1453407 LBFD G.
VHF	Channel 15 (Calling), the working channel will be advised by the Terminal.
Marine Superintendent	Fax: (44) 1745881221.

The pre-arrival information telex should be addressed to th OIM of the OSI, Liverpool Bay, at least 72 hours before arrival at the Terminal.

A portable VHF set for use by the off-take tanker's Cargo Control Room will be loaned temporarily to facilitate communications with the OSI during the loading operation.

BERTHING: *Berthing Parameters:* The berthing of the off-take tanker will normally take place during the hours of daylight, but may, at the Terminal's discretion, take place at other times. In all cases, the decision to berth the off-take tanker will rest with the Terminal OIM in consultation with the Mooring Master (See "General – Local Conditions").

Standard of Off-Take Tankers: Accepted off-take tankers to the Terminal will be within the range of 60,000 d.w.t. to 150,000 d.w.t., and having a maximum displacement tonnage of 175,000 tonnes. Appendix 'A' (which see) is a sample of the Questionnaire to be completed by all off-take tankers visiting the Terminal. The off-take tanker's Operator is obliged to provide all the answers to the Questionnaire, and submit a current Forecastle Mooring Diagram (with appropriate measurements), before being nominated to visit the Terminal. It is imperative that if the particulars given in the answers to (a) the Questionnaire, or (b) the Forecastle Mooring Diagram, are deemed to be inaccurate, or change in any respect, BHP's Marine Superintendent and the OIM of the Terminal MUST be notified forthwith in writing, by letter, fax or telex.

Without prejudice to any other consequence of such inaccuracy or change, failure to so notify, and to provide all necessary details relating thereto, may cause serious delays at the Terminal.

Visiting off-take tankers shall be aware of the OCIMF publication "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings", and shall be fitted with the appropriate equipment in accordance with these recommendations, including a manifold derrick or crane with a 15 tonne SWL. The windlass, winches or capstans used to handle moorings, shall also be capable of lifting at least 15 tonnes.

The bow windlass or winch which will be used for mooring, shall be capable of picking up the mooring hawser and chafe chain, which will normally have a combined weight of not more than 3.2 tonnes. When assessing the capabilities of the windlass, or winch, allowance should be made for the loss of efficiency due to friction caused by the possible change of directional lead of the 'pick-up' line on the off-take tanker's forecastle between the bow Panama fairlead and the windlass or winch. The drum must have a good hauling lead from the Panama fairlead to the chain stopper, in order to retrieve smoothly the chafe chain and mooring hawser.

On the off-take tanker's arrival at the Terminal, the windlass, or winch, must have one drum empty, and be capable of accepting:

100 m. × 32 mm. pick-up messenger.
100 m. × 72 mm. pick-up rope.

Under no circumstances shall an open drum end be used to moor the tanker.

Given the particular requirements of the Terminal, the off-take tanker should ensure that their mooring arrangements and equipment are checked for suitability, and can comply in all respects with the Terminal requirements before finalisation of Charter arrangements and before arrival at the Terminal. Failure to comply in all respects with these requirements could result in serious delays at the Terminal. All and any costs so incurred will be strictly for the tanker Owner's account, as defined in the Terminal Conditions.

An off-take tanker visiting the Terminal shall comply with the latest SOLAS and MARPOL conventions and protocols. A tanker found to be sub-standard or deficient in any safety requirements, after initial vetting by the Terminal, will be refused entry to the Terminal.

An off-take tanker visiting the Terminal shall have the IGS (Inert Gas System) fully operational throughout the tanker's stay at the Terminal. The Terminal representative will check the condition of the Tanker's tanks on arrival at the Terminal, and monitor the condition of the tanks throughout the tanker's stay at the Terminal.

In the event of failure of the tanker's IGS, or any deviation in gas level readings from the SOLAS maximum permissible safe limits, during the tanker's stay at the Terminal, may result in cessation of operations, in which case the off-take tanker may be unmoored and directed to a safe anchorage position outside the Terminal limits.

The Owners and/or Operators of the off-take tanker, or any Charterer concerned therewith, shall be a party to TOVALOP, and be fully insured against liabilities under the International Convention of Civil Liabilities for Oil Pollution Damage 1969. The cargo to be loaded shall be covered by CRISTAL and/or the International Convention on the Establishment of International Fund for Compensation of Oil Pollution Damage 1971. Owners and/or Operators of the off-take tanker shall have in place a minimum of U.S.$700 million cover available through P&I Club Insurance for oil pollution liability.

An off-take tanker visiting the Terminal must be covered by a current ITF Certificate or the equivalent. Off-take tankers visiting the Terminal will be required to provide suitable meals and accommodation for all or any of the following personnel during the tanker's stay at the Terminal:

Mooring Master.
Mooring Assistant.
Cargo Surveyor.

Mooring/Unmooring Criteria: Also see "Berthing – Parameters" above.

The weather conditions prior to and during an off-take tanker's mooring operation will be closely monitored, and the OIM or his representative may, if the limiting criteria for mooring/unmooring is approached, decide to suspend mooring operations. In the event of deteriorating weather conditions during a mooring operation, the Mooring Master may abort the operation if he feels the safety of the Terminal may be compromised. A tanker which is moored to the OSI, whether loading or not, may be unmoored due to deteriorating conditions at any time. It is at the Mooring Master's discretion, in consultation with the OIM, to suspend operations at any time.

The theoretical maximum criteria for tankers mooring at the Terminal are:

Wave height: 3.5 m.
Wind speed: Less than 25 knots.
Time: Within + or − 1 hour of slack water, or during a change of tide or current direction.

The theoretical maximum criteria for tankers unmooring at the Terminal are:

Wave height: 3.75 m.
Wind speed: 30 knots.

Tension Limits: Off-take tankers will be unmoored if there are 3 occurrences of a peak mooring-hawser-tension greater than 150 tonnes force within one hour, or a single occurrence of a peak mooring-hawser-tension greater than 200 tonnes force.

Berthing and Mooring Operations: The berthing and mooring operation will be carried out by the Terminal Mooring Master and his Mooring Assistant.

A tug/support vessel will be on hand to assist with the berthing as when directed by the Mooring Master. The final decision to moor tanker will rest with the Mooring Master, depending on the exis circumstances and conditions.

The Mooring Master's Assistant will be stationed aft to direct tanker's crew to receive on board the tow line from the tug/support ves This tow line will be taken onboard during the off-take tanker's approach to the OSI, and in all cases only when the Mooring Maste satisfied it is safe to do so.

The responsibility to ensure there are sufficient crew to handle tow line will rest with the Master of the off-take tanker, and he sho ensure there are adequate messengers, heaving lines, chain stoppe etc., to expedite the operations.

The tow line must be made fast aft to suitable mooring bitts on near, the tanker's centre line, and MUST NOT be left on the winch dru The tug/support vessel will remain attached to this tow line through the entire off-take operation.

A ship's mooring rope, capable of being used as an emergency line, must be kept at hand on the after mooring deck.

Alternatively, depending on the circumstances at the time of berthi the tug may be made fast on the starboard shoulder to give a pull/pu mode of operation.

Once the tow line is made fast to the Mooring Master's satisfact the tanker's crew under the direction of the Mooring Master's Assist will proceed to the forecastle in readiness to moor the tanker to the

Once the off-take tanker is securely moored, and is lying settled tandem with the OSI, then the tanker's crew together with the Moor Master and his Assistant, will proceed to the manifold to commence hose connection.

Inclement Weather Operations: If at any time the Terminal OIM decid that due to deteriorating weather conditions, Terminal operations m become unsafe, then the Master of the off-take tanker will be inform of this decision, and operations will cease.

Unmooring and Departure Procedures: In the interest of safety, the take tanker shall be unmoored as soon as practicably possible a completion of transfer operations. To implement the above policy, off-take tanker may be asked to participate in an Early Departure P to expedite the lifting in the interest of all parties.

LOADING: *Watchkeeping:* Whilst the off-take tanker is moored to OSI, it will be the Master's responsibility to ensure that adequate d and cargo watches are kept by a responsible English speak watchkeeping officer, and in addition, a continuous forecastle watch m be maintained, to monitor the aspect and distance of the tanker in relat to the OSI. During transfer operations, and at all times that the hos connected to the off-take tanker, a continuous manifold watch must maintained.

Hose Connection: The Terminal is equipped with a single hose strin 16 in. double carcass floating hose, approximately 300 m. in length. hose is fitted with a quick release 16 in. Camlock coupling at the take tanker's rail hose end, to fit a standard 16 in. ANSI 150 po flange (Note: 16 in. = 406 mm.).

The hose string is also fitted with a self-sealing 'Breakaway' coupl

Off-take tankers should arrive at the Terminal with a single port s manifold, ready in all respects to accept this coupling, and if necess fit the required reducer.

On completion of the mooring operation, the Terminal tug/sup vessel will tow the floating hose string to the off-take tanker's port s below the manifold.

The rail hose end will then be connected to the tanker's derrick/c hook and hoisted on board for the connection to the manifold. It is duty of the tanker's crew, under the direction and control of the Moo Master and his Assistant for the hose connection, and the Master of off-take tanker shall ensure that a responsible English spea watchkeeping officer is in attendance at the manifold during the h connection.

Pumping Rate: 4,500 cu.m./hr.

Liverpool Blend Crude Oil: A general description of the Douglas B crude oil is given below:

API	44.4 at 60°F.
Density	0.8041 at 15°C.
Loading temperature	10°C – 25°C.
RVP	5 – 10 psi at 30°C.
H_2S	<5 ppm.

Oil Transfer: The Terminal will be in full control of all transfer opera under the direction of the OIM and his deputies, all rates and press shall be agreed upon between the Terminal and the off-take tanker to any oil transfer operation. The responsibility for routine monitor the loading of cargo shall rest with the off-take tanker's officers and However, the Mooring Master or his representative onboard the of tanker shall be deemed to be available for liaison between the and the Terminal if the situation demands.

An off-take tanker intending to load oil at the Terminal must be ca of accepting a line displacement of approximately 330 bbls. of sea immediately prior to receiving oil cargo, which may be kept, if so req in a separate slop tank segregated from the cargo. In addition, th take tanker must allow space in a cargo or slop tank for a final dra of the floating hose immediately prior to completion of tra operations.

Suspension of Transfer Operations: The Terminal maintains the r cease all transfer operations, when any of the occurrences listed are imminent:

Any radio communications failure between the Terminal and th take tanker.
Any requested stop by the off-take tanker.
Any requested stop by the Mooring Master.
Any stop desired by the Terminal.
Any emergency situation concerning the Terminal, off-take tan ancillary loading equipment.
Any helicopter operations at or near the Terminal.
When weather parameters exceed safety limits.

When in the opinion of the Mooring Master a proper deck and cargo watch is not being maintained.

When there is a breach of Terminal Conditions.

When in the opinion of the Mooring Master the off-take tanker is considered to be in an unsatisfactory ballast/loading condition.

The Mooring Master will post on board a list of the relevant methods of communication, and the emergency whistle signals to be used, in the event of communications failure.

Early Departure Plan: The cargo loaded figure is computed initially by the Terminal, using the 'Oil Sales Metered Volume' method with a provisional density figure.

The loaded 'Gross Standard Volume' figure will then be recorded on the 'Approximate Quantity Report', and then passed to the off-take tanker.

The hose will be disconnected.

The tanker will then be unmoored from the OSI.

The Cargo Surveyor will complete his calculations on board the tanker, and then return to the Terminal with the Mooring Master and other personnel on board not sailing with the tanker.

The off-take tanker is then released from any further obligations to the Terminal and may commence her voyage.

The API, and figures for S&W will be determined by the Terminal through laboratory analysis, who will then calculate the Gross and Net Oil figures of cargo loaded, which will be passed to the Master of the off-take tanker as soon as possible after sailing, by VHF or Satcom.

The final Gross and Net Oil figures for cargo loaded will then be introduced to the Bill of Lading in the designated section.

This will then be faxed to the Master for confirmation, who, if in agreement, should then authorise his Agent to sign on his behalf.

The off-take tanker's Master will be required to authorise his Agent to sign any Bills of Lading on his behalf, and may tender any Note of Protest to the Terminal by telex or fax directly or via his Agent.

BALLAST: *Deballasting Operations:* Whilst the off-take tanker is moored to the OSI, no ballasting or deballasting operations may be commenced without prior consultation with, and agreement from, the Mooring Master. The off-take tanker shall endeavour to maintain a properly loaded/ballasted condition and keep her propeller fully submerged, without allowing the forefoot to come out of the water.

Note: There are no reception facilities for dirty ballast or slops at the Terminal, and under no circumstances shall dirty ballast, slops or garbage be discharged to the sea.

MEDICAL: *Medical and Dental Services:* There are no medical or dental services at the Terminal, but in an emergency, medical evacuation can be arranged through the OIM of the Terminal to facilities in Liverpool.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Repairs of any description which may affect the full operational status of the off-take tanker are not permitted, while the tanker is moored to, or manoeuvring at, the Terminal. Under no circumstances are an off-take tanker's main engines to be disabled whilst visiting the Terminal.

REPATRIATION: There are no facilities for crew changes at the Terminal, except in an emergency.

TIME: The local time at the Terminal is UTC (in Summer months: UTC plus 1 hour), and all messages and communications with the Terminal should relate to local time.

SHORE LEAVE: Not permitted.

APPENDIX 'A':

OFF-TAKE TANKER QUESTIONNAIRE

Fax to: BHP Petroleum Limited, E/R/A/ME
Attention of: Shipping Co-ordinator
From:
Fax No.: (44) 171-408-7236
Date:

The following tanker details are required prior to Acceptance to lift cargo from the Liverpool Bay OSI, Fixed Floating Storage and Off-Loading Terminal.

A legible copy of the Forecastle Plan, clearly showing the proposed lead from the Panama fairlead, via the chain stopper, to the winch drum, MUST accompany this Questionnaire.

This Plan must be endorsed with the Company's/Ship's stamp, dated and signed by a person of authority, to acknowledge that the Plan is accurate, and all equipment shown is fully operational.

A completed copy of the Plan and Questionnaire MUST be sent to Master of the off-take tanker.

GENERAL PARTICULARS OF TANKERS (please answer all questions):

1. Name of Tanker ....
2. Previous Names ....
3. Flag and Port of Registry ....
4. Name of Owner ....
5. Name of Operator ....
6. Address of Operator ....
....
....
7. Classification Society ....
8. Year Built ....
9. Is the Tanker an 'OBO'? Please circle answer. If answer is Yes, please give last 3 cargoes. Yes No
10. International Call Sign ....
11. Inmarsat Number ....
12. Gross Tonnage ....
13. Nett Tonnage ....
14. Summer d.w.t./Re-measured Summer d.w.t. ....
15. Maximum Displacement ....
16. Length Overall ....
17. Maximum Breadth ....
18. Distance Bow to Manifold ....
19. Distance Manifold to Ship's side ....
20. Diameter of Manifold lines ....
21. Reducers and Sizes carried ....
22. Segregated Ballast capacity ....
23. Maximum Cargo capacity (98% full) ....
24. Maximum Loading Rate on single 16 in. line in cu.m./hr. ....
25. Derrick/Crane S.W.L. ....
26. Nationality of Officers ....
27. Nationality of Crew ....
28. Distance between Fairlead and Chain Stopper (m.) ....
29. Type and Size of Bow Stopper (give acceptable maximum chain link size) ....
30. Forward Panama Fairlead size (mm.) ....
31. Mooring Winch lifting capacity ....
32. Arrival Draft (Tanker's trim must not exceed 3 m.) ....
33. Name of P&I Club Insuring Tanker ....
34. Limit of Pollution Liability Insurance U.S.$ ....
35. Tanker's Last Port ....
36. Name of Port where ship may be inspected by BHP Representative, prior to hire. ....
37. Are the following Personnel Familiar with Tanker Operations, and have their Certificates of Competency been suitably endorsed?
    - Master Yes No
    - Chief Officer Yes No
    - Second Officer Yes No
    - Chief Engineer Yes No
    - Second Engineer Yes No
38. Are there at least Two Certificated Personnel on board capable of undertaking COW Operations? Yes No
39. Is all Equipment used on Deck intrinsically safe in preventing ignition source? Yes No
40. Is there a Permit to Work System in Operation? Yes No
41. Are there NO SMOKING Regulations in place? Yes No
43. Is there a "Drugs and Alcohol" Policy in force? Yes No
44. Does the Tanker comply with an 'ITF' Agreement or equivalent? Yes No
45. Is the Tanker participating in TOVALOP? Yes No
46. Do all Personnel involved in the Operation speak English? Yes No
47. Does Manifold Equipment conform to OCIMF Guidelines? Yes No
48. Has Tanker a Bow Chain Stopper conforming to OCIMF Guidelines? Yes No
49. Can Chain Stopper accept 76 mm. Stud Link Chain? Yes No
50. Has the Tanker a Winch Drum, (capable of handling and storing 100 m.×76 mm. + 100 m.×32 mm. polypropylene rope) in-line with Panama Fairlead and Stopper? Yes No
51. Does the Tanker have a copy of the Liverpool Bay OSI Berthing and Terminal Handbook? If Yes, what is the Revision No. . . . . . Yes No
52. Does the Tanker operate a Management System in-line with 'ISO' 9002? Yes No
53. Are the Tanker's Officers and Crew familiar with Hydrogen Sulphide and it's associated Hazards and Dangers? Yes No
54. Has the Tanker been the cause of any major Safety or Environmental Incidents, e.g.:
    - (a) Fire on board.
    - (b) Spill of crude oil cargo.
    - (c) Non-conforming effluent disposal.
    - (d) Serious injury or loss of life.
    - (e) Any reported violations of Marine Law. Yes No

ACKNOWLEDGEMENT AND DECLARATION:
I declare that all information stated and included in this Questionnaire is true and accurate at the date of completion shown below:
Signed: . . . . .
Full Name: . . . .
Company: . . . . .
Date: . . . . . .
Company's Official Stamp

GENERAL: *Rejection and Termination:* If BHP Petroleum Limited, the OIM of the Terminal or his representative, form the opinion that the off-take tanker is unsuitable for any reason, the BHP Petroleum Ltd., or the OIM of the Terminal, will have the right to reject the off-take tanker and/or terminate the provision of any services, including the loading of oil to the off-take tanker at any time prior to that tanker's arrival at the Terminal, or whilst at the Terminal, as the case may be. All and any costs incurred by the off-take tanker by such rejection or termination shall be for the off-take tanker Owner's or Operator's account.

Action in an Emergency: The OSI has in force an Emergency Response Plan, which is coordinated with the on-shore gas terminal at Point of Ayr. Through this Response Plan, shore based emergency support during an off-shore emergency situation can be activated and controlled. As stated in the Terminal Conditions, the Master of the off-take tanker is fully responsible for the off-take tanker at all times. In an emergency situation at the Terminal, the OIM will inform the off-take tanker and give advice to the Master of any action to be taken.

Similarly, if an emergency situation arises on the off-take tanker, the Mooring Master will immediately inform the Terminal of the situation and any action being taken.

Emergency Procedures: Emergency procedures should be implemented by the off-take tanker, if any of the following specific emergency situations arise, and for any other emergency which may affect the safety of the off-take tanker, and/or the OSI, and/or any operation connected therewith:

Fire on the off-take tanker.

Tank overflow, or hose burst, or any pollution incident.

Off-take tanker's main engines failure (See "Tanker Check List (Not reproduced)).

Structural failure of mooring hawser.

Failure of off-take tanker's ballast system.

Loss of communications.

Impending collision.

H_2S and Hydrocarbon gas concentrations.

In addition to the off-take tanker's internal emergency procedures, the OIM of the OSI, the Mooring Master and/or his Assistant must be informed of any emergency situation, or potential emergency situation, as it arises.

In no circumstances should the off-take tanker close any valves against the OSI without first warning the OSI Control Room.

For any emergency situation and any of the above mentioned emergencies, the Emergency Shut-Down procedure shall be implemented using the following signals:

Radio: The spoken message "OSI Emergency Stop".

Sound: Short rapid blasts on ship's whistle.

Light: Short rapid flashes by daylight signal lamp, directed at the stern of OSI.

Note: The above light and sound signals need only be used if radio communications fail to produce a stop.

Main Engine Readiness: Any off-take tanker visiting the Terminal shall keep its main engines in a state of readiness to manoeuvre at all times during the visit. The shutting-down of main propulsion machinery and associated auxiliaries is strictly prohibited. Whilst any off-take tanker is moored to the OSI, all deck machinery must be kept operational, and in a constant state of readiness for use.

Pollution Control: Off-take tankers visiting the Terminal shall comply fully with all relevant provisions of the MARPOL 1973/78 Convention. In the event of any pollution incident, the off-shore support vessels are fully equipped for oil spill response and recovery in the field in compliance with UK "M" Notice 1234 and have "Oilrec" notation from their Classification Society.

Without derogation from the Terminal Conditions, liability for any pollution caused by oil which has passed the off-take tanker's permanent hose connection, will be for the account of, and recoverable from, the off-take tanker's Owners (as defined in the Terminal Conditions).

Firefighting: In the event of fire breaking out on board the off-take tanker, it will be the Master's responsibility to make every effort to fight the fire with the tanker's firefighting capability, although every assistance will be given by the Terminal personnel and equipment to avoid the fire spreading.

Safety Checks on Off-Take Tankers: Any off-take tanker visiting the Terminal shall, upon arrival, present herself for Safety Checks by the Terminal Mooring Master. The check prior to any mooring or loading operations will consist of:

Pre-Berthing Check List (not reproduced).

The checks on completion of mooring and prior to loading operations will consists of:

Tanker Safety Check List (not reproduced).

Tank Condition and IGS Check.

An off-take tanker arriving at the Terminal, which does not comply with the Terminal Conditions, or fails to meet the relevant safety standards of the Terminal in the opinion of the Terminal OIM or his representative, may be refused access to the Terminal and it's services.

The OSI Terminal Conditions (not reproduced) provide that the OIM of the OSI may refuse to allow the off-take tanker to berth, or may order the off-take tanker away from the berth, or otherwise suspend or terminate provision or performance of services to the off-take tanker, if at any time the off-take tanker fails to meet the relevant safety standard.

Drugs and Alcohol Policy: An off-take tanker visiting the Terminal will be required to have in force, and to comply with, a Drug and Alcohol Policy that conforms to OCIMF guidelines. Any off-take tanker visiting the Terminal which does not comply with this requirement will be rejected for any future liftings from any Terminal operated by BHP Petroleum Ltd.

It is a BHP Petroleum policy that under no circumstances shall any alcohol or drugs be consumed, or carried, or possessed by any of it's personnel, for any reason, at any time, whilst operating on any of the Company's facilities. BHP Petroleum requests that all off-take tanker's personnel respectfully observe this requirement whilst visiting the Terminal.

Local Conditions: Winds are predominantly in the S.W. to N.W. quadrants, but may be variable on and off-shore in the Summer months. During the Winter months, severe storms and squalls may be experienced, giving wind speed in excess of 40 knots.

Masters of off-take tankers arriving in Liverpool Bay to load from the OSI are reminded that due to the exposed position of the Terminal and the unpredictability of the local weather they are to make every effort to ensure that their vessel is in a suitable and seaworthy condition of ballast. If, in the opinion of the OIM and the Mooring Master, the vessel is not properly ballasted, then mooring may be delayed until such time as the situation is rectified by the off-take tanker's Master.

For further information, Shipmasters are advised to consult the Admiralty Sailing Directions, and the West Coast of England and Wales Pilot.

The tide in the Liverpool Bay area is semi-diurnal, providing two high tides and two low tides per 24 hour period. The lowest astronomical tide recorded being −0.1 m., and the highest astronomical tide recorded being +10.4 m., giving water depths at the Terminal of between 30.8 m. and 42.2 m. Reductions and water depth calculations should be made with reference to the Admiralty Tide Tables for the Port of Liverpool.

The swell factor for the Liverpool Bay area is generally low, except during persistent N.W. gales. Reference should be made to the Admiralty Sailing Directions, and the West Coast of England and Wales Pilot concerning yearly averages and wave heights.

Charts and Oceanographic Information: The Liverpool Bay Area covered by British Admiralty Charts No. 1826 and 1981.

The average water depth in the area is 40 m. and the nature of bottom is predominantly mud, sand and ooze, which affords good hold ground. Masters of tankers using the Terminal should refer to Admiralty Sailing Directions for the area, and be guided by the W Coast of England and Wales Pilot.

Fishing: Fishing is not permitted from the off-take tanker whilst ins the Exlusion Zones.

Visitors to the Terminal: Visits to the Terminal will only be arrang through the Marine Superintendent, and permission must be sough least 4 working days in advance. Visits will usually only be arranged persons who have attended the necessary off-shore survival and saf training courses. Day visitors to the Terminal need not complete the off-shore safety courses.

Stores: Stores are not available at the Terminal.

Supplies and Services: There are no facilities for taking stores at Terminal and no service suppliers.

Shipping Agencies: The following list of Shipping Agents have offices the Liverpool area:

Graypen Ltd., Kings Mill, Merseyton Road, Ellesmere Port, So Wirral L65 2AP. Tel: (44) 151-357-2918. Fax: (44) 151-357-29 Telex: 628320 GPENMY G.

Inchcape Shipping Services (UK) Ltd., Pacific Chambers, Cana No. 1 Dock, Regent Road, Liverpool L20 1DF. Tel: (44) 151-944-11 Fax: (44) 151-944-1229. Telex: 629510 ISSLIV G.

OPERATOR: BHP Petroleum Limited, Point of Ayr Terminal, Talac Holywell, Clwyd CH8 9RD. *Tel:* (01745) 881200. *FAX:* (01745) 8812

Contact: Ross Nicholls, Marine Superintendent (Tel: (01745) 88120

LOCHMADDY: 57.36 N. 07.11 W. (See Pla

PORT LIMITS: Westward of a line running Southward from Weav Point to Leacham Madadh.

PILOTAGE: Pilot can be arranged if required. VHF Channels 16 and Tel: (01876) 500337, 500282, 500226 or (01870) 602425 (ext. 859) at night (01870) 610294.

ANCHORAGES: Available in Lochmaddy Bay.

RADIO: Skye Radio.

VHF: Lochmaddy Harbour on Channels 16 and 12.

RADAR: No radar service.

TUGS: None.

BERTHING: Length of berth 370 ft. (South Face). Depths alongside LWS: East end 6.0 m., West end 4.5 m.

Length of berth 180 ft. (North Face). Depth alongside at LWS is 4.0

CRANES: Available by arrangement. 10 ton lift.

BULK CARGO/SPECIALISED CARGO-HANDLING FACILITIES:

Ro-Ro Linkspan at North West end of South Face berth on pier.

BRIDGES: None.

MEDICAL: Doctor and hospital available.

TANKERS: No facilities.

DENSITY: Salt water.

FUEL: Gas oil available. Tel: (01870) 610238.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS/DRY DOCKS/SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Available if required.

HATCHES: Opening/closing carried out by crew.

AIRPORT: 20 miles to Benbecula Airport. Daily service to and Glasgow, Stornoway and Barra, except Sunday. Onward connec flights available.

POLICE/AMBULANCE/FIRE: Police Tel: (01876) 500328. Ambula Tel: (01876) 500324. Fire Tel: (01463) 222722.

SERVICES: None.

BANKS: Bank of Scotland Tel: (01876) 500323, 500266.

SHIP SUPPLY SERVICE: Crew members, and essential stores ca transported between ship and shore at Lochmaddy by launch. S requiring such service should contact Harbour Office. VHF Chann or Telephone (01876) 500337, 500282, and at night (01876) 500

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required for cruise ships only, and conform to the Aviation and Maritime Security Act 1990.

REGULATIONS: None.

GARBAGE DISPOSAL: 1100 ltr. wheeled skips are available fr charge. For bulk refuse contact local authority (Tel: (01870) 60 Fax: (01870) 602332). Charges are approximately £15.00 per hou collection time by arrangement.

WASTE OIL DISPOSAL: By prior arrangement with local au (Tel: (01870) 602425. Fax: (01870) 602332) or through Port Ma (Tel: (01876) 500337).

SEAMAN'S CLUBS: No club, but local facilities include hotel, 2 s sub-post office, bank, church.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Western Isles Islands Council, Council Offices, Sa Road, Stornoway, Isle of Lewis. *Tel:* (01851) 703773. *FAX:* (705349. *Contact:* Captain R. Frater, Harbour Master. Home tel: (870268. Captain C. Macleod, Assistant Harbour Master. Tel: (602425. Fax: (01870) 602332.

Local Authority: The Port Manager, Harbour Office, Lochmaddy North Uist. *Tel:* Office (01876) 500337 and (01876) 500282. After (01876) 500226. *FAX:* (01876) 500412. *Contact:* U.I.M. Roberts Manager.

LONDON and Thames District (Including Tilbury):

51.30 N. 0.05 W. **(See Plan)**

PORT LIMITS: The seaward limit means lines drawn from Lat. 51° 37' 00" N., Long. 00° 57' 19" E. (Foulness Point in the County of Essex) to Lat. 51° 46' 05" N., Long. 01° 20' 32" E. (Gunfleet old lighthouse) and thence to Lat. 51° 26' 36" N., Long. 01° 25' 30" E. and thence to Lat. 51° 24' 55" N., Long. 00° 54' 21" E. (Warden Point in the County of Kent).

An arrived ship is considered (subject to Charter Party terms) to have arrived when vessel is instructed to anchor at a designated anchorage, as ordered by the Port Authority, if berth where vessel's operations are to be carried out is not available. Otherwise when vessel is alongside. Usual anchorage for larger vessels is below Southend, which is allocated to vessels by the Port Authority.

DOCUMENTS:

1 copy of H.M. Customs and Excise Form C.142 to be completed showing each crew members declaration as to the amount of cigarettes, tobacco, spirits, wine, radios, lighters, etc., belonging to them on board the ship to enable Customs to ascertain if in conformity or excess of requirements.

1 copy of IMO Crew List.

1 copy of List of Passengers on board, showing names, place of joining vessel, passport details.

Ship's Register to be available for inspection on arrival.

List of space occupied by cargo in unregistered spaces.

Chief Engineer's declaration as to the quantity of fuel carried in double bottom tanks.

Details of any livestock on board.

Ship's Stores Declaration arrival Form C.14 to be completed.

Details of previous ports of call.

PILOTAGE: Compulsory Pilotage:

1. DEFINITIONS:

"Upper Area" means so much of the River Thames as is between Putney Bridge and London Bridge, but does not include a closed dock, lock or other closed work.

"Inner Area" means so much of the Thames as is between London Bridge and the Former Seaward Limit.

"Outer Area" means so much of the Thames as is between the Former Seaward Limit and the Seaward Limit of Pilotage Jurisdiction.

"The Thames" means so much of the River Thames, the Thames Estuary, rivers, streams, creeks, watercourses and the sea as is between London Bridge and the Seaward Limit of Pilotage Jurisdiction, but the area does not include:

(i) A closed dock, lock or other closed work.

(ii) Any part of the Medway Ports.

(iii) The River Lee or Bow Creek above the South boundary stones referred to in Section 3 of the Lee Conservancy Act 1988.

"The Former Seaward Limit" means the former seaward limit of the Port of London Authority which is a line drawn from the pilot mark at the entrance of Havengore Creek in the County of Essex on a bearing 166° reckoned clockwise from the true North point of the compass to mean high water level on the Kent bank of the Thames.

"The Seaward Limit of Pilotage Jurisdiction" means lines drawn from Lat. 51° 37' N., Long. 00° 57.317' E. (Foulness Point in the County of Essex) to Lat. 51° 46.083' N., Long. 01° 20.533' E. (Gunfleet Old Lighthouse), thence to Lat. 51° 48' N., Long. 01° 40' E. (Long Sand Head), thence to Lat. 51° 36' N., Long. 01° 23.083' E., thence to Lat. 51° 26.6' N., Long. 01° 25.5' E. and thence to Lat. 51° 24.917' N., Long. 00° 54.35' E. (Warden Point in the County of Kent).

"Specified Vessel" means any vessel having on board quantities of the following (IMO codings in brackets):

(i) Explosives (Class 1), or

(ii) LNG, LPG in bulk or non-gas free following discharge of these cargoes (Class 2), or

(iii) Low flash petroleum spirit in bulk or non-gas free following discharge of this cargo (Class 3.1 and 3.2), or

(iv) Low flash point and toxic chemicals in bulk or non-gas free following discharge of these cargoes (Class 3.1, 3.2, 6.1 and 8.0).

"Passenger Vessel" means a vessel which is certificated to carry more than 12 passengers.

2. COMPULSORY PILOTAGE:

The Port of London Authority (a competent harbour authority within the meaning of the Pilotage Act 1987), in the exercise of its powers under Section 7 of that Act, directs that on and after 1st June 1991, pilotage shall in all circumstances be compulsory for ships of 50 m. or more in length navigating in the Upper Area.

3. THE INNER AREA:

Pilotage is compulsory for all ships navigating in the Inner Area, except ships of less than 50 m. in length overall.

4. THE OUTER AREA:

Pilotage is compulsory for all ships navigating in the Outer Area, except:

4.1 Specified vessels and passenger vessels of less than 50 m. in length overall.

4.2 All ships of less than 80 m. in length overall other than specified vessels and passenger vessels.

5 A ship which is being navigated in the compulsory area and in circumstances in which pilotage is compulsory for it, must be under the pilotage of:

(a) An authorised Pilot, or

(b) A person who is bona fide, the Master or First Mate of the ship, and possesses a Pilotage Exemption Certificate granted by the Port of London Authority in respect of the area (or a specified part thereof) and ship.

Pilotage Exemption Certificates may be granted by the Authority for the following geographical areas within the compulsory area. Areas ONE and TWO below comprise the Outer Areas, and Areas THREE and FOUR comprise the Inner Area.

Area One: Between the Seaward Limit of Pilotage Jurisdiction in the vicinity of the Outer Tongue Buoy and Sea Reach No. 1 Buoy, via the Edinburgh and the Princes Channels.

Area Two: Between the Seaward Limit of Pilotage Jurisdiction in the vicinity of the Sunk Head Tower Buoy and Sea Reach No. 1 Buoy, via the East Swin Channel/Barrow Deep and the Black Deep.

Area Three: Between Sea Reach No. 1 Buoy and a line drawn due North from Gravesend Pilot Station.

Area Four: Between a line drawn due North from Gravesend Pilot Station and London Bridge; but a certificate will relate only to the part of the area between Gravesend Pilot Station and a point half a mile above a specified berth within the area.

6. TAKING ABOARD AND LANDING PILOTS:

6.1 A ship for which pilotage is compulsory in the Inner Area, but not in the Outer Area, shall take aboard or land a Pilot in the vicinity of the Warp/Oaze Deep, East of Sea Reach No. 1 Buoy.

6.2 A ship for which pilotage is compulsory in the Outer Area shall take aboard or land a Pilot beyond the Seaward Limit of Pilotage Jurisdiction as follows:

6.2.1 All ships with an actual draft of less than 6.0 m. in the vicinity of N.E. Spit Buoy.

6.2.2 All ships with an actual draft of 6.0 m. or more, when entering or leaving from or to the North, in the vicinity of the Sunk Light Vessel.

6.2.3 All ships when entering or leaving from or to the South, in the vicinity of N.E. Spit Buoy.

7. ADVERSE WEATHER CONDITIONS:

In adverse weather conditions, the boarding or landing of an authorised Pilot at the points referred to in Paragraph 6 of this direction may be impracticable. In such circumstances, a ship may board or land a Pilot in more sheltered waters in accordance with advice notified at the time by the Port of London Authority from the London Port Control Centre at Gravesend. An authorised Pilot will at such times be stationed at the London Port Control Centre at Gravesend in order to give advice to ships navigating in the area.

8. PROCEDURE FOR OBTAINING THE SERVICES OF AN AUTHORISED PILOT:

It is imperative that good notice is given of the requirement for the services of a Pilot. To comply with the compulsory procedure, an order for a Pilot must relate to the time that the Pilot is required at the boarding point whether inward bound or departing from the port. If the pilot service is unable to supply a Pilot, due to stress of weather or other unforeseen circumstances, due allowance will be made. Ships' Owners or Masters who fail to provide the proper information in a timely manner may be liable to a surcharge and may cause a delay to the ship.

9.1 *ETA's for Inward Bound Ships:*

Ships requiring the services of an authorised Pilot at the N.E. Spit, Sunk, Warp/Oaze Deep or Gravesend boarding/landing stations must make a provisional order and notification of arrival to the London Port Control Centre at Gravesend, *24 hours in advance*, stating the ETA at the appropriate boarding/landing station, g.r.t./g.t., length overall, draft and destination (name of berth or anchorage). This notification may be in the form of a provisional order and will not incur surcharge penalties.

Confirmation of the above information and a CONFIRMED order for a Pilot must be given to the London Port Control Centre *not later than 8 hours in advance* (This constitutes the COMPULSORY NOTICE after which time a surcharge may be imposed).

Up to 4 hours in advance, any change to an ETA must be notified to the London Port Control Centre. Thereafter, any further changes and the final advice of ETA must be given when the ship is in VHF radio contact with the appropriate Pilot Station.

Ships engaged in short sea voyages may give notice of the CONFIRMED order for a Pilot and ETA at the time of leaving the previous port, where this is less than the above compulsory notice.

Should the services of an authorised Pilot be cancelled within 4 hours of the confirmed ETA, a cancellation charge will be made.

Note: Ships bound for London (or where applicable the Medway), which anchor in the general vicinity of either the Sunk, Outer Tongue or Margate Roads (i.e. at outer anchorage) or are inward from any port adjacent to the limits of the London Pilotage Area, are required to give not less than 8 hours notice of the requirement for a Pilot and anything less will incur a surcharge.

9.2 *ETD's for Outward Bound Ships, Ships Proceeding from one Berth to another or Ships Moving from an Anchorage:*

Ships requiring the services of an authorised Pilot to depart from a berth, buoy or tier, in the Port of London, move from one berth to another, or to move from an anchorage, must notify London Port Control Centre *24 hours in advance*, giving their ETD from the berth, buoy, tier or anchoage, g.r.t./g.t., length overall, draft, destination and landing point. This notification may be in the form of a provisional order and will not incur surcharge penalties.

Confirmation of this information and a CONFIRMED order for a Pilot must be given to London Port Control Centre *not later than 4 hours in advance* (This constitutes the compulsory notice, after which time a surcharge may be imposed). Thereafter, changes to the ETD must be notified to the London Port Control Centre until 2 hours before sailing, when contact should be made direct to the Gravesend Pilot Station by VHF radio or telephone.

Should the services of an authorised Pilot be cancelled within 3 hours of the confirmed ETD, a cancellation charge will be made.

9.3 *Ships Anchoring in the Port of London:*
Ships required to anchor before proceeding to their berth, must confirm with the Duty Port Controller at London Port Control Centre by VHF radio, that the Pilot may remain on board until the ship is required to get underway. No arrangement may be made with any individual Pilots.

Under normal circumstances, when a ship anchors for an extended period, the Pilot will disembark and be replaced by another Pilot when the ship proceeds.

Inward or outward bound ships required to anchor and which have used the services of an authorised Pilot must, as soon as is practicable, advise the Gravesend Pilot Station on VHF radio of their ETA at the anchorage in order to land the Pilot. When a Pilot is required to move from the anchorage, the ship must comply with the requirements of Paragraph 9.2 above.

9.4 *Ships Requiring Pilots to Join or Disembark at Continental Ports:*
Shipowners/Agents wishing a Pilot to board the ship at a continental port or to remain on board to a continental port, must obtain the approval of the Pilotage Coordinator at the Gravesend Pilot Station (Tel: Gravesend (0474) 562333, *not later than 5 days* before the service is required. Charges for this service will be published by the P.L.A. No arrangements may be made with individual Pilots.

Should the services of an authorised Pilot be cancelled within 2 days prior to the date required to join the ship at a continental port, a cancellation fee will be made.

Pilots authorised by the P.L.A. may only act as Pilots within the Port of London compulsory pilotage area. The P.L.A. does not provide deep sea pilotage services.

9.5 *Berthing Pilots:*
Ships of 160 m. or more in length overall or 11,000 g.r.t. or more, whichever is less, are required to employ the services of an authorised Berthing Pilot when berthing or unberthing at the oil wharves or jetties at Shellhaven, Coryton, Canvey Island or the Canvey Methane Terminal.

9.6 *Inner List Pilots:*

9.6.1 Oil Jetties:
Ships of 275 m. or more in length overall or 12.3 m. draft or more, whichever is less, are required to employ the services of an authorised Inner List Pilot when navigating between the Seaward Limit of Pilotage Jurisdiction and the oil wharves or jetties at Shellhaven, Coryton, Canvey Island or the Canvey Methane Terminal.

9.6.2 Ships bound to or from the Medway Ports:
Ships of 12.0 m. draft or more are required to employ the services of an authorised Inner List Pilot, when navigating between the Seaward Limit of Pilotage Jurisdiction and Former Seaward Limit bound to or from the Medway Ports.

10. BOARDING AND LANDING POINTS FOR SHIPS BOUND TO OR FROM THE PORT OF LONDON:
Boarding and landing of Pilots will be carried out by launches operating from Harwich (Sunk Light Vessel), Ramsgate (N.E. Spit Buoy), Sheerness (in the vicinity of the Warp/Oaze Deep to the East of Sea Reach No. 1 Buoy) and Gravesend as appropriate. Pilot boats have a black hull, the word PILOTS on the side of the wheelhouse and fly a pilot flag by day and by night display the signals required by Rule 29 of the International Regulations for Preventing Collisions at Sea 1972 (as amended). Under normal circumstances, these pilot launches operate from their respective bases to ship and land Pilots.

10.1 *N.E. Spit Buoy:*
All ships with an actual draft of LESS than 6.0 m. and all other ships approaching the Port of London from the East and South or departing to ports to the East or South will, subject to weather conditions, ship and land their Pilots (provided by launch from Ramsgate) in the general vicinity of N.E. Spit Buoy and the Elbow Buoy, the charted location being Lat. 51° 25' N., Long. 01° 30' E. Ships which are constrained by reasons of their draft from using the North Edinburgh Channel, may embark their Pilot at N.E. Spit or proceed direct to the Sunk boarding and landing station.

10.2 *Sunk Light Vessel:*
Only ships with an actual draft of 6.0 m. or more approaching the Port of London from the North and N.E. directions or departing to the same area will, subject to weather conditions, ship and land their Pilots (provided by launch from Harwich) in the vicinity of the Sunk Light Vessel. The charted location being Lat. 51° 51' N., Long. 01° 35' E. Ships with an actual draft of less than 6.0 m. will only be permitted to ship or land their Pilot at the N.E. Spit Buoy Station. Any ship, arriving at the Sunk and taking a Pilot on boad, having advised in advance a draft of 6.0 m. or more, is found to have an actual draft of less than 6.0 m., will be liable to a surcharge.

10.3 *Warp/Oaze Deep:*
Ships which are exempt from compulsory pilotage for Areas 1 and 2, as defined in Paragraph 1.1 of these Regulations, will, subject to weather conditions, ship and land their Pilots (provided by launch from Sheerness) in the vicinity of the Warp/Oaze Deep and to the East of Sea Reach No. 1 Buoy.

10.4 *Gravesend:*
Ships which are exempt from compulsory pilotage for Areas 1 and 3, or 2 and 3, as defined in Paragraph 5 of these Regulations, will normally ship and land their Pilots at Gravesend off the Royal Terrace Pier.

11. SHIPPING OR LANDING A PILOT:
Mariners will appreciate the need to provide a satisfactory lee when shipping or landing a Pilot and may be requested by the pilot launch to change speed and course to enable the operation to be carried out safely.

12. SHIPS CLAIMING EXEMPTION OR EXCEPTION FR COMPULSORY PILOTAGE:
Ships claiming exemption or exception from compulsory pilota as defined in these Regulations, must notify the London P Control Centre *24 hours in advance* of their intention to cla exemption or exception; giving ETA/ETD as appropriate, s name, g.r.t./g.t., length overall, maximum draft, name, initials a exemption certificate number of the Master or First Mate who be piloting the ship on that voyage. Failure to provide t information will necessitate the ship taking the services of authorised Pilot, and could involve the ship in a delay as well the imposition of a surcharge on the pilotage dues. Ships, arriv from ports less than 24 hours distant, must provide the informat immediately after departure from that port.

13. COMMUNICATIONS:
The London Port Control Centre operates 24 hours a day and the centre for all initial orders for Pilots. It is equipped with V radio, telephones, telex and facsimile equipment.

Long range ETA's from ships at sea may be passed throug United Kingdom Coast Radio Station by M/F or VHF ra telephone, telex or telegraph addressed to "London Port Contr The Gravesend Pilot Station, situated at the London Port Con Centre, operates 24 hours per day and is the administration cen for all pilotage services and is able to provide advice Shipowners/Agents on all pilotage arrangements. It is equipp with VHF radio, telephones, telex and facsimile equipment.

RESTRICTIONS: Certain restrictions are placed on the navigation vessels carrying petroleum, chemicals, explosives and other hazardo commodities (See "Notices").

Vessels which are carrying any of the above mentioned cargo should call Gravesend for details of these restrictions and ascert whether it is permitted for them to navigate.

Notwithstanding any of the aforementioned restrictions, all vess should comply with the "General Directions for Navigation in the Por London 1991". (Copies obtained from the Chief Harbour Master, P of London Authority, London River House, Royal Pier Road, Gravese Kent DA12 2BG.

The tides at London Bridge have a range of 4.6 m. at Mean Nea and 6.6 m. at Mean Springs.

The sea approach to Shellhaven is dredged to allow the passage vessels to 13.7 m. at Mean Neap tides. For latest channel depths cont the Harbour Master or Thames Navigation Centre.

PORT CONTROL – LONDON:

London Port Control Centre: (Call sign "Port Control London") is t main operations centre for traffic information within the Port of Lond Authority area of jurisdiction. All information required by the Autho regarding ETAs and ETDs, etc., should be passed to this Centre. It a deals with matters concerning moorings in the River and enqui concerning Byelaws, regulations and shipping information.

Communications: VHF radio: Channels 16, 9, 13, 12, 18, 20. Telepho Gravesend 560311. Telex: 262880 Platns G. Facsimile: Grou Gravesend 352996.

Radar coverage and area of responsibility: Crayfordness to the sea

Tidal Information: Information on tidal heights from gauges at Walt Margate, Shivering Sands, Southend, Tilbury, Coryton, Denton, E Silvertown, Charlton, Tower Pier, Westminster and Richmond available on request.

Procedures: All vessels must report to this station on entering the P Limits inward bound or when leaving a berth within the area responsibility outward bound or when moving from one berth to anot It is also a requirement to report the vessel's progress at the "repor points" indicated on the Admiralty Charts of the area. Regular half-ho broadcasts of navigational information are made on VHF Channel 1 the hour and 30 minutes past the hour for traffic to the West of Reach No. 4 Buoy and 15, and 45 minutes past the hour for traffi seaward of Sea Reach No. 4 Buoy.

Thames Barrier Navigation Centre: (Call sign "Woolwich Radio") sub-centre to the Thames Navigation Centre with particular responsi for controlling navigation through the Thames Flood Barrier.

Communications: VHF Radio Channels 16, 14, 22. Tel: (0181) 855 Telex: 896157 Plabar G.

Radar coverage and area of responsibility: Radar from Crayfordne Greenwich. Area of responsibility from Crayfordness to Teddingto

Tidal Information: Tidal information from a gauge at North Woolwic other stations are available on request.

Regular half hourly broadcasts of Navigational information are on VHF Channel 14 at 15 minutes and 45 minutes past each hou

Procedures: All vessels navigating in the area of responsibility inform this station of their intention to do so and maintain a liste watch on VHF radio. Progress reports should be made at the "rep points" indicated on the Admiralty Charts. Special regulations a existence for navigating through the Thames Flood Barrier and Barrier Control Zone (Margaretness to Blackwall Point). See P London – annual summary of Notice to Mariners 1994.

Port of Tilbury: All vessels wishing to enter or leave the Port of T must book a time with the Harbour Master (VHF Channel 4). Tel: (0 852456. Fax: 01375-852251. The Harbour Master also deals enquiries for dock tugs, dummy pontoons and other services for ve in the Dock. Tilbury is operated by The Port of Tilbury London L

Patrol Service: A 24-hour patrol service is maintained by the Au whose launches can be contacted on VHF radio (Call sign "Th Patrol") on VHF Channels 16, 12, 14 and 6. They can also be con through "Port Control London" or Woolwich Radio.

General: The London Port Control Centre maintains close liaiso Owners, Agents, Pilots, Watermen, Port Health, Customs and and all the Emergency Services. It is available to give help and on any matters affecting ships and shipping.

ANCHORAGES: Great Nore and Little Nore Anchorages allocated by Medway Port Operations, all other anchorages allocated by the London Port Control Centre dependent upon the size and draft of vessel, the length of stay required at the anchorage and the specific details of the vessel, i.e. explosives, petroleum, etc.

Explosives anchorage at Chapman Anchorage for discharging/loading to/ex barge to/from appointed river wharves.

MAX. SIZE: Tankers:

Berth	*Depth at Chart Datum*	*Length*
Coryton	14.0 m. maximum	1,100 ft.
Shellhaven	14.6 m. maximum	1,200 ft.
Holehaven	11.2 m. maximum	720 ft.
Purfleet	8.6 m. – 11.2 m. maximum	700 ft.
Grays	11.2 m. maximum	620 ft. - 750 ft.

Other river and tanker berths restrictions apply according to tides and berth.

Passage for deep-draft tankers for berthing at Shellhaven and Coryton is sometimes over a period of 2 tides. Passage on the first tide to deep water anchorage, vessel to leave anchorage on make of second tide and arrive off the installation half an hour before HW of this tide.

RADIO: Outside U.K. waters from the South, call long range station "Portishead Radio"; approaching London, "Niton Radio" or "Northforeland Radio", giving Agent vessel's draft and ETA. "Port Control London" when in the Thames and its estuary.

TUGS: Tugs usually pick up vessels for Shellhaven and Holehaven in reaches approaching berth, or Gravesend for berths/docks up river. Tugs and lines can be hired from Alexandra Towing Co. (London) Ltd., Alexandra House, Royal Pier Road, Gravesend, Kent. Tel: (01474) 359361.

HEALTH: Port of London Health Authority:
Public Health (Ships) Regulations, 1979.

Notes for the guidance of Masters/ships Agents:

(1) It is the responsibility of the Master of a vessel due to arrive in the Port of London to report to the Port Health Authority the presence of sickness, animals or captive birds on board, or of the occurrence, during the voyage, of the death, other than by accident, of a crew member or passenger.

(2) This information should be transmitted to North Foreland Radio Station for forwarding to "Portelth London", not more than 12 hours or less than 4 hours before vessel's arrival in the Port.

(3) Vessels already in the Port can contact the Port Health Authority directly by telephoning (013752) 2663.
At Public Holidays (and all times other than 0900 – 1700 hrs. Monday to Friday) an answering machine is connected to this number giving the telephone number of the Duty Officer who will give any advice or assistance required.

(4) The Port of London Health Authority District includes that part of the River Medway comprising Sheerness, Isle of Grain, Ridham Dock and Queenborough.

Also see "Health – All Ports" before first U.K. port.

BERTHING:

Port of Tilbury: The enclosed dock system at Tilbury is operated by Port of Tilbury London Ltd.; the whole port area, approximately 300 hectares, being designated a Freeport.

The Port of Tilbury's cargo handling activities are divided into 3 operational areas – Containers, Conventional and Grain – all equipped with modern facilities to handle the full range of cargo types.

In addition to the above-mentioned berths, facilities exist at dedicated terminals for the handling of aggregates, scrap metal, bulk cement and, at a temperature-controlled store, chilled and frozen food produce. A dedicated container and trailer groupage depot is operated by the Port.

Depths of water shown for berths in the enclosed docks and for the riverside berths are the authorised depths to which the berths may be dredged. Actual depths may be less than the authorised depth and the advice of the Port of Tilbury's Harbour Master should be sought if necessary.

Entrance lock dimensions: Length 305 m. Width 33.5 m. Depth 7.3 m. below C.D.

Max. size: LOA 262 m., beam 32.3 m. and max. draft 11.4 m.

Access to berths (except the Grain Terminal, Northfleet Hope Container Terminal, riverside Ro/Ro terminal and passenger landing stage) is gained through an entrance lock.

Berth	*Length* (m.)	*Depth* (m.)	*Equipment*	*Remarks*
Container Terminal	952	11.6	4 high profile container cranes 30 tonnes, 1 low profile container crane 40 tonnes. Straddle carriers, tractor/trailer units and forklift trucks. Bromma tilt rotating spreader.	Container Division: Multi-user terminal offering a range of stevedoring and quay services for containers. Heavy lift and out-of-gauge cargoes handled by arrangement. 26 hectares fully paved to container standards. Up to 3,000 ground slots. Electric points for reefer containers. Ship working 24 hours a day, 7 days a week. Grid working 2300 hrs. Sunday to 1500 hrs. Saturday.
Forest Products Berths	3,000	10.8 to 11.6	Full range of specialist handling equipment including heavy duty forklift trucks, tractor/trailers.	Conventional Division: Over 60 hectares of storage space for forest products, of which 19 hectares undercover. Normal hours of working 0600 hrs. – 2200 hrs., Monday to Friday. Overtime working in accordance with customers' requirements.
General Purpose Berths	1,000	10.8 to 11.6	Full range of cranes, forklift trucks, tractor/trailer units.	Conventional Division: Ro/Ro and general cargoes (loose and palletised goods), project, awkward and heavy cargoes, vehicles and rolling cargoes, containers and other unitised traffics. Normal hours of working as above.
Riverside Ro/Ro Terminal	Ship length up to 152 m.	6.1		Suitable for bow or stern ramp vessels.
Passenger Landing Stage (London International Cruise Terminal)	Ship length up to 225 m.		2 covered gangways	Embarkation and disembarkation of passengers for vessels. Tilbury/Gravesend local foot passenger ferry.
Tilbury Grain Terminal	274.3 m. deep sea berth 70 m. short sea berth	12.8	100,000 tonnes silo capacity – 196 separate bins of varying size. Capacity of over 2 million tonnes p.a. Intake via water, road, rail and adjacent mills. 2×1,000 tonnes/hr. marine leg elevator towers. 2×200 tonnes/hr. pneumatic booms. 6 loading spouts at 1,000 tonnes/hr. Mobile loading conveyor.	Grain Division: Import and export of grains. Highly specialised and fast discharge systems together with purpose-built automated facility for handling grain for export. Terminal has direct feed by conveyor to adjacent mill sites. Normal hours of working 0700 hrs. – 2100 hrs., Monday to Friday. Overtime working in accordance with customers' requirements.
Northfleet Hope Container Terminal	260 m. in dock, 305 m. on riverside	10.7 m. in dock, 12.5 m. on riverside	5 container cranes (1×35 tonne and 1×45 tonne in dock and 3×35 tonne at riverside), straddle carriers, tractor/trailer units.	Tenant operation of Tilbury Container Services. Accommodation for 5,000 TEU, including 1,464 reefers. 24 hour working.

Private Wharfingers: († = not operational).

Berth	*No. of Berths*	*Length (ft.)*	*Depth (ft.)*	*Equipment*	*Remarks*
Bridge Wharf (Bow Creek) †	7 (barges)	270-290	15.0 (MHWS)	Up to 20 tonnes, mobile.	Metals of all descriptions and bu ore by grabs.
Bridges Wharf (Battersea) †	1	225	13.0 (MHWS) Dries at LW	2 cranes up to 10 tons.	Handling and storage of inflammable and hazardous chemical products etc.
Convoys Wharf	1	243 m.	7.5 m. (MLWS)	Ro/Ro pontoon and jetty, 6×2 tonne cranes 1× 50 tonne mobile crane.	Equipped with 2 floating Ro/Ro berths handling newsprint, forest products and general cargo.
	1	442	18.0 (MLWS)	Ro/Ro pontoon.	Operators of nationwide warehousing, transport and freigh forwarding.
Thames Europort Ltd.	2	200 m. (downstream) 150 m. (upstream)	36 (LLW)	1 Sku container mover, 12 tractor units, 4 forklift trucks.	2 Ro/Ro berths (bow, stern or quarter ramp) 22 acres hardstanding. 4,260 sq.ft. transit shed. Extended driver facilities a restaurant.
Denton Wharf	1	145 m.	10.4 m. (MHWS)	6×3 – 30 tonnes. 2×30 tonne container park gantries.	Discharge and loading of all type of conventional cargo and containers to and from ships and barges. Groupage service. Licensed for handling explosives.
Erith Deep Wharf (not operational)	1 (ship) 2 (barges)	600 600	21.0 (MLWS)	4×6.5 – 7.5 tonnes. 2×4.5 tonnes.	Direct handling ship/road transpo or ship/warehouse. Handling of forestry products. Lash/Seebee barges.
Imperial Wharf	1	91 m.	9.0 m. (LAT)	3×5 tonnes.	Forest products.
London Steel Terminal	2	90 m.	5.0 m. (MHWS)	2 cranes up to 30 tonnes.	Handling of steel using electro-mechanical grabs for steel coils. All operations including shipwork carried out under cantilevered ro providing all weather working. Max. size 3,000 d.w.t.
Lovells Wharf	1	280	18.0 (MHWS)	2 cranes up to 20 tonnes.	Steel and other metals (London Metal Exchange approved warehouse).
Mast Pond Wharf †	1	220	16.5 (MHWS)	1×5 tonne, mobile.	Bulk handling, overside or direct delivery.
Mulberry Wharf	1	69 m.	5.2 m. (MHWS)	1×5 tonne mobile, 1×2.5 tonne fixed.	Bulk handling, overseas and dire delivery.
Northfleet Terminal	3	614	9.75 m. (MLWS)	3×2.5 tonnes	1 deep water jetty (max. LOA 183 m.), 1 berth for oil barges and 1 barg bay. Open storage 20,000 sq.m. Covered storage 2,000 sq.m. Wood pulp and lumber handled.
Phoenix Wharf	2	625-800 (floating jetty)	21.0 (MLWS)	5 cranes up to 30 tonnes. (8 – 10 tonnes ex-ship's hold). 9 quay cranes up to 10 tonnes.	Forest products in all forms, ste fertilisers and bulk cargoes, emp containers. Bulk wine and spirits. General cargo.
Purfleet Deep Wharf	1 (Ro-Ro Berth)	450	16.0 (MLWS)	3 tugmasters.	For continental ferry service and Import/Export of motor vehicles.
	3 (2 Ro-Ro)	1,640	27.5 (MLWS)	6 (jetty)×5 – 6 tonnes. 2 (shoreside)×40 tonnes.	Equipped with modern floating Ro/Ro berth. Handling of foresty products and general cargo.
Tate & Lyle Sugars (Silvertown)	1	162 m.	8.9 m. (LW)	I grab crane 1 continuous ship-unloader	Max. LOA 560 ft. – 570 ft. Max. draft 29 ft. Max. size 23,000 d.w.t. Discharge rate 750 tons per day. Fresh water and fuel available.
Tower Wharf (Northfleet)	3	650	38.0	4×5 tons 3×40 tonnes gantry cranes.	Wharf operated by Cargo Trans Services Ltd. Max. size 40,000 d.w.t. Max. draft 11.0 m. Max. LOA 200 m. Steel, forest products and gene cargo handled.
Victoria Deep Water Terminal	1 (coasters)			1×5 tons	Fuel available by barge or truc Fresh water not available.
	2	850	22.0 (MLWS)		Currently used for aggregates.
	1	350	15.0 (MHWS)		

The depths quoted are to be taken as approximate only. For detailed information contact the Wharf Operator or London Port Control Cen

TANKERS: (Also see "Notices"). There are about 40 berths for tankers in the Thames District, main terminals of which are listed below. Recommended that Masters cable terminal with discharge manifold size, enabling wharf have correct pipes ready. Slop tanks are available at most wharves.

Company	*Berths*	*Length* **(ft.)	*Depth* **(ft.)	*Remarks*
Maxwells	1	170.0	—	Able to handle aggregate vessels 3,000 d.w.t.
BP (Fulham)	1	—	—	Lube oil, gas oil and spirits.
Esso (Purfleet) No. 1 (not in service)	1	Max. LOA 628	26.5 (LWS)	Max. size 28,000 d.w.t. Products handled: F.O., G.O., D.O., kero, gasoline. 4×10 in. (clean products); 2×10 in. (fuel oil). Max. pressure 150 psi.
Esso (Purfleet) No. 2	1	Max. LOA 117.4 m.	26.5 (LWS)	Max. size 8,000 d.w.t. Max. draft 6.9 m. Products handled: F.O., lube oil, G.O., kero. 3×6 in. (lube oil); 2×6/8/10 in. (fuel oil); Max. pressure 150 psi. Total capacity (Berths No. 1-2): White oils 187,000 tons. Fuel oil 126,000 tons. Lube oil 39,000 tons.
Mobil* (Coryton) No. 1	1	Max. LOA 650	Max. draft 33 (MLW)	Max. displacement 40,000 tons. Products handled: L.P.G., gas oil, lube oil, fuel oil, gasoline.
Mobil* (Coryton) No. 2	1	—	Max. draft 18 (MLW)	Coaster berth, max. displacement 2,000 tons. Products handled: Same as Berth No. 1 (excluding L.P.G.).
Mobil* (Coryton) No. 3	1	Max. LOA 900	Max. draft 44 (MLW)	Max. displacement 100,000 tons. Products handled: Crude and fuel oil (3,000 t.p.h.), gas oil (2,000 t.p.h.), gasoline (1,000 t.p.h.), products (350 – 500 t.p.h.). Other products handled: Diesel oil, naphtha and Av. Tur.
Mobil* (Coryton) No. 4	1	Max. LOA 1,200	Max. draft 45 (MLW)	Max. displacement 230,000 tons (320,000 d.w.t. with part load). Crude oil only handled. 4×16 in. steel arms. Rate 3,500 t.p.h. each arm.
Mobil* (Coryton) No. 5	1	Max. LOA 192 m. Max. draft 37 ft.	Depth 43 (MLW)	Max. displacement 40,000 tons. 4×10 in. arms for loading/discharging fuel oil, gasoline and gas oil (rate 2,000 t.p.h.). 1×10 in. arm for receiving refrigerated butane.
Conoco Ltd.	1	256 Max. LOA 625 ft.	44.0 (MHWS)	White oils, capacity 76,000 tonnes.
Oikos Storage Ltd., Canvey Island	1	720	37.8 Av. LW	Low flash bonded storage for hydrocarbon oils, chemicals and edible oils. 115 tanks totalling 350,000 cu.m. with tanks ranging from 25 cu.m. – 20,350 cu.m. Max. LOA 219 m., max. draft 11.5 m. at M.L.W.S.
Pinnacle Storage Ltd., Dagenham	1 (ship) 2 (barge)	750	34.0 (MLWS)	Mild and stainless steel storage – 238 tanks totalling 111,000 cu.m. with tanks ranging from 27 cu.m. – 4,532 cu.m. Low/high flash, bonded storage for chemical, minerals, fuel and edible oils. Max. LOA 228 m., max. draft 10.0 m. at M.L.W.S.
Murco Petroleum Ltd.	2	730	37.0 (MLWS)	Motor spirit, distillates. Storage capacity: 52,000 tonnes motor spirit. 10,870 tonnes distillates. Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Unitank Storage Company Ltd.
Powell Duffryn Terminals Ltd.	7	840	10.5 m. (MLWS)	Hydrocarbon oils and all chemicals. Total storage capacity: 423,000 cu.m. Oil storage capacity: 365,000 cu.m. Chemical storage capacity: 58,000 cu.m. (50 cu.m. to 15,000 cu.m. capacity tanks). Max. LOA 238 m., max. displacement 45,000 tonnes.
Van Ommeran (West Thurrock)	3	750	34.0 (MLWS)	Hydrocarbon oils, chemicals, vegetable oils. Storage capacity: 352,000 cu.m. (134 tanks – 200 cu.m. to 10,500 cu.m. capacity). Max. LOA 228 m., max. draft 11.2 m. (LW). Max. size 40,000 d.w.t.
GATX	2	750	37.0 (MLWS)	High and low flash petroleum, some chemicals. Storage capacity: 310,000 cu.m. in 52 mild steel tanks (1,700 cu.m. – 20,800 cu.m. capacity). Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Murco Petroleum Ltd. Max. LOA 228 m., max. draft 11.2 m. (LW).
Shell (Shell Haven) "A"	1	Max. LOA 150 m.	† 9.5 m.	LPG vessels only. Max. size 5,000 cu.m. due to loading arm envelope. Berth kept clear if VLCC on Jetty B. 1×6 in. LPG line.
Shell (Shell Haven) "B"	1	Max. LOA 355.0 m.	†14.6 m.	VLCC's and large crude carriers berth head down river at slack HW. Berth handles crude, fuel and white oils. 4×10 in. and 4×8 in. (white oils and fuel oil). 4×10 in. and 4×16 in. (crude).
Shell (Shell Haven) "C"	1	Max. LOA 238.0 m.	†11.0 m.	Max. deadweight 40,000 tons. Berth handles black and white oils. Max. deadweight allowed if VLCC on Jetty B is 12,000 tons. 4×10 in. lines.
Shell (Shell Haven) "E"	1	Max. LOA 183.0 m.	†9.5 m.	Max. displacement 20,000 tons. Chemicals and luboil only handled. 5×6 in. lines.
Shell (Shell Haven) "G"	5	No LOA restriction	(outer) †8.0 m. (inner) †4.0 m.	Berths No. 3, 4 and 5 are for estuarial craft only, max. deadweight 1,000 tons. Berth No. 1 (outer) max. deadweight 3,500 tons. Berth No. 2 (outer) max. deadweight 10,000 tons. if vessel over 3,000 deadweight tons on Berth G2 then restricted size only on Berth G1. 6×8 in. lines at outer berths and 5×6 in. lines at inner berths.
Oikos Storage Ltd.	1	Max. LOA 580 ft.	Depth (subject to dredging) 40 ft. Max. draft 32 ft.	Products handled: Gasoline, gas oil, diesel, kerosine, jet fuel. Pumping rates into barges, 200 – 250 t.p.h. with max. pressure 100 p.s.i. Discharge rate 400 – 1,500 t.p.h.

Other Wharves: In addition to the above some manufacturing and service industries have their own riverside premises with ship berths. London Port Control Centre will assist with information. Otherwise contact Waterside Manufacturers and Associated Industries. Tel: (0171) 4813681.

*Bunkers available at all berths. Fresh water not available.

**Unless otherwise stated.

†All berths subject to siltation, and Marine Superintendents should be consulted for current depths.

‡Tank cleaning is permitted when back loading operations are to take place. Tank cleaning for other purposes may take place only after agreement from the Terminal.

Dirty ballast separator system allows a cumulative rate of 1,500 cu.m./hr. from all jetties. No waxy material, chemicals or chemical additive is accepted.

Vessels should arrive with minimum possible ballast commensurate with safe handling of vessel.

Shell – Shellhaven: *Cautionary Advice:* Shellhaven Terminal is situated on the concave side of a bend in the river and, as a consequence, the tide does not run parallel to the berths. There is a strong outflow of tide from behind Berth "A" and "B" (the VLCC berth) during the ebb.

When swinging off the terminal before berthing or (for smaller ships) on sailing, due allowance must be made for the run of the tide and a close watch kept on passing traffic. Before a VLCC is berthed on Berth B the adjacent Berths A and C should be vacant or occupied by small craft.

Berthing Pilots: All vessels of 160 m. or more in length or of 11,000 g.r.t. or more, whichever is less, bound for oil jetties in the Shellhaven area are required to employ the services of a Berthing Pilot. (Drawn from senior P.L.A. Pilots). The Berthing Pilot will normally board the vessel from one of the berthing tugs.

Berthing Procedures: Deep draft ships (over 12 m.) are swung before berthing and should, therefore, arrive off the berths on a flood tide. Other ships berth heading up or down river according to the tidal direction at the time of arrival (always head to tide).

Tugs are made fast off No. 7 Sea Reach Buoy. Ships are swung off the berth with due allowance for the set of the tide being made. Extreme care should be exercised in selecting the precise swinging position as the flood tide sets strongly onto "Mucking Flats".

During the swing all tugs are on the hook. For VLCCs there are 3 tugs from the forecastle head and 1 from the poop. When swinging, 2 forward tugs will let go and come alongside to push the ship onto the berth. The vessel should always land on the fenders parallel to the berth. 2 "boatmen" will board the ship in the vicinity of the berth to assist and liaise between ship's crew, the mooring boats and the jetty during mooring operations. Moorings are taken ashore by motor boats (one at each end of the vessel). Spring lines are normally taken first, followed by breast lines, then head and stern lines. Liaison between the Pilot/Berthing Master and the terminal in positioning the ship is not always good, and it is recommended that a ship's officer with portable VHF be stationed near the manifold to assist in positioning.

Moorings – Cautionary Advice. During Spring tides a surface current of up to 2 knots setting out from behind the berth can be experienced on the ebb tide. Large deep ships should be securely moored prior to the start of operations. Upstream moorings in particular, must be of good material and well positioned. Mixed moorings of wire and fibre are not recommended and the terminal recommends that fibre tails be removed from wire moorings. There are no shore moorings.

Mobil – Coryton: *Berthing Pilots:* All vessels of 11,500 g.r.t. and over, bound for jetties in the Coryton area are required to employ the services of a Berthing Pilot. (Drawn from senior P.L.A. Pilots). The Berthing Pilot will normally board the vessel from one of the berthing tugs.

Berthing Procedures: Regardless of draft, VLCCs must not enter the berth dredged box until 1 hour prior to HW.

Deep draft ships (over 12 m.) are swung before berthing and should, therefore, arrive off the berth on a flood tide. Other ships berth heading up or down river according to the tidal direction at time of arrival (always head to tide).

Tugs are made fast at No. 6 Sea Reach Buoy. Ships are swung off the berth with due allowance for set and tide being made.

During the swing all tugs are on the hook. For VLCCs there are 3 tugs from the forecastle head and 1 from the poop. When swung 2 forward tugs will let go and come alongside to push the ship onto the berth. Berth 4 (VLCC) is fitted with a Marconi Semi Mark II approach speed measuring device. Information from this equipment is supplied to the ship by means of VHF radio telephone. (The service will be offered to the vessel when radio contact is first made, and radios will be placed aboard the vessel prior to its arrival off the berth).

Maximum impact velocity is 25 ft. per minute for a maximum displacement of 230,000 tons at a maximum angle of 12°.

Mooring arrangements for Berth 4 are as follows:

4 mooring dolphins are provided to take the breast ropes and head ropes from vessels. The 4 mooring dolphins are of equal strength and are capable of taking a load of 150 tons. Each mooring dolphin is fitted with triple hook assemblies capable of taking a load of 50 tons on a single hook.

Mooring hook assemblies are also fitted to each of the 2 berthing dolphins and at either end of the jetty head. Each assembly comprises two hooks which are capable of taking a load of 50 tons on a single hook. These mooring arrangements are intended to take the spring lines of vessels and have been designed to be capable of taking a load of 100 tons acting either parallel to berth face or up to an angle of 20° from this line. Any significant load applied at an angle greater than 20° from the berthing line may cause severe damage to the jetty head.

Mooring diagrams will be available to each vessel from tugs or boatmen.

2 shore breasting wires are provided, and it is recommended that vessels should make use of these.

2 "boatmen" will board the ship in the vicinity of the berth to assist and liaise between the ship's crew, the mooring boats and the jetty during mooring operations. Moorings are taken ashore by motor boats (one at each end of the vessel).

Moorings: Cautionary Advice. Strong tidal flows, especially during Spring ebb tides which can generate tidal flows up to 4 knots, demand a diligent tendering of vessel's moorings at all times.

Esso – Purfleet: *Berthing:* A vessel should come up river on the flood tide so as to arrive off the berth about 2 hours before HW. Then turn to starboard and berth port side to the jetty head.

Moorings: At Berth No. 1 the first lines run are a head rope to the buoy and a spring to the jetty. When the vessel is secured, she should have 2 head/stern ropes to the buoys, 2 breast lines to shore, and 2 backsprings to the jetty head. For large vessels the eye of a 5 in. shore wire is taken aboard and put over a set of bitts located aft. This wire is tensioned from ashore.

For large vessels or in bad weather, additional heavy wire/combination backsprings may be available from shore.

The vessel must provide "emergency towing wires" on her offsho bow and quarter, with eyes maintained at water level.

Van Ommeran – West Thurrock: *Cautionary Advice:* Both main bert are of similar construction. Berth No. 2 (down-river) is subject to hea silting.

Berthing: Depending on the size of the ship and the weather, 2 or 3 tu usually accompany the vessel from Gravesend. They secure with t tug's towline on the hook when about 1 mile from the terminal. Whe sailing, 1 or 2 tugs are used depending on the flash point of the produ

Vessels berth head to tide and may secure either side to jetty. Thos with drafts not exceeding 25 ft. can berth at any stage of the tide. Dee draft vessels (34 ft.) usually berth about 1 hour before HW, during t last of the flood tide, and turn off the terminal and secure port side t the jetty.

Moorings: No particular pattern of mooring is specified. Vessels usua secure with 2 or 3 head and stern ropes, 1 or 2 breast ropes, and spring at each end. 2 mooring launches are in attendance while berthin The vessel must provide emergency towing on her offshore bow a quarter, with eyes placed at water level.

No shore moorings are available.

CRANES: See "Berthing".

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing".

BRIDGES: No bridges below Tower Bridge which opens for shipping request.

Queen Elizabeth II Bridge now open. Guaranteed headroom of 54 above M.H.W.S. is available between the white isophase lights on t main span. Vessels with an air draft in excess of 45 m. should conta the Harbour Master at the London Port Control Centre to arrange controlled passage.

STEVEDORES: Ordered by the Agents; no ETA to stevedores fro vessel necessary.

MEDICAL: Not necessary to contact Agents once port heal requirements satisfied unless urgent medical treatment required board on arrival. All medical treatment, vaccinations available.

DENSITY: Varies according to position and tides.

FRESH WATER: Available at all berths either from shore or barge.

FUEL: All types, grades available by barge, or from terminals.

FIRE PRECAUTIONS: Tankers – no smoking on open decks, o cabins. Deck fire hoses to be connected. Fire monitors to be trained manifold area. Explosive workings at Chapman Anchorage, sa precautions. Red flag to be flown by these vessels. Fire tug to be attendance when explosives being worked. Smoking not permitted the docks or berths.

CONSULS: All British Commonwealth countries are represented London by a High Commissioner's Office.

Most foreign countries maintain embassies or a consu representative in London.

REPAIRS: All repairs, gas freeing possible; pre-advice recommende

DRY DOCKS: Tilbury Dry Dock is closed. Nearest small dry docks in the Medway.

GANGWAY/DECK WATCHMEN: Available but not compuls Master's discretion.

OPENING/CLOSING HATCHES: Liner vessels by crew, with steve assistance. Tramp vessels according to charter party.

CERTIFICATES: These certificates to be on board.

Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction.
Oil Record Book.
Derat Exemption.
Previous U.K. Light Due Bills.
Cargo Gear and Chain Register complying to U.K. Factory Act
British Tonnage Certificate if available.

CUSTOMS ALLOWANCES: Customs usually permit 200 cigare 0.25 lb. tobacco per person on board for 4 days. They can ref issue duty free or amount allowed at their discretion. Usually 1.3 pints or 1 bottle spirits per person for 4 days. They can issu or refuse to allow as duty free at their discretion.

CARGO GEAR: To comply with Merchant Shipping Regulations chain and Cargo Gear Register to be on board. Stevedores supply cargo slings, etc.

BANKS: All British and most foreign banks represented in Lo British banks have branches in Thameside towns.

REPATRIATION: All facilities exist for changing crews, repatria

AIRPORTS: London Heathrow, London City Airport, Luton, Stansted and Gatwick Airports. Southend Airport serves domestic and Continental services.

TIME: British Summer Time which is 1 hour in advance of GMT. GMT during Winter months.

HOLIDAYS: *Public Holidays:* Work is available on official holidays if practical. New Year's Day, Good Friday; Easter Monday; May Day Monday; Spring Bank Holiday Monday; August Bank Holiday Monday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Contact by public telephone; dial 999 and ask for service needed.

EMERGENCY CO-ORDINATION CENTRE: See "London Port Control Centre" and "Notices".

TELEPHONES: Ship to shore connections available at most berths.

SERVICES: All types of service for navigational aids, radar, compass adjusting, nautical instruments repaired, slop discharge barges available. Tank-cleaning, gas-freeing services available.

GARBAGE DISPOSAL: Garbage collection services are provided by private contractors at most berths. Contact should be made through ship's Agent.

WASTE OIL DISPOSAL: Service available through private contractors, and at certain private berths. Contact should be made through ship's Agent.

SEAMAN'S CLUBS:

Queen Victoria Seaman's Rest. Tel: (0171) 9875466.
Anchor House, Canning Town. Tel: (0171) 4766062.
Stella Maris, Tilbury. Tel: (013752) 5641.
Merchant Navy Hotel, Lancaster Gate. Tel: (0171) 7238831.
All of the above offer accommodation.
Flying Angel, Tilbury. Tel: (013752) 2080.
Flying Angel, Gravesend. Tel: (01474) 363383.
Norwegian Seamen's Mission. Tel: (0171) 2375587.
Swedish Seamen's Mission. Tel: (0171) 2371644.
Finnish Seamen's Mission. Tel: (0171) 2374668.
British International Sailor's Society. Tel: (01474) 537875.
German Seaman's Mission. Tel: (01375) 378295.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Seamen's Identity Book required to be retained on board in port.

REGULATIONS: No livestock allowed ashore without permission Customs and Port Health Authorities. Rabies regulations enforced.

NOTICES: *Emergency Procedures for Vessels on The River Thames:* Report immediately by the quickest means available to either London Port Control Centre on VHF radio, "Port Control London", VHF Channels 12 or 13; Woolwich Radio, VHF Channel 14, or public telephone Tel: 999.

For vessels in Tilbury Dock – Contact "Tilbury Control" on VHF Channel 4.

Message: Vessel's name and present position together with details of emergency and assistance required.

Collision, Fire or Other Accident: If involved in or sighting a collision or accident report as above.

Human Injury or Man Overboard: In event of serious personal injury or recovery of a person from the river when vessel's crew require additional assistance report as above.

Machinery or Steering Failure: In event of machinery or steering failure report as above.

If necessary to anchor then endeavour to anchor clear of the fairway if size and draft permit.

Details of Port of London Authority Combined Accident Procedure Applicable to Vessels (POLACAP): In event of a major accident, the London Port Control Centre will broadcast on appropriate VHF Channels an outline of the accident, including in the message:

Word	*Meaning*
"POLACAP"	Serious accident as specified has occurred – Combined Accident Procedure is in force.

Action by Vessels on Receipt of POLACAP Message: Maintain current communications watch, keeping requests for information to MINIMUM. If in vicinity of accident be prepared for traffic regulation, which, if required, will be operated by PLA Harbour Master's Launches.

If directly involved in or assisting with the accident, switch to VHF Channel 16 for inter-ship/craft communications, and report to London Port Control Centre.

On scene control will be exercised from the forward control craft using call sign POLACHIEF. This craft will identify itself by a blue rotating light and in addition by day will hoist a red ball at the masthead.

When Combined Accident Procedure is no longer in force, London Port Control Centre will pass:

Words	*Meaning*
"CANCEL POLACAP"	Combative measures to deal with the major accident are completed and no further action required.

Merchant Shipping (Tanker) Regulations 1981 and (Amendment) Regulations 1982 (EEC Requirements):

In compliance with the above regulations: (Statutory Instruments 1981, No. 1077 and 1982 No. 1637). The Master of any tanker of 1,600 g.r.t. or over which is:

(a) Carrying a cargo of chemicals, gas or oil in bulk; or
(b) Non gas free from any of these cargoes shall:

Section I: Make a report to the Harbour Master by telex (Telex No. 262880) or via G.P.O. Coast Station before entering or navigating within the limits of the Port of London which shall provide the following information in the order listed:

(a) Tanker's name and call sign.
(b) Country where registered.
(c) Length, beam and arrival draft.
(d) Destination and ETA.
(e) Tankers bound for the Medway, ETA at Medway Buoy.
(f) Nature and type of cargo (together with Flash Point if known).
(g) Is an inert gas system fitted?
(h) If an inert gas system is fitted, is it fully operational?
(i) Do any of the cargo tanks have an atmosphere which has been rendered non-flammable?
(j) If the tanker has a cargo of chemicals or gas has it been issued with a certificate stating that it complies with:
  (i) IMO Code for Ships carrying dangerous chemicals.
  (ii) IMO Code for Existing Ships carrying Liquefied Gas.
  (iii) IMO Code for Ships carrying Liquefied Gas.
(k) Does the tanker have any hull, machinery or equipment defects which may materially affect:
  (i) Its safe manoeuvrability.
  (ii) The safety of other vessels.
or constitute a hazard to:
  (iii) The marine environment.
  (iv) Persons or property.

If the answer is 'Yes' to any of the 4 questions contained in (k), then details of the problem must also be provided.

If the Master fails to make a report or knowingly provides false information to the Port Authority or to a Pilot when boarding his ship he shall be guilty of an offence and liable on summary conviction to a fine not exceeding £1,000 or on conviction on indictment a fine.

If any Pilot boarding a ship to pilot it in or out of the port believes there are defects as described in sub-section (k) which have not been reported to the Port Authority he shall inform the Master of those defects and if the Master then fails to inform the Port Authority the Pilot shall forthwith give such information to the Authority himself.

Section II: Make a Check List available to the Pilot when he boards the vessel and make a copy of the same Check List available to the Harbour Master (if necessary through the vessel's agents).

If the Master fails to make a Check List available the Pilot shall forthwith notify the Harbour Master.

If the Master knowingly makes a Check List available which is materially false he shall be guilty of an offence and liable on summary conviction to a fine not exceeding £1,000 or on conviction on indictment a fine.

Inert Gas Systems and Crude Oil Washing (COW): (Reference Statutory Instruments No. 541, 544 and 687 of 1980).

The attention of tanker Masters are drawn to the following conditions, which must be observed whenever crude oil washing of tanks is to be undertaken in the Port of London.

1. *Notification*

(a) At least 24 hours prior notification of the intention to COW is to be given to the Harbour Master (through the London Port Control Centre) together with written assurance that all systems have been checked and found satisfactory in accordance with the ship's COW Manual and IMO requirements.

(b) One hour before the actual commencement of COW, a further advice must be given to the Harbour Master (through the London Port Control Centre) that COW is about to commence and that all systems are fully operational.

2. *Terminal Approval*

No vessel is to undertake COW without the approval of the Terminal Management and having complied with IMO COW requirements applicable to that ship.

3. *Failure of Systems*

Following the failure of the inert gas system to supply either the correct quality or quantity of inert gas, or a failure of any other part of a COW system, all cargo discharge, de-ballasting and tank cleaning must cease forthwith, and the Authority is to be immediately advised. Operations are NOT to be resumed until after consultation has taken place and agreement reached between the Authority, the Terminal Management and the ship's Master.

4. *Tanker Drafts*

No tanker crude oil washing is to be accepted at any berth where the vessel cannot safely be afloat at any state of the tide.

Notice:

Dangerous Substances in Harbour Areas Regulations 1987

1. INTRODUCTION

The Dangerous Substances in Harbour Areas Regulations 1987 ("DSHA Regulations") came into force on 1st June 1987. They apply in every harbour and harbour area in Great Britain, including therefore the Port of London. (Attention is also drawn to the Port of London Dangerous Substances in Bulk Byelaws 1991.).

2. MEANING OF "DANGEROUS SUBSTANCE"

The term "dangerous substance" is defined in Regulation 3 of DHSA Regulations. For a full understanding of the term, reference should be made to that definition. Essentially, however, it means any substance which by reason of its characteristic properties creates a risk to the health or safety of any person when the substance is in a harbour or harbour area. It includes any substance or article which is within the definition of "dangerous goods" in Regulation 1 (2) of the Merchant Shipping (Dangerous Goods) Regulations 1981.

3. NOTICE OF ENTRY

Regulation 6 requires that a dangerous substance shall not be brought into a harbour or harbour area, unless *notice* containing the required particulars has first been given. The notice must be of *not less than 24 hours* unless –

(a) the Harbour Master requires a *longer* time (up to 14 days) for operational reasons; or
(b) a *shorter* time is agreed, if it is not reasonably practicable to give 24 hours' notice.

A. *Entry by Vessel – Notice by Master or Agent*

A.1 *Persons to be notified*

If a dangerous substance is intended to be brought in by a vessel, the notice must be given by the Master or Agent to –

(a) the PLA's Harbour Master at the address mentioned below (*Note* – the requirement applies even if the vessel is in transit to or from the Medway); *and*

(b) the berth operator (*Note* – if the berth is at the Port of Tilbury, notice must be given to the Tilbury Harbour Master and the Berth Superintendent on Fax: (01375) 852354).

A.2 *Form*

The PLA's Harbour Master and the berth operator must be *in receipt* of the notice *before* the specified time. Notices should therefore preferably be sent by *telex* or *facsimile*.

The notice to the Harbour Master should be sent to –

The Harbour Master, Port Control London, Royal Pier Road,
Gravesend, Kent DA12 2BG
Telex: 262880. Fax: Group 3 – (01474) 352996.

A.3 *Contents*

The notice must contain such information as is *adequate to evaluate the risk* created by the substance and –

(a) Name of vessel, and PLA voyage reference number (if allocated).

(b) Berth to be used.

(c) Whether substance is to be discharged or remain on board in transit.

(d) Product name
IMO class
UN number
IMDG Code page number
Weight in tonnes or kilos.

(e) Mode of carriage: i.e. bulk, containers, Ro/Ro trailer or general.

(f) If in bulk –
  (i) whether petroleum or chemical, and
  (ii) Flash Point (FP) closed cup (if only an open cup FP can be given, this fact should be stated).

(g) Whether vessel has current certificate of fitness (if recommended by IMO).

(h) If an oil tanker, whether vessel has valid cargo-ship Safety Construction and Safety Equipment Certificates (if required under a SOLAS convention).

B. *Entry by Road or Rail – Notice by Transport Operator and Ship's Agent.*

B.1 *Transport Operator*

If a dangerous substance is intended to be brought in by road or rail, the notice must be given by the transport operator.

The notice must be given to the Harbour Master and Berth Operator and must contain such information as is *adequate to evaluate the risk* created by the substance and –

(a) Name of the transport operator.

(b) Berth to which substance is to be sent.

(c) Name of vessel for which intended (if known), with date and estimated time of departure.

(d) Product name
IMO class
UN number
IMDG Code page number
Weight in tonnes or kilos.

(e) Method of packaging.

Note: In the case of Port of Tilbury, notify Tilbury Harbour Master.

B.2 *Ship's Agent*

Information about the loading and estimated time of departure of the vessel (as required at (c) above) is important but may not be readily available to the transport operator. Also, the PLA's Harbour Master needs to have the information in a *form* which related mainly to the vessels on which the substances are to be carried. The information given by transport operators under the DSHA Regulations will not normally be in this form, but information in this form has hitherto been given by ship's agents in accordance with Merchant Shipping (Tankers) Regulations 1981 and Amendment Regulation 1982 (E.E.C. Requirements).

Ship's agents should therefore *continue* to give notice to the PLA's Harbour Master at least *24 hours before* a dangerous substance is *loaded* on to a vessel *anywhere* in the Port of London. The notice should be given in the manner stated at A.2 above and should contain the information stated at A.3 above (except for item (c)).

4. TILBURY DOCKS

Dangerous goods intended for loading or discharge in the Tilbury Docks continue to be subject to the PLA's published Schedule of Dangerous Goods. Attention is particularly drawn to the terms and conditions for explosives (class 1) and radio-active substances (class 7).

In addition to notification under the DSHA Regulations, some descriptions of dangerous substances (designated in the Schedule as Group 3, require the *prior approval* of the Port of Tilbury Harbour Master before entering the docks. Application should be made to the Harbour Master, Port of Tilbury London Ltd., Tilbury Freeport, Tilbury, Essex RM18 7EH. Tel: (01375) 852456. Telex: 995441. Fax: (01375) 852354.

5. FURTHER REQUIREMENTS OF DSHA REGULATIONS

It is impracticable to set out all the provisions of the DSHA Regulations in this notice, but particular attention is drawn to the following:

5.1 Movement of Vessels

(a) Regulation 7 confers on the Harbour Master powers of prohibition, removal and regulation relating to dangerous substances.

(b) Regulation 10 requires that a vessel shall not be placed alongside another vessel carrying Schedule 3 dangerous substance without the permission of the Master of the other vessel and of –
  (i) the berth operator, or
  (ii) the Harbour Master (if the vessel is not at berth).

(c) Regulation 14 requires the Master of a vessel carrying dangerous substance to anchor or moor his vessel only whe directed by the Harbour Master.

(d) Regulation 15 requires that the Master of a vessel (other tha dumb barge) carrying a Schedule 3 dangerous substance sh ensure that the vessel is in a state of readiness to be moved any time (tidal conditions permitting).

5.2 *Permission for Certain Operations*

(a) Regulation 20 requires the Master of a vessel to obtain t Harbour Master's written permission before transferring dangerous substance by pipeline to another vessel.

(b) Regulation 22 requires the Master of a vessel carrying or whi has carried dangerous substance in bulk to obtain the Harbo Master's permission before discharging slops or ballast, pump bilges, gas-freeing or purging tanks and before crude oil washi a cargo tank.

5.3 *Marking of Vessels*

(a) A vessel carrying a Schedule 3 dangerous substance must car the lights or flags required by Regulation 8.

(b) A barge carrying one or more dangerous substances in t quantities stated in Regulation 11 (1) must display the haza warning panels required thereby (or those panels and the labe required by regulations 11 (2)).

6. OTHER PROVISIONS

Attention is drawn to the following:

Port of London River Byelaws 1978

No. 6 – Escape of dangerous substance – vessel not to proce above No. 1 Sea Reach Buoy except with permission Harbour Master.

No. 7(f)– Spillage of liquid in bulk to be forthwith notified to Harbo Master.

AUTHORITY: Port of London Authority, London River House, Royal P Road, Gravesend, Kent DA12 2BG. *Tel:* (01474) 562267, (0147 262880. *Telex:* 995553. *FAX:* (01474) 562277. *Contact:* D.J. Jeffe Chief Executive. Rear Admiral Bruce Richardson, Chief Harbour Mast

LONDONDERRY (incl. Moville): 55.02 N. 07.16 W.

(See Pla

The main port of Londonderry is now situated at Lisahally, about 17 mi from the sea, at the confluence of the River Foyle with Lough Foyle

PORT LIMITS: Extend from Craigavon Bridge to a line drawn fr Greencastle Fort in Co. Donegal to the Tower on Magilligan Poin Co. Londonderry.

DOCUMENTS: For Londonderry see "Belfast". For "Moville" s "Dublin".

Since the Port of Londonderry falls within the Republic of Ireland a the United Kingdom, both Governments are concerned in regar Customs documents. Moville, which is situated down river fr Londonderry, is located in the Republic of Ireland and is the anchor where deep-sea vessels lie prior to proceeding to Londonderry. Sho vessels discharge cargo or load cargo at this anchorage, Irish docume are required. The port is under the control of the Londonderry Port a Harbour Commissioners who are recognised by both Governments

PILOTAGE: The Londonderry Port and Harbour Commissioners are Pilotage Authority for the Londonderry Pilotage District. For informa regarding pilotage application should be made to The Secretary, Har Office, Londonderry, Northern Ireland. Tel: (01504) 860555.

Pilotage is compulsory, vessels normally taking the Pilot Carrickarory Pier, Moville. A Pilot may be taken at the Fairway buo special arrangement.

The Pilot station is located at Carrickarory Pier, Moville, in pos Lat. 55°10'57" N., Long. 07°03'27" W.

Deep-draft vessels usually take Pilot 2 hours before HW t Londonderry, so as to arrive at Londonderry on the top of HW.

Pilotage service may be obtained in response to following signal

Inward-bound vessels: By day. 1. The International Code Signa 2. The International Code Signal P.T.; 3. The Pilot Jack hoisted a fore. If required after hours telephone Harbour Radio (Tel: (01 860313).

By night. Pilot Station unattended at night. Vessels should co harbour radio on VHF Channel 14 or Tel: (01504) 860313.

By day or night. 1. By VHF (FM) Channel 14 to the Pilot Stat Carrickarory Pier. 2. By VHF (FM) Channel 14 to the pilot launch "F Leader." 3. After hours and weekends VHF (FM) Channel 14 to Har Radio.

In poor visibility. By sounding the letter G in Morse Code o steam whistle or siren.

As visibility to seaward from Carrickarory Pier is restricted important that Owners, Masters or Agents notify the Berthing M (Tel: (01504) 861113) or outside Office hours Harbour (Tel: (01504) 860313) of the name of vessel; estimated time of a at the Pilot Station; draft of water of the vessel. It is also importa VHF (FM) communication be established with Pilot Station, pilot la "Foyle Leader", or Harbour Radio as early as possible before ar Lough Foyle. Call signs, frequencies and procedure are as follow

VHF (FM) Communications:

1. Pilot Station at Carrickarory Pier, Moville: Call sign "Foyle Equipment VHF (FM) R/T single frequency working. A con listening watch is kept during office hours on Channel 14 (156.70 except when pilot launch is operating, when watch is transferred launch.

2. **Harbour Radio:** A continuous listening watch is kept on Channel 14 (156.70 MHz) outside of office hours.

3. **Pilot launch:** Name of vessel "Foyle Leader". Equipment VHF (FM) R/T single frequency working. When launch is operating a listening watch is kept on Channel 14 (156.70 MHz).

4. **Harbour Office, Londonderry:** Call sign "Harbour Office". Equipment VHF (FM) R/T single frequency working. All vessels fitted with VHF (FM) R/T while navigating in the river or at anchor in Moville Bay should keep a listening watch on Channel 14 (156.70 MHz).

Messages must be restricted to those related to the movement of vessels and safety of vessels and persons. Messages of any other nature and messages of a personal character cannot be accepted.

A continuous listening watch is kept on Channel 16 (156.80 MHz) which is only to be used in circumstances involving distress and safety.

Outward-bound vessels and vessels shifting:

When the services of a Pilot are required for an outward-bound vessel or for shifting a vessel, 3 hours' notification should be given to the Berthing Master (Tel: (01504) 861113) during office hours, of name of vessel; time of departure; draft of water of vessel; where bound. Early notification should be given to enable Pilot to board vessel in good time.

ANCHORAGES: The only anchorage at Londonderry is located at Moville.

RESTRICTIONS: See "Max. Size".

MAX. SIZE: For vessels using main port of Londonderry, overall length 190 m., beam 26 m. and draft 9.3 m. H.W.O.S.T.

Due to overhead power cables at Culmore Point, height clearance 39 m. H.W.O.S.T.

For vessels using N.I.E.S. Oil Jetty, Coolkeeragh, Londonderry, overall length 190 m., draft (salt water) 7.2 m.

HEALTH: Pratique is automatic except in the case where the Master suspects one of the dangerous diseases on board when he should notify the Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: Malin Head Radio Station, Republic of Ireland, covers W/T and R/T transmissions and Portpatrick Radio Station, Scotland, covers R/T transmissions.

TUGS: One tug is available which is owned by the Londonderry Port and Harbour Commissioners. Tugs lines normally used.

BERTHING: Vessels of deep draft or large dimensions can only berth at Londonderry to arrive on top of high water. Decisions in this matter are taken by the Pilots in conjunction with the Harbour Master.

A total of 365 m. of ferro-concrete wharf is available. All berths dredged to 10.0 m. LWOST

CRANES: 1×45 tonne mobile grab crane, 1×40 tonne mobile grab crane with automatic container spreader, 2×10 ton mobile grab cranes, 1×4 ton mobile grab crane and 1×4 ton mobile hook crane.

STEVEDORES: ETA advices should be given before 1600 hrs. on weekdays to arrange work for the next morning and before 1100 hrs. on Saturday to arrange work for Monday morning.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

TANKERS: No slop facilities available. Deep-sea tankers discharge heavy fuel oil for electricity power station at N.I.E.S. Jetty, depth 7.4 m., Coolkeeragh, diameter of pipes 8 in. Crew are required to connect and disconnect hoses under port conditions.

Shell Oil: Max. LOA 120 m. Depth 6.0 m.

Du Pont: Depth 7.8 m.

DENSITY: Water at Londonderry is brackish and average density 1005 to 1018.

FRESH WATER: Available at all berths direct from shore lines.

FUEL: Gas-oil and light marine diesel available by road tankers and from Shell Jetty at Pennyburn. Shell Mex and B.P. can supply light, medium and heavy fuel oil by road tanker.

CONSULS: Nearest at Belfast.

REPAIRS: Deck and engine repairs are carried out by a local engineering works. No major repairs available.

GANGWAY/DECK WATCHMEN: Can be covered by crew; shore watchmen available if required.

OPENING/CLOSING HATCHES: This is required to be carried out by ship's crew under local port labour conditions.

CARGO GEAR: Ship's winches and derricks should be in good working order and have DTI Certificates or equivalent. Cluster lighting is required for night work.

REPATRIATION: Can be arranged by ship's Agent on request.

AIRPORT: Eglington Airport 9 miles from city centre. Aldergrove International Airport (Belfast) 60 miles from Londonderry.

HOLIDAYS: Port Holidays at Londonderry are: New Year's Day; St. Patricks Day (17th March); Easter Monday; Easter Tuesday; First Monday in May; Last Monday in May; 12th July; 1st Monday and Tuesday in August; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required, or Police 265161; Ambulance 45171; Fire 264321.

TELEPHONES: No telephones available for connecting on board.

SERVICES: Compass adjusters available from Glasgow.

Charts and publications available from Class 'A' Admiralty Chart Agent, Todd Chart Agency Ltd., 4 Seacliff Road, Bangor, County Down BT20 5EY. Tel: (01247) 466640. Fax: (01247) 471070.

IDENTIFICATION CARDS: Not obligatory but should be carried.

GARBAGE DISPOSAL: Collection or skip provided on request.

WASTE OIL DISPOSAL: Service available using sub-contractor's road tanker. Contact Capitol Oils, Ballynahinch (Tel: (01238) 561574. Fax: (01238) 561576). 48 hours notice required.

SEAMAN'S CLUBS: Non-residential Missions to Seamen at main gate.

CURRENCY: U.K.Pound (U.K.£).

REGULATIONS: Copies of Port Bye-Laws may be obtained through Agent.

GENERAL:

Charts: B.A. 2798, 2499.

Pilot Books: NP40 Irish Coast Pilot.

Lights: Admiralty List of Lights, Volume A (NP74).

AUTHORITY: Londonderry Port and Harbour Commissioners, Harbour Office, Port Road, Lisahally, Londonderry BT47 1FL, Northern Ireland. *Tel:* (01504) 860555. *FAX:* (01504) 861168. *Contact:* S.J. McIlvenny, Chief Executive. G.S. Wilson, Secretary.

LOWESTOFT: 52.29 N. 01.45 E. **(See Plan)**

DOCUMENTS:

Crew List (at least 2 copies).
Passenger List (at least 2 copies).
Manifest (at least 3 copies).
Customs & Health Documents (normal U.K. regulations).
Ship's Papers (to be presented to Customs and Port Authorities).

PILOTAGE: Pilots on standby at all times. Pilot launch fitted with VHF and maintains listening watch on Channel 14. Pilots can also be ordered by R/T via Humber and Northforeland Radio, hence by phone.

Pilot's telephone No. 560277, or at the Lowestoft Harbour Masters Office, Tel: 572286 (this number manned 24 hours). Pilot boat, black hull, orange upper work with "Pilot" painted on each side. Light and sound signals as laid down in the International Code of Signals.

Pilot boards vessel at West Holm Buoy or East Barnard Buoy. Vessel should not approach harbour closer than these limits when awaiting Pilot.

ANCHORAGES: Pilotage anchorage North of a line joining West Holm Buoy and Lowestoft Lighthouse.

RESTRICTIONS: No specific restrictions provided the height of tide is sufficient for draft of vessel. Large vessels normally enter on slack tide due to cross currents at entrance.

There are regulations governing the passage of vessels through the harbour entrance. Masters of vessels shall observe the Harbour Control Light (See Local Notice to Mariners No. 4 of 1992 (below)).

A green occulting light is shown on the North Pier Head and a red occulting light on the South Pier Head, from sunset to sunrise.

Several Inner Pier lights will be clearly visible from a vessel upon entering the harbour and some will also be visible from certain directions before entry.

A "horn" signal is fixed on the South Pier Head for use in foggy weather. 4 blasts of 2 seconds each will be given every minute.

Local Notice to Mariners No. 4/1992:

International Port Traffic Signals – Lowestoft

All Mariners using the Port of Lowestoft are advised that International Port Traffic Signals (No. 2 and No. 5) have been installed on the South Pier as an up-graded replacement for the white flashing traffic signal.

The new signals are sectored in favour of all marine traffic and are designed to convey the following messages:

Three vertical red lights	– Vessels shall not proceed.
Green, white, green vertical lights	– A vessel may proceed only when it has received specific orders to do so.

In the interests of marine safety, all vessels must observe these international port signals and navigate with the understanding that the Port Control, and departing vessels in the Outer Harbour, have extremely limited vision to the North of the entrance piers.

Note: Whilst accurate VHF communication by arriving and departing vessels is essential, small craft without VHF may consider the green, white, green signal in favour of *proceeding with extreme caution and navigational courtesy.*

Signed: Dock and Harbour Master.
14th December 1992.

MAX. SIZE: Max. length approx. 410 ft. Draft up to 20 ft. MHWS. (Check with Port Authority for current situation.)

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: A number of tugs are available; tug's lines normally used.

BERTHING: *Outer Harbour* (comprising Hamilton and Waveney Docks and Trawl and Yacht Basins). Used largely for fish traffic, liquid bulks and offshore module construction.

Width at entrance	144 ft.
Depth at entrance	23 ft. MHWS
Water area	40 acres
Length of quays	4,500 ft.
Depth of water at quays	18 ft. MHWS 12 ft. MLWS

Inner Harbour. Used for general cargo and grain traffic.

Width of bridge	74 ft.
Water area	70 acres
Length of quay	6,800 ft.
Depth of water at quays up to	23 ft. MHWS 17 ft. MLWS

CRANES: 1×35 tonne crane and 1×32 tonne container crane. Mobile cranes also available.

CARGO HANDLING FACILITIES: *Grain:* Silo with a capacity of 8,500 tonnes. Loading rate up to 300 tonnes/hr. and discharging rate up to 200 tonnes/hr.

Cement: Silos with a capacity of 3,600 tonnes.

Containers: Purpose built container terminal is equipped with a 32 tonne container crane and 2 park-gantry cranes.

Transit Sheds: 4 sheds with total area of 8,500 sq.m.

Open storage also available.

STEVEDORES: Shipping Agent should be advised of ETA, etc., to enable gangs to be available. Working hours: As required.

MEDICAL: Advance notice desirable of medical attention required on arrival. Hospital facilities available in the district.
FRESH WATER: Can be supplied at various points on quays from hydrants.
FUEL: Marine diesel available from road tankers or bunker berth located in outer harbour.
FIRE PRECAUTIONS: Local fire services available in an emergency. Special arrangements can be made for taking fire-fighting equipment to sea. Normal harbour fire-prevention regulations apply to all berths.

CONSULS:		
Netherlands	Tel: Lowestoft	572301
Norway	" "	"

REPAIRS: All types of deck and engine repairs are possible in the port.
DRY DOCKS: One dry dock. Length 248 ft. Width at entrance 48 ft. Depth of water on sill 14.5 ft. MHWS.
OPENING/CLOSING HATCHES: Carried out by crew.
AIRPORTS: Nearest international airport served by regular airlines is London (Heathrow). Smaller airport at Norwich (27 miles) served by regular airlines (Frequent flights to Amsterdam).
POLICE/AMBULANCE/FIRE: In an emergency dial 999 and ask for service required. For normal enquiries: Police 562121; Ambulance 572572; Fire 561700.
GARBAGE DISPOSAL: Skips are available by private arrangement or on request to Port Authority. Normal commercial rates.
WASTE OIL DISPOSAL: Service available by tanker trucks. Contact Caird Environmental (Oil) (Tel: (01493) 857264, mobile pager: 03991133-788088) or S&L Waste Oil Collection (Tel: (01493) 4420561). Tank cleaning: S&L Waste Oil Collection (Tel: (01493) 4420561).

MANCHESTER: 53.29 N. 02.14 W. **(See Pla**

GENERAL: The Port of Manchester includes the whole of Manchester Ship Canal and Queen Elizabeth II Dock. The Cana approximately 36 miles long from its entrance at Eastham on R Mersey to the Manchester Docks.
DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
In addition, Manifests and Bills of Lading are usually sent to Agent from loading port.
PILOTAGE: Compulsory. Orders for Pilots may be lodged wi Harbour Master's Office at Eastham (Tel. (0151) 3271242/4). As notice as possible should be given, particularly in the case of in bound vessels due to arrive at Eastham. Helmsmen can be obtai same manner.
RESTRICTIONS: Eastham Locks. The main entrance to the Cana Eastham where there are two locks side by side, one 600 ft. by and the other 350 ft. by 50 ft. The outer or lower sill of each l 11.36 ft. below Chart Datum (1975). The levels of upper sills of the and 50 ft. locks are 32 ft. and 29 ft. respectively below statutory level in Canal.

Both locks are operated for incoming and outgoing vessels of s draft during a period of 8 hours on each tide, i.e. from 4 hours high water to 4 hours after high water.

The size of vessel which can navigate the Canal is governed dimensions of locks, the height of fixed bridges and limitations draft of vessel.

Maximum length: The greatest length measured be perpendiculars drawn at the foreside of the foremost extremity the afterside of the aftermost extremity of the hull or any attac to the hull shall not exceed 560 ft. The acceptance of ships pro above Ince with overall length greater than 530 ft. is subject to a of the Harbour Master.

The length measured between perpendiculars drawn at the foreside of the stern and at the afterside of the rudder post, or through centre of the rudder stock if there is no rudder post, on the Summer load waterline shall not exceed 535 ft.

The length measured between perpendiculars drawn at the afterside of the rudder plate and at the foreside of the foremost extremity of any part of the hull which is below a horizontal line drawn through the top of the rudder plate shall not exceed 544 ft.

Maximum beam: Vessels not proceeding beyond Ince Oil Berth: 72 ft. overall. Vessels proceeding beyond Ince Oil Berth: 63 ft. 6 in. overall.

Provided the height of masts and/or funnels or other structures is not more than 70 ft. 9 in. from water-line, vessels can pass under all fixed bridges under normal conditions. As, however, the headroom is less during periods of high-water levels, a vessel, in order to avoid possible detention, should reduce masts and funnels or other structures to 70 ft. above the water-line. The restriction as regards height does not apply to vessels proceeding only as far as Runcorn Bridge.

Facilities are available at Eastham for removing and replacing tops of masts and funnels.

MAX. SIZE: When vessels are loading inwards for the Canal, Masters should take these facts into their calculations and have regard to the following limitations, all of which are expressed as maximum draft in fresh water:

Vessels inward bound to a berth	*Arrival draft (in fresh water) at Eastham not to be such as would exceed:*
Between Eastham Locks and Ince Oil Berth	8.78 m.
Between Ince Oil Berth and Runcorn Lay-by (Other than Runcorn Docks)	8.07 m.
Between Runcorn Lay-by and Mode Wheel Locks	7.31 m.
In the Manchester Docks upstream of the Inner Gates of Mode Wheel Locks and downstream of the Railway Swingbridge.	5.48 m.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first U.K. port.

RADIO: FM VHF R/T equipment is installed at Eastham, Stanlow, Latchford, Irlam, Barton and Mode Wheel Locks as an aid to navigation on the Canal.

Ships which are equipped with the appropriate R/T channels are requested to establish contact with the nearest shore station before leaving a berth or lock within the harbour and thereafter to maintain a continuous listening watch on Channel 14.

Station	*Call sign*	*Channel*	
Eastham Locks	Eastham Locks	7	Docking instructions: When approaching Eastham Locks from seaward.
Eastham Locks	Eastham	14	Port operations: Vessels moving within the harbour should maintain a listening watch on Channel 14. After contact has been established the shore station will request the ship to switch to the appropriate speech Channel. Irlam, Barton and Mode Wheel Locks are for emergency use only.
Stanlow Oil Docks	Stanlow	14 20	
Latchford Locks	Latchford Locks	14 20

Weston Point Docks: Near Runcorn, 11 miles from canal entrance at Eastham. 10-12 berths for vessels up to 2,500 tonnes. Fixed, portal and mobile cranes for handling bulk cargoes.

CARGO HANDLING FACILITIES: Heavy duty floating crane with capacity up to 120 tonnes. Roll-on/Roll-off berth with strengthening to take loads of 300 tonnes.

STEVEDORES: The stevedores require to sight a certificate covering inspection and S.W.L. of slings used in pre-slung cargoes.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

TANKERS: *Queen Elizabeth II Dock:* This dock is adjacent to the locks at Eastham which give access to the Canal, and is approached from River Mersey through its own entrance lock. This lock is 807 ft. long by 100 ft. wide. The level of outer sill is 18.36 ft. below Chart Datum (1975). The dock covers an area of 19 acres in the form of a square and has four berths designed to accommodate large tankers, the dimensions of berths being as follows:

Berth No. 1	800 ft.	Berth No. 3	900 ft.
Berth No. 2	725 ft.	Berth No. 4	730 ft.

The dock is directly connected to oil installations by pipelines.

Stanlow Oil Docks: No. 1 & 2 (5 berths) 4.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Ince Oil Berth: 5.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Ince Coaster Berth: Max. length 350 ft., beam 53 ft., draft approx. 21 ft. dependent on current survey.

Barton: 32 miles above Eastham Lock. Length 508 ft., draft 24 ft., beam 63 ft. 6 in. Max. height above water-line 70 ft.

DENSITY: The water in lower section of the Canal between Eastham Locks and Latchford Locks is brackish. In all sections above Latchford Locks the water is fresh.

FRESH WATER: Available.

FUEL: Oil bunkers may be taken by arrangement with oil companies either from craft alongside or at various oil berths along the Canal.

PILOTAGE: *Pilotage to and from the Medway:*

Pilotage for vessels bound to or from the River Medway is compulsory for vessels 50 m. and over in length, and for vessels 80 m. and over in length seaward of the Medway Buoy. The Medway Pilots are stationed at Medway Navigation Service, Garrison Point, Sheerness, and operate a 24 hour service, 365 days a year. The compulsory area extends to Rochester, and includes The Swale, but 'mud' pilots are available, by arrangement, above Rochester and for creek wharves. The recognised seaward Boarding and Landing Station is in the vicinity of N.E. Spit Buoy, served by launches at Ramsgate.

Pilotage Exemption Certificates are available to certain regular traders, by application on the prescribed form.

VHF/RADAR: Medway Navigation Service (Medway Ports) is situated at Garrison Point, Sheerness. Tel: Sheerness 663025. Telex: 96435 (Call sign "Medway Radio"). Fax: (01795) 666596. Fitted with VHF, Channels 16, 74, 73, 9, 11 and 22. The station has radar service surveillance of Inner Estuary, Sea Reach, Medway Approach Channel and Lower Reaches of River Medway.

REGULATIONS: All vessels required to proceed in accordance with instructions of Port Authority. Vessels are requested to advise Medway Ports – Medway Navigation Service (Call sign "Medway Radio") VHF Channels 16 and 74 of ETA, shifting of sailing movements.

Prior notification to Medway Ports is required, detailing the carriage of all explosives and "dangerous goods".

GENERAL:

Tidal Information:

Tidal streams in the River Medway vary between about 2.5 knots at Springs and 1.5 knots at Neap Tides, although velocities vary considerably from Reach to Reach, the areas of maximum encountered velocities are: off Garrison Point Sheerness and through Rochester Bridge.

Average Tidal Heights are as follows: (metres)

Sheerness	5.8 MHWS	4.7 MHWN
Chatham	6.1 MHWS	4.8 MHWN
Rochester	6.0 MHWS	4.9 MHWN

High Waters occur approximately:

Margate	45 minutes	before Sheerness
Herne Bay	20 minutes	before Sheerness
Whitstable	10 minutes	before Sheerness
Rochester	9 minutes	after Chatham
Wouldham	20 minutes	after Chatham
New Hythe	25 minutes	after Chatham
Allington Lock	41 minutes	after Chatham

Tide Tables may be obtained at the offices of Medway Ports.

(B) SHEERNESS: 51.27 N. 00.44 E. (See Plan)

Situated on Isle of Sheppey at junctions of Thames and Medway Rivers.

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: For vessels entering River Medway up to 107 m. length, Little Nore Anchorage, Sheerness. Over 107 m. length – as directed by Medway Navigation Service (Medway Radio) or Thames Navigation to Great Nore, Sea Reach or Warps.

RESTRICTIONS: Subject to tidal conditions and under keel clearance appropriate size of vessel. Minimum depth of Medway Approach Channel 11.0 m. at Chart Datum.

Entry as directed by Medway Navigation Service (Medway Radio). Station keeps watch on VHF Channels 16 and 74.

Occasional restriction for vessels over 130 m. overall length entering approach channel between sunset and sunrise when the Traffic Warning Lights are exhibited from Garrison Point.

MAX. SIZE: Five deep water terminals for vessels up to 230 m. in length and 11.0 m. in draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Portishead. Local Stations: From South – Lands End, Niton, Northforeland. From North, Cullercoats, Humber, Northforeland.

VHF/RADAR: See "Medway".

TUGS: River Medway – For Sheerness, Ridham Dock, Isle of Grain, Oakham Ness – Tugs usually meet vessels at Garrison Point, Sheerness. Tug's lines used, no extra charge.

BERTHING: Sheerness, deep water berths and Ferry Terminal – directed by Medway Navigation Service (Medway Radio).

Berths equipped for handling containers, forest products, mo vehicles and general cargo of all kinds, including fresh fruit a vegetables.

Storage facilities available for vehicles, forest products and t warehousing of general cargo.

Sheerness Deep Water Berths – No. 1 – Suitable for vessels up to 230 length and 11.0 m. draft.

No. 2. Suitable for vessels up to 210 m. length and 11.0 m. draft.

No. 1/2. Retractable Ro/Ro pontoon serves both bert simultaneously, capable of 60 tonne payload.

No. 3. Suitable for vessels up to 230 m. length and 11.0 m. draft.

No. 4. (Vehicle Terminal) Suitable for vessels up to 250 m. length a 9.0 m. draft.

No. 5. Car and Ro-Ro Terminal for vessels of 110 m. length a 5.5 m. draft.

Ferry Terminal – Berth 10. Suitable for either bow or stern door vess of up to 165 m. in length and 7.0 m. in draft.

Car and Ro-Ro Terminal – Berth 11: Suitable for vessels up to 160 and 7.0 m. draft.

CRANES:

Berth No.	*Remarks*
1	3×5 tonne Electric 1×30 tonne Container Gantry
2	4×3 & 5 tonne Electric
3	5×3 & 5 tonne Electric
4	None (Car Terminal)
11	Ro/Ro/Ferry Terminal
12A	Mobile (Marine Services)

STEVEDORES: All stevedoring at Sheerness is provided by Medw Ports.

MEDICAL: 24 hours notice to Agents so that Port Medical Officer c be advised. Normal boarding point – Garrison Point Sheerness. All us hospital facilities available within 15 mile range of Sheerness.

DENSITY: Average density 1021/22.

FRESH WATER: Available alongside all berths (except Berths No and No. 5) at Sheerness.

FUEL: By barge, 48 hours notice required.

REPAIRS: All types of deck and engine repairs can be carried out eit in berth or at river buoys.

DRY DOCKS: None.

SURVEYORS: Cargo Surveyors available from London or Gravesen Lloyd's Agent in docks.

GANGWAY/DECK WATCHMEN: Gangway watchmen – servic recommended as all berths at Sheerness are tidal with average rise a fall of 5 m.

OPENING/CLOSING HATCHES: Within Sheerness Docks rigg gangs are employed by Medway Ports for this purpose.

REPATRIATION: Usual facilities available for crew changes repatriation can be arranged by various air/sea routes.

TELEPHONES: Police: Sheerness 661451; Fire: Sheerness 66238 dial 999 and ask for Fire Service; Ambulance: Sheerness 664079.

There are coin boxes on berths (except Berths No. 10 and No. 1

EMERGENCY CO-ORDINATION CENTRE: Medway Navigat Service, Garrison Point Fort, Sheerness Docks, Sheerness, K ME12 1RX. Tel: Sheerness 663025.

(2) Thamesport

(1) KENT TERMINAL: 51.26 N. 00.43 E. (See P

DOCUMENTS:

2 Crew's Effects Lists.
2 Stores Lists.
Ship's Certificate of Registry.
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.
Ship's Register.
Safety Radio Certificate.
Safety Construction Certificate.
2 Cargo Declarations.
1 Oil Pollution Certificate (OPIC).

PILOTAGE: See "Medway".
ANCHORAGES: *Estuary Passage and Anchorages:* Vessels proceeding to Isle of Grain will initially contact the Thames Navigation Service (Gravesend Radio Channels 16-12) and comply with the 'General Directions for Navigation in the Port of London 1975' until entering the Medway Area. Prior contact should be made with the Medway Navigation Service (Medway Radio, Channels 6-74-9-22). Anchorages are allocated according to size and draft of vessel and if outside the Medway area are nominated by the T.N.S.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and under-keel clearance appropriate to size of vessel. The declared depth in the Medway Approach Channel is 11.0 m. at chart datum.

No vessels of 130 m. length and above can pass each other in the Medway Approach Channel between sunset and sunrise.
HEALTH: Under new procedures which apply from April 1st, 1978 a Health Clearance is only required if the vessel is "Suspect". In this case the Port Health Authority should be advised by radio message addressed to "Portelth London" not more than 12 hours and where practicable not less than 4 hours before arrival.

See "Health – All Ports" before first U.K. port.
RADIO:

Notice of 72 hours and over	– Portishead Radio.
Notice of 12 – 72 hours	– Landsend Radio.
Notice up to 12 hours	– from South, Northforeland Radio.
	– from North, Humber Radio.

RADAR/VHF: See "Medway".
TUGS: 3 tugs available from 0900 hrs.–1700 hrs. weekdays. If required outside these hours they must be ordered by 1600 hrs. the previous day for night work or by 1600 hrs. on Friday for weekend work. One tug is equipped for fire-fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: There is one jetty (No. 1) of "T" headed design, suitable for coastal and ocean going vessels, which can accommodate vessels of various sizes up to a maximum of 45,000 tonnes displacement and 200 m. LOA. Maximum safe draft for the Medway Approach Channel and on the berths can be advised on request.

Jetty No. 2 is situated 1.5 cables to the East of Jetty No. 1 and is not in general use.

No deballasting facilities are available.
MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
DENSITY: Approx. 1020.
FRESH WATER: Not available.
FUEL: There are no bunkering facilities on site, prior arrangements can be made for the delivery of fuel by barge.
FIRE PRECAUTIONS: *Safety Regulations:* A copy of the BP Oil Kent Distribution Terminal Jetty Safety Regulations is put on board each vessel on arrival. The booklet additionally contains various tear-out Check Lists, forms for confirmation of bunker requirements and requests for immobilisation and permitted repairs. These must be completed by ship and shore representatives before operations commence.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetties.
GANGWAY/DECK WATCHMEN: *Gangways:* Vessels provide their own gangway and are responsible for maintaining it as a safe means of access.
CUSTOMS ALLOWANCES: At the discretion of the local Customs Officer. Normal allowances are 200 cigarettes (F.G.) or 100 cigarettes (H.T.) or equivalent and 1 bottle of spirits per man. Additionally 1.5 litres of wine per man per day. Separate arrangements apply when crew are leaving ship. Vessels in port more than 4 days may receive an additional allowance.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of Foreign Consulate Officials arranged through Agent.
TIME: British Standard Time is GMT plus 1 hour. GMT in Winter months.
TELEPHONES: Public telephone kiosks on the foreshore road.
SHORE LEAVE: The Shift Supervisor will board each vessel on arrival to collect from the Master a copy of the Crew List. This should specify which crew members are leaving the vessel, the names of wives or other visitors expected and, if known, details of crew members joining. It should also note if any crew members are not permitted to go ashore.

The list will be retained by the Shift Supervisor and passes will be issued when crew members pass out and collected from them on their return.
GARBAGE DISPOSAL: A skip is provided free of charge at the rear of Jetty No. 1 for general waste. Arrangements for the disposal of hazardous wastes can be made with prior notice, a charge will be made.
WASTE OIL DISPOSAL: There are no waste oil disposal facilities at the site.
SEAMAN'S CLUBS: None. Phone box available at rear of Jetty No.2.
CURRENCY: U.K.Pound (U.K.£).
GENERAL: Agents have difficulty in providing most services at weekends, therefore, requests for Bond, cash, Consular Officials, etc., should be radioed as soon as possible.
OPERATOR: Strath Services Limited on behalf of BP Oil Aviation/Bitumen Terminal, Isle of Grain, Rochester, Kent ME3 0AY. *Tel:* (01634) 271571. *FAX:* (01634) 270442. *Contact:* M. Bromley, Operations Manager.

(2) THAMESPORT: 51.26 N. 00.42 E. **(See Plan)**

DOCUMENTS: Same as "Kent Terminal" plus 2 copies Immigration Crew List and 1 copy Port Health Declaration.
PILOTAGE: Same as "Medway", except Pilots require 24 hours, 8 hours and 4 hours notice of ETA Pilotage Station, i.e. "North East Spit" or "Sunk".
ANCHORAGE: See "Medway".

Details via Medway Navigation Service based on vessel's dimensions and nature of cargo.
RESTRICTIONS: Max. draft for access from N.E. Spit through Edinburgh Channel 6.3 m. low tide. As an alternative, vessel can traverse via Long Sand Head, adding approximately one hour passage time to berth. Therefore, 24 hour access to port available.
MAX. SIZE: See "Berthing".
HEALTH: Port Health Declaration to be completed.

Also see "Kent Terminal".
RADIO: See "Kent Terminal" and "Pilotage".

ETA messages should be addressed to Telex No. 965873.
RADAR/VHF: See "Medway".
TUGS: Tugs should be ordered through Agent.

Towage is undertaken by Medway Towage Ltd., Sheerness. Tel: (01795) 664311.

3 tugs stationed for Medway operations: 1×30 tonne bollard pull 2,000 h.p. single screw, 1×30 tonne bollard pull 3,200 h.p. 3,200 h.p. with twin Z propellers, 1×40 tonne bollard pull 2,000 h.p. single screw. 1×55 tonne bollard pull 3,200 h.p. with twin Z propellers.
BERTHING: *Location:* Strategically placed where the River Medway meets the Thames Estuary; just 35 miles from London, connected to the B.R. Rail Network.

Thamesport provides 550 m. length of berth with a depth of 13.5 m., linked to the container park by 2 approach bridges. Phase 3 of the port development will extend the berth to 750 m., providing 300 m. alongside with a dredged depth of up to 16.0 m.
Mooring: Through Thamesport (London) Ltd.
Data Systems: A PC network comprising super-micro computers with fault tolerant disks provides full container control, tasking, inventory, ship-planning, warehousing, railfreight terminal and documentation facilities and is linked by RDT to computer terminals in all mobile equipment. Domestic and EDI facilities to fit specific customer requirements on Edifact standards, for example Bayplans, link to the port to its customers and to all statutory bodies.
CRANES: *Ship to Shore:* Manufactured by Magrini Galileo Meccanica, Padua, Italy.
Weight: 735 tonnes.
Height: 60 m.
Outreach: 47.5 m.
Lift Capacity: 52.8 tonnes.
Cycle Speed: 60 seconds, permitting up to 60 box moves per hour.
Operational in wind speeds up to 45 m.p.h.

Fourth generation, high-tech cranes with remote-read condition monitoring and fault diagnosis systems. Serviced from the landside stacking area by a fleet of 22 tractors (Douglas and Terberg) together with over 70 trailers.
Park Gantry: Manufactured by MGM and Davy Morris.
Weight: 195 tonnes.
Height: 23 m.
Width: 30 m.
Lift Capacity: 35 tonnes under the spreader.

The 14 fully automated storage area gantries serve an area with capacity for almost 20,000 TEU at a time.
BULK CARGO FACILITIES: Covered storage amounting to 18,500 sq.m. is utilised for loose cargo for and from containers, with full frontier status for meat and other food products. Some 500,000 tonnes per year of imported and coastal coal is also processed and distributed from the Terminal.
BRIDGES: None.
STEVEDORES: Labour will be arranged based on vessel's final ETA.
MEDICAL: 24 hours advance notification required by Agents for any medical requirements.
TANKERS: See "Kent Terminal".
DENSITY: Approximately 1020.
FRESH WATER: No pipelines on quay at Thamesport. Fresh water available by barge, 24 hours notice required via Agent.
FUEL: See "Kent Terminal".
FIRE PRECAUTIONS: Shift managers attend each vessel on arrival, and provide full safety requirements and full emergency co-ordination instructions.
CONSULS: See "Rochester".
REPAIRS/SURVEYORS/REPATRIATION: All available through prior notification via Agent.
GANGWAY/DECK WATCHMEN: See "Kent Terminal".
HATCHES: Handled amicably by either party.
CUSTOMS ALLOWANCE: See "Kent Terminal".
TELEPHONES: Available on quay and in nearby offices.
STORING: Many local ship supply services available. Vessels can be stored ex-quay under terminal supervision, and stevedore assistance can be provided as required.
SHORE LEAVE: Possible, bar any immigration restrictions.
DELAYS: None anticipated.
DEVELOPMENTS: See "Berthing".
AUTHORITY: Medway Ports.
Operator: Thamesport (London) Ltd., Isle of Grain, Kent ME3 0EP. *Tel:* (01634) 271511. *Telex:* 965873/96108. *FAX:* (01634) 270384. *Contact:* A.R.G.Macleod, Managing Director.

(E) CHATHAM DOCKYARD: 51.24 N. 00.33 E. (See Plan)

Until 1984 the Naval Dockyard and now operated by Medway Ports, a trading division of Mersey Docks and Harbour Company.
DOCUMENTS: See "London".
PILOTAGE: See "Medway".
ANCHORAGES: See "Sheerness".
RESTRICTIONS: Movement of vessels subject to tidal conditions and under keel clearance appropriate to the size of vessel. Entry as directed by Medway Ports on VHF Channel 73.

Limiting Depths: Medway Approach Channel 11.0 m. at Chart Datum.
Long Reach 5.8 m. at Chart Datum.
North Lock 3.3 m. at Chart Datum.
South Lock 3.5 m. at Chart Datum.

MAX. SIZE: All berths in Basin No. 3 can accommodate vessels drawing up to 8.0 m. The locks can accept vessels of 143 m. length provided the beam does not exceed 25 m. Canalling can be arranged for vessels in excess of 143 m. subject to turning circle limit. Vessels drawing up to 4.5 m. can be accommodated at any state of the tide.
HEALTH: See "Medway (Rochester)".
RADIO: Portishead. From South: Lands End, Niton, North Foreland.
From North: Cullercoats, Humber, North Foreland.
VHF/RADAR: See "Medway".
TUGS: A number of tugs are available, operated by Medway Towage and Crescent Wharves.
BERTHING: Access to Basin No. 3 is via the North or South Lock situated at Bull Nose in Gillingham Reach. A & P Chatham Limited carry out voyage repairs, services, etc. in Basin No. 3. Tel: (01634) 812401, 827369.

All 8 berths are confined to No. 3 (Outer) Basin.

Berth No.	*Length (m.)*	*Cranes (tons)*	*Operator*	*Remarks*
1	136	None	Kent Wire Ltd.	Weldmesh Manufacture
2	190	None		Ro/Ro Berth
3	244	1×5 1×20 1×11 (mobile)	Crescent Wharves Limited	General Cargo
4				Ro/Ro Berth
5	108	1×5	A & P Chatham	Shiprepairing
6	152	None		Ro/Ro Berth
7	108	None	Nordic Recycling	Ro/Ro – Sto/Ro Berth
8	184	2×6 1×20	Shiplink Terminals (in receivership)	Ro/Ro – Sto/Ro Terminal

For further details contact: Miss S. Bilney, Administration Manager. Tel: (01634) 405397, 814936.
STEVEDORES: All stevedoring provided by the berth operators (See "Berthing").
MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilties available in surrounding area.
DENSITY: 1020 (within Basin No. 3).
FRESH WATER: Metered supply available on all berths.
FUEL: No facility within the dockyard for the supply of fuel, although subject to weather conditions being suitable, bunkering from barges can take place in the anchorages.
REPAIRS: All types of deck and engine repairs can be carried out either in berth, in dry dock or at river buoys. (See "Berthing").
DRY DOCKS: No dry dock available at Chatham Docks. Dry docks available at Chatham Historic Dockyard.
SURVEYORS: Cargo surveyors available from London or Gravesend.
GANGWAY/DECK WATCHMEN: Ship's responsibility.
REPATRIATION: Usual facilities available for crew changes. Repatriation can be arranged by various sea routes or by air through Heathrow or Gatwick.
TELEPHONES: 4 public telephone kiosks are available on the quayside. In an emergency contact Docks Security on Medway 827130 or Locks Office on Medway 827317, or by radio, call sign "Bullnose" on Channel 73. Alternatively call Medway Navigation Service, call sign "Medway Radio" on Channels 16 or 74 (Tel: (01795) 663025).
REGULATIONS: See "Medway".
GENERAL: All shipping movements co-ordinated by Medway Port Operations and Information Service.
GARBAGE DISPOSAL: To be arranged direct with Terminal Operator.
WASTE OIL DISPOSAL: To be arranged direct with Terminal Operator.
SEAMAN'S CLUBS: None.
AUTHORITY: Medway Ports, Flagstaff House, Chatham Docks, Chatham, Kent ME4 4SW. *Tel:* (01634) 814936. *FAX:* (01634) 830915.
Contact: Miss S. Bilney, Administration Manager.

(F) ROCHESTER: 51.23 N. 00.30 E. (including Chatham, Strood, Upnor, Gillingham, Snodland, Halling & New Hythe) (See Plan)

DOCUMENTS: See "London".
PILOTAGE: See "Medway".
ANCHORAGES: See "Sheerness".
RESTRICTIONS: No entry restrictions only as to state of tide and draft and as directed by Medway Radio (Medway Navigation Service, Garrison Point). Station keeps watch on Channels 16 and 74. Channel 74 is allocated for port operations generally. For vessels exceeding 106.67 m. (350 ft.) in length, normally daylight navigation.
MAX. SIZE:
Ship Berths: Max. Length: 114 m. (122 m. LOA with spec dispensation obtained from the Harbour Master. Bow thruster, tug, et required). Max. draft 7.6 m.
River Berths: Length 49 m. – 122 m. Depth 4.3 m. – 7.6 m. MHW 2.7 m. – 6.1 m. MHWN. Max. LOA 46 m. – 122 m.
HEALTH: Pratique obtained on arrival at Berth.
Also see "Health – All Ports" before first U.K. port.
RADIO: From South: Lands End, Niton, Northforeland.
From North: Cullercoats, Humber, Northforeland.
TUGS: Medway Towage Ltd. ((01795) 662821), cover the whole of t Medway Ports Area.

The following companies operate within the Medway Ports Area or smaller scale with towing and recovery services:

Medway Towing & Light Recovery – (01634) 54300.
N.E. Murray (Marine Contractors) – (01795) 663701.
P.E. Woodger (Craft Hire) Ltd. – Sittingbourne 23874.
Medway Port Services (Towage) – (01634) 723628, 716113.

BERTHING:
Rochester: There are 3 buoy berths maintained by Medway Ports, a mooring buoys to accommodate 15 lighters situated between Chatha Reach and Rochester Bridge.

Size restrictions vary from 46 m. to 140 m., the latest minimum dept can be obtained from the Medway Navigation Service situated Sheerness (Garrison Point).

The facilities or riverside berths are operated by commercial interes

Arco Shipping Ltd. at Neptun Wharf	Medway 7167
Transit Freights Ltd. at Crown Wharf	Medway 7178
Honigs (Rochester) Ltd. at Limehouse Wharf	Medway 8462
Wm. Cory & Sons Ltd. at Cory's Wharf	Medway 8410
Stanley's Wharf	Medway 4072
Eurowharf	Medway 7167
Scotline	Medway 2951

Details of alongside berths handling equipment, latest depths a relevant information can be obtained from the appropriate wh concerned.

Current depths can be ascertained from Medway Navigation Servi

Pier Wharf: (Lat. 51° 24' North; Long. 0° 33' East)

Situated at the Western Arm of Gillingham Dock. Length of wh 183 m. with varying depths from 3 m. to 5 m. at MHWS. Stora warehouses and storage capacity available.

Ship repair and boat builder – Medway Marine Engineering – (016 576600.

Tylers Wharf: (Lat. 51° 24.6' North; Long. 0° 34' East)

Situated at West Hoo Creek owned and operated by the Life Moulding Co. Ltd. Length of wharf 73 m. with a depth of 3 m. at MHW Large sheerlegs of 30 tons and mobiles available. Boat builders a outfitters.

Mooring Facilities: Buoys are provided at points within the River Medw and Swale. Arrangements to use these buoys and current charges be made through Medway Ports.

Kethole Reach: Buoys 20, 21, 22, 23 and 24: 4 fore and aft moori to accommodate vessels up to 200 m. length and 16,000 ton displacement.

Saltpan Reach:

Buoy No.	*Class*	*Maximum Displacement*	*Remarks*
1	3rd	1,000 tons	Max. Length 122
5	4th	1,000 tons	
9	4th	1,000 tons	
10	4th	1,000 tons	

MEDICAL: Port Medical Officer available if necessary on arriva Sheerness with 24 hours notice to Agents. Doctor and hospital facil available at Rochester.
DENSITY: 1020 unless excessive land water coming down river.
FRESH WATER: Quantities up to 200 tons available for delivery by w barge.
FUEL: By barge or road tanker, 48 hours notice required.
CONSULS:
Vice-Consul Netherlands, Tel. Medway 43256.
Consul Sweden, Tel. Medway 44632.
Vice-Consul Finland, Tel. Medway 44632.
REPAIRS: Acorn Shipyard, Gas House Road, Rochester, Kent 1PJ (Tel: (01634) 41355/6/7), provide ship repair facilities at the Is Grain; Sheerness and River Medway, and operate 1 patent slipwa 85.0 m. working length and 1 grid situated at Rochester.

Ailsa Perth. Tel: (01634) 811622, dry dock and full repair servi

DRY DOCKS: All repair facilities available on river berths for ve up to 60.96 m. (200 ft.) in length; on a grid for up to 76.19 m. (25 and a slipway for up to 42.67 m. (140 ft.).
OPENING/CLOSING HATCHES: To be carried out by crew.
CARGO GEAR: Discharge by ship's gear at ship berth and by m cranes up to 10 tons at all river berths.
AIRPORTS: London (Heathrow), Southend, Gatwick and Roches
POLICE/AMBULANCE/FIRE: Dial 999 and state service requir where vessel berthed, also contact Medway Radio in cas emergency.
SERVICES: Compass adjustors available.
REGULATIONS: See "Medway".
DEVELOPMENTS: Development of Frindsbury Marshes (Roche
AUTHORITY: Medway Ports (See "Sheerness").

(G) OTHER FACILITIES:

(1) BLOORS WHARF – RAINHAM CREEK: 51° 22' 48" N., 00° 36' 42" E.

Situated at the head of Rainham Creek a distance of 10.3 nautical miles from Rochester. Main wharf 183 m. long with 3.1 m. at MHWS. The Western arm is 61 m. long with a depth of 2.1 m. at MHWS. 5×2.5 tonne grab cranes and 2×40 tonne crawler cranes.

Mobile cranes, forklifts and crushing equipment available. Large storage capacity and warehouses also available. Shipbreaking and recycling of metals.

(2) FAVERSHAM: 51° 19' N., 00° 54' E.

DOCUMENTS: See "London".
PILOTAGE: Not compulsory. Advisable to engage local person by arrangement with Agent or contact Medway Navigation Service.
ANCHORAGE: The Swale (East) 1 mile (approx.) upstream of the Sand End buoy.
RESTRICTIONS: No night restrictions. Tidal creek – vessels enter from 1.5 hours before High Water according to draft.
MAX. SIZE: 43 m. LOA, 7.6 m. beam, 2.7 m. draft, on Spring tides only. Larger vessels may be accepted under certain conditions on application to the Harbour Master.
RADIO: North Foreland.
VHF/RADAR: See "Medway".
TUGS: None available.
BRIDGES: Maximum size of vessels proceeding to basin above Faversham Swing Bridge – 43 m. length, 7 m. beam. Draft – the minimum clearance for vessels up to 34 m. in length is 0.5 m. over the sill, and for longer vessels 0.6 m. over the sill (Bridge temporarily closed for repairs (March 1994)).
MEDICAL: Notify Agent of any medical treatment required.
FRESH WATER: Available on some berths.
FUEL: No local installation. Bunkers may be obtained by road tanker – contact Agent.
REPAIRS: Minor repairs can be carried out locally. For nearest grid, slipway and dry dock facilities see "Rochester" and "Sheerness".

(3) KINGSNORTH: 51° 25' N., 00° 36' E.

DOCUMENTS: See "London".
PILOTAGE: See "Medway."
ANCHORAGES: Vessels proceeding to Kingsnorth must contact Medway Navigation Service (VHF Channels 16 and 74) when a designated anchorage will be allocated appropriate to the size of the vessel.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and under keel clearance appropriate to size of vessel. Minimum depth of 6.0 m. in Long Reach at Chart Datum.
MAX. SIZE: Max. length: 229 m. No breadth restriction. Depth: 8.0 m. min. depth alongside at Chart Datum.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Notice of 72 hours and over, Portishead Radio. Notice of 12-72 hours. Landsend Radio. Notice of up to 12 hours, from South, Northforeland Radio, and from North, Humber Radio.
RADAR/VHF: See "Medway".
TUGS: Although tugs are not normally required for berthing at Kingsnorth 5 tugs are available, 2 of them equipped for fire fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: *Kingsnorth Jetty:*

Lat. 51° 24' 36" N.
Long. 0° 36' 18" E.

The jetty is owned and operated by Powergen and is situated at the Western end of Long Reach a distance of 6.3 nautical miles from Sheerness and 5.85 nautical miles from Rochester.

The jetty is of concrete construction and is 580 m. long and "L" shaped with a 306.3 m. face, there is a single upstream connected dolphin making an overall face of 330.7 m.

The size of vessels using the jetty are governed by draft.

Minimum depth at MLWS is 10.0 m.
MHWS is 15.5 m.

There is an inner spur situated on the approach arm 396 m. from the jetty face. It is primarily intended for stern Ro/Ro craft, and has 2 starboard berthing dolphins situated at 30.5 m. and 61.0 m. respectively.

Depth at MLWS is 0.6 m. above Chart Datum.
MHWS is 5.3 m.

The jetty is used for the import of coal for Kingsnorth Power Station.

Address: Kingsnorth Power Station
(South Eastern Region)
Hoo, Rochester,
Kent ME3 9NQ
Telephone: (01634) 250088 Telex 965015

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
TANKERS: Advisable radio Agents connection sizes required. No slop tank available. 1 large tanker berth only.
DENSITY: Approx. 1018.
FRESH WATER: Available by pipeline on jetty.
FUEL: Bunkers not usually available on jetty, but may be delivered by barge. Advance notice essential.
FIRE PRECAUTIONS: No immobilisation or repairs allowed without prior authorisation. No hot-work allowed alongside jetty.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetty.
GANGWAY/DECK WATCHMEN: Services of shore watchmen not necessary. Shore gangway may be used.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate officials arranged through Agent.
POLICE/AMBULANCE/FIRE: Dial 999 from public call box. Medway Navigation Service can be alerted on Channel 16 and 74 to call these services.
TELEPHONES: No facilities exist for placing telephones onboard.
GENERAL: Agents have difficulty in providing most services at weekends, therefore, requests for bond, cash, consular officials, etc., should be radioed as soon as possible.

(4) OAKHAM NESS JETTY: 51° 24' 55" N., 00° 38' 45" E.

The jetty is jointly owned and operated by Powergen and K.C.A. International Ltd. and is situated in Kethole Reach a distance of 4.5 nautical miles from Sheerness (Garrison Point). The jetty is of concrete construction and is 1,960 m. long. The jetty head is 27.5 m. long with upstream and downstream attached dolphins making a 85 m. face. There are 2 further berthing dolphins unattached, both upstream and downstream. The max. size of vessel permitted on the jetty is restricted to 55,000 d.w.t. with a max. length of 229 m.

The depth at MLWS is 10.6 m.
at MHWS is 16.7 m.

Powergen have a separate storage capacity of 300,000 tons for crude oil primarily for Kingsnorth Power Station.

(5) OTTERHAM QUAY – RAINHAM: 51° 22' 30" N., 00° 37' 42" E.

Situated at the head of Otterham Creek a distance of 2.75 nautical miles from the junction of Long Reach and Kethole Reach and 10.25 nautical miles from Rochester.

There is 192 m. of quay space with a max. length restriction imposed on loaded vessels of 73 m. There is 3.3 m. at HWNT and 4.6 m. at HWST.

The Quay is owned and operated by Crescent Port Services Ltd. Tel: (01634) 815501. Telex: 96312.

(6) QUEENBOROUGH: 51° 26' N., 00° 44' E.

Area of harbour extends from Queenborough Spit to Long Point in the West Swale. Queenborough Creek is landlocked and small commercial interests operate within the creek which is buoyed, all berths dry out but are safe berths.

MHWS 5.8 m. Weather – prev. S.W.

The ex-Coal Wharf known as the Washer Wharf, situated at Loden Hope is operated by Queenborough Rolling Mill Ltd. (Tel: Sheerness (01795) 668080) and is primarily used for loading scrap metals.

(7) RIDHAM DOCK: 51° 23' N., 00° 46' E.

Situated 900 m. (0.5 nautical miles) S.E. of Kingsferry Bridge in the Swale. Restrictions on vessels governed by Pilots in the light of water available in the Swale, Kingsferry Bridge and restricted bends in the navigational channel. Max. LOA 102 m. Beam 15.3 m. and draft 6.7 m.

Beam of vessels transitting Kingsferry Bridge restricted to 15.3 m. maximum.

Vessels of 82 m. and over LOA require a tug in attendance.

Ridham Dock is owned and operated by Ridham Sea Terminals (Tel: (01795) 470881). The terminal has 4 berths, 2 of 244 m. and 2 of 213 m. approximately. These are serviced by 8 electric cranes 2×6 tonnes and 6×5 tonnes. There is a fleet of forklift trucks 8,000 lbs. to 36,000 lbs. plus a 25 ton container handler. 5 hectares of marshalling area for containers including refrigerator points.

Vessels dock only on or near HW and take the ground at LW, the bottom being soft mud. Special facilities for reefer ships going aground.

The terminal covers approximately 26.7 hectares and 13,000 sq.m. of warehousing are available.

Authority: Ridham Sea Terminals Ltd., Ridham Dock, Sittingbourne, Kent. *Tel:* (01759) 470881. *Telex:* 96409.

(8) GROVEHURST JETTY: 51° 22' N., 00° 46' E.

Situated 1.5 miles S.E. of Kingsferry Bridge in the Swale. Max. length of vessel 88.3 m. Vessels over 82.0 m. LOA handled in daylight only and with tug assistance.

Grovehurst is owned and operated by "Knauf" for import of gypsum. Berth has 2×7 tonne cranes. Depth alongside 2.0 m. at C.D. Swinging circle 1.0 m. at C.D.

METHIL: 56.11 N. 03.01 W. (See Plan)

DOCUMENTS/PILOTAGE: See "Leith".
ANCHORAGES: Deep water anchorages available in Largo Bay.
RESTRICTIONS: Dock gates opened from 3 hours before HW until HW.
MAX. SIZE: Max. beam 14.6 m. to pass dock gates.
RADIO: See "Leith".
VHF: Methil Harbour Radio on Channel 16. Working Channel 14.
TUGS: Available from Leith.
BERTHING: Dock No. 1 has 340 m. of berthing space, max. depth alongside 6.7 m. MHWS. Dock No. 2 has 500 m. of berthing space, max. depth alongside 7.9 m. MHWS. Transit shed with 2,000 sq.m.
CRANES: 4×4 tonne mobile cranes (with grabs) and 2×10 tonne quayside cranes available.
BULK CARGO FACILITIES: 2×1,000 tonnes capacity grain silos and discharge plant at No. 1 Dock (private).

2,000 tonne capacity storage shed and 50 tonne weighbridge (Private).

STEVEDORES: Forth Ports PLC.
GARBAGE DISPOSAL: To be arranged by local agents.
WASTE OIL DISPOSAL: To be arranged by local agents.
SEAMAN'S CLUBS: None.
AUTHORITY: Forth Ports PLC, Dock Office, Methil KY8 3RE. *Tel:* (01333) 426725. *Telex:* 72208. *FAX:* (01333) 424872. *Contact:* Captain T.S. Sutherland, Port Superintendent.

MILFORD HAVEN: 51.42 N. 05.10 W. (See Plan)

PORT LIMITS: The seaward boundary of the port is 4 miles from St. Ann's Head.

DOCUMENTS:

5 Crew Lists.
2 Crew Stores Declarations (C.142), if from outside EEC.
2 Master's Declarations (C.13)
*2 E.E.C. Safety Check Lists.

Agents will prepare other Customs papers.

* As per "M" Notice No. M1630, Schedule 2 required to be faxed to signal station prior to arrival and departure for all tankers.

Ship's Papers:

Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Oil Pollution Insurance Certificate (tankers).
ITC 1969.
U.K. Light Dues for current year (if applicable).

PILOTAGE: Pilots normally board incoming ships from a green-hulled pilot vessel, in a position S.W. of Mid-Channel Rock Light-tower, as close thereto, as weather, size of ship and circumstances permit. When the Western Channel is being used by very large ships other ships may be requested by the Port Signal Station, to use the Eastern channel, if draft, and length of ship permit, in which case the Pilot will board close to Sheep Buoy. Deep-draft ships should not approach too close whilst awaiting the pilot vessel. They should remain at least 4 miles S.W. of Mid-Channel Rock Light-tower. It is important, when manoeuvring at slow speeds to embark a Pilot to make proper allowance for the set of the tidal stream, which sets across the entrance.

Accurate times of arrival are requested so that the pilot vessel may be on station at the correct time. ETAs should be given at least 12 hours before arrival and amendments should be made 2 hours before the latest ETA.

ETAs and subsequent amendments should be passed by Fax/Telex or radio telephone through any United Kingdom Coast Station to Milford Haven Signal Station (Tel: 692342, 692343. Telex: 48575. Fax: 01646-690179) or to the local Agent of the ship. Alternatively when within 30 miles of St. Ann's Head ETA's may be passed direct to Milford Haven Port Authority Signal Station calling on VHF Channel 16 then transferring to Channel 12 (the Port working frequency). In addition pilot vessels are equipped with MF radio calling on 2,182 kHz and transfer to the working frequencies 2,241, 2,246 or 2,301 kHz. However, VHF contact is preferred.

ANCHORAGES: Anchorage normally available for vessels up to 40 ft. draft in Dale Roads. Anchorage for smaller vessels normally available in Dale Shelf or Stack anchorages. Signal Station will advise mariners on the availability of these anchorages.

RESTRICTIONS: The West Channel with minimum depth of 55 ft. at the entrance and 54 ft. inside is the channel used by the largest tankers. The East Channel with minimum depth of 32 ft. is available to all vessels of suitable size and vessels able to do so are requested to use it when the largest tankers are entering or leaving in the West Channel. The inner channel between Chapel Buoy and Westward of Texaco Jetty has a minimum depth of 53 ft.

MAX. SIZE: Vessels of 65 ft. draft can be handled on virtually all high waters, but draft restriction always dependent on tide, 63 ft. at worst HW Neaps, or up to 68 ft. in favourable conditions.

HEALTH: The Port Health Authority must be notified in advance if any animals on board or of any suspected disease or fever (Milford Port Health Authority. Tel: (01646) 692486. Fax: (01646) 690505).

Also See "Health – All Ports" before first U.K. port.

RADIO: Lands End Radio, Ilfracombe Radio, Celtic Radio and Cardigan Bay Radio (use working channels to call).

VHF: It is important to maintain continuous radio telephone contact with Signal Station when within one hour's steaming of St. Ann's Head, and at all times when in Haven and not safely moored to an alongside berth, including all times spent at anchor or at buoys.

All vessels equipped with VHF radio should adopt following procedures:

Entering the Harbour: Contact Signal Station on Channel 16 when within 90 minutes steaming of St. Ann's Head. After making contact ship will be requested to maintain watch on Channel 12 until vessel safely moored alongside or at anchor.

Going to anchor or to a buoy mooring: Report to Signal Station when secured and then maintain a continuous watch on Channel 16.

Berthing alongside: Report to Signal Station when safely moored and may then shut down.

Leaving the Haven: Maintain continuous listening watch on Channel 12 until Pilot has disembarked, when Signal Station should be informed and vessel should maintain a continuous watch on Channel 16 until one hour after passing St. Ann's Head.

Navigating within the Haven: Maintain a continuous watch on Channel 12. When radio telephone is used between vessel and tugs during berthing operation, Channel 6 or 8 will be used and Signal Station should be informed before vessel comes off Channel 12.

Signal Station will answer calls on Channel 16 for any ship in the port which has been instructed to move off international calling frequency.

RADAR: Harbour surveillance radar in operation, range 24 miles.

TUGS: Tugs normally join vessels to Westward of Herbrandston Jetty, but Master will be advised by Pilot. Tug's lines used, cost of lines inclusive of towage charge.

BERTHING: VLCCs enter at HW and normally berth heading East. Vessel will be required to swing after unloading and prior to departure.

Milford Docks: Enclosed dock, minimum depth on sill 26 ft., lock length 550 ft., width 69 ft., 5,033 ft. of quayage includes 420 ft. fish market and modern cargo handling berth, 455 ft. in length. Vessels of up to 30 ft. draft may be handled on Spring tides.

Pembroke Dock:

Quay	*Length* (ft.)	*Depth at C.D.* (m.)	*Remarks*
1	600	7.4	Can accept bulk carriers and container vessels up to 700 ft.
2	354	7.0	Can accept bulk carriers and container vessels up to 450 ft.
3	235	5.0	Can accept general cargo vessels up to 340 ft.
4	1,000	—	To be built.

Vessels with Ro/Ro ramps (bow or stern) can berth in the bas between Berths No. 2 and 3.

Mainport Jetty: One cargo berth, depth 20 ft., for vessels up to 350 length. Max. size approximately 6,500 d.w.t.

CRANES: In Milford Docks – 1×25 ton mobile, 2×6 ton electric. Furth mobile cranage available if required.

SPECIALISED CARGO HANDLING FACILITIES:

Containers: Container traffic is handled at Milford Docks although the is no specialised container handling equipment.

Ro/Ro: Pembroke Dock Ferry Terminal has one Ro/Ro berth, dep alongside 21 ft., and can accommodate ferries up to 425 ft. in leng max. size 6,000 g.r.t. (approx.).

LPG: LPG is handled at the Elf, Gulf and Texaco oil terminals.

STEVEDORES: Ordered prior to arrival.

MEDICAL: All oil terminals have well equipped medical centres. Loc hospital facilities available.

TANKER TERMINALS:

Elf:

Berth No. 1: Depth 64 ft., 4×16 in., crude line, 1×12 in. and 3×8 i product lines, max. size 275,000 d.w.t.

Berth No. 2: Depth 38 ft., 6×8 in. product lines and 1×6 in. LPG li max. size 30,000 d.w.t.

Berth No. 3: Depth 22 ft., 4×6 in. product lines, 1×8 in. LPG li max. size 5,000 d.w.t.

Herbrandston:

Ex-Esso Terminal. New general purpose terminal with 5 berths, ab to handle VLCC size ships to coasters (1 large berth only in use).

Gulf Oil:

Berth No. 1: Depth 44 ft., 4×10 in. and 1×12 in. cargo lines, max. si 65,000 d.w.t.

Berth No. 2: Depth 55 ft., 2×10 in. and 4×12 in. cargo lin max. size 870 ft. LOA.

Berth No. 3: Depth 32 ft., 3×8 in. cargo lines and 1×6 in. LP max. size 12,000 d.w.t.

Texaco:

Berth No. 1: Depth 66.25 ft., 4×16 in. crude, two of which can used for fuel oil, and 4×12 in. clean oil cargo lines. All clean oil and t oil arms can take ballast. Max. size 275,000 d.w.t.

Berth No. 2: Depth 47.56 ft., 2×12 in. LPG ship discharge lines w 1×8 in. vapour return line, 6×10 in. black oil, 6×10 in. clean oil a 2×10 in. ballast/bunker lines, max. size 100,000 d.w.t. (75,000 cu LPG).

Berth No. 3: Depth 39.36 ft., 1×12 in. Refrigerated Butane sh discharge with 1×4 in. vapour return line and LPG ships with a 4 arm. 2×12 in. black oil and 4×10 in. clean oil lines. All clean oil a fuel oil arms can take ballast. Max. size 35,000 d.w.t. (30,000 cu LPG).

Berth No. 4: Depth 19.02 ft., 1×6 in. black oil and 3×8 in. clean 1×6 in. LPG and 1×6 in. ballast lines, max. size 2,000 d.w.t.

Berth No. 5: Depth 20.00 ft., 1×8 in. black oil, 1×6 in. and 3×8 clean oil, 1×6 in. LPG and 1×6 in. ballast lines, max. size 4,500 d

Berth No. 6: Depth 65.92 ft., 4×16 in. cargo lines, max. s 275,000 d.w.t.

Berth No. 7: Out of commission.

Berth No. 8: Out of commission.

No ballast facilities at Berth No. 6.

Report: *Cautionary Advice:* In-Port: There are 3 major oil terminals w the Haven and the previous Esso Terminal, now the Herbrands General Purpose Terminal, which is located less than 2 miles E.N.E the Angle Buoy. Ships bound for this terminal make tugs fast betw the Angle Buoy and South Hook Buoy.

VLCCs which require 5 or 6 tugs have little but adequate time to m them fast. It is, therefore, extremely important for a deep tanker bo for a terminal in the Haven to have everything ready and the crew stations prepared to make tugs fast by the time the Angle Buoy is reac and that after the turn is made the speed over the ground is red quickly so that by the time the South Hook Buoy is reached, all tug fast and speed reduced to about 2.5 knots.

Ships bound upstream of Herbrandston Terminal must proceed a slowest speed consistent with safe navigation, as they pass quite c to ships lying alongside other terminals and can cause consider "passing ship" problems. They usually make tugs fast after pa South Hook Buoy.

Berth Approaches: Ships are strongly advised against steaming int berths at any terminal.

The only safe manoeuvre being to bring the ship to rest, stopped the ground, parallel to and about 40 m. – 60 m. off the berth b breasting in.

This particular manoeuvre is of importance to vessels of 70,000 and over.

Most of the incidents during berthing operations have arisen bec of a combination of an angled approach to the berth, excessive hea and berth approach speed with a sheer resulting from strong a engine movements.

Anchorages: Ships for which there is no berth available on arriv find anchorage within the Haven. (See below). Deeper draft ships have to wait for tide or berth should remain outside the port well o maintaining a listening watch on VHF Channel 16, and allowing su time to reach the entrance at the proper time for shipping the enter port.

Anchorages within the Haven: The recognised anchorages within the Haven are shown on the large scale charts, and the Milford Haven Port Authority Signal Station must be consulted before ships use their anchorages.

Dale Roads is the only anchorage for ships up to 7.00 m. It is exposed to wind and swell and has an uneven rocky bottom which does not always afford a good holding ground. *Many ships have dragged anchor here and several have lost an anchor, and it is emphasised that a full anchor watch must be maintained on all ships with a listening watch on VHF Channel 12.*

If at anchor in Dale Roads at the onset of a gale, it is usually sound advice to pick up the anchor and proceed to sea. After rounding the Angle Buoy, if Mid-Channel Rock Lighthouse is kept fine on the port bow, this will take a ship clear of dangers. Before departing, the status of the buoys should be checked out with the Signal Station and then proceed with caution.

The 2 entrance buoys should not be relied upon as they sometimes drag out of position during gales.

Stack Anchorage can be used by medium sized ships of up to 7.00 m. draft. It is a little more sheltered and has a better holding ground.

Small ship anchorages are at Dale Shelf and Sandy Haven. Some small ships find shelter South of the channel opposite the Herbrandston Terminal.

Herbrandston Terminal – Cautionary Advice: Each berth has a designed maximum speed of approach for the maximum size ship acceptable.

The berths are in an exposed position with prevailing winds blowing on to the berths. Strong winds from the Northerly semi-circle do occur and usually with a sudden shift in wind. Ships with high freeboard can be badly affected by these strong winds and it is, therefore, very important that moorings are kept tight and are properly tended at all times.

Description of Berthing Procedures: All vessels berth head to tide. Ships of less than 265 m. and 14.6 m. draft can be berthed on the flood tide and, therefore, swung before berthing. These ships are usually swung off the berth. Ships of greater draft will always berth at HW or on the ebb tide and will, therefore, always be port side to.

All moorings are taken ashore by boat and lifted on to the dolphins by power winch.

Breast and spring lines are usually put out first.

Good messengers are required at each position for this operation. This system is for VLCCs only.

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: All oil terminals can supply all grades of bunkers. Fuel also available within Milford Docks and from bunkering barge elsewhere in the Haven.

FIRE PRECAUTIONS: Fire wires to be rigged fore and aft on all tankers.

CONSULS: The following countries are represented by Consuls at the port or elsewhere in South Wales: Others may be available.

Belgium
Denmark
Finland
France
Italy
Liberia
Netherlands
Norway
Sweden
Thailand
Turkey

REPAIRS: All types of deck and engine voyage repairs carried out.

DRY DOCKS: One dry dock at Milford Docks, 600 ft. × 63 ft. × 18 ft. with cranage.

SURVEYORS: Lloyd's at Swansea, ABS and NV in South Wales. Cargo inspectors available – Inspectorate, Inchcape Testing Services, Saybolt, Moore, Barrat and Redwood have local offices.

GANGWAY/DECK WATCHMEN: Available if necessary – very rarely required.

CUSTOMS ALLOWANCES: Tobacco, 0.045 kg. per man per day. Spirits, 0.185 litres per man per day.

REPATRIATION: Crew changes frequently carried out and repatriation arranged. Crew arriving by rail to join vessels at Elf, Herbrandston, Gulf and Milford Docks should be directed to Milford Haven station. If joining vessels at Texaco to Pembroke station, and for vessels at Port Operators and Storage or Pembroke Dock Ferry Terminal, to Pembroke Dock station.

AIRPORT: Nearest main airport is Cardiff (Wales) Airport, distance approximately 100 miles. Some international flights for onward connections.

TIME: GMT in Winter months, BST (GMT plus 1 hour) March to October.

HOLIDAYS: Oil Terminals operate 24 hours/365 days. Other berths observe standard U.K. holidays but cargo work can be arranged if required.

POLICE/AMBULANCE/FIRE: Police – Milford Haven 692351, Pembroke 682121; Ambulance – Haverfordwest 763355, 236444; Fire – A Division, Carmarthen 231184, B Division, Haverfordwest 762131.

EMERGENCY CO-ORDINATION CENTRE: Emergencies within the port are co-ordinated by the Milford Haven Port Authority Signal Station. Emergencies outside the port and S.A.R. co-ordinated by H.M. Coastguard Milford Haven (Tel: 01646-690909).

TELEPHONES: No telephones on board. Public call boxes exist on all oil jetties.

SERVICES: Ministry of Defence compass adjuster available subject to operational commitments.

STORING: Vessels can be stored by barge or truck and local riggers are available to assist. Storing can normally take place during cargo operations but, in the case of oil tankers, trucks cannot proceed alongside the ship and storing from a barge must be carried out near the stern of the ship. Fork lift trucks cannot be used to store oil tankers.

SHIP SUPPLY SERVICE: D.V. Howells and Sons Ltd., P.O. Box 14, Milford Haven, Pembrokeshire SA73 3ER. Tel: (01646) 693091, 692418. Telex: 48575.

Marine & Port Services Ltd., The Dockyard, Pembroke Dock, Pembrokeshire SA72 6TF. Tel: (01646) 682271/5. Telex: 48303.

Additionally, there is a tug company operating in Milford Haven with a fleet of locally based tugs whose prime duty is the berthing and unberthing of tankers at oil terminals in the Haven and firefighting responsibilities, although occasionally a tug may be called offshore for salvage purposes. The tug company is Cory Towage Ltd., Slip Hill, Milford Haven, Pembrokeshire SA73 3BB. Tel: (01646) 692296/7.

SHORE LEAVE: Shore leave allowed. Crew List to be deposited with security.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: Service provided by terminal operators.

WASTE OIL DISPOSAL: Service provided by terminal operators.

SEAMAN'S CLUBS: The Merchant Navy Club, Robert Street, Milford Haven, Pembrokeshire. Tel: 692553. Facilities include telephones, bar, snacks, restaurant, juke box, TV lounge, pool, library.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Milford Haven Port Authority, P.O.Box 14, Milford Haven, Pembrokeshire SA73 3ER. *Tel:* (01646) 693091 office, Milford Haven Signal Station (01646) 692342 or 692343. Signal Station – 24 hours. *Telex:* 48575 – 24 hours. *FAX:* (01646) 690179. *Contact:* Captain M.C. Andrews, Harbour Master.

AGENT: Inchcape Kelway Services, Murray Crescent House, The Rath, Milford Haven, Pembrokeshire SA73 3JR. Tel: Milford Haven 692313. After hours: (0850) 692313, (01646) 693341, 695587. Telex: 48213. Fax: (01646) 692706.

MISTLEY: 51.57 N. 01.05 E. (See Plan)

LOCATION: Private port situated on the River Stour within Harwich Harbour. Seven tidal berths, vessels lay safe aground (Also see "Harwich").

DOCUMENTS: Normal requirements – local Agents will advise.

PILOTAGE: Order via Agents or direct with Harwich Pilots.
Call sign: "Harwich Pilots".
VHF: Channel 16 and 9.
Telephone: (01255) 243129.
Telex: 98472.

Compulsory ETA 8 hours before arrival and 2 hours confirmation. Details required: Name of vessel, ETA, destination, max. draft., g.r.t.

ANCHORAGES: Safe anchorage in Harwich Harbour or Cork Pilot Station.

RESTRICTIONS: Vessels can enter/depart on HW, according to state of tide and draft. Day and night navigation.

MAX. SIZE: No length or beam restrictions. Draft varies between 3.3 m. Neap tides to 4.3 m. Spring tides except Berth No. 1 and Baltic Wharf with a draft variation of 4.3 m. neap tides to 5.3 m. spring tides.

HEALTH: As per Port Health Regulations. See "Harwich".

RADIO: Northern Approach: Humber Radio, Tel: (01521) 73447. Southern Approach: North Foreland Radio, Tel: (01843) 20592.

VHF: Harwich Harbour Radio, Channel 14.

TUGS: Available from Felixstowe and Mistley via ship's Agents.

BERTHING: Instructions given via Pilot or Agents. Loading/discharging via shore cranes/elevators.

CRANES: Mobile cranes up to 12 tons, and Scotch Derrick up to 30 tons.

BULK HANDLING FACILITIES: Bulk cargo facilities available for discharge of grain, ores, fertilisers, etc., by grab. Loading elevators for grain, etc.

STEVEDORES: All cargo handling instructions and enquiries to: Mistley Quay and Forwarding, High Street, Mistley, Manningtree, Essex. Tel: (01206) 394431. Fax: (01206) 393882.

MEDICAL: All requirements via Agents with advance notice.

DENSITY: 1026.

FRESH WATER: Available with notice. Up to 12 tons-charge £50.00 plus overtime charges if incurred.

FUEL: Bunkers available from major suppliers via Agents.

SURVEYORS: Cargo inspectors, superintendents and surveyors are available locally via Agents.

GANGWAY/DECK WATCHMEN: Ship's gangway, watchmen not necessary.

HATCHES: Opening and closing by crew.

CUSTOMS ALLOWANCES: Normal U.K. Regulations.

CARGO GEAR: All work by shore cranes, heavy lift up to 30 tons.

REPATRIATION: Facilities via Agents.

TIME: GMT. Summertime, GMT plus 1 hour.

HOLIDAYS: No work on public holidays unless overtime working is arranged in advance.

POLICE/AMBULANCE/FIRE: See "Harwich".

TELEPHONES: No onboard facilities available.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Not necessary.

DELAYS: None.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

DEVELOPMENTS: Dredging of the approach channel to Mistley and within the port to increase acceptability of larger vessels is presently in hand but at present it is not possible to indicate when such improvements will be completed. Please enquire to the Port Owners, Mistley Quay & Forwarding.

AUTHORITY: *Port Owners:* Mistley Quay & Forwarding, High Street, Mistley, Manningtree, Essex CO11 1HB. *Tel:* (01206) 394431. *FAX:* (01206) 393882. *Contact:* I.J. Forbes, Port Director.

Local Port Authority: Harwich Haven Authority, Harbour House, The Quay, Harwich, Essex CO12 3HH. *Tel:* (01255) 243030. *FAX:* (01255) 241302. *Contact:* Captain I. Whale, Harbour Master.

MONTROSE: 56.42 N. 02.27 W. (See Plan)

PORT LIMITS: The port is bounded by a line drawn in a Northwesterly direction from Scurdie Ness Lighthouse to the Annat Bank and thence by both banks of the river to the road bridge which completes the inner boundary.

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Stores List.
1 Personal Effects List for baggage coming ashore.
1 Manifest or Bill of Lading.
Ship's Register, Load Line Certificate, Radio Certificate, LSA and Safety Certificates to be sighted.

PILOTAGE: Pilotage is compulsory. Pilots are available throughout the 24 hours. International Code Flag "G" to be exhibited.

Vessels should approach the port to a position with Scurdie Ness Lighthouse bearing 250° distance 0.5 mile where Pilot will normally board.

Pilot cutter *"Southesk"* has a black hull with white upper works and "Pilots" painted in black on each side of the wheelhouse. The normal red and white pilot flag is flown during daylight and regulation lights exhibited at night. VHF Channel 16 for calling with a working frequency on Channel 12.

In bad weather it may be necessary for a ship to proceed inwards at the radioed directions of a Pilot to a position on the outer leading marks and inside the lighthouse where the Pilot may board safely. This will only apply during periods of strong Easterly gales and very heavy seas and may be applicable for only a few times in a year. Similarly the port may be closed under severe weather conditions, on average 2.5 days per year.

ETA Messages: Masters should cable Agent with 24 hours' notice of arrival giving overall length and deepest draft and also call "Montrose Port Control" within 2 hours of arrival at the Pilot Station.

ANCHORAGE: In position mentioned above with Scurdie Ness bearing 250° distance 0.5 mile, in about 13 m.

MAX. SIZE: Since the harbour was reconstructed and deepened ships of 165 m. LOA and 16,700 d.w.t. have been handled on a max. draft of 7.5 m.

HEALTH: "Q" flag to be flown when coming from a foreign country until cleared inwards. In event of disease or fever onboard, advise Agents by radio. Strict attention paid to quarantine regulations regarding dogs which are not allowed ashore.

Also see "Health – all ports" before first UK port.

RADIO: Messages to Agents may be sent through Stonehaven Radio. Harbour service is on Channel 12. Call Montrose Port Control on Channel 16.

RADAR/VHF: No port radar service. Harbour service and pilot vessel work on VHF Channels 16 and 12.

TUGS: Pilot vessel is equipped with towing hook and pusher bow to assist in berthing and unberthing if necessary. Vessel's lines used. Small charge made for such work.

In addition to the pilot vessel, the tug "Glenesk", 425 b.h.p. (4 ton bollard pull) is available.

BERTHING: North Riverside Quays: No. 6 – 113 m., No. 7 – 141 m., No. 8 – 87.5 m., No. 9 – 69 m. No., 10/11 – 152 m.

Depths vary from 18 ft. at No. 8 (See "Developments") to 16 ft. at No. 10/11 at Chart Datum.

South Riverside Quays: Berths No. 12, 13, 14, 15, 16, (Berth No. 16 dredged to a depth of 25 ft. (7.6 m.) at MLWS) and 17. These are extensively used by oil related vessels.

Total wharf length available is 1,600 ft. with depth alongside 20 ft. at MLWS.

Fixed Ro/Ro Ramp available between Berths No. 6 and 7. Vessels able to land bow or stern ramp of width 8 m. Depth alongside 18 ft.

CARGO HANDLING FACILITIES: The stevedores are well equipped with mobile cranes, fork lifts, etc., and only rarely is ship's gear used unless it is of rapid, modern type. Grab discharge is used for bulk cargoes and conveyor belt systems for loading same.

Rates of loading or discharge:— Bagged cargoes 250 tons per gang per day; Bulk 400 tons; Bulk grain loading 3,000 tons; Unitised pulp 500 tons; Paper 500 ton; Timber 500 tons all per gang per day.

A large motor transport fleet is always available at the port and the Agents also have their own road haulage company.

STEVEDORES: Provided by: J.M. Piggins & Co.Ltd. Tel: 72827. Telex 76251. Ceres (UK) Ltd., Stracathro. Tel: (0167484) 491. Fax: 0167484-608.

MEDICAL: Small hospital in Montrose. Several major units within easy reach by road.

TANKERS: There is no oil berth in the harbour except the facilities offered by Rix Petroleum for the receipt into their 3,000 ton storage depot of gas oil.

DENSITY: At high water average 1024 but can be as low as 1005 at LW during heavy river outflow.

FRESH WATER: Supplied from quayside hydrants at all berths.

FUEL: Obtainable from road tanker, gas oil and H.S.D. from more prominent oil companies. Rix Oils can supply gas oil from local stocks. Contact J. Piggins.

FIRE PRECAUTIONS: Normal rules to be observed.

CONSULS: None in Montrose.

REPAIRS: Minor deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Cargo ship and engine surveyors Johnston & Smart or Pirie & Smith available from Aberdeen at short notice.

Cargo Superintendents regularly working at the port on loading out and discharging various bulk cargoes, include Cargo Superintendents (London) Ltd., 50 Wellington Street, Glasgow; James Patterson, The Old Granary Buildings, Meadowside Quay, Partick, Glasgow, and Malcolm Main at same address.

GANGWAY/DECK WATCHMEN: Can be arranged. Owing to rang tide on riverside berths mooring watch strongly recommended.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CERTIFICATES: On arrival Ship's Register may be asked for.

CUSTOMS ALLOWANCES: As arranged between Customs Officer a Master.

CARGO GEAR: The port is equipped with mobile cranes which can used at any berth. These are of various capacities and the maxim lift is 100 tons for which prior notice is required.

REPATRIATION: Facilities available with excellent railway connectio Air connections from Aberdeen.

AIRPORT: Aberdeen 36 miles. Montrose has facilities for light airc and helicopter landing.

TIME: GMT with 1 hour advance for British Summer Time, approximat March to October.

HOLIDAYS: *Port Holidays:* Christmas Day; Boxing Day; 1st and 2 January; One day Spring, mid-Summer and Autumn Trades Holiday

POLICE/AMBULANCE/FIRE: Report to Dock Office immediately. D 999 and ask for whichever emergency service required.

EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue S Centre – Forth District Tel: Crail 666.

TELEPHONES: Not possible to place telephones aboard. Kiosk Wharf near Agents office. Comprehensive connections to Continenta Telex services from Agent's office.

SERVICES: Laundry, Ship Chandlers and Lloyd's Agent immediate Compass Adjuster, Radio/Radar Mechanics can be called in fr Aberdeen at short notice.

BANKS: Usual branches of Scottish banks all in High Stre No American or European banks.

STORING: Vessels can be stored by truck. Trucks can proceed alo side vessel. Fork lifts can be used if required. Customs notificat required for all bonded stores.

Stevedores can be employed to assist with storing and also lash and fastening deck cargo.

SHORE LEAVE: No restrictions on crew members after inw clearance.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: The Port Authority provides skips for garba disposal, however they are not to be used for disposal of waste foo

WASTE OIL DISPOSAL: Can be arranged through ship's agents.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

DEVELOPMENTS: Berth No. 8 has been reconstructed to prov 293 m. of continuous quayside with a minimum depth of 18 ft. bel C.D.

AUTHORITY: Montrose Port Authority, Harbour Office, South Qu Ferryden, Montrose, Tayside DD10 9SL. *Tel:* (01674) 672302, 673 672729. *FAX:* (01674) 675530. *Contact:* Captain H.J. Johans Harbour Master/Chief Executive.

MOSTYN: 53.19 N. 03.16 W.

PILOTAGE: Compulsory for vessels over 50 m. LOA. ETA requ 24 hours in advance. Contact Mostyn Docks Ltd. Tel: (01745) 560 Update ETA by VHF Channel 14, 2 hours prior to H.W. Pilots bo 1.5 hours before H.W. at Dee Buoy (Lat. 53° 22' N., Long. 03° 18.8'

ANCHORAGES: Anchorage in Mostyn Deep, 7.0 m. depth at low wa

RESTRICTIONS: Vessels enter port between 1 hour before high w and high water.

MAX. SIZE: Max. LOA 100 m., max. beam 14.5 m. and draft 4.0 m. than Liverpool high water prediction.

RADIO: Advise Mostyn Dock Ltd. of ETA. Telex: 61245 Mos Fax: (01745) 560324.

VHF: Channel 14 monitored at Mostyn Dock from 2 hours before water to high water.

TUGS: One tug of 4.5 tons bollard pull available. Line tender available.

BERTHING: 3 berths available (2×75 m. and 1×110 m.). All berths completely at low water. Dock bottom absolutely flat. Vessels mus able to take bottom.

CRANES: Cranes up to 75 tons capacity and various grabs avail

STEVEDORES: Normal hours: 0800 hrs. – 1600 hrs., Monday to Fr except Bank Holidays. Overtime possible between 0600 hrs. 2200 hrs.

MEDICAL: Hospitals and dentists nearby.

TANKERS: No facilities.

DENSITY: 1020.

FRESH WATER: Available by hose. Cost £2.50 per tonne.

FUEL: Available by road tanker.

FIRE PRECAUTIONS: Normal precautions to be taken.

SURVEYORS: Cargo inspectors available, also Lloyd's.

GANGWAY/DECK WATCHMEN: Watchmen not required.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: Facilities available.

AIRPORT: Manchester Airport, 40 miles.

EMERGENCY CO-ORDINATION CENTRE: Liverpool Coast Tel: (0151) 931-3341. Holyhead Coastguard, Tel: (01407) 7620

STORING: See "Prelims".

(1) Truck.
(2) —
(3) Yes.
(4) Yes.
(5) —
(6) Yes.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Skips provided on quay free of charge.
WASTE OIL DISPOSAL: By road tanker.
DEVELOPMENTS: New berths in outer river planned.
AUTHORITY: Mostyn Docks, Mostyn, Holywell, Clwyd CH8 9HE. *Tel:* (01745) 560335. *FAX:* (01745) 560324. *Telex:* 61245. *Contact:* Captain R.C. Hyde-Linaker, Harbour Master.

NEW HOLLAND: 53.42 N. 00.21 W. (See Plan)

PILOTAGE, DOCUMENTS, ANCHORAGES, ETC.: See "Hull".
RESTRICTIONS: Vessels arrive and depart on high water. Vessel always aground (N.A.A.B.S.A.).
MAX. SIZE: Max. size 5,000 d.w.t. Max. LOA 100 m. No restriction on beam or air draft. Max. draft at Spring tide 7.0 m. – 7.5 m.
TUGS: Not necessary.
BERTHING:
Imports: The Terminal specialises in the import of feeding stuffs, fertilisers, coals, cokes, etc. The import route has been designed to off-load cargo, from ship to storage or direct to carrier, efficiently and fast and offers via drop-scale and weighbridge, full documentary control and management.
Terminal: With two berths, an inner berth for vessels of 2,500 d.w.t. and an outer berth with a maximum capacity of 5,000 d.w.t., the Terminal reaches into deep water channels of the River Humber and enjoys the advantage of only requiring one Pilot from Spurn Point. Unloading by grab discharge direct to covered conveyor belts, the import route is rated at a capacity of between 230 – 300 tonnes per hour and incorporates full bypass facilities.
Weighing: Grains and derivatives can be passed through a drop-scale with a capacity of 250 tonnes per hour; coals, cokes and other bulk commodities moving from the site are weighed by means of 2×60 tonne road and/or 100 tonne rail weighbridges.
Storage: Grains and derivatives can be passed by the conveyor systems direct to 4 flatstores with an approximate capacity of 43,000 tonnes, all with movable and fixed partitions. Coals, etc., are directed to open storage for ease of distribution.
Distribution: Direct ship to road haulage is made possible by 2 overhead lorry hoppers. Recovery from the flatstore is by means of Front End Loaders, and if required, import commodities can be loaded via the export system, weighed or unweighed.
Exports: The Terminal has a dual capability for simultaneous import and export and has been designed for the export of grains and other bulk commodities.

The export route has many features unique to Humberside, and with full weight control and documentation offers the ideal export venue for any product.
Terminal: With two export berths, an outer berth of 5,000 d.w.t. capacity and an inner berth with a maximum capacity of about 1,500 d.w.t., loading is rated at 400 tonnes per hour via the covered conveyor belt which feeds 4 loading spouts, direct to the ship's cargo holds. Vessels approaching New Holland from the North Sea need only one pilot in and outward, thereby reducing costs.
Reception: The Terminal is the only specially designed export terminal in Humberside that can receive grain direct from railcars. With extensive private sidings and shunting locomotive, full train loads can be handled in intake pits. Road haulage delivery is either by intake pit or direct to open compound. Reception of grains also includes a grain testing station for quality control.
Direct or Indirect Loading: Grain intake can either be pre-assembled into 5 silos with an approximate overall capacity of 3,500 tonnes and then loaded directly to ship. Coals, coke, etc., are fed directly to the main export belt from their pre-collected storage areas.
Weighing: All commodities entering the site are weighed by fully computerised weighbridges, 2×60 tonne road and 1×100 tonne rail weighbridges. Export of grain related products is also monitored by 2 dropscales weighbridges prior to being loaded onto export vessels.
CRANES: 2×8 ton electric rail mounted cranes.
STEVEDORES: Work around the clock, from Monday 0600 hrs. – Friday 2200 hrs.

Saturday and Sunday work by arrangement.
FRESH WATER: Available at 5 t.p.h. No charge, included in jetty dues.
FUEL: Available by barge from Hull.
REPAIRS: Local shipyard can undertake minor repairs.
HATCHES: Opening and closing by ship's crew.
AIRPORT: Humberside Airport is 15 minutes away by road. Air U.K. have flights to Aberdeen, Amsterdam, Bergen and Teesside.
TELEPHONES: No shore connections. Public telephone available on pier.
GENERAL: The New Holland Bulk Terminal is situated on the South bank of the River Humber, about 4 miles East of the Humber Bridge, and about 20 miles inland from Spurn Point. Close proximity to the U.K.'s motorway and dual carriageway network gives the terminal a competitive and strategic position for the import and export of bulk commodities. Close connections to the M1, A1, M18 and A15 Humber Bridge link road ensure optimal North/South connections with the M180, M62 and A6 offering good East/West connections. The terminal has its own railway sidings, connected directly to the British Rail network.
GARBAGE DISPOSAL: Skip provided at Jetty Head for ship's use at no charge to vessel.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: New Holland Bulk Services Ltd., Old Ferry Terminal New Holland, P.O. Box 1, Barrow upon Humber, South Humberside, DN19 7SD. *Tel:* (01469) 531102. *Telex:* 527157 Nhship G. *FAX:* (01469) 531966. *Contact:* J.G. van Velzen, General Manager. J. Lyne, Operations Manager.

NEWHAVEN: 50.47 N. 00.04 E. (See Plan)

PORT LIMITS: A line drawn from a position 300 ft. South of breakwater in a 075° direction to Seaford Bay.
DOCUMENTS: See "London".
PILOTAGE: Pilotage compulsory for all vessels over 50 m. length. Contact Newhaven Radio, VHF Channels 12 and 16, advising ETA 12 hours in advance.
RESTRICTIONS: 5.5 m. through entrance to port LWOST. Inner harbour then dredged depth of 4.5 m. in accordance with chart datum 3.5 m. below OD Newlyn (tide gauge readings are directly applicable to soundings).
MAX. SIZE: Max. LOA 520 ft. 25 ft. draft taking bottom on soft mud at low water. Vessels greater than 350 ft. LOA length must either be towed into or out of port. Vessels for North Quay must not exceed 250 ft. length, draft 17 ft.
HEALTH: See "Health-All Ports" before first U.K. port.
RADIO: Radio Station Newhaven Radio, call sign Newhaven Radio.
RADAR/VHF: No radar service. Ship's may contact West Pier control point on Channel 16, working on Channel 12.
TUGS: One tug available upon request, owned by Newhaven Port and Properties Ltd.
BERTHING: Vessels may be berthed at any time, with prior notice given.
CRANES: 4×3 ton and 1×30 ton (container gantry).
BRIDGES: Vessels requiring to berth at North Quay must arrive within 2 hours either side of HW in order to pass through swing bridge which governs access to this quay.
STEVEDORES: ETA should be given as far in advance as possible and not less than 24 hours before ETA.
DENSITY: Salt water.
FRESH WATER: Available on request. Supplied by shore hosepipe.
FUEL: Available by previous arrangement.
FIRE PRECAUTIONS: Usual no-smoking precautions on quayside in port area.
CONSULS: Norwegian Vice-Consul and French Consular Agency.
REPAIRS: Repairs of a temporary nature only may be carried out by Newhaven Port and Properties Ltd. workshops, Ship & Industrial Repairs Ltd., Unit A3, Beach Road, Newhaven and C. R. Irving Ltd., Chapel Street, Newhaven.
GANGWAY/DECK WATCHMEN: Not provided by Port Authorities but recommended at discretion of Ship's Master.
AIRPORT: Nearest airport Gatwick, distance 30 miles. Served by regular airlines and Shoreham, distance 17 miles.
POLICE/AMBULANCE/FIRE: Police: Civil, Newhaven 515219; Port, Newhaven 514131 (extension: 229). Ambulance: 0830 – 1700 hrs., Lewes 515400; 1700 – 0830 hrs., Lewes 512819; Fire: 999.
SHORE LEAVE: Allowed.
AUTHORITY: Newhaven Port and Properties Ltd., Beach Road, Newhaven Harbour, Sussex BN9 0BG. *Tel:* (01273) 514131. *FAX:* (01273) 512902. *Contact:* P.M. Doran, Port Manager.

NEWLYN: 50.06 N. 05.33 W. (See Plan)

PILOTAGE: Compulsory for all passenger vessels over 20 m. in length, and all other vessels over 50 m. in length. Call "Mount's Bay Pilots" on VHF Channel 16 (Tel: (01736) 66113 (Office), (01326) 319323 (Home) and 0860-207249 (Mobile)).
ANCHORAGES: As shown on B.A. Chart No. 2345, in Mount's Bay.

No anchoring within Newlyn Harbour.
MAX. SIZE: Length 90 m. Draft (loaded) 5.5 m. (forward) and 6.0 m. (aft).
VHF: "Newlyn Harbour" on Channels 16, 12 and 9.
BERTHING: See "Plan".
FRESH WATER: Available at up to 10 tonnes per hour.
FUEL: Fuel barge in harbour able to visit berths. Maximum capacity 450 tonnes.

Road tankers able to visit berths.
REPAIRS: Most electronic (radio, radar, etc.) repairs can be undertaken.
AIRPORT: Flights each day from Newquay to London (Heathrow) via Plymouth. Mounts Bay Boarding Service arrange collection and delivery of passengers between Newquay and Penzance. Travel time Penzance – Heathrow 2.5 hours.
Helicopters: British Airways operate a regular service between Penzance and the Isles of Scilly (30 miles S.W. of Land's End). Mounts Bay Boarding Service can charter helicopters to rendezvous with ships at sea.
BANKS: All large clearing banks available in Penzance (2 km.) from Newlyn.

Barclay's and Lloyd's in Newlyn.
GENERAL: Newlyn is primarily a fishing harbour with a turnover of £24m. of fish landed in 1995.

The only commercial traffic, using the port (South Pier), are those vessels calling for bunkers, water or stores.

The width of the harbour entrance is 45 m. The area of the harbour is 33 acres and is tidal.
AUTHORITY: Newlyn Pier and Harbour Commissioners, Harbour Office, Newlyn, Penzance TR18 5HW. *Tel:* (01736) 62523. *FAX:* (01736) 51614. *Contact:* A.T. Munson, Harbour Master.

NEWPORT: 51.35 N. 02.59 W. (See Plan)

DOCUMENTS: Required for arrival.

C142	2 copies	Crew Declaration
C14	3 copies	Stores Declaration
C13	2 copies	General Declaration (completed by Agent)
C16	2 copies	Cargo Inward Declaration
C74	1 copy	Master's Authority (completed by Agents)
C1320	2 copies	Cargo in unregistered spaces

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.
PILOTAGE: Telegraphic address – "Sewpil G 498180". Advance notice required – 24 hours. VHF Channel – Channel 16 for contact, thence Channel 6 for conversation. Description of pilot boat – diesel launch, black hull, white superstructure. Particular light or sound signals to be made by vessels requiring a Pilot – Code Signal 8, i.e. 3 longs 2 shorts. Pilot boat is located in vicinity of Breaksea Lightvessel, or in vicinity of Merkur Buoy, for small vessels. Maintain VHF contact (if possible) with pilot cutter and obey instructions with reference to positioning of vessel to facilitate boarding of Pilots.
ANCHORAGES: Large vessel should anchor in deep water to North of one Fathom banks. Deeper water anchorage (10 – 14 fathoms) in area between Breaksea Lightvessel and North 1 Fathom Bank Buoys to the South, and shallow water off Barry Roads to the North. Small vessels will find safe anchorage in Barry Roads in varying depth, depending on weather conditions and draft.
RESTRICTIONS: Entrance to Newport Docks is by means of a sea lock 1,000 ft. long, 100 ft. wide. Entry possible from 4 hours before to 4 hours after HW, depending on size of vessel.
MAX. SIZE: Max. size of vessels accepted at Newport is 244 m. long, 30 m. beam, 10.5 m. draft.
HEALTH: Port Health Authority board vessel at entrance lock and Pratique is automatic.
See "Health – All Ports" before first U.K. port.
RADIO: At sea – Land's End radio station, call sign GIL. Within Bristol Channel use Portishead Radio.
VHF: Vessels requiring entry can contact port on VHF radio Channels 71 and 69.
TUGS: Normally join at Newport Deeps. Ship's line used.
BERTHING: South Dock, normal depth of water 10.7 m. North Dock, normal depth of water 8.2 m.
CRANES: Heavy lift/container cranes: 2×25 tonne electro-hydraulic cranes.
Bulk handling: 6×10.0 tonne electric grabbing cranes.
General cargo: 7×10.0 tonne, 13×6 tonne electric cranes and 1×45 tonne mobile harbour crane.
Handling equipment up to 27 tonnes capacity with a comprehensive range of attachments is available.
SPECIALISED CARGO HANDLING FACILITIES:
Combi Ship Operations: Heavy lift/containers for combi vessels are handled by the 25 tonne cranes at the same berth where breakbulk general cargo is handled.
Forest Products: Surfaced open storage: The North side, South Dock area.
Hardwood Terminal: South Dock (East side) covering 3 hectares.
Banana Imports: There is a terminal of 3 hectares for a weekly Jamaican/Costa Rican service importing bananas and exporting general cargo. Included within the terminal is a temperature controlled transit shed.
BULK HANDLING FACILITIES: Coal and coal products are handled at a dedicated 1.2 hectare facility.
Animal feedstuffs are imported through an Animal Feed Terminal.
STEVEDORES: Labour is allocated to vessels on arrival.
Working Hours: Monday to Friday: 0800 – 1700 hrs., 0600 – 1400 hrs., 1400 – 2200 hrs.
Saturday: 0730 – 1200 hrs., 0600 – 1400 hrs., 1000 – 1400 hrs.
Sunday: 0600 – 1400 hrs., 1400 – 2200 hrs.
MEDICAL: No advance notice of medical attention for crew members is required and hospital facilities are available.
DENSITY: Average density of water in docks is 1016.
FRESH WATER: Available at all berths.
FUEL: All classes of fuel available.
REPAIRS: All wet dock and engine repairs possible.
DRY DOCK: Bristol Channel Ship Repairers Ltd., 454 ft. × 64 ft.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, 0.5 lb. per crew member, reduced by 50% on coastal trade. 1 pint of spirit and 1 pint wine per crew member, reduced by 50% on coastal trade.
REPATRIATION: All facilities for the changing of crew and repatriation are available.
AIRPORT: Glamorgan Rhoose Airport terminal 28 miles from Newport. Regular connection planes to London Airport.
TIME: BST, GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Work not undertaken on Christmas, Easter, Spring and Summer Bank holidays. With the exception of Christmas holiday (25th and 26th December) dates on other holidays vary.
POLICE/AMBULANCE/FIRE: Telephone number 999 stating which service is required.
TELEPHONES: Telephone facilities are available aboard vessels.
SERVICES: Tank cleaning equipment. Facilities for tank washing, compass adjusting are available.
SHIP SUPPLY SERVICE: A ship supply service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent, NP9 2NP. Tel: Newport 56835/6.
SHORE LEAVE: No restrictions to crew members.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Associated British Ports, Dock Office, Alexandra Dock, Newport, Gwent NP9 2UW. *Tel:* (01633) 244411. *Telex:* 498585. *FAX:* (01633) 221285. *Contact:* R.C.F. Williams, Port Manager.

PADSTOW: 50.35 N. 04.55 W. (See Pla

PORT LIMITS: A line from Stepper Point to Gulland Rock, thence N to Newland Rock, thence S.E. to Pentire Point.
DOCUMENTS: All usual documentation required by H.M. Governme
PILOTAGE: Pilot compulsory. Contact via Harbour Office, Tel: (018 532239. VHF via Padstow Harbour Office on Channel 16 during all of hours and 2 hours either side of HW at Padstow. ETA's should be gi at least 12 hours before arrival, amendments up to 2 hours before E Pilot boards off Stepper Point in normal conditions. In adverse conditi ships should endeavour to close the pilot boat as near to the starbo hand buoy as possible in safety. Padstow Bay experiences heavy grou swell. Anchorage not recommended in onshore wind or sea.
MAX. SIZE: Max. length approximately 350 ft. (depending on dra Max. draft 11 ft. any tide. Up to 18 ft. draft on Spring tides. No aird restriction.
VHF: Harbour office, call sign 'Padstow Harbour' listens VHF Channe during office hours and 2 hours either side of HW at Padst Call on Channel 16, working Channel 12.
TUGS: Not available. Local fishing vessels may assist.
BERTHING: All berths dry to firm mud or sand bottom. Depth alongsi South Jetty 11 ft. every tide and 18 ft. Springs. Depth alongside So Dock and West Quay 9 ft. every tide and 16 ft. Springs. Lesser dep in Inner Harbour and Outer Basin.
Inner Harbour to be kept "wet" with entry either side of high wate the use of a tidal gate. Max. size 45 m. LOA, 9.5 m. beam a 3.5 m. draft.
CARGO HANDLING: Undertaken by Padstow Harbour Commissione Dry bulk and unitised cargoes handled. Limited storage facilities. Cra hired by Harbour Commissioners to suit requirements.
FRESH WATER: Available, delivery from standpipes.
FUEL: Marine gas oil available direct from bunker tank on South P
REPAIRS: Welding and general engineering services readily availa
DRY DOCKS: A & J Marine (Cornwall) Ltd. Tel: (01841) 533114. dry dock – 70 ft. × 32 ft. × 12 ft. draft at Springs.
STORES: All usual stores available.
GARBAGE DISPOSAL: Skips available onshore.
WASTE OIL DISPOSAL: Can be arranged through the harbour off
SEAMAN'S CLUBS: Assistance available.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Padstow Harbour Commissioners, Harbour Off West Quay, Padstow, Cornwall PL28 8AQ. *Tel:* (01841) 532 *FAX:* (01841) 533346. *Contact:* Captain J. Hinchliffe, Port Administra Harbour Master.

PEEL, Isle of Man: 54.14 N. 04.40 W. (See Pl

PILOTAGE: Not compulsory.
MAX. SIZE: See "Berthing".
VHF: Channels 16 and 12 available only when vessels expe Coverage provided throughout 24 hours by Douglas Harbou Channels 16 and 12.
BERTHING: Outer Harbour: Max. LOA 250 ft. Max. draft 14 ft. afloat over LWOST. Not tenable with strong Northerly winds. Ves up to 350 ft. and max. draft 10 ft. can be accommodated in ce conditions.
Inner Harbour: Max. LOA 160 ft., draft 10 ft. on Neaps, 13 ft Springs. Dries out at LW. No quay space for storage.
GARBAGE DISPOSAL: There is an enclosed skip on the break for waste.
WASTE OIL DISPOSAL: Arranged through the Harbour M (Lubricating oil only).
SEAMAN'S CLUBS: None.
CURRENCY: Isle of Man currency is the same value as U.K., but ca be used in U.K.
AUTHORITY: Isle of Man Department of Transport, Harbours Div Sea Terminal Building, Douglas, Isle of Man. *Tel:* (01624) 68 *FAX:* (01624) 626403. *Contact:* Captain E.E. Kaighin, Direct Harbours.
Port Manager at Peel: Captain M. Brew. Tel/Fax: (01624) 8423

PENZANCE: 50.07 N. 05.32 W. (See P

PORT LIMITS: The seaward boundaries of the Port for the purpo charter parties are considered to be the harbour walls.
DOCUMENTS: H.M. Customs require the Master or Agent of any arriving from a Port outside the United Kingdom to present the fo documents at the Customs House within 3 hours of the vessel's a during office hours (0900–1230) Monday to Friday or within 6 during night hours.

1 copy	Crew Declaration (Form C.142)
1 copy	General Declaration (Form C.13)
1 copy	Stores and Livestock Declaration (Form C.14)
2 copies	Deck Cargo Declaration (if any) (Form SUR.238)
2 copies	Crew List (IMO Fal.Form 5)

The above is intended to be a guide only, not a definitive list.
PILOTAGE: Pilots are available at all times. Call "Mounts Bay during normal working hours or when vessel is expected on VHF 16. Working Channels 12 and 9 are also available. Ships are a give advance notice by R/T or telegram through Land's End Radi to either the Pilot or Local Agent. Alternatively, through the Po which maintains watch on Channel 16, 12 and 9. The Pilot boa point immediately adjacent to the Low Lee Buoy (50° 05° 21.2' W.) from the pilot boat operated in Mounts Bay. Th operated from Newlyn has a black hulled, white deck hou "Dayglow" roof.
The pilot boat only cruises when a vessel is expected.

ANCHORAGE: Vessels awaiting orders or entry into Penzance may anchor in a minimum depth of 15 m., in position 50° 06.1' N., 05° 31.5' W.
RESTRICTIONS: The dock gates at Penzance are normally open, enabling vessels to enter from 2 hours before high water until one hour after high water, although this period may be increased so that the gate is open earlier or later by prior arrangement. The depth on the dock gate at MHWS is 5.49 m. and at MHWN 4.4 m. The entrance is 15.3 m. wide.
MAX. SIZE: Vessels up to a maximum of 95 m. in length and 2,000 net registered tonnes may normally enter within the draft and beam limitations listed.
HEALTH: No health or Pratique documents are required under normal circumstances.
RADIO: Vessels may pass messages, telegrams or link calls through Land's End Radio (GLD).
VHF: Penzance Harbour maintains VHF Radio watch on Channels 16 and working Channels 12 and 9, whenever the dock gates are manned from 2 hours before high water until one hour after high water on both tides, 7 days a week throughout the year. In addition, the radio is manned Monday to Friday between 0830 hrs.–1200 hrs. and 1300 hrs.–1630 hrs.
RADAR: There is no port radar.
TUGS: Tugs are available with prior notice, however, normal berthing is undertaken with the aid of pilotage workboats.
BERTHING: The wet dock has an entrance 15.3 m. wide and has 5 berths. Vessels discharging cargo should have a maximum length of 90 m.

The outer harbour has 4 berths. Berth No. 1 is for the use of the Isles of Scilly Ferry and Berth No. 7 is normally designated as a drying out berth for ship repair.
CRANES: Cranes are available with maximum lifts of up to 15 tonnes. Dual gear is normally used for discharge and mobile cranes of greater capacity are available locally.
BULK CARGO FACILITIES: Bulk cargo is discharged and loaded by Grab.
SPECIALISED CARGO HANDLING FACILITIES: There is one drying berth with an operational depth of 4.7 m. at MHWN which has been adapted for heavy lift Ro/Ro vessels. This berth is available by prior arrangement.
BRIDGES: A swing bridge provides access into the dry dock basin.
MEDICAL: Full hospital and dental services are available in Penzance through the Agents or Port Medical Officer. Evacuations are arranged through the Port Medical Officer and the Mounts Bay Boarding Service.
STEVEDORES: Generally 24 hours notice is needed to provide stevedores.
DENSITY: The density of the dock water is 1025. Fresh water can be provided on all berths, delivery rates nominally 15 tonnes per hour.
FRESH WATER: Available on all berths.
FUEL: Marine gas oil by pipeline at 3 bunkering points along the South Pier with up to 55,000 litres available immediately from harbourside tanks. Greater quantities may be supplemented by road tanker. Lubricating oil and other fuel plus liquid petroleum gas available through ship's Agent.
CONSULS: Vice-Consuls for France and the Netherlands are resident in Penzance and Consulates for Denmark, France, Greece, Norway, Spain, Sweden and Germany are located nearby.
REPAIRS: All types of engine and deck repairs carried out to both cargo and tanker vessels.
DRY DOCKS: There is one dry dock 74.73 m. long with a breadth of 11.9 m. and a maximum draft of 3.35 m.
SURVEYORS: Department of Transport, Lloyd's, Norsk Veritas, Bureau Veritas, American Bureau and the Salvage Association have surveyors readily available at Penzance, as are several independent surveyors and consultants.
GANGWAY/DECK WATCHMAN: The employment of a watchman would only be needed in Penzance wet dock if the vessel is unmanned.
OPENING/CLOSING HATCHES: The opening and closing of hatch covers is usually carried out by the ship's crew.
CUSTOMS ALLOWANCES: The following are permitted from Ports within Home Trade limits:

Items	*Descriptions*	*Quantities*
Tobacco	Cigarettes	100
	Cigarillos	50
	Cigars	25
	Smoking Tobacco	125 grams
Alcohol	Over 20% volume	0.25 litre
	Under 20% volume and fortified or sparkling wine	0.50 litre
	Still table wine	1 litre

Arrival from Ports outside home trade limits:

Items	*Descriptions*	*Quantities*
Tobacco	Cigarettes	200
	Cigarillos	100
	Cigars	50
	Smoking Tobacco	250 grams
Alcohol	Over 20% volume	0.50 litre
	Under 20% volume and fortified or sparkling wine	1 litre
	Still table wine	2 litres

REPATRIATION: Facilities are readily available for effecting crew changes and repatriation where this is necessary and may be done with medical escort or not as required (See "Ship Supply Service").
AIRPORT: Newquay Airport has connecting flights to London (Heathrow) via Plymouth and/or Exeter and also regular flights to Aberdeen. Total travel time Penzance to London (Heathrow) is 2.5 hours. There is also a Heliport in Penzance with regular flights between the Isles of Scilly.
TIME: Local time GMT. Summertime GMT plus one hour.
HOLIDAYS: Public Holidays in the United Kingdom: New Year's Day, Good Friday, Easter Monday, early and late May Bank Holidays (Mondays), August Bank Holidays (first and last Monday), Christmas Day and Boxing Day.

The Harbour does not close for any of these holidays.
FIRE/POLICE/AMBULANCE: The Emergency Services are obtainable by dialling 999 or on more routine matters on the following telephone numbers: Police (01736) 62395; Fire Service (01736) 62918; Ambulance (01872) 78181; Coastguard (01326) 317575.
EMERGENCY CO–ORDINATION CENTRE: Falmouth Marine Rescue Co–ordination Centre is available on Falmouth (01326) 317575 or on Telex 45560. The station maintains a 24 hours, 365 day watch.
SERVICES: Compass adjusting at 2 hours notice, vessels can be swung in daylight hours in Mounts Bay. Divers, engineers, welding, hydraulic repair, radar, radio and other electronic repairs or servicing are available 7 days a week.
BANKS: The four principal clearing banks have branches in Penzance: Midland, Lloyd's, Barclays and National Westminster.
STORING: Vessels can be stored alongside from lorries which park immediately alongside the vessel. The operation can usually be carried out by the ship's crew, however, forklift trucks can be made available.
SHIP SUPPLY SERVICE: *Mount's Bay Boarding Service:*

By helicopter: British International Helicopters operate a regular service between Penzance and the Isles of Scilly (30 miles S.W. of Land's End). Mount's Bay Boarding Service (MBBS) can charter helicopters for rendezvous with ships at sea for transfer of equipment and personnel.

Parcels: MBBS collect and despatch stores, parts, charts, etc, via British Rail "Red Star" parcels service, T.N.T. "Overnite" and "Courier", part of the G.P.O. Datapost and Securicor.

Charts: All British Admiralty charts and publications are available within 12 hours.

Stores: Fresh, frozen and dry stores are obtainable within 6 hours notice, while Bonded stores are available at 24 hours notice.

Spare parts: MBBS arrange clearance, forwarding and transport of spare parts to meet vessels on arrival. Undivided lifts of 1.5 tonnes can be handled (up to 10 tonnes by arrangement).

Crew transfer: MBBS can land and clear crew through Customs and Immigration as well as arranging for their travel onward to worldwide destinations. MBBS can also meet crew and either embark or accommodate them until the vessel's arrival.

Landing sick crew: Although in urgent cases, vessels are in direct contact with Falmouth's Coastguard MRCC, MBBS arrange the landing of non-urgent cases. In both instances MBBS liaise with local Coastguards, Customs, Immigration, Doctors and Hospitals, and can usually provide interpreters for non–English speaking crew. MBBS visit and look after the interests of hospitalised crew, and can report to their company/family. MBBS arrange travel and repatriation of crew members either with or without medical escort, according to Doctors' or hospital instructions.

Contact: J.H. Bennetts Ltd., 72 Market Jew Street, Penzance, Cornwall TR18 2LF. Tel: (01736) 330808 (Direct), 330505 (Exchange). Fax: (01736) 67024.
SHORE LEAVE: There are no restrictions on crew shore leave.
IDENTIFICATION CARDS: An International Seaman's Card is sufficient identification for crew members.
REGULATIONS: There are no unusual Regulations affecting the Port.
DELAYS: Vessels will berth on the tide and will either commence discharge upon arrival or the following morning if they have arrived overnight.
GARBAGE DISPOSAL: Skips are available on quays. Also contact BIFFA (Tel: (01736) 60736).
WASTE OIL DISPOSAL: By road tanker, contact Pellows (Tel: (01872) 863927).
DEVELOPMENTS: Port development is under review.
AUTHORITY: Penwith District Council, St. Clare, Penzance, Cornwall TR18 3QW. *Tel:* (01736) 62341. *FAX:* (01736) 66114.

Harbour Master, Harbour Office, Wharf Road, Penzance, Cornwall TR18 4AB. Tel: (01736) 66113 office hours; 62341 Ext: 294 office hours; 61119 outside office hours. *FAX:* (01736) 66114. *Contact:* Captain M. Tregoning, Harbour Master. Mobile Tel: 0860-207249.

PERTH: 56.24 N. 03.25 W. (See Plan)

LOCATION: On River Tay, 35.4 km. above Dundee and 48.3 km. from sea.
DOCUMENTS: Normal documentation for arrival and departure U.K.
PILOTAGE: Navigation on the River Tay between Dundee and Perth is difficult and can be hazardous. The Perth Harbour Master will arrange for the services of local Pilots to assist vessels in making passage between Dundee and Perth. The contract for the services of a Pilot is between the Pilot and the vessel's Owner. The account will be rendered direct from the Pilot to the Shipping Agent for the charge to the Owner. Masters are strongly advised to make use of this facility, although it is not compulsory and is not provided under the terms of the Pilotage Act 1987. Pilotage from sea to Dundee is compulsory.
ANCHORAGES: Off Birkhill, depth 5.0 m. at L.W.O.S.T. (Emergency use only).
RESTRICTIONS: Air draft – Road Bridge at Dundee 22.0 m. Railway Bridge at Dundee 23.8 m. M.H.W.O.S. Vessel's draft for acceptance at the discretion of Perth Harbour Master, up to a maximum of 4.2 m. (F.W.). Normal safe F.W. draft is 0.2 m. less than predicted tide height, weather conditions permitting.

MAX. SIZE: LOA 90.0 m., beam 13.0 m. and deadweight 3,000 tonnes.

RADIO/VHF: Perth Radio on Channel 9 for upper river transit.

TUGS: Tug assistance is not normally required, however during periods when River Tay is fast running, tug assistance may be necessary and can be arranged through Agent.

BERTHING: Vessels sit on bottom (soft mud).

Berths No. 1 and 2 – total length 146 m.

Berth No. 3 normally only used for harbour requirements – length 55 m.

Berths No. 4 and 5 – length 145 m.

Berth No. 6 – 67 m.

Average depth throughout harbour – 0.76 m. at L.W.O.S.T. Harbour never dries out.

Tidal Range: Spring tides: M.H.W.S.T. 4.26 m. M.L.W.S.T. 0.76 m.

Neap tides: M.H.W.N.T. 2.89 m. M.L.W.N.T. 1.08 m.

Loading and discharging at all berths is by shore equipment. Lighting for nightwork is available at all berths.

CRANES: Ample mobile cranes available with S.W.L. between 5 tonnes and 40 tonnes. Ample forklifts and elevators for handling bulk cargoes.

STEVEDORES: Tay Stevedoring and Storage Ltd. Tel: (01738) 621114. Fax: (01738) 621682. Telex: 76342.

Calport of Perth. Tel: (01738) 626675. Fax: (01738) 639039.

Normal working hours for both companies 0800 hrs. – 1700 hrs. Overtime will be worked on request, night-time, weekends and holidays.

DENSITY: Fresh water at Perth Harbour.

FRESH WATER: Available at all berths. Rate of delivery 5 t.p.h. – 7 t.p.h. Cost (1996): £ 1.75 per cubic metre – minimum charge £ 20.00.

FUEL: Available by road tanker, arranged through Agent.

REPAIRS: Small repairs undertaken locally by good engineering firm. Major repairs undertaken at Dundee.

SURVEYORS: Cargo surveyors, samplers and tallying available by arrangement through Agent. Classification surveys available by arrangement through Agent.

REPATRIATION: Available by arrangement through Agent.

AIRPORT: Edinburgh 70 km., Glasgow 115 km., Aberdeen 160 km. and Dundee 35 km. Good main road system to all airports.

HOLIDAYS: Stevedores may work on Public Holidays if required.

POLICE/AMBULANCE/FIRE: Police: 621141. Ambulance: 622123. Fire: 622226. All three services can be reached by dialling 999.

SERVICES: Provisions available.

GARBAGE DISPOSAL: Garbage bag supplied to each ship on arrival for small quantities of domestic refuse, then collected by District Council. Removal of larger quantities of refuse and other items can be arranged through agents.

WASTE OIL DISPOSAL: Collection service available by road tanker from all berths. Arrangements can be made through Agent.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: (a) Perth and Kinross Council, Roads & Transport Department. *Contact:* G. Fraser, Head of Transport.

(b) Perth Harbour Office, Lower Harbour, Friarton Road, Perth PH2 8BH. *Tel:* (01738) 624056. *FAX:* (01738) 622263. *Contact:* F.G. Bissett, Harbour Master. D.T. Bain, Assistant Harbour Master.

PETERHEAD BAY HARBOUR: 57.30 N. 01.47 W.

(See Plan)

DOCUMENTS: Vessel's arrival and departure documents required for presentation to H.M.Customs and Excise are as follows:

On arrival ("Report"):

2 copies Master's Declaration, Form C13.

2 copies Crews Declaration, Form C142.

Cargo Declaration (Manifest).

2 copies Cargo Release.

If these "Report" documents have not been collected from the vessel, within 3 hours of making fast alongside (24 hours of anchoring), by H.M.Customs and Excise or the vessel's Agent, then one copy of Forms C13 and C142 are to be lodged in one of H.M.Customs and Excise's post boxes, keeping the other copy together with the manifest and release notes on board. There is one post box on the ASCo North Base, one on the ASCo South Base and one at the Customs House.

On departure ("Clearance"):

2 copies Master's Declaration, Form C13.

Cargo Declaration (Manifest), normally presented by the Charterer or Agent.

PILOTAGE: Pilotage is compulsory for all vessels over 3,500 g.r.t. unless the Master or Mate has a valid Pilotage Exemption Certificate. Pilotage is also compulsory for vessels carrying dangerous goods in bulk and all tankers, unless the Master or Mate has a valid Pilotage Certificate. Masters must call "Peterhead Pilots" on VHF Channel 16, giving minimum one hour's notice of ETA.

In the message of ETA, the following information must be included:

1. Name/call-sign of vessel.
2. Nationality.
3. Length, draft and g.r.t.

Pilot boards within 0.5 miles of breakwaters in fair weather. In adverse weather Pilot boards inside the breakwaters.

ANCHORAGE: Depth within bay up to 12.5 m. Poor holding in Easterly gales.

VHF: Peterhead Harbour Radio – Channel 14. Pilotage operations – Channel 9.

TUGS: Harbour towage can be arranged through shipping Agents, provided sufficient notice is given.

BERTHING: Aberdeen Service Co. (North Sea) Ltd. operate t purpose-built North Sea Oil service bases:

The North Base consists of a 2 berth open pile jetty with depth 7.0 m. The North Breakwater, which has a purpose-built rig moor system provides 4 additional berths with depths of up to 14.0 m.

The South Base consists of a 470 m. quay, depths of 6.8 m. a contains 7 berths supported by warehousing and storage space. T South Breakwater provides 5 berths with depths of 7.8 m.

The Princess Royal Jetty is a 170 m. long open piled jetty whi provides 3 berths protected by Trellex Arch fendering. These berths ha a minimum water depth of up to 6.8 m. at MLWS.

The Tanker Jetty built to import fuel oil for the nearby Peterhead Pow Station, is designed to accommodate vessels up to 50,000 tonn deadweight with a draft of 11.5 m. and a length of 250 m. It is also us for the servicing of North Sea supply vessels, diving support vesse survey vessels and vessels loading grain and other similar bulk cargoe It may also be available for the short term lay-up and maintenance oil rigs.

Peterhead Bay Marina offers fully serviced pontoon berthing 92 locally based and visiting boat owners.

Note: Breakwaters are subject to closure during adverse weather a vessels must be ready to leave at short notice.

CRANES: Numerous mobile cranes available up to 500 tonnes capac

BULK HANDLING FACILITIES: The Princess Royal Jetty is suitab for the handling of various bulk cargoes including grain, peat, fertili and frozen fish. Adjacent storage space is available, and cargo handl is carried out by experienced local contractors. Berths at the breakwat may be available for larger vessels.

TANKERS: See "Berthing".

FRESH WATER: Available at Tanker Jetty, South Base, Princess Ro Jetty, North Base Jetty and North Breakwater. There is no fresh wa at the South Breakwater.

FUEL: Marine gas oil available by pipeline at South Base, Princess Ro Jetty, North Base Jetty and North Breakwater. Bunkering by road tan is possible at the Tanker Jetty and South Breakwater.

REPAIRS: Most deck and engine repairs can be carried out.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Aberdeen, Dyce 30 miles. Feeder routes to main internatio airports, some continental air transportation.

TIME: GMT. Clocks advanced 1 hour last Sunday in March.

Last Sunday in October, clocks retarded 1 hour.

POLICE/AMBULANCE/FIRE: Emergency 999. Police 4725 Ambulance 472494. Fire (emergency only) 999.

POOLE: 50.43 N. 01.59 W. **(See Plan)**

DOCUMENTS: As for other British ports.
PILOTAGE: Pilot compulsory for all vessels over 50 m. LOA, unless Master holds a current Poole Pilotage Exemption Certificate. Pilots board 0.5 mile South of Poole Bar Buoy from cutter. Prefer ladder 0.50 m. from water and a good lee. VHF watch kept on Channel 16 working Channels 9 and 14. As much notice as possible. Address: Pilots, Poole.
ANCHORAGE: Vessels can anchor anywhere in Poole Bay and Studland Bay. Good holding ground and protected in all but Easterly gale.
RESTRICTIONS: Vessels drawing up to 5.2 m. can enter at any state of tide. Drafts in excess of 5.2 m. must wait for the tide.
NOTE: Advertised depth in main shipping channel:
From Bar Buoy Entrance to Terminals 2 and 3 is 6.0 m. at Chart Datum, but to Terminal No. 1 it is 5.2 m. at Chart Datum.
MAX. SIZE: Max. length 140 m., beam – no limit, draft 5.2 m.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Vessels using the Port may call direct on VHF Channel 16 – working frequency Channel 14 call-sign "Poole Harbour Control".
TUGS: 2 tugs, 8 ton and 7 ton bollard pull. Join at Stakes Buoy, by special application arrangements can be made to join at North Haven Point. Ship's lines. No difference in charges.

Pilots will advise whether a tug is necessary or not. Any vessel in excess of 1,000 d.w.t. or 300 ft. LOA due to pass through the Poole Bridge is required to take a tug. The gap in the bridge is 60 ft.
BERTHING: Berthing time depends on draft at some private quays. No restriction at New Quay or Ro/Ro berths.
Ro/Ro Terminal (CFFT):
Size of vessel:
Max. draft 5.5 m.
Max. length 160 m.
Max. depth 5.2 m. at Ro/Ro No. 1 and 6.5 m. Ro/Ro No. 2 and 3 at Chart Datum.

Berths/Equipment: Three linkspan berths for Ro/Ro vessels, Berth No. 1 utilises mooring dolphins, Berth No. 2 has 90 m. long working quay. Berth No. 3 has 130 m. long working quay and a two tier linkspan. Vehicles up to 180 tonnes gross weight can be handled subject to prior approval of Port Authority. A total of some 16 hectares (40 acres) of terminal is surfaced to a high standard, providing parking places for 400 heavy goods vehicles. A further 2 hectares (5 acres) of reclaimed land is available for future port expansion. Warehousing facilities; self weighing weighbridge; fleet of Tugmasters and fork lift trucks; 35 tonne gantry crane in Terminal for handling 20/30/40 ft. containers to/from road.
New Quay:
Length: 158 m.
Depth alongside: 4.5 m. at Chart Datum.

Equipment: 3 ton capacity level luffing rail-mounted crane, 25 ton and 32 ton Scotch derricks and 35 tonne capacity crawler crane equipped for hook/bulk/grab/spider grab duties giving an operational capacity of 6 tonnes at 18 m.; warehousing 3,000 sq.m. plus open storage; mobile crane capacity up to 200 tonnes.
Yard Quay:
Length: 200 ft. (61 m.).
Depth alongside: 2.6 m. at Chart Datum.
Equipment: Warehousing facilities; limited open storage.
Ballast Quay:
Length: 256 ft. (78 m.).
Depth alongside: 3.8 m. at Chart Datum.

Equipment: 6.5 ton capacity level luffing crane fitted with grab/hook for bulk handling/general cargo duties.
Poole Town Quay:
Length: 1,300 ft. (396 m.).
Depth alongside: 3.6 m. – 4.5 m. at Chart Datum.
Equipment: Mobile crane capacity 40 tonnes.
Bulwark Quay:
Length: 91 m.
Depth alongside: 4.3 m. at Chart Datum.

Equipment: 25 ton Scotch Derrick; warehousing facilities; open storage.
Private Quays:
J. T. Sydenham (Timber Wharf)
Length: 250 ft. (76 m.).
Depth alongside: 4.2 m.
Equipment: Mobile crane capacity 45 tonnes.

SHIP SUPPLY SERVICE: It is the practice for pilot cutters of Swansea and Port Talbot to ferry personnel, stores, etc. to vessel off shore and due to dock at the respective ports.
Contact: Swansea and Port Talbot Pilotage, Port Office, King's Dock Lock, Swansea. Tel: (01792) 650855
IDENTIFICATION CARDS: Crew members are advised to carry identity documents when ashore. Security checks are carried out by mobile patrols and at the entrances.
DEVELOPMENTS: Two new 2,800 t.p.h. grab unloaders were installed during 1991 to replace the two oldest units.
AUTHORITY: Associated British Ports, Harbour Office, Lockhead, King's Dock Lock, Swansea, West Glamorgan SA1 1QR. *Tel:* (01792) 650855. *Telex:* 48150. *FAX:* (01792) 650729. *Contact:* A.R. Klinck, Port Manager.
Captain M. Ingamells, Dock and Harbour Master.

PORTLAND: 50.34 N. 02.26 W.

PILOTAGE: Available from Weymouth. Pilot boards in position Lat. 50° 36' N., Long. 02° 24' W.
ANCHORAGE: Vessels seeking shelter from Westerly gales are likely to find more room and better shelter outside the breakwaters in Weymouth Bay.
VHF: All Harbour movements are controlled on VHF Channel 13.
Traffic Regulations: Due to the frequent movements by vessels in the vicinity of Portland Harbour, all vessels approaching Portland Harbour, which are fitted with VHF, should make reports on the appropriate channel to Harbour Master, Portland, when passing through various Radio Reporting Points, whose positions can best be seen on the charts. In addition it is mandatory that such vessels should keep watch on the appropriate channel when within 3 nautical miles of "A" Head (50° 35' N., 20° 25' W.). For details of frequencies see "Admiralty List of Radio Signals".
Radio Reporting Points:
Positions 'EE' and 'CB' are for inward bound vessels.
Position 'CH' is for inward bound vessels proceeding to the Noise Range buoys, moored 0.75 miles S.E. of "D" Head, and for outward bound vessels proceeding between Bill of Portland and The Shambles.
Position 'CG' is for inward bound vessels, and for outward bound vessels proceeding East of The Shambles.
Position 'CF' is for inward bound vessels approaching Portland Harbour from East, and for outward bound vessels proceeding in an Easterly direction.
Reports should include the following information:
Inward bound vessels:
Name of ship.
Position (i.e. Reporting Point letters).
Destination and ETA.
Outward bound vessels:
Name of ship.
Position (i.e. Reporting Point letters).
Intended route East or West of The Shambles (if appropriate).
TUGS: Admiralty tugs available.
BERTHING:
Castletown Pier: Castletown Pier is a commercial wharf and leased to A.R.C. for the discharge of fertilisers. Max. LOA of vessel 82.3 m, beam 12 m. with max. draft 5.3 m.
CRANES: 1 mobile crane.
FUEL: Available by road tanker.
GENERAL: The Harbour, which is protected by breakwaters, is easily accessible by the North Ship Channel (12 m. LWS) or East Ship Channel (12.5 m. LWS). The South Ship Channel is blocked both above and below the surface and is only suitable for small boats.
AUTHORITY: Portland Port Ltd., Castletown, Portland, Dorset DT5 1PP. *Contact:* The General Manager

PORTREE: 57.24 N. 06.07 W. **(See Plan)**

PILOTAGE: Pilot available with 24 hours notice.
ANCHORAGE: No defined areas, left to the discretion of the ship's Master. Care should be taken not to anchor near sewage line.
RESTRICTIONS: Berthing of larger vessels dependent on state of the tide. Larger vessels tend to anchor off and transhipment carried out by ship's tender.
MAX. SIZE: LOA 65.5 m., beam 11.25 m., draft 4.08 m. (Summer) and 3.99 m. (Winter).
VHF: Harbour Master's office on Channels 16 and 12.
BERTHING: Depth alongside 4.8 m. (Neaps) and 6.3 m. (Springs). Depth at entrance 9.1 m.
TANKERS: Fuel oil discharged to B.P. storage depot by means of fuel line under pier.
MEDICAL: Hospital, doctor and dentist located nearby.
FRESH WATER: There are 2 water supply outlets.
FUEL: Ordinary gas oil available from B.P. Depot during normal working hours.
GANGWAY/DECK WATCHMEN: At the discretion of the ship's Master.
OPENING/CLOSING HATCHES: By ship's crew.
CARGO GEAR: Ship's gear used. 18 tonne mobile crane available.
REPATRIATION: No facilities.
AIRPORT: At Broadford, 50 km. from the harbour.
TIME: GMT in Winter. GMT plus 1 hour in Summer.
HOLIDAYS: January 1st, 2nd and 3rd; Good Friday; Easter Monday; May 1st; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Police Tel: Portree 2888.
EMERGENCY CO-ORDINATION CENTRE: Coastguard: Shetland District for Portree. Tel: Oban 63720. Station at Portree not continually manned.
SERVICES: The following are NOT available: Radio, radar, tugs, stevedores, consuls, repairs, surveyors, telephones.
BANKS: Royal Bank of Scotland plc, Bank Street, Portree.
Clydesdale Bank plc, Portree.
Bank of Scotland, Somerled Square, Portree.
SHIP SUPPLY SERVICE: Launch available.
GENERAL: General stores, fruit and vegetables available in local shops.
GARBAGE DISPOSAL: Skip available on pier.
WASTE OIL DISPOSAL: Oil tank with capacity 150 gallons available.
SEAMAN'S CLUBS: No club available. Contact Harbour Master to arrange football matches. Shops and swimming pool available locally.
AUTHORITY: Highland Regional Council, Department of Roads and Transport, Regional Buildings, Glenurquhart Road, Inverness IV3 5NX. *Tel:* (01463) 234121. *Telex:* 75313. *FAX:* (01463) 710184. *Contact:* R. Massie.

PORTSMOUTH: 50.48 N. 01.07 W. **(See Plan)**

PORT LIMITS: *Area of Jurisdiction:* The area of jurisdiction for Portsmouth CHA is – So much of the area of the Solent outside the harbour as extends from Gilkicker Point Light (Lat. 50° 46.4' N., Long. 01° 08.4' W.) to the Western end of Ryde Pier (Lat. 50° 44.3' N., Long. 01° 09.6' W.) and from a position at Culver Cliff on the Isle of Wight (Lat. 50° 40' N., Long. 01° 05.6' W.) to the Nab Tower (Lat. 50° 40' N., Long. 00° 57.1' W.), thence to a position 1.1 miles due South of Selsey Bill (Lat. 50° 43.3' N., Long. 00° 47.2' W.), thence on a line due North to a position 0.1 miles due South of Selsey Bill, thence to Chichester Beacon (Lat. 50° 45.9' N., Long. 00° 56.4' W.), thence to Horse Elbow Foul Buoy (Lat. 50° 44.4' N., Long. 01° 03.4' W.) and thence due North to the shore line (Lat. 50° 46.9' N., Long. 01° 03.4' W.), and all the tidal water within Portsmouth Harbour.
Also see "Plan".
DOCUMENTS: (Those marked* to be produced to H.M. Customs Boarding Officer.)
*1 Maritime Declaration of Health.
*1 Crew's Effects List C142.
2 Ship's Reports by Master.
*1 Home Office Form 1B6.
*1 Stores List.
*1 Certificate of Deck Cargo Tonnage.
*1 Grain Certificate.
1 Light Dues Certificate.
1 Port Dues Certificate.
*1 Passenger List.
*1 Landing Card for each non-British passenger.
*Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).
*Load Line Certificate.
*Safety Equipment Certificate.
Lloyd's Certificate.
*Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
*List C143 for packages not cargo or crew/passenger effects.
*Danish Tollpass for ships arriving from Denmark.
Form of Authority for Agent to make Report and clear vessel outwards for Master.
Note: Where cargo is to remain on board for unloading at another port after Portsmouth, 3 copies of Ship's Report are required by the Customs House.
APPROACHES: *The Main Channel:* The outer part of the main approach channel into Portsmouth Harbour lies between Horse and Dean Sand and Spit Sand. The inner part of the channel lies between Spit Sand and East Sand with a narrow coastal bank fronting the coast North-West of Southsea Castle. The channel is dredged to a depth of 9.5 m. and is well marked by leading marks and light buoys. Within the harbour entrance the main channel is bounded on both sides by the 10 m. line.

Portsmouth Harbour has a mean tidal range of 4.1 m. at Springs and 2.0 m. at Neaps. Particular reference should be made to Admiralty Charts and other publications for information on tidal streams in the Harbour entrance and approaches.

PILOTAGE: The normal boarding point for Portsmouth Pilots for ships approaching from the South and East and not exceeding 150 m. in length is approximately 1 mile South of the Warner Buoy. For ships exceeding 150 m. in length, the boarding point will be in the vicinity of the Nab Tower. For ships from the West Solent, the boarding point will be in the vicinity of the North Sturbridge Buoy. Pilot boat can be called direct on VHF Channels 11 or 12, and Queen's Harbour Master and Portsmouth Harbour Radio on Channel 11. Pilots require 24 hours notice of arrival. This notice to include draft, length, beam, particulars of cargo, last port of call and intended berth. Vessels should also contact Pilot 8 hours and 1.5 hours prior arrival at the Warner Buoy.

When leaving the port, the Pilots require 8 hours notice (Tel: (01705) 297395).

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to about 3 ft. from the water, each rung resting firmly against the ship's side; a good lee should be provided whilst making approximately 3 to 7 knots headway.

Notice: The following is part of local Notice to Mariners (No. 34 of 1992), dated 24th June 1992.

Compulsory Pilotage:

3. The following categories of vessels are subject to compulsory pilotage:

(a) A vessel of 48 m. or more in overall length.

(b) A vessel of 20 m. or more in overall length, carrying more than 12 passengers.

4. The following categories of vessels are exempted from compulsory pilotage by Portsmouth CHA:

(a) A vessel in transit through the Solent on passage to or from any position West of the line Gilkicker Point Light to Ryde Pier, provided such vessel does not proceed North of a line from Gilkicker Point Light to Horse Sand Fort Light to Horse Elbow Foul Buoy.

(b) A vessel in Government service, except when berthing or unberthing at any non-Ministry of Defence facility.

(c) A vessel with an Admiralty Pilot embarked while proceeding to or from any Ministry of Defence facility. Such a vessel, proceeding between a Ministry of Defence facility and a commercial facility, is not exempt compulsory pilotage for the berthing or unberthing operation at the commercial facility.

(d) An inward vessel bound to any position West of the line Gilkicker Point Light to Ryde Pier, or going to an anchorage in St.Helen's Roads.

(e) A vessel of an overall length not greater than 150 m., while to the S.E. of the line from Nettlestone Point (Lat. 50° 43.27' N., Long. 01° 06.40' W.) to the Warner Buoy, thence in a N.W.'ly direction to Horse Elbow Foul Buoy, thence due North to the shoreline.

Pilot Boat Recognition and Boarding Points:

5. The Portsmouth Pilot Boat may be recognised by the legend 'Portsmouth Pilots' in black letters on each side of the wheelhouse. There will not be a pilot boat permanently on station.

6. (a) The boarding points for vessels to the South and East of the Isle of Wight are:

(1) For vessels requiring pilotage from the NAB Tower, a position 1 mile to the West of the Nab Tower.

(2) For vessels of an overall length not greater than 150 m., the Pilot will board in vicinity of 1 mile South of the Warner Buoy.

(b) For vessels approaching from the Western Solent, the boarding point for Portsmouth Pilots is approximately 0.8 nautical miles West of the North Sturbridge Buoy.

7. In adverse weather, these points may be altered, and up-to-date information can be obtained from 'Portsmouth Pilots' on VHF Channel 11.

8. Direct communication may be made with the pilot boat on VHF Channel 11 or 12 when on station.

9. Portsmouth Pilots can be contacted on Telex: 9312110368 PMG or on Tel: (01705) 297395. Further details of Ordering Procedures including Notice Required are contained in the Pilotage Arrangements Handbook, obtainable from Port Manager's Department, Harbour Offices, Continental Ferry Port, George Byng Way, Portsmouth PO2 8SP.

Also see "Southampton" – "Notices".

ANCHORAGES: Merchant vessels may only anchor in the Man-of-War Anchorage at Spithead, with the permission of The Queen's Harbour Master, Portsmouth.

If anchorage is prohibited in Spithead, St. Helen's Roads, Ryde Roads or Cowes Roads are the nearest safe anchorages. Mooring Buoy No. 3, off North Corner in the Harbour is sometimes used. Pilots will be fully informed before the vessel's arrival.

RESTRICTIONS: *Speed:* Speed limit of 10 knots in harbour and when within 1,000 yards of shore in any part of the dockyard port; 12 knots within 1,000 yards of any H.M. ships in any part of the Dockyard Port not covered by the 10 knots limit. Dockyard Port boundaries are shown on Admiralty charts.

Also see "General".

MAX. SIZE: See "Berthing".

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a Port Doctor or an officer of H.M. Customs, depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (North European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board, Port Health Authority must be informed, preferably not more than 12 hours nor less than 3 hours before arrival. See "Health – All Ports" before first U.K. port.

RADIO/VHF: Dockyard Port of Portsmouth – Local Notice to Marin – No. 32 of 1991.

VHF Communications in the Solent:

1. The Queen's Harbour Master Portsmouth has overall jurisdic concerning measures for the safety of navigation within the Dockya Port of Portsmouth, inclusive of Portsmouth Harbour, the East So and Eastern Approaches thereto, as defined on Admiralty Charts. T co-ordination of shipping movements within the Solent is carried ou Southampton Vessel Traffic System (Call sign "Southampton VTS Portsmouth Harbour Control (Call sign "QHM") controls the tra entering or leaving Portsmouth Harbour, North of a line between F Gilkicker and Horse Sand Fort.

2. This Notice is issued taking note of current Notices to Marin issued by the Port of Southampton and when taken together the conte of these Notices provide for continuity of communications and the ordination of shipping movements. It is issued in agreement with Harbour Master Southampton.

3. *Entry to the Solent:* Southampton VTS has radar coverage of East Solent up to a line joining Horse Sand Fort and No Mans Land F (but not the Portsmouth Harbour approach channels, North of a l joining Gilkicker Point and Horse Sand Fort). The Duty VTS Offic responsible to the Port of Southampton Harbour Master, maintains rad surveillance and VHF communications in accordance with curr Notices to Mariners issued by the Port of Southampton.

4. All vessels in excess of 20.0 m. in length bound to or from, or pass through the Port of Southampton, vessels bound to or from Portsmo or passing through the Dockyard Port of Portsmouth and vessels bou to or from anchorages or other locations in the Solent are require communicate by VHF with Southampton VTS as shown on Admira Charts and in the Admiralty List of Radio Signals Volume 6, Part 1.

5. *Use of VHF Channels:* All vessels entering and leaving the E Solent are to report to Southampton VTS on VHF Channel 12 wh passing Lat. 50° 40' N., giving their position as a distance East or W of Nab Tower. Vessels proceeding to an anchorage in the Solent shelter or subsequent berthing must report to Southampton VTS wh anchored, together with their approximate position. Whilst at anch vessels must maintain a listening watch on VHF Channel 12. Vess leaving a sheltered anchorage must also report and advise Southamp VTS of their intended destination and whether they are leaving the So via the East or West Solent.

6. *Entry to Portsmouth:* After making the appropriate reports, vess are to revert back to listening watch with Southampton VTS until pass across a line drawn between Fort Gilkicker and Horse Sand Fort wh listening watch is to be changed to Channel 11. Vessels not fitted VHF Channel 11 should remain on VHF Channel 16. Vessels not us the main approach channel are to report before entering the Swashw

7. *Portsmouth Harbour:* The Queen's Harbour Master Portsmouth co-ordinate all shippig movements within Portsmouth Harbour an approach channels to the North of the line joining Gilkicker Point Horse Sand Fort. Advice will be given regarding other ship movements and matters affecting navigation in the Harbour. T Queen's Harbour Master maintains a continuous listening watch on V Channels 11 and 13 and uses these channels for the co-ordinatio shipping movements. Portsmouth is now one of the busiest harbou the U.K. and the need for strict circuit discipline on Channels 11 an cannot be too strongly emphasised. Routine administration traffic is to be passed on these channels. The Commercial Port Manager sign "Portsmouth Harbour Radio") also maintains a constant watc Channel 11. Channel 13 is the Naval Port Operational channel an used by the Royal Navy to control tugs. In the event of overloadin Channel 11, QHM may authorise the use of Channel 13, in which it is the responsibility of QHM to rebroadcast pertinent information.

8. *Requirement by all Vessels to maintain a Listening Watch* vessels, if more than 20.0 m. overall length when underwa Portsmouth Harbour and approach channels North of the line jo Gilkicker Point and the Horse Sand Fort, are to maintain a contin listening watch on VHF Channel 11. All such vessels must req permission from the Queen's Harbour Master to sail or move withi Harbour before leaving their berth.

TUGS: Tow-boat services are available for commercial vesse commercial berths. In addition Admiralty tugs available at comme berths by arrangement with Queen's Harbour Master.

BERTHING: Commercial berths: Camber – length 80 m., depth below C.D. Flathouse – length 300 m., depth 7.0 m. below C.D. Ve up to 156 m. LOA can be accommodated. Albert Johnson Quay – le 210 m. Depth 7.0 m. below C.D. Continental Ferry Port Ro/Ro Links – Max. length 180 m., depth No. 1 – 5.0 m. below C.D., depth No and 4 – 7.0 m. below C.D. North Quay – Max. LOA 110 m., depth below C.D.

Vessels at the Camber Quay must expect to take the bottom mud.

CRANES: 32 ton Scotch Derrick at Flathouse Quay. Mobile provided by stevedoring companies.

STEVEDORES: Available by arrangement with stevedoring comp

MEDICAL: All medical facilities available. Agent should be adv advance. (See "Southampton" entry if arrival is solely to lan personnel).

DENSITY: 1025 salt water.

FRESH WATER: Available.

FUEL: Fuel and Diesel Oil available by road tanker or bunker from Fawley.

FIRE PRECAUTIONS: Notices will be delivered to Master if ber any jetty where special precautions apply.

CONSULS:

Belgium
Denmark
Finland
France
Netherlands
Norway
Sweden

REPAIRS: Minor deck and engine repairs can be carried out Larger repairs and dry dock facilities at Southampton.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: As for "Southampton".

REPATRIATION: All facilities exist.
AIRPORT: Fast train service from Portsmouth to London Airport. Eastleigh Airport local, but mainly short flights to Channel Islands and feeder services.
TELEPHONES: None on board.
GARBAGE DISPOSAL: Vessel operators contract with various waste management companies to provide a service for their ships. Separate contracts are maintained by each vessel operator. Bins are provided at Camber Quay.
WASTE OIL DISPOSAL: Vessel operators contract with various waste management companies to provide a service for their ships.
SERVICES: All marine, radio and radar services can be obtained from Southampton.
SHIP SUPPLY SERVICE: J. Butcher & Sons (Port Services) Ltd., 19 Pembroke Road, Old Portsmouth PO1 2NS. Tel: (01705) 822584. After hours 821347 and 821033.

The Company provides the majority of the towing services in the commercial port, operating in the Eastern Solent from Cowes to Nab Shoal including Spithead, The Mother Bank and St. Helen's Roads. A fleet of 11 vessels is operated, headed by the 525 b.h.p. Kort Nozzle Tugs "Janet James" and "Carol James" providing towing services (including tow boats for smaller ships) and boats for mooring, rope running and berthing purposes. The passenger launch and workboat service transports ships' crews, Agents, technicians, stores and equipment within the harbour area and Eastern Solent.

The tugs and tow boats have been purpose built for berthing and unberthing ships up to 140 m. at the commercial port.

Services of an Admiralty tug available on application to the Queen's Harbour Master.

GENERAL: *Dockyard Port of Portsmouth – Local Notice to Mariners: No. 44 of 1992.*
Portsmouth Harbour – Local Visual Signals:

Notice is hereby given that the following signals affecting traffic are hoisted by H.M. ships or at signal stations at Portsmouth. All other signals are to purely Naval interest.

	Signal	*Meaning and Application*	*Hoisted/Displayed by*
1. *Day*	Red Flag with white diagonal bar.	Large vessel underway in Main Channel or Harbour.	Central Signal Station Blockhouse Signal Station.
Night	Red Light over 2 Green Lights vertical.	Other vessels may be required by QHM to wait alongside or hold in a waiting position.	
2. *Day*	Red Flag with white diagonal bar over one black ball.	Large vessel leaving Harbour. Vessels entering Harbour will be kept clear by QHM. Vessels leaving Harbour will be allowed to proceed clear of the large vessel.	Central Signal Station Blockhouse Signal Station.
Night	White Light over Green Light.		
3. *Day*	One Black Ball over Red Flag and white diagonal bar.	Large vessel entering harbour. Vessels leaving harbour will be kept clear by QHM.	Central Signal Station Blockhouse Signal Station.
Night	Green Light over White Light.	Vessels entering harbour will be allowed to proceed clear of the large vessel.	
4. *Day*	International Code Pennant. Superior to Pennant Zero.	Warship or RFA underway in Main Channel or Harbour warning signal to other ships. Specific instructions will be given by QHM.	Warship or RFA.
5. *Day*	International Code Pennant Superior to Pennant NINE.	Warship or RFA underway in Main Channel or Harbour warning signal to other ships. Specific instruction will be given by QHM.	Central Signal Station Blockhouse Signal Station.
Night	Three Green Lights vertical.		
6. *Day*	Flag E	Submarine entering or leaving Haslar Creek. Warning signal to other ships.	Blockhouse Signal Station, Blockhouse Pierhead (Note: The Amber Light at Blockhouse Pierhead will flash when submarines are actually underway).
Night	Red Light Amber Light	Specific instructions will be given by QHM but all vessels less than 20 m. in length are to be kept clear.	

NOTES:
(a) Within the context of this Notice, a large vessel is deemed to be one that is constrained by her length or draft to maintain the centreline of the Channel.
(b) Instructions from QHM will be passed on VHF Channels 11 or 13 as appropriate.
(c) Vessels less than 20.0 m. may continue to use the Portsmouth Harbour Entrance Boat Channel (See Notice 11/92) when the signals in paragraph 1, 2 or 3 are being displayed.
Dated: 14th September 1992.
Signed: Queen's Harbour Master, Portsmouth.

DEVELOPMENTS: With the opening of the Portsmouth section of the M27 and M275, there is immediate access to Albert Johnson Quays at the Rudmore Roundabout. At present, P & O operate services to Bilbao, Cherbourg and Le Havre; Brittany Ferries to Caen, St. Malo and Santander.

Commodore Shipping operates freight ferries to the Channel Islands.
AUTHORITY: City of Portsmouth, Port Manager's Department, Harbour Officers, George Byng Way, Continental Ferry Port, Portsmouth PO2 8SP. *Tel:* (01705) 297391 (Administration), 297395 (Operations). *Telex:* 9312110368 PM G. *FAX:* (01705) 861165. *Contact:* Captain M.S. Putman, Port Manager. Captain M.J. Evans, Harbour Master.

RAMSEY, Isle of Man: 54.19 N. 04.21 W. (See Plan)

PORT LIMITS: Line joining Shellag Point (3.25 miles North of harbour entrance) and Cor Stack (2.75 miles S.E. of harbour entrance) defines the port limits.
DOCUMENTS: Same as other U.K. ports.
PILOTAGE: Service provided by Harbour Master and is not compulsory. There is no regular pilot boat. Pilot will board 0.5 miles East of harbour entrance.

Contact Harbour Master direct by telephone (01624) 812245 or by VHF Channels 16 and 12 at tide times only. In all cases as much notice as possible should be given.
ANCHORAGES: No specific anchorages, but anchoring not permitted within 4 cables of harbour entrance or within 4 cables of Queen's Pier (3.5 cables S.E. of harbour entrance). Moderately good holding ground in sand, often used by sheltering vessels in S.S.W. or N.W. gales.
RESTRICTIONS: Harbour dries out each LW.
MHWN: Max. available depth 3.80 m.
MHWS: Max. available depth 5.50 m.
MAX. SIZE: For East Quay and West Quay: Max. length 61 m., breadth 9.0 m. Draft 3.0 m. on Neap tide, 4.0 m. at Spring tides.

For Channel Berth: Max. length 70 m., breadth 13 m.

For all berths max. available depth will vary according to tide.
HEALTH: Standard U.K. procedure.
RADIO: R/T, W/T and VHF through Portpatrick Radio (GPK) or Anglesey Radio (GLV).
VHF: Coverage from Harbour Master's Office includes port and approaches, Channels 16 and 12 at tide times only.

Coverage of North Irish Sea from Snaefell Summit by Douglas Harbour Radio, continuous 24 hour watch on Channel 16. Messages may be passed through Douglas Harbour Radio to amend ETA Ramsey, etc.
RADAR: No port radar.
TUGS: None.
BERTHING: All berths dry out each LW. Bottom is sand and shingle.

Name	*No.*	*Length (m.)*	
Channel Berth	1	76	
East Quay	2 & 3	116	
West Quay	4	80	
North Quay	10	73	For lay-by only. Use restricted by sea conditions.

With exception of North Quay all berths readily accessible to road traffic. Load/discharge by ship's gear or shore equipment at ship's discretion.
CRANES: No cargo handling gear at any berth. Mobile cranes can be arranged through Agents with reasonable notice.
BULK CARGO FACILITIES: Bulk cement handling facility at East Quay No. 2 Berth with 2×500 ton silos. Privately owned.
SPECIALISED CARGO HANDLING FACILITIES: No Ro/Ro or bulk liquid handling facilities. Privately owned container handling facilities available.
BRIDGES: Access to upper harbour through swing bridge, by arrangement with Harbour Master. Sufficient depth of water usually available 2 hours either side of HW. At least 24 hours' notice required to swing the bridge outside normal working hours, weekends and holidays. Within normal working hours less notice is acceptable.
STEVEDORES: Arranged through Agent. A minimum of 24 hours' notice required and all working hours are negotiable in advance. Main commodities discharged are all types of general cargo and coal by mobile crane with grab – average discharge rate is approx. 90 t.p.h. Occasional grain cargo loaded by mobile elevator at approx. 40 t.p.h.
MEDICAL: Hospital and dental facilities available without prior notice.
TANKERS: No tanker facilities or berths available.
DENSITY: 1025.
FRESH WATER: Available by hose at approx. 30 t.p.h. on East, West and North Quays. Labour charge £9.85 (1996) plus £1.875 (1996) per 1,000 gallons.
FUEL: Delivery by road tanker from Douglas and Peel to all berths except North Quay. Gas oil and medium fuel oil available at 24 hours' notice. Manx Petroleum (Shell), Tel: (01624) 74652. 100 gallons minimum. Total, Tel: (01624) 844000. 100 gallons minimum.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible by small shipyard in upper harbour.
DRY DOCKS: No dry docks but 2 slipways; one for vessels about 200 g.r.t. and one for about 50 g.r.t. Both slipways in upper harbour.

Also a grid in upper harbour which dries out at approx. half tide, length 40 m., breadth 7.5 m. This grid used occasionally by vessels of up to 300 g.r.t. for bottom plate inspection/repairs. At least 72 hours' notice required, more if possible. Grid hire arrangement through Harbour Master.

SURVEYORS: Isle of Man, Department of Transport, Marine Administration. Tel: (01624) 686634.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Normally handled by ship's crew.

CUSTOMS ALLOWANCES: Standard U.K. allowance.

CARGO GEAR: Loading/discharging of general by ship's gear or mobile crane. Discharge of bulk by grab equipped mobile cranes. A wide range of mobile cranes up to 25 tons available for hire at reasonable notice.

REPATRIATION: Facilities available for repatriation of crew members.

Daily scheduled aircraft connections to London and other U.K./Irish airports. Daily ferry services to Heysham. These services operate all year with supplementary air and sea services to other destinations during the Summer.

AIRPORT: 25 miles distant.

TIME: GMT and BST.

HOLIDAYS: New Year's Day, Good Friday, Easter Monday, May Day, Whit Monday, Senior TT Race Day (usually 1st or 2nd Friday in June), Tynwald Day (5th July), August Bank Holiday, Christmas Day, Boxing Day.

Cargo not normally worked on these days but all working hours are negotiable in advance.

POLICE/AMBULANCE/FIRE: All emergency services available by telephoning 999 on any telephone, no charge is made for this call. Assistance possible from H.M. Coastguard on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: Liverpool Coastguard. Tel: (0151) 9313341. Telex: 629448. Fax: (0151) 9313347. VHF: Channel 16.

TELEPHONES: There are no facilities for telephones to be placed on board.

SERVICES: Lloyd's Agent available. Decca, Kelvin Hughes, Furuno, etc., repairs and servicing available locally. Divers available via Harbour Master.

BANKS: Barclays Bank, 52 Parliament Street. Tel: (01624) 813124.

I.O.M. Bank, 20 Parliament Street. Tel: (01624) 812829.

Lloyd's Bank, 71 Parliament Street. Tel: (01624) 812225/814233.

Midland Bank, St. Paul's Square. Tel: (01624) 814000.

Nat. West Bank, Douglas. Tel: (0624) 29292.

Major banking facilities are available in Douglas.

STORING: See "Prelims".

1. Vessel may be stored by barge or truck.
2. No restrictions unless dangerous cargo being handled. If dangerous cargo being handled as cargo or as part of the stores then all other cargo work/storing to cease.
3. Berths accessible to all road traffic.
4. Forklift trucks may be used on quayside.
5. Bonded stores available through local agent, who will arrange necessary clearance, etc. H.M. Customs may attend at their discretion.
6. Riggers may be arranged through local agent at reasonable notice.

SHIP SUPPLY SERVICE: See "Douglas".

SHORE LEAVE: When Immigration and Customs requirements satisfied (for vessels arriving from a port outside the U.K.), no restriction on crew shore leave provided that they rejoin prior to the vessel's departure.

IDENTIFICATION CARDS: Not required.

DELAYS: Berthing delays are not usual (disregarding awaiting tide) except when strong N.E. to S.E. winds make navigation in the harbour entrance hazardous. These conditions may cause 1-2 days delay if severe.

GARBAGE DISPOSAL: Garbage skip on East Quay, near to Harbour Office. No charge for this service. Access available at all times.

WASTE OIL DISPOSAL: Collection service available at all berths by road tanker operated by Colas (Isle of Man) Ltd. (Tel: (01624) 823360) capacity 2,000 gallons.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Isle of Man Department of Transport, Ports and Properties, Harbours Division, Sea Terminal Building, Douglas, Isle of Man. *Tel:* (0624) 686626 *Telex:* 629335 IOMHARG. *FAX:* (01624) 626403. *Contact:* Captain E.E. Kaighin, Director of Ports.

Harbour Master's Office, East Quay, Ramsey, Isle of Man IM8 1BG. *Tel:* (01624) 812245. *FAX:* (01624) 812245. *Contact:* The Harbour Master.

RAMSGATE: 51.20 N. 01.24 E. (See Plan)

(A) RAMSGATE WESTERN TERMINAL (PORT RAMSGATE)
(B) ROYAL HARBOUR

(A) RAMSGATE WESTERN TERMINAL (PORT RAMSGATE)

DOCUMENTS:

- 2 copies C142, Crew Declaration.
- 3 copies C13, General Declaration, including stores (normally completed by Agent).
- 2 copies C16, Cargo Declaration (if no manifests).
- 1 copy C74, Master's Authority (completed by Agent).
- 2 copies C1320, Cargo in Unregistered Spaces.

These documents should be completed and presented with copies of all manifests and ship's documents when making report.

APPROACHES: *Approach Channel:* The approach channel extends East from Long. 01° 25.30' E. for a distance of 2,133 m. from the Ramsgate breakwater heads. The channel has a depth of −6.5 m (CD) with a base width of 110 m.

The tidal range is +0.3 m. (CD) to +6.2 m. (CD) (predicted).

CHANNEL MARKINGS:

East Brake Buoy: East Cardinal QK FL. 3 every 10 seconds Lat. 51° 19.46' N., Long. 01° 29.1' E.

Starboard Channel Buoy No. 1: Green conical with green con topmark. FL. every 5 seconds G; Lat. 51° 19.51' N., Long. 01° 27.2'

Port Channel Buoy No. 2: Red can with can topmark. FL. 4 ev 10 seconds R; Lat. 51° 19.45' N., Long. 01° 27.2' E.

Channel Buoy No. 3: Green conical with green conical topma FL. every 2.5 seconds G; Lat. 51° 19.51' N., Long. 01° 26.65' E.

Channel Buoy No. 4: Red can with red can topmark. QK FL Lat. 51° 19.45' N., Long. 01° 26.65' E.

Dike Buoy No. 5: South Cardinal. QK FL. 6 plus 1 every 15 seconds Lat. 51° 19.51' N., Long. 01° 26' E.

Quern Buoy No. 6: North Cardinal. QK FL. W; Lat. 51° 19.45' Long. 01° 26' E.

East Breakwater Light Tower: Lat. 51° 19.31' N., Long. 01° 25.34 Day mark red and white. Qk. Fl. Green.

West Breakwater Light Tower: Lat. 51° 19.25' N., Long. 01° 25.30 Day mark green and white. Qk. Fl. Green.

Front Lead Beacon: Lat. 51° 19.29' N., Long. 01° 24.59' E. Occul 8 secs. on, 2 secs. off. Racon beacon fitted. Coloured sectors light: gre 10°, white 2°, red 10°.

Rear Lead Beacon: Lat: 51° 19.29' N., Long. 01° 24.44' E. Fl. ev 8 secs. White.

Harbour Signals: The harbour has established, at the West Pier Sig Station, signals which conform with the International Harbour Sign Regulations.

Port Ramsgate Turning Basin: Maximum dimensions 500 m. Nort South; 550 m. East – West, giving a free swing diameter of 300 (ref. to Chart No. 1827 Ramsgate Harbour and Approaches).

VHF: *Vessel Traffic Services:* All arriving vessels are to notify Ramsgate VTS Office at the West Pier Control Tower on VHF Chann 14 or 16, or by telephone (01843) 592277 (24 hours), of intended arr and requirements.

Vessels should report when approximately 1 hour from Point (Romeo) which is defined as a radius of 2.5 miles from the centre line joining the Channel Entrance buoys.

PILOTAGE: Compulsory for most merchant vessels. Tel: (018 592277 (24 hours). VHF Working Channels 16 and 9.

Minimum notice: Inward 12 hours. Outward: 2 hours.

ANCHORAGE: Anchorages available at Margate Roads, Broadst Knoll and The Downs off Deal (Chart No. 1828; Dover to North Forel applies).

TUGS: 1×13 tonne bollard pull and 1×45 tonnes bollard pull.

BERTHING: Berths/Linkspans No. 1, 2 and 3: All have a dept −6.5 m. (CD). Beam 25 m. (vessels). 9 point mooring system along centre line of the berthing structure, 4 fenders on each side.

Fender positions from the front face of the pontoon: No. 1 – 38 No. 2 – 63 m.; No. 3 – 80 m.; No. 4 – 100 m. (the outer bollard posi 110 m.).

All 3 linkspans are of the same pontoon type, depth moulded 4.4 depth working 1.0 m., ship ends freeboard variable.

Ramp Details: Length 40 m., width 9.1 m. – 10.7 m.; free w 7.0 m. – 9.7 m.; axle loads 50 tonnes.

CARGO HANDLING FACILITIES: *Port Plant:*

3 (4×4) terminal tractors, 70 tonnes drawbar pull.
9 (2×4) terminal tractors, 50 tonnes drawbar pull.
Forklifts of 12 tonnes, 7.5 tonnes, 1.5 tonnes and 1 tonne capac
Container handling forklift truck of 38 tonnes capacity.
Container transhipment gantry of 32 tonnes capacity, handling 2 30 ft. and 40 ft. units.
4×80 passenger motor buses.
Baggage trolleys.
Freight shed of 25,000 sq.m. internal area, equipped with full han equipment.
Cold store facilities for cargo inspection.
Open storage areas, total parking areas of 126,000 sq.m.
Craneage available up to 100 tonnes capacity at 24 hours notic
Hazardous bund facilities.
Tipping pen and conveyor for handling bulk Ro/Ro cargoes.

MEDICAL: Hospital, doctor and dentists available.

FRESH WATER: Available at all 3 berths.

FUEL: Available at berths by road tanker.

FIRE PRECAUTIONS: Fire hydrants available at all berths.

REPAIRS: Possible.

A. & P. Appledore, Military Road, Ramsgate.
Ramsgate Marine, Royal Harbour, Ramsgate.
Walkers Marine, Military Road, Ramsgate.

REPATRIATION: Possible.

EMERGENCY CO-ORDINATION CENTRE: Coastguards: Bas Dover. Tel: (01304) 210008 – VHF Channels 16 and 11.

AIRPORT: 3 miles West of Ramsgate is Kent International A (Manston).

With the longest runway of all regional airports in the Midland Southern England, 24 hours Customs, and its easy access to Lo the airport is ideally situated for air-freight shipments, or as an clearance depot for trucks coming over from Europe.

The airport is in discussions with various airlines, and hopes to d commuter services to major European destinations.

DEVELOPMENTS: Since commencing operations in 1981 in ex £24 million has been invested in the development of Port Ramsg an all-weather Ro/Ro port. The present land area is 143,000 sq of which has been reclaimed from the sea.

The port's facilities include a six-bay freight inspectio transhipment shed, a cold store and chilled cargo inspection u freight drivers cafe and wash room facilities in addition to the ferry passenger terminal buildings and passenger car parks.

In order to handle the increasing demand for container and swap body traffic, a 38 tonne container handling forklift has been brought into operation to augment the 32 tonne container gantry.

1991 also saw the streamlining of the port's traffic whilst within the port area and the completion of the first phase of the re-development of the terminal complex, an on-going development which will result in the construction of new accommodation for the port staff and port official bodies and passenger processing areas.

A new access route, by-passing the town of Ramsgate, linking the port area directly with the A299 trunk road is projected.

AUTHORITY: Thanet District Council, Harbour Office, Military Road, Ramsgate, Kent CT11 9LG. *Tel:* (01843) 592277. *Telex:* 965861. *FAX:* (01843) 590941. *Contact:* Captain J.F. Ewing, Harbour Master.

West Pier Control Tower, Ramsgate Harbour, Ramsgate. *Tel:* (01843) 592277.

Operator: Port Ramsgate Ltd., Ramsgate Harbour, Ramsgate, Kent CT11 8RP. *Tel:* (01843) 587661. *Telex:* 966340. *FAX:* (01843) 589570. *Contact:* R. Cooper, Managing Director. Lester Champs, Operations Manager. T. Lofts, Business Development Manager.

(B) ROYAL HARBOUR

ANCHORAGE: Vessels waiting to enter Ramsgate may anchor in Margate Roads or in the vicinity of the Broadstairs Knoll Buoy, paying due regard to the presence of submarine cables.

APPROACHES: *Approach Channel:* The main channel, 110 m. wide at the base, extends 2,133 m. to seaward from the harbour entrance. Additionally a turning area has been dredged West of the harbour entrance and in the vicinity of the ferry terminal. The centre of the channel is indicated by leading lights and marks 090° – 270° True.

Harbour Signals: Permission to enter the channel and the Royal Harbour may be requested by radio from the Harbour Control. Harbour signals, to conform with the International Harbour Signals, are displayed by the Harbour Control and also at the Lock Head to the marina.

RESTRICTIONS: *Times of Entry:* The main channel has been dredged to a depth of 7.5 m. below datum, allowing unrestricted entry to the Western Terminal. The entrance to the Royal Harbour is liable to sand build-up outwards from the Eastern side, and vessels are advised to consult with the Harbour Office or Port Control for the latest information.

MAX. SIZE: Max. LOA 105 m. Max. draft 4.8 m. (2 hours either side of HW).

VHF: *Vessel Traffic Service:* Commercial vessels wishing to enter Ramsgate Harbour must report to the Harbour Control on Channel 14 when arriving at a point 2.5 miles from the channel entrance buoys. This point is referred to as "Point Romeo" and permission must be obtained to enter the channel before proceeding further.

BERTHING: Commercial Quay: Length 109 m. Width 18.0 m. Berthing possible on the East side.

Ro/Ro Berth: Linkspan available.

CRANES: 1×18 ton crane available. Private cranes up to 130 tons capacity may be hired. Forklift trucks available.

STEVEDORES: Available locally.

MEDICAL: Hospital, doctors and dentists available locally.

FRESH WATER: Available.

FUEL: Small quantities available by barge. Larger quantities available by road tanker.

CONSULS: See "Dover".

REPAIRS: Minor repairs possible. Slipway for up to 500 tons capacity.

SURVEYORS: Available locally.

HATCHES: Opened and closed by crew.

AIRPORT: See "Port Ramsgate".

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: The RNLI maintains a motor lifeboat stationed in the harbour.

SERVICES: The following are available: Radio repairs, ship chandler, diving services, charts and compass adjusting.

GARBAGE DISPOSAL: A collection service is provided daily and skips are provided for all vessels at a charge.

WASTE OIL DISPOSAL: A disposal facility for waste oil is available on request for large amounts. This is done by road tanker.

SEAMAN'S CLUBS: There is no seaman's club. The Royal Temple Yacht Club provides certain club facilities for visiting seamen and yachtsmen. There is also a Sailors Church within the harbour (Church of England) holding regular services during the Summer months.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Thanet District Council, P.O.Box 9, Margate, Kent CT9 1XZ. *Tel:* (01843) 25511. *Telex:* 966182.

Ramsgate Harbour Office, Military Road, Ramsgate, Kent CT11 9LG. *Tel:* (01843) 592277. *Telex:* 965861. *FAX:* (01843) 590941. *Contact:* Captain K. Gray, Harbour Manager/Harbour Master.

RYE: 50.56 N., 00.47 E. **(See Plan)**

PORT LIMITS: An imaginary line between No. 2 red light and No. 1 white light.

DOCUMENTS: Usual documents required for Customs.

PILOTAGE: Call "Rye Pilots" 1 hour before to 1 hour after HW. Pilots attend station when vessels expected – ETA 24 hours in advance.

Vessels fitted with VHF Radio should keep watch on Channel 14 when arriving and sailing from Rye and call for instructions on traffic movements.

Pilotage compulsory for vessels over 30 m. LOA.

ANCHORAGES: Vessels may anchor at the Fairway Buoy or shelter from Southwesterly winds in the East Roads (St.Mary's Bay).

NAVIGATION: *Leading Marks:* Inner Leading Light – Occulting Green 4 secs. with white sector 326°T to 331°T.

Tide Signals: Shown from harbour office, 0.75 miles inside harbour entrance on East Bank.

Night – 7 ft. to 10 ft. on bar. Fixed Green.
Over 10 ft. on bar. Fixed Purple.

Day – None, but horizontal timbers on tripod beacon at harbour entrance indicate plus 5 ft., plus 10 ft., plus 15 ft. above Ordnance Datum.

Traffic Signals: International signals showing either 3 fixed red lights or Green – White – Green when commercial traffic moving.

Fog Signals: East Pierhead Horn every 7 secs.

RESTRICTIONS: Night navigation possible for vessels of less than 240 ft. LOA, subject to Harbour Master's approval.

Also see "Berthing".

MAX. SIZE: LOA 235 ft. (278 ft. on request). Max. draft 13 ft. 06 in.

VHF: Call sign "Rye Harbour Radio" Channels 16 and 14. 0900 – 1700 hrs. daily. "Dover Coastguard" VHF Channels 16 and 67.

TUGS: None available. Harbour launch will assist if requested.

BERTHING: Cargo vessels entering Rye Bay should follow the coast from Dungeness coming from the East or Fairlight coming from the West keeping at least 2 miles offshore until Rye Fairway Buoy is reached (Spher. R.W. Fl. 10 secs.), position 149° T, 1.8 miles from the harbour entrance. Anchorage 5 fathoms. at MLWS.

The entrance is 42 m. (140 ft.) wide and is recognised by a conspicuous tripod beacon (Fl. 5 secs. Red), 30 m. seaward of the West Groyne which is 240 m. seaward of the East Pier with the light tower (Qk. Fl.(9) 15 secs.). The channel virtually dries and is liable to change. The East Pier submerges at HWS and is marked by starboard hand beacons. There is a strong eddy inside the East Pier during the flood stream.

Inside the entrance the channel narrows to 30 m. and runs straight for half a mile (329°T) to Rye Harbour Village where there is an inner leading light (Occ. W.G. 4 secs.). Strict attention should be paid to Port Hand Beacons (4 with Qk. Fl. Red) which mark a training wall on the West side of the channel (submerged at plus 8.3 O.D.N.)

The Rother has a strong flood stream and as the harbour dries out it should NOT be approached 3 hours either side of LW. In gales from the S.E. through to S.W. waves break across the entrance.

The best time for any vessel to enter or leave the port is 1 hour either side of HW but care is needed because movement of cargo vessels takes place during this period (See "Navigation" – "Traffic Signal"). Visiting yachts may berth at the Admiralty Jetty by the Harbour Office and in mud berths at Strand Quay in Rye by arrangement with the Harbour Master. Subject to weather conditions it is possible for vessels drawing less than 1.5 m. to enter the harbour at HW minus 2.5 hours (before the flood tide flows at maximum rate) to plus 3 hours.

H.M. Customs clear craft entering from Non-E.E.C. Countries at the Harbour Office.

Wharf is located 1 mile from the entrance on the West bank of the river.

Length of quay 600 ft. Berth handles grain, aggregate, fertilisers, general cargo, etc.

CRANES: 2 mobile cranes of 3 tons (SWL) available for cargo handling. Stores are loaded by these cranes.

BRIDGES: No air draft restrictions.

STEVEDORES: Stevedores ordered through vessel's agent. Usual working hours 0730 – 1700 hrs., Monday to Friday. Overtime is possible by arrangement.

MEDICAL: Conquest Hospital at Hastings (15 miles) maintains a 24 hour casualty service. Doctors and Port Health Officers available locally.

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available from the quay by hose.

FUEL: Agent arranges supply through a local supplier.

FIRE PRECAUTIONS: Usual precautions necessary.

CONSULS: None locally.

REPAIRS: Minor engineering repairs possible. Radio and radar repairs by arrangements.

DRY DOCKS: None locally.

SURVEYORS: Cargo inspectors arranged by agent. No Classification Society surveyors locally.

GANGWAY/DECK WATCHMEN: Not available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Standard British allowances.

REPATRIATION: Possible. Crew may be repatriated through Heathrow or Gatwick Airports, or Dover and Newhaven for continental ferry services.

AIRPORT: Heathrow or Gatwick.

EMERGENCY CO-ORDINATION CENTRE: Contact Dover Coast Guard on VHF Channels 16 and 67.

TELEPHONES: Not available.

SERVICES: Any services required should be arranged with the agent prior to arrival.

BANKS: Major banks located in Rye.

STORING: See "Prelims".

1. By truck.
2. N.A.
3. Yes.
4. Yes.
6. Yes.

SHORE LEAVE: Permitted.

DELAYS: None.

GENERAL: *Tidal Information:* These tide tables are referred to Ordnance Datum Newlyn and GMT.

Chart Datum equals O.D. Newlyn minus 4 m. (13 ft.)
O.D. Newlyn equals Chart Datum plus 4 m. (13 ft.)
Duration of Mean Rise at Rye Harbour:
Spring – 3 hours 15 minutes.
Neaps – 5 hours 00 minutes.

Latest Surveys (September 1987) indicate that the main channel leads E.S.E.'ly from red light marking end West Groyne. Average depth in the channel at the entrance:

At MHWS – 5.5 m. (19.2 ft.)
At MHWN – 4.5 m. (15 ft.)

Depth over bar:

At MHWS – 4.2 m. (13.8 ft.)
At MHWN – 2.5 m. (8.2 ft.)

For depth at HW at Alsford's Quay add 1.52 m. (5 ft.) to predicted height given in tables.

For depth at HW at Strand Quay mud berths deduct 0.6 m. (2 ft.) from predicted height.

The following approximate corrections for level and time of HW should be added/subtracted to convert these tables for use at the undermentioned coastal areas:

Hastings	minus 0.8 ft.	minus 2 minutes
Dungeness	plus 0.9 ft.	minus 6 minutes
Folkestone	minus 1.6 ft.	minus 15 minutes

GARBAGE DISPOSAL: Collection arranged through wharf owners. (Tel: 0797-222501). Closed approved skips on quayside. Being reviewed.

WASTE OIL DISPOSAL: Oil disposal arranged through wharf owners. 45 gallon drums available and disposal is via local chemical works.

SEAMAN'S CLUBS: No clubs but town is within easy walking distance.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Environment Agency, Guildbourne House, Chatsworth Road, Worthing, West Sussex BN11 1LD. *Tel:* (01903) 820692. *FAX:* (01903) 821832.

Harbour Office, New Lydd Road, Camber, Rye, East Sussex TN31 7QS. *Tel:* (01797) 225225. *FAX:* (01797) 227429. *Contact:* Captain C. Bagwell, Harbour Master.

ST. HELIER: 49.27 N. 02.07 W. (See Plan)

LOCATION: St. Helier Harbour, the only commercial Island port for the loading and discharge of cargoes, is siutated on the South coast of the Island. Passenger services also operate from St. Helier and Gorey Harbour in the East.

Rock, shallows and outcrops abound in the narrow approaches to the port, combined with a spring range of tide in excess of 12.0 m., a mariner inexperienced in Channel Island waters is required to navigate with extreme caution.

The approaches to St. Helier are explained in the Channel Islands Pilot (NP 27), and Admiralty Charts No. 3677, 1137 and 3278 refer.

PORT LIMITS: Reporting points for Inward Clearance – abeam of Noirmont Point or Demie de Pas Beacon.

DOCUMENTS: *Customs and Excise:* Crew List, Cargo Manifest, Bills of Lading/Consignment notes, Crew Declaration and Stores List.

Immigration and Nationality Department: Required for foreign arrivals: Crew List and Passenger List.

PILOTAGE: Pilotage is compulsory for vessels of 50 g.r.t. and over. Pilots normally board off Point Le Fret in the North Western passage, or at Demie de Pas Lighthouse for the Eastern Passage.

Pilotage available 24 hours, subject to tide.

ANCHORAGES: Cruise liners visiting the Island may anchor in St. Aubin's Bay, in the approaches to St. Helier, or near St. Catherine's Breakwater at the N.E. point of the Island. The St. Aubin's Bay anchorage is limited to vessels of maximum length 140 m. if fitted with a bow thruster or 120 m., both being subject to draft. Launches can land passengers at Berth No. 5 pontoon on the Albert Pier.

The anchorage at St. Catherine, about 1 mile off the breakwater, is in open waters with a depth of 20 m. below C.D. Passengers land, subject to weather conditions, at a pontoon on the South side at the root of the breakwater. This anchorage is subject to strong N.W./S.E. tidal streams at Spring tides, and thus not suitable for low powered launches at these times.

RESTRICTIONS: Entry to the port is controlled by St. Helier Port Control. The period of entry may be restricted due to tidal limitations and the vessel's draft.

Entry 24 hours, subject to tide.

MAX. SIZE: The largest vessel to have regularly used the port is "Rozel", the BCIF Ro-Ro ferry of the following dimensions: Length 130 m, breadth 22.6 m. and draft 5.2 m.

HEALTH: Rabies prevention regulations prohibit the landing of any animal susceptible to rabies.

RADIO: Jersey Radio, the local coast radio station, maintains a continuous listening watch on 2,182 kHz. and VHF Channels 16, 25 and 82. Vessels approaching St. Helier should advise Jersey Radio of their ETA at the pilot station and confirm when 1 hour off. VHF and link call facilities are available. Local navigation warnings and weather forecasts for the Channel Island area are broadcast regularly.

VHF: St. Helier Port Control maintains a continuous listening watch on VHF Channel 14 only. The watch tower is situated at the Victoria Pierhead, from where traffic signal lights are displayed. All vessels should keep a listening watch in the approaches and when manoeuvring in the harbour.

St. Helier Port Control Signals: Green lights exhibited from the Port Control Tower mean that vessels may enter harbour, but that no vessel may leave harbour.

Red lights exhibited mean that vessels may leave harbour, but that no vessel may enter harbour.

When both red and green lights are exhibited, no vessel may enter or leave harbour.

In addition to the normal red and green control lights exhibited f
the Port Control Tower, quick flashing orange lights will be u
whenever possible to expedite the entry and departure of power dr
craft.

This signal, exhibited from both sides of the tower, indicates that po
driven craft of 25 m. or under in length may enter or leave, contrar
the signal lights displayed at the time.

Before entering or leaving the port, or shifting berth within harbo
Masters of vessels must obtain prior permission from Port Control
VHF Channel 14.

TUGS: "Duke of Normandy" 575 h.p. (8.5 ton B.P.). One hour's no
required.

Licensed boatmen will attend all commercial vessels on request. Th
have an 11 m., 170 h.p. launch, used to assist the manoeuvring
vessels in the port. They also act as linesmen and operate 2 moor
launches.

BERTHING: The port consists of 5 main quays or piers, namely Alb
Pier, New North Quay, Victoria Quay, Elizabeth Harbour and La Colle
Tanker Terminal (See "Tankers").

Albert Pier: 4 landing stages are available for vedette and catama
passenger services which operate from this pier, serving inter-island
adjacent French coast routes. A pontoon at Berth No. 5 can be used
cruise ship passenger tenders.

The Albert Pier has a dredged sump of 3.9 m. below Datum, measur
106 m. × 21 m.

The RNLI 47 ft. "Tyne" class lifeboat "Alexander Coutanche"
stationed at Berth No. 5.

New North Quay: The main commercial freight quay with the follow
luffing cranes: 2×10 tons, 2×7 tons, 2×5 tons and a 35 tons Sco
derrick. The quay has a total length of 158 m., adjoined by a dred
sump of 5.2 m. below Datum, measuring 170 m. × 24 m.

Elizabeth Harbour: The main Ro-Ro berths of the port are situated
the Elizabeth Harbour. The East and West berths have two lane
linkspans, the West having a safe working load of 120 tonnes w
connected to a ship. Both berths have a sump of 6.0 m. below Da
(130 m. × 30 m.) and are fitted with powered passenger gangways
a minimum height of 15 m. above Datum. Each gangway is connec
to the passenger terminal by covered walkways and tunnels separa
from the vehicle and freight area. The passenger terminal is provi
with full Customs, Police, Immigration and baggage handling facili
and is provided with a shop, cafeteria, bar and offices. All toilets, moth
room and public areas are accessible to wheelchairs. Adjacent
parking is available.

Victoria Quay: The quay has 3 berths, the East Cross, West Cross
London Berths respectively, with lengths of 137 m. (East Cross and W
Cross) and 73 m. The quay has 1×10 tons, 2×7 tons, 1×5 tons luf
cranes and a 35 ton Scotch derrick at the East Cross Berth. Depth
the East and West Cross are 3.0 m. and in the London Berth 2.
below Datum.

Cruise Liners: See "Anchorages".

CRANES: See "Berthing".

STEVEDORES: The port is open on a 24 hour basis and the nor
working hours for cargo vessels are 0800 hrs. – 1700 hrs.; overtime
be worked between 0600 hrs. – 2359 hrs.

MEDICAL: Modern general hospital nearby (300 m.).

TANKERS: La Collette Tanker Terminal is situated to the South of
main harbour and has a jetty head of 57 m. It is able to accommo
tankers, subject to their pumping manifold connections being compat
in a dredged sump of 5.5 m. below Datum. The largest tanker to regu
use the Terminal is "Esso Penzance" of 91.4 m. length. The Term
can handle all grades of petroleum spirit, diesel and heavy oils via
discharge arms. LPG is also discharged by flexible hose. Bow and s
lines are secured to the shore and a mooring buoy.

DENSITY: 1025.

FRESH WATER: Available. Rate 20 t.p.h.

FUEL: Gas oil and light fuel oil available by road tanker wagon onl
lube oils available. Suppliers: Total Ltd. (Tel: 25927); fuel supplies (S
(Tel: 875699); Esso Ltd. (Tel: 876433).

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 100 cigarillos or 50
or 250 gm. tobacco. One litre alcohol over 22% or 2 litres unde
2 litres of wine.

REPATRIATION: Facilities available.

AIRPORT: Jersey Airport with regular services to the UK a
Continent is situated 4 miles away at St. Peter.

HOLIDAYS: *Public Holidays:* Dates as per England and Wales
9th May and Liberation Day.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: Sea Rescue Centre in Harbour Office.
TELEPHONES: Available by special arrangement.
BANKS: Most of the major world banks have branches in Jersey.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: Facilities available.
WASTE OIL DISPOSAL: Limited quantities (2,000 litres) can be handled.
GENERAL: *Pollution:* Boom and various anti-pollution equipment held in store by Harbour Department.
DEVELOPMENTS: A 600 berth marina is being constructed N.W. of the Elizabeth Terminal. Land reclamation is taking place to the S.E. of La Collette Tanker Terminal.
AUTHORITY: States of Jersey, Harbours Department, Harbour Office, P.O.Box 599, St. Helier, Jersey JE4 9XF, Channel Islands. *Tel:* (01534) 885588. *FAX:* (01534) 885599. *Contact:* Captain R.M. Bullen, Harbour Master.

SCALLOWAY: 60.08 N. 01.16 W. (See Plan)

Scalloway is a small port on the Atlantic side of the Mainland of Shetland and is located only 7 miles by road from Lerwick.

The main trade is centred around the catching, processing and export of fish, but there has been a marked increase in general trade since the recent improvement of port facilities.

Most services are available and can be arranged through the local shipping Agents.

Communications: Listening watch is maintained on Channel 16 only during office hours. At other times contact to be made through Shetland Radio. Local shipping agent T.T.F. Ltd., Tel: (01595) 880636 (office), (01595) 880304 (after office hours). Pier Master, Tel: (01595) 880574 (office), (01595) 880324 (home). Assistant Pier Master, Tel: (01595) 693485 (home).

ANCHORAGES: Good holding bottom in Scalloway Bay.

Anchorage may also be obtained at several locations within the port approaches and vessels intending to do so should advise the Scalloway Pier Master via VHF who will provide advice on areas encumbered by static fishing gear.

PILOTAGE: Licensed Pilots are available and requests for pilotage should be made at least 12 hours in advance of ETA and confirmed 1 hour before arrival by calling Scalloway Harbour Radio on VHF Channels 12 or 16. Requests for pilotage should be made through Scalloway Harbour Office Tel: (01595) 880574, through Sullom Voe Port Control Tel: (01806) 242551 or Telex: 75142 (manned 24 hours), or through agents. No particular light or sound signals are required and pilot boat freeboard is 1.5 m. Pilot boarding stations are charted on the current edition of B.A. Chart No. 3294. Masters should advise the intended pilot boarding station when confirming ETA and should note that the Northerly station is preferred in bad weather or high swell. Pilotage is not compulsory except for vessels carrying hazardous cargoes for which it is compulsory.
RESTRICTIONS: No night time or tidal restrictions. Largest scale and up to date charts essential.
MAX. SIZE: Max. loaded displacement 3,500 tonnes. Maximum length 90 m., max. draft 6.0 m. Vessels exceeding these dimensions may be accepted by prior arrangement. A tide gauge has been installed, and precise tidal heights will be available on request by radio.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Shetland Radio.
VHF: Vessels should listen to Channel 16 VHF when in VHF range.
BERTHING:

Berth No.	*Length* (m.)	*Least Depth* (m.)
1	Out of use.	
2	120	6.5
3	120	6.5
4	110	6.2
5	130	4.6

CRANES: Mobile cranes available. Ships normally employ their own cranes.
STEVEDORES: Should be arranged through Agents.
MEDICAL: Doctor based at Scalloway. Hospital at Lerwick.
FRESH WATER: Available from standpipe at all berths, rate 10 t.p.h.
FUEL: Marine gas oil by pipe or from road tanker. 1 hour advance notice through Agent.
REPAIRS: Most types deck and engine repairs.
SLIPWAYS: Slip accommodation for vessels up to 180 tons.
SURVEYORS: Lloyd's Agency at Lerwick: Hay and Company (Lerwick) Ltd., 106a Commercial Street. Tel: (01595) 3057. Telex: 75295.
CUSTOMS ALLOWANCES: See "Lerwick".
REPATRIATION: Facilities for effecting crew changes.
AIRPORT: Sumburgh Airport 25 miles. British Airways several times daily. Tingwall Airstrip 3 miles.
HOLIDAYS: Cargo or shipping operations not affected by holidays.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: No arrangement for placing telephones on board. The Port Authority provide a telephone box in the harbour area.
SERVICES: Compass adjusting. Provisions of all kinds can be obtained locally.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Shetland Islands Council, Marine Operations Department, Port Administration Building, Sella Ness, Graven, Mossbank, Shetland ZE2 9QR. *Tel:* (01806) 242551, 244200. *Telex:* 75142. *FAX:* (01806) 242237. *Contact:* Captain G.H. Sutherland, Director of Marine Operations. Captain M. Brannan, Manager – Small Ports.

SCAPA FLOW (Flotta Terminal), Orkney Isles: 58.53 N. 03.05 W. (See Plan)

NOTICE: Issued by Director of Harbours in August 1993.
Recommendations on Navigation for vessels bound to or from the Flotta Oil Terminal and Scapa Flow:

The tidal flow in the Pentland Firth is such that Masters should pay particular attention to the information and details contained in the Admiralty Tidal Stream Atlas – Orkney and Shetland Islands (NP 209), prior to their arrival in the area and also before departing Scapa Flow. Failure to do so could result in difficulties arising for their vessels, due to the strong tidal currents experienced in the area.

RECOMMENDED ROUTES:

The recommended routes for arriving at the Pilot Station for the first time are as follows:

Approaching from South East, bound for Westerly Pilot Boarding Area:

Vessels should pass 1.5 miles East of Duncansby Head then steer a course to pass midway between Swona and Stroma Islands.

When approaching with the flood tide (Easterly flow) vessels should maintain a Westerly course until at least 1.5 miles West of Swona Island before proceeding to the Pilot Boarding Area.

With the Ebb tide (Westerly flow) vessels can steer towards the Pilot Boarding Area once they are clear of the South end of Swona Island.

Approaching from West, to Westerly Pilotage Boarding Area:

Vessels should pass at least 2.5 miles South of Torness on the Island of Hoy before setting course to the Pilot Boarding Area.

Easterly Pilotage Boarding Area - North of Swona Island:

It is not recommended that first time callers proceed between the islands of Swona and South Ronaldsay unless instructed to do so by the Pilot who should be on station at the Boarding Area prior to the vessel entering the Harbour area. Masters who are familiar with the area may proceed between Swona Island and South Ronaldsay, but must ensure that when proceeding with the flood tide they do not set on to the Lother Rock and with ebb tide do not set on to Swona Island.

Passage between South Ronaldsay and Muckle Skerry:

It is not recommended that vessels use this Channel.

DEPARTING SCAPA FLOW:

Recommended Routes following disembarking Pilot:

The Pilot will normally disembark between Nevi Skerry and Stanger Head to allow the vessel to build up to full sea speed prior to encountering the tidal flow in the Pentland Firth.

West Bound Vessels:

The Master should proceed into the Pentland Firth passing one mile East of Switha Island and set a course to pass at least 1.5 miles South East of South Walls.

South East Bound Vessels:

The Master should proceed into the Pentland Firth passing one mile East of Switha Island and then proceed on a South Westerly course keeping at least 1.5 miles West of Swona Island. A course can then be set to pass midway between Swona and Stroma Islands.

The vessel should then make a course to pass 1.5 miles North East of Duncansby Head.

The Master must keep a careful watch on the effect that the flood and ebb tides have on his vessel whilst turning to port.

With the ebb tide the vessel may be slow to respond due to the vessel's bow encountering the ebb tide whilst the stern is still in the eddy West of Swona.

Passage East of Swona Island:

It is not recommended that first time callers use this Channel. Providing Masters are fully aware of the tidal currents which will effect the vessel when passing between Swona Island and the Lother Rock, it is acceptable for vessels to proceed down this Channel.

It cannot be emphasised strongly enough that vessels will experience strong tidal set both Eastwards with flood tide and Westwards with ebb tide as they proceed down this Channel and also once clear of the South end of Swona Island.

Masters should make a course to pass midway between Swona and South Ronaldsay when Stanger Head is 0.5 miles abeam.

When abeam of the North end of Swona Island the Master should steer a course keeping to the middle of the Channel. A careful watch must be maintained on the vessel's course and speed as the very strong tides can quickly set the vessel towards the Lother Rock with flood tide and towards Swona Island with the ebb tide.

Once clear of the Lother Rock a course can then be set to pass 1.5 miles East of Duncansby Head.

Passage between South Ronaldsay and Muckle Skerry:

It is not recommended that vessels use this Channel.

MANOEUVRING SPEEDS - BOARDING AND LANDING PILOTS:

Masters should where possible, when approaching the Pilot Boarding Area, maintain full sea speed until advised to reduce by the Pilot. Masters should also bring their vessels up to full sea speed once the Pilot has disembarked. The normal speed for boarding and landing pilots is 6 knots.

The Master should ensure that his vessel is in hand steering and not in automatic pilot prior to entering the Pentland Firth and also until well clear of the area.

Normal *Rule of the Road* applies in all cases when vessels are approaching or departing the Pentland Firth or Scapa Flow.

SUSPENSION OF BOARDING AND LANDING PILOTS:

In severe weather conditions boarding and landing of Pilots may be suspended. Masters will be advised by Orkney Harbour Radio as soon as possible when these restrictions are in operation. They will be kept fully informed on the most suitable area to await instructions to proceed to the Pilot Station once boarding and landing of Pilots is resumed.

ORKNEY HARBOUR RADIO:

Masters should contact Orkney Harbour Radio on VHF Channel 16 at least 2 hours prior to arrival at Pilot boarding areas for update on shipping, tidal and pilotage information.

If in any doubt regarding pilotage, tidal or shipping movements in the Pentland Firth or Scapa Flow contact Orkney Harbour Radio on VHF Channel 16.

Masters and Owners should note that the above details are recommendations only and the final decision remains with the Master regarding the safe navigation of his vessel.

Editor's Note: Please also see Notice to Mariners No. 44 of 1993 (Notice No. 3706 – Scotland, North Coast – Shetland Islands – areas to be avoided and precautionary areas), and Admiralty List of Radio Signals – Volume 6 (specifically Notice to Mariners No. 45 of 1993 – Notices A 1591 and A 1599 which come into force on 28th November 1993).

DOCUMENTS:

Maritime Declaration of Health (Form supplied by Pilot or Agent).
Vaccination List.
Immigration Form H.O. Form IS6.
Crew Lists — 2 required.
Ship's Stores List.
Crew Personal Effects Declaration, Customs Form C.142.
Last Port Clearance.
Ship's Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Radio and Safety Equipment Certificates.
Derat Certificate.
Previous British Light Dues Receipts.

Customs and Health: Weather permitting, Customs, Immigration, Health and Agent will embark inside Scapa Flow.

Customs House: Customs clearance inward and outward will be the responsibility of ship's Agents.

Light dues will be paid by the vessel.

Cargo Documents: Bills of Lading; Cargo Manifest, Quantity and Quality Report; Tanker Time and Loading Report; Certificate of Origin; Ship's Cargo and Ullage Reports; Master's Receipt for Shipping Documents and Documentation Transmittal Reports will be prepared by Company Representative.

Ship's Agent: All ship's business other than Cargo and Customs documentation and the shipping documents under section above will be conducted by the ship's Agent.

EDP: Early Departure Procedures apply to most vessels. Blank Bills of Lading are signed by the Master on arrival, and the tonnages inserted on completion of loading.

APPROACHES: The approach to the Terminal is through the Pentland Firth from East or West, and then Northward through Hoxa Sound, the main entrance to Scapa Flow. Consult Admiralty Sailing Directions Vol. 52, and Admiralty Tidal Stream Atlas for Orkney and Shetland, Publication No. 209. Principal charts are as follows and Decca coverage is available: Admiralty Chart Nos. 2162, 2581, 35.

PILOTAGE: Pilot vessels *Scapa Pathfinder, Scapa Pilot* and *Scapa Pioneer* watch VHF Channel 16.

Inside Pilot Station (Lat. 58° 46′ N., Long. 03° 07′ W.) located 2 miles × 180° from Cantick Head Lighthouse.

Unfamiliar vessels, VLCCs, also any vessel without full information about the unusually strong currents in Pentland Firth is recommended to embark the Pilot at the appropriate outside position (Refer to Tidal Stream Atlas, Admiralty Publication H.O. Number NP 209).

Port Restrictions which may cause delays: Weather preventing embarkation of Pilot at either inside or outside positions.

Local wind conditions in Scapa Flow preventing a safe approach to the berth.

Remarks: In Scapa Flow the weather conditions, in particular the wind, can change suddenly and quickly deteriorate, not only in Winter but at any time of the year.

Mooring Masters: A Company Mooring Master will board vessels to the Northward of the Calf of Flotta or at her designated anchorage within Scapa Flow prior to berthing at any Terminal Facility. A Company Mooring Master will be on board during the time that a vessel is moored and he will liaise between the Terminal and ship personnel throughout any deballasting, loading or discharging operation.

The Company Mooring Master may ensure that Masters of vessels are familiar with, and strictly observe, all local regulations concerning the safety of operations and pollution of the sea by oil whilst laid at the Company's facilities.

Vessels using the Company's facilities are required to provide the Mooring Master with accommodation and messing of a standard equivalent to that enjoyed by the vessel's officers.

ANCHORAGE: Inside Scapa Flow several anchorages are available depending upon prevailing winds. Sea anchorage outside, in the approaches to the Pentland Firth, is not possible.

MAX. SIZE/RESTRICTIONS: The current maximum sizes of crude tankers permissible at Flotta is 200,000 d.w.t. at the SPMs and 150,000 d.w.t. at the jetty.

Since the advent of segregated ballast tankers, an anomaly has arisen between the physical size of tankers, upon which these maximums are based and the deadweight capacity. In order to prevent confusion as to the size of tanker that is acceptable, the following guidelines will be enforced.

	Conventional Ballast Tankers	*Segregated Ballast Tankers*
SPMs	200,000 d.w.t.	170,000 d.w.t.
Jetty	150,000 d.w.t.	130,000 d.w.t.

Prior to accepting crude vessels it must be clarified whether the vessel is a segregated ballast tanker or a conventional ballast tanker. If a segregated ballast tanker then the deadweight must be indicated. If the tanker has been converted from a conventional ballast tanker to a segregated ballast tanker, then the original deadweight should also be indicated.

RADIO: Arrival Notices.

Pilots: By coastal radio station 24 hours and 12 hours prior to arr VHF contact at least 3 hours prior to arrival at the Pilot Station.

Terminal: By coastal radio station 7 days, 72, 48 and 12 hours prio arrival at the Pilot Station.

VHF contact should be established at least 3 hours prior to arriva the Pilot Station.

The Terminal must be advised by VHF via the "Harbour Contr when the Pilot has boarded or when 6 miles from Stanger Head at entrance to Hoxa Sound.

INFORMATION REQUIRED PRIOR TO ARRIVAL:

Radio Advice Prior to Arrival: Terminal operated by Elf Enterp Caledonia Ltd., Flotta Terminal, Telex: 75212 (Eecflo G), via Portish Radio, of ETA with following details. Also advise Agent of ETA, dra fore and aft for arrival, and any immediate requirements on arrival.

Standard Message to Crude Vessels (Initial Visit): Masters are advis that reception facilities are available for clean ballast only. All ball must be discharged to reception facilities ashore. No ballast from ei cargo or permanent ballast tanks is permitted to be discharged i Scapa Flow.

Please advise the following details:

AAA	Arriving and sailing drafts and ETA.
BBB	Cargo requirements in metric tonnes.
CCC	Grade of previous cargo.
DDD	Quantity of Cargo tank ballast and position uplifted.
EEE	Quantity of permanent ballast and position uplifted.
FFF	Quantity of ballast for discharge ashore.
GGG	Last port and destination.
HHH	Is inert gas system fully operational and cargo tanks inert
JJJ	Oxygen level in cargo tanks.
KKK	Gross nett and summer d.w.t. tonnages.
LLL	Maximum loading rate.
MMM	Total time for deballast.
NNN	Number and size of cargo manifolds.
OOO	Availability of reducers to adapt manifolds to suit 16 in. 150 ASA flanges three required.
PPP	Can vessel load and deballast simultaneously while maintaining a minimum of a two valve separation?
QQQ	Is vessel equipped with a patent A.K.D. stopper or simila capable of accepting an 80 mm. end link?

Vessels are required to load part cargo prior to discharging ballas Minimum 10 ton SWL derrick required on port side for SPMs. Der required at jetty if it is necessary to fit spool pieces to accept load arms. Ballast manifold is aft of two crude connections on SPM.

Your attention is drawn to the serious view taken by Port and Termi Authorities of pollution. Heavy fines are imposed to which is added cost of clean-up operations. Please ensure all crew members conversant with and comply with pollution requirements.

Principal pollution causes are leaking sea valves overboard discha valves and cargo or bunker overflows. We recommend sea valv overboard discharge and bilge discharges are checked tight. Prior ar cargo and bunkering procedures should be reviewed with chief off and chief engineer. All scuppers to be plugged.

NOTE: On subsequent visits vessels should only answer AAA to inclusive.

Standard Message to Liquid Gas Carriers (Initial Visit):

LIQUID GAS CARRIERS ARRIVING AT SCAPA.

LPG vessels arriving at Flotta Terminal with ballast for discharg Scapa Flow will comply with the following instructions in respect of ballast.

1. Ballast for discharge must have been taken on board w 24 hours of arrival and at a distance of at least 12 miles off shore.

2. The Master will provide the Terminal with signed advice sta date, time and positions between which ballasting operations carried out, quantity of ballast for discharge and tanks in which contained.

Harbour Authority Officials may board vessels to ascertain that th procedures have been adhered to and the quality of the ballast is sui for discharge. The Authority's decision as to whether or not the ba is acceptable for discharge will be final. Non compliance will resu delays being occasioned by the vessel.

Masters are advised that this concession for discharge of perma ballast relates only to LPG carriers and your attention is drawn t serious attitude adopted by Port and Terminal Authorities to pol incidents of any kind.

To prevent problems arising due to surge pressures caused b rapid closure of emergency shutdown valves (ship side) it is req that the minimum closure rate from fully open to completely clos 9 seconds when loading LPG or 13 seconds for Ethane loading.

Please advise the following details:

AAA	Arriving and sailing draft and ETA.
BBB	Cargo requirements in metric tonnes.
CCC	Previous cargo and quality of tank atmospheres.
DDD	Tank temperature on arrival.
EEE	Time required for cooldown.
FFF	Height of manifold above water line at arrival draft.
GGG	Closure timed of emergency shutdown valves.
HHH	Quantity of ballast and amount to discharge.
JJJ	Last port and destination.
KKK	Gross, nett and summer deadweight tonnages.
LLL	Maximum and cooldown loading rates.
MMM	Availability of deck tanks to accept coolant and qu required.
NNN	Size of cargo/vapour return manifold and position of return manifold relative to cargo manifold.

Purging and/or coolant is not carried out alongside.

Vessel will require to load sufficient coolant for purging and/or c to be carried out at anchor.

NOTE: On subsequent visits vessels should only answer AAA inclusive.

VHF: *Harbour Pilots and Harbour Control:*
VHF Listening: 16 Telex: 75475
Working: 9, 11 and 20
Mooring Masters/Terminal:

Mooring Masters	161.15	Private Frequencies Only
Terminal	161.30	
Loading Operations	161.15	Private Frequencies Only
" "	161.30	

N.B. Launches are fitted with VHF Listening Channel 16.
Working Channels 14, 12, 8, 6

HEALTH: See "Health – All Ports" before first U.K. port.

READINESS: *Notice of Readiness to Load/Discharge:*

Notice of Readiness will be accepted subject to the following conditions;—

a. The Terminal is open (this decision shall be communicated to the Master of the vessel by the Company).

b. (i) The vessel has been boarded by the Company Mooring Master prior to her proceeding towards the berth *or*

(ii) The vessel has anchored within the anchorage area awaiting a berth.

N.B. Although vessels will be loaded in order of acceptance of Notice of Readiness, it should be borne in mind that acceptance of Notice of Readiness is contingent upon complete compliance with all the requirements of Port Conditions.

c. Acceptance of Notice of Readiness may be withdrawn by the Company upon the occurrence of any of the following events:

The decision by the Mooring Master that the vessel's drafts, equipment and/or appurtenances are not suitable for berthing at the Terminal. If this decision has not been taken, for reasons within the Mooring Master's control, within 24 hours from Acceptance of Notice of Readiness, the Company shall be deemed to have waived its right to withdraw acceptance under this sub-paragraph.

Any supervening decision of the Harbour Authority which prevents the vessel from berthing.

N.B. A derrick or crane with a safe working load of not less than 10 tons is required for handling hoses at the SPM berths.

TUGS: 3 tugs (2×50 ton bollard pull and 1×54 ton bollard pull) are available, and compulsory, for berthing. They are fire fighting tugs and equipped with Warren Springs pollution dispersent equipment.

Whenever a tanker is on a berth, 1 stand-by tug is anchored in the close vicinity for safety and pollution purposes. Fire wires must be rigged off-side forward and aft.

1 tug (standby tug) is towing aft whilst tanker is moored to SPM.

BERTHING: *Position:*

SPM 1: Lat. 58° 52' 11.86" N., Long. 3° 07' 20.68" W.
SPM 2: Lat. 58° 52' 17.72" N., Long. 3° 05' 47.79" W.

Main Control Building (Radio Mast): Lat. 58° 50' 31.05" N., Long. 3° 07' 08.01" W.

SPM Particulars:

Pillar Type Single Buoy Mooring – 2.
Tanker Size – 35,000 d.w.t. – 200,000 d.w.t.
Minimum Water Depth – 75 ft.
Max. Draft – 72 ft.
Mooring System – 10 m.×3 in. chain, 40 m.×21 in. rope grommet, 10 m.×3 in. chain and 6 m.×2.625 in. chain.
Crude Manifolds – 2×16 in.
Ballast Manifolds – 1×16 in.
Maximum Loading Rate – 80,000 bbls.p.h.
Hose Weight – Minimum 7.5 tons

Ballast connection is positioned aft of the 2 crude connections.

A load monitoring system is fitted to each SPM giving constant strain readings to the Terminal Control Room and the Mooring Master on board the tanker. In adverse weather conditions strain gauge readings will indicate when vessel should prepare to vacate the berth.

LPG/Crude Oil Jetty:

Finger type jetty with breasting dolphins.
Tanker Size – 4,000 d.w.t. – 150,000 d.w.t.
Minimum Water Depth – 63 ft.
Maximum Draft – 62 ft.
LPG Manifolds – 1×10 in. loading plus 1×10 in. vapour return.
LPG Loading Rate – 10,000 bbls.p.h.
Crude Manifolds – 4×16 in.
Crude Loading Rate – 80,000 bbls.p.h. maximum.
Ballast Manifold – 1×16 in. (crude gantry only).
Maximum Deballasting Rate – 40,000 bbls.p.h.

LPG: Gas tankers also load at the jetty and in their case the only relevent restriction is a requirement for the cargo manifold flange to be able to work within the operating envelope of the LPG loading arms which have the following parameters: Max. Airdraft 13.18 m.; Min. Airdraft 1.75 m.; Max. distance ship's side to flange 7.0 m.; Min. distance ship's side to flange 3.1 m.

Terminal Capacity:

1. Crude Oil:

There are 5 tanks, each of 500,000 bbls. nominal capacity for storage of stabilised crude oil, plus a further 2 of 1,000,000 bbls. each.

2. Liquid Petroleum Gas:

There are 2 tanks, each of 100,000 bbls. nominal capacity for storage of propane.

3. Ethane:

There are 5 ethane tanks, each of 500 cu.m. nominal capacity.

Remarks: Vessels moored to the SPMs are required under conditions to maintain a tug towing astern to keep the mooring system under a tension of 15 tons – 20 tons.

When ship's piping does not permit the pumping of permanent ballast through the manifold, the possibility to load some cargo prior to deballasting the cargo tanks' clean ballast may be granted by prior arrangement with the terminal. In all cases where ships intend to deballast and load simultaneously there must be at least a 2 valve separation.

Lightering Operations: Ship-to-ship lightering operations can be carried out in Scapa Flow on vessels up to 72 ft. draft.

Tug facilities and oil pollution equipment readily available.

DENSITY: 1025.

MOORING AND HOSE HANDLING:

On SPMs: Ship's derrick (SWL 10 tons) and manifold connections will require to be prepared on the port side. An accommodation ladder will be rigged to starboard with a pilot ladder ready to port.

Securing equipment for single chain mooring forward and hose connecting gear will be hoisted on board from Company work launch by ship's derrick. A good mooring line will be required from forecastle head as a messenger for the buoy mooring.

Tanker Loading Pier: The loading pier is equipped with rigid articulated pipe arms mounted on gantries for loading liquid petroleum gas and also for loading crude oil. The crude oil gantry is also fitted with a ballast discharge arm.

There is an access roadway between the Pier head and the shore. Mooring lines are run to dolphins by terminal mooring boats. Vessels with tension winches when moored at the pier must have winches on 'Manual brake'.

Arrival Draft: Vessels must arrive at the Company's facility in an adequate ballast condition compatible with safe manoeuvring during handling. Excessive trim or insufficient ballast could incur delay until such time as an acceptable condition is reached.

BALLAST: All berths are equipped with water ballast discharge lines. There is a water ballast tank of 500,000 bbls. capacity and a ballast treating facility capable of handling 40,000 bbls.p.h. It is prohibited to discharge water ballast into Scapa Flow.

Bilge Ballast Discharge: Vessels should arrive in Scapa Flow with clean ballast only.

The discharge of bilges and/or ballast by vessels into Scapa Flow is strictly prohibited.

N.B. All ballast water including permanent ballast must be discharged through the Terminal ballast reception and cleaning facility.

Discharge of ballast and simultaneously lifting of cargo is not permitted unless approval has been given by the Mooring Master.

The salvage in ballast shall become the property of the Company, in consideration of the Company's operation of the Terminal ballast reception and cleaning facility.

MEDICAL: Medical and dental services are available by arrangement. Hospital facilities are available at Balfour Hospital, Kirkwall.

FRESH WATER: Not available.

FUEL: Bunkers not available at present, but lubricants in small quantity available. Ships should cable requirements to Agent as soon as possible.

CONSULS: Denmark, Netherlands, Norway and Germany.

REPAIRS: There are no dry-docking facilities available, but local engineering firms undertake minor repairs to machinery and equipment.

Immobilisation of Engines: Not allowed on any of the berths, and not recommended when at anchor. When at the anchorage, however, in special circumstances, and provided the Harbour Master's permission is first obtained, it may be possible.

TRAVEL: There are daily air services, during the week, to Aberdeen, Inverness, Glasgow and Edinburgh from Kirkwall Airport. There is no service on Sunday, There is a daily ferry service from Stromness to Scrabster to connect with British Rail. During the Winter months there is no service on Sunday.

LAUNCH SERVICES: Launch services from Flotta and SPM berths are available by arrangement with local Agents to Scapa Pier.

SAFETY: Should communications fail, the Mooring Master will authorise continuous soundings of the ship's whistle or siren as a signal to stop loading (ships in the vicinity capable of so doing should inform the Terminal Control by VHF that this signal is being sounded in case it is inaudible ashore). Ships hearing the signal and unable to contact the Terminal should inform "Harbour Control".

SERVICES: Stores are of good quality, and the laundry facilities are good, but limited. Tank cleaning facilities are not available.

GARBAGE DISPOSAL: Skip provided on Scapa Pier free of charge and collected as required, otherwise by arrangement through local agent.

WASTE OIL DISPOSAL: No waste oil disposal facility.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

SHORE LEAVE: There are no restrictions on shore leave for ships' personnel. For vessels moored at SPMs arrangements can be made with the Agent for a launch service to be operated to the shore. For safety reasons, the boat selected for this service must have good stability, to prevent accidents in cases of hazardous boarding due to weather conditions.

GENERAL: *Accidental Spills and Leakage:* All oil spills and leakages must be immediately reported to the Mooring Master, who will inform the Harbour Authority forthwith. All deballasting/loading/discharging operations will be immediately suspended until the cause of the spill/leakage has been determined, and rectified to the satisfaction of the Mooring Master, and the Harbour Authority.

Galley and Other Refuse: Dumping of all refuse into Scapa Flow and approaches is prohibited. Refuse must be retained on board in sealed containers. (Vessels in port over a long period may make arrangements with their local Agent for collection).

Lighting: Sufficient lighting must be provided in the way of all overboard discharge points to facilitate detection of leaks or spillage. Adequate lighting must also be provided at the loading manifold.

Lifting of Stores; When tankships are at SPMs, loading or off-loading of stores, provisions, drums or any other goods or articles on, to or from the main tank deck is prohibited while cargo is being lifted.

Under certain circumstances and with the approval of the Company's Mooring Master, stores may be worked on the poop during the cargo lifting.

When tankships are moored at the pier, vessels and boats are prohibited from coming alongside during cargo lifting, unless all cargo operations are shut down, all tank openings are closed and secured, and permission from the Mooring Master has been obtained.

Working of stores over the pier will not normally be allowed.

During Loading/Deballasting Operations at SPMs: Mooring Masters will carry Company communication equipment. Ship's VHF must also be available to the Mooring Master at all times. Ship's whistle must be available throughout the time a Mooring Master is on board.

Emergency signals in the event of complete communication failure will be as follows:

By day: Continuous blasting of ship's whistle accompanied by the hoisting of 2 black balls in a position conspicuous to the Terminal Control Room.

By night: Continuous blasting of ship's whistle accompanied by continuous flashing on an Aldis type signal lamp aimed towards the Terminal Control Room.

In the event of such a communication failure all loading operations shall cease until an effective means of communications has been established.

SCRABSTER: 58.37 N. 03.33 W. (See Plan)

LOCATION: Inside Holborn Head on Thurso Bay.

PILOTAGE: Not compulsory. Pilots can be contacted on Channel 16, working Channel 12.

ANCHORAGE: Excellent anchorage in bay, close to high land on North side. Good shelter.

APPROACHES:
Scrabster Harbour Ro/Ro ferry pier – LT.QK.FL.G4.M.
Inner harbour entrance East pier head – LT.2FG(vert).
West pier head – LT.2FR(vert).

MAX. SIZE: Ro/Ro Berth: LOA 90 m., draft 6.0 m.
Lay-By: LOA 80 m., draft 4.5 m.
LOA 120 m., draft 3.0 m.

The entrance to the tanker berth is 26.0 m. wide and to the inner harbour 15.0 m. wide.

VHF: Multi-Channel VHF set in Harbour Office. Calling Channel 16, working Channel 12 (24 hours).

TUGS: None.

BERTHING:

Berth	*Length* (m.)	*Depth at L.A.T.* (m.)
Deep Water – Ro/Ro	96.0	5.5
Lay-By	100.0	4.5
Tanker Berth	72.0	3.0
Old Fish Market	114.0	1.0
New Fish Market	123.0	4.5
New Landing/Lay-By	140.0	4.5

Ro/Ro Facility: Ramp: 100 tonne maximum on 8 axles, 4 m. wide roadway. No height restrictions, all states of tide.

CRANES: Mobile cranes up to 100 tons available.

SPECIALISED CARGO HANDLING FACILITIES: Mineral handling by single grab at rate of 500 tons per day direct into lorries. No storage available at present.

STEVEDORES: Cargo worked 24 hours.

TANKERS: Vessels up to 2,000 d.w.t. can use Tanker Terminal.

FRESH WATER: Available at Fuel Berth, Ice Quay and Lay-By berths.

FUEL: Available from Harbour Terminal, B.P. or Texaco by road tanker. No overtime charges for Harbour Terminal.

REPAIRS: Engine and hull repairs can be undertaken at 24 hours notice.

AIRPORT: Nearest at Wick, 32 km. away.

HOLIDAYS: Usual U.K. holidays.

GENERAL: *Charts:* B.A. Charts No. 2162 and 1462.

Ice Plant: 100 tonnes per day. Storage 300 tonnes tube ice.

Tidal Reference: H.W. Dover – 2 hours 30 minutes. Range 5.0 m. M.H.W.S. and 3.7 m. M.H.W.N.

Stores: Available.

Bonded Stores: Available at 48 hours' notice.

AUTHORITY: Scrabster Harbour Trust, Harbour Office, Scrabster, Caithness KW14 7UJ. *Tel:* (01847) 892779/894618. *Telex:* 75449 Thurso G. *FAX:* (01847) 892353. *Contact:* R. Sampson, C.B.E., Chief Executive. Captain P.J. Bale, Harbour Master.

AGENT: Scrabster Harbour Trust, Shipping Agents, see above.

SEAHAM: 54.50 N. 01.19 W. (See Plan)

PILOTAGE: Not compulsory. Pilotage Service available with VHF watch on Channel 16 over tidal period. Call sign: Seaham Harbour Pilots. Tel: (0191) 5813246.

ANCHORAGE: Good anchorage approximately 1 mile N.E. of North Pier Lighthouse. Shallow water and rocks to South of South Pier (Liddle Scars). Depth on bar at HWST 6.85 m.

RESTRICTIONS: The entrance to harbour is formed by North and South Piers and is 84.34 m. wide. South Dock gates are manned from 2.5 hours before HW to 1.5 hours after HW. Gateway to South Dock 19.81 m. wide.

No vessel can enter at LW and entrance should not be attempted during strong on-shore winds.

MAX. SIZE: *Largest Vessel:* 120 m. LOA, 16.5 m. beam and draft su to tidal rise.

VHF: VHF watch on Channel 16 over tidal period and during office h (0800 – 1800 hrs.) Monday – Friday. Working Channels 6 and 12

TUGS: 1 tug with 8 tons bollard pull available.

BERTHING: *South Dock:* 8 berths. 625 m. quayage with cranage u 100 tons capacity. Gravity spouts and conveyors for loading vesse to 6,000 tons. 60 ton weighbridges with 18.4 m. platforms avail Railway connections.

North Dock: Used by fishing boats only.

CRANES: Five crawler cranes with capacity up to 35 tons.

BULK CARGO FACILITIES: Chute, conveyor and cranage hand facilities available for loading/discharging bulk cargoes from/to transport.

SPECIALISED CARGO-HANDLING FACILITIES: *Container* *Ro–Ro Facilities:* Area available for handling containers. 42 ton conta handling forklift truck available.

STEVEDORES: *Working Hours:* Monday to Friday 0800 – 1200 1230 – 1700 hrs. Overtime to be ordered by 1300 hrs.

Saturday and Sunday: Work at overtime rates can be arranged 8 hour minimum period. Weekend overtime to be ordered by 1600 Friday. Shift working can be arranged with prior notice.

Public Holidays: Overtime possible except New Year's Day, Christ Day and Boxing Day.

MEDICAL: Hospital at Sunderland, distance 6 miles.

TANKERS: No facilities.

FRESH WATER: Available on quay.

FUEL: Available by barge or road tanker.

REPAIRS: Facilities available at Sunderland and the Tyne.

OPENING/CLOSING HATCHES: By crew.

AIRPORT: Newcastle Airport, 32 km. Teesside Airport, 40 km.

HOLIDAYS: Christmas Day, Boxing Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE:
Maritime Rescue and Search Centre. Tel: (0191) 2572691.

BANKS: Barclays, National Westminster, Lloyd's and Midland.

GENERAL: *Chart:* B.A. Chart No. 1627.

Weather: The prevailing winds are from the West.

Tides: Normal range in enclosed dock: 1.97 m. Spring range 4.4 Neap range 3.5 m.

Provisions: Available from local chandlers.

Storage: Transit shed of 1,394 sq.m. and warehouse spac 16,000 sq.m. Open storage of 10 acres also available.

GARBAGE DISPOSAL: Bins and skips are sited in port area for g and operational waste. No charge unless large quantities involved

WASTE OIL DISPOSAL: Road tanker collection service availab Port Authority. Charges are quoted case by case on request.

SEAMAN'S CLUBS: Seaham Seafarers Centre is adjacent to the entrance, facilities include telephone, television, book exchange, table and bar.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: The Seaham Harbour Dock Co., Seaham House, Terrace, Seaham, Co. Durham SR7 7EU. *Tel:* Administration 5813877; Harbour Office (0191) 5813246; Security (0191) 581 *FAX:* (0191) 5130700. *Contact:* M.J. Blades, Managing Dir G. Hicks, Operations Director/Harbour Master.

SHARPNESS and GLOUCESTER: 51.43 N. 02.29 (See P

The Port of Gloucester comprises the enclosed Docks at Sharpnes Gloucester connected by the 16 mile ship canal named "The Glou and Sharpness Canal" and all waters within.

Gloucester Harbour, the esturial waters of the River Severn, ext N.E. from the limits of the Ports of Newport and Bristol to Bigs the River Wye and the Weirs at Gloucester on the River S Gloucester Harbour Trustees act as the Navigation Authority respo for all pilotage and conservancy matters.

PORT LIMITS: Sharpness Dock sea lock sill.

DOCUMENTS:
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B.6.
3 Stores Lists.
1 Cargo Declaration – Non EEC Cargoes Form C1600A.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Oil Pollution Certificate.

In addition Manifests and Bills of Lading are usually sent t direct from loading port.

PILOTAGE: Pilotage is compulsory. Masters of vessels bound Ports of Gloucester, Sharpness, Chepstow and Lydney requ services of a Pilot at the Barry Roads Station must give at least notice of their intended arrival at the Pilot Station. Failure to notice could lead to a vessel being delayed. Draft and Summ are also required. Masters who expect their passage time to than 24 hours should send advice from their sailing port wi tonnage, draft, speed and ETA. Masters of vessels bound for C should also state mast height above the appropriate water whether masts can be lowered. (Vertical clearance limited by 52 ft. (15.8 m) above MHWS)

Vessels are boarded at Barry Roads by the Bristol and Gloucester Pilot Cutter which is equipped with VHF Channels 16, 6, 8, 9, 11 and 14. Radio contact with the Cardiff Pilot Cutter should be made not later than 1 hour before arrival at Breaksea Buoy. In fog ships sound "9" (4 longs, 1 short). Pilot replies the same. Masters can send ETAs direct to the Duty Pilot. Tel: (0860) 232736.

Dock Pilots: Dock Pilots are available, not compulsory but advisable for berthing in Sharpness Dock, transit of the Sharpness Canal and in Gloucester Dock.

ANCHORAGES: Barry Roads afford good anchorage in moderate weather for vessels awaiting a Pilot.

RESTRICTIONS: The minimum clearance over the sill at Sharpness is dependant on the beam of the vessel as follows, though weather and tidal conditions may require such minimum clearance to be increased at the discretion of the Harbour Master:

Beam	*Clearance Required*
Less than 10.36 m.	0.61 m.
10.36 m. – 13.71 m.	0.76 m.
13.72 m. – 16.76 m.	0.91 m.

Note: Sharpness Dock sill dries out at LW.

MAX. SIZE: Maximum Length – no restriction. Maximum beam – 55 ft. (16.76 m.) Maximum draft – 21 ft. 6 in. (6.55 m.) fresh water.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Niton Radio, Lands End Radio, Ilfracombe Radio.

VHF: Sharpness Radio Channels 16, 17, 14 and 9. Range normally within pilotage waters only.

TUGS: *(River):* Larger vessels normally pick up tugs off Avonmouth if required by Pilot. *(Dock Tugs):* Not suitable for river work. 2 tugs available in Sharpness Dock and for use between Sharpness and Gloucester if required. All tugs take ships lines.

BERTHING: Max. draft 21 ft. 6 in. (6.55 m.) Fresh Water. Range of dock level 4 in. (0.1 m.)

Available Berths: 10 to 14 berths depending on ship length. This includes a scrap berth. Available length of Quay – 12,000 ft. (3,660 m.).

Cargo Equipment and Methods: Cranes 3×3 tons, 5×6 tons, all Portal and 1 Scotch Derrick of 32 tons. 3×6 tonnes Mobile Cranes, Grabs, Slings and Pallets, etc. Load/discharge by shore gear.

BULK CARGO FACILITIES: 1×10,000 ton grain silo, 2 cement silos, 1 scrap terminal, 300,000 sq.ft. covered storage space, 1 Ro/Ro berth. 1 fertiliser terminal. Wide range of equipment, including bagging – blending facilities. Ample open storage area.

The port can handle most general cargoes. Recent examples include:

Bulk: Fertilisers, minerals, animal feed, grain, coal, granite, cement, scrap.

Unitised: Timber and fertiliser.

BRIDGES: 16 swing bridges between Sharpness and Gloucester. Mast height restriction 32 m. (105 ft.)

STEVEDORES: British Waterways Board.

Normal Working Hours: Monday – Thursday 0745 hrs. – 1300 hrs., 1400 hrs. – 1700 hrs. Friday 0745 hrs. – 1300 hrs., 1400 hrs. – 1600 hrs. Overtime as requested.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible if any medical attention is required. All facilities available.

DENSITY: 1000/1003.

FRESH WATER: Available by stand pipe, 20 t.p.h.

FUEL: Through Agents, 12 hours notice, most grades available.

FIRE PRECAUTIONS: According to local laws available on request.

CONSULS: See "Bristol".

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCK: 360 ft. by 47 ft. by 14 ft. over blocks.

SURVEYORS: Most Societies are available.

GANGWAY/DECK WATCHMEN: Ship's personnel, but watchmen can be arranged if necessary.

HATCHES: Opened by ship's crew.

CUSTOMS ALLOWANCES: As for other U.K. ports.

REPATRIATION: All arrangements through Agents.

AIRPORT: London or Birmingham within 2 hours. Local taxi service available.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Easter (varies). May Day. Spring Bank Holiday (last Monday in May). August Bank Holiday (varies, usually last Monday in August). Christmas Day (25th December), Boxing Day (26th December). Work can usually be arranged on these holidays although unusual to work 25th/26th December.

POLICE/AMBULANCE/FIRE: Telephone 999 ask for service required.

TELEPHONE: No ship to shore connection. Public telephone kiosks available.

SERVICES: Taxi. Laundry. Ship chandlery.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Not necessary unless being repatriated.

GARBAGE DISPOSAL: Garbage skips provided on quays with frequent collections and no separate charges. Any special requirements arranged through agents.

WASTE OIL DISPOSAL: Collection by tanker trucks from working berths. Arranged and charged through ship's agents.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

REGULATIONS: British Waterways Board Byelaws 1962.

GENERAL: *Gloucester and Sharpness Canal and Gloucester Dock:* Maximum size of vessel: Length 205 ft. (62.5 m.), beam 31 ft. (9.45 m.), draft 11 ft. 6 in. (3.5 m.) fresh water. Vessels exceeding these dimensions may be considered subject to Harbour Master's approval.

AUTHORITY: British Waterways Board, Dock Office, Sharpness Docks, Gloucestershire GL13 9UX. *Tel:* (01453) 811644. *Telex:* 43375 BWB SDS G. *FAX:* (01453) 811990. *Contact:* M. Vale, General Manager. Captain G.A. Boyack, Harbour Master. Captain K. Badsey, Assistant Harbour Master. D. Simmons, Operations Development Manager.

SHOREHAM: 50.50 N. 00.15 W. (See Plan)

DOCUMENTS and all general information, refer to "London". Distance from London, 80 km.

PILOTAGE: Pilotage is compulsory for all vessels over 50 m. LOA. Send ETA 12 hours and 2 hours in advance, including max. draft. Pilot boards within 2 nautical miles of harbour entrance. Tel: Brighton (0273) 592366. VHF: Channels 16 and 14. Hours: Tidal hours.

ANCHORAGE: Off Harbour. Depths as per English Channel Charts.

RESTRICTIONS: No night restrictions. Locks manned 4 hours either side of HW. According to size and draft these times can be extended by prior arrangement.

Main entrance channel, 122 m. wide, leads into a 91.4 m. channel to the Eastern arm.

Dimensions of Prince Philip Lock: 113.9 m. length, 17.3 m. width.

MAX. SIZE: *Canal:* Length 105.9 m., beam 16.4 m., draft 6.7 m. (subject to tide). Vessels over 103 m. are subject to the Harbour Master's approval.

Western Arm: Length 82.3 m., beam 14.3 m., draft subject to tide and up to a maximum of 5.5 m.

East Arm: Max. LOA 120 m. Max. Draft 6.7 m., subject to tide and Harbour Master's approval.

HEALTH: See "Health – All Ports" before first UK port.

RADIO: Niton Radio/Northforeland Radio. ETA to Shoreham Harbour Master 24 hours prior to arrival.

VHF: When within VHF range advise Harbour Master (via "Shoreham Harbour Radio"), ETA, draft, beam, LOA and of any circumstances which may affect seaworthiness or handling capacity of the vessel.

Port Operation and Information Service manned continuously, contact by VHF calling Channel 16, working Channel 14. Station is situated on the locks. Tel: (01273) 592366.

TUGS: One tug (Bollard Pull 10 tonnes). Tug lines used for which no extra charge. Communications between vessel and tug take place on VHF Channel 11.

BERTHING: See "Restrictions".

A grain silo terminal with a storage capacity of 13,000 tonnes has been constructed within the canal.

STEVEDORES: Reasonable ETA is sufficient for gangs to be called.

MEDICAL: All facilities available.

TANKERS: Texaco in the Canal.

DENSITY: Approx. 1025.

FRESH WATER: Available at most berths.

FUEL: Available by road tanker.

CONSULS: Denmark.

REPAIRS: Minor repairs possible.

SURVEYORS: Available locally.

GANGWAY/DECK WATCHMEN: Recommended.

HATCHES: Opening and closing by crew.

REPATRIATION: Possible.

AIRPORT: Gatwick Airport.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: There are no arrangements for placing telephones aboard ship.

BANKS: Barclay's, National Westminster, Lloyd's and Midland Bank all have branches locally.

STORING: No restrictions. Stevedores not required to load stores.

SHORE LEAVE: Possible.

GARBAGE DISPOSAL: Individual berth operators provide skips alongside.

WASTE OIL DISPOSAL: Service available from local contractor by tank vehicles only. Contact Hales Waste Control Ltd. (Tel: Burgess Hill 243444).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Shoreham Port Authority, Harbour Office, Albion Street, Southwick, Brighton BN4 4ED. *Tel:* (01273) 592613. *FAX:* (01273) 592492. *Contact:* Captain B. Fountain, Harbour Master. B. Tatterton, General Manager.

SILLOTH: 54.52 N. 03.24 W (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" for the purposes of stemming when she arrives at the Pilot Station off Workington (see Admiralty Chart No. 1346). Laytime normally commences when the vessel berths in the New Dock, Silloth.

DOCUMENTS: Normal U.K. requirements.

PILOTAGE: Compulsory for all vessels of 50 m. in length and over, except for those qualifying for special exemption. Vessels should send their ETA to local Agents or to the Dock Master, Silloth, at least 12 hours before arrival. Pilot boat is stationed at Workington when vessels are expected and listens out on Channels 16, 14 or 12 VHF. Pilot boards vessels between 2.5 hours and 1.5 hours before HW, Silloth.

ANCHORAGES: Vessels may anchor at the Pilot Station in good weather, but are advised to seek shelter in Ramsey Bay, Isle of Man or Wigtown Bay in adverse weather conditions.

RESTRICTIONS: The port lies in a relatively sheltered position in the Solway Firth, and in consequence, access during adverse weather is mainly governed by the practicability of boarding and landing Pilots off Workington.

MAX. SIZE: *Neap Tides:* Length 85 m., beam 13 m., draft 4 m.

Spring Tides: Length 85 m., beam 13 m., draft 6 m.

Vessels over 85 m. LOA may be accepted, depending on ship and weather conditions.

Typically, the port is used by vessels of between 500 tonnes and 3,000 tonnes deadweight.

VHF: A "Port Operation" and Information Services operates on Channels 16 and 12 from 2.5 hours before HW, Silloth, call sign, "Silloth Harbour Radio".

TUGS: There are no tugs available at the port.

BERTHING: The port comprises two docks:

The outer, Marshall Dock is tidal and contains no berths.

The inner, New Dock is enclosed by dock gates which are opened from 1 hour before to 1 hour after HW. Minimum depths in the New Dock are maintained at 5.0 m. on Neaps and 7.0 m. on Springs. The specific gravity of the water in the dock is normally about 1.022.

Cargo Berths: The New Dock contains 7 berths:

Berth No. 1: A "single user" bulk grain import berth operated by Carr's Flour Mills Ltd. Suction elevators, 60 tonnes p.h.

Berth No. 2: A general cargo berth with limited quay space.

Berth No. 3: A specialised bulk molasses import terminal operated by Carr's Flour Mills Ltd. and general cargo berth.

Berth No. 4 'A': A "common user" import terminal for bulk agricultural materials (mainly animal feeds) operated by D. A. Harrison & Co. Suction elevators and grabs; 100 tonnes p.h., automated handling and storage.

Berth No. 4 'B': A specialised import/export bulk cement terminal operated by D. A. Harrison & Co. 100 tonnes p.h., automated handling and storage of cement powders.

Berth No. 5: Main general cargo berth. Mobile cranes and elevator, heated-covered storage.

Berth No. 6: Specialised livestock import terminal under the control and supervision of M.A.F.F. officials. Lairaging facilities for 800 cattle. The berth can also be used for general cargo.

Berth No. 7: General cargo berth for small vessels of up to 50 m. in length.

BULK CARGO FACILITIES: See "Berthing".

CRANES: 3×30 tonne mobile cranes are permanently available in the port. Larger or additional cranes can be conveniently hired in. Ship's gear is never used.

STEVEDORES: D.A. Harrison & Co., Anvil House, West Newton, Aspatria, Cumbria. Tel: (016973) 20529. Telex: 64493. Working hours in the port are unlimited 24 hours per day, 365 days per year.

Storage: Stevedores D.A. Harrison & Co. also operate a large covered storage facility adjacent to the Port with a capacity of more than 40,000 tonnes, and can provide inland road transport to and from this facility to all parts of the United Kingdom using own vehicles.

FRESH WATER: Available at all berths.

FUEL: Fuel oil can be loaded from road tanker.

REPAIRS: Any type of repair which does not require dry dock facilities can be carried out by local contractors.

DRY DOCKS: None.

HATCHES: Always handled by ship's crews.

AIRPORT: Nearest airports are Carlisle, 39 km., Newcastle 140 km., Prestwick 225 km. and Manchester 260 km.

POLICE/FIRE/AMBULANCE: Police: Tel. 999 or (016973) 31313; Fire: Tel. 999; Ambulance: Tel. 999. Local doctor's surgery (016973) 31309. The nearest public telephone is at the entrance to the docks.

BANKS: The Midland Bank, Station Road, Silloth. The National Westminster Bank, Eden Street, Silloth.

GARBAGE DISPOSAL: Skips are provided alongside and can be ordered through the agent or port authority. Skips delivered and collected during normal office hours, or outside by arrangement.

WASTE OIL DISPOSAL: Up to 10 tonnes can be collected by road tanker. Contact D.A.Harrison. (Tel: (016973) 44000).

SEAMAN'S CLUBS: No Seaman's club. A small town is within 5 minutes walk, and can provide most requirements.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Associated British Ports, Dock Office, Silloth Docks, Cumbria CA5 4JQ. *Tel:* (016973) 31358. *FAX:* (016973) 31358.

Contact: Captain C. Puxley, Dock and Marine Superintendent.

SOUTHAMPTON (Including Fawley): 50.54 N. 01.24 W. (See Plan)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Reports by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load Line Certificate.
Safety Equipment and Safety Construction Certificates.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES:

(a) Prolonged high barometric pressure or strong N.E./N.W. winds reduce predicted tide levels by 0.45 m. – 0.6 m.

(b) Deep drafted vessels enter via the Nab dredged channel. The currents set at almost 90° to this channel, at certain stages o tide, and, as it is marked by buoys on one side only, care mus taken to keep within the confines of the channel. At its Nor end the channel swings about 45° to the West, but it is not ma on either side.

CAUTION: Dangerous wreck exists in position Lat. 50° 43.1 Long. 00° 59.46' W., marked by N, S, E and W Cardinal M (Portsmouth local Notice to Mariners No. 23/91 refers).

(c) When passing Portsmouth, ships should be prepared to encou crossing traffic to and from that port.

(d) The most difficult part of the navigation between Nab and Fa is that between Prince Consort Buoy, Cowes Roads, Black J Buoy and Calshot, particularly for VLCCs on maximum draft w have to take a wide sweep down to East Gurnard Buoy, be making a 145° starboard turn into Western approach channel w narrows to 305 m. Tidal currents in this area are somew uncertain but can reach up to 3.5 knots on a Spring ebb tide 2.5 knots on a Spring flood tide. In Summer many yachts and o small pleasure craft are encountered. The closest contact sh be maintained with Southampton VTS.

(e) VLCCs are not to enter the Thorn Channel on a flood tide w the wind is between West and S.W. and in excess of 30 knots. Pilot will board VLCCs with the latest weather report and will ad Masters accordingly.

(f) It is also important, before the VLCC and container vessel en Thorn Channel, that Southampton VTS is contacted to confirm no ship which, by virtue of its size or draft, could interfere with safe navigation and manoeuvring of the VLCC, will be allowe enter the main channel between Cadland and Prince Consort Bu after the VLCC has entered this channel.

PILOTAGE: Pilotage in the Port of Southampton Competent Har Authority area (See "Plan") is compulsory, except for Pilotage Exem Certificate holders, naval vessels and other small exemptions.

In addition to 48 hours notice to local Agent, advise Southampton Centre as appropriate, ETA 48 hours, and again 2 hours to 3 h immediately prior to arrival. The pilot boarding areas are serviced by launches (black hulls, orange wheelhouses) under the control of the Officer at the VTS Centre, Associated British Ports, Berth 37, Eas Docks, Southampton. The VTS Officer keeps a continuous watc VHF Channel 16, call sign "Nab", "Sturbridge" or "Lepe Pilot appropriate. Working frequency Channel 9 only. No medium frequ facility, M/F and R/T messages via Niton Radio. VTS Centre Telep No. (01703) 632345/6. Telex No. (0703) 477161. Fax: (01703) 23

The launches only put to sea when required. Failure to sen accurate ETA 2 hours to 3 hours before arrival could cause delay t offending vessel.

Strict compliance with the requirements of the Merchant Shipping Ladders) Safety Rules is requested by the Pilots who may refus board vessels with unsatisfactory and dangerous ladders. Manrope required. Ladders should reach to approximately 1.0 m. from the w each rung resting firmly against the ship's side; and a good lee pro whilst making approximately 5 knots to 7 knots headway.

Eastern Outer Limit: All vessels over 150 m. (492 ft.) LOA, and all ves carrying LPG/LNG in bulk (i.e. in tanks which form part of the perma structure of the vessel), pilot boarding point is at the Nab Tower. Ve exceeding 70,000 d.w.t. may board Pilots 3 miles South of Nab T by arrangement.

(Note: Vessels having carried cargo referred to above, and which not been rendered gas free or the cargo spaces completely inerte be subject to the same conditions as specified above).

Eastern Inner Limit: All other vessels for which compulsory pil applies not specified above, the pilot boarding point is in the vici the North Sturbridge Buoy area. Voluntary Pilotage is also availabl the Nab Tower.

Vessels 61 m. – 150 m. LOA when carrying a bulk cargo of dang or polluting goods will embark/disembark Pilot to the East of W Buoy (See "Notices" – "Notice No. 12/1996").

Western Limit: All vessels for which compulsory pilotage applie pilot boarding area is in the vicinity of the West Lepe Buoy in the Solent.

Voluntary/Optional Pilotage: West Solent including the Needles Ch A facility is available by prior arrangement to engage a Pilot voluntary/optional basis from the Needles Fairway Buoy to the W Compulsory Pilotage Limit of the Port of Southampton CHA p area.

Voluntary/Optional Pilotage: East Solent from Nab Tower to the E Inner Limit and vice-versa. A facility is available, by prior arrang to engage a Pilot on a voluntary/optional basis for those vessels 150 m. (492 ft.) LOA to/from the Inner Compulsory Pilotage Limit Solent.

GENERAL NAVIGATION: A VTS Officer, responsible to the Master Southampton, maintains a continuous watch in the VTS (Berth 37), call sign "Southampton VTS". He is to be informed any movement to, from or within the port area, and will give info on the movement of other vessels.

Harbour radar information and guidance will be given on requ radar reference line shown on the Admiralty Charts is superimp the Harbour Radar displays. Particular attention should be Masters to the designated "Reporting Points" marked on the A Charts. Reports should be made on VHF to "Southampton enable the proper identification and co-ordination of the ship mo to be made to the benefit of all mariners navigating within the area. This applies equally to naval and non-compulsory vesse

The following VHF Channels are operated within the port:
Southampton VTS: Channels 16, 14, 12, 9, 18 and 20.
Harbour Patrol Launch (call sign S.P.): Channels 16, 14, 12.

Southampton Pilot Launches (call sign Nab/Sturbridge/Lepe Pilot as appropriate): Channels 16, 14, 12, 9 and 6.

Tugs when berthing vessels: Channels 71 or 74.

Esso Petroleum Terminal, Fawley: Channels 16, 14 and 19.

BP Oil UK Ltd, Hamble: Channels 16, 19, 46 and 71.

A patrol launch (Harbour Master flag by day, all-round blue light by night) is controlled by the VTS Officer Southampton for pollution detection and keeping channels clear of pleasure craft for the passage of large vessels.

Vessels (a) drawing more than 10.5 m., (b) more than 288 m. in length, and (c) or more than 100,000 d.w.t., exhibit a large black cylinder by day and 3 vertical red lights by night. Vessels showing these signals, and LPG vessels, are not to be passed or overtaken within channel limits between the "West/East Bramble" and "Hook" Light Buoys; these vessels are considered to be constrained by their draft and restricted in their ability to manoeuvre, and may not be able to comply with the Collision Regulations. Will indicate inability by 5 short blasts on the whistle. "Clear Channel" control is exercised by the VTS Officer at the VTS Centre, Associated British Ports, Berth 37, Eastern Docks, Southampton. Also see "Notices".

ANCHORAGES: The Thorn Channel has a limited depth of 12.6 m. at low water datum. Up to 7 vessels, other than LPG vessels (only 3 LPG) of under 91.4 m. in length, are permitted with prior permission to anchor out of the channel to the East of the "Hook" Buoy in the designated Small Ships Anchorage, the limits of which must be strictly observed. Three numbered anchorages are available in an emergency for vessels not exceeding 168 m. in length in Fawley Reach, where vessels must moor to two anchors. Permission to anchor, including within the Small Ships Anchorage and numbered anchorages, must be obtained from the VTS Officer, Southampton VTS Centre.

Also see "Notices".

MAX. SIZE: The largest passenger and container vessels call regularly at Southampton. Tankers: Fawley can accept partly loaded VLCCs up to 14.9 m. draft.

Also see "Developments".

HEALTH: See "Health – All Ports" before first UK Port.

TUGS: 2 firefighting/anti-pollutant tugs are permanently stationed at Fawley. During loading operations at Hamble, an anti-pollutant and a firefighting tug are standing by. If more than 2 tugs are required, it should be noted that weekend requirements have to be advised to the tug operators not later than 1530 hrs. on Friday of each week. If a vessel requires more than 2 tugs and is due to arrive at Fawley between 0001 hrs. Saturday and 0900 hrs. Monday, ETAs must be submitted well in advance of 1530 hrs. on the Friday prior to arrival. It is usual to use the wires provided by the tugs for towing.

All VLCC's bound for Fawley are required to take the services of an escort tug from South of the Nab Tower to the berth.

BERTHING: The Pilot boarding the ship at the Sea Station or anchorage will also berth the ship. Non-compulsory vessels can obtain or disembark a Pilot in the vicinity of the "N.W. Netley" or "Hook" Buoys by contacting "Southampton Pilot" on VHF.

Dock or Quay	*Berths Nos.*	*Nominal Dredged Depth * below Chart Datum†*		*Length of Quays*

	34 – 35	9.1	29.8	284	932
	36	9.9	32.5	200	656

Other berths are available. Lesser draft berths not shown. The depths of water are maintained as far as practicable, but are subject to variation and are not guaranteed.

* To find the depth of water in the berths add the tidal rise to the depths shown in the above table.

† Chart datum is approximately the lowest low water level.

BULK HANDLING FACILITIES: Grain handling at Berths No. 36, 47 and 102.

Berth 36: Southampton Grain Silo: 8×1,600 tonnes capacity cells and 4 cells with total capacity 15,000 tonnes.

Receiving rate by truck 500 t.p.h. 1×1,000 t.p.h. shiploader available with travel of 135 m. (443 ft.).

Berth 47: Continental Grain: 16×1,000 tonnes silos. 1×1,000 t.p.h. shiploader with travel of 220 m. (720 ft.).

Western Docks: 1×32,500 tonne grain silo.

Berth No. 107: Fertiliser and animal feeds.

Berth No. 108: Cement.

Ro/Ro facilities at Berths No. 105 and 201 – 202 (Linkspan).

Eastern Docks: Ro/Ro facilities at Berths No. 25 and 30 (Linkspan).

CRANES:

Type	*No.*	*Capacity in tonnes*
Container cranes	9	Up to 65
Quayside cranes	26	Up to 35
Floating crane	1	200
Mobile crane	1	10

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

An organisation exists for hospitalisation of sick seamen from vessels off Cowes, Isle of Wight. Arrange through Niton Radio, Nab, Lepe or Southampton Pilot or through vessel's Agent. Minimum delay to vessel.

TANKERS:

Esso Marine Terminal, Fawley:

For further details of information contained herein, refer to Fawley Marine Inspection Group and/or the Fawley Marine Terminal Manoeuvring Guidelines.

All ships normally berth stemming the tide. If the Master/Pilot considers conditions warrant an alteration to this plan, discuss with Esso Headquarters when passing Hook Buoy.

For VLCCs there is a turning width of about 1.5 ship's lengths off Berth No. 5 which is the Pilots' preferred swinging position. Because of these tight turning conditions it is VERY IMPORTANT that:

(a) The ship is in the correct position in relation to the channel before commencing to swing. For this the Pilot uses the 326° – 327° leading lights shown on the chart.

(b) THE SHIP MUST BE STOPPED OVER THE GROUND BEFORE COMMENCING TO SWING. For several reasons the Pilots prefer to swing to port, i.e. to the West and towards the jetty and a serious accident has occurred because a VLCC was not stopped over the ground whilst swinging and collided with the jetty,.

In order to protect both ship and jetty, equipment to positively indicate to the ship that it is stopped over the ground is being provided on the jetty.

Procedures: On closing the berth, either after swinging or when berthing port side to, advice as to the bodily speed of approach will be provided for all VLCCs using Berth No. 5 over UHV pocketfone, one of which is also issued to the Pilot acting as communications officer. The MAXIMUM IMPACT VELOCITY SHOULD NOT EXCEED 0.21 knots (21 ft./minute) normal to the jetty faceline.

The doppler speed of approach equipment can also be used to provide accurate speed along the channel axis information up to a point when ship is about 500 m. South of Berth No. 5.

Prior to arrival off the berth, mooring lines should be lowered to 3 m. above the water and the winches of the first ropes on the mooring plan provided by the Pilot to be in gear ready to pay out the moorings to the rope running launches. Prevailing winds are off berth and the emphasis is on the use of springs and breast lines. The number used will depend on the size of the ship, condition of mooring lines and positions of fairleads, but generally minimum requirements are 2 spring lines and 3 breast and 2 level/stem lines each end, or according to the pre-determined mooring plans forwarded direct to the Pilots. Additional head and stern lines may be required. Mooring plans are taken on board VLCC's by the Pilot. These must be closely followed.

Backsprings are always first lines ashore.

Tugs on hooks usually let go and push up on offside during the mooring operation.

Approach: Terminal is approached by either the Nab or the Needles. The Nab with a dredged channel of 43 ft. (13.3 m.) below Chart Datum admits the larger vessel. Double HW with an average tidal range of 13.25 ft. (Springs) and 7.75 ft. (Neaps). Rate of Spring tide 2 knots, Neap tide 1 knot.

Anchoring in the Small Ships Anchorage adjacent to the terminal requires permission from Southampton VTS. Approval will only be given to vessels of 300 ft. or under. Usual practice is not to moor with both anchors. This applies to Controlled Anchorage only. Depth of 41 ft. LW is available. Anchorages in the Solent and Cowes Roads are more generally used. Good holding ground with depth of 50 ft. LW.

Accommodation: Terminal has 2 approach trestles, 1,900 ft. long leading seaward to the main pierhead trestle with its 9 berths. This trestle is 4,575 ft. long and lies parallel with the channel. 5 main ocean berths are on the seaward side and the 4 coastal berths on the landward side. Dimensions of the berths are as follows:

Berth	*Length of 'T' Head*	*Distance between centres*
No. 1	222 ft.	800 ft.
No. 2	222 ft.	800 ft.
No. 3	222 ft.	800 ft.
No. 4	222 ft.	800 ft.
No. 5	300 ft.	1,000 ft.
No. 6	80 ft.	395 ft.
No. 7	80 ft.	400 ft.
No. 8	80 ft.	400 ft.
No. 9	100 ft.	440 ft.

Equipment: Suitable cargo hose handling equipment is positioned at each of the 9 berths. To facilitate the handling of mooring lines, air powered hoists are available at each of the berths. Mooring boats are in attendance for running lines. VLCCs are required to meet minimum standards with regard to their mooring equipment. All water ballast containing oil or likely to contain oil must be pumped ashore. 2×67,000 barrel ballast tanks are provided on shore. With the approval of the Terminal Manager minor repairs can be undertaken whilst discharging/loading at the Terminal. Major repairs can be undertaken at anchor or at Southampton Docks. Working is continuous throughout. Facilities installed at the berths and available for use by tankers include fresh water, bunkers, steam, compressed air, nitrogen. Ship's stores of all kinds are available in any quantity at Southampton. All deliveries of stores must be made by water transport. For quarantine purposes vessels are either boarded prior to berthing or immediately after berthing. Two firefighting tugs of at least 2,530 h.p. are permanently stationed at the Marine Terminal. Additional tugs can be provided on notice from

Southampton.* All tugs are equipped with Radio Telephone and operate on Channels 8 or 10 of the Port Operations Service. Provision of shore steam is made in exceptional circumstances.

*A stand-by charge is levied on all vessels. Subject to availability, an escort tug, for which a charge will be levied, will be deployed to escort all vessels 60,000 d.w.t. and above on the inward and outward passage. The tug will be attached to the stern of the vessel.

Pilotage: Compulsory. Inward-bound vessels embark Pilots at the Nab or Lepe entrances. Tankers up to 250,000 d.w.t. berthed at any time during the day or night subject to tidal conditions.

Berthing:

1. Cautionary Advice:

Prevailing strongest winds are off berth and a considerable number of large container ships, passenger ships and ferries pass the terminal at close quarters. Drift-offs and excessive surging have been experienced at Fawley berths and have caused damage. It is therefore very important that ships, particularly deep draft or high freeboard ships, pay particular attention to moorings.

2. Mooring Requirements and Procedures:

In the case of VLCCs, minimum mooring requirements are laid down. These preclude mixed moorings except under special circumstances agreed prior to acceptance of the ship.

Moorings reeled on winches must be held by brakes hardened up to full torque. Self-tensioning devices are not allowed. The moorings must be reeled in such a direction as to assist the brake, not oppose it. Where split drum winches are used, a minimum of one layer should be on the working drum when the mooring reaches the shore bollards or mooring hooks. Brakes must be in good condition and certificate of brake holding power should be available.

VLCCs should strictly adhere to requested order of running. This is done by motor launches.

There are limits applicable to freeboard both from a windage point of view and also because of the upper reach limit of the hard arms. These together with maximum operable wind speed will be discussed with Masters of VLCCs by a terminal supervisor shortly after the ship berths.

Special attention must be paid to ballasting of permanent ballast spaces and use of over-deck systems into emptied cargo tanks during cargo discharge and, if necessary, and with the agreement of terminal supervision, into emptied cargo tanks using the cargo system, in order to keep the freeboard within reasonable limits.

The ship must be held firmly against the fenders at all times. It is unnecessary and dangerous to slack away lines, even if they appear taut, if the ship is not against fenders.

Rules for Berth Planning: The following limitations are now in force when planning berth movements.

1. Berth size restrictions:
   Berth No. 1: Max. size of vessel 51,000 tonnes displacement.
   Berth No. 2: Max. size of vessel 83,000 tonnes displacement.
   Berth No. 3: Max. size of vessel 66,000 tonnes displacement.
   Berth No. 4: Max. size of vessel 179,000 tonnes displacement.
   Berth No. 5: Max. size of vessel 244,000 tonnes displacement.
   Berth No. 6: Max. size of vessel 4,900 tonnes displacement.
   Berth No. 7: Max. size of vessel 3,600 tonnes displacement.
   Berth No. 8: Max. size of vessel 3,600 tonnes displacement.
   Berth No. 9: Max. size of vessel 8,200 tonnes displacement.
2. Vessels on Berth 6 must not exceed 330 ft. (100.5 m.) in length.
3. Distance between vessels secured on any berths must be 100 ft. (30.48 m.) or more. (This is required under local by-laws for fire regulations.)
4. Distance allowed for berthing vessels must not be less than vessel's length + 40% length. (Agreement with Pilots).
5. Maximum draft of vessels:
   Berth No. 1 33 ft. 03 in. (10.2 m.)
   Berth No. 2 41 ft. 00 in. (12.6 m.)
   Berth No. 3 41 ft. 00 in. (12.6 m.)
   Berth No. 4 49 ft. 00 in. (14.9 m.)
   Berth No. 5 49 ft. 00 in. (14.9 m.)
   Berth No. 6 18 ft. 06 in. (5.6 m.)
   Berth No. 7 18 ft. 06 in. (5.6 m.)
   Berth No. 8 18 ft. 06 in. (5.6 m.)
   Berth No. 9 21 ft. 08 in. (6.6 m.)

   These drafts are subject to change and are therefore updated as required. Deep draft vessels must refer to Fawley Draft Memo, to ensure arrival draft will not interfere with berthing prospects.
6. Tide charts are to be prepared for Nab and Thorn Channels for vessels over 40 ft. (12.19 m.) draft.
7. Check product can be loaded on nominated berth.
8. Check product or ullage availability before berthing vessel.
9. Any maintenance must be sanctioned by the direct permission of the Marine Terminal.
10. No vessels to berth on Ocean Berths with mean wind speed above 30 knots from N.W. through to S.W. to S.E. through N.E.
11. On coaster berths with 25 to 30 knot wind from N.W. through S.W. to S.E., then after consultation with Pilot/Master and Marine Superintendent/Deputy, vessels may berth/sail, providing a suitable tug is used.
12. Ensure liaison maintained with VTS regarding sailings coinciding with movement of high speed vessels (catamarans and hydrofoils).

Fawley Coastal Berth Manoeuvring Requirements: Fawley Coastal Berths comprise Berths 6, 7, 8 and 9 and are situated on the inside (Western Side) of the Marine Terminal complex.

Before any manoeuvring is undertaken on these Berths the following requirements are to be followed:

1. Marine Controllers are to be informed of vessel manoeuvring plan.
2. Vessels without bow thruster capability should berth stemming the tide.
3. All vessels over 61 m. (200 ft.) LOA must have the assistance of the Esso mooring boat when:
   (a) berthing.
   (b) sailing if berthed starboard side to, if wind on berth is over 15 knots.
4. Vessels over 85 m. (279 ft.) in length will not normally swing of a line between Fawley Buoy and the S.E. of Fawley Jetty. Excep may be made only *after* consultation between Terminal and the P Master of the vessel. Due account must be made of wind, tide, we and time. Only then will vessels be permitted to swing West of tha referred to above.
5. Vessels over 85 m. (279 ft.) LOA without bow thruster capab must have in attendance when berthing port side to or sailing after starboard side to:
   (a) Esso mooring boat, *and one tug.*

   Such vessels when berthing starboard side to or sailing after port side to must have in attendance:
   (a) Esso mooring boat.

   They may also be required to have a tug if prevailing cond require it.
6. Vessels of 91.5 m. (300 ft.) LOA or more when berthing at No 7 or 8 to have at least one adjacent berth vacant during the ber movement.
7. No vessel to berth when wind is from South to West with wind speed above 25 knots, i.e. within S.W. quadrant.
8. The Esso mooring boat will be made available on request to a with any vessel not covered in these instructions. Its communic Channel is 71 (74 in an emergency). These boats must not be use towing.

B.P. Terminal, Hamble. Situated immediately opposite Fawley Lat. 50° 50' 54" N., Long. 01° 19' 32" W.

Ship's personnel must be transported by bus through the Ter the Main Gate. Hamble Village is close by, where public tran Southampton is frequent.

VHF: Marine band VHF radio operating on Channels 12, 14, 16 is available. A listening watch is kept on Channel 12 one hour vessel is due on the berth.

Limits:

D.W.T.: 110,000 tonnes.
Displacement: 64,000 tonnes.
LOA: 260 m.
Draft: 13.10 m.
Depth – approaches: 11.25 m. U.K.C. – 1.00 m.
– alongside: 13.60 m. U.K.C. – 0.50 m.
Loading Arms: Crude oil 5.1 m. to 21.94 m. Operating Env

Fresh Water: Available alongside via a meter.

Fuel: Bunkers are not available at the berth.

Type/Moorings: Alongside.

Berth: Coasters acceptable as they lie between dolphins and fendered jetty head. Minimum height of manifold above

2.74 m., therefore it may be necessary to disconnect over low water period and incur subsequent delay.

Product tankers must comply with "closed loading" requirements.

Length: Minimum parallel mid-body length for crude oil tankers is 47.5 m. forward and aft of manifold centreline; no restriction for product carriers.

Draft: Max. draft 13.10 m., at all states of the tide.

Cargo Grades: 2×16 in. crude loading arms. Vessel must present 16 in. 150 ASA flanges. Height above waterline max. 21.94 m., min. 5.1 m. Manifolds must conform to OCIMF standards. Loading rate 6,000 tonnes/hr.

3×10 in. 150 ASA product loading arms. Vessels must arrive with appropriate reducing pieces fitted. Vessels unable to comply may be acceptable subject to prior check with terminal. Height above waterline max. 15.88 m., min. 2.74 m. Products are loaded at 250 tonnes/hr. and discharging vessels must not exceed 10 bar line pressure.

Dirty Ballast: Clean ballast from segregated ballast system may be discharged overboard, subject to Port and Terminal approval and hydrocarbon contamination not to exceed 5 ppm. No shore reception facilities for ballast or contents of slop tank.

General: Berth operated by B.P. Oil U.K.

Products are imported from various size vessels, and on occasions exported. Crude oil is exported (from Wytch Farm), cargo sizes have ranged from 43,000 tonnes to 81,000 tonnes.

Also see "Notices".

For further information contact B.P. Oil U.K., Hamble. Tel: (01703) 456654.

CONSULS:

Country	*Status*	*Address/Telephone No.*
Belgium	Consul	c/o P & O Container – Europe, Richmond House, Terminus Terrace, Southampton, SO14 3PL Tel: (01703) 533200 Telex: 47384

BUNKERS AND WATER: All grades of fuel oil and diesel oil are available and water is piped on all berths. Bunkers and stores can also be obtained by barge in Cowes Roads anchorage, but water is not readily obtainable there.

REPAIRS/DRY DOCKS: All ship repairs can be effected. Largest dry-dock is 1,141 ft. long overall, 132.5 ft. wide and has 34 ft. over the blocks.

SURVEYORS: Lloyd's Register. Tel: 220353.
Salvage Association, Tel: 227983.
Topmarine, Tel: 220585.
Murray Fenton & Associates, Tel: 229787.
International Shipping Trustees (UK) Ltd. Tel: 37596.

OIL POLLUTION: Southampton Water is an international yachting centre and has many holiday beaches on its shores. Consequently, oil pollution is treated very severely and heavy fines are imposed on offenders.

The Esso Refinery, the B.P. Oil Terminals, Williams Shipping and the Oil Spill Service Centre operate a clean-up service, the full economic cost of which is billed to the offending ship.

CUSTOMS ALLOWANCES: By statute, crews of vessels in port are allowed 25 cigarettes per day per man. 0.3 litres (0.5 pint) of spirits and 1 bottle of table wine per day per man.

AIRPORT: Eastleigh Airport. Air U.K. – flights to Guernsey and Jersey. KLM – flights to Amsterdam. British Airways – flights to Paris and U.K. Airports.

TIME: British Standard Time is GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Good Friday (variable date); Easter Monday (variable date); May Day; Spring Bank Holiday (variable date); Autumn Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December); New Year's Day (1st January).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

SHIP SUPPLY SERVICE: Williams Shipping Company (Fawley) Limited, Clyde Buildings, Town Quay, Southampton SO1 1LX. Tel: (01703) 225271. Telex: 47436.

Services Supplied: Fast launches for personnel ship to shore, essential small packages and/or sick crew members.

D.O.T. approved to operate; not more than 6 passengers, area Swansea to Selsey, not more than 5 miles offshore.

Motorised barges for all types of supplies, deck and engine, and stores. Also, vessel with U.K. load line that can meet vessels passing in the English Channel with essential stores.

Mainly used for storing vessels in Oil Terminals, Cowes Roads and Motherbank.

Also see "Cowes".

DEVELOPMENTS: The main channel from Fawley to Prince Charles Container Port is currently being deepened from 10.2 m. to 12.6 m. below Datum (See "Notices" – "Notice No. 16/1996").

NOTICES:

All Notices are issued by Associated British Ports – Southampton.

Notice to Mariners No. 2 of 1992.

SOUTHAMPTON

VESSEL TRAFFIC SERVICES AND PROCEDURES

VESSEL TRAFFIC SERVICES embracing VHF COMMUNICATIONS, PILOTAGE, NAVIGATIONAL AND RADAR ADVISORY SERVICES, TRAFFIC INFORMATION, DATA COLLECTION/EVALUATION are effective in the PORT OF SOUTHAMPTON and its PILOTAGE AREA.

Messages on Port Operations channels must be restricted to the movement and safety of ships and life. Communications should normally be established on the working channels indicated, avoiding Channel 16.

All signal message traffic concerning Dangerous Substances, Pilotage, EEC Tanker Check List, ETA's and other ship visit information addressed to the Harbour Master – Southampton must be properly addressed.

Registered Telegraphic Address – Harbour Master Southampton:
Telex Number – 477161.
Telephone Number – (01703) 339733.
Facsimile – (01703) 232991.

1. MARINE INCIDENTS AND ACCIDENTS:

A vessel involved in a marine incident must report immeditaly to "Southampton VTS", and state whether assistance is required.

THE SOLENT AND SOUTHAMPTON WATER MARINE EMERGENCY PLAN (SOLFIRE):

This plan has been prepared to deal with any serious marine incident occurring in the Ports of Portsmouth and Southampton or elsewhere in the Solent, and is intended to ensure that adequate Service and Civilian resources are made available to deal with any emergency.

2. VHF COMMUNICATIONS (See "Appendix"):
   (a) The Vessel Traffic Services Centre Southampton, call sign "Southampton VTS", maintains watch on Channels 9, 12, 14, 16, 18, 20 and 22, and monitors Channels 71 and 74.
   (b) The Queen's Harbour Master Portsmouth, call sign "QHM", guards Channels 11, 13 and 73.
   (c) Vessels should maintain watch on VHF Channel 12 and report to "Southampton VTS" when passing the designated reporting points and, in addition if embarking a pilot, when the pilot has boarded.

3. PILOTAGE:

The Port of Southampton is responsible for providing Pilotage Services throughout the East and Central Solent, Southampton Water, Rivers Itchen and Test. Pilotage is compulsory for all vessels exceeding 61 m. LOA (Pilotage is non-compulsory in the West Solent/Needles).

SHIPS requiring a pilot must signal "Southampton VTS" through a U.K. Coastal Radio Station, not less than 12 hours in advance of ETA. Ship Owners, Masters or Agents may order a Pilot by Telex No. 477161, Fax. No. (01703) 232991 or Telephone No. (01703) 632345. Destination, draft and BOARDING POINT must be indicated. The ETA should be verified with "Southampton VTS" 2 hours prior to arrival.

3.1 BOARDING POINTS:
   (a) NAB PILOT STATION provides pilots for all vessels exceeding 150 m. LOA, bound for the Port of Southampton from the East (embracing all wharves, jetties, docks and oil terminals). Pilots are embarked/disembarked at NAB TOWER in moderate weather, deep draft ships exceeding 70,000 d.w.t. may board 3 miles South by appointment. During stormy weather, the service is withdrawn to ST.HELEN'S or SPITHEAD. Radio call sign "NAB PILOT".
   (b) STURBRIDGE PILOT STATION provides pilots for vessels not exceeding 150 m. LOA, bound for the Port of Southampton from the East. Pilots may be embarked/disembarked in the vicinity of North Sturbridge Buoy. Radio call sign "STURBRIDGE PILOT".
   (c) LEPE PILOT STATION provides pilots for all vessels exceeding 61 m. LOA, bound for the Port of Southampton from the West via the Needles Channel. Pilots may be embarked/disembarked between East Lepe and West Lepe Buoys. Radio call sign "LEPE PILOT".

NOTE: PILOT BOATS DO NOT CRUISE ON STATION but put-out when their services are required by appointment.

4. CO-ORDINATION OF SHIPPING MOVEMENTS:

(a) A continuous watch is kept by the Duty VTS Officer (VTSO) responsible to the Harbour Master Southampton.

Telephone (01703) 330022, extn: 2440 (office hours).
Telephone (01703) 339733 (other times).
Telex 477161 DHMSPR.
Facsimile (01703) 232991.

(b) The movement of vessels and the general situation in the Port and its approaches are monitored continuously. Information will be passed to Masters and Pilots. The fullest exchange of information is essential to efficient operations, and the need to maintain communications with "SOUTHAMPTON VTS" is emphasised.

(c) In co-ordinating the movement of vessels, it will be necessary for the Duty VTSO to instruct certain vessels to remain alongside or at anchor, or regulate their time of entry, departure or progress.

5. MOVEMENT REPORTING PROCEDURE:

(a) All vessels in excess of 20 m. in length, bound to or from or passing through the Port of Southampton, vessels bound to or from or passing through the Dockyard Port of Portsmouth, and vessels bound to or from anchorages or other locations in the Solent are required to communicate by VHF with "Southampton VTS" (Call sign "Southampton VTS"). Specifically vessels are to establish contact with "Southampton VTS".

(b) *All vessels in excess of 20 m. LOA, entering or leaving the East Solent, are required to report to "Southampton VTS" (Vessel Traffic Services) on VHF R/T Channel 12 when passing Latitude 50° 40' N., giving their position as a distance East or West of Nab Tower.*

(c) Vessels proceeding to an anchorage for shelter in the Solent or subsequent berthing, must report to "Southampton VTS" when anchored, together with their approximate position. Whilst at anchor, vessels must maintain a listening watch on VHF R/T Channel 12.

(d) Vessels leaving a sheltered anchorage must also report and advise "Southampton VTS" of their intended destination, and whether they are leaving the Solent via the East or West Solent.

(e) Inbound vessels should establish communications with VTS when approaching Nab or Needles.

(f) Vessels outbound from the Port of Southampton should establish communications at least 15 minutes prior to leaving the berth and obtain permission from "Southampton VTS" before letting go.

(g) Vessels clearing Portsmouth Harbour should establish communications with VTS when passing Southsea War Memorial.

(h) Vessels leaving an anchorage, whether inbound or outbound, should establish communications with VTS at least 15 minutes before getting underway.

(i) Vessels inbound or outbound from Portsmouth Harbour are also required to report to "QHM". See Dockyard Port of Portsmouth – Local Notices to Mariners.

6. MOVEMENT REPORTING POINTS:

(a) Vessels inbound or outbound from the Ports of Southampton and Portsmouth, or other destinations in the area or passing through the Solent, are required to report by VHF when passing Movement Reporting Points indicated on Admiralty Charts.

(b) The initial report by all inbound vessels should include:

1. Ship's name and International Radio Call Sign (IRCS).
2. Deepest draft.
3. Destination and last Port of Call.
4. ETA at various locations as requested.
5. Deficiences of ship, navigation equipment, machinery and cargo.
6. Additionally tankers should report any change in the information notifiable under the Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981, and confirm that a Check List has been completed.

(c) The initial report by vessels outbound from the Port of Southampton should include:

1. Ship's name and IRCS.
2. ETD.
3. Deepest draft.
4. Other information requested.
5. Where applicable, tug working channel to be used.
6. ETA at various locations as requested.
7. Next Port of Call.

(d) The initial report by vessels from anchorages and other locations in the Solent should follow the procedure for inbound and outbound vessels as appropriate.

7. HARBOUR PATROL:

The Duty VTSO is supported by a Marine Officer who maintains a continuous surveillance of seamarks and shipping channels from a harbour patrol launch and guards VHF Channels 12 and 16, call sign "SP". At night, the harbour patrol launch exhibits a blue all round light at the mast head.

8. HEIGHT OF TIDE:

Automatic tide gauges are located at Calshot, Dock Head and Prince Charles Container Port. Tidal information is available upon request and is recorded.

9. WIND SPEED AND DIRECTION:

Wind speed and direction information is available upon request and is recorded.

10. HARBOUR RADAR:

(a) Remote controlled Radar Stations are situated at Calshot Spit and Hythe. Each station is fitted with a 25 ft. horizontal aperture scanner 110 ft. above MHWS, searching over a 0.3° horizontal and 4° vertical beam width, rotating at 20 r.p.m. in winds up to 80 knots.

(b) Vessels can be supplied with continuous information relat their progress, approach to navigation marks and other ves transits and turning marks, channel margins and the mann which the vessel is progressing round the West Bramble Calshot turns. Manoeuvring instructions will not be given u specifically requested by the Master or Pilot.

(c) An independent scanner is fitted at the VTS Centre to mo shipping in the RIVER TEST, but the computer ass measurement, accuracy of bearings, distance and tra associated with CALSHOT and HYTHE scanner is not avail

(d) Computer Assisted Measurement System:

This system employs a small digital computer and a var marker which can be placed over any target on the displ provide the following information:

1. The bearing and distance between the scanner and sele target.
2. The bearing and distance between any two targets.
3. The course made good by a selected target.

Facilities are available to store up to 24 targets, such navigation buoys, vessels at anchor, etc. The bearing distance from any selected target to any one of the stored ta can be quickly obtained, and the closest point of appr determined.

(e) Accuracy of Bearing and Distance Measurement:

Accuracy of bearing from Point A to Point B is to 0.5°, distances are to ±25 m., or to 0.3% of the most distant echo the scanner, whichever is the greater.

(f) Radar Reference Line:

An alternative position fixing system indicates the position vessel relative to a Reference Line electronically produce points one cable apart on the radar display linked to the Ca Radar only. The Radar Reference Line is shown on the Adm Charts of the area as a broken line with points at one cable circles where the line changes direction.

(g) Radar Coverage:

Effective radar coverage extends to a line joining NO M LAND FORT and HORSE SAND FORT to the East STANSORE PT. and SALTMEAD BUOY to the West.

A vessel underway upon request will be given her position the distance between the points of the Reference Line as a to estimate the position:

1. As a distance RIGHT or LEFT of the Reference Line, re to her direction of progress.
2. As a distance along the Reference Line to a navigational or marks in transit.

The position of another vessel will be given:

3. As a distance from the Reference Line ON THE SAME or ON THE OTHER SIDE.
4. As a distance along the Reference Line.

NOTE: In areas where a Reference Line is not shown, pro will be indicated relative to navigational marks and other ve

(h) Bearings and Distances:

Bearings and distances will be related to the bow of the v concerned unless otherwise stated.

11. CANCELLATION OF PREVIOUS NOTICES:

Notices to Mariners No. 2 of 1989, No. 6 of 1990 and No. 2 o are hereby cancelled.

This Notice is issued in agreement with QHM Portsmouth.

Signed: Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 4 of 1992:

PORT OF SOUTHAMPTON APPROACHES
CALSHOT REACH AND WESTERN APPROACH CHANNEL

NOTICE IS HEREBY GIVEN that:

1. DIRECTIONS TO BE OBSERVED BY MASTERS OF VESSELS WITH LENGTH OVERALL OF 183 M. (600 FT.) OR MORE:

No two vessels each having a length overall of 183 m. (600 ft.) or more shall pass or overtake each other in WESTERN APPROACH CHANNEL, THORN CHANNEL or CALSHOT REACH to seaward of Hook Buoy. (PORT OF SOUTHAMPTON HARBOUR BYE LAW NO. 11 (1) refers).

2. OUTBOUND VESSELS - FLAG SIGNALS:

Yachts and other small craft in the Solent sometimes experience confusion when an outbound vessel in the Thorn Channel is approaching the West Bramble Buoy, as there is doubt whether the vessel will direct its course to the East (Nab) or West (Needles).

To improve safety, outbound vessels shall hoist the following INTERNATIONAL CODE flag signals during daylight hours.

Hoist	Meaning
ECHO over ANSWERING PENDANT	I am bound East (Nab)
ANSWERING PENDANT over WHISKY	I am bound West (Needles)

It is important that these signals should be read as indicating only a local geographical direction.

3. CANCELLATION OF PREVIOUS NTM – Notice to Mariners No. 4 of 1989 is hereby cancelled.

Signed: Dock and Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 7 of 1992:

THE DOCKYARD PORT OF PORTSMOUTH
AND THE PORT OF SOUTHAMPTON
MOVEMENT OF GAS TANKERS IN THE SOLENT

1. NOTICE IS HEREBY GIVEN that these directions have been jointly promulgated by the Queen's Harbour Master Portsmouth and the Harbour Master Southampton to ensure the safe navigation of gas tankers within the Solent.
2. This Notice applies to all gas tankers loaded or partly loaded and gas tankers which have not been rendered gas free.
3. Gas tankers in transit within the Solent may not enter an area in which the visibility is less than 0.5 miles.
4. Before navigation within the area between the North Sturbridge Buoy and the Warner Buoy, all gas tankers must establish communications with the Queen's Harbour Master Portsmouth on VHF Channel 11 to advise of their transit and to ascertain movements into and out of Portsmouth Harbour.
5. Gas tankers when navigating between Hook Buoy and West Bramble Buoy in the Western Approach Channel should be given the sole occupancy of that channel.
6. Gas tankers when navigating between East Bramble Buoy and Calshot Buoy in the North Channel shall be given the sole occupancy of that channel.
7. No vessel may anchor closer to a gas tanker than a distance equal twice their combined lengths.
8. At no time will more than 3 gas tankers be permitted to remain at anchor within the designated Small Ships Anchorage in Southampton Water.
9. Gas tankers exceeding either 8,000 cu.m. total capacity or 6,000 g.r.t. ARE NOT PERMITTED to enter or leave the Port of Southampton by the West Solent.
10. Notice to Mariners No. 7 of 1989 is hereby cancelled.

Signed: Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 8 of 1992:

DANGEROUS SUBSTANCES IN HARBOUR AREA REGULATIONS 1987 (SI No. 37 OF 1987) RELATED TO THE PORTS OF SOUTHAMPTON, PORTSMOUTH COMMERCIAL DOCKS AND DOCKYARD PORT OF PORTSMOUTH

1. NOTICE IS HEREBY GIVEN that Masters of all vessels carrying Dangerous Substances when entering, leaving or lying in the Port of Southampton or the Commercial Port of Portsmouth, will be required to comply with these Regulations. Failure to do so may lead to the prohibition or removal of the dangerous substance, its container and the vehicle or vessel from the Port in accordance with Clause 7 of the Regulations.

2. APPLICATION:

These Regulations apply in every Harbour and Harbour Area and to any part of a Harbour in the territorial waters of Great Britain. Dangerous Substances are defined at Clause 3 of the Regulations.

NOTE: The expression Harbour Authority when used in the following text shall mean:

- (a) Alongside in Southampton, Fawley and Hamble: Harbour Master Southampton.
- (b) Underway in the approaches to Southampton or in the East or West Solent: Harbour Master Southampton (call sign "SOUTHAMPTON VTS".
- (c) Underway in the Dockyard Port of Portsmouth, North of Outer Spit Buoy: Queen's Harbour Master (call sign "QHM").
- (d) Alongside in the Commercial Port of Portsmouth: Harbour Master Commercial Docks.

3. MARKING AND NAVIGATION OF VESSELS:

(a) Flags and Lights to be displayed by vessels:

Vessels carrying Dangerous Substances to which these Regulations apply are required to show a red flag during the daytime and, when moored or anchored, an all round red light at night. The use of the red light at night when a vessel is underway or moving within the Solent will not be permitted.

(b) Vessels to keep a safe distance from moored or anchored vessels displaying the flags or light required by Paragraph 3(a):

A Master shall not bring his vessel alongside a moored or anchored vessel which is displaying any flag or light required by Paragraph 3(a), without the permission of the Harbour Authority and the Master of that vessel, and shall otherwise keep his vessel at a safe distance from that vessel.

(c) Use of VHF:

The Master of a vessel to which these Regulations apply shall ensure at all times in the Port of Southampton or in the approaches to the Port in the East and West Solent, a listening watch is kept on VHF Channels 12 or 14, or when North of Outer Spit Buoy on VHF Channel 11 or 13.

Except

1. When a vessel is at a berth; or
2. For short periods when the radio is tuned to another frequency for operational purposes.

(d) Anchoring and mooring of vessels:

The Master of a vessel which is carrying a dangerous substance or on board which any dangerous substance is to be loaded, shall anchor or moor his vessel only at such places and at such times as the Harbour Authority directs, and shall ensure that any conditions imposed by the Harbour Authority with regard to anchoring or mooring are complied with. The Master shall not permit his ship to be moved from anchorage or berth until he is so authorised by the Harbour Authority.

(e) Mobility of vessels:

The Master of a vessel carrying dangerous substances, must ensure that his vessel is in a state of readiness to be moved at all times, tidal conditions permitting, and shall not immobilise his vessel without first seeking an Exemption Certificate in writing from the Harbour Authority. Any such exemption may be granted subject to conditions and to a limit of time and may be revoked at any time by a certificate in writing. Vessels carrying Class 1 Dangerous Substances (Explosives) will not be given an exemption.

4. FITNESS OF VESSELS:

The Master of a vessel which is designed to carry either Dangerous Chemicals in bulk or Liquified Gases in bulk shall not carry, load or unload any dangerous liquid or dangerous substance in bulk in either Portsmouth or Southampton unless:

- (a) The vessel has a valid Certificate of Fitness for the carriage of the substance in bulk issued under the authority of the Government of the country of registration of the vessel, and he complies with any conditions of carriage laid down in that certificate.
- (b) The Harbour Authority has given permission in writing.

5. PERMISSION FOR TRANSFER BETWEEN VESSELS:

The Master of a vessel carrying a liquid dangerous substance in bulk shall not cause or permit that substance to be transferred by pipeline to another vessel unless the Harbour Authority, and where the vessel is at berth, the Berth Operator, have given their permission in writing for that transfer to take place.

6. OPERATIONS FORBIDDEN ON VESSELS WITHOUT PRIOR PERMISSION:

(a) The Master of any vessel carrying or which has recently carried, a liquid dangerous substance in bulk shall ensure that none of the following operations are commenced:

1. The discharge of ballast or slops contaminated with any dangerous substance.
2. The cleaning or ventilation of any tank which was last used to carry a dangerous substance.
3. The pumping overside of bilges contaminated with any dangerous substance.

(b) The Master of any vessel carrying or which has recently carried, flammable liquid in bulk shall ensure that none of the following operations are commenced:
  1. The gas-freeing of any tank which was last used to carry the substance.
  2. The cleaning of such a tank with water, stem, detergents or other chemicals.
  3. The purging of such a tank with inert gas.
  4. The washing of a tank with crude oil while unloading.

Unless the following conditions have been complied with:

(a) Where the vessel is at a berth:
  1. The Berth Operator has given permission, or
  2. The Harbour Authority has given permission to manned vessels.

(b) Where the vessel is not at a berth, the Harbour Authority has given permission.

7. UNTOWARD INCIDENTS:

The Master of a vessel carrying any dangerous substance shall immediately inform the Harbour Authority and if the vessel is at a berth, the Berth Operator, of any untoward incident which has occurred on the vessel. Untoward incident means an incident involving or threatening the containment of a dangerous substance.

8. VESSELS LOADED WITH EXPLOSIVES TO BE TAKEN OUT OF THE HARBOUR AREA:

When loading a vessel with explosives has been completed, the Master shall ensure that the vessel is taken out of the Harbour or Harbour Area as soon as reasonably practicable, unless the Harbour Authority and, where the vessel is at a berth, the Berth Operator, otherwise agree.

9. NOTICE OF ENTRY OF DANGEROUS SUBSTANCES ARRIVING BY SEA FOR DISCHARGE OR IN TRANSIT:

Advance notification of dangerous substances arriving by sea into the Solent Area will be required in the form shown in Paragraph 10 by the Harbour Authority from Masters of vessels or their Agents, and must be received at least 24 hours prior to the arrival of the vessel in the Solent. In the case of tankers in excess of 1,600 g.r.t./g.t., this report will combine the details required under the Merchant Shipping (Tankers) (EEC Requirement) Regulation 1981 (SI No. 1077 of 1981).

It should be noted that tankers having carried one or more cargoes and which have not been rendered gas free, purged or cargo spaces completely inerted, will also be required to provide the advance notification.

The advance notification report should be sent to:

(a) In the case of Southampton, the Harbour Master – Southampton and received in writing by one of the following means:
  1. Telex: 477161 DHMSPR.
  2. Ships Telegram Service – Telegraphic Address: Harbour Master Southampton.
  3. By hand to the Harbour Master, Vessel Traffic Services Centre, Berth 37, Eastern Docks, Southampton.
  4. Facsimile: (01703) 232991.

  In the event of vessels whose passage time is less than 24 hours inbound to the Port of Southampton, the notification should be sent by telex from the last port of call, to ensure that details have been received prior to the vessel's arrival at the Nab/Needles area.

(b) In the case of the Portsmouth Commercial Docks, the Harbour Master Portsmouth Commercial Docks, marked DANGEROUS SUBSTANCES NOTICE and received in writing by one of the following means.
  1. Telex 265452 MONRES G or electronic mail network number 9312110368 PM.
  2. By hand to the Harbour Master, Harbour Offices, Continental Ferry Port, Portsmouth.

  Where the voyage is less than 24 hours duration, a shorter period of notice may be accepted, but notice must ALWAYS be given BEFORE the ship passes the Nab or Cowes inbound for Portsmouth in the form prescribed, except in the case of Dangerous Substances for Albert Johnson Quay, Flathouse Quay and private wharves, and Dangerous Substances of Class 1 and Class 7 for the Continental Ferry Port, for which the minimum period of notice is 24 hours in ALL cases. Only those Class 1 materials which are of Division 1.4 – Compatibility Group 5, or any other explosives (except Compatibility Group L) of total quantity not exceeding 10 kilograms, will be considered for Portsmouth Commercial Docks.

(c) In the case of the Queen's Harbour Master and on the assumption that the information has already been passed to the Harbour Master – Southampton and the Harbour Master – Portsmouth Commerical Docks, the information be passed by VHF Channel 11 in the form shown in Paragraph 11, but is only required on sailing from either Southampton or Portsmouth or on passing Nab Tower inbound.

10. NOTIFICATION OF DANGEROUS SUBSTANCES:

(a) Non-Tankers:
  1. Ship's name and International Radio Call Sign (IRCS).
  2. Flag.
  3. Overall length, draft and beam.
  4. Destination within the Harbour Area.
  5. ETA Nab or Needles.
  6. Last Port of Call.
  7. Possession of a Certificate of Fitness, where appropriate.

(b) Dangerous Substances being carried:
  (Specify for discharge or in transit).
  1. Correct technical name of Dangerous Substance.
  2. UN Number.
  3. Quantity of each substance.
  4. Classification.
  5. Details of the number and type of packages to be individu handled (where appropriate), including the carrying unit t e.g. vehicle, container, etc.
  6. Flashpoint in degrees Centigrade (where appropriate).

(c) In the case of Explosives:
  (Specify for discharge or in transit).
  1. UN Number.
  2. Class.
  3. Division.
  4. Compatibility group.
  5. Net explosive content.

(d) Tankers (Vessels under 1,600 g.r.t./g.t.):
  1. Ship's name and IRCS.
  2. Flag.
  3. Overall length, draft and beam.
  4. Destination within the Harbour Area.
  5. ETA Nab or Needles.
  6. Last Port of Call.

(e) Dangerous Substances being carried:
  (Specify for discharge or in transit).
  1. Correct technical name of Dangerous Substance.
  2. UN Number.
  3. Quantity of each substance.
  4. Classification.

(f) Tankers (Vessels over 1,600 g.r.t./g.t.):
  1. Ship's name and IRCS.
  2. Flag.
  3. Overall length, draft and beam.
  4. The harbour where the Master intends first to berth the tan i.e. anchorage or berth.
  5. Destination within the harbour area.
  6. ETA Nab or Needles.
  7. Last Port of Call.
  8. Nature and quantity of any chemicals, gas or oil carried by tanker.
  9. Whether tanker is fitted with an inert gas system and, if is fully operational.
  10. Whether the cargo tanks have an atmosphere which been rendered non-flammable.
  11. Whether or not a certificate has been issued in respe the tanker:
    (a) If its cargo includes chemicals, that it complies wit IMO Code for Ships carrying Dangerous Chemicals
    (b) If its cargo includes gas, that it complies with the Code for Existing Ships carrying Liquified Gases.
  12. Defects in hull, machinery or equipment of the tanker w may:
    (a) Effect materially the safe manoeuvrability of the ta or
    (b) effect materially the safety of other vessels in or vicinity of, the approaches to the harbour; or
    (c) constitute a hazard to the Marine Environment; or
    (d) constitute a hazard to persons or property on land the vicinity of the harbour.

(g) Dangerous Substances being carried:
  (Specify for discharge or in transit).
  1. Correct technical name of Dangerous Substance.
  2. UN Number.
  3. Quantity of each substance.
  4. Classification.

11. DETAILS REQUIRED BY THE QUEEN'S HARBOUR MAS PORTSMOUTH:

Details required by the Queen's Harbour Master Portsmouth on departure from Portsmouth or Southampton or on arrival Nab To
  1. Ship's name and IRCS.
  2. Flag.
  3. Overall length, draft and beam.
  4. Either
    (a) Destination within the Solent, or
    (b) Time of passing Nab Tower.

5. Reference of the letter, telex or facsimile sent to Harbour Ma Southampton or Habour Master – Portsmouth Commercial D containing the information required by Paragraph 10. If this infor has not been forwarded, a full report in accordance with Parag is required.

12. This Notice issued jointly by the Queen's Harbour Portsmouth, the Harbour Master Southampton and the Harbour Portsmouth Commercial Docks.

13. Notice to Mariners No. 8 of 1989 and No. 6 of 1990 is cancelled.

Signed: Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 10 of 1992:

THE DOCKYARD PORT OF PORTSMOUTH AND THE PORT OF SOUTHAMPTON

VESSELS CONSTRAINED BY THEIR DRAFT

1. NOTICE IS HEREBY GIVEN that these directions promulgated by the Queen's Harbour Master – Portsmouth Harbour Master – Southampton are compatible with the Regulations to ensure the safe navigation of large vessels in Solent and the dredged approach channel to Southampton Wa

2. There are two areas in the Solent in which vessels constr their draft inbound from the Nab Tower to Southampton, are in

danger from outbound vessels; these are when passing the Portsmouth entrance channel, and when passing the North Sturbridge Buoy and shaping course to pass to the South of Ryde Middle Shoal. Vessels proceeding to seaward out of the Portsmouth entrance channel or from Southampton, North of the Ryde Middle Shoal, should take every possible precaution to avoid endangering the movements of these vessels, and in particular to avoid presenting them with a crossing situation.

3. DEFINITIONS:
In the Dockyard Port of Portsmouth and the Port of Southampton, a vessel having a draft of 10.5 m. (34.5 ft.) or more, a length of 288 m. (945 ft.) or more, or a deadweight tonnage of 100,000 tons or more shall be considered to be a VESSEL CONSTRAINED BY HER DRAFT for purposes of definition within the International Regulations.

4. ACTION TAKEN TO AVOID IMPEDING THE SAFE PASSAGE OF A VESSEL CONSTRAINED BY HER DRAFT:
Vessels are warned that in taking action to avoid impeding the safe passage of a vessel constrained by her draft within the navigationally restricted waters of the Solent and Southampton Water, due regard must be given to the safe navigation of the latter vessel, which may prevent her from keeping her course and speed.

5. SHIPPING MOVEMENT CONTROL:
Vessels constrained by their draft or size, and vessels restricted in their ability to manoeuvre, shall not operate in the Dockyard Port of Portsmouth or the Port of Southampton without the permission of the Queen's Harbour Master – Portsmouth or the Harbour Master – Southampton respectively.

6. SOUTHAMPTON DEEP WATER CHANNEL:
All vessels navigating within the Port of Southampton shall ensure that a vessel constrained by her draft or size shall be given the sole occupancy of the Deep Water Channel between Hook Buoy and the seaward limit of the WESTERN APPROACH CHANNEL.

7. Notice to Mariners No. 10 of 1991 is hereby cancelled.
Signed: Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 11 of 1992:

SPEED OF VESSELS AND PASSING DISTANCES OFF JETTIES AND BERTHS

1. NOTICE IS HEREBY GIVEN that special care must be exercised by all vessels navigating within the limits of the Port. Vessels should proceed at a reduced speed as safe navigation permits, and in such a manner as not to endanger the lives of persons ashore or afloat, including passengers embarking or disembarking from harbour ferries, or cause damage to vessels alongside or at moorings, or to sea walls and other works. Particular care should be exercised when passing Oil Terminals where vessels are loading or discharging petroleum products and hazardous chemicals.

2. Special consideration should be given to the effects caused by the underwater form and the draft of vessels in order to reduce the resulting pressure waves and displacement of water. Particular attention should be given to the increased effects caused during low water periods.

3. Attention is drawn to Merchant Shipping Notice No. M 930 – INTERACTION BETWEEN SHIPS.

4. The special attention of Masters, Pilots and others having command or charge of vessels is drawn to the presence of vessels loading or discharging petroleum products or stores from small craft at ESSO MARINE TERMINAL – FAWLEY and BP OIL TERMINAL – HAMBLE, and other vessels loading stores or cargo in anchorages. Attention is also drawn to the presence of craft at moorings or alongside the Military installations at HYTHE and MARCHWOOD.

5. As safe navigation permits, vessels drawing 6.0 m. (19.7 ft.) and over when approaching or passing the ESSO MARINE TERMINAL – FAWLEY and BP OIL TERMINAL – HAMBLE must not exceed 7 knots over the ground. All ferries and vessels of less than this draft are reminded of the dangers inherent with oil terminals, and should reduce speed as safe navigation permits (Port of Southampton Bye Law No. 9 refers).

6. Any vessel passing the ESSO MARINE and BP OIL TERMINALS should navigate not less than 130 m. from the face of the jetties. This limit is intended to protect vessels moored alongside, guard against the interaction of passing vessels and the risk of naked lights and sparks within these areas (Port of Southampton Bye Law No. 9 refers).

7. Notice to Mariners No. 12 of 1989 is hereby cancelled.
Signed: Harbour Master – Southampton.
Dated: 1st January 1992.

Notice to Mariners No. 8 of 1996:

PORT OF SOUTHAMPTON WESTERN APPROACH CHANNEL "AREA OF CONCERN" MOVING PROHIBITED ZONE AROUND VESSELS EXCEEDING 150 M. LOA

1. Notice is hereby given that the Main Navigable Channel, as defined on Admiralty Charts No. 1905, 394 and 2040, which lies between a line drawn from Prince Consort to South Bramble Buoys and a line drawn between Black Jack and Reach Buoys is designated as an "Area of Concern".

2. All vessels of over 150 m. length overall (LOA) whilst navigating in the "Area of Concern" will be given a "Moving Prohibited Zone" around the vessel of 1,000 m. ahead and 100 m. either side of the vessel as depicted on the accompanying chartlet (See "Plan").

3. Small vessels of under 20 m. LOA will be prohibited from entering the Moving Prohibited Zone. This measure coincides with the spirit of Rule 2 and the Steering and Sailing Rules of the International Regulations for Preventing Collisions at Sea 1972.

4. Nothing in this notice shall relieve vessels of less than 20 m. in length or sailing vessels from their obligation under Rule 9 of the collision regulations to not impede the passage of any vessel which can navigate only within a narrow channel or fairway.

5. All vessels of over 150 m. LOA when navigating in the "Area of Concern" are required to display, where it can best be seen by day, a Black Cylinder, and by night 3 all-round red lights in a vertical line, as defined by Rule 28 of IRPCAS to visually indicate the presence of the moving prohibited zone ahead and either side of the vessel.

6. Nothing in this Notice will prevent "Vessels Constrained by their draft" as defined by Notice to Mariners No. 10 of 1992 from displaying these lights and shapes as required by IRCPAS in other areas of the Solent or Southampton Water.

7. When operationally possible, the Southampton harbour patrol launch (VHF call sign "SP" Channel 12) will precede these vessels within the "Area of Concern" showing, in addition to the normal steaming lights, a blue flashing light. The absence of the patrol launch will not invalidate the implementation of the moving prohibited zone.

8. To assist recreational vessels, the Port of Southampton Vessel Traffic Centre (Call sign "Southampton VTS") will make hourly TRAFFIC INFORMATION BROADCASTS on VHF Channel 14 on the hour from 0600 hrs. to 2200 hrs. Fridays to Sundays, inclusive of Bank Holiday Mondays, from Easter to the last weekend in October. From 1st June to 30th September the Traffic Information Broadcast will be made on a daily basis between the hours specified above. The broadcast will identify those large vessels and approximate times in which a moving prohibited zone will apply whilst navigating in the "Area of Concern" and any other relevant information for the safety of small vessels.

Announcements of imminent Traffic Information Broadcasts will first be made on VHF Channels 16 and 12.

9. This Notice was first introduced in 1993 following consultations with Shipowners and Recreational Sailing interests on behalf of the users of the Solent and the Port of Southampton.

10. This Notice replaces Notice to Mariners No. 5 of 1993 which is hereby cancelled.
Signed: Harbour Master.
Dated: 4th April 1996.

Notice to Mariners No. 12 of 1996:

SOUTHAMPTON PILOTAGE DIRECTIONS AMENDMENTS TO THE ARRANGEMENTS FOR EMBARKING AND DISEMBARKING PILOTS FOR THE SOUTHAMPTON CHA EASTERN INNER PILOTAGE LIMIT

1. Notice is hereby given of a change to the arrangements for embarking/disembarking Pilots to/from all vessels of between 61 m. and 150 m. LOA when carrying a bulk cargo of Dangerous or Polluting Goods (The arrangements for vessels carrying LPG/LNG in bulk remain unchanged as detailed in Southampton Pilotage Direction 2.2a).

2. Currently these vessels are subject to compulsory pilotage from the Southampton CHA Eastern Inner Limit and embark/disembark the pilot in the vicinity of the North Sturbridge Buoy (0.7 nautical miles North West of the North Sturbridge Buoy as depicted on British Admiralty Chart No. 394).

3. With effect from the issue of this Notice all such vessels carrying a bulk cargo of Dangerous or Polluting Goods and using the Eastern Approach to the Solent will be required to embark/disembark their pilot in a position to the East of the Warner Buoy.

4. Southampton VTS will advise such an arriving vessel of the intended boarding position on receipt of the 2 hour notice of ETA message from the vessel on VHF Channel 9. This will be up-dated if necessary when the vessel reports in to VTS on VHF Channel 12 on arrival at Nab Tower.

5. "Dangerous Goods" for the purpose of this Notice are those classified as such in the IMDG Code, Chapter 19, of the IGC Code or Chapter 17 of the IBC Code.
"Polluting Goods" means:
Oil as defined by MARPOL Annexe I.
Noxious Liquid Substances as defined by MARPOL Annexe II.
Harmful Substances as defined by MARPOL Annexe III.

6. "In Bulk" for the purpose of this Notice means that the Dangerous or Polluting Goods have been loaded in a loose or homogenous form into the vessel's cargo hold(s) or tank(s) and/or form a substantive part of the deadweight cargo.

7. All other vessels subject to compulsory pilotage from the Southampton CHA Eastern Inner Limit will continue to use the existing pilot boarding position referred to in Paragraph 2 above unless they elect on a voluntary basis to take their pilot from the outer pilotage limit in the vicinity of the Nab Tower.

8. Restricted Visibility. In the event of visibility falling below 0.5 nautical miles in the vicinity of the published Eastern Inner Limit boarding area then the boarding area for vessels referred to in Paragraph 7 above will also be temporarily re-located to the East of the Warner Buoy and they will be advised by Southampton VTS in accordance with Paragraph 4.

9. Traffic Congestion. In the event of traffic congestion in the vicinity of the published Eastern Inner Limit Boarding Area then Southampton VTS may similarly elect to temporarily re-locate pilot boarding as described in Paragraph 8.

10. Southampton Notice to Mariners No. 34 of 1993 is hereby cancelled.
Signed: Harbour Master.
Dated: 12th June 1996.

Notice to Mariners No. 16(T) of 1996:

CAPITAL DREDGING WORKS – SOUTHAMPTON MAIN CHANNEL DEEPENING BETWEEN FAWLEY AND 207 BERTH

1. Notice is hereby given that on or after Monday 5th August dredging works associated with the deepening of the Southampton Water main channel between Fawley and 207 Berth in the River Test will commence.

2. Works will continue until the Summer of1997 in phases each of which will be the subject of a separate Notice to Mariners.

3. Works will commence with the trailing suction dredger "Cristoforo Colombo" and be completed when the channel between Fawley Reach and the Container Port has been deepened to 12.6 m. below Chart Datum.

4. Dredging operations will continue on a 24 hour basis and mariners should expect to pass dredging plant at any time between the Nab dumping area and the River Test.
5. Dredgers will display lights and shapes as required by the International Prevention of Collision Regulations and mariners are requested to reduce speed as safe navigation permits when passing dredgers engaged in underwater operations.
6. Mariners may request information on dredging activity from Southampton VTS on VHF Channel 12.
7. Further Notices on the works will be issued as appropriate.

Signed: Harbour Master.
Dated: 26th July 1996.

STORNOWAY: 58.12 N. 06.22 W. (See Plan)

PORT LIMITS: Extend to a line from Southern end of Holm Island on the East to Rudh A'Bhaigh Uaine on the West – approximately 7.5 cables to seaward of Arnish Point Light.
PILOTAGE: Pilotage not compulsory. Vessels requesting Pilot request same with ETA 24 hours prior to arrival. Confirmation or amendment required 2 hours prior to arrival. Boarding off Arnish Point Lighthouse.
ANCHORAGES: Anchorage in harbour between Goat Island and mouth of Creed River, 8 fathoms.
RESTRICTIONS: Entry night or day and at any state of tide. No bar on entrance.
MAX. SIZE: 400 ft. by 60 ft. by 22 ft. draft to berth alongside, 600 ft. length by 35 ft. draft for anchorage in bay.
HEALTH: The customary flying of "Q" flag.
Also see "Health – All Ports" before first U.K. port.
RADIO: Wick Radio or alternatively Stonehaven Radio.
RADAR/VHF: R/T-VHF established in harbour, call "Stornoway Harbour" on Channels 16 and 12. Emergency messages may be passed through Stornoway Coastguard on 81.8 m. There is a radar set in the watchroom but no V.T.S. service is provided.
TUGS: No tugs available at port. Fishing vessels have been used, when necessary, for this purpose.
BERTHING: Vessels can be berthed at any time, provided berth is free.
Ro/Ro ferry terminal for Stornoway/Ullapool service in operation.
Depth of Water at Low Water Spring Tides: West side No. 1 Pier: 24.5 ft. shallowing to 12 ft. at junction of North Beach Quay. East side No.1 Pier: 24.5 ft. shallowing to zero at inward end. West side No. 2 Pier: 17.5 ft. shallowing to zero at inward end. East side No. 2 Pier: 16.5 ft. shallowing to zero at inward end. Inner Harbour decreases from 12 ft. at junction of Esplanade Quay to 8 ft. at upper end of Cromwell Street Quay.
STEVEDORES: Arranged by Agents on receipt of ETA.
MEDICAL: Advance notice desirable, Hospital facilities available in the town.
TANKERS: Normal safety requirements. One tanker berth only 15 ft. mean draft, max. length 220 ft.
DENSITY: Practically always dead salt; 1025 density.
FRESH WATER: Fresh water available by hose at 15 t.p.h.
FUEL: 24 hours notice required.
CONSULS: French, Swedish, Norwegian; Tel: Stornoway 702920, 702054, 703173 respectively.
REPAIRS: Minor deck and engine repairs can be carried out locally.
DRY DOCKS: No dry dock but one slipway of 750 tons displacement.
SURVEYORS: Marine & Engineer Surveys (Hebrides) Ltd., Stornoway.
GANGWAY/DECK WATCHMEN: Service of watchmen not necessary. Watchmen from shore may be employed if required.
OPENING/CLOSING HATCHES: Normally crew.
REPATRIATION: Facilities exist for this service.
AIRPORT: 3 miles from port, served regularly by British Airways from Glasgow and Inverness.
HOLIDAYS: New Year's Day, Christmas Day and all other local Bank Holidays. Cargo work can be arranged except New Year's Day. (No Sunday work.)
POLICE/AMBULANCE/FIRE: Police, Stornoway 702222 (can deal with all three services).
EMERGENCY CO-ORDINATION CENTRE: Stornoway Coastguard Tel: 702013 or 702014.

SULLOM VOE: 60.27 N., 01.17 W. (See Plan)

GENERAL: The Port of Sullom Voe is a major deep water harbour. It is owned and operated by the Shetland Islands Council as Harbour Authority.

The Sullom Voe Oil and Gas Complex is located within the port limits on Calback Ness in position 60° 27.5' N., 01° 17.0' W. and is operated by BP Petroleum Development Limited on behalf of several oil company participants. The oil delivered to Sullom Voe through the Brent and Ninian pipelines is collected from a group of oilfields located in the East Shetland basin.

The Port Administration Building, from which all marine operations are monitored and controlled, is located on Sella Ness in position: Lat. 60° 26.8' N., Long. 01° 16.5' W.

Services offered by the Harbour Authority and financed through conservancy charges include port radar, navigational advice to Shipmasters, intensity controlled navigational lighting to assist in poor visibility, meteorological advice and shore access gangways at all oil and gas jetties. Services offered and financed through separate charging structures include pilotage and mooring boat services. Boat hire can be arranged for vessels anchored or standing off. Helicopter hire is also available at times. The towage service is operated by a separate towage company and financed directly through towage charges.

The harbour is presently designed to routinely accept tankers up to around 365 m. LOA, with a draft of up to 22.6 m. and LPG carriers up to around 260 m. in length with a draft up to 15.9 m. In addition to liquid bulk and LPG cargo, the port is designed to handle general, dry bulk, Ro/Ro, containerised cargo and quarried rock.

There are 2 entrances to Yell Sound. The primary Northern route, suitable for oil and gas tankers, lies on the Western side of Yell Sound and is marked by leading lights situated on Gluss Isle. The South Eastern approach is considered suitable for vessels of up to 200 m. LOA and having a draft of not more than 11.6 m.

Both routes merge at the entrance to Sullom Voe; the lead into the Voe is indicated by leading markers located on Fugla Ness. In the case of vessels other than coasters, all manoeuvres South of Lamba Island will be assisted by tugs.

Ships will generally be berthed starboard side alongside at the oil loading berths. This will involve swinging each vessel within the Voe in areas adjacent to the tanker jetties. Vessels may be berthed port side alongside during adverse wind conditions.

For the purpose of manoeuvring within the harbour area a minimum under keel clearance of 2.0 m. is required at all times.

Although current rates of up to 7 knots may be experienced in areas of Yell Sound, records indicate that the maximum current likely to be experienced within Sullom Voe on the deep draft route, is unlikely to exceed 1 knot.

The maximum tidal range within the Harbour Area is 2.3 m. at Springs and minimum 0.6 m. at Neaps. The main tidal current flows to the South on the flood and to the North on the ebb.

Moorings: Strong winds are frequently experienced at Sullom Voe and may be accompanied by sudden gusts from any direction. The prevailing wind direction is S.W.

It is essential that whilst alongside the jetty, moorings are tended carefully and regularly and conform with the mooring requirements. (See "Plan").

SHIP SYSTEM FAILURES: Following the main engine problems experienced by the vessels in Sullom Voe, the following additional regulations are in effect:

1. In the event of a vessel suffering a machinery failure affecting seaworthiness or ability to manoeuvre prior to berthing or whilst alongside, an independent survey must be commissioned into the ability of the ship's machinery to perform after repair. Any surveyor appointed must be approved by a recognised classification society; be fully able to certify the integrity of the machinery or repair and must not, at the time of survey, be a member of the vessel's crew. The vessel will not be permitted to sail until the Director of Marine Operations is satisfied by the surveyor that the vessel is fully operational in every respect or that there are satisfactory arrangements in place to ensure that the vessel may depart from Shetland waters safely. All survey and other costs involved in this matter will be for the ship's account.
2. In the above circumstances, the vessel will be required to employ 4 tugs for sailing, which will remain in attendance until the vessel has cleared port.
3. No large scale crew changes for vessels stemmed for Sullom Voe will be permitted in Shetland waters.

WAITING OFF SHETLAND: It is often the case that vessels have to wait off the coast line of Shetland until a berth is available or there is a break in the weather.

In the past, some vessels have stopped engines, displayed Not Under Command signals and drifted for extended periods.

However, such practice has conflicted with fishing vessels in the area who must tow in finite routes due to rocks on the seabed. The fishing vessels do not know if the ship is indeed Not Under Command, and so cannot give way to the vessel engaged in fishing or simply stopped and should start engines to move out of the way.

The British Government, Department of Transport, has ruled that such a display of Not Under Command signals is an abuse of the collision regulations. Vessels stopped in the water should *not* display Not Under Command signals unless they are disabled and unable to manoeuvre. Should the ship's Master wish to stop and drift, the engines should be available in good time to move out of the way of any vessel as required by the collision regulations.

The oil pollution surveillance helicopter, operated by the Harbour Authority, will report any vessels displaying Not Under Command signals to H.M. Coastguard for further action.

CONDUCT OF VESSELS ENTERING YELL SOUND:
(a) Masters of tankers and gas carriers entering the Port of Sullom Voe are advised to refer to Charts B.A. 3298, 3297 and 3292.
(b) Navigation within the Harbour Area is prohibited unless the vessel is mechanically and navigationally sound, anchors are ready for letting go and there is a responsible person who can speak and understand English on the bridge.
(c) The berthing of tankers and gas carriers is suspended when wind speeds are regularly and frequently gusting in excess of 30 knots. Masters will be advised by Port Control in the event of such suspension.
(d) Vessels should afford a safe lee for the pilot boat during boarding and landing operations.
(e) When inbound tankers are at Reporting Point B ('Bravo') the Master should alert the crew in preparation for securing tugs, while speed is reduced accordingly.
(f) The bow and stern tugs will be made fast when it is considered safe to do so, soon after passing the Outer Skerry.
(g) The alongside tugs shall be secured as soon as possible thereafter.
(h) The vessel's speed must not exceed 5 knots South of a line joining Skaw Taing and Trumba Point.
(i) Standard practice requires vessels to be swung on arrival (except when weather conditions dictate otherwise) and berthed starboard side alongside the jetty designated (See "Plans" for mooring guidelines).

Note: Tugs will use their own lines for securing.

MINIMUM REQUIREMENTS: In order to avoid delays, all vessels programmed for Sullom Voe should comply with the recommendations of the Council of the European Committee for Vessels Transiting Community Seaports, and be fitted with:
(i) Fully operational radar.
(ii) Fully operational VHF radio with Channels 16, 14, 20, 12, 10 and 9.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessels safely.
(vi) Efficient signalling equipment.
(vii) Fully operational tachometer, rudder and helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.
(x) A complete and valid set of Safety Certificates.
(xi) All officers to be properly qualified and carry recognised certificates of competency.

Note: If any vessel cannot comply with any of the above, Sullom Voe Port Control should be advised prior to arrival or departure.

DOCUMENTS:
General Declaration (C13). In duplicate.
Crew List (IMO FAL 5) or equivalent.

In additional to the above, the following are required if arriving from a Non-EC Port.
Cargo Manifest (if appropriate).
Crew Declaration (C142). In duplicate (incorporating small parcels).
Procedure:
(i) The Master of a ship is responsible for making Report.
(ii) The Report is to be completed in duplicate on arrival.

(iii) If the ship is visited on arrival, the Report is to be handed to the visiting Officer.

(iv) If the ship is not visited on arrival, the original copy of the Report is to be lodged at the Designated Place (H.M. Customs & Excise, Charlotte House, Lerwick), not later than 3 hours after the ship has arrived at its place of loading or unloading.

PILOTAGE: Pilotage is compulsory within the Sullom Voe harbour area.
Pilots: Authorised Pilots are available on a 24 hour basis. A continuous VHF watch is maintained. Call "Sullom Voe Harbour Radio" on Channel 16 or Channel 14.
Pilot Boarding Arrangements: In all normal circumstances the boarding and landing of Pilots at Sullom Voe will be carried out by the Authority's pilot vessels, which are approved for this purpose. Helicopters may be used at certain times and under certain conditions as set out below.
Harbour Area: The Sullom Voe Harbour Area is defined in 'The Sullom Voe Harbour Revision Order 1980' as: "The entire area of Yell Sound and Sullom Voe and adjacent inlets within a line commencing at Ell Wick thence in a Northerly direction along the line of the low water mark on the West side to a point in Latitude 60° 38.27' N., Longitude 01° 18.27' W. on the line of low water mark at the Northern extremity of the Point of Fethaland, thence in an Easterly direction following a straight line to a point in Latitude 60° 38.23' N., Longitude 01° 11.13' W. on the line of low water mark at the Northern extremity of Fogla Lee on the Island of Yell, thence generally in a Southerly and Easterly direction along the line of low water mark on the East side to a point in Latitude 60° 29.15' N., Longitude 01° 05.80' W. on the line of low water mark at the South-eastern extremity of the Ness of Copister, thence in a Southerly direction to a point in Latitude 60° 28.68' N., Longitude 01° 05.97' W. on the line of low water mark at the South–Eastern extremity of the Island of Orfasay, thence in a South–westerly direction following a straight line to a point in Latitude 60° 27.73' N., Longitude 01° 08.37' W. on the line of low water mark at the Southern extremity of Samphrey Island, thence in a Westerly direction following a straight line to a point in Latitude 60° 27.75' N., Longitude 01° 10.82' W. at the root of Mossbank Pier and thence generally in a Northerly and Southerly direction following the line of low water mark to the point of commencement.
Pilot Boarding Areas: Ships arriving from sea which are compelled to take a pilot in compliance with this Direction, or otherwise require a pilot, shall take the pilot on board in the following areas:

(a) Ships approaching the North Entrance of Sullom Voe Harbour Area should rendezvous with the pilot in position Lat. 60° 38.3' N., Long. 01° 14.8' W., with Point of Fethaland lighthouse bearing 260° (T)×1.8 miles.
(b) Ships approaching the South East Entrance of Sullom Voe Harbour Area should rendezvous with the pilot in position Lat. 60° 28.5' N., Long. 00° 56.5' W., with Firths Voe lighthouse bearing 260°(T)×7 miles.
(c) Ships may take a pilot on board in other areas only if expressly directed to do so by an authorised pilot or the Harbour Master.

Note: Vessels boarding pilots by helicopter will usually carry out such operations near North of the normal boarding position for the North Entrance given in (a) above. This may be varied due to weather or other cause and vessels should proceed in accordance with advice from Sullom Voe Port Control when helicopters are used.
Exemption from Compulsory Pilotage: Without prejudice to the generality of the foregoing, the following ships shall be exempt from compulsory pilotage within the Sullom Voe Harbour Area unless as may otherwise be directed by the Harbour Master:

(a) All ships of not more than 300 tons gross registered tonnage which do not have on board dangerous substances to which the provisions of the Dangerous Substances in Harbour Areas Regulations 1987 apply.
(b) All fishing vessels.
(c) All tugboats operating as such exclusively within Sullom Voe Harbour Area.
(d) All ships *in transit* through the Sullom Voe Harbour Area which do not pass South of a line joining the most Northerly point of Gluss Isle and the most Northerly point of Calback Ness.
(e) All ships belonging to Her Majesty.

Pilotage Exemption Certificates: The Secretary of State has directed that the Shetland Islands Council may refuse to grant such Certificates in respect of vessels using Sullom Voe Harbour Area.
Pilot Boats: The Authority has 3 boats for use at the Port of Sullom Voe.

(i) "Sullom Mareel" LOA 16.2 m., service speed 16 knots.
(ii) "Sullom Spindrift" LOA 19.8 m., service speed 20 knots.
(iii) "Sullom Shoormal" LOA 19.8 m., service speed 20 knots.

All boats are of GRP construction and are fully equipped with modern navigational aids.
The freeboard of each boat is approximately 1.5 m.
Pilot Ladder Requirements: All vessels calling at the Port of Sullom Voe must comply with "The Merchant Shipping (Pilot Ladders and Hoists) Regulations 1987 (S.I. 1961)".
The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible deck officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a position where the Pilot can gain safe and convenient access to the ship after climbing not less than 1.5 m. and not more than 9.0 m.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 9.0 m., access to the ship must be by means of a combination of a pilot ladder and an accommodation ladder, or an equally safe and convenient means.
(v) Owners, Charterers and Masters of vessels should be aware Sections 6 and 7 of the M.S. (Pilot Ladders and Ho Regulations 1987 specifies very clearly the conditions u which accommodation ladders are permitted to be used combination with a pilot ladder when the freeboard exceeds The attention of those involved is drawn particularly to Sec 7(2)(A) of these regulations which reads as follows ". . . the lo end of the accommodation ladder rests firmly against the sid the ship within the parallel body length of the ship and, as fa is practicable, within the mid-ship half section *and leading a* Masters are advised that these regulations will be strictly enfor by the Harbour Authority. Any vessels unable to comply with above section in every particular way should contact their Ag in good time before arrival in order to arrange alternative me for embarking the Pilot.
Any delays and/or additional costs incurred by vessels unab comply with the above regulations will be strictly to the ship's a account.
(vi) Adequate lighting shall be provided at night so that the pilot lad overside and also the position where the Pilot boards the s shall be properly illuminated.
(vii) Actual sea conditions for small craft are not always apprecia when viewed from the bridge of a large vessel. Boarding a landing of pilots is a potentially hazardous operation w requires whole-hearted co-operation between those in contr both the tanker and pilot boat. Hard and fast rules cannot be down to fit every set of circumstances but the following point guidance should be noted.
  (a) All vessels being serviced should be at the Pilot Statio the agreed time and not significantly early or late.
  (b) All vessels being serviced should be ready to respond t reasonable requests from the pilot boat to ensure a s transfer. Agreement as to how and where the transfer take place should be reached in ample time and manoeuvre executed where sufficient sea room exists.
  (c) All vessels being serviced should inform the pilot boat of t intention to change their heading and when that chang heading has been completed.

Pilot Hoists: Pilots are not obliged to use pilot hoists. Any use of th devices must only be at the option of the Pilot, and in general, pilot ho are not acceptable for the boarding and landing of Pilots at Sullom V

Any pilot hoist offered must, in any case, comply fully with t recommendations on performance standards for mechanical pilot ho and also with the recommendations of the European Maritime P Association.
Note: Because of the low ambient air temperature combined with st wind conditions, experience has shown that it is not uncommon for hoists driven by compressed air to freeze. Careful attention shoul paid to this equipment during the Winter months.

Pilot Transfer by Helicopter: Sea conditions at the North Entranc Yell Sound can at times prevent the boarding and landing of Pilo boat even though wind speeds may be within operational li Helicopters may be used at the discretion of the Authority to carry Pilot transfer when such conditions exist. Helicopters may also be in cases where a vessel is unable to provide a satisfactory pilot lad accommodation ladder. Factors affecting the use of helicopters for t purposes are set out below.

1. At present an MBB Bolkow 105 helicopter is contracted t Authority on a sole user basis for purposes of Pilot transfer. helicopter may also be available for ad hoc use by applicat the Director of Marine Operations.
2. The first choice helicopter is capable only of landing on ves to be serviced. Winching operations cannot be carried out b aircraft. It is a small twin-engined helicopter of approxim 2 tonnes weight and with a rotor height of 3 m. Experience shown that this helicopter can safely land on 90% of ves calling at Sullom Voe.
   Winch-capable helicopters may be available but will take longer to obtain and delays could result to the requesting ve
3. The permission of the Master and/or Agents as appropriat be obtained prior to any transfer taking place using the Bolkow 105 helicopter.
4. All transfers by helicopter will be carried out strictly in accord with the U.K. CAA Regulations and the Procedures set out "Guide to Helicopter/Ship Operations" published by International Chamber of Shipping (see extracts reprinted b
5. Any helicopter service is available only to crude carriers combination carriers provided with suitable helicopter oper areas. It is not available to LPG carriers.
6. Any helicopter service is available during daylight hours Service by winch – capable aircraft may be available only ordinary airport opening hours which are typically 0730 weekdays and 1045 – 1430 Sundays.
7. No extra charge will accrue to the vessel when pilots are b and landed by the MBB Bolkow 105 helicopter for reas weather and/or adverse sea conditions. The regular and pu boarding and landing fee is applied.
8. When the MBB Bolkow 105 Helicopter is used to service a with defective boarding and landing equipment, a cha £1,500 plus the regular published boarding and landing operation plus re-charges at cost will be applied.
9. Helicopter operations are co-ordinated by Sullom Vo Control. Vessels serviced in this manner should follow instr issued by Sullom Voe Port Control to facilitate such tran
10. Helicopters used at Sullom Voe are operated only by established companies, currently Bond Helicopters L British International Helicopters Ltd., which operate to the standards and are approved by the Harbour Authority to transfers of personnel.

11. Only experienced aircrew are used and Marine Pilots of this Authority are all experienced in this mode of transfer and trained in accordance with Section 8(h) of the ICS Guide to Helicopter/Ship Operations.

12. When continuous service by MBB Bolkow 105 Helicopter is not available, vessels which require helicopter services for reasons of defective pilot boarding equipment must give early and specific advice of this requirement if delays are to be avoided. Helicopters may be obtained on an ad hoc basis for this purpose subject to availability and will generally transfer by winching only. Only helicopter operators approved by the Harbour Authority will be used.

Note: The Sullom Voe Harbour Authority will endeavour to advise a vessel's Agent or Operator when an additional cost is likely to be incurred due to use of a helicopter for pilot transfer(s). However, all Agents and Operators should be aware that notwithstanding the above, the Harbour Authority will, at its sole discretion, secure helicopters for the purpose of pilot transfers when they deem such service is required. The costs of such operations will be charged to the vessel as appropriate.

For convenience of ships Masters the following extracts from the current "Guide to Helicopter/Ship Operations" are reproduced by kind permission of the International Chamber of Shipping:

5.1 Operational Checks

The Officer in charge should check all operational requirements on deck shortly before the arrival of the helicopter. Different types of ships may require specialist checks.

The general requirements for all types of ships are listed below.

5.1.1 Ship Checks

- (a) All loose objects within and adjacent to the operating area must be secured or removed;
- (b) All aerials and standing or running rigging above or in the vicinity of the operational area should be lowered or secured;
- (c) Fire pumps should be running with sufficient water pressure on deck;
- (d) Fire hoses should be ready. (Hoses should be near to but clear of and, if possible, upwind of the operating area pointing away from the helicopter);
- (e) Foam equipment operators (at least 2 wearing the prescribed firemen's outfits) should be standing by, and have foam nozzles pointing away from the helicopter;
- (f) A rescue party should be detailed with at least 2 members wearing firemen's outfits;
- (g) The man overboard rescue boat should be ready for immediate lowering;
- (h) The following items of equipment should be to hand:
  - (i) Portable fire extinguishers.
  - (ii) Large axe.
  - (iii) Crowbar.
  - (iv) Wirecutters.
  - (v) Red emergency signal/torch.
  - (vi) Marshalling batons (at night).
  - (vii) First aid equipment.
- (i) The correct lighting and signals (including special navigation lights) should be switched on prior to night operations;
- (j) The deck party should be ready, and all passengers clear of the operating area;
- (k) Hook handlers should be equipped with electricians' strong rubber gloves and rubber soled shoes to avoid electric shocks from static discharge;
- (l) All the deck crew should be wearing bright coloured life vests and protective helmets securely fastened with a chin strap;
- (m) The Officer of the watch on the bridge should be consulted about the ship's readiness.

5.1.2 Landing On (These checks are additional to those in 5.1.1):

- (a) The deck party should be made aware that a landing is to be made;
- (b) The operating area should be free of heavy spray or seas on deck;
- (c) Awnings, stanchions and derricks and, if necessary, side rails should be lowered or removed.

As outlined under "Pilot Transfer by Helicopter" the Port Authority uses a MBB Bolkow 105 Helicopter for boarding and landing of pilots in certain circumstances.

The primary purpose is to provide a service when sea and swell conditions at the boarding stations are such that boatwork must be suspended, but it is also used when vessels are unable to provide the correct pilot boarding equipment.

This helicopter cannot carry out pilot transfer by winching and must land on the vessel to be serviced. The arrangements approved by the United Kingdom Civil Aviation Authority for the MBB Bolkow 105 to land on vessels are shown in the "Plan Section". However, for a trial period, approval has been given by the CAA which allows the helicopter to land on vessels to be serviced at Sullom Voe without the necessity for the vessel to lower the shipside rails. This temporary approval may not continue in the longer term and owners and managers of vessels trading to Sullom Voe who wish to continue to avail themselves of the service must now consider carrying out the minor structural modifications shown in the "Plan Section".

The modifications required are adaptation of the ship-side rails in way of the landing area to allow these to fold down inboard and remain secured in the folded down position and the application of non-skid paint to the landing circle. Both items are inexpensive and may be carried out without waiting for the next drydock or repair schedule.

Operators of ships trading regularly to Sullom Voe are hereby strongly urged to ensure that their vessels are adapted and equipped to comply with this requirement at the earliest opportunity.

Should further clarification be required this may be obtained by contacting the Port Authority.

APPROACHES: *Routeing and Aerial Surveillance in Shetland Waters.*

Vessel routes in Shetland Waters:

Applicable to all tankers, combination carriers and LPG vessels, loaded or in ballast calling at Sullom Voe.

Shetland Islands Council, conscious of the dangers to navigation around the Shetland coast, due largely to offshore obstructions, strong tides, rapid weather changes and the presence of fishing vessels, vigorously discourages navigation close to the Shetland coastline. The International Maritime Organisation has now ratified this "area of avoidance" as from 16th November 1991, with extended areas as from 28th November 1993 and a new area is established around Fair Isle.

1. Mariners should observe the IMO scheme as detailed on the navigation charts for the Shetland area. Any vessels found within an "Area to be Avoided" will be reported to the flag state in addition to Owners and Charterers.
2. Vessels which use the Pilot Station at the South East entrance to Yell Sound are requested to navigate as follows:
   (a) Vessels approaching the Shetland Islands from the South and making for the Pilot Station at the South East entrance to Yell Sound or wishing to anchor in Colgrave Sound are advised to navigate to a position 20 miles East of Out Skerries, before altering course to the Pilot Station or to Colgrave Sound.
   (b) Vessels approaching from the North and making for the Pilot Station at the South East entrance to Yell Sound or wishing to anchor in Colgrave Sound are advised to navigate to a position 20 miles East of Fetlar, before altering course to the Pilot Station or Colgrave Sound.
3. Where for any reason of safety or emergency, it is not possible to comply with the foregoing, you are required to notify immediately your intentions with reasons, to Sullom Voe Port Control by VHF Channel 16 or via Agents.
4. Charts should not be cleaned off before berthing at Sullom Voe to allow checking by Harbour Authority.
5. In the event of breakdown and your vessel drifts, or is likely to drift, within the Areas to be Avoided/Precautionary Areas, you must contact Sullom Voe Port Control or Shetland Coastguard by VHF Channel 16 at the earliest opportunity.

Areas to be Avoided:

1. Area to be Avoided, North of Shetland:
   Vessels should avoid the area bounded by lines connecting the following positions:
   (1) 60° 39.5' N., 1° 09.3' W.
   (2) 61° 04.3' N., 1° 09.3' W.
   (3) 61° 04.3' N., 0° 29.7' W.
   (4) 60° 38.4' N., 0° 12.2' W.
   (5) 60° 34.2' N., 0° 48.0' W. (Funzie Ness)
   (6) 60° 33.8' N., 0° 53.5' W. (Rams Ness)
   Thence up the Eastern side of Colgrave Sound to
   (7) 60° 35.8' N., 0° 55.4' W.
   (8) 60° 36.8' N., 0° 58.0' W.
   (9) 60° 38.4' N., 0° 58.8' W.
   Thence along the coastline to position (1).
2. Areas to be Avoided, West and South of Shetland:
   Vessels should avoid the area bounded by lines connecting the following positions:
   (10) 60° 02.50' N., 1° 10.20' W. (Heli Ness)
   (11) 59° 59.87' N., 1° 09.37' W. (Perie Bard Lt.)
   (12) 59° 41.0' N., 1° 12.0' W.
   (13) 59° 42.7' N., 1° 26.0' W.
   (14) 60° 02.0' N., 2° 48.0' W.
   (15) 60° 15.0' N., 2° 48.0' W.
   (16) 60° 42.5' N., 2° 09.0' W.
   (17) 60° 42.5' N., 1° 22.0' W.
   (18) 60° 40.0' N., 1° 17.0' W.
   (19) 60° 37.3' N., 1° 17.9' W.
   Thence along the West coastline to position (10).
3. Areas to be Avoided, Fair Isle:
   Vessels should avoid the area contained wihtin a circle of radius 6.5 nautical miles centered 59° 32.0' N., 1° 38.0' W.
4. Precautionary Area, Northern Approaches to Yell Sound:
   Bounded by a line connecting the following positions:
   (20) 61° 04.3' N., 1° 09.3' W.
   (21) 60° 39.5' N., 1° 09.3' W.
   (22) 60° 40.0' N., 1° 17.0' W.
   (23) 60° 42.5' N., 1° 22.0' W.
   (24) 60° 42.5' N., 2° 09.0' W.
5. Precautionary Area, Southern Approaches to Yell Sound:
   Bounded by a line connecting the following positions:
   (25) 60° 27.4' N., 1° 02.4' W.
   (26) 60° 24.0' N., 0° 02.5' W.
   (27) 60° 38.4' N., 0° 12.2' W.
   (28) 60° 34.2' N., 0° 48.0' W.
   (29) 60° 33.8' N., 0° 53.5' W.
   Thence up the Eastern side of Colgrave Sound to
   (30) 60° 35.8' N., 0° 55.4' W.
   (31) 60° 36.8' N., 0° 58.0' W.
6. Precautionary Area, Approaches to Lerwick:
   Bounded by a line connecting the following positions:
   (25) 60° 27.4' N., 1° 02.4' W.
   (26) 60° 24.0' N., 0° 02.5' W.
   (12) 59° 41.0' N., 1° 12.0' W.
   (11) 59° 59.87' N., 1° 09.37' W. (Perie Bard)
   IMPORTANT: By local agreement with the oil industry at Sullom Voe, all vessels loaded or in ballast should abide by the above Areas to be Avoided and Precautionary Areas.

ANCHORAGES: There are no suitable anchorages available for large tankers in the Port of Sullom Voe.

However, certain vessels may be anchored in the harbour at the discretion of the Harbour Master.

Vessels are permitted to anchor in Colgrave Sound (Lat. 60° 35' N., Long. 00° 57' W. approx.) when circumstances dictate that this is appropriate. In doing so, Masters should make reference to charts B.A. 3282 and 3292, the North of Scotland Pilot – NP. 52, page 99 and "Routeing and Aerial Surveillance in Shetland Waters", see "Approaches".

In addition, the following guidance to the usage of Colgrave Sound is relevant and all vessels intending to anchor there should comply with the advice given herein.

1. Colgrave Sound is used extensively by fishing craft throughout the year and Masters of other vessels are requested and required to give such fishing vessels a wide berth.
2. Three designated anchorages in Colgrave Sound have been identified as being suitable for large vessels and clear of established fishing grounds. These anchorages should be used in preference to any other area of Colgrave Sound. (See "Plan").
3. Colgrave Sound is outside the Sullom Voe Harbour Area and also outside the extended area of coverage of the Harbour surveillance radar. It is however observed several times each day by the surveillance aircraft. Therefore any information given by Sullom Voe Port Control to vessels proposing to anchor in Colgrave Sound is given in good faith and on the understanding that neither the Harbour Authority nor its servants will accept liability for the consequences of any vessel dragging anchor, colliding with any other vessel, stranding, causing pollution, or any other occurrence occasioned by or to the vessel concerned whilst navigating or at anchor within Colgrave Sound and its approaches.
4. Sullom Voe Harbour Authority will, however, give every assistance to any vessel seeking information about the Colgrave Sound area with the objective of establishing orderly navigational disciplines in the area for the benefit of all users.
5. To this end any vessel (including oil rigs, oil exploration vessels, barges and supply craft) wishing to anchor in Colgrave Sound is requested, in the first instance, to contact Sullom Voe Port Control. The vessel will then be advised which designated anchorage is believed to be unoccupied and which may therefore be used by the vessel.
6. The designated anchorages are identified by the numbers 1, 2 and 3 (See "Plan") and also by bearing and distance of the White Hill Lighthouse (Lat. 60° 34.9' N., Long. 01° 00.1' W.) as follows:
   Anchorage 1: White Hill Lighthouse bearing 238°T×1.50 miles.
   Anchorage 2: White Hill Lighthouse bearing 253°T×0.95 miles.
   Anchorage 3: White Hill Lighthouse bearing 260°T×1.68 miles.
7. Masters of vessels making use of any of the designated anchorages are requested to provide Sullom Voe Port Control with details of their anchorage position when brought up.
8. Masters of vessels approaching or at anchor within Colgrave Sound are requested to strictly observe the regulations prohibiting the dumping of industrial debris, offensive and noxious substances and oil pollution.

Masters should beware of 2 submarine oil pipelines on the East Side of Shetland shown on the latest charts and referred to in "North Coast of Scotland Pilot", pages 94 and 95.

Except when advised otherwise, Masters should proceed to a point 10 miles off Gruney Island (Lat. 60° 39' 00" N., Long. 01° 18' 00" W.). Thereafter, Masters should follow directions in "North Coast of Scotland Pilot", page 54, noting, however, that there are areas of poor VHF communication with Sullom Voe Harbour Radio to the West and North of Yell Sound.

RESTRICTIONS: *Vessels with large Windage Areas:* Vessels of more than 6,400 sq.m. windage will be subject to a 20 knot wind restriction on berthing. Windage should be calculated as LOA times mean freeboard.

MAX. SIZE: See "Berthing", "Loading/Discharging Facilities" and "Liquefied Petroleum Gas Facilities".

HEALTH: The following Port Health procedure applies at the Sullom Voe Terminal.

The Master has no need to obtain health clearance unless:

(i) An authorised officer otherwise directs.
(ii) A death or illness has occurred as defined in the Public Health (Ships) (Scotland) Regulations.
(iii) An abnormal mortality among rats or mice on board has occurred.

Where it is necessary to obtain "Free Pratique" for health purposes, the Master should provide the following documents:

(i) Maritime Declaration of Health.
(ii) A list of passengers and crew leaving the ship, together with the addresses they are going to in the United Kingdom.

Derat Exemption Certificates: The Sullom Voe Terminal is an "approved" Port, and Derat Exemption Certificates will be issued by the Director of Environmental Health and Trading Standards of the Shetland Islands Council. Also see "Health – All Ports" before first U.K. port.

RADIO: *ETA Requirements:* Vessels bound for Sullom Voe are required to provide the Harbour Authority with the following information.

(i) An estimated time of arrival at least 24 hours prior to arrival or on leaving the last port (whichever is later). In addition to this ETA, Masters are to include the estimated time of crossing Lat. 58° 20' N. and estimated longitude on crossing that latitude, and the intended inward courses and turnpoints from that position to the Pilot Station. Vessels arriving from the North Atlantic or Northern North Sea should use a position 200 miles from the Pilot Station.
(ii) Confirm the vessel's ETA at least 6 hours before arrival at the seaward limit of the Harbour Area and thereafter notify any significant change in excess of 1 hour.
(iii) On coming within range of "Sullom Voe Harbour Radio", the ETA to be given by VHF (Channel 16 or Channel 14).

Pre-Arrival Information: 24 hours prior to arrival, all vessels call Sullom Voe should cable "Portcontrol Sullomvoe" the foll information (metric units to be used where appropriate):

(i) Ship's name and call sign.
(ii) Port of Registry.
(iii) Name of Master.
(iv) G.R.T.
(v) Summer deadweight (metric tonnes).
(vi) Length overall and beam (metres).
(vii) Draft fore and aft.
(viii) Bunkers/Fresh Water/Stores quantity on board.
(ix) Whether loaded or in ballast. If loaded, nature and quant cargo.
(x) Whether vessel is carrying segregated ballast.
(xi) If so, quantity and at which port taken onboard.
(xii) Dirty ballast quantity (tonnes).
(xiii) Berthing deadweight as a percentage of the Summer d (minimum acceptable 35%).
(xiv) Which Pilot Station on arrival.
(xv) Pilot boarding arrangements.
(xvi) Number of crew.
(xvii) Last Port of call.
(xviii) Does ship have a fully operational inert gas system and a cargo/deep tanks inerted to a maximum of 8% oxygen co (2% for LPG carriers)?
(xix) Berthing displacement (tonnes).
(xx) P & I Club name.
(xxi) Previous cargo type.
(xxii) Confirm cargo tank gases have less than 100 p.p.m. H_2S.
(xxiii) Is all navigation, safety, anchoring and mooring equipment operational and ready for use? If not, specify. All anchors t cleared away on arrival at the Pilot Station.
(xxiv) Confirmation to be given that vessels are complying in all resp with "The Merchant Shipping (Tankers) (EEC Requirem Regulations 1981".
(xxv) Confirm that engines will be tested to come astern before boards.
(xxvi) Vessel's Inmarsat and Telex numbers.

NOTE: All segregated ballast tanks are sampled and analysed b permission is given to discharge into the harbour.

VHF: *VHF Radio Communications:*

1. Sullom Voe Harbour Radio maintains a continuous listening w on the following VHF Channels: 16, 9, 10, 12, 14 and 20. Ve should, where possible, only use Channel 16 for initial calling refrain from using Channel 10, which is designated for emerg purposes and Channel 9 which is the primary pilotage/tug wo channel.
2. ALL vessels entering or leaving the Sullom Voe Harbour Are requested to contact "Sullom Voe Harbour Radio" initially on Channel 16, or Channel 14. This includes all vessels in t through Yell Sound.
3. Any vessel intending to use the deep water channels mark the leading lights of Gluss Isle, the white sector of Queyfirth the white sector of Skaw Taing Light, the Fugla Ness leading or the Sella Ness leading light, for the purpose of fishing must such intentions to "Sullom Voe Harbour Radio" and rep intervals not exceeding 2 hours while fishing.
4. Any vessel may receive traffic information on request by cont "Sullom Voe Harbour Radio" on Channel 16 or Channel 14.
5. Brief local weather forecasts will be broadcast on request "Sullom Voe Harbour Radio" on Channel 16 or Channel 14.

Misuse of VHF Radio:

Owners, Masters and Skippers are reminded to read Me Shipping Notice No. M1026, which refers to the misuse of VHF in

The improper use of VHF is illegal and can cause serious distur to communications concerned with the movement of shipping in tho area.

The co-operation of all port users is requested to ensure that misuse does not occur.

Port Operation and Control Services: All shipping movements wi Harbour Area are monitored from a Port Control Room in the Administration Building at Sella Ness.

The Port Control Room is manned on a 24 hour basis by Officers who are licensed Pilots.

These Marine Officers, in their capacity as Port Controllers, m a continuous VHF and radar watch. They provide advice to Maste Pilots on all navigational aspects (including weather forecasts) wi area, direct shipping movements within the port, and liaise w Terminal Operator and emergency services.

The following VHF Channels are continuously monitored in th Control Room:

Channel 16	Calling, Safety and Distress.
Channel 9	Tanker pilotage and tug handling.
Channel 10	Port emergency, fire or oil pollution.
Channel 12	Secondary Port Control working frequency.
Channel 14	Main Port Control working frequency.
Channel 20	Secondary Port Control working frequency.

The call sign for Sullom Voe Pilots is "Sullom Voe Harbour R

In addition, Sullom Voe Terminal monitors Channels 16 and arrival information will be given on Channel 19. Initial contact sh made on Channel 16 using call sign "Sullom Voe Terminal".

It is emphasised that Masters should try to contact the Ter soon as possible prior to arrival at the Pilot Boarding Area, so tha information may be exchanged before commencing the inward p through Yell Sound.

Channel 24 – Link calls for commercial radio traffic can be a on this channel. Call-sign "Collafirth Radio".

Control of Traffic: The Port Controller may direct the moveme vessel within the Harbour Area. Overtaking and passing is pro the Deep Water Channel within an area bounded by a lin

Queyfirth Light and the Northern extremity of Lamba Island and a line joining Skaw Tang Light and the front leading light on Gluss Isle.

No vessel having an overall length in excess of 50 m. shall navigate so as to pass or overtake an LPG carrier underway anywhere within Yell Sound or Sullom Voe between lines drawn between the Northern extremity of Muckle Holm (Lat. 60° 35.1' N., Long. 01° 15.8' W. approximately) and the Northern extremity of the North Holm of Burravoe (Lat. 60° 35.4' N., Long. 01° 18.2' W. approximately) and between the Northern extremity of Lunna Holm (Lat. 60° 27.5' N., Long. 01° 02.4' W. approximately) and the Southern extremity of Heoga Ness (Lat. 60° 29.4' N., Long. 01° 02.4' W. approximately).

Reporting Positions: During transits of Yell Sound and approaches to Sullom Voe, all vessels are required to report to Port Control when passing the following positions:

A. Lat. 60° 38.25' N., Long. 01° 14.82' W. with Point of Fethaland Lighthouse bearing 260° T×1.8 miles.
B. Lat. 60° 34.95' N., Long. 01° 16.56' W. with Muckle Holm Lighthouse bearing 105°T×0.35 miles.
C. Lat. 60° 31.35' N., Long. 01° 18.49' W. with Queyfirth Lighthouse bearing 285°T×0.49 miles.
D. Lat. 60° 29.32' N., Long. 01° 17.47' W. with Skaw Taing Lighthouse bearing 118°T×0.41 miles.
X. Lat. 60° 28.50' N., Long. 01° 10.70' W. with Mossbank Lighthouse bearing 175°T×1.25 miles.

RADAR: Full radar coverage exists for Yell Sound and Sullom Voe. Comprehensive coverage includes the 'funnel' of approach to the Northern Pilot Boarding Station and also the S.E. entrance channels and the associated seaward approaches.

The main scanner is located on the Hill of Vats Houlland (Lat. 60° 27.96' N., Long. 01° 17.49' W. and the secondary scanner, which provides coverage of the S.E. entrance and Western approach channels, is located near Brough (Lat. 60° 28.90' N., Long. 01° 13.04' W.). Both scanners are connected by microwave links to displays in the Port Control Room.

Port Control maintains a continuous radar watch, and the passage of each vessel is monitored and recorded. Advice is available to vessels on request.

TUGS: At present a fleet of harbour tugs provide a towing service for vessels at the Port of Sullom Voe. These are stationed at the Sella Ness Jetty adjacent to the Port Administration Building.

The fleet is operated by Shetland Towage Ltd., a private company owned and operated by a joint venture between Shetland Islands Council, Clyde Shipping Company and Cory Ship Towage.

The fleet consists of 3 twin screw 3,800 h.p. vessels, each having a bollard pull of 55 tons. These vessels are fully equipped as fire-fighting tugs and pollution control vessels and were built by Hall Russell and Company Ltd., in Aberdeen, in 1978. Named after Shetland birds, they are:

"Stanechakker", "Swaabie", "Lyrie"

Two additions to the fleet are Voith water tractors, built in 1983 by Ferguson Ailsa Ltd., at Port Glasgow. These vessels have twin 32G Voith units developing 4,000 b.h.p. and a bollard pull of 45 tons. Also given bird names, they are:

"Tirrick", "Shalder"

The use of tugs and their numbers will be as directed by the Harbour Master. Prior to arrival, vessels should ensure that heaving lines of adequate length and breaking strain are readily available to assist in securing the tugs.

Tugs will normally meet incoming vessels at a position close South of Outer Skerry. Officers and crew should be standing by to receive lines and all necessary tugs must be secured before the vessel's ability to manoeuvre becomes restricted.

When a vessel is berthing, tugs will be secured to the bow and stern of the vessel with towing lines and alongside in a push pull mode. Their mode of operation and disposition will be fully explained by the Pilot on arrival. Tug lines will normally be used throughout, either from towing hook or towing winch.

It is requested that wherever possible tug orders for movements before 0900 hrs. be placed before 1700 hrs. on the preceding day.

BERTHING: The following criteria apply to conventional vessels loading at crude and gas jetties at Sullom Voe.

The minimum under-keel clearance permitted is 1 m. alongside jetties and 2 m. elsewhere in the Harbour Area.

Oil tankers/combination carriers in the range of 18,000 tons deadweight to 350,000 tons deadweight may be accepted at Sullom Voe, as a matter of routine.

Vessels outside the parameters listed below and vessels of unconventional design may be accepted at Sullom Voe subject to individual consideration by the Harbour Master and Terminal Operator.

Limiting Vessel Sizes:

Jetty No. 1:	**Crude Oil Carriers**
LOA	170 m. to 280 m.
Depth alongside	16.9 m.(minimum)
Max. allowed draft	15.9 m.
	LPG Carriers
LOA	140 m. to 260 m.
Capacity	10,000 cu.m. to 75,000 cu.m.
Jetty No. 2:	**Crude Oil Carriers**
LOA	210 m. to 365 m.
Depth alongside	23.1 m. (minimum)
Max. allowed draft	22.1 m.
Jetty No. 3:	**Crude Oil Carriers**

(Jetty No. 3 was taken out of service in September 1989)

Jetty No. 4:	**Crude Oil Carriers**
LOA	210 m. to 365 m.
Depth alongside	23.6 m. (minimum)
Max. allowed draft	22.6 m.

Note: (i) Vessels entering in ballast or partially loaded conditions should ensure that their draft does not exceed 13 m. as this is the draft normally allowed in the South Turning Area.

(ii) In all cases where the arrival draft is likely to exceed 13 m., prior permission from the Harbour Master shall be obtained before the vessel is fixed to load at Sullom Voe.

Loading Systems:

All crude loading arms are 150 ASA 16 in. hydraulic connections. This includes Jetty No. 1 where 16 in. connections are attached to 12 in. arms. All LPG loading arms have 150 ASA Camlock connections.

No. 1	Crude	4×12 in.	Loading arms	hydraulic connections.
	LPG	2×12 in. 1× 8 in.	Loading arms	hydraulic connections.
No. 2	Crude	4×16 in.	Loading arms	hydraulic connections.
No. 4	Crude	4×16 in.	Loading arms	hydraulic connections.

Manifold Heights:

	Heights above chart datum *Max.*	*Min.*
No. 1 Crude	22.70 m.	1.80 m.
LPG	21.50 m.	3.50 m.
No. 2 Crude	31.30 m.	2.60 m.
No. 4 Crude	31.30 m.	4.23 m.

Maximum allowable pressure on lines and connections: 150 p.s.i.

Jetty Orientation:

No. 1	280°/100°
No. 2	135°/315°
No. 4	145°/325°

Gangway: Shore tower type gangways are provided at all times. If for any reason, a shore gangway will not be available, ships will be advised in good time, and will themselves be required to provide ship/shore access.

MOORING: The 3 loading jetties (and No. 3 Jetty which is now retired) are located in deep water on the Northern shores of Sullom Voe, adjacent to the Terminal complex at Calback Ness.

The berths are numbered 1 to 4 in sequence from East to West. Jetty No. 1 has facilities for both crude and LPG carriers and can accommodate vessels up to 120,000 d.w.t. Jetties No. 2 and 4 have crude loading facilities only and are designed to accommodate tankers up to 350,000 d.w.t. range. (Larger tankers may be accepted at the discretion of the Harbour Master and Terminal Operator). Jetty No. 3 was taken out of service in September 1989.

Each jetty is of conventional "T" shaped construction with 4 breasting dolphins in line with the jetty head. The mooring dolphins are offset from the line of breasting dolphins to provide an optimum lead for mooring lines. Vessels may land at a maximum angle of 8° to the jetty face. Quick release mooring hooks are fitted on all dolphins. For use with large vessels, quick release mooring pulleys have been fitted on Berths No. 2 and 4. These pulleys, one at each end of the berth are designed to accept a ship's mooring wire in the form of a bight.

Large flexible rubber fenders are fitted to the outer faces of each breasting dolphin. Each has a generous energy absorbing capacity.

Each mooring operation will be assisted by a purpose-built mooring boat.

ACTIONS TO BE TAKEN IN SEVERE WEATHER CONDITIONS

1. At least 1 tug shall be called out by the ship's Master to assist in keeping *any* vessel alongside when all the following conditions exist:
   (a) Where the mean freeboard height of the vessel exceeds the mean draft,
   (b) When the wind is of sufficient speed for loading to be suspended.
   (c) When the wind is from a direction within an arc extending from 10° seaward of the berthing line through North to 10° seaward of the berthing line.
2. At the time of suspending loading/deballasting operations because of deteriorating weather conditions, the Terminal Loading Supervisor will advise Port Control immediately of any vessels in the condition stated in 1(a) above.
3. When a tug is called out under the conditions stipulated in (1) above:
   (a) The Terminal Loading Supervisor will notify the Master of the situation and request that the vessel be brought to a state of immediate readiness.
   (b) With the exception of the Port Controller, such Pilots as are available will station themselves aboard those vessels which are considered to be most vulnerable, and any vessel with a tug alongside must be attended by a Pilot throughout the period a tug is required.
   (c) The Duty Harbour Master will be notified by the Port Controller.
4. Tugs may be necessary to assist in keeping vessels alongside when some of the conditions in (1) above are absent, and may or may not be called for by the vessel. In such circumstances any vessel requiring tug assistance will also be attended by a Pilot who will board the vessel as soon as possible and remain on board throughout the whole period a tug is in attendance. In these circumstances the Duty Harbour Master will be informed by the Port Controller.
5. Notwithstanding anything contained in 1 – 4, the Duty Port Controller may, *before consultation with the Harbour Master,* call out such tugs as are required, at any time, if he feels the situation warrants this action. In the case of large vessels in light condition for example, it may be prudent in certain circumstances to call out the tugs when the wind off the berth is less than that stated in paragraph 1(b) above. In such cases the Duty Port Controller should exercise his discretion.
6. In all situations where tugs are required to assist a vessel moored alongside, a Pilot will also be stationed on board that vessel as soon as possible after tugs are called out, and will remain on board throughout the whole period the tugs are in use.

General Mooring Requirements:

1. Masters should ensure that mooring lines are in good condition. Winch brakes or securing devices should be in efficient operating order and should have a holding power of at least 60% of the breaking load of the vessel's mooring lines. (On vessels constructed before 1978 these conditions may be met by placing the winch in gear and applying power in addition to applying the brake).

2. Any known defects in the vessel's mooring system or limitation of mooring winch brakes should be reported to the Pilot and the Terminal before arrival in order that, if necessary, additional precautions may be agreed.
3. In order to avoid damage to loading arms and the serious consequences of oil pollution, the vessel should be kept close alongside at all times.
4. It is recommended that wires (or wires fitted with synthetic fibre rope tails of at least 25% greater breaking load than the wire), should be used for all mooring lines.
5. The following mooring requirements shall apply to all crude and gas tankers in excess of 10,000 tons gross and in general all mooring operations shall be conducted in accordance with the OCIMF "Guidelines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands".
    - 5.1 Where a crude or gas tanker has undergone a mooring audit on a previous visit to Sullom Voe, the ship must be moored exactly in accordance with the mooring plan. If for any reason this is not possible the ship should be secured in compliance with Section 5.2, 5.3 or 5.4 as appropriate and the details reported to the Port Controller for the attention of the Director of Marine Operations. Audited mooring plans shall not be altered, amended or edited without the approval of the Director of Marine Operations.
    - 5.2 Where a crude or gas tanker is equipped with synthetic mooring lines or a random mixture of synthetic and wire mooring lines, the ship shall be secured by a minimum of 4 head lines/stern lines, 4 breast lines and 2 springs at each end of the ship.
    - 5.3 Where a crude or gas tanker is equipped with wire mooring lines only, the ship shall be secured in accordance with the appropriate mooring guide plan (See Plan).
    - 5.4 Where a crude or gas tanker has not undergone a mooring audit and is not designed or equipped to comply with the requirements outlined in Section 5.2 and 5.3 it shall be secured as near to these requirements as possible and in any case to the satisfaction of the Master, the Pilot and the Loading Supervisor. If such ships cannot be secured satisfactorily, the loading arms must not be connected and the duty Harbour Master shall be contacted immediately.
    - 5.5 Mooring lines leading in the same directon of restraint shall be of similar material and construction throughout their lengths from jetty mooring point(s) to vessel's securing point(s).
6. Particular care should be taken to ensure sufficient transverse restraint from breast moorings. When synthetic fibre mooring lines are used, pre-tensioning of these lines on making fast will help prevent drift of the vessel away from the berth in "off the berth" wind conditions.
7. As soon as the vessel is secured, brakes on all mooring winches should be firmly applied. Winches must not be left on automatic tensioning. Full steam pressure or power to all mooring winches should be maintained at all times when alongside. On split drum mooring winches only one layer of rope shall be permitted on the working half of the drum. *Notwithstanding any of the foregoing it is the Master's responsibility to ensure that his vessel remains securely moored at all times.*
8. An efficient watch must be maintained on the vessel's moorings at all times to ensure that all lines are properly tensioned and tended when required. The deck watch should make regular checks that mooring winch brakes are applied at the correct setting.

NOTE: A Master advised (December 1992) that rope tails on wires should be about 9.0 m. in length.

LOADING: *Maximum Loading Rate per Arm:*

Crude:		
Jetty 1	12 in. loading arm	2,500 metric t.p.h.
Jetty 2	16 in. loading arm	5,000 metric t.p.h.
Jetty 4	16 in. loading arm	4,100 metric t.p.h.
LPG:		
Jetty 1	8 in. loading arm	900 cu.m./hr.
Jetty 1	12 in. loading arm	2,100 cu.m./hr.

Connection of Loading Arms: Confirmation to be given that vessels will arrive with the required spool pieces fitted to their manifold for either crude or LPG fitting.

Manifolds should comply with latest OCIMF Standards. As a minimum there must be 500 mm. between faces of spool/reducer presented for connection. Reducers must be equally tapered.

Failure to present correct reducer/spool will result in delays. The Terminal does not have reducers, but does have 16 in. to 16 in. spool pieces. Should it be necessary to use the Terminal's spools a charge will be levied.

CRUDE The connection of loading arms will be undertaken by shore personnel. Vessels should arrive with 16 in. 150 ASA manifolds, ready for connecting to the loading arms.

LPG The connection of loading arms will be undertaken by shore personnel. Vessels must have 150 ASA manifolds for connection to the loading arms. Sizes will either be 12 in. or 8 in. as directed by the Terminal.

Ships manifolds should be presented as Class 150 ASA using ship's reducers.

Failure to present correct reducer/spool will result in Terminal levying a charge for their own equipment, if available.

Masters should ensure that the deck firemain is pressurised at all times and fire extinguishers and fire hoses are ready for use at the ship's manifold in accordance with Jetty Regulations.

Crude Oil Storage: 16 conventional floating roof storage tanks constructed, each with a capacity of 600,000 bbls. These provide sto facilities in the event of berthing delays and ensure sufficient stoc enable tankers to load without delay.

The storage tanks have been constructed with bases as muc 30 m. above sea level, to allow gravity loading. However 6 oil loa pumps are installed to increase the loading rate as may be require the vessel.

Loading Rates: Maximum loading rates of 10,000 tonnes/hr. at Jet 17,500 tonnes/hr. at Jetty 2; 16,400 tonnes/hr. at Jetty 4 can be prov at the terminal.

The LPG loading system delivers up to 3,000 cu.m./hr.

Cargo Measurement: Meters are installed for cargo measurem Bill of Lading quantities are calculated from meter readings.

LIQUEFIED PETROLEUM GAS FACILITIES: There is a single insulated pipeline from the LPG storage area to Jetty No. 1 for ta loading. The LPG tankers using Jetty No. 1 range in size from 10 to 75,000 cu.m. capacity and they transport butane and propane u refrigerated conditions as in the onshore tankage.

Navigation, Mooring, Berthing: Except by permission obtained from Harbour Master, no LPG ship shall at any time be navigated in, l or be moored in any part of the harbour.

No LPG ship shall be anchored or moored except

(a) at a quay duly approved by the Harbour Authority
or

(b) in such position as the Harbour Master shall from time to direct

and no LPG ship shall be removed from such last mentioned pos except in accordance with the order or permission of the Harbour Ma or for the purpose of leaving the harbour forthwith.

An LPG ship shall at all times lie safely afloat.

While an LPG ship is at a quay

(a) it shall be securely made fast as close alongside as pos in a manner approved by the Harbour Master.

(b) its moorings shall be adjusted from time to time to allo the rise and fall of the tide and for the loading and discha of cargo.

Except in accordance with such conditions as may from time to be prescribed by the Harbour Master, no ship or harbour craft when moored, unmoored or anchored, lie or pass within 30 m. o LPG ship which is moored or anchored, without permission o Harbour Master.

Loading and Discharging: All jetty LPG drains and ships' scu whereby LPG can, in case of spillage, escape to the Harbour sh open before loading or discharging commences and shall be kept during the whole period of such operations.

All vessels calling at Sullom Voe Terminal must be in possess a Certificate of Fitness under the terms of the IMO code fo construction and equipment of ships carrying liquefied gases in and be in possession of an appropriate Classification Soc Certificate.

Also see "Report" dated October 1983.

DRY CARGO FACILITIES:

Construction Jetty: A concrete pier suitable for coastal traffic is lo in Garths Voe, East of Jetty No. 1.

This pier, orientated on a 108°/288° axis is 100 m. long and can a ships on both the North and South faces.

The North Berth is equipped with a fixed Ro/Ro ramp which width of 10.7 m., a total length of 23.7 m. and a fixed gradient o The height of the sill is 1.67 m. above MHWS.

The pier is well fendered with patent fenders and tyres. The d at the pier range from 9.9 m. at the Eastern extremity, rising to at the Ro/Ro ramp.

Bunkers can be supplied by road tankers to vessels using this

There is no permanent dock labour force available on site at S Voe. However, stevedoring services can be obtained as and required from Lerwick, arrangements for which should be made th the local ships' Agents or receivers of cargo, as appropriate.

Garths Pier: This 2 finger jetty is situated adjacent to Sella Ness Ind Estate.

The inside berths have a length of 41 m. and the outside berth a of 65 m. Each finger is 7.3 m. wide. There is a depth of 4 m. alo for the lengths stated; thereafter the depth decreases rapidly.

Graven Pier: A small concrete fishing pier is situated on the So shore of Garths Voe. The pier has been designated as an structure and must not be used. Vessels previously using Grav should now use Garths Pier.

Tug Jetty: Harbour tugs and pilot boats are stationed at an "L" s jetty located on the Southern shore of Garths Voe adjacent to Sell This jetty, of cellular design is constructed of concrete and stee

Fendering arrangements consist of used tyres suspended at i along the jetty face. This pier is suitable for coastal traffic but is n as such on a regular basis.

The present minimum depth off the main face of the approximately 6.9 m.

Limited supplies of gas oil are available from a bunkering poi jetty. Further supplies are available by road tanker.

Gaza Jetty: (Lat. 60° 26' 10" N., Long. 01° 21' 02" W.).

A small jetty has been constructed at Gaza near Sullom for the of exporting aggregates from nearby quarries. The jetty face is on the N.E. side of the seaward extremity of a rock armoured ca The jetty face is 30 m. in length and is well fendered. The orie on a 111°/291° axis. The depths alongside the pier range fro to 3.7 m. below chart datum at the landward extremity.

An anchor with cable and clump weight has been laid S.W. o head. A wire is attached to the cable for the purpose of atta vessel's mooring lines.

At the Harbour Master's discretion vessels up to 75 m. in le use the jetty.

Colla Firth Pier: (Lat. 60° 32' 24" N., Long. 01° 20' 47" W.).

A small jetty has been constructed in the North West corner of Colla Firth which is located on the West side of Yell Sound. The pier is utilised by both fishing and commercial vessels and is licensed to handle explosives.

The main berthing face is 55 m. in length and has an orientation of 100°/280° and a minimum depth of 6 m. Berthing for smaller vessels is also available on the Northern side of this pier.

OIL POLLUTION SURVEILLANCE: Only clean ballast contained in tanks completely segregated from main cargo tanks will be allowed to be discharged into the Harbour, but then only after testing by the Terminal Operator and approval by the Port Authority.

Recent pollution of beaches and serious damage to wildlife around the shores of Orkney and Shetland suggests that certain vessels have disregarded the IMO Conventions on Oil Pollution and discharged dirty ballast whilst approaching or immediately after sailing from Sullom Voe.

Such procedures cannot be condoned by the U.K. Department of Transport, Local Authorities or the Terminal Operator, and with the object of preventing this practice (which is contrary to internationally agreed rules) air surveillance of all shipping in waters around Orkney and Shetland has been introduced.

As detailed in the section entitled "ETA Requirements" (See "Radio"), Masters are requested to advise Sullom Voe Port Control (Telex: Sulvoe 75142. Telegraphic Address: Portcontrol Sullomvoe) of their ETA 24 hours in advance of arrival. In addition, this message is to include the estimated time of crossing Lat. 58° 20' N., Longitude on crossing this Latitude, and the intended inward courses and turnpoints to the Gruney Island Pilot Station (Lat. 60° 38.6' N., Long. 01° 15.3' W.). Vessels arriving from the North Atlantic or Northern North Sea should use a position 200 miles from the Pilot Station.

Prior to sailing from Sullom Voe, all vessels are requested by the Harbour Authority to indicate intended outward bound courses and turnpoints until South of Lat. 58° 20' N. or 200 miles from the Pilot Station as appropriate. This should be detailed on the Tanker Safety Check List provided by your Agent.

Any vessel sighted discharging dirty ballast will be immediately reported to the U.K. Government Authorities for appropriate action to be taken. In such circumstances, vessels may be liable to extensive delay until investigations have been completed.

Prevention of Oil Pollution: Prior to arrival, vessels must ensure that all crew members are conversant with the anti-pollution regulations, which must be complied with at all times.

Principal causes of pollution are leaking ship side valves, cargo/bunker overflows and pumping engine room bilges. Therefore it is recommended that sea valves, overboard discharges (which should be shut) and ballast/cargo/bunker/bilge operations are checked by the Chief Officer and the Chief Engineer before arrival. Scuppers must be plugged on main and poop decks in respect of vessels loading/discharging bulk oil.

On arrival the terminal will give all assistance necessary but are empowered to take action in the event of contravention of pollution prevention requirements.

Masters must advise if their vessel has sustained any damage which could cause oil pollution and confirm any known oil losses from hull or sea valves.

Vessels are required to arrive at the Sullom Voe Terminal with a total deadweight of not less than 35% of Summer d.w.t including bunkers, fresh water and stores.

Vessels should confirm in advance the amount of ballast, including the quantities of segregated ballast, and cargo tank ballast, separately. (See "Radio" – Pre-arrival information).

BALLAST:

Ballast Requirements: For the purpose of manoeuvring, all vessels are required to maintain a reasonable ballasted condition, subject to the requirements specified in the section dealing with Oil Pollution Surveillance.

Vessels should carry sufficient ballast so that the propeller remains immersed whilst maintaining a reasonable stern trim.

Masters are advised that the Port Authority requires, unless otherwise directed by the Harbour Master, that the propeller of any ship to be immersed at all times when vessels are alongside. When operations permit, the proportion of cargo loaded to ballast remaining onboard must be such as to ensure that the vessel can be safely manoeuvred at any time whilst in the harbour. It must be understood that shifts of wind and changes of wind force in Sullom Voe are at times violent and the adoption of an adverse trim in relation to the ship's optimum manoeuvring characteristics will not be accepted.

Ballast Reception Facilities: It is prohibited to discharge any ballast other than segregated clean ballast into the waters of Sullom Voe.

All dirty ballast or non-segregated ballast will be discharged ashore for treatment.

Non-segregated ballast includes ballast contained in any tank designed for or capable of being used for the carriage of crude oil. Tanks having a permanent connection to the cargo piping system are not considered to be segregated ballast tanks.

The Terminal can accept dirty ballast whilst providing the vessel with cargo. Ballast will initially be pumped into settling tanks where excess oil will be skimmed off into recovered-oil tanks. The remaining ballast will undergo further treatment before being discharged into Yell Sound. The ballast water will be monitored throughout the cleaning process.

The Terminal is unable to accept tank washings or slops from a cargo which has been heated or where the pour point is such that heating is required.

Inert Gas: A random check of the quality of the inert gas in several of the vessels' tanks will be made on arrival alongside to ensure the vessel complies with the statutory requirements regarding inert gas. If any of the tanks are found to have an oxygen content in excess of 8% the vessel will be required to vacate the berth and return to sea to complete inerting.

Purging of tanks whilst alongside is not permitted.

Vessels must arrive at the berth with positive I.G. pressure.

Discharge of Dirty Ballast Water: The discharge of ballast water from oil cargo tanks or non-segregated ballast tanks or any ballast water containing quantities of oil or high levels of mineral or chemical pollutant, into the waters of the harbour is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the harbour will be permitted provided that:

1. The Master of the vessel advises the Harbour Authority prior to arrival:
   (a) The place at which the ballast was taken.
   (b) The quantity of the ballast.
   (c) That to his knowledge the ballast is free from oil contamination.
2. Samples have been taken and analysed by the Terminal Operator. Hydrocarbon level to be 5 p.p.m. or less.

The Oil Pollution Control Officer of the Harbour Authority will on occasions board vessels carrying segregated ballast to obtain samples. Analysis will be made of these samples to ascertain the quantity of hydrocarbon, colliforms and heavy metal pollutants within the ballast. The Harbour Authority may, as a result of information so obtained, refuse permission for the discharge of segregated ballast water taken on board in certain locations.

The discharge of segregated ballast is not to commence before permission has been received from the Loading Supervisor. He will have confirmed with the laboratory that the hydrocarbon level is 5 p.p.m. or less.

MASTERS ARE STRONGLY ADVISED TO CLOSELY MONITOR THE DISCHARGE OF SEGREGATED BALLAST AT REGULAR INTERVALS TO ENSURE THAT OIL IS NOT ENTRAINED IN THE BALLAST WATER.

CONSULS: In Lerwick.

MEDICAL: Medical attention for ship's crews is available on request through Agents. Some specialist services including inoculation and vaccination are available.

FRESH WATER: Potable water can be supplied to tankers at Sullom Voe in an emergency. A small charge is levied for the use of the facility.

Vessels requiring fresh water should inform their Agents prior to arrival.

FUEL: There are no bunkering facilities available for tankers calling at the Port of Sullom Voe.

REPAIRS: Engineering facilities are available to carry out repairs afloat to hull and machinery. Drydock facilities do not exist for vessels over 120 ft.

Electronic Navigational Aids and Radio: All major companies have agencies in Shetland. Repair facilities exist for all types of electronic equipment.

Engine Readiness: Main engines must be maintained in a state of readiness for vacating the Terminal at short notice at all times except in the cases of approved repair work as detailed in Regulation 19 of "Jetty Safety Regulations".

CUSTOMS: A selective system of boarding commercial vessels arriving from a non-U.K. port, will apply at the Sullom Voe Terminal.

REPATRIATION: Crew changes can normally be arranged. Air and sea connections are available to mainland destinations.

It should be borne in mind, however, that during the Winter months delays to air traffic are not uncommon due to prevailing weather conditions whilst in Summer delays can be experienced due to low visibility.

Ships will not be permitted to retain their berth awaiting the arrival of crew members.

Also see "Ship System Failures".

AIRPORT: Shetland's airport network is within easy reach of Sullom Voe and scheduled flights are available daily to all major U.K. cities, with connections to worldwide destinations.

BANKS:

Bank of Scotland. Tel: Lerwick 2624. Telex: 75309.
Clydesdale Bank. Tel: Lerwick 5664.
The Royal Bank of Scotland. Tel: Lerwick 4520.

GENERAL:

The following services can be provided for vessels by the Shipping Agencies. Masters are requested to provide notice of requirements prior to arrival.

Compass Adjusting: A service is available for large vessels. Requests should be made in good time to ship's Agents in order that the adjuster may board with the Pilot on arrival.

Storing: Due to the high berth occupancy at Sullom Voe it is not possible to carry out major storings. However, a limited amount of fresh provisions for immediate store requirements can be supplied providing it can be easily handled by the ship's crew.

Fresh and frozen meat can be supplied in any quantity with Shetland lamb a speciality. Shetland knitwear goods of high quality are available at reasonable prices. Other local products include sheepskin rugs, traditional jewellery, handicrafts and salmon (fresh and smoked).

Bonded Stores: Bonded stores are available in any quantity.

Lubricating Oils: Most major oil companies have authorised dealers in Shetland. Lubricating oils of all grades are available at competitive prices.

Charts and Nautical Publications: Available on application to ship's Agents. Advance notice is required for the supply of large sets.

Lloyd's and Salvage Association: If service or survey is required, this may be obtained through their Shetland Agents, Hay & Co. (Lerwick) Ltd.

Sea Travel: P&O Ferries maintain a regular Ro/Ro and Passenger ferry service between Lerwick and Aberdeen.

Provisioning: This service is provided by ship's Agents on request.

Shore Leave/Taxis: All personnel proceeding ashore must be in possession of a shore pass, a supply of which is handed to Masters on the vessel's arrival.

Transport is provided free from the root of each jetty to Seafarers' Centre, and taxis can be arranged for those wishing to travel further afield in Shetland.

There is a limited public transport service serving the Sullom Voe area.

Telephones: This facility is provided at the Seafarers' Centre operated by the British Sailors' Society and situated outside the main gate.

There are public telephone boxes on the roadside adjacent to the end of each jetty. There are portable telephones available for use aboard a vessel, however, these are NOT intrinsically safe and must only be used within the accommodation spaces. The ship's Agent will supply a list of all call details after use.

Weather Routeing: This service is available to Shipmasters on application to Shetland Weather Centre.

British Sailors' Society: The British Sailors' Society has a Seafarers' Centre just beyond the Terminal Entrance. A free mini-bus service is provided between the jetties and the centre which is open from 1100 hrs. to 2300 hrs. Monday to Saturday and from 1230 hrs. to 1430 hrs. and 1900 hrs. to 2300 hrs. on Sundays.

Amongst the facilities provided are the following: A Chapel, Library, 3 International Telephones, Television Room, Snooker and Pool Tables, Darts, Shop, Fully Licensed Bar and Light Meals.

The resident manager is there to assist all seamen whatever their Nationality, Colour or Creed and there are 3 Honorary Chaplains whose services are also available.

Any Seafarer in need of practical, spiritual or welfare help is invited to contact the manager or his staff on Sullom Voe 242715.

NOTICES:

Landing in Great Britain of Live Animals, Live Birds and Meat:

The attention of Masters is drawn to "Notice to Masters of Vessels and Commanders of Aircraft (IM24 (Rev 79))" of which the following are extracts:

Diseases of Animals Acts 1950 and 1975, Rabies Act 1974, Destructive Imported Animals Act 1932 and Ponies Act 1969.

WARNING: Her Majesty's Government exercise strict controls at ports and airports to prevent the introduction of animal disease and destructive animals into Great Britain. Severe penalties may be applied to those who do not comply with the import regulations.

Dogs, cats and other mammals (including ship's pets) brought to Great Britain on board a vessel which are not intended to be landed do not need a licence, but must at all times be securely confined in an enclosed part of the ship so as to prevent their escape and must not come in contact with any other animals except those similarly confined. The authorities must be informed immediately if any animal should escape.

Notice to Mariners 4/82:

Spur Booms

Anti-Pollution Spur Booms have been established at several permanent sites around the shores of Sullom Voe, and mooring buoys have been laid to facilitate quick deployment at each location as follows:

Location	*Boom Layout*	*Buoy Position*	
		Latitude	*Longitude*
Tivaka Taing	Spur Boom	60° 28' 41" N.	01° 18' 37" W.
Fugla Ness	Spur Boom	60° 27' 04" N.	01° 18' 50" W.
Lang Ayre	Twin Boom	60° 26' 53" N.	01° 20' 12" W.
Voxter Voe	Twin Boom	60° 24' 36" N.	01° 20' 40" W.
Calna Taing	Spur Boom	60° 26' 26" N.	01° 19' 21" W.
Scatsta Voe	Twin Boom	60° 26' 38" N.	01° 16' 50" W.
R.A.F. Jetty	Spur Boom	No buoy used.	
Roe Clett	Spur Boom	60° 28' 56" N.	01° 17' 19" W.

Buoy Description: Body: Yellow Pillar; Character: Gp. Fl. (4) ev. 12 sec.; Daymark: Yellow St. George's Cross; Range: 3 miles; Light: Yellow.

Notice to Mariners 5/82:

Bight of Haggrister: Mooring Buoy. A permanent barge moorin been established in position: Lat. 60° 24' 37" N., Long. 1° 22' 02 Description: Yellow cylindrical; unlit.

Mariners are requested to exercise caution when navigating i vicinity of these locations.

Notice to Mariners 5/88:

Navigating Large Vessels in Areas where Fishing Vessels Operat

Masters of vessels which load at Sullom Voe Oil Terminal are ad that a significant number of fishing vessels operate in the sea which are regularly used by the tankers and it is recommended tha vigilance and caution be exercised at all times on passage to or Sullom Voe.

Masters should note in particular that use of Deep Draft Route of the Hebrides does not give deep draft vessels any privi whatsoever when navigating this Route and responsibilities in rel to other vessels, as set out in Rule 18 of the 'International Regula for Preventing Collisions at Sea 1983', still apply.

HYDROGRAPHIC NOTES:

Prohibited Anchorages

1. Owing to the existence of the tanker turning area within the vi of Sella Ness and Scatsta Ness, Mariners are advised that anch East of a line joining the following positions is prohibited, viz.:

From Position: Lat. 60° 26' 57" N., Long. 01° 19' 17" W.
To Position: Lat. 60° 26' 32" N., Long. 01° 18' 10" W.

2. Owing to the existence of an outfall pipe between Skaw Taing Swarta Taing, all vessels are advised that fishing and anchori prohibited within the area bounded by Little Roe and lines prod seawards from 2 sets of day transit marks diamond in shape and ye in colour which are established in the following positions:

A: Lat. 60° 29' 15" N., Long. 01° 16' 42" W.
Lat. 60° 29' 10" N., Long. 01° 16' 44" W.
B: Lat. 60° 29' 10" N., Long. 01° 16' 21" W.
Lat. 60° 29' 06" N., Long. 01° 16' 21" W.

Outfall Marker Buoy – Calback Ness: A yellow spherical navigat buoy with a yellow St. Andrews cross topmark and a radar ref showing a light Gp. Fl. 4(Y). ev. 12 secs. has been established in pos

Lat. 60° 29' 20" N., Long. 01° 16' 08" W.

This buoy marks the seaward end of the ballast water outfall p

Permanent Navigation Marks at Tanker Jetties – Sullom Voe

Permanent navigation marks have been established on the mo dolphins at either extremity of the tanker jetty complex as follows

Jetty No. 1 East end dolphin in position Lat. 60° 27' 21' Long. 01° 17' 02" W., two fixed red lights ver disposed 2 m. apart, the lower of which is 5 m. MHWS.
Visible 3 miles.

Jetty No. 4 West end dolphin in position Lat. 60° 27' 56 Long. 01° 18' 20" W., two fixed red lights ver disposed 2 m. apart, the lower of which is 5 m. MHWS.
Visible 3 miles.

SAFETY: *Smoking:* Smoking is prohibited in vessels during lo operations, except in 2 or at most 3 smoking rooms allocated Master and approved by the Terminal Representative.

Matches and lighters must not be carried by personnel outsi approved smoking areas, or on the jetties or anywhere with terminal.

The Seaman's Pass issued to personnel going ashore by Sullo Terminal carries the information that matches are available at th Gate for use outside the Terminal premises. The matches are free of charge.

Special arrangements have been made for ship's personnel or joining vessels at the terminal, details of which are in the Te Regulations, or can be advised by the ship's Agent.

Fire Precautions: Every vessel's fire-fighting appliances, (includin and emergency fire pumps) must be kept ready for immediate us at least 1 fire pump maintaining pressure on the main.

Before deballasting and loading/discharging operations com and during periods when permitted repair work is being carried least 2 fire hoses must be uncoiled and connected to the fire ma of the fire hoses must be sited forward and the other abaft the m

An International Shore connection shall be available on the fire main in the vicinity of the gangway.

Jetty Fire-Fighting Facilities: The oil loading jetties are each eq with 2 independent fire-fighting systems, one for water alone second for either water or foam mixture.

These jetties supply hydrants which are spaced along the jetty road and jetty head.

Monitors are installed to provide a water curtain in the area of head and between the access tower and manifold area. monitors are also positioned at the top of the access and monitor A sprinkler system protects the access tower.

Hose couplings are 2.5 in. standard instantaneous female the fire main to the access tower can accept international conn

The working pressure of the fire system is 250 – 260 p.s.i. A connection is situated on the construction jetty to allow fire-figh to link into the system.

POLLUTION: It will be appreciated that oil spillages are viewed by Government, Local Authorities, Port Authorities and Operators. Spillages will be investigated by the appropriate a and the Master and/or Owner may be liable to prosecution. De vessel could well arise.

Masters are therefore requested to ensure that every prec taken to prevent oil spillages at the Sullom Voe Terminal.

COASTGUARD SERVICES: H.M. Coastguard is the responsible for initiating and co-ordinating all sea and coast and rescue operations in the Shetland sea area. They also kee touch with the S.A.R. organisations of all countries in adjoining

Regular stations are maintained at Lerwick M.R.S.C. (Marine Rescue Sub-Centre), with sector offices in the Port Administration Buildings at Sella Ness and Lerwick. Stations manned by Auxilliary Coastguards are maintained at Baltasound, Mid Yell, Gloup, Fetlar, Out Skerries, Whalsay, Bressay, Noness, Sumburgh, Fair Isle, West Burra Isle, Walls, Huxter, Hillswick, North Roe and Papa Stour.

N.B. Sector Offices and Auxilliary stations are not constantly manned. All enquiries should be directed to Lerwick MRSC. A 24 hour radio watch on VHF Channel 16 is maintained by Lerwick MRSC which enables safety and distress calls from up to 40 miles out from Shetland to be picked up on the Coastguard VHF network.

On receiving a call for assistance or advice, the Coastguard can instantly alert the appropriate facility.

Weather forecasts are broadcast every 4 hours on VHF Channel 67 at 0105, 0505, 0905, 1305, 1705 and 2105 GMT, followed by a ship movements broadcast.

Other VHF Channels available are 0, 6, 10, 67 (working) and 73.

A VHF/DF facility on Channels 0, 6, 10, 67 and 73 is maintained at Compass Head.

A Civilian SEARCH AND RESCUE HELICOPTER is based at Sumburgh, contracted by the Department of Transport (H.M. Coastguard) for long range search and rescue purposes. The helicopter is fitted for winching, and carries comprehensive rescue equipment including a de-watering pump and inflatable dinghy capable of being dropped to vessels in distress.

It has a speed of about 110 knots and a radius of action of approximately 150 nautical miles from Sumburgh. Navigation equipment includes V.O.R., I.L.F., Decca A and D/F Console. Communications facilities are:

MF	2182, 3095 and 3023 kHz.
VHF AM	118/135.95 MHz.
VHF FM	Marine frequencies.

R.N.L.I. STATIONS: The following lifeboats are on station:

Lerwick:	52 ft. Arun Lifeboat 'Soldian'.
Details:	Speed 18 knots, range approximately 220 nautical miles. Navigation – Radar, Decca, VHF/DF, MF/DF. Communications – MF and VHF/FM (Marine Band) 60 channel set.
Aith:	52 ft. Arun Lifeboat 'Snolda'.
Details:	Speed 17 knots, range approximatel 220 nautical miles. Navigation – Radar, Decca, MF D/F, VHF D/F. Communications MF and VHF/FM (Marine Band) 60 Channel set.

All requests for lifeboat or helicopter assistance should be routed through Shetland Coastguard M.R.S.C.

MEDICOS: Vessels requiring medical advice or medical assistance should adhere to the radio regulations and contact either Collafirth or Shetland Radio on VHF Channel 16. If unable to contact the radio station, vessels can contact Shetland Coastguard direct on Channel 16 VHF.

EMERGENCY SERVICES AND PROCEDURES: Fire, Ambulance, Security and Oil Pollution. Tel: 222 (Emergency internal line).

All emergency services at the oil terminal are co-ordinated by the "Emergency Response Control Room" situated at the Terminal fire station.

On vessel's arrival at the Terminal, the responsible ship's officer and the Loading Supervisor will discuss action to be taken in an emergency situation. The Master of the vessel should study and comply with the 'Jetty Safety Regulations', a copy of which will be supplied.

Safety inspections will be undertaken by Terminal personnel throughout the vessel's stay alongside. Spot checks will also be made by the Terminal's Operations Support Branch.

In the event of an emergency, vessels should immediately contact Sullom Voe Port Control 242494/242495/242551 or VHF Channel 10 and emergency messages will be passed to the Terminal Emergency Response Control Room.

GARBAGE DISPOSAL: Skips are provided on board, and collected. No charge is currently made. Arrangements made by Shetland Islands Council.

WASTE OIL DISPOSAL: Available on request. Contact ship's agent.

Also see "General".

SHIPMASTER'S REPORT: 1983.

It is necessary to provide access to the vessel on the offshore side, in the form of accommodation ladder with vessels having high freeboard, at all times when alongside.

All crew members require passes for shore leave and must use transport from the jetty. This transport is arranged by the security guard in the hut at shore end of jetty.

Usually with moorings it is springs first then breast lines. The Terminal is not concerned with head or stern ropes. Some of the dolphins are fitted with shore based pulley systems and these count as 2 ropes for mooring purposes.

Telephone calls may be made from the Mission (U.K. and International) and paid for in pounds sterling.

REPORT: October 1983.

Gas Carriers: Gas carriers shall conform to the following requirements and the pipeline operators concerned shall, at the time of nomination, confirm to the terminal operator that the carrier nominated so conforms throughout the time she will be within the port limits.

a. The tanker conforms to the standards required in the EEC memorandum of understanding or to state control.
b. The tanker complies with the Statutory Instrument 1981 No. 1077 Merchant Shipping, Merchant Shipping (Tankers) (EEC requirements) Regulations 1981.
c. The tanker can comply with the conditions of carriage as specified on her IMO Certificate of Fitness.
d. The tanker will during the loading and simultaneous handling of ballast follow the procedures as outlined in her approval trim and stability document.
e. The tanker can be adequately moored to equivalent OCIMF standards, i.e. resisting loads due to any of the following current conditions acting simultaneously with a 60 knot wind from any direction:
   3 knots at 0° and 180°
   2 knots at 10° and 170°
   3/4 knots from direction of maximum beam current loading.
f. The tanker can accept a minimum bulk loading rate per hour of 3% of her total cargo carrying capacity up to a maximum of 3,000 cu.m./hr.
g. The tanker reliquefaction units are capable of handling a minimum bulk loading rate per hour of 3 per cent of her total cargo carrying capacity up to a maximum of 3,000 cu.m./hr.:
   (a) without venting to atmosphere and:
   (b) without the use of a vapour return line to shore.
h. All cargo tanks will be cooled down on arrival and the vessel ready to commence loading. Any vessel that cannot comply and requires to purge and/or cooldown prior to loading will only be accepted on the basis of prior agreement having been reached between the terminal operator and the pipeline group nominating the vessel.
i. That the following tests will be carried out within 24 hours before arrival and any defect, and any change in the status of the systems thereafter, be reported to the Port Authorities:
   (a) ventilation of compressor/pump/control room.
   (b) gas detection system
   (c) emergency shut down system
   (d) pressure and temperature control units
   (e) cargo tanks' safety relief valves setting.

SHIPMASTER'S REPORT: August 1984 (Updated 1988).
Vessel: 140,000 d.w.t.
Tugs: Normally 4 tugs for berthing and 2 tugs for sailing, tugs' lines. All tugs make fast and 2 push. On arrival the forward tug requires a heaving line from the main deck, he then steams forward to pass his line up through the centre fairlead.
Moorings: Under normal conditions first 2 back springs, then 2 to 3 breasts, then 2 to 3 head/stern lines.
Gangway: Shore gangway.
Departure: On departure Pilot normally boards 1 hour after completion of loading. EDP is standard procedure.
Surveyor: Lloyd's Surveyor comes from Aberdeen and requires 2 to 3 days' notice.

AUTHORITY: Shetland Islands Council, Marine Operations Department, Port Administration Building, Stella Ness, Mossbank, Graven, Shetland ZE2 9QR. *Tel:* (01806) 242551. *Telex:* 75142 Sulvoe G. *FAX:* (01806) 242237. *Cables:* Portcontrol Sullomvoe. *Contact:* Captain G.H. 1 set Manifest (unfreighted).

PILOTAGE: Call Sunderland Harbour Radio, Channel 16, working Channel for port is 14. Pilotage compulsory in South Docks and upriver of Corporation Quay. Pilotage also compulsory on all vessels carrying dangerous goods or with mechanical defects, under tow. Pilots maintaining continuous watch on VHF Sound signals for vessel requiring Pilot is Morse Code No. 6. Pilot boards 0.5 to 0.75 miles off piers. In bad weather pilot cutter leads vessel into inner harbour, and Pilot boards there.

ANCHORAGES: 0.5 to 0.75 miles N.E. of Roker Pier Lighthouse.

RESTRICTIONS: Vessels may enter South Dock from 2 hours before until half an hour after high-water. Vessels may lock in outside of these times depending on draft and state of tide. Corporation Quay restrictions depend on draft and state of tide.

MAX. SIZE: Harbour: LOA 183 m., beam 42.7 m., draft 8.2 m.

South Docks: LOA 141 m., beam 18.9 m., draft 7.16 m. (MHWN), 8.08 m. (MHWS).

HEALTH: Pratique procedure: Pratique granted by Port Health Authority on arrival.

Suspected disease or fever: All ships from suspected areas must radio Port Health Authority 24 hours in advance of arrival, stating general condition of crew members. Pratique is automatic when ships arrive from other U.K. ports.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats.

TUGS: Join vessel at or outside harbour entrance. Tug's ropes normally used.

BERTHING: In South Dock vessel must arrive from 2 hours before up to 30 minutes after high water. Vessels may lock in as under "Restrictions". At Corporation Quay, vessels berth at any time. Large vessels usually berth at same time as mentioned for South Dock.

STEVEDORES: Multi-skilled labour force is engaged on cargo handling operations.

Arrangements and Hours of Working:
Normal hours of operation are:
0800 – 1700 hrs. (Monday to Friday).

Work outside these core hours (overtime working) may be ordered as required.

Weekend working on Saturday and Sunday and Bank Holiday working can be arranged as necessary, with the exception of Christmas Day, Boxing Day and New Year's Day.

MEDICAL: Well served with General practitioners and hospital facilities, and attention can be arranged at very short notice. However, unless urgent, 24 hours notice desirable.

TANKERS: 4 installations (lines either 0.16 m. or 0.2 m.) 3 installations in South Dock and 2 berths, the S.E. Oil Berth 98 m., the S.W. Oil Berth 89 m. One vessel of maximum length 142 m. can use this berth. At Corporation Quay, one tanker vessel may berth.

DENSITY: Usually 1025. May be less after heavy rain.

FRESH WATER: Available. Arrangements can be made to supply water at any time.

FUEL: By direct pipeline, road or coastal tanker. All grades available at Corporation Quay and Hendon Dock.

REPAIRS: All repairs possible.

DRY DOCKS: One dry dock in use, length 112 m., breadth 16.5 m.

GANGWAY/DECK WATCHMEN: Watchmen's services recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by ship's crew, otherwise shore riggers.

CERTIFICATES: See "Documents".

CUSTOMS ALLOWANCES: As per H.M. Customs and Excise Regulations.

REPATRIATION: Facilities available for effecting repatriations, with good rail, road and air communications.

AIRPORT: Approximately 20 miles. Newcastle Airport served by regular airlines, all the year round, connecting most parts of the world.

HOLIDAYS: Official Holidays for General Cargo ships: New Year's Day (no work except by special agreement); Good Friday; Easter Monday; May Day; Spring Bank Holiday; Summer Bank Holiday; Christmas Day (no work except by special agreement); Boxing Day (no work except by special agreement).

POLICE/AMBULANCE/FIRE: Police Station Tel: (0191) 5102 Ambulance Control Tel: (0191) 2731212; Fire Tel: (0191) 567933 call 999 from any telephone and ask for service required.

TELEPHONES: Permanent arrangements do not exist, but a tempo arrangement can be made at any time.

IDENTIFICATION CARDS: Not required. Must possess valid Seam Book and/or Passport.

GARBAGE DISPOSAL: Skips placed at all working berths and char when requested by port authority. Charges included in port dues.

WASTE OIL DISPOSAL: C.M.R. Ltd. provide this service in the S Dock (Tel: (0191) 5653827, Fax: (0191) 5140628, Telex: 5373 Discharge via pipeline is available at SE Oil Berth, Hendon Dock.

SEAMAN'S CLUBS: None.

These documents are to be completed and presented with cop manifests and ship's documents at the time of report.

PILOTAGE: Compulsory for vessels of 1,600 g.r.t. (Base International g.r.t. in Lloyd's Register) and above. Request Swansea Pilots by telephone call. Telegraphic address for Swansea Pil "Pilority, Swansea".

Advance notice of ETA required at least 12 hours. VHF Channe 11 and 6. Pilot boat has bright yellow hull with red boot-topping or hull; superstructure painted white. Pilot cutter's sound signal is 3 short and 2 long blasts. The area of boarding is usually 1 mile S Mumbles Lighthouse in all weathers. Usual requirements for ladde in force, and Pilots require ladder to be about 4 ft. to 5 ft. above

ANCHORAGE: About 1 mile S.E. of the Mumbles Lighthouse.

RESTRICTIONS: Berthing is in accordance with tide. King's Dock operates for a maximum of 8 hours on Spring tides. River-side and Swansea Ferryport Terminal operate over a greater period.

No night-time restriction of entry.

MAX. SIZE: Max. size for entry is 655 ft. long, 88 ft. beam, 32 ft draft.

These vessels are docked over HW period. Any vessel w dimensions are approaching maximum for port should advise Manager well in advance. Special arrangements may be necessar as daytime only docking.

HEALTH: Usual international health regulations are to be observed vessel which is suspect should inform Port Medical Officer of He

RADIO: All communications for ship movements through "Sw Dock Radio" VHF Channel 14 calling and working. Agents, rec etc., can be called through usual coastal radio stations – this in Ilfracombe Radio.

TUGS: Towage undertaken by private operators. The Alexandra T Co. Ltd., at present use a modern fleet of tugs at Swansea an Talbot. It is optional whose lines are used, but if tugs line is tak extra charge will be made.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Min.)* (m.)	*Maximum Size of V*		
			Length (m.)	*Beam* (m.)	*Draft* (m.)
Kings Dock	3,586	10.1	199	26.5	9.9
Prince of Wales Dock	2,050	8.1	122	20.7	7.3
Queen's Dock	Oil Jetties (Operated by BP Co.)	10.7	199	26.5	9.9

Ro/Ro Berth: Situated on the East bank of the River Tawe, this provides a 137 m. berth, hinged shore bridge 76 m. long, with roadway. Adequate vehicle marshalling areas and Customs/ pa facilities are available. The nose of the bridge can be lowered 12.95 m. to allow for variation in tides and ship's flotation.

Containers: Swansea Container Terminal plc operates a full co terminal with a 35 tonne gantry crane.

BULK HANDLING FACILITIES: *Petro Chemicals:* One jetty in Dock. 4 jetties for bulk liquid fuels, feedstock, etc. operated Chemicals International Ltd., also in Queen's Dock.

Bulk Cargoes (Coal, ores, etc.): Two berths in King's Dock a with 1×7.5 ton and 5×10 ton grabbing cranes. Operated by As British Ports. Private berths use mobile cranes.

Ferryport: On East bank of River Tawe.

CRANES: 2×25 ton and 9×11.5 ton, 4×7.5 ton and 7×6 to cranes.

40 forklifts up to 11.5 tons, 1×25 tonnes capacity, 1×4 capacity and 3×28 tonnes capacity.

BRIDGES: One in dock bridge is under direction of duty Assistant Dock Master. A vessel which has to pass will be informed by the Assistant Dock Master as to the availablity.

STEVEDORES: Stevedoring services are provided by Associated British Ports and Swansea Container Terminal plc. Advice of labour requirements must be received by the following times:

General Cargo: By 0700 hrs. to start work at 0700 hrs.
Weekend work to be ordered by 1030 hrs. on Friday.

MEDICAL: Port Medical Officer of Health has an office on King's Dock Lock. Medical attention can be obtained at short notice. In emergencies, the duty Assistant Dock Master can be communicated with, to obtain medical help. Hospital facilities available, and there is a first-class medical centre on the Prince of Wales Dock. Vaccination and fever certificates will be examined when receiving Pratique.

TANKERS: All tankers arriving, working cargo, and departing are required to observe port's Petroleum By-laws and Oil in Navigable Waters Act. British Petroleum Company has further private directives for oil tankers. 5 main tanker berths, 1 petrochemical berth, 2 coastal tanker berths and 2 lay-by berths in Queen's Dock. 1 tanker/general cargo berth in King's Dock. Deepest draft permitted is 32 ft. 6 in.

Tankers of 1,600 g.r.t. and over to observe Merchant Shipping (Tankers – E.E.C. Requirements) Regulations 1981.

DENSITY: King's Dock Lock density is 1025.

FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 2,000 g.p.h., approx., depending on the demand.

FUEL: Various grades of gas oil and diesel can be supplied by barge or road vehicles, or it can be delivered ex-pipeline at Queen's Dock.

FIRE PRECAUTIONS: All matches and lighters must be declared at entrance to oil installation. There are arrangements at the Queen's Dock depot for shore cooking and eating. There is an oil boom between the King's Dock and Queen's Dock to serve as an oil fire break between two docks.

CONSULS:

France	Tel: Swansea 650021
Norway	Tel: Milford Haven 2313
Vice-Consuls:	
Belgium	Tel: Milford Haven 2313
Sweden	Tel: Gorseinow 895881

REPAIRS: All types of deck and engine-room repairs are possible.

DRY DOCKS: 2 dry docks in port are entered from King's Dock. Dry docks: "Duke of Edinburgh" 670 ft.×92 ft.; "Palmers" 560 ft.×75 ft. Operated by Swansea Dry Docks Ltd.

SURVEYORS: Cargo Inspectors available locally.
Ship Surveyors located in Swansea and Cardiff.

GANGWAY/DECK WATCHMEN: Under Port Regulations, there shall always be on board sufficient men to move or take care of the vessel. Some vessels employ watchmen.

OPENING/CLOSING HATCHES: Normally done by the ship's crew, but if riggers are employed by vessel for general duties they open up hatches.

CUSTOMS ALLOWANCES: At discretion of local H.M. Customs Inspectors.

CERTIFICATES:

Certificate of Freeboard.
Certificate of Registry.
Certificate of Pratique.
Light Bill.
Manifest.
Bill of Health.
Bills of Lading.

REPATRIATION: Arrangements can be made for repatriation through the Consular Channels.

AIRPORT: Nearest airport at Swansea, 8 miles from Docks. Next are Rhoose (Cardiff) and Bristol Airports where regular scheduled flights are handled.

TIME: Local time is British Standard Time which is plus 1 hour to Greenwich Time. Reverting to GMT during Winter months.

HOLIDAYS: Christmas (25th December); Boxing Day (26th December); New Year's Day; Easter, Good Friday and Monday (movable dates); Spring Holiday, May Day, Summer Bank Holiday (both movable dates). No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Call 999 from any telephone, and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Centre based at Mumbles. Tel: Swansea 66534.

TELEPHONES: Arrangements at most berths for placing telephones on board ships in port.

BANKS: Lloyd's Bank Ltd., 25 Wind Street, Swansea. Tel: 475555.
Barclays Bank Ltd., 57 Wind Street, Swansea. Tel: 465007.
National Westminster Bank, 52 Wind Street. Tel: 652125.

STORING: See "Prelims".

1. Yes
2. No interference with cargo work.
3. Yes
4. Yes
5. —
6. Yes.

SHIP SUPPLY SERVICE: It is the practice for the Swansea and Port Talbot pilot cutter to ferry personnel, stores, etc., to vessels offshore and due to dock at the respective ports. Alternative arrangements have to be made for large quantities and heavy items (Contact A.Doig & Co.).

Swansea and Port Talbot Pilotage, Port Office, King's Dock Lock, Swansea, West Glamorgan, South Wales. Tel: (01792) 650855.

IDENTIFICATION CARDS: Not compulsory, but they are helpful if a crew member has to identify himself to Authorities.

GARBAGE DISPOSAL: Arranged through local Agents.
Brisco. Tel: (01792) 584585.
Dragon Skip Hire. Tel: (01792) 310688.

WASTE OIL DISPOSAL: Arranged through local Agents.
Caarleon Ltd. Tel: (01792) 458646.

SEAMAN'S CLUBS: Flying Angel, Kings Dock, Swansea. Tel: (01792) 653436. Hours: 1900 – 2300 hrs. Full facilities, except for accommodation.

GENERAL: Entrance lock is 875 ft. in length, 90 ft. across at cope level. The inner sill is 7 ft. higher than the outer sill. The outer sill is 2.8 m. below Admiralty Chart datum (Chart No. 1161).

Tugs are available at the port for in-dock as well as sea towage.

A diver can usually be obtained by enquiry to the A.B.P. Port Engineer, Swansea.

Port Manager: Tel: 650855/265. Port Engineer: Tel: 650855/275. Dock Master and Fire Officer: Tel. 650855/260.

AUTHORITY: Associated British Ports, Harbour Office, Lockhead, Kings Dock, Swansea, Glamorgan SA1 1QR. *Tel:* (01792) 650855. *Telex:* 48150. *FAX:* (01792) 650729. *Contact:* A.R. Klinck, Port Manager. Captain M.J. Ingamells, Harbour Master.

TEES RIVER: 54.39 N. 01.08 W. (See Plan)

PORT LIMITS: The Port facilities extend from the river entrance to the I.C.I. Billingham Oil Jetty 16 km. up river.

Arrival in the port is accepted as time of passing South Gare Lighthouse inward, or time of anchoring in the Tees Bay.

DOCUMENTS: Ship's official papers including:

Register.
Load Line Certificate.
Derat Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Construction Safety Certificate.
U.K. Light Dues.
Oil Pollution Certificate. (Tankers).
Crew List.
C14 Ship's Stores List.
C13 Arrival General Declaration.
C142 Crew Declaration.
Schedule 2 Check List.

ANCHORAGE: Vessels are prohibited from anchoring:—

(i) inside the dredged channel.
(ii) within a radius of 1,113 m. of the charted position of the Fairway Buoy.
(iii) within the limits of 2 divergent lines starting and extending from the dredged channel limits 244 m. apart at the South Gare Light Station, to 550 m. apart between their respective points of intersection with the circumference of the circle defined in (ii).

Vessels should not anchor within 2.5 cables of the Ekofisk Oil Pipeline or the Everest Gas Pipeline.

Caution should be exercised by the Mariner wishing to anchor in Tees or Hartlepool Bays, especially during periods of onshore winds. Local weather forecasts may be obtained from the Coast Guard or Coast Radio Station. Continuous anchor watches must be maintained and frequent confirmation of the vessel's position obtained to ensure that the vessel is not dragging. Engines should be maintained in a state of readiness so that the vessel may heave up if required.

Masters are asked to note that the area to the North of the Ekofisk pipeline is a sensitive fishing area and should be avoided whenever possible.

PILOTAGE: The Tees Pilotage Area is that part of the harbour for the time being, as specified in the Tees & Hartlepool Port Authority Act 1966 and all statutory modifications thereto falling within an area from the waters of the River Tees below the Newport Bridge at Middlesbrough, including all docks and tidal creeks connected therewith and the waters of the sea bounded by a line bearing 047°(True) from the Port Boundary Stone at Seaton Carew and extending seaward from that stone for a distance of 3.95 miles, thence clockwise along a circle of a radius of 3.5 miles from the South Gare Lighthouse at the mouth of the River Tees to the shore at Redcar, always excluding any port of the area enclosed by a circle of radius of 1.5 miles from the seaward end of the Hartlepool Breakwater.

Official address: The Tees & Hartlepool Pilotage Co. Ltd., 13 – 17 Queen's Square, Middlesbrough, Cleveland. Tel: (01642) 485648 (24 hours).

Pilot station is situated at South Gare and pilot cutter on duty is moored there. Cutters are painted blue with white or orange upper structure and fly the pilot flag by day when on duty and International Regulation lights by night. The duty cutter is equipped with VHF Radio, call sign "Tees Pilots" on Channel 16. Radar is also fitted.

As much advance notice of a vessel's arrival as possible should be given to Pilots. Minimum requirement for vessel arriving is 1 hour and for vessel sailing 1 hour 15 minutes.

Pilot boards in vicinity of Tees Fairway Buoy although smaller vessels are occasionally boarded off the South Gare lighthouse. During severe weather the duty cutter may move to Tees Dock and the Pilot will board as far seaward as the conditions permit.

Pilotage is compulsory for certain classes of vessel.

Class of ship requiring a Pilot:

1. (a) Ships of 95 m. LOA and over, navigating in the "Tees Approach Channel" and the "Tees River Channel" seawards of Light Buoy No. 27 (Position: Latitude 54° 35' 02.2" N., Longitude 01° 11' 46.8" W.).
   (b) Ships of 80 m. LOA and over, navigating in the "Tees River Channel" between Light Buoy No. 27 and Tees "Newport" Bridge.

2. Ships navigating in the "Tees Approach Channel" or "Tees River Channel" up to Tees "Newport" Bridge.
   (a) Of 20 m. LOA and over, having on board a dangerous substance.
   (b) Requiring the services of a tug.

Pilotage Exemption Certificates: Certain Masters and Mates may be entitled to a "Pilotage Exemption Certificate" upon application to the Tees & Hartlepool Port Authority. Details are obtainable from the Harbour Master, Harbour Master's Office, Tees Dock, Grangetown, Middlesbrough, Cleveland, TS6 6UD.

RESTRICTIONS: *Traffic Control:* This is operated by the Harbour Master when vessels over 200 m. in length are moving within the river limits. The primary purpose is to allow the subject vessel to negotiate the channel without embarrassment from other traffic. Overtaking/passing is decided by the Harbour Master when circumstances favour such actions.

Restricted Transit Control: This is imposed by the Harbour Master upon vessels carrying certain hazardous cargoes. The subject vessel is intended to proceed from sea to berth or from berth to sea without meeting other traffic. As a consequence such vessel must be restrained from entering the main channel until an 'all clear' route is available. Some regulated passing.

Port Safety Control: Masters of ALL vessels before committing their vessels to the River Tees Channel are required to satisfy the Harbour Master in respect of shipboard equipment by affirming to the following questionnaire:

Question No. 1: Your vessel is in all respects seaworthy.
Question No. 2: All secondary power or mechanical systems are in operation and *immediately* available in the event of failure of any primary system.
Question No. 3: Steering is under direct manual control.
Question No. 4: Anchors are ready for use.

In view of the controls it is essential for contact to be made with the Harbour Master before considering entering the river, leaving the berth.

VHF Radio use Channel 14 to contact. Tel: (01642) 452541. Telex: 58145. Fax: (01642) 467855.

Tees Barrage: A newly constructed barrage came into operation in December 1994, located at Blue House Point, approximately 9 miles from the entrance.

This has the effect of truncating the flood tide, and during periods of heavy rain and melting snow, this has been observed to have the effect of extending the ebb tide flow in parts of the river.

Note: All depths are expressed as nominal dredged depths at Lowest Astronomical Tide (LAT). These depths are affected by both siltation and tidal conditions. Users should always obtain detailed information from the Harbour Master, Tees. Tel: (01642) 452541.

MAX. SIZE: This matter is constantly under review. At present the largest dimensions acceptable are quoted as: Length 305 m. (1,000 ft.); beam 48.0 m.; draft 17.0 m. This depends on the berth nominated, tidal influence and prevailing weather.

Vessels requiring in excess of 16.15 m. (53 ft.) draft should be the subject of prior consultation with the Harbour Master.

A vessel with unusual dimensions e.g. oil rig, or any vessel with dimensions approaching the port maxima, must be the subject of consultation with the Harbour Master.

HEALTH: New Regulations. The Public Health (Ships') Regulations in force from 1.4.78.

See "Health – All Ports" before first U.K. port.

RADIO: Ships approaching from the North or at anchor in Tees Bay use Cullercoats Radio. Ships approaching from Southward use Humber Radio or Whitby Radio which is a slave-station to Cullercoats.

VHF Station	*Call Sign*	*Channel Fitted (min.)*
Harbour Master's Office	TEES PORT CONTROL	14,16,22,12
Harbour Master's Launch	TEES HARBOUR LAUNCH	16,14,12,11,9,8,6

Tees Pilot Cutter	TEES PILOTS	16,14,12,9,8,6
Tees Pilot Station (South Gare)		16,14,9
Tees Tugs	NAME	16,14,12,8,6, etc.

Tees Port Control is manned 24 hours per day and is also available to Hartlepool shipping for relaying port operational messages.

Channel	*Use*
14	Port Operations (Tees)
22	Port Operations (Tees)
9	Pilot Operations (Tees and Hartlepool)
16	Calling and Safety.

Vessels should listen on Channel 14 at all times when underway in the port.

RADAR: 4 scanner sites give full radar coverage from Tees Offshore Base/Tees Dockyard Ltd. to Fairway Buoy and up to 20 miles to seaward. Advice/information available to Masters/Pilots at any time. Advice in poor visibility in prescribed form. Call "Tees Port Control". (See "VHF").

The Ekofisk oil pipeline runs 220 miles from the Ekofisk oilfield to Teesside, coming ashore just North of the Tees Entrance; the Everest high pressure gas pipeline runs from the Central Graben gas/oil field, coming ashore just South of the Tees Entrance; the inshore sections are vulnerable to anchor damage from large ships and to give the pipelines optimum protection, a computerised radar has been installed in the Harbour Office.

TUGS: Official Address: Cory Towage (Tees) Ltd., Tees Wharf, Dockside Road, Middlesbrough, Cleveland TS3 6AB. Tel: Middlesbrough 247277 day and night.

Fleet of 6 tugs between 2,200 h.p. and 3,650 h.p. Tugs join vessel in Redcar Reach between Buoys No. 9 and No. 17 depending on size, draft and destination. Tug's lines are used.

Tugs are on duty daily and available on 6 hours' notice for sailing and arriving after normal office hours.

BERTHING: Small vessels can usually berth at any stage of the Deep drafted vessels enter in accordance with the tide.

T.H.P.A. General Cargo Facilities:

Tees Dock: Quay No. 1: 4 conventional general cargo berths ea 183 m. length, 1 of 208 m. in length with flush faced quay. Road rail access to all vessels. Ample cranage and spacious sheds ground. Nominal dredged depth 10.9 m. below LAT.

Quay No. 2: Two berths, one at 183 m. in length and one at 20 in length, equipped with electric luffing cranes up to 25 tonnes cap and 1×100 tonnes capacity Demag mobile crane. Nominal dre depth 10.9 m. below LAT.

BULK HANDLING FACILITIES: *Redcar Ore Terminal:* Handles iro imports for British Steel. Berth dredged to nominal 17.30 m. and ab accommodate vessels up to 305 m. in length, approx. 150,000 3 ore dischargers capable of handling 2,000 t.p.h.

Teesbulk Handling Ltd.: Built on the East side of Tees Dock, this loa discharging facility is for the export of Potash mined in North Yorks Dredged to a nominal depth of 10.90 m., the quay is intende accommodate vessels simultaneously. The main loader is capab 1,500 t.p.h. or 1,000 t.p.h. each to 2 vessels. A silo on the site h storage capacity for 56,900 tons. Grain is exported from the ter utilising a 7,500 ton silo as well as direct transport. Coal, soda ash bentonite also handled.

ROLL-ON/ROLL-OFF FACILITIES: A link span Ro/Ro berth in Dock can accommodate ships of up to 160 m. in length and 23 beam. Nominal dredged depth of 8.7 m.

Designed for loads up to 182 tonnes (when carried on 4 axles).

A second Ro/Ro pontoon is located at Tees Dock, Berth No. 5 can accommodate vessels of up 200 m. LOA, and has a no dredged depth of 10.4 m. below LAT.

CONTAINER FACILITIES: A privately operated (Bell) purpose Container Berth utilising 2 gantry cranes of 32 tonnes and 45 to capacity is established downstream of Tees Dock.

CONSTRUCTION FACILITIES: There are a number of specialising in oil-rig module construction work, all capable of han flat-top barges up to 92 m. and unit loads to 4,000 tons.

SLP Engineering on the South side of the river, while Trafalgar Brown are on the North side.

STEVEDORES: In order to prepare for loading/discharging, i.e. ord of gangs, transport, etc., it is necessary to give ETA through their A not less than 24 hours before arrival.

In Tees berths, the port works 2 shifts daily, i.e. 0600 – 1400 hrs 1400 – 2200 hrs. Mondays to Fridays, with voluntary overtim weekends.

MEDICAL: All medical facilities available. Vessels requiring doc board are advised to give maximum notice. Emergency medical att can be arranged through VHF radio contact to Tees Port Cont Channels 22, 16 or 14.

Clarence/Deep Water Wharves also handle tankers.

Note: Depths given are nominal and subject to siltation. information should be sought from Tees Harbour Master.

Report: *Cautionary Advice:* Vessels approaching River Tees have B.A. Charts 2566 and 2567. Both are large scale charts complete coverage of River Tees and associated terminals, a Bay. B.A. Charts 134, 152 and 1191 are recommended for seaward to the Tees Bay area.

It should be noted that there are two 15 m. wrecks outside line in positions within 3 miles of the Fairway Buoy (54° 41' N., and 54° 42.5' N., 1° 24' W. (PA)). Tides in the vicinity of the Buoy and the pilot boarding areas set at approximate right ang channel, with rates up to 1.5 knots. Great care should be exerc slowing down to embark the Pilot.

During or after Northeasterly gales, a heavy ground swell up in this area.

Phillips North Sea Petroleum Teesside: Docking and Berthing normal practice to berth port side to. The vessel is swung Channel turning circle and backed into the berth. There are no speed indicators on the jetties. Mooring boats are used to ru ashore (usually spring lines first, followed by a head line and a stern line). All moorings should be of the same construction and material.

ICI North Tees: Docking and Berthing: Vessels may berth either side to any of these jetties, according to tide and weather conditions, but port side to is favoured by Harbour Authorities so that the vessel is heading seaward. If the vessel is berthing port side to, normal practice is to swing off Tees Dock. There are no approach speed indicators. Also see "Shipmaster's Report" – April 1988.

Tees Storage Terminal: Docking and Berthing: Vessels may berth either side to at No. 2 Jetty according to tide and weather conditions prevailing, but port side to is favoured by Harbour Authorities so that the vessel is facing seaward. Vessels berthing port side to are swung in the Tees Dock turning circle and then pushed into berth with the aid of tugs.

Teesport Oil Jetties: Docking and Berthing: Vessels may berth either side to these berths according to tide and weather conditions prevailing, but starboard side to is favoured by Harbour Authorities so that the vessel is facing seaward. If the vessel is berthing starboard side to, it is swung in the Tees Dock turning circle. There are no approach speed indicators.

Billingham Oil Jetty: Docking and Berthing: Vessels may berth port or starboard side to depending on weather and tidal conditions prevailing at the time.

If vessel berths port side to, an anchor is sometimes used when swinging the vessel off the berth. 2 springs are run from each end of the vessel, then 2 messengers are passed from jetty deck to vessel, one to bow and one to stern. 2 shore head lines and 2 shore stern lines are brought on board and made fast.

B.A.S.F. Terminal: Docking and Berthing: Vessels may berth either side to according to tide and weather conditions prevailing at the time, but port side is favoured by Harbour Authorities so that vessel is facing seaward. If vessel is berthing port side to it is swung in the turning circle off Tees Dock and then pushed into the berth with the aid of tugs.

DENSITY: The density of the river water fluctuates with the seasons and rain amount, being between 1015 and 1025 mainly. Below Tees Offshore Base/Tees Dockyard Ltd. the fresh water influence is minimal.

FRESH WATER: Plentiful from wharf and small quantities available from tug in emergency, approx. 20 t.p.h.

FUEL: All grades available by road or river delivery. 48 hours notice of requirements is requested for barge delivery.

CONSULS: Sweden, Norway, Denmark, Netherlands, Germany, Finland. Also French Consular Agency.

REPAIRS: Facilities available for all deck or engine repairs.

DRY DOCKS: Tees Dockyard Ltd. has 3 dry docks:

No. 1 Dry Dock 175 m.×22.25 m., capacity 26,000 tons.
No. 2 Dry Dock 83.21 m.×17.31 m.
No. 4 Dry Dock 137.16 m.×20 m.

Cranage: 5 tons, 10 tons, 15 tons and 30 tons.

SURVEYORS: 1. SGS Redwood Ltd., and Caleb Brett cargo inspectors available.

2. Lloyd's Register, American Bureau, German Lloyd, Bureau Veritas, Salvage Association, U.S. Salvage, N.K.K., RIMA and Corporation of China available.

GANGWAY/DECK WATCHMEN: Recommended. Majority of berths are tidal with 5 m. range at Springs.

OPENING/CLOSING HATCHES: Always by crew. Riggers available.

CUSTOMS ALLOWANCES: 0.5 lb. tobacco or 200 cigarettes. (0.25 lb. tobacco for coasters). 1 spirit and 1 wine bottle (0.5 bottle spirit and 0.5 bottle wine for coasters).

REPATRIATION: All facilities exist.

AIRPORT: Teesside Airport with regular flights to London, etc. is 12 miles from Middlesbrough Centre.

Air U.K. have flights to Aberdeen, Amsterdam, Bergen, Humberside, Norwich and Stavanger.

TIME: GMT in Winter months. BST (GMT plus 1 hour) operates between late March and mid-October as decided by government.

HOLIDAYS: Normal English Bank Holidays. On certain holidays work can be arranged if suitable notice is given.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency. If no phone available contact the Harbour Master on VHF Radio Channel 16 or 14.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coast Guard Maritime Rescue Sub-Centre, Tyne/Tees. Tel: (0191) 2572691. Telex: 58839.

TELEPHONES: Many berths can be connected to telephone system using coin boxes; a connection charge is made.

BANKS: All major U.K. banks have branches in Middlesborough, Redcar and Hartlepool.

STORING: See "Prelims".

1. Both.
2. Tankers – No.

Storing may take place before or after cargo operations, while all tanks are battened down.

3. No. Distance varies from 100 yards to half mile depending on berth.
4. No.
5. Applicable to spirits, cigarettes, tobacco and bonded meat only.
6. Yes, but normally by suppliers/ship's crew.

IDENTIFICATION CARDS: Not used in Tees.

GARBAGE DISPOSAL: There are several reputable firms in the area. Collection service is available by arrangement through local shipping agencies, but must be sanctioned by the berth operator (this is particularly important at tanker berths). Skips are usually about 6 cu.m. and charges vary according to time involved, but average about £35 to £40 per skip in normal working hours.

WASTE OIL DISPOSAL: Collection can be arranged by local shipping agencies, however it is necessary to specify what oils and chemicals are present in the waste oil. Usually collected by road tankers of about 20 tons capacity and charges would vary according to quantity and content. Typical current charge for Lub and Fuel Oil waste, £150 per 1,000 galls.

SEAMAN'S CLUBS: The Missions to Seamen, The Flying Angel Club, Tees Dock, Grangetown, Middlesbrough, Cleveland TS6 6UD. Tel: (01642) 460994, 468527, 460244.

German Seamen's Mission, 67 The Avenue, Linthorpe, Middlesbrough, Cleveland, TS5 6QU. Tel: (01642) 825084.

Swedish Missions Church, 386 Linthorpe Road, Middlesbrough, Cleveland, TS5 6HA. Tel: (01642) 819878.

Seafarers Christian Friends Society, 7 Lampton Road, Stockton on Tees, Cleveland, TS19 0ER. Tel: (01642) 603247.

CURRENCY: U.K.Pound (U.K.£).

SHIPMASTER'S REPORT: April 1988.

Chart: BA. Chart No. 2566.

Pilot: Pilot boards at Tees Fairway Buoy (Racon) from a fast sea cutter. If the weather is poor the Pilot boards inside South Gare.

When leaving, extra charges are incurred if the Pilot has to standby for more than 1 hour.

Entry: It is about 30 minutes from the Pilot to ICI North Tees.

Tugs: There are several powerful tugs available. Tugs are not normally used by small vessels. When ordering tugs, 2 hours' notice required.

Berthing: For ethylene, Jetty A only can be used, depth of water approximately 7.5 m. at low water.

When berthing, side alongside is dependent on the tide, but in general vessels berth starboard side to. Vessels swing off the berth and sometimes the anchor is used. Good fendering is provided by 3 large 'Yokahama' type fenders which ride up and down with the tide on the wooden quay face. Mooring boat assists with running the lines.

Great care should be taken when lining vessel up with the manifolds as shore personnel alignment may not be accurate. The ICI Jetties can handle Gas Ships up to a maximum of 60,000 cu.m.

Cargo: There is an 8 in. liquid line and a 6 in. vapour line. The shore personnel connect and disconnect the Chicksan arms. There are often long delays between connection of arms and commencement of operations.

The shore compressor extracts ship's vapour, so can use all ship's plant for internal cooling.

Negative cool down on completion. We had a temperature of −101.7° C on completion of loading. This can vary from −101° C to −102° C, depending on the time of year.

Average loading rate 124 t.p.h. (shore maximum). We stopped loading 12 tonnes before being full (there is a stop button at the ship's manifold) and the remaining product was blown to the ship in about 45 minutes.

Oxygen samples taken before loading.

All documentation, including Bills of Lading, handled by Surveyor, who accepts Notice of Readiness and Protests. The Supervisor is located in a cabin near the vessel and was very helpful.

General: Fresh water is obtainable from a hydrant on the Jetty and is free.

Transport delivering stores is permitted to within 25 m. of the ship's side.

Ship's gangway used but was troublesome due to the rise and fall of the tide.

There is a public telephone near the vessel. Collect calls may be made via the operator (no coin box). The Master is able to use the telephone in the Supervisor's office for any local official business.

Customs are very strict, all forms are to be completely correct.

AUTHORITY: Tees and Hartlepool Port Authority, Harbour Master's Office, Tees Dock, Grangetown, Middlesbrough, Cleveland TS6 6UD. *Tel:* (01642) 468127. *Telex:* 58145 HMTees G. *FAX:* (01642) 467855 (office hours only). *Contact:* Captain P.J. Lewis, Harbour Master.

TETNEY MARINE TERMINAL: 53.32 N. 00.07 E.

LOCATION: Tetney Marine Terminal is the deep water crude oil terminal of Crude Oil Terminals (Humber) Limited, operated by Conoco Limited.

The position of the mono-buoy is 53° 32' 18" N., 00° 06' 48" E., accommodating vessels up to 50 ft. draft and about 2.5 miles offshore.

Tetney is an open roadstead in the entrance of the River Humber on the East coast of England. The tidal rates in the vicinity of the mono-buoy reach 3.5 knots during Spring tides and the direction of the ebb and flood tides is generally East and West respectively. The tidal range varies between 7 ft. and 22.5 ft.

DOCUMENTS: The following documents should be completed for arrival:

General Declaration – Form C13 (duplicate).
Crew Declaration – Form C142 (duplicate).
Crew List – IMO (duplicate).
Tanker Check List – Schedule II EEC.

Normally the Agent will board the tanker from one of the berthing tugs prior to berthing, and the previously mentioned documentation, with the exception of the Tanker Check List (which will be handed to the Berthing Master, together with cargo documents) will be handled by him.

Stores can be taken at the berth provided the Agents are given the order at least 72 hours before arrival. Stores and water are available by workboat, arrange via Agent.

The Master of the tanker shall notify to the Harbour Master prior to arrival the information required under S.I. 1981 No. 1077, The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981.

PILOTAGE: Vessels are requested to send ETA and draft to Spurn Pilot 12 hours before arrival and any adjustment to that time at least 2 hours before arrival. Spurn Pilots listen continuously on VHF Channel 16 and use Channel 14 as a working frequency.

Additionally, Agents should be advised of ETA 72 hours before arrival and arrival draft should be included in the cable.

Pilotage is by Humber Pilots who board in the vicinity of the Humber Light Vessel from a fast launch. Additional berthing information can be obtained from Tetney Base.

The Berthing Masters will board as the vessel approaches the mono-buoy and will assist the Pilot in the mooring operation. They will advise the ship's Officers during the mooring operation, hose connection and disconnection, and will act as Company representatives throughout the vessel's stay in the berth. Berthing Masters (2), Pilot and Cargo Surveyors(s) remain onboard during vessel's stay.

Vessels must provide a pilot ladder for the Pilot and Berthing Masters to board and whilst in the berth a suitable gangway with a pilot ladder near the end in order to board from a small boat. The ladder must be clean and conform to SOLAS Regulations.

RESTRICTIONS: Berthing on H.W., sailing at any time.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: *Pre-Arrival Procedure:*

In addition to the ETA requirements the following information is required by the terminal within 6 hours of clearing the previous port, or as soon as receiving orders for Tetney.

(a) Name of ship.
(b) Name of the last port from which the vessel cleared and the name of the loading port if different from above.
(c) Estimated date and time of arrival at Humber.
(d) Cargo loaded (barrels and metric tons – gross and nett).
(e) API and gravity.
(f) Arrival draft fore and aft.
(g) Lifting capacity of derricks.
(h) Size of manifolds.
(i) Slops in cargo.

About 48 hours from the Pilot Station a second cable should be sent to the Agent with the following information:

(a) Name of Ship and Master.
(b) Amended time of arrival.
(c) Names of crew leaving the vessel.
(d) Requirements in way of doctor and dentist.
(e) Stores and water.
(f) Additional requirements.

About 24 hours from the Pilot Station a final cable should be sent to the Agent confirming:

a) Time of arrival.
(b) Ship's bond remaining on board.
(c) Amendments.

VHF: There is a VHF station at Tetney which is manned 24 hours a day and has the call sign, 'Tetney Base'. A continuous watch is kept on VHF Channels 16, 21 and 48. Channel allocation is as follows, 16 calling, 21 ship to shore, and 48 port operations. UHF (467.725 MHz) is allocated for use by the Conoco Berthing Master, Tetney Terminal and the Conoco owned work boats.

The Pilot and Berthing Masters carry portable VHF hand sets for use during berthing for inter-ship and ship to tug communications, Channel 73.

BERTHING: Hose hang-off chains and securing equipment are placed aboard the vessel when the Berthing Masters board from the Conoco service craft, "Spurn Haven".

Vessels will moor using an OCIMF Approved Mooring Stopper suitable for use with 76 mm. chafe chain.

The vessel approaches the mono-buoy on a Westerly heading. A messenger (min. 40 mm. diameter) should be lowered to the water and this will be picked up by the Conoco mooring launch "Monogirl" when approx. 150 m. from the mono-buoy. This messenger will be made fast to a 64 mm. × 90 m. polypropylene pick up rope which should be heaved up as the vessel makes the final approach to the buoy. When the chafing chain is in the fairlead it is secured to the bow stopper.

HOSES: Hoses are taken on the port side and the port derrick (minimum S.W.L. 10 tons) should be rigged and ready for use on arrival.

2×16 in. hoses are taken aboard, manifolds should be 16 in. 150 ASA. Should a vessel have any other size of manifold or be unable to provide adaptors to suit 16 in., Tetney Terminal will need to be notified at least 72 hours before arrival.

Hose connection and disconnection is carried out by the ships crew under the supervision of the Berthing Master. Upon completion of discharge the hoses will be filled with sea water by the ship after which disconnection can commence. When the hoses are blanked off they will be hung off until just before sailing when they will be lowered to the Spurn Haven for towing clear.

POLLUTION: It is the Master's responsiblity to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oil water from the bilges, crude residues from previous voyages or any other matter that may result in the pollution of the sea. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea, especially in regard to the river Humber.

SHORE LEAVE: None of the officers or crew shall be allowed shore leave and no boats of any kind, except in an emergency, shall be lowered during the vessel's stay in the berth.

GARBAGE DISPOSAL: Skip provided, arranged through Agent.

WASTE OIL DISPOSAL: Waste oils, with no chemical additives, may be accepted for disposal with prior permission from the Operator.

OPERATOR: Tetney Marine Terminal, Crude Oil Terminals (Humber) Ltd., Tetney Lock Road, Tetney, Nr. Grimsby, South Humberside DN36 5NX. *Tel:* (01472) 814101. *Telex:* 527111 Contet. *FAX:* (01472) 210275. *Contact:* Captain R.C. West, Harbour Master.

TYNE DISTRICT: 55.01 N. 01.24 W. (See Pl

(Including Newcastle, North and South Shields, Jarrow, Tynemo Wallsend and Gateshead).

PORT OPERATIONS AND INFORMATION SERVICE: VHF: Call "Tyne Harbour Radio" on Channel 16, frequency 156.80 MHz and Channel 12, frequency 156.60 MHz. The control station is situate the Harbour Master's Office, North Shields (Tel: (0191) 2572 2570407), and is manned on a 24 hour basis. Vessels must ob permission by VHF from the control station before entering the similar permission must be obtained before movement within, or be sailing from the port. A service is provided for the passing of informa to shipowners and Agents.

DOCUMENTS:

1 Crew List for H.M. Immigration Office.
1 Form C.142 (Tobacco List) supplied by H.M. Customs.
1 List of Private Addressed Packages not manifested (C.143), supp by H.M. Customs.

Details of Oil in double bottom tanks, also measurement in cubic of cargo in non-registered spaces.

PILOTAGE: Pilotage is compulsory for all vessels over 50 m. LOA Port of Tyne Authority pilotage district includes the port and its sea approached within a radius of 3 miles from the North and South Pi Pilot will board by arrangement either inside piers or at sea.

24 hours advance notice via agent required.

Call 'Tyne Harbour Radio' on VHF Channels 16 and 12 to order Efficient pilot ladder required as per D.O.T. Regulations.

ANCHORAGE: Off entrance River Tyne, recommended 1.5 mile of North Pier. Minimum 12 fathoms.

RESTRICTIONS: The river channel is dredged to the following de below Chart Datum: From sea to Jarrow Quay Corner (East end) 8. thence to Jarrow Staith (West end) 6.0 m., thence to Newcastle Bri 5.2 m. (except in the main channels of the Swing Bridge and High Le Bridge, Newcastle). West of Newcastle Bridges, there is no autho depth.

MAX. SIZE: Harbour entrance, length and breadth: no limit. Draft 8.1 any state of tide: up to 11.0 m. at high water.

Riverside Quay, draft up to 10.00 m. Depth 10.51 m. to 11.0 m. b C.D.

Tynemouth Terminal, draft up to 9.00 m. Depth 9.51 m. below C Newcastle Quay, 27 – 28 berths, 6.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio W/T "GCC." Cullercoats Radio on R/T.

TUGS: Normally join inside piers, and use tug's wires. Rate application to Cory Towage Ltd. Tel: (0191) 4540314.

BERTHING:

Albert Edward Dock:

Heavy Load Berth (Ro/Ro No. 2) for heavy unit loads on transpo up to 510 tonnes; depth of water 7.9 m. at normal dock level.

Tyne Commission Quay: Lay-by berth 335 m. long, depth of 7.11 m.

Tyne Commission Quay Extension: 118 m. long, depth of 6.21 m.

International Car Ferry Terminal:

Ro/Ro No. 3: 125 m. long, depth of water 7.11 m. Linkspan 4 wide; minimum headway clearance 5.0 m.; axle loading 45 to

Ro/Ro No. 4: 140 m. long, depth of water 7.5 m. Linkspan 9.4 m no headway restriction; max. axle loading 120 tonnes.

Whitehill Point Jetty: 90 m. long, depth of water 6.5 m.

Tyne Dock:

North West Quay: 243 m. long, depth of water 8.2 m. at norma level.

Factory Quay: 196 m. long, depth of water 7.0 m. at normal dock

Riverside Quay: 514 m. long, depth of water 10.5 m. to 11.0 m. C.D.

Tynegrain Ltd. (Extension of Riverside Quay): Terminal, 36,500 silo capacity. Loading rate 1,000 tonnes per hour. Max. size d.w.t. Depth of water 10.51 m.

Tyne Coal Terminal: 1 berth, depth of water 10.5 m. Loadi 2,000 tonnes per hour.

Tyne Car Terminal:

Berth No. 1: 250 m. long, depth of water 9.5 m.

Berth No. 2: 150 m. long, depth of water 7.0 m.

Berth No. 3: 140 m. long, depth of water 6.5 m.

Newcastle Quay:

Spillers Tyne Mill: 237 m. long, depth of water 6.0 m., discha 75 tonnes per hour. Silo capacity 34,000 tons.

Aggregate Berths:

Howdon Jetty (Tilcon): Length 150 m., depth of water 7.0 m.

Gateshead (Redland Aggregates): Length 80 m., depth of wate

BRIDGES: At Newcastle 10 miles from entrance, Swing negotiated against tide; other bridges, minimum headway cle 24.7 m. above MHWS.

STEVEDORES: Principal Stevedores Port of Tyne Autho arrangements through Agent. Stowage plan required prior to a

Plant pool as follows:

Albert Edward Dock:

Ro/Ro Berths – 4 terminal tractors.

Whitehill Point: 2 cranes, 10 tonnes.

Tyne Dock:

Riverside Quay – 4 cranes, 1 – 10 tonnes; one 40 tonne crane; 1 container gantry crane 35 tonne capacity under s 40 tons capacity under the hook beam.

North West Quay – 3 cranes, 5 tonnes – 10 tonnes.

There is a pool of 26 forklift trucks of 2,500 kg. to 42 tonnes available for any location. These trucks can be fitted with atta for handling paper, pulp, etc.

Container handling plant – 1 Hyster 40 tonnes, 6 yard tracto 40 ton flatbeds, 4×40 ft. skeletal trailers.

Also see "Dry Docks".

MEDICAL: Hospitals available, Advise Agent in advance if medical attention required on arrival.

TANKERS:

Velva Liquids, North Shields:

Ocean Jetty: 274 m. long, depth of water 9.5 m.

Tanker Berth: 248 m. long, depth of water 7.1 m.

Coaster Jetty: 167 m. long, depth of water 6.0 m.

Jarrow Oil Jetty: Length 189 m.

Rohm & Haas Ltd. Jarrow: Chemical Berth, length 180 m. Depth 5.6 m.

Report: *Cautionary Advice* – Port Approaches: The approach to the Tyne Piers is clear of danger and adequate navigation aids are provided and well maintained. The entrance, however, is exposed to Easterly winds and early contact should be made with "Tyne Harbour Radio" on VHF when bad weather prevails to facilitate boarding and avoid unnecessary delays.

In addition to close attention to other coastal traffic, a sharp lookout should be maintained for local fishermen whose craft are often badly lighted and poorly painted, with colours which may blend rather than contrast with the background.

Entry: Provided that the out-going stream is not making strongly, which causes maximum turbulence, there should be no difficulty entering the port with winds between N.E. and S.E. It is preferable to enter while the in-going stream is still running although at that time it also sets across the entrance. This precaution is especially necessary during N.E. gales, which cause the heaviest seas at the entrance. In Northerly gales vessels should keep close under the lee of North Pier and in Southerly gales, especially with the out-going stream running, close under the lee of South Pier.

Entry: After embarking Pilot prior to entry, vessel proceeds at half to full speed keeping leading lights in line 258°(T).

Normal entry times for maximum draft vessel (although sufficient water at any state of tide) from 3 hours before HW to HW River Tyne North Shields.

During this period tide sets across entrance from North to South in a 160° direction with Spring rates up to 1 knot.

Vessels must approach entrance with sufficient speed and set allowed to maintain a true course of 258°(T) keeping leading marks and lights in line.

Leading line must be disregarded as soon as the Tyne Piers are passed, when a vessel should reduce speed and be guided by the light buoys and beacons.

Inside the piers, tidal streams tend to run with the channel at rates up to 3 knots during Spring tides.

Vessels should pass in mid channel between Nos. 1 and 2 light buoys on the North side and Herd Light Buoy and Herd Groyne Light Structure on the South side.

Regulations also state that vessels are to keep Southward of mid channel when proceeding to sea and Northward of mid channel when entering, so as to pass each other port side to port side.

Distance from Tyne Piers to Herd Groyne 0.8 miles, course approx. 255°(T).

Tugs meet vessel in the area between Tyne Pier and Herd Groyne.

Passage up river from Herd Groyne to Tynemouth Terminal is approximately another 2 miles. Vessels speed when transitting this region should be between Dead Slow and Slow. This tends to be a very busy area with numerous riverside berths. Two bends, one to port and one to starboard, are negotiated before vessel reaches the swinging area off Tynemouth Terminal.

Vessels late for the tide are accepted on a spot basis and have been berthed up to 2 hours after HW. In these cases, vessels go straight alongside, starboard side to, and swing in the turning area outward bound.

Prescribed turning area is 360 m. in diameter.

Tugs are made fast between Herd Groyne and the swinging area, and normal practice is to swing to starboard heading vessel to the jetty when all way is off the vessel.

Mooring boats are employed for running the ship's lines to shore.

DENSITY: Entrance/Tyne Dock – 1025; Tyne Dock/Jarrow 1020; Newcastle Quay 1005/1010.

FRESH WATER: Available ex-water boat, rate of delivery up to 150 t.p.h.

FUEL: Available at Tyne Tanker Berth or by road tanker.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CERTIFICATES:

- Register.
- Load Line.
- Safety Construction.
- Safety Equipment.
- Safety Radio.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 0.5 lb. tobacco per man and equivalent to 1 bottle wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

GANGWAY/DECK WATCHMEN: Advisable to have a watchman but not absolutely necessary.

OPENING/CLOSING HATCHES: Always opened and closed by crew.

CERTIFICATES: Derat Certificate, Load Line Certificate, Radio R/T Certificate, etc.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle spirits.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.

AIRPORTS: Nearest airports are at Manchester, Newcastle and Prestwick, all approx. 130 miles away.

HOLIDAYS: Cargo may be worked on following days: New Year's Day, Good Friday, Easter Monday, Whit Monday, August Monday, Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Telephone numbers of these services in order are: 692616, 693181 and 692151.

TELEPHONES: No special arrangements exist for placing telephones on board vessels.

SHORE LEAVE: Crew members may come and go at all times.

IDENTIFICATION CARDS: None required.

GARBAGE DISPOSAL: Skips are available for garbage disposal at two sites in the Queens Dock.

WASTE OIL DISPOSAL: A road tanker service can be made available for waste oil disposal. There is no special berth for this purpose but a berth can be made available.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

DELAYS: There are very seldom any delays in berthing and none in loading, discharging or bunkering.

AUTHORITY: Whitehaven Harbour Commissioners, Harbour Office, Pears House, 1 Duke Street, Whitehaven, Cumbria CA28 7HW. *Tel:* (01946) 692435. *FAX:* (01946) 691135. *Contact:* R. Rigg, General Manager.

WHITSTABLE: 51.21 N. 01.02 E. (See Plan)

APPROACHES: Vessels are advised to arrive at the Whitstable Street Buoy not later than 1.5 hours before HW.

To ensure that vessel's approach on the correct heading, (122.5°), and to assist in identifying the entrance, the Whitstable Oyster Buoy has been established in a position bearing 310°×1,950 ft. from the light on the Dolphin on the Western side of the Harbour. This is a red can, flashing 2 red every 10 seconds.

The entrance to the Harbour is marked by a Sector Light fixed to the West Quay Dolphin and shows White, Green and Red. The outer end of the East Quay is marked by 2 fixed Vertical Red Lights. The outer end of the West Quay is marked by 2 fixed vertical green lights.
Harbour Signals: A fixed Red Light shown below the fixed Harbour White Light at night means entry of vessels is prohibited. A fixed White Light *only* means Port open for entry.

PILOTAGE: Pilotage is available but Pilots must be ordered through the local Agent. A minimum of 4 hours notice is required as Pilots are from Medway Ports Authority.

MAX. SIZE: The Harbour is tidal and dries out at LW with berths of soft mud capable of accepting vessels of up to 2,000 tonnes capacity (largest vessel: LOA 95 m., max. draft 4.5 m. and 3,274 d.w.t.). There are 4 quays having a total overall length of 2,205 ft. (679 m.), with accommodation for up to 8 vessels at drafts of 15 ft. 6 in. (4.72 m.) at Spring tides and 12 ft. 0 in. (3.66 m.) at Neap tides.

VHF: Ship to shore communication is maintained by VHF Radio, the call sign being "Whitstable Harbour Radio", listening on Channel 9 (working) and 16 and 12. The station is manned for 3 hours before HW to 1 hour after HW and daily from 0800 hrs. – 1700 hrs.

TUGS: The services of a tug can be made available via Lloyd's Agent, 24 hours notice is required.

BERTHING:
East Quay: Length 228 m. 3 berths.
Bins – Stone, Slag and Ballast.
South Quay: Length 500 ft. (152.4 m.). 2 berths. 100 m. used for commercial purposes and remainder for fishing vessel.
Storage – 1. Warehouse 9,000 sq.ft. (836 sq.m.)
2. Warehouse 7,000 sq.ft. (650 sq.m.)
Open Storage – Bulk Stone, etc. – 2,000 tonnes.
North Quay: Length 58 m. Fishing vessels only.
West Quay: Length 172 m., width 40 m. Timber storage.

Depth of Water:

Quay:	*MHWS*	*MHWN*
North	13 ft. 6 in. (4.11 m.)	10 ft. (3.05 m.)
South	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)
East	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)
West	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)

CRANES: Cranes are privately owned and consist of 2 mobile cranes on tracks. SWL up to 10 tonnes.

FRESH WATER: Available.

FUEL: Available.

GARBAGE DISPOSAL: Skips are provided. Black plastic bags are available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Canterbury City Council, Whitstable Harbour Office, Harbour Street, Whitstable, Kent CT5 1AB. *Tel:* (01227) 274086. *FAX:* (01227) 265441. *Contact:* Captain J.E. Clayton, Harbour Master.

WORKINGTON: 54.39 N. 03.34 W. (See Plan)

DOCUMENTS: Standard U.K. documents.
PILOTAGE: Compulsory. Minimum notice 12 hours via vessel's Agents. Pilot boards 1 mile West of entrance.
ANCHORAGES: 1.5 miles to 2 miles N.W. of the entrance.
MAX. SIZE: 10,000 d.w.t., length 137.2 m. beam 20.4 m. and draft 8.0 m.
HEALTH: Standard U.K. procedure.
VHF: Workington Harbour Radio operates on Channels 16, 14 and 11. A listening watch is maintained daily from 2.5 hours before HW until 2 hours after HW.
TUGS: Vessels over 92 m. LOA shall, if the Harbour Master so requires, be assisted by a tug or tugs.

The port has its own tug on permanent station (10.5 ton bollard pull), 24 hours notice required.

The Port Authority also reserves the right to appoint a tug or tugs to attend any vessel if, with due regard to the prevailing circumstances, the Harbour Master deems it necessary.
BERTHING: *Tidal Harbour:* 853 m. of quayage for fishing vessels and other small craft. Depths are from 4.1 m. Neap tides to 7.2 m. Spring tides.

Prince of Wales Dock: Enclosed dock, width of entrance 21.2 m. There is 772.7 m. of quay frontage with depths from 7.2 m. Neaps to 10.2 m. Springs. The dock is 97.8 m. wide at the West end, 76.2 m. at the East end. There is a transit shed situated at the general cargo berth.
CRANES: 1 × 7 tonnes and 1 × 10 tonnes cranes are available. There are also 2 new dockside cranes with a capacity of 12 tonnes at 28 m. radius and 28 tonnes at 13 m. radius.
BULK CARGO FACILITIES: All dock cranes equipped for bulk handling. Average tonnage rate 300 t.p.h. – 400 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro facility available.
STEVEDORES: Normal working 0800 hrs. – 1700 hrs. with 3 hours evening overtime if requested. Shift working is available on request from 0600 hrs. – 1400 hrs. and 1400 hrs. – 2200 hrs.
TANKERS: Tanker Terminal operated by Simon Storage Limited at Berth No. 4.

Facility for storage up to 42,000 tons of bulk liquids, including phosphoric acid, petroleum products and chemicals.
FRESH WATER: Available.
FUEL: Available.
CONSULS: Denmark and the Netherlands: J.G. Oldfield & Co. Shipping Limited, Prince of Wales Dock, Workington, Cumbria. Tel: (01900) 64591. Fax: (01900) 604823.
TIME: GMT plus 1 hour (late March – late October), otherwise GMT.
GARBAGE DISPOSAL: One large skip provided by port which is emptied every Friday. Garbage skip's can be hired from Alco and placed immediately alongside ship (Tel: (01900) 602205). Rates by agreement.
WASTE OIL DISPOSAL: No shore tanks. Disposal is by tanker trucks, capacity 20 tonnes. Contact Alco (Tel: (01900) 602205, Fax: (01900) 601886) or Unblock (Tel: (01900) 825549).
SEAMAN'S CLUBS: None available. The port is 10 minutes walk from town of Workington.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Port of Workington, Harbour Office, Prince of Wales Dock, Workington, Cumbria CA14 2JH. *Tel:* (01900) 602301. *Telex:* 64253. *FAX:* (01900) 604696. *Contact:* Captain W.S. Worthington, Harbour Master and General Manager. D.P. Cousins, Operations Manager.

NOTES

United States of America

GENERAL

SHIPMASTER'S REPORT: January 1987.

Preparation for arrival in U.S.A. Ports

Refer to:

1. Annual Summary of Notices to Mariners (British) No. 22 – Charts and Publications.

2. C.F.R. Title 33, Part 164 (especially 164.25/164.30/164.33, 35, 37, 38, 41, 53, etc. Also 159.59 and 155.440, 700, 740, 750).

Action Required:

Purchase (if necessary) large scale U.S. charts, current Coast Pilot and Light Lists, Tide Tables, Loran Charts, Tidal Stream Tables; but British publications are usually acceptable if up to date and charts are of largest scale.

Arrival Preparations:

U.S. Department of Agriculture prepare for inspection of:

1. Galley, storerooms, and possible sealing of prohibited fruits and meats.
2. Covered and leakproof garbage cans.
3. Rat guards.
4. Declare all animals and birds.
5. Hold inspections for grain, etc. Carried out by teams of 2 men, and extremely severe. Failure of holds will result if loose paint scale, loose rust scale, insects or deposits of past cargoes are found. High powered flash-lights used to probe the most remote corners. They are very experienced and know where to look!

U.S. Public Health Service: Ship not boarded unless sickness is reported or vessel is from an infected area.

U.S. Coast Guard: Do a preliminary check, using a "Vessel Compliance Check-List" or an old "Vessel Inspection Form". Before arrival ensure navigation equipment is tested as per C.F.R.33, Part 164.25 and a good Log entry has been made. Check Oil Record Book (151.35); Placard re-discharge of Oil (155.440); Oil transfer procedures are posted (155.750); Marine Sanitation device is working and instructions for use are visible.

Read British Annual Notice to Mariner 4B (The Amver System), especially paragraph 5, (Constructive compliance with C.F.R.33, Part 161.7).

U.S. Customs: Will examine all Certificates.

U.S. Bureau of Labour: Will examine Cargo Gear Register and Certificates.

Documents:

4 Crew Lists (Form I-418).
4 Passenger Lists (Form I-418).
4 Ship's Stores Declarations (Form 1303), to include Shop and Bond Lists, Steward Stores Lists, Medicine Lists, Fire-arms Lists.
4 Crews' Effects Declarations (Form 1304).
1 Master's Oath (Form 1300).
3 Cargo Manifests (Form 1302), if cargo on board original showing all cargo on board and 2 copies showing only cargo for this port.
1 General Declaration (Form 1301), usually completed by Agent.

All ship's certificates should be to hand. Also Last Port Clearance and previous Tonnage Tax Vouchers.

All entry papers must be prepared on proper U.S. Customs Forms, with no attachments permitted.

The Crew List must be made out correctly in alphabetical manner as prescribed. Also a Crew List must be prepared at the previous port and visaed by the U.S. Consulate. For this purpose 2 copies are made.

The original has Columns 1 to 3 completed as usual, but the duplicate must list in Column 4 the date, city and country of birth, and in column 5 the Place and Authority issuing the crew member's passport or document. If this visaed Crew List cannot be produced on arrival a waiver can be granted, for which the Agent must pay U.S.$15 in cash. If the vessel has crew from the People's Republic of China or other communist countries, then shore leave will not be granted at all, without that visaed Crew List. No waiver will be issued for them.

Crewman's Landing Permits (Form I-95A) must be prepared before arrival for each man. Previously used shore passes can be used again, but only if the seaman is still on the same ship.

Some ports require less than the number of documents stated above. The Mississippi consists of 3 Custom areas (New Orleans, Gramercy, and Baton Rouge). If the the ship moves to another area, then new forms may be needed, so extra copies are useful, in the case of Forms 1303 and 1304.

AGRICULTURE: All ports.

Arrival Notification: The vessel's Master or Port Agent must provide advance notification of intent to arrive. Notice is to be received by the U.S. Department of Agriculture (USDA) no less than 12 hours before the estimated time of arrival and must include:

1. The name or other identifying feature of the vessel.
2. The date and estimated time of arrival.
3. The specific location of arrival (dock, pier, mole, anchorage, etc.).
4. The names of all foreign and noncontinental United States ports where any cargo, crew or passenger destined for the continental United States has been boarded since the vessel's most recent arrival in the United States.

Changes in the above information must be communicated as soon as known. If the place of arrival is an anchorage; subsequent movement to a pier, wharf, etc., must be reported as soon as known.

Documents: The cargo, stores, and crews' effects lists or manifests must be available for review by the boarding USDA Inspector.

Inspection: The USDA Inspector will examine the galleys, storerooms, lockers, mess areas, and crew quarters in some instances for prohibited plant materials (fruits, vegetables, and plants) and meat products. Also, inspections may be made of on-board cargo and cargo holds.

Stores Sealing: The USDA Inspector will place under seal certain fresh fruits and vegetables in stores aboard vessels calling at ports in Florida, Mississippi, Alabama, Louisiana, Texas and California. Routine sealing will be limited to fruits likely to carry exotic tropical fruit flies. In addition, USDA Inspectors at any port may require sealing of any vessel stores when pest infestations are detected. It is recommended that each vessel construct a special compartment for sealing fruits and vegetables so that it will not be necessary to seal the entire vegetable locker.

Garbage: All food wastes aboard vessels arriving from foreign or offshore areas (except Canada) must be handled in accordance with USDA Regulations. Garbage must be held aboard vessels in leakproof, covered containers inside the rails for later disposal or, it may be removed with permission and under supervision of a USDA Inspector for incineration or sterlisation in approved facilities.

Penalties: Monetary civil penalties may be imposed for violation of USDA Regulations including, but not limited to:

1. Failure to provide adequate arrival notification.
2. Breaking U.S. Department of Agriculture seals.
3. Unauthorised or unsupervised removal/disposal of garbage.
4. Unauthorised removal of fruits, vegetables, meats or animal products, or live plants.
5. Failure to keep garbage in other than closed, leakproof containers.

Treatments: If quarantine-significant pests are found aboard a vessel, an Emergency Action Notification may be issued to the Master. It will prescribe what treatments are required to the affected articles or area of the vessel and when this treatment must be accomplished.

Honeybees: Honeybees may not be brought into the United States. This is a precaution to keep out Africanised bees, which could gravely upset beekeeping in North America. Do not disturb any signs of bees on board, such as live swarms, dead bees, or hives. Contact the ship's Agent before entering U.S. ports for appropriate instructions regarding disposal and treatment from the USDA inspector.

Animals/birds: All live animals or birds aboard vessels must be retained on-board and reported to the USDA Inspector.

For additional information: Write to "Quarantines", USDA, APHIS, PPQ, Port Operations, 4700 River Road, Unit 60, Riverdale, Maryland 20737, U.S.A. Tel: (301) 734-8295. Fax: (301) 734-5786.

Notice

To: Ship's Masters:
From: United States Department of Agriculture, Animal and Plant Health Inspection Service.

On April 1st, 1985, the Animal and Plant Health Inspection Service (APHIS) will implement routine sealing of certain fresh fruits and vegetables in stores aboard vessels calling at ports in Florida, Mississippi, Alabama, Louisiana, Texas and California. Routine sealing will be limited to fruits likely to carry exotic tropical fruit flies. In addition, APHIS Officers at any port may require sealing of any vessel stores when pest infestations are detected.

This is an interim measure in preparation for full implementation of a new Maritime Clearance and Monitoring Guideline on or about June 1st, 1985. You will receive additional information in the near future.

It is recommended that each vessel construct a special compartment for sealing their fruits and vegetables so that it will not be necessary to seal the entire vegetable locker.

You are reminded that the following may result in a civil/monetary penalty:

1. Breaking U.S. Department of Agriculture seals.
2. Unauthorised or unsupervised removal/disposal of garbage.
3. Unauthorised removal of fruits, vegetables, meats or animal products, or live plants.
4. Failure to keep garbage in other than closed, leakproof containers.

Further information can be obtained by calling (713) 229-3541.

Purser's Note: It is advisable to have a locker ready prior to arrival in order that fruit and vegetables may be transferred for sealing.

ALCOHOL:

OPERATING A VESSEL WHILE INTOXICATED
COMMERCIAL VESSELS (33 CFR PART 95)

1. *Applicability:*	Any crew member, pilot, or watchstander not a regular crew member, on any U.S. vessel anywhere or any foreign vessel in the national waters of the U.S. (out to three miles offshore).
2. *Standard of intoxication:*	Blood alcohol concentration of 0.04% or more by weight; *OR* Effect of intoxicant (drug or alcoholic) on person's manner, disposition, speech, muscular movement, general appearance or behaviour is apparent by observation.
3. *Evidence of intoxication:*	Chemical test or personal observation.
4. *Who may require testing:*	Law enforcement officer or marine employer when reasonable cause exists.
5. *Reasonable cause for testing:*	When individual is directly involved in marine casualty; *OR* Individual is suspected of being intoxicated.
6. *Refusal to submit to test:*	Is admissible as evidence in any administrative procedure if ordered by marine employer *and further* will be cause for presumption of intoxication if ordered by law enforcement officer.
7. *Prohibited acts of individual while aboard vessel:*	A. Be intoxicated at any time. *B. Perform or attempt to perform any scheduled duties within four hours of consuming any alcohol. *C. Consume any intoxicant while on watch or duty.

8. Penalties (46 USC 2302(C):	A. Civil penalty of up to $1,000. B. Criminal penalty of up to $5,000 and/or imprisonment for up to one year.
9. Responsibilities:	Marine employers shall exercise due diligence to ensure compliance. If any marine employer has reason to believe a person may be intoxicated he shall not allow that individual to stand watch or perform any other duties.

*Apply only to vessels which are inspected or subject to inspection (U.S. and foreign).

HEALTH: All ports.

The U.S. Public Health Service does not maintain Quarantine Stations at each port of entry. The smaller ports are under the jurisdiction of Quarantine Stations located at strategic ports of entry. Matters of public health significance occurring on vessels destined to ports not staffed by Public Health Service personnel should be reported to the Quarantine Station having jurisdiction over that port.

Masters of Vessels arriving at United States ports

Effective July 1, 1973, Radio Pratique as a method of Quaran Clearance was discontinued at all ports under control of the Un States.

Vessels Subject to Public Health Inspection

The only vessels that will be subject to on-board public he inspection upon arrival or during stay at ports under control of the Un States are those carrying crew or passsengers having:

1. Temperature of 100°F.(38°C.) or greater, accompanied by a glandular swelling, or jaundice, or which has persisted for more 48 hours; or
2. Diarrhoea, defined as the occurrence in a 24-hour period of t of more loose stools or of greater than normal (for the person) am of loose stools; or
3. On-board occurrence of death, regardless of the signs symptoms above.

Procedures. In accordance with regulations, you must, through vessel's Agent, inform the quarantine station, having jurisdiction the intended port of your vessel's first arrival in the United States, occurrence of illness as specified above. Arriving vessels no longer to complete a Maritime Public Health Declarataion.

These changes reflect our confidence that you will continue to re in advance of arrival in the United States, the on-board occurrenc death or illness compatible with the signs and symptoms specified ab or death or illness while in port if such occurs after arrival.

CONTROLLED FLAG VESSELS:

SHIPPING AGENT GUIDELINES
UNITED STATES
PORT ENTRY REQUIREMENTS
FOR
SPECIAL INTEREST VESSELS
REVISED JUNE 1993
PREVIOUS EDITIONS OBSOLETE
Issued by Department of Transportation
Commandant U.S. Coast Guard (G-MCO)
2100 2nd Street, S.W.
Washington, DC 20593-0001
Tel: (202) 267-0480

PLEASE NOTE: The following is under constant review due to political changes taking place (See "Notes" at end of text).

1. General Requirements.

A. *INTRODUCTION.*

1. *Applicability:* This document provides guidance on requirements for entry into the United States territorial sea, internal waters, and ports for vessels registered to, or under the effective control of the nations listed below. These port entry requirements apply to commercial cargo, passenger, fishing and fisheries support vessels, public vessels and private yachts. Owners, Masters, Agents or persons in charge of these vessels should adhere to these requirements to facilitate legitimate entry of their vessels into the U.S. territorial sea, internal waters and ports.

   (a) Restricted countries:
   - Armenia
   - Azerbaijan
   - Byelarus
   - Cambodia
   - Georgia
   - Kazakhstan
   - Kyrgyzstan
   - Moldova
   - Russia
   - Tajikistan
   - Turkmenistan
   - Ukraine
   - Uzbekistan
   - Peoples Republic of China
   - Vietnam

   (b) Non-entrant countries:
   - Cuba
   - Iran
   - Iraq
   - Libya
   - Peoples Republic of Korea (North Korea)
   - Sudan
   - Syria

   Vessels registered to, owned or operated by, or chartered by *Non-Entrant Nations* are not permitted to enter the U.S. territorial sea or U.S. ports. Nations appear on this list because of U.S. diplomatic sanctions against them.

   (c) Although shipping Agents may be hired to provide services for *public vessels*, all public vessel Entry Applications and changes are handled on a government-to-government basis at the embassy level via the Department of State, and should be made at least 14 days prior to desired entry date. See Section 1.B.11. for a definition of a public vessel.

2. *Intent:* These guidelines are intended to assist shipping agents in obtaining port calls for vessels associated with the nations listed in Section 1.A.1. Access to U.S. ports by *any* foreign vessel is subject to compliance with applicable laws and regulations of the federal government and state and local authorities in the areas of their jurisdiction. Vessels from nations listed in Section 1.A.1. must comply with all applicable foreign vessel regulations *and* any additional requirements found in these guidelines.

3. *Authority:* National security interests require that the movement of any vessel within the territorial sea or internal waters of the United States be subject to U.S. Government review. Authority for this is found in the Magnuson Act (Title 50, United States Code, Section 191, 1950). The President implemented this statute by Executive Order (E.O.) 10173, as amended since by E.O.s 10277, 10352 and 11249. These orders promulgated regulations in Part 6, Chapter 1, Title 33 of the Code of Federal Regulations (CFR). These regulations assign port security responsibilities to the U.S. Coast Guard.E.O. 10173 further directed all agencies and authorities of the United States Government and all state and local authorities to support, conform to, and assist in the enforcement of these regulations and any supplemental regulations issued.

4. *Maritime Agreements:* These guidelines implement and support provisions of treaties, conventions, agreements and similar instruments in force between the Government of the United States and the Governments of certain nations concerning maritime matters. Title I, United States Code, Section 112a, directs the Secretary of State to compile a publication *United States Treaties and Other International Agreements* (UST) which contains all treaties to which the United States is a party. It also states that the UST "shall be legal evidence of the treaties, ... in all courts of the United States, ...". In some instances, these instruments and supporting documents state specific procedures for entry to United States ports, should be consulted for a complete understanding of requirements applicable to affected vessels. These guidelines address only those port entry requirements administered by the U.S. Coast Guard.

B. *DEFINITIONS.*

1. *2-Day Request (for Itinerary Changes).* This period is exactly 48 hours. It commences at the hour and minute that an Agent's Change Application Message is received at Coast Guard Headquarters. Weekends and federal holidays have no effect on 2-Day Requests.
2. *3-Day Notice:* This period is 72 hours after time of receipt, (e.g. to obtain clearance for a port call on a Saturday 0800 hrs., the notice is required at the local COTP no later than the preceding Wednesday 0800 hrs.).
3. *4-Day Request:* This period excludes the day of receipt and the day of entry (e.g., to obtain clearance for a port call on a Tuesday, the request must be received by Commandant (G-MCO) no later than the proceding Thursday).
4. *7-Day Request:* This period excludes the day of receipt and the day of entry, but not weekends or federal holidays. For example, to obtain clearance for a ship to call on the 15th, the request must be filed by the 7th of that month.
5. *Government-to-Government:* These requests are co-ordinated at the embassy level. They are handled through diplomatic channels between the two governments only. When the Initial Itinerary Request is government-to-government, all desired future itinerary changes must also be handled on a government-to-government basis.
6. *Agent-to-Coast Guard:* Co-ordination of applicable port entry requests, itinerary changes, and special waivers are specifically conducted between the U.S. Coast Guard Headquarters Special Interest Vessel Desk and the U.S. Shipping Agent representing vessels covered by these guidelines.
7. *U.S. Coast Guard Special Interest Vessel (SIV) Desk:* The individual entry of all vessel's covered by these guidelines into the U.S. territorial sea and ports is co-ordinated by the USCG's SIV Desk. The SIV Desk or Duty Officer is available 24 hours a day. During working hours, call (202) 267-0480; after hours and weekends for *non-routine matters,* call Coast Guard Headquarters Command Center at (202) 267-2100, and ask for the SIV Duty Officer.
8. *Port Call:* A port call includes anchoring or mooring within the territorial sea or, for ports not adjacent to the territorial sea, the waters of the geographical limit of the port area described in "Enclosure No.1". A vessel may be within these limits as long as it is either en route to an approved port call or departing from such a port call. A vessel's presence within these limits is only permitted within the time frame of the previously approved port call. Vessels must have either a Commandant (G-MCO) approved itinerary or provide advance notification to the local Captain of the Port for any U.S. port call.
9. *Port Area Descriptions:* Geographical port limits are defined for certain U.S. ports for purposes of administering this programme. See "Enclosures No.1 and 2" of port area descriptions. The port area descriptions apply to port calls involving the nations covered by these guidelines. Port areas, for which there is no geographical description, include that area which encompasses the physical facilities of the port, the internal water approaches, and the seaward approaches to the limits of the territorial sea.
10. *Free-Flag Vessel:* Any vessel which is registered to or owned by any nation other than those listed in Section 1.A.1.(a) or (b) of these requirements.
11. *Public Vessel:* A vessel which is owned or operated by a state and used only in non-commercial, government service. The term state (or nation) includes political subdivisions of the state as well as agencies of the state or its subdivisions. The term public vessel does not include vessels merely subsidised by the government, state-owned vessels chartered to private parties and engaged in commercial activities, or privately-owned vessels operated by government personnel that are engaged in commercial activities.
12. *Yacht:* Any vessel, under power or sail, operating for pleasure and not carrying cargo or passengers for hire.
13. *Greenwich Mean Time (GMT):* All times used in message communication are in GMT. Agents are responsible for converting GMT to local time as necessary.

C. *CHARTERED VESSELS:*

The U.S. Port Security Program also applies to free-flag vessels chartered by nations listed in Section 1.A.1.(b) of these guidelines.

1. Free-flag vessels chartered by *non-entrant nations* are considered to be under the effective control of the chartering nations, and are held to the same restrictions as vessels from non-entrant countries.

D. *NON-STANDARD ENTRIES:*

1. *Force Majeure:* Force majeure is a doctrine of international law which confers limited legal immunity upon vessels which are forced to seek refuge or repairs within the jurisdiction of another nation due to uncontrollable external forces or conditions. This limited immunity prohibits coastal state enforcement of its laws which were breached due to the vessel's entry under force majeure. A claim of force majeure is supported only by the existence of overwhelming conditions or forces of such magnitude (e.g. severe storm, fire, disablement, mutiny) that they have threatened loss of the vessel, crew or cargo, unless immediate corrective action is taken. Vessels entering U.S. waters under claim of force majeure are subject to boarding to validate the claim, and may be directed to a specific location, and not to the port of their choice. Each Coast Guard Captain of the Port has the authority to verify and accept or reject claims of force majeure for the purpose of enforcing applicable laws.

2. *Innocent Passage:* All foreign ships, including warships, are entitled to the right of passage through the U.S. territorial sea, provided the passage is innocent under the United Nations Conventions on the Law of the sea. Innocent passage means continuous and expeditious traversing of the territorial sea either without entering internal waters or passage for the purpose of proceeding to or from internal waters. It may include stopping or anchoring only when this is incident to ordinary navigation (such as when awaiting a favourable tide to traverse a particular narrows).

Innocent passage specifically does not include hovering, stopping or anchoring for other reasons, and it does not include fishing. Anchoring or slow steaming within the U.S. territorial sea to avoid early arrival in port for which the vessel holds an approved itinerary will not be considered innocent passage and may result in cancellation of the vessel's itinerary, except when the vessel's movements are directed by a Coast Guard Vessel Traffic Service (VTS) for purposes of safety or navigation.

3. *Medical Emergency:* Foreign flag vessels not previously approved for a U.S. port call may enter U.S. waters for the sole purpose of removing a crew member in need of *immediate* medical attention, or for the removal of a deceased crew member. The cognisant Coast Guard District Commander may grant permission for a vessel to enter territorial waters for a MEDEVAC (Medical Evacuation) or may also arrange a MEDEVAC outside the territorial sea. If the vessel is given permission to enter the territorial sea for a MEDEVAC, the vessel must depart upon completion of the transfer of the affected crew member. Notify the Coast Guard District Commander as soon as possible prior to desired entry.

4. *Repatriation:* It is the Department of State's position that repatriation of foreign nationals who have been evacuated for emergency medical treatment should be arranged and paid for by their countries of citizenship. Local INS and Customs should be notified of proposed repatriations. Requests for entry of vessels into U.S. territorial seas for the purpose of repatriation should be forwarded to Commandant (G-MCO) for consideration.

5. *Vessels Enroute Canadian Ports:* All vessels, including those from non-entrant nations, must pass through U.S. waters in the St.Lawrence Seaway, the Great Lakes or the Straits of Juan de Fuca enroute to ports in Canada. Vessels transiting U.S. waters for this purpose are considered to be engaged in innocent passage and Coast Guard permission for such passage is not necessary.

6. *Remote Ports Under U.S. Jurisdiction:* The requirements of this program apply to remote Alaskan ports as well as to Guam, American Samoa and the Commonwealth of the Northern Marianas Islands (CNMI – Saipan, Rota, Tinian).

7. *Deepwater Ports:* Port calls at U.S. deepwater ports require the same conditions of advance notification for entry as applicable in U.S. coastal ports (refer to Title 33, U.S.C., Section 1518(c)).

2. Port Entry Application Procedures.

A. *PORT ENTRY APPLICATION REQUIREMENTS.*

1. *General:* Agents should file Itinerary Requests for only those U.S. ports for which they will be acting as Agents. All port entry applications must be in writing. Telephone inquiries are welcome during normal business hours (0700 hrs. to 1530 hrs. Eastern time). The Special Interest Vessel Desk, in the Marine Compliance Division at U.S. Coast Guard Headquarters, can be reached by calling Tel: (202) 267-0480. For non-business hour emergencies, call U.S. Coast Guard Headquarters Command Center at Tel: (202) 267-2100. Port Entry Applications (except government-to-government) should be submitted by the vessel's Agent directly to Coast Guard Headquarters. *Telex messages are preferred.* Port Entry Applications will *not* be accepted by local or regional Coast Guard commands. Shipping Agents are responsible for ensuring that requests, whether sent electronically, by mail, or delivered by hand, arrive at Coast Guard Headquarters in time to meet all requirements. Coast Guard Headquarters will send a receipt confirmation telex within 24 hours of receiving a telex from a shipping Agent. *If you do not receive this confirmation telex within 48 hours, call the SIV Desk to inquire about your request.*

Make application only to one of the following USCG Headquarters addresses:

(a) Telex address: "Commandant (G-MCO), U.S. Coast Guard, Washington, D.C. 20593-0001. Telex No. 892427, Answerback COASTGUARDWSH."

(b) TWX address: "Commandant (G-MCO), U.S. Coast Guard, Washington, D.C. 20593-0001. TWX No. 710 822 1959, Answerback CGDOTWSH."

(c) Western Union address: "Commandant (G-MCO), U.S. Coast Guard, 2100 2nd Street, S.W., Washington, D.C. 20593-0001." (Prepaid).

(d) Port entry applications may also be sent by mail or delivered by hand. The mailing address is:

Commandant (G-MCO-2)
U.S. Coast Guard Headquarters
2100 Second Street, S.W.
Washington, D.C. 20593-0001.

2. *Required Information:* All port entry applications must provide certain information in an orderly manner (See Figure 3-A of Enclosure 3 for an example of an Initial Itinerary Request). Agents should double check all information, including spelling of foreign translations, since requests with incomplete information will be denied. All Port Entry Applications *must* include the following:

(a) Shipping agent's complete address, commercial telephone number, point of contact, and Telex/TWX number with answer back code or Western Union address.

(b) Appropriate message title identification: For example, 4-Day Request or 7-Day Request.

(c) Itinerary number: For example, Initial Itinerary, or Change 1, 2, 3, ...

(d) Vessel type: This information must precede the vessel's na
Use applicable abbreviation as follows:

Merchant Vessel	M/V
Passenger Vessel	P/V
Fishing Vessel	F/V
Fishing Support Vessel	F/V
Research Vessel	R/V
Sailing Vessel	S/V
Yacht	YCT

(e) Vessel's name, flag, call sign, and Lloyd's Number.

(f) Itinerary Information:
  (1) U.S. ports of call in the order desired. See Section for the definition of a port call.
  (2) Desired arrival and departure dates.

(g) Cargo information: Type of cargo loaded/unloaded; load port of cargo being discharged; destination for cargo b loaded.

(h) Masters' name.

(i) Next and last foreign port of call.

(*Note:* Information above is *required*; failure to provide requ information will result in denials or cancellations.)

3. *Arrival and Departure Dates:*

(a) Only one day overlap is allowed for multiple port calls Port St. Joe, 6/17-6/19, Port Canaveral 6/19-6/21, Pensa 6/21-6/27).

(b) All Approved Itineraries automatically terminate upon vessel's departure en route a foreign port of call, except w the vessel departs en route to Canadian ports, which h been noted on the Initial or Change Itinerary Message.

(c) An Approved Port Call terminates upon departure of the ve from the described port area. For instance, if a vesse approved 6/04-6/10, but departs the port area on 6 it cannot re-enter port unless a new Initial Itinerary is file

(d) The vessel's official notification period begins upon recei the agent's telex request or notice at Coast G Headquarters communication center. By return te Commandant (G-MCO) will inform the agent of the e *Greenwich Mean Time* (GMT) his message was receive

(e) Port approvals are in effect through 2359 (one minute be midnight) GMT on the final day stated on Port Call Appr Vessels must be outside of the port area by this time. Ves may not wait until this time to begin their outbound depa

4. *Advance Notices of Arrival:* None of the procedures outlined in document relieves the Master or Agent of the requirement to pro advance notice of arrival to each local Coast Guard Captain o Port (COTP) in accordance with 33 CFR 160, Subpart C, an comply with other applicable laws and regulations.

5. *Approved Itinerary Entry Times: (Port Entry).* If the vessel's itin is approved, the Agent will be notified by message specifyin dates that the vessel is authorised to be in the port(s). The ve may enter that specified port at any time during the approved d The vessel must depart the port no later than 2359 GMT o final day stated on the port call approval unless the Agent requested and received approval for an extension of the port

6. *Denials:* Vessels will be denied U.S. entry when there is insuffi information or if the agent's application message does not the time limits required by these guidelines. All denials are se the vessel's agent by the end of the working day, following the of receipt of the telex. An agent may, however, submit a corrected Entry Application for the vessel. In such cases, the o notification period commences upon receipt of the corrected E Application, not the original Entry Application which was den

7. *Early Arrival:* A vessel which holds an Approved Itinerary United States port entry shall not enter the U.S. territorial sea e than the first day on the approved itinerary. A vessel is cons to have arrived in port when it enters U.S. territorial waters, ports not adjacent to U.S. territorial waters, the port descriptions listed in "Enclosure No.1".

B. *ITINERARY CHANGE REQUESTS.*

1. *General:* Agents seek Itinerary Change Requests genera three reasons: To add ports, to change the previously app port call sequence and/or dates, and to cancel planned po after receiving approval to enter. In each case, the agent's me request must list the vessel's full remaining itinerary, in add the desired change. Failure to list the vessel's entire desir port calls will lead to cancellation of the vessel's itinerary oth the requested change. For example, if the Initial Itinerary req Providence, Morehead City and Miami, and the Agent change listing only Providence, the vessel would be cons only for entry into Providence. Two days is the minimu necessary to process itinerary change requests. Use the fo Figure 3-B to Enclosure 3 for Itinerary Change Requests. applicable to three types of itinerary change requests follo

2. *To add Port Calls:* Requests for additional port calls are re using the same criteria as for initial port calls. The followin

(a) Agent messages should be titled CHANGE 1, 2, 3, e

(b) Additional ports must be requested far enough in adv comply with the applicable request period (i.e. 7-days

(c) When an initial government-to-government req required, all requests for additional ports must be ma Embassy level.

3. *To Change Port Call Sequence/Dates:* Change requests to a vessel's approved port call sequence/dates are accepted by Commandant (G-MCO), and normally approved, provided the following criteria are met:

(a) The initial port request was not government-to-government. (All others which are government-to-government must continue to be handled at the Embassy level).

(b) The Itinerary Change Request was submitted far enough in advance. Two days is the minimum processing time required by the Coast Guard to process requests for changes in port sequence or dates. Whenever possible, the Coast Guard will try to expedite the itinerary changes, however, requests made within the minimum processing time may be delayed. Agents should submit change requests *as early as possible.*

(c) The change was submitted prior to the close of the approved itinerary (See Section 2.A.5.).

(d) The new date requested meets the minimum advance request period specified.

4. *Cancelled Port Calls:* Occasionally, cargo loading plans change and certain previously requested U.S. port calls may not be desired. Agents should notify the Coast Guard of cancelled port calls as far in advance as possible. Failure to arrive at a port within the approved itinerary dates will lead to cancellation of a vessel's remaining itinerary, and may subsequently delay entry to a previously approved port.

5. *Waivers:* The Coast Guard recognizes that unusual circumstances arise, which require agents to request waivers of the advance itinerary request period. *Approval of waiver requests will be the exception rather than the rule, and all waiver requests should be well documented.* Agents must fully elaborate on their justification for the Coast Guard to consider a waiver of these entry requirements. Agents should allow at least 48 hours for waiver requests to be processed. Waivers are not ordinarily approved for purely economic reasons.

3. Specific Entry Requirements for Restricted Nations.

A. GENERAL: Vessels that bear the flag of Restricted nations may enter the territorial sea, ports and internal waters of the United States subject to certain limitations. The following contains specific entry requirements by country for vessels registered to Restricted countries.

B. *People's Republic of China (CH):*

(1) Access for vessels from the PRC is governed under the bilateral Maritime Transport Agreement of 15th December 1988. Under the agreement, commercial cargo, fishing, fisheries support vessels, vessels engaged in hydrographic, oceanographic, meteorological or terrestrial magnetic field research, and private yachts bearing the flag of the PRC must submit a 4-day request to Commandant (G-MCO) and receive an approved itinerary for entry into Controlled Ports.

(2) Commercial cargo, passenger, fishing, fisheries support vessels, vessels engaged in hydrographic, oceanographic, meteorological or terrestrial magnetic field research, and private yachts bearing the flag of the PRC need only submit advance notice of arrival required by 33 CFR 160, Subport C, for entry into all other U.S. ports.

(3) All other PRC vessels must submit a government-to-government request and receive approval from the Department of State for entry into U.S. ports.

C.

Armenia	*(AM)*	*Moldova*	*(MD)*
Azerbaijan	*(AJ)*	*Russia*	*(RS)*
Byelarus	*(BO)*	*Tajikistan*	*(TI)*
Cambodia		*Turkmenistan*	*(TX)*
Georgia	*(GG)*	*Ukraine*	*(UP)*
Kazakhstan	*(KZ)*	*Uzbekistan*	*(UZ)*
Kyrgyzstan	*(KG)*	*Viet Nam*	

(1) Commercial cargo, passenger, fishing, fisheries support vessels and yachts bearing the flag of the above countries must submit a 7-Day Request to Commandant (G-MCO) and receive an approved itinerary for entry into the following Controlled Ports:

Kings Bay, GA
New London/Groton, CT
Port Canaveral, FL
Port Hueneme, CA
San Diego, CA

(2) Commercial cargo, passenger, fishing, fisheries support vessels and yachts bearing the flag of the above countries must submit a 3-Day Notice to the appropriate COTP for entry into the following controlled ports:

Charleston, SC
Hampton Roads, VA
Honolulu, HI
Panama City, FL
Pensacola, FL
Portsmouth, NH
Port St. Joe, FL

(3) Public vessels bearing the flag of the above countries must submit a government-to-government request and receive approval from the Department of State for entry into controlled ports.

(4) Vessels from the above listed countries need only submit advance notice of arrival required under 33 CFR 160, Subpart C, for the entry into all other U.S. ports.

Enclosure No. 1.
PORT AREA DESCRIPTION:

U.S. Port	*Geographical Description*
Alameda, California	See San Francisco, California.
Albany, New York	North of Castleton, New York Bridge Mile 135.6 on the Hudson River and South of U.S. Lock 1 at Troy, New York on the Hudson River.
Anchorage, Alaska	The waters of Cook Inlet, Northward from line drawn between Cape Douglas and Cape Elizabeth.
Antioch, California	See Stockton, California.
Apra Harbour, Guam	The waters of Apra Outer Harbour and Apra Inner Harbour.
Astoria, Oregon	Coincident with Clatsop County, Oregon.
Baltimore, Maryland	North and West of a line from North Point to Bodkin Point, but including Annapolis anchorage area between the Chesapeake Bay Bridge and Kent Point.
Bar Harbor, Maine	The waters of Frenchman Bay and Blue Hill Bay, North of Great Duck Island, East of Blue Hill Neck, and West of Schoodic Point.
Baton Rouge, Louisiana	See New Orleans, Louisiana.
Bay City, Michigan	The Saginaw River entrance to the limits of navigation.
Beaumont, Texas	The Neches River, from the Intracoastal Waterway (ICW) to Interstate 10 Bridge.
Bellingham, Washington	Bellingham Bay.
Benicia, California	See San Francisco, California.
Berkeley, California	See San Francisco, California.
Boca Grande, Florida	Boca Grande Channel, from sea buoy to Port Boca Grande on Gasparilla Island.
Boston, Massachusetts	Boston Harbour proper, including Mystic River and Chelsea River to limit of navigation and the harbors of Gloucester, Lynn, Salem and Plymouth, Massachusetts.
Brownsville, Texas	The Brownsville Ship Channel, from the sea buoy to the Brownsville Turning Basin.
Buffalo, New York	Outer Harbour, including Buffalo River to limits of navigation. Black Rock Canal, from the entrance channel downstream to its termination abeam of Placid Harbour. The Niagara River, downstream from Placid Harbour to limits of navigation.
Burnside, Louisiana	See New Orleans, Louisiana.
